Contemplé aquellos objetos con deleite. Algunas de las puntas de flecha eran tan pequeñas que parecía imposible que nadie pudiera haberlas hecho cincelándolas toscamente, pero si se las veía a plena luz se podía ver cómo se habían separado las delicadas esquirlas de piedra. Lo que era aún más increíble era que todas esas puntas de flecha, por pequeñas que fueran, tenían un borde minuciosamente dentado para hacerlas penetrantes y afiladas. Mientras examinaba los objetos, me chocó de repente su color. En las playas cercanas adonde estaban los pingüinos casi todas las piedras eran marrones o negras; para encontrarlas de colores atrayentes había que buscar mucho. Y sin embargo, cada punta de flecha, por pequeña que fuera, cada punta de lanza, cada piedra en realidad, que se había usado, había sido claramente escogida por su belleza. Colóqué todas las puntas de flecha y lanza en hileras sobre el mantel y allí brillaron como las delicadas hojas de un árbol fabuloso. Las había rojas con una veta de un rojo más oscuro, como sangre seca; las había verdes, cubiertas con una fina tracería de blanco; las había de color blanco azulado, como nácar, y amarillas y blancas, cubiertas con manchitas de dibujos semiborrados, azules o negros, allá donde los jugos de la tierra habían manchado la piedra. Cada pieza era una obra de arte, de bella forma, tallada, afilada y pulida cuidada y minuciosamente, hecha con los guijarros más bellos que el artesano había encontrado. Se veía que estaban hechas con cariño. Y todo aquello, me recordé a mí mismo, lo habían hecho aquellos indios bárbaros, toscos, salvajes y totalmente incivilizados cuya extinción no parecía provocar el mínimo remordimiento en nadie.

Huichi parecía encantado de que yo mostrase un interés y una admiración tan claros por aquellos restos y fue a su cuarto y desenterró otra caja. Esta contenía un arma extraordinaria, de piedra tallada: era como una pequeña pesa. La barra central que conectaba las dos bolas de piedra, grandes y mal formadas, cabía fácilmente en la palma de la mano, de forma que, luego, una gran bola de piedra quedaba encima del puño y otra debajo. Como todo ello pesaba unas tres libras, era un arma temible, capaz de partir un cráneo humano como si fuese un bejín. Lo siguiente que salió de la caja —que Huichi desenvolvió reverentemente de una hoja de papel de seda— parecía como si realmente hubiese sido tratado con la maza de piedra. Era la calavera de un indio, blanca como el marfil, con un gran agujero con los bordes astillados abierto en la parte superior del cráneo.

Huichi me explicó que a lo largo de los años, siempre que su trabajo le había llevado al rincón de la *estancia* * donde vivían los pingüinos, había buscado restos indios. Dijo que, al parecer, los indios habían utilizado mucho aquella zona, pero nadie sabía seguro con qué propósito determinado. Su teoría era que habían utilizado aquella gran zona llana donde ahora anidaban los pingüinos como una especie de «arena» en la que los jóvenes de la tribu practicaban el tiro con arco y flechas, el lanzamiento de la lanza y el arte de enredar las patas de sus presas con las *boleadoras.* Al otro lado de las grandes dunas, dijo, se encontraban grandes montones de conchas vacías. Yo había reparado en aquellos grandes y blancos montones de conchas, algunos de los cuales abarcaban un área de un cuarto de acre con un espesor de unos tres pies, pero estaba tan absorto filmando a los pingüinos que no me había fijado en ellos más que de pasada. La teoría de Huichi era que esa zona había sido un lugar al que venían de vacaciones, una especie de Márgate de los indios, por decirlo así. Que iban allí a alimentarse de los abundantes y suculentos mariscos, a buscar, en la playa de guijarros, piedras con las que hacer sus armas y una agradable zona llana en la que practicar con ellas. ¿Qué otra explicación podía tener que se encontrasen allí esos grandes montones de conchas vacías, y, esparcidas por las dunas y por los guijarros, una cantidad tan grande de puntas de flecha y de lanza, collares rotos y, de vez en cuando, una calavera aplastada? Debo decir que la idea de Huichi me pareció sensata, aunque supongo que un arqueólogo profesional habría encontrado alguna forma de refutarla. Me horrorizó pensar en la cantidad de preciosas y delicadas puntas de flecha que debían haberse aplastado y hecho astillas bajo las ruedas del Land Rover mientras conducíamos alegremente de acá para allá por la ciudad de los pingüinos. Decidí que al día siguiente, cuando terminásemos de filmar, buscaríamos puntas de flecha.

Resultó que al día siguiente tuvimos solamente unas horas de luz decente para filmar, así que dedicamos el resto del tiempo a gatear por las dunas, en curiosas posturas fetales, buscando puntas de flecha y otros restos indios. Pronto descubrí que no era ni remotamente tan fácil como parecía. Huichi, después de años de práctica, podía descubrir cosas con misteriosa exactitud desde una gran distancia.
— *Esto, una* —decía sonriendo, mientras señalaba con la punta del zapato un montón de guijarros. Yo miraba en el sitio indicado, pero no veía nada más que pedacitos de piedra sin trabajar.
— *Esto*,* decía otra vez, e inclinándose cogía una bella punta de flecha con forma de hoja que había estado a cinco pulgadas de mi mano. Una vez que te la habían señalado, naturalmente, resultaba tan patente que te preguntabas cómo podías no haberla visto. Poco a poco, a lo largo del día, mejoramos, y nuestro montón de hallazgos empezó a aumentar, pero Huichi seguía experimentando un malvado pla-cer en pasear erguido detrás de mí, mientras yo gateaba laboriosamente por las dunas, y tan pronto como yo consideraba que había registrado una zona minuciosamente, se agachaba y encontraba tres puntas de flechas que yo, por alguna razón, no había visto. Esto ocurría con una regularidad tan monótona que empecé a preguntarme, bajo la influencia de una espalda dolorida y unos ojos llenos de arena, si no estaría sacándose puntas de flecha de la manga, como un prestidigitador, y fingiendo que las encontraba sólo para tomarme el pelo. Pero luego mis poco amables dudas se disiparon, porque de repente Huichi se inclinó hacia adelante y señaló una zona de guijarros en que yo estaba trabajando.
—*Esto*,* —dijo, e inclinándose me señaló una esquinita diminuta de piedra amarilla sobresaliendo bajo un montón de guijarros. La miré incrédulo. Luego la cogí suavemente entre los dedos y saqué

de debajo de los guijarros una soberbia punta de flecha con un filo meticulosamente serrado. Había estado a la vista aproximadamente un cuarto de pulgada de la punta de flecha y aún así Huichi la había descubierto.
Sin embargo, no pasó mucho tiempo antes de que yo me tomase la revancha. Avanzaba por una duna hacia la siguiente zona de guijarros, cuando mi pie tocó algo blanco y resplandeciente. Me agaché, y lo cogí, y vi con asombro que era una preciosa punta de arpón de unas seis pulgadas de largo, magníficamente tallada en hueso de oso marino austral. Llamé a Huichi y cuando vio lo que yo había encontrado se quedó atónito. Lo cogió con suavidad, lo limpió de arena, y luego le dio vueltas y vueltas en sus manos, sonriendo encantado. Explicó que una punta de arpón como ésa era una de las cosas más difíciles de hallar. Él sólo había encontrado una y estaba tan aplastada que no había merecido la pena guardarla. Desde entonces había estado buscando, sin éxito, una en buen estado para añadirla a su colección.

Pronto se empezó a hacer tarde, y estábamos todos desperdigados por las dunas, encorvados y absortos en nuestra tarea. Yo rodeé un montículo de arena y me encontré en un diminuto valle entre las elevadas dunas, un valle decorado con dos o tres árboles marchitos y carunculados. Me paré a encender un cigarrillo y a descansar mi espalda dolorida. El cielo se estaba poniendo rosa y verde como solía ponerse al atardecer, y, aparte del débil murmullo del mar y el viento, todo estaba en paz y en silencio. Caminé lentamente por el vallecito y de repente noté un ligero movimiento delante de mí. Un armadillo pequeño y muy peludo se escurría por las cimas de las dunas como un juguete mecánico, dedicado a la búsqueda vespertina de alimento. Lo estuve mirando hasta que desapareció al otro lado de las dunas y luego continué. Bajo uno de los matorrales me sorprendió ver a un par de pingüinos, porque generalmente no escogían esa arena fina para excavar sus nidos. Pero esta pareja había elegido este valle por quién sabe qué razones, y había escarbado y raspado un tosco agujero en el que se acurrucaba un único polluelo cubierto de piel. Los padres castañetearon sus picos como advertencia y torcieron ¡a cabeza hasta mirarme de abajo arriba, muy indignados de que perturbase su soledad. Les miré un momento y entonces noté algo medio escondido en el montón de arena que habían escarbado para hacer su nido. Era algo liso y blanco. Me adelanté y, a pesar de la casi histeria de los pingüinos, arañé la arena. Allí, delante de mí había una calavera de indio perfecta que los pingüinos debían haber desenterrado.

Me senté con la calavera en las rodillas y fumé otro cigarrillo mientras la contemplaba. Me pregunté qué clase de hombre habría sido este indio desaparecido. Podía imaginármelo, en cuclillas en la orilla del mar, arrancando cuidadosa y hábilmente diminutas esquirlas de un trozo de piedra para hacer una de las preciosas puntas de flecha que ahora chirriaban y cloqueaban en mi bolsillo. Podía imaginármelo con su cara morena de finas facciones, y sus ojos negros, la melena hasta los hombros, su rica capa de piel de guanaco marrón ceñida, mientras se mantenía muy derecho en su caballo desherrado y salvaje. Miré las cuencas vacías de los ojos y deseé ardientemente haber conocido al hombre que había hecho algo tan bello como aquellas puntas de flecha. Me pregunté si debía llevarme la calavera a Inglaterra y ponerla en el lugar de honor de mi estudio, rodeada de sus obras de arte. Pero entonces miré en torno mío y decidí no hacerlo. El cielo tenía ahora el azul intenso del crepúsculo, con borrones rosas y verdes de nubes. El viento hacía escurrirse la arena en diminutos riachuelos que siseaban suavemente. Los extraños matorrales con formas de brujas crujían agradable y musicalmente. Pensé que al indio no le importaría compartir su última morada con los animales de la que antaño fuera su tierra, los pingüinos y los armadillos. Así que excavé un agujero en la arena, coloqué en él la calavera y la cubrí con cuidado. Cuando me puse de pie, mientras las sombras se extendían con rapidez, el lugar parecía impregnado de tristeza, y la presencia de los indios desaparecidos parecía muy cercana. Casi podía creer que si miraba rápidamente por encima del hombro, podría ver a uno a caballo, su silueta recortada sobre el color del cielo. Me sacudí esa sensación por fantástica, y regresé al Land Rover.

Mientras volvíamos a la *estancia,* traqueteando con estrépito, en el atardecer, Huichi, dirigiéndose a Marie, dijo en voz baja:
—Sabe, *señorita*,* ese lugar siempre parece triste. Se siente mucho la presencia de los indios

allí. Están alrededor de uno, sus espíritus, y a uno le dan lástima porque no parecen espíritus felices.
Ésa había sido exactamente mi sensación.
Al día siguiente, antes de irnos, di a Huichi la punta de arpón que había encontrado. Me partió el corazón dársela, pero Huichi había hecho tanto por nosotros, que parecía un pago muy pequeño por su amabilidad. Se puso muy contento, y sé que esa punta de arpón estará ahora reverentemente envuelta en papel de seda en la caja que tiene bajo su cama, no muy lejos de donde debería estar, enterrada en las grandes dunas resplandecientes, sintiendo sólo la arena moverse cuando los pingüinos andan pesadamente por encima.

LA ESTAFA DE LOS CONTADORES DE LA LUZ, PASO A PASO: EJECUCIÓN/ GOBIERNO PSOE (2)

www.estafaluz.com

Una estafa de más de 4.000 millones de euros
cometida a través del Boletín Oficial del Estado
por el Gobierno español
con la protección de los tribunales y el Congreso.

LA ESTAFA TAMBIÉN LE AFECTA A USTED.
COMBÁTALA DIFUNDIENDO ESTA PÁGINA.

www.estafaluz.com

11.- LA ESTAFA, PASO A PASO: EJECUCIÓN/ GOBIERNO PSOE (II)

En la anterior entrega le facilité los documentos que demuestran que los precios de alquiler, publicados en el Anexo de la Orden de 20.12.1984 del Ministerio de Industria, habían sido calculados en función de los datos falsos remitidos por los fabricantes de contadores, en octubre de 1984, a la Dirección General de la Energía
En esta entrega voy a explicarle la estrategia acordada, en 1987, por el PSOE y las compañías eléctricas para conseguir los siguientes objetivos:

- Cometer la estafa en los precios de alquiler sin necesidad de que los fabricantes remitieran periódicamente, al Ministerio de Industria, datos actualizados en precios de lista y descuentos medios, aplicados a mayoristas.
- Aumentar la cantidad estafada.

Desde el 29.12.1984 hasta el 25.02.1987, el Gobierno utilizó el Boletín Oficial del Estado para encubrir que los precios de alquiler habían sido calculados partiendo de datos falsos. Desde el 25.02.87, el Gobierno utiliza el Boletín Oficial del Estado como instrumento directo de la estafa, ya que desde esta fecha es el propio Boletín Oficial del Estado el que miente. El Gobierno, por tanto, es autor de un delito de estafa continuada, pues desde hace veinticuatro años utiliza, *con ánimo de lucro*, *engaño bastante para producir error en otro* (el abonado que tiene alquilado el contador), i*nduciéndolo a realizar un acto de disposición* (el pago del precio de alquiler publicado en el BOE) *en perjuicio propio*.

11.1- La Orden de 20.12.1984: El cimiento de la estafa

Por lo que respecta a la retribución de las vacaciones de los trabajadores a que este artículo se refiere, éstos percibirán, conjuntamente con el salario mínimo interprofesional fijado en el artículo 1.º, la parte proporcional de éste correspondiente a las vacaciones legales mínimas, en los supuestos en que no existiera coincidencia entre el período de disfrute de las vacaciones y el tiempo de vigencia del contrato. En los demás casos, la retribución del período vacacional se efectuará de acuerdo con el artículo 38 del Estatuto de los Trabajadores y demás normas de aplicación.

DISPOSICIONES FINALES

Primera.—El presente Real Decreto surtirá efectos durante el período comprendido entre el 1 de enero y 31 de diciembre de 1985.

Segunda.—Se autoriza al Ministro de Trabajo y Seguridad Social para dictar las disposiciones necesarias en aplicación y desarrollo de lo dispuesto en este Real Decreto.

Dado en Madrid a 28 de diciembre de 1984.

JUAN CARLOS R.

El Ministro de Trabajo y Seguridad Social,
JOAQUIN ALMUNIA AMANN

MINISTERIO DE INDUSTRIA Y ENERGIA

28290 *ORDEN de 20 de diciembre de 1984 por la que se actualizan los alquileres de los equipos de medida de energía eléctrica.*

Ilustrísima señora:

Los precios de los alquileres de los aparatos contadores no especiales, de capacidad hasta 50 amp. por hilo, e interruptores de control de potencia, alquilados por las Empresas eléctricas a sus abonados, fueron regulados por última vez mediante la Orden ministerial de fecha 11 de junio de 1967. La evolución experimentada desde entonces por los precios de los aparatos hace que tales alquileres no cubran en absoluto la función económica de permitir a las Empresas alquiladoras la adecuada renovación y actualización del parque de contadores, con los consiguientes perjuicios que de ello se derivan para la calidad y fiabilidad de la medida.

La condición 10.ª de la vigente póliza de abono, aprobada por el Real Decreto 1725/1984, de 18 de julio, establece que el Ministerio de Industria y Energía fijará las cantidades concretas máximas que se pueden aplicar por su alquiler con arreglo a unas directrices fijadas en las mismas. Asimismo la Orden ministerial de 1 de agosto de 1984, por la que se completan las condiciones de aplicación de las nuevas tarifas eléctricas para suministros a Ayuntamientos, establece la obligatoriedad de facilitar en régimen de alquiler a los Ayuntamientos los equipos de energía reactiva y activa que en dicha Orden se fijan.

Debido a la inadecuación de los precios a sus costes reales se precisa establecer un período transitorio de adaptación a los nuevos precios para los abonados que ya tenían sus equipos de medida en régimen de alquiler.

En su virtud, este Ministerio, haciendo uso de las facultades conferidas por el artículo 6.º del referido Real Decreto, ha tenido a bien disponer lo siguiente:

Primero.—Los precios máximos de alquiler de los aparatos de medida y control de conexión directa utilizados en los suministros de hasta 63 amp. por hilo serán los siguientes:

	Ptas/mes
a) Contadores simple tarifa:	
Energía activa	
Monofásicos:	
Tarifa 1.0	71
Resto	77
Trifásicos o doble monofásicos	228
Energía reactiva (a efectos de lo dispuesto en las Ordenes ministeriales de 1-8-1984 y 20-11-1984)	
Monofásicos	106
Trifásicos o doble monofásicos	257
b) Contadores discriminación horaria:	
Monofásicos (doble tarifa)	165
Trifásicos o doble monofásicos (doble tarifa)	322
Monofásicos (triple tarifa)	259
Trifásicos (triple tarifa)	415
Contactor	24
Reloj conmutador	147
c) Interruptor de control de potencia (por polo)	4

Segundo.—Para el resto de aparatos y equipos auxiliares de medida y control, el canon de alquiler se determinará aplicando una tasa del 1,25 por 100 mensual al precio medio de los mismos.

Tercero.—La revisión de los precios máximos de alquiler se realizará conjuntamente con la de las tarifas eléctricas, considerando la evolución de los precios del mercado y del índice de precios industriales publicados por el Instituto Nacional de Estadística.

Cuarto.—La presente Orden ministerial entrará en vigor al día siguiente de su publicación en el «Boletín Oficial del Estado».

DISPOSICION TRANSITORIA

Los equipos de medida, en régimen de alquiler, instalados con anterioridad al 28 de septiembre de 1984, fecha de entrada en vigor del Real Decreto 1725/1984, de 18 de julio, tendrán un descuento sobre el precio establecido con carácter general en la presente Orden ministerial del 40 por 100 hasta el día 31 de marzo de 1985 y del 20 por 100 desde el día 1 de abril de 1985 hasta el día 31 de diciembre de 1985, excepto los contadores monofásicos de energía activa, cuyos descuentos serán del 60 por 100 hasta el día 31 de marzo de 1985, del 40 por 100 desde el día 1 de abril de 1985 hasta el día 31 de diciembre de 1985 y del 20 por 100 desde el día 1 de enero de 1986 hasta el día 30 de junio de 1986. Los valores concretos de los precios de alquiler a aplicar se reflejan en el anexo a la presente Orden ministerial.

Lo que comunico a V. I. para su conocimiento y efectos.
Madrid, 20 de diciembre de 1984.

SOLCHAGA CATALAN

Ilma. Sra. Directora general de la Energía.

ANEXO

Precio de los alquileres, con sus descuentos, hasta tanto no exista modificación en el precio establecido con carácter general

	Nuevos	Existentes: Hasta 31-3-85	Existentes: Desde 1-4-85 hasta 31-12-85	Existentes: Desde 1-1-86 hasta 30-6-86
a) Contadores simple tarifa:				
Energía activa				
Monofásicos:				
Tarifa 1.0	71	28	43	57
Resto	77	31	46	62
Trifásicos o doble monofásicos	228	137	182	228
Energía reactiva				
Monofásicos	106	64	85	106
Trifásicos o doble monofásicos	257	154	206	257
b) Contadores discriminación horaria:				
Monofásicos (doble tarifa)	165	99	132	165
Trifásicos o doble monofásicos (triple tarifa)	322	193	258	322
Monofásicos (triple tarifa)	259	155	207	259
Trifásicos o doble monofásicos (triple tarifa)	415	249	332	415
Contactor	24	14	19	24
Reloj conmutador	147	88	118	147
c) Interruptor de control de potencia (por polo)	4	2	3	4

Estos precios son los indicados en la columna cuarta de la página 4 del *"Informe de 18.12.1984 de la DG de la Energía sobre propuesta de Orden ministerial por la que se revisan los alquileres de los equipos de medida de energía eléctrica"* (se incluye a continuación la citada página 4)

La Orden de 20.12.1984 del Ministerio de Industria (BOE de 29.12.1984) tiene varias particularidades que permiten calificarla de especial:

- *"Continúan en vigor los precios máximos de alquiler de los equipos de medida establecidos en la Orden de 20 de diciembre de 1984"*
  - En la Disposición primera y en el Anexo publica unos precios de alquiler que son, como mínimo, el doble de los que habrían resultado si los datos utilizados por el Ministerio de Industria para calcularlos no hubieran sido falsos.

La Orden de 20.12.10984 fue derogada por la Orden de 20.02.1987, que, de paso, incrementó en un 6.5% el precio de alquiler del contador doméstico, pasando dicho precio de 77 a 82 pesetas/mes (antes de la Orden de 20.12.84 era 3,70 pesetas/mes):

> "DISPOSICIÓN DEROGATORIA.- Quedan derogadas las Órdenes (...) de 20 de diciembre de 1984 (...) así como cualesquiera otras disposiciones de igual o menos rango, en cuanto se opongan a lo dispuesto en la presente Orden".

De la propia Disposición derogatoria se deduce que la Orden de 20.02.1987 no derogó el Real Decreto 1725/1984, pues éste es de categoría superior a aquélla. Ello lo confirma, además, la exigencia legal de que *"si una ley ha sido aprobada con el carácter de ley*

orgánica, tiene que ser modificada o derogada por otra ley orgánica; si ha sido aprobada como ley ordinaria, tiene que ser modificada o derogada por otra ley ordinaria, y así sucesivamente" (" El coste de la no reforma" / Javier Pérez Royo, catedrático de Derecho Constitucional de la Universidad de Sevilla/ El País, 12.10.2003).

Por tanto, al ser derogada la Orden de 20.12.1984 (y, en consecuencia, su Disposición tercera), el criterio legal de cálculo del precio de alquiler volvió a ser el establecido en la condición general 16 del Anexo II del Real Decreto 1725/1984:

> *"El Ministerio de Industria fijará las cantidades concretas máximas que las compañías eléctricas pueden aplicar por el alquiler de sus equipos de medida no especiales, en base al 1.25% mensual del precio medio de mercado del aparato".*

El propio Boletín Oficial del Estado reconoce en varias ocasiones que tras la entrada en vigor de la Orden de 20.02.87, el criterio legal de cálculo del precio de alquiler volvió a ser el establecido en la condición general 16 del Anexo II del Real Decreto 1725/1984; como en la Orden de 12.01.95 (BOE de 14.01.95), que en su párrafo cuarto afirma:

> *"La presente Orden (...) también fija las cantidades concretas máximas aplicables por alquiler de equipos de medida, de acuerdo con la Condición 16 de la vigente Póliza de Abono, aprobada por el Real Decreto 1725/1984, de 18 de julio".*

Pues bien, como le demostraré seguidamente, el Boletín Oficial del Estado (es decir, el Gobierno) miente cuando afirma que desde la entrada en vigor de la Orden de 20.02.1987,

> *"las cantidades concretas máximas aplicables por alquiler de equipos de medida se han calculado de acuerdo con la Condición 16 de la vigente Póliza de Abono, aprobada por el Real Decreto 1725/1984, de 18 de julio".*

11.2.- El Boletín Oficial del Estado miente: Prueba documental 1

Como confirman este escrito de 20.12.1983 de la DG de Energía a los fabricantes, y el estudio económico adjunto al *"Informe de 18.12.84 sobre propuesta de orden ministerial por la que se revisan los alquileres de los equipos de medida de energía eléctrica"*, para calcular el precio medio de mercado de un contador (y, por tanto, su precio de alquiler), el Ministerio de Industria necesita que los fabricantes le suministren previamente dos datos:
1) a) el precio de lista del contador y **b)** el descuento medio aplicado a las compañías eléctricas.

Pues bien, es imposible que los precios de alquiler publicados en el BOE, desde la entrada en vigor de la Orden de 20.02.1987, hayan sido calculados "*de acuerdo con la condición 16 de la vigente Póliza de Abono, aprobada por el Real Decreto 1725/1984, de 18 de julio*", ya que:

> - la condición 16 establece que el precio máximo de alquiler se calcula aplicando el 1.25% mensual al precio medio de mercado del contador
>
> - el precio medio de mercado del contador se calcula multiplicando el precio de lista por el descuento medio aplicado a las compañías eléctricas

Puesto que la última vez que los fabricantes facilitaron al Ministerio de Industria precios

de lista y descuentos medios aplicados a las compañías eléctricas fue el 23.12.1986, según afirma el propio presidente del Grupo de fabricantes de contadores, Félix Rivas Perales, en su declaración de 29.05.2002 ante el Juzgado Central de Instrucción 5, la cual contiene numerosas falsedades, que detallaré y probaré documentalmente en la entrega correspondiente a IMPLICADOS/ FABRICANTES DE CONTADORES.

En Madrid, a 29 de mayo de 2.002.

Ante el Iltmo. Sr. Magistrado-Juez Central de Instrucción número 4, con mi asistencia el Secretario Judicial, comparece la persona arriba identificada; asisten a este acto el Letrado D. Juan Manuel Casanueva Pérez-Llantada, con carnet profesional número 27962, del Ilustre Colegio de Abogados de Madrid.

A este acto asisten asimismo, el Letrado D. Carlos Enrique Alonso Pérez, Con número profesional 60.9107, del Ilustre Colegio de Abogados de Madrid, en nombre y representación de Antonio Moreno Alfaro. El Letrado D. Pascual Sala Atienza, con Carnet Profesional número 69605 del Ilustre Colegio de Abogados de Madrid, en nombre y representación de Pedro Manuel Rivero Torre, y el letrado D. José Riba Vidal, en nombre y representación de Gustavo Eisenberg.

El compareciente es seguidamente informado por S.S.ª de los derechos que le asisten a tenor de lo establecido en los artículos 118 y 520 de la Ley de Enjuiciamiento Criminal, y artículo 24 de la Constitución Española. El Letrado asistente manifiesta su conformidad con la información de derechos que ha sido realizada al compareciente, y este, interrogado seguidamente, ***MANIFIESTA:***

Que ha sido puesto en conocimiento de la querella y no está de acuerdo con lo que en la misma se manifiesta ni son ciertos los hechos que se le imputan. Que el declarante era y sigue siendo consejero delegado de Siemens Metering. Que respecto de la determinación del precio del alquiler de los contadores, el Ministerio de Industria les remitió un oficio interesando una serie de datos consistente en lista de precios y descuentos medios vigentes, datos que fueron remitidos a dicho organismo, adjuntando en este acto tres comunicaciones por las que la empresa remitía al Ministerio tales datos. Que a partir de esta última comunicación no se volvió a interesar el Ministerio lista alguna. Que las listas de precios comprenden el precio de venta del aparato, y que después se solían hacer importantes descuentos a empresas minoristas que eran grandes clientes de la compañía.

Adjunto a esta primera página de su declaración como imputado ante el Juzgado Central de Instrucción nº 5 se incluyen los tres documentos citados por Félix Rivas Perales. Las fechas de remisión al Ministerio de Industria son 13.01.1984, 01.10.1984 y 23.12.1986. Así pues, después del 23.12.1986, los fabricantes no volvieron a remitir al Ministerio de Industria listas de precios ni información sobre descuentos medios aplicados a mayoristas. Como demostraré en una próxima entrega, los tres escritos adjuntos proceden de una manipulación efectuada por Félix Rivas Perales sobre los escritos originales.

La declaración ante el Juzgado Central de Instrucción 5, de 29.05.2002 , de Félix Rivas Perales prueba, por sí sola, que el Boletín Oficial del Estado miente cuando afirma que los precios de alquiler publicados a partir de la entrada en vigor de la Orden de 20.02.1987 han sido calculados *"de acuerdo con la condición 16 de la vigente Póliza de Abono, aprobada por el Real Decreto 1725/1984, de 18 de julio"*, ya que la última vez que el Ministerio de Industria dispuso de los datos necesarios (lista de precios y descuento medio aplicado a las compañías eléctricas) para calcular el precio de alquiler "*de acuerdo con la condición 16 de la póliza de abono aprobada por el Real Decreto 1725/1984*" fue el 23.12.1986.

Precio de contadores y otros aparatos.-

Muy señores nuestros:

Acusamos recibo de su carta de la referencia, complaciéndono en adjuntar a la presente lista de precios de fecha Septiembre 1.983, qu actualmente aplicamos a nuestros contadores eléctricos.-

Sobre el precio de la citada tarifa, hacemos un descuento pr medio del 18%.-

Con este motivo, aprovechamos para saludarles muy atentament

11.3.- El Boletín Oficial del Estado miente: Prueba documental 2

Ante la difícil situación económica creada a los fabricantes por el Gobierno, como consecuencia de no publicar la normativa oficial sobre mantenimiento y reposición de los parques de contadores, la Asociación nacional de bienes de equipo, a la que pertenece el Grupo de fabricantes de contadores, remitió el 26.05.1996 un escrito a la DG de la Energía, al que adjuntan una tabla y un gráfico, que bastan por sí solos para demostrar la estafa en los precios de alquiler.

Asunto: **Borrador de Orden Ministerial sobre Verificación Periódica de contadores eléctricos de inducción clase 2, en conexión directa, a tarifa simple o tarifas múltiples, destinados a la medida de energía activa en corriente monofásica o polifásica de frecuencia 50 Hz.**

Querida Directora General:

Llegado a conocimiento de esta Agrupación de SERCOBE, su interés por conocer la posición de los fabricantes en lo que se refiere a su intervención en el borrador de Orden Ministerial que regula la Verificación Periódica de los contadores eléctricos de inducción, a continuación le puntualizo el desarrollo de los principales acontecimientos en relación a este asunto desde 1986, fecha del primer borrador de Orden Ministerial.

En la versión redactada y distribuida por el Centro Español de Metrología en Mayo de 1988, se indicaba que la Orden de 20.12.84 del Ministerio de Industria y Energía, revisó los precios máximos de alquiler de contadores para tomar en consideración la **"adecuada renovación y actualización del parque de contadores"** por las Empresas Eléctricas, con el objeto de evitar "los perjuicios para la calidad y fiabilidad de la medida" que se derivan de la no renovación y actualización del parque.

El instrumento legal establecido por el Estado para que el control metrológico del parque de contadores se realice con calidad y fiabilidad es la VERIFICACION PERIODICA, establecida desde 1985 por la Ley de Metrología, pero que hasta la fecha no se ha puesto en marcha.

Independientemente de las actuaciones voluntarias de renovación del parque que puedan haber efectuado las Empresas Eléctricas, al no ser todavía obligatorio este control metrológico mediante la VERIFICACIÓN PERIÓDICA, las acciones de renovación y actualización de contadores han sido limitadas, existiendo aún centenares de miles de contadores eléctricos instalados con más de 40 años de antigüedad y millones con más de 30 años, que no están siendo sometidos a un control legal que garantice la exactitud de la medida.

Ya en 1989, el CEM requirió por escrito a las Empresas Eléctricas que incluyeran en sus bases de datos de clientes información relativa a los contadores de su red, información imprescindible para aplicar cualquier normativa al efecto. Estas trasladaron la petición a los fabricantes, lo que obligó a una ingente tarea de recopilación de datos de todos los contadores vendidos en el mercado español en la últimas décadas, para ponerlos a disposición del sector eléctrico.

Este trabajo quedó completado en 1989, y a principios de 1990 se entregó a todas las Empresas Eléctricas que manifestaron quererlo utilizar. Desde entonces, los registros se actualizan regularmente con los últimos suministros.

TELEFONO (91) [illegible] - TELEGRAMAS [illegible] - TELEX [illegible] - TELEFAX [illegible]

Por razones ajenas a los fabricantes, esta Orden Ministerial no avanzó hasta comienzos de 1995, fecha en la que el Centro Español de Metrología reinició los trabajos distribuyendo un borrador que proponía una limitación de 30 años en la vida útil del contador. Para perfeccionar este borrador, las empresas del sector eléctrico y los fabricantes de contadores prestaron conjuntamente a lo largo de ese año, su colaboración al CEM.

La participación activa de los fabricantes finalizó con una reunión en UNESA el 4.12.1995, en la que manifestaron su conformidad a cualquiera de las soluciones: vida útil limitada, o ilimitada mientras se mantuviese la calidad de la medida. En esta reunión se aceptó finalmente la propuesta de las empresas eléctricas de establecer un periodo limitado de vida útil para los contadores fabricados con anterioridad a 1976. Estas conclusiones fueron remitidas al CEM en nuestro escrito de 5.12.1995.

En la actualidad, esta Agrupación desconoce la situación en que se encuentra este proyecto de Orden Ministerial.

Entretanto, la situación del sector de fabricantes es de franca recesión, situación que se explica por sí misma en el gráfico anexo. Tal como ya se expuso a Unesa a finales de 1995, estas pesimistas expectativas se aliviarían con la entrada en vigor de esta Orden Ministerial.

Quedando a su disposición para aquello que considere necesario, le saluda atentamente,

G. Eisenberg

Gustavo Eisenberg

El gráfico anexo a este escrito es una velada amenaza de los fabricantes al Gobierno para que apruebe urgentemente la Orden ministerial sobre verificación periódica de contadores, cuya inexistencia es la causa de *"las pesimistas espectativas y la situación de franca recesión del sector"*. El gráfico es una velada amenaza porque las curvas II y III del mismo demuestran que el BOE está siendo utilizado para cometer una estafa en los precios de alquiler de los contadores.

(4) Según últimas previsiones para el IPC

Las dos filas recuadradas en rojo, representadas en el gráfico de la página siguiente, bastan por sí solas para demostrar la estafa en los precios de alquiler de los contadores. La estafa, planificada en 1984 por el PSOE y perfeccionada en 2001 por el PP, genera cada día unos 350.000 euros, afecta a 23 millones de clientes de las compañías eléctricasy lleva reportados a éstas al menos la mitad de los más de 7.500 millones de euros cobrados ilegalmente por dicho alquiler.

En la tabla, las dos últimas filas corresponden al precio medio de mercado del contador monofásico de simple tarifa (que es el instalado en la práctica totalidad de las viviendas) y al precio de alquiler de dicho contador en los años 1986 a 1997. Ambos precios están indicados en valores porcentuales refereridos referidos a los precios existentes en 1986, que se toman como valor 100.

En el gráfico, los valores indicados en la fila penúltima de la tabla (precio medio de mercado del contador monofásico) están representados mediante la curva III, y los indicados en la fila última (precios de alquiler del contador monofásico) están representados en la curva II.

En la tabla y, sobre todo, en el gráfico se ve claramente que los valores del precio medio de mercado y del precio de alquiler no sólo no coinciden, sino que divergen, pues mientras el precio medio de mercado desciende, el precio de alquiler aumenta.

Dicha divergencia es la prueba indiscutible de que los precios de alquiler no han sido calculados aplicando el 1.25% mensual a los precios medios de mercado, que es lo establecido en la condición 16 del Anexo II del Real Decreto 1725/1984, pues si así fuera, los valores de las dos últimas filas de la tabla y las curvas II y III coincidirían, como le demuestro seguidamente.

Aunque los valores indicados en la tabla y el gráfico son porcentuales, en las diligencias previas 280/2000 del Juzgado Central de Instrucción 5 hay numerosos documentos que permiten convertir dichos valores a pesetas. Uno de esos documentos es la factura adjunta al escrito de 09.10.2000 de Schlumberger a la Comisión Nacional de Energía, pues en ella consta que el precio medio de mercado al cual Schlumberger vendió en 1997 a las compañías eléctricas el contador monofásico de simple tarifa fue 4.655 pesetas.

Montornès, 9 de Octubre de 2000

Estimado señor,

Nos dirigimos a Vd. en relación a su escrito del 2?.9.00, por el que nos solicitan datos relativos a las ventas de contadores eléctricos, efectuadas en España durante los tres últimos ejercicios.

En anexo adjuntamos la información, clasificada de acuerdo a la denominación por tipos, señalada en el anexo II del R.D. 3?66/1999 del 30 de Diciembre y diferenciada según el grupo de clientes es decir, Empresa Eléctrica o Distribuidor Mayorista.

Respecto al anexo adjunto, les señalamos el carácter estrictamente confidencial de los datos reflejados en el mismo.

Quedamos a su disposición para cualquier información adicional que puedan precisar.

Muy atentamente,

Germán Garrido

AENOR

Dado que el valor porcentual del precio medio de mercado en 1997 era 87,23 (última celda de la penúltima fila de la tabla) respecto al precio medio de mercado en 1986, que es el valor de referencia, basta hacer una simple regla de tres para obtener el precio medio de mercado en pesetas en 1986.

PMM1986= (100/ 87,23) x 4.655= 5.336 pesetas donde PMM1986= Precio medio de mercado en 1986

Una vez obtenido el precio medio de mercado en pesetas en 1986, la obtención de los precios en pesetas en los años 1987 a 1996 es inmediata, pues basta multiplicar por 5.336 el valor porcentual en cada uno de dichos años:

Precio medio de mercado en pesetas
PMM1986= (100,00/100) x 5.336= 5.336 (PMM1986= Precio medio de Mercado en 1986)
PMM1987= (103,27/100) x 5.336= 5.510
PMM1988= (110,53/100) x 5.336= 5.898
PMM1989= (113,80/100) x 5.336= 6.072
PMM1990= (116,45/100) x 5.336= 6.214
PMM1991= (116.23/100) x 5.336= 6.202
PMM1992= (110,50/100) x 5.336= 5.896
PMM1993= (102,96/100) x 5.336= 5.494
PMM1994= (102,50/100) x 5.336= 5.469
PMM1995= (99,91/100) x 5.336= 5.331
PMM1996= (94,19/100) x 5.336= 5.026
PMM1997= (87,23/100) x 5.336= 4.655

Si los precios de alquiler a los cuales corresponden los valores porcentuales indicados en la última fila de la tabla hubieran sido calculados aplicando el 1.25% mensual a los precios medios de mercado, los precios de alquiler serían los siguientes:

Precio de alquiler en pesetas/mes
PA1986= (1.25/100) x 5.336= 66,7 (PA1986= Precio de alquiler en 1986)
PA1987= (1.25/100) x 5.510= 68,9
PA1988= (1.25/100) x 5.898= 73,7
PA1989= (1.25/100) x 6.072= 75,9
PA1990= (1.25/100) x 6.214= 77,7
PA1991= (1.25/100) x 6.202= 77,5
PA1992= (1.25/100) x 5.896= 73,7
PA1993= (1.25/100) x 5.494= 68,7
PA1994= (1.25/100) x 5.469= 68,4
PA1995= (1.25/100) x 5.331= 66,6
PA1996= (1.25/100) x 5.026= 62,8
PA1997= (1.25/100) x 4.655= 58,2

Para pasar estos precios a valores porcentuales, basta con dividirlos por el precio de alquiler en 1986 (66,7 pesetas) y multiplicar por 100:

Precio de alquiler en %
PA1986= (66,7/66,7) x 100= 100,00 (PA1986= Precio de alquiler en 1986)
PA1987= (68,9/66,7) x 100= 103,27
PA1988= (73,7/66,7) x 100= 110,53
PA1989= (75,9/66.7) x 100= 113,80
PA1990= (77,7/66,7) x 100= 116,45
PA1991= (77,5/66,7) x 100= 116,23
PA1992= (73,7/66,7) x 100= 110,50
PA1993= (68,7/66,7) x 100= 102,96
PA1994= (68,4/66,7) x 100= 102,50
PA1995= (66,6/66,7) x 100= 99,91
PA1996= (62,8/66,7) x 100= 94,19
PA1997= (58,2/66,7) x 100= 87,23

Si compara estos valores porcentuales de los precios de alquiler con los valores porcentuales de los precios medios de mercado indicados en la penúltima fila de la tabla, verá que coinciden, lo cual es lógico, pues los precios de alquiler proceden de multiplicar por una constante (k= 1,25/100) los precios medios de mercado.

Por tanto, si los precios de alquiler, (que corresponden a los valores porcentuales de la última fila de la tabla y la curva II del gráfico), hubieran sido calculados aplicando el 1,25% mensual a los precios medios de mercado (a los que corresponden los valores porcentuales de la penúltima fila de la tabla y la curva III del gráfico), los valores porcentuales de la última fila coincidirían con los de la penúltima fila y la curva II coincidiría con la curva III.

Dado que dicha coincidencia no existe, la tabla y el gráfico -adjuntos al escrito de 26.05.1996 de la Asociación nacional de bienes de equipo a la Comisión Nacional de Energía- son una prueba irrefutable de que el Boletín Oficial del Estado miente al afirmar que los precios de alquiler aprobados por la Orden de 12.01.1995 han sido calculados *" de acuerdo con la condición 16 de la vigente Póliza de Abono, aprobada por el Real Decreto 1725/1984, de 18 de julio".*

Disposición adicional cuarta. *Abono de cantidad compensatoria.*

De acuerdo con lo previsto en la disposición adicional decimoctava de la Ley de Presupuestos Generales del Estado para 1995, los pensionistas de clases pasivas que hubieran percibido durante 1994 pensiones objeto de revalorización, así como aquellos que hubieran percibido la cuantía correspondiente a las pensiones mínimas o al límite máximo de percepción de las pensiones públicas, o sus herederos, recibirán durante 1995, y en un único pago, una cantidad equivalente a la que resulte de aplicar a la pensión percibida durante 1994 el coeficiente 0,0086957.

Lo dispuesto en el párrafo anterior será, asimismo, de aplicación a las pensiones de clases pasivas con fecha inicial de abono durante 1994 para cuya determinación se hubieran tenido en cuenta haberes reguladores susceptibles de actualización en el mencionado ejercicio.

Disposición derogatoria única. *Derogación de disposiciones anteriores.*

Queda derogado el artículo 1 del Real Decreto 306/1985, de 20 de febrero, así como los preceptos contenidos en las disposiciones de igual o inferior rango en lo que se opongan a lo dispuesto en el capítulo III de este Real Decreto.

Disposición final primera. *Habilitación para disposiciones de desarrollo.*

Se autoriza al Ministro de Economía y Hacienda para que dicte las disposiciones de carácter general que resulten necesarias para la aplicación de este Real Decreto.

Disposición final segunda. *Entrada en vigor y efectos económicos.*

El presente Real Decreto entrará en vigor el día siguiente al de su publicación en el «Boletín Oficial del Estado», sin perjuicio de que los efectos económicos, respecto de las materias reguladas en los capítulos I y II, se retrotraigan, cuando así proceda, al 1 de enero de 1995. Por lo que se refiere al capítulo III, sus efectos económicos serán los que en cada caso procedan, según la normativa general aplicable a las materias contenidas en el mismo.

Dado en Madrid a 13 de enero de 1995.

JUAN CARLOS R.

El Ministro de Economía y Hacienda,
PEDRO SOLBES MIRA

MINISTERIO DE INDUSTRIA Y ENERGIA

1048 *ORDEN de 12 de enero de 1995 por la que se establecen las tarifas eléctricas.*

El artículo 6 del Real Decreto 2550/1994, de 29 de diciembre, establece que el Ministerio de Industria y Energía realizará la distribución del aumento promedio global tarifario para 1995 entre las distintas tarifas para la venta de energía eléctrica que aplican las empresas acogidas al SIFE y asimismo le faculta para dictar nuevas formas de aplicación de los complementos tarifarios, la realización de las modificaciones oportunas que permitan una aplicación más flexible y precisa de la normativa existente y para desarrollar el sistema de tarifas establecido con carácter experimental de tarifa horaria de potencia, que podrá ampliarse a nuevos consumidores. Este sistema seguirá teniendo carácter experimental y coexistiendo con el general, y será optativo para el consumidor.

Asimismo, el párrafo segundo del artículo 3 del citado Real Decreto, faculta al Ministerio de Industria y Energía, a la inspección de las condiciones de la facturación a aquellos suministros o los que se apliquen complementos tarifarios establecidos en la normativa vigente, directamente o a través de la Oficina de Compensaciones de la Energía Eléctrica (OFICO) o del Organismo que el Ministerio designe para ello.

Por otra parte, el artículo 14 del Real Decreto 2366/1994, de 9 de diciembre, sobre producción de energía eléctrica por instalaciones hidráulicas, de cogeneración y otras abastecidas por recursos o fuentes de energía renovables, por el que se fijan los precios de la energía entregada a la Red de Servicio Público por estos productores, términos de potencia y energía, dispone que estos precios se actualizarán por el Ministerio de Industria y Energía con la variación media de las tarifas eléctricas.

A los expresados efectos, la presente Orden desarrolla las previsiones de los citados Reales Decretos y también se fijan las cantidades concretas máximas aplicables por alquiler de equipos de medida, de acuerdo con la Condición 16 de la vigente Póliza de Abono, aprobada por el Real Decreto 1725/1984, de 18 de julio, se actualizan las cantidades a satisfacer por los derechos de las acometidas eléctricas, a tenor del artículo 24 del Real Decreto 2949/1982, de 15 de octubre, y se fija el porcentaje de la venta de energía como contraprestación de los servicios prestados por «Red Eléctrica de España, Sociedad Anónima», conforme lo dispuesto en la disposición transitoria del Real Decreto 91/1985, de 23 de enero.

En su virtud, este Ministerio ha dispuesto:

Primero.—Las tarifas eléctricas para 1995, el desarrollo de la tarifa horaria de potencia, los precios de la energía entregada a la red por la producción en régimen especial, los suministros a quienes el Ministerio de Industria y Energía inspeccione las condiciones de la facturación y los fondos destinados a compensaciones son los que se definen en el anexo I de la presente Orden y se aplicarán de acuerdo con lo dispuesto en el mismo.

Segundo.—Las tarifas básicas a aplicar, con los precios de sus términos de potencia y energía, son las que se relacionan en el anexo II de la presente Orden.

Tercero.—El precio de los alquileres de los equipos de medida es el que se detalla en el anexo III de la presente Orden.

Cuarto.—Las cantidades a satisfacer por derechos de acometida, enganche y verificación, definidos en el Real Decreto 2949/1982, de 15 de octubre, para nuevas instalaciones, quedan fijados en las cuantías que figuran en el anexo IV de la presente Orden.

Quinto.—«Red Eléctrica de España, Sociedad Anónima» percibirá, como el componente diferenciado de las tarifas que constituye la contrapartida provisional a la prestación de sus servicios, el 2,484 por 100 de la facturación por venta de energía suministrada a los abonados finales de la Península.

La Dirección General de la Energía establecerá el procedimiento de aplicación y la base de recaudación de este porcentaje.

Picado por la curiosidad por saber qué nivel de conocimientos matemáticos era el mínimo necesario, teniendo en cuenta sólo con la tabla y el gráfico adjuntos al escrito de 26.05.1996-, para detectar que los precios de alquiler, aplicados a partir de la entrada en vigor de la Orden de 20.02.87, eran muy superiores a los que habrían resultado si se hubieran calculado conforme a lo establecido en la condición general 16 del Anexo II del Real Decreto 1725/1984, en mayo de 2007 le pregunté a un profesor de matemáticas de un Instituto público de Sevilla, quien me respondió que las matemáticas impartidas en primer curso de ESO eran suficientes para detectar dicha anomalía.

Los datos de este problema están tomados de la tabla y el gráfico adjuntos al escrito de 26.05.1996 de la Asociación nacional de bienes de equipo al Ministerio de Industria (para ver el escrito, ir a **www.estafaluz.com/documentos/estafa/sercobe_260596.pdf**) El probema fue planteado en mayo de 2007 a alumnos de primer curso de ESO de un Instituto público de Sevilla, varios de los cuales lo resolvieron en 45 minutos.

PROBLEMA

Una empresa adquiere equipos que luego alquila a sus clientes a un precio que no puede ser superior al 1.25% mensual del precio de compra.

De 1986 a 1997, los precios a los que la empresa compró los equipos fueron los siguientes:

columna 1	columna 2	columna 3	columna 4	columna 5
AÑO	**PRECIO DE COMPRA (pts)**	**PRECIO DE COMPRA (%)**	**PRECIO DE ALQUILER (pts/mes)**	**PRECIO DE ALQUILER (%)**
1986	5.336	100	66	100
1987	5.511	103,27	68	103,03
1988	5.898	110,53	73	110,60
1989	6.073	113,80	75	113,63
1990	6.214	116,45	77	116,66
1991	6.203	116,23	77	116,66
1992	5.897	110,50	73	110,60
1993	5.494	102,96	68	103,03
1994	5.470	102,50	68	103,03
1995	5.332	99,91	66	100
1996	5.026	94,19	62	93,93
1997	4.655	87,23	58	87,87

Tabla 1

Los precios de la columna 3 son los precios de la columna 2 expresados en % del precio de compra en 1986 (5.336 pts). La primera celda es (5.536/5.536) x 100=100.

Primera parte

1.- Incluye en las celdas de la columna 4 el precio máximo, sin decimales, al que la empresa puede alquilar los equipos cuyo precio de compra figura en la columna 2. Recuerda que

precio máximo de alquiler=(1.25/100)xprecio de compra

2.- Incluye en las celdas de la columna 5 los precios de la columna 4 en % del precio de alquiler en 1986 (66 pts/mes). La primera celda es (66/66) x 100= 100.

Dado que el problema era un caso práctico que afectaba a 23 millones de usuarios, el profesor accedió a plantearlo a sus alumnos de primer curso de ESO, cuya edad media era 16 años.

Segunda parte

En la página siguiente están representadas gráficamente los valores indicados en la tabla 3. Dichos valores son reales, es decir, corresponden a los precios a los cuales la empresa compró y alquiló los equipos.

Pregunta 1: ¿Coinciden los precios de compra en % indicados en la tabla 3 con los precios de compra en % indicados en la tabla 1?

Respuesta: (SI) ~~NO~~ (tacha con una X la respuesta no elegida)

Pregunta 2: ¿Coinciden los precios de alquiler en % indicados en la tabla 3 con los precios de alquiler en % indicados en la tabla 1?

Respuesta: ~~SI~~ (NO) (tacha con una X la respuesta no elegida)

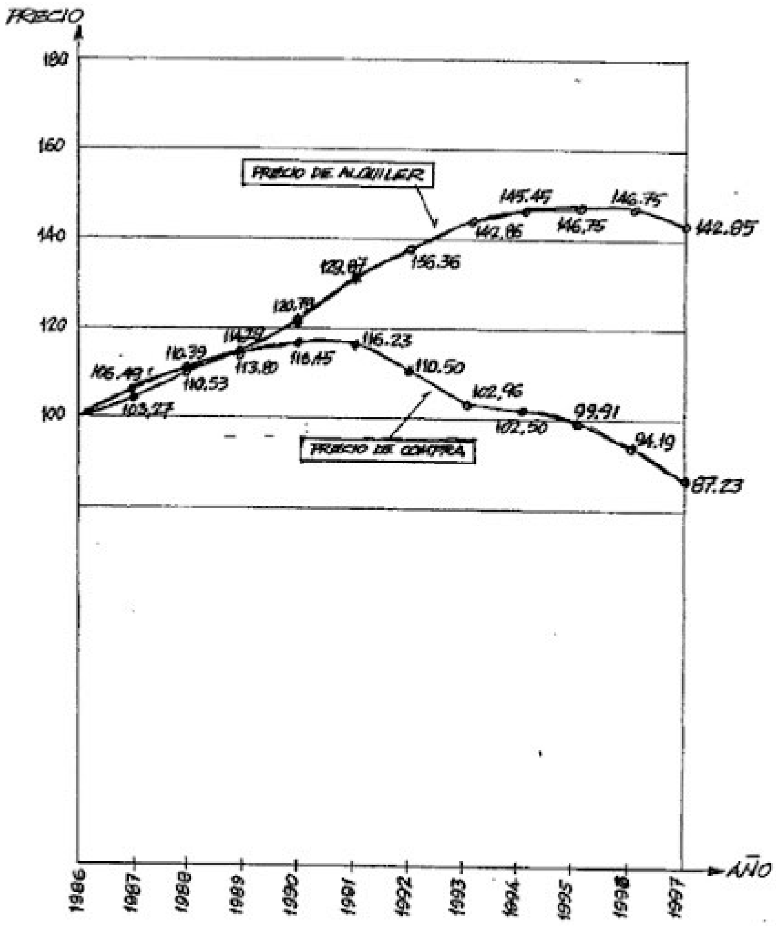
Pregunta 3: En la tabla siguiente, considerando que el valor 100 corresponde al precio de alquiler en 1986 (66 pts/mes), incluye en las celdas de la columna 3 el precio al cual corresponde el valor indicado en las celdas de la columna 2 (el contenido de las las celdas de la columna 2 es el de las celdas de la tabla 3/columna 3). La primera celda es 100x66/100=66.

columna 1	columna 2	columna 3
AÑO	**PRECIO DE ALQUILER (%)**	**PRECIO DE ALQUILER (pts/mes)**
1986	100	66
1987	106,49	70
1988	110,39	72
1989	114,29	75
1990	120,78	79
1991	129,87	85
1992	136,36	89
1993	142,86	94
1994	145,45	95
1995	146,75	96
1996	146,75	96
1997	142,85	94

Tabla 2

Pregunta 4: Compara los precios de alquiler indicados en la tabla 1/columna 4, que son los precios máximos a los que la empresa puede alquilar los equipos, con los indicados en la tabla 2/columna 3, que son los precios a los que la empresa ha alquilado los equipos. ¿Crees que la empresa ha alquilado los equipos a unos precios superiores a los máximos autorizados?

Respuesta: (SI) ~~NO~~



columna 1	columna 2	columna 3
	PRECIO DE COMPRA	PRECIO DE ALQUILER
AÑO	(%)	(%)
1986	100	100
1987	103,27	106,49
1988	110,53	110,39
1989	113,80	114,29
1990	116,45	120,78
1991	116,23	129,87
1992	110,50	136,36
1993	102,96	142,86
1994	102,50	145,45
1995	99,91	146,75
1996	94,19	146,75
1997	87,23	142,85

Tabla 3

El problema fue resuelto en 45 minutos por varios alumnos, lo cual demuestra que basta el nivel de conocimientos matemáticos de un alumno de primer curso de ESO, sólo con tabla y el gráfico adjuntos al escrito de 26.05.96, para detectar que los precios de alquiler, publicados en el Boletín Oficial del Estado tras la entrada en vigor de la Orden de 20.02.1987, no han sido calculados conforme a lo establecido legalmente. O dicho de otra forma, que basta el nivel de conocimientos matemáticos de un alumno de primer curso de ESO para detectar que el Boletín Oficial del Estado está siendo utilizado para cometer una estafa.

Eso plantea, entre otras, las siguientes preguntas:

- ¿A qué se debió que María Luisa Huidobro, la directora general de la Energía, a cuya atención iba dirigido el citado escrito de 26.05.1996, no detectara la estafa, o, si la detectó, no hiciera nada para impedir que continuara?

CANTIDAD ESTAFADA ANUALMENTE POR LAS COMPAÑÍAS ELÉCTRICAS EN EL ALQUILER DE LOS CONTADORES DE LA LUZ

Parque de contadores en alquiler en 2008= 23,6 millones de unidades

Composición del parque
Contadores monofásicos= 90% x 23,6= 21,2 millones
Contadores trifásicos = 10% x 23,6= 2,4 millones

Precio de alquiler (Orden ITC 3860/2007 - BOE de 29.12.2007)
Contador monofásico de simple tarifa= 0,54 euros/mes
Contador trifásico de simple tarifa = 1,53 euros mes

Precio medio de mercado (*)
Contador monofásico de simple tarifa= 18 euros
Contador trifásico de simple tarifa = 45 euros

Precio máximo de alquiler (**)
Contador monofásico de simple tarifa= (1,25/100) x18= 0,23 euros/mes
Contador trifásico de simple tarifa = (1,25/100) x 45= 0,56 euros/mes

Cantidad estafada anualmente
12 x (21,2 x (0,54 – 0,23) + 2.4 (1,53 – 0,56))= 106,8 millones de euros/año
IVA (16%)= 17,1
Total= **123,9 millones de euros/año**

Cantidad estafada diariamente
123,9/ 365= **339.452 euros/día**

(*) Fuente: informe adjunto al escrito de 29.07.2005 de Pedro Rivero Torre, presidente de UNESA, patronal de las cinco grandes compañías eléctricas, a Antonio Fernández Segura, secretario general de la Energía (Ministerio de Industria, Turismo y Comercio). Ver el documento en: www.estafaluz.com/documentos/estafa/unesa_mintuco_290705_pag1.pdf

NOTA: Dado que **a)** los precios medios de mercado con los que se han realizado los cálculos eran los vigentes en 2005 y **b)** los precios medios de mercado descienden ininterrumpidamente desde 1990, la cantidad real estafada en 2008 es superior a los 123,9 millones de euros.

(**) Precio máximo de alquiler según la condición 16 del Anexo II (Póliza de abono) del Real Decreto 1725/1984, de 18 de julio (BOE de 25.09.1984): *"El Ministerio de Industria fijará las cantidades concretas máximas que las compañías eléctricas pueden aplicar por el alquiler de sus equipos de medida no especiales, en base al 1.25% mensual del precio medio de mercado del aparato".*

Sea cual sea la respuesta a esta pregunta, **María Luisa Huidobro** reúne los requisitos suficientes para ser incluida en la lista de responsables directos de que aún se siga cometiendo la estafa, que genera actualmente unos 350.000 euros diarios, afecta a 23 millones de clientes de las compañías eléctricas, y les ha reportado, como mínimo, la mitad de los más de 7.500 millones de euros cobrados ilegalmente por el alquiler de los contadores de la luz.

- Si los precios de alquiler publicados en el Boletín Oficial del Estado, desde la entrada en vigor de la Orden de 20.02.1987, no han sido calculados aplicando el 1.25% mensual a los precios medios de mercado, ¿cómo han sido calculados? La respuesta a esta pregunta la tiene usted en los dos puntos que siguen a continuación.

11.4.- El Boletín Oficial del Estado miente: Prueba documental 3

Comisión
Nacional
de Energía

INFORME SOLICITADO POR EL MINISTERIO DE ECONOMÍA Y LA JUNTA DE ANDALUCÍA, EN RELACIÓN CON EL ESCRITO DE DENUNCIA FORMULADA POR D. ANTONIO MORENO ALFARO, ASÍ COMO LOS ESCRITOS PRESENTADOS POR DIVERSAS ORGANIZACIONES

20.09.2001

Incrementos similares al anterior pueden observarse, para dicho periodo del año 1984 al año 2000, para la totalidad de los precios máximos de alquiler mensual de los diferentes equipos de medida y control recogidos expresamente en los Reales Decretos de Tarifas.

DECIMOTERCERA. Por tanto, a la vista de los resultados anteriores, queda suficientemente demostrado que en realidad la evolución de los precios máximos de alquiler de los equipos de medida y control no ha ido en paralelo con la evolución del IPC y del IPRI, tal y como establecía la derogada Orden Ministerial de 30 de diciembre de 1984.

De hecho, tal y como se recoge en la información facilitada por el denunciante D. Antonio Moreno, desde el año 1987 la evolución seguida por los precios máximos de alquiler de los equipos de medida y control ha sido idéntica a la experimentada por las tarifas eléctricas: si éstas subían, también subían en la misma proporción los precios máximos de alquiler, y viceversa.

Aunque en los últimos ejercicios la tónica ha sido una progresiva disminución de las tarifas eléctricas y por ende de los precios máximos de alquiler, éstos podrían haber disminuido aún más dada la evolución experimentada por los precios de los equipos de medida y control. Tal y como esta Comisión ya ha tenido ocasión de manifestar con motivo de los preceptivos informes sobre propuestas de tarifas de los últimos ejercicios, indexar la evolución de estos precios máximos de alquiler a la tarifa eléctrica no parece lo más adecuado, ya que los costes incurridos por las empresas distribuidoras por prestar el servicio de redes, poco tiene que ver con el servicio prestado por alquiler de equipos de medida.

Nuevamente hay que indicar que, no sólo la fijación inicial, sino también la evolución con el tiempo de los precios máximos de alquiler de los equipos de medida y control, debería basarse en un análisis pormenorizado y periódico, cada

33

El tercer documento que demuestra que el Boletín Oficial del Estado miente cuando afirma que los precios de alquiler publicados en el BOE, a partir de la entrada en vigor de la Orden de 20.02.1987, han sido calculados *"de acuerdo con la condición 16 de la vigente Póliza de Abono, aprobada por el Real Decreto 1725/1984, de 18 de julio"* es el informe de 20.09.2001 de la Comisión Nacional de Energía (CNE), emitido en respuesta a mi denuncia de 02.03.2000 ante la CNE (entonces denominada Comisión Nacional del Sistema Eléctrico), el Ministerio de Economía y la Junta de Andalucía.

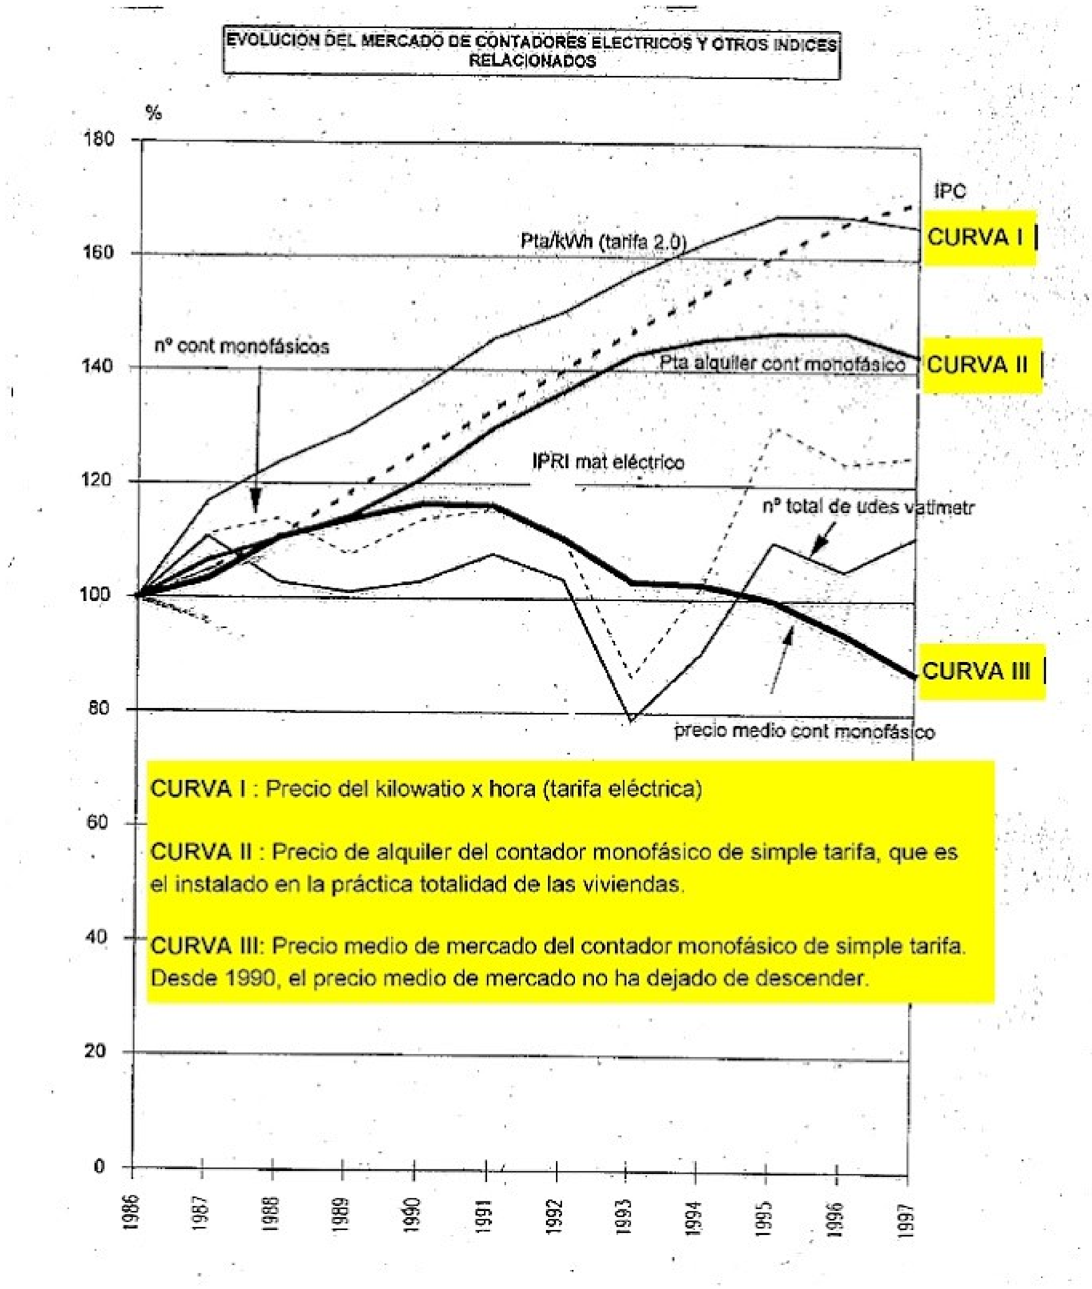
En el **párrafo tercero de la página 33** de este informe, la CNE afirma literalmente lo siguiente:

> *"De hecho, tal y como se recoge en la información facilitada por el denunciante D. Antonio Moreno, desde 1987 la evolución seguida por los precios máximos de alquiler de los equipos de medida y control ha sido idéntica a la experimentada por las tarifas eléctricas",*

Así pues, el párrafo tercero del Informe de 20.09.2001 de la CNE confirma los dos siguientes hechos:

- Es falso, como afirma el Boletín Oficial del Estado, que los precios de alquiler aplicados a partir de la entrada en vigor de la Orden de 20.02.1987 hayan sido calculados *"de acuerdo con la condición 16 de la vigente Póliza de Abono, aprobada por el Real Decreto 1725/1984, de 18 de julio".*

- Los precios de alquiler, publicados a partir de la entrada en vigor de la Orden de 20.02.1987, han sido calculados aplicando a los precios vigentes en el período anterior el mismo coeficiente de actualización que a la tarifa eléctrica (es decir, que al precio del kilowatio x hora).



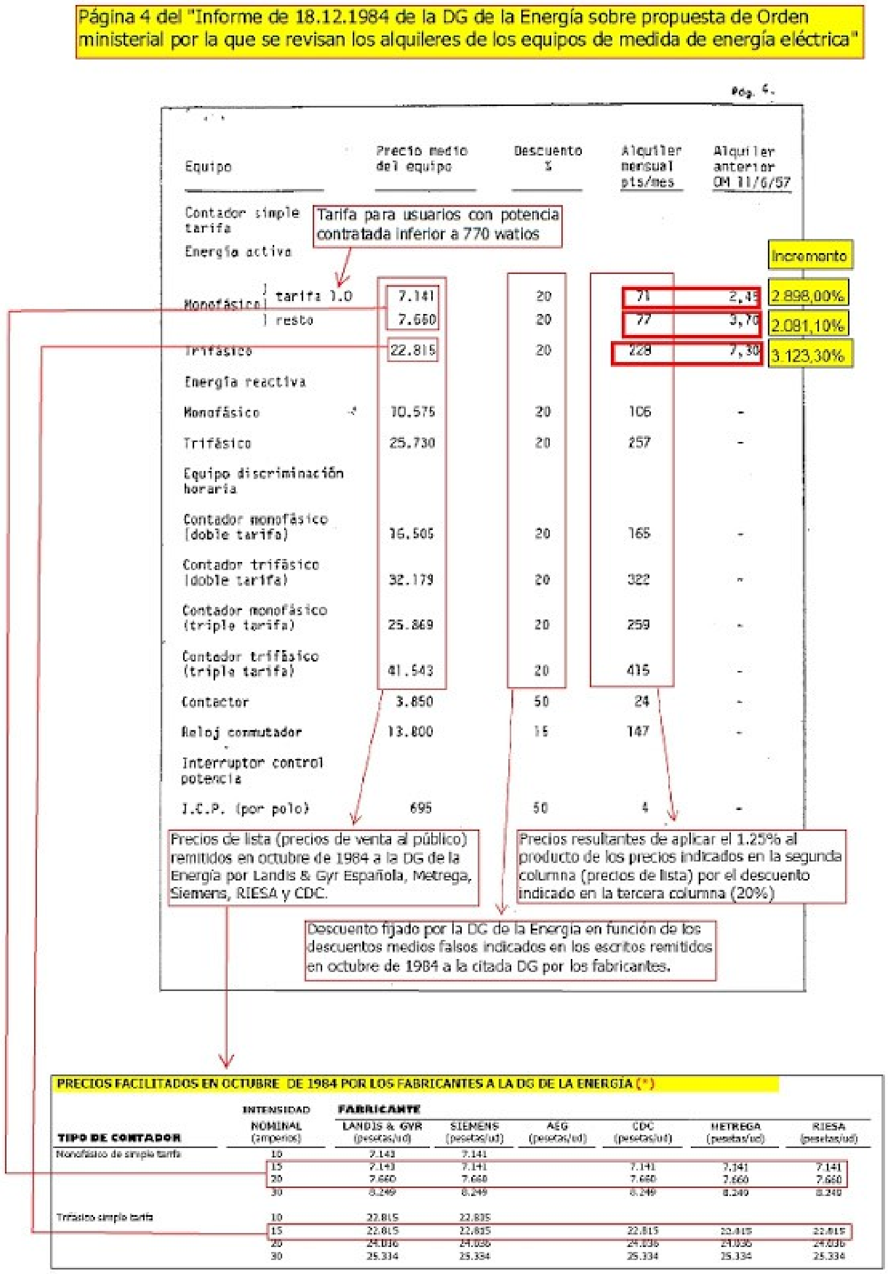
El calcular los precios de alquiler mediante un coeficiente de actualización idéntico al aplicado al precio del kilowatio x hora, en lugar de aplicar el 1.25% mensual al precio medio de mercado del contador, que es lo establecido legalmente, tiene una gran ventaja para los estafadores:

- Hace innecesaria la colaboración de los fabricantes de contadores.

- Incrementa la cantidad estafada, pues desde 1990, como pone claramente de manifiesto el gráfico adjunto al escrito de 26.05.96 de la Asociación nacional de bienes de equipo al Ministerio de Industria, la evolución del precio medio de

mercado es descendente y la de la tarifa eléctrica, ascendente.

- Perpetúa la estafa, pues los nuevos precios de alquiler proceden de aplicar sucesivos coeficientes de actualización (salvo contadísimas excepciones, mayores que 1) a los precios de alquiler publicados en el Anexo de la Orden de 20.12.1984, que fueron calculados partiendo de los datos falsos facilitados en octubre de 1984 por los fabricantes al Ministerio de Industria.



Equipo	Precio medio del equipo	Descuento %	Alquiler mensual pts/mes	Alquiler anterior OM 11/6/57

RESPUESTA DEL GOBIERNO

(186)SOLICITUD DE INFORME A LA ADMINISTRACION DEL ESTADO CONGRESO

186/001958/0000 **16/02/07** **0175047**

AUTOR/A: NAVARRO CASILLAS, Isaura (GIU-ICV)

RESPUESTA : La regulación sobre alquiler de contadores de energía eléctrica desde el año 1984 se encontraba:

1) En el Real Decreto 1725/1984, de 18 de julio, en su Anexo II, donde se estableció el Modelo Oficial de Póliza de Abono y se fijaba, en la condición 16 de dicha póliza, lo siguiente:

"Los abonados tienen derecho a facilitar los contadores y otros aparatos de su propiedad, o alquilárselos a las empresas suministradoras de energía eléctrica, o a otras entidades legalmente establecidas, extrañas a ellas, siempre que los aparatos de medida pertenezcan a un sistema y tipo homologados, y estén verificados oficialmente con resultado favorable. El tipo de alquiler aplicable por las empresas suministradoras de energía eléctrica no será superior al 1,25 por 100 mensual del precio del aparato.

Las empresas eléctricas estarán obligadas en todo caso a suministrar en alquiler aparatos contadores no especiales, monofásicos o trifásicos de capacidad normalizada, de hasta 63 amperios por hilo, e interruptores de control de potencia (ICP), para la misma tensión nominal, así como los de doble tarifa, relojes y demás aparatos necesarios para la aplicación de la tarifa nocturna con el mismo límite de intensidad. Para estos aparatos el Ministerio de Industria y Energía fijará las cantidades concretas máximas que se pueden aplicar por su alquiler, en base al mismo 1,25 por 100 mensual, del precio medio del mercado del aparato".

2) Posteriormente, la Orden de 20 de diciembre de 1984, actualizó los alquileres de los equipos de medida de energía eléctrica, que las empresas eléctricas estaban obligadas en todo caso a suministrar.

En esa Orden se fijaron los nuevos precios, en base a los datos de precios de mercado facilitados por los fabricantes, aplicando el 1,25% tal como estableció el Modelo Oficial de Póliza de Abono. Se fijaba un régimen transitorio, hasta el 1 de julio de 1986, en que los precios eran de plena aplicación, tanto a los aparatos en alquiler con anterioridad a la entrada en vigor de la Orden como a los alquilados con posterioridad.

Además de establecer los nuevos precios, la Orden, en su apartado tercero, disponía la metodología de revisión de los mismos, de la forma siguiente:

"La revisión de los precios máximos de alquiler se realizará conjuntamente con la de las tarifas eléctricas, considerando la evolución de los precios del mercado y del índica de precios industriales publicado por el Instituto Nacional de Estadística".

En virtud de lo anterior, se señala lo siguiente:

a) El entonces Ministerio de Industria y Energía fijó, en 1984, los precios iniciales de estos equipos aplicando estrictamente lo dispuesto en la normativa, en el 1,25 por 100 mensual del precio medio de mercado del aparato. Evidentemente este precio de mercado es al que lo compra el abonado, y ello porque es éste y no la empresa eléctrica quien tiene la potestad de elegir si lo compra o lo alquila, es decir, el precio hay que fijarlo en base al coste de oportunidad del cliente.

b) La evolución de precios de alquiler de estos equipos se ha revisado con la tarifa de cada año, siempre por debajo del IPC, y hasta 1996, siguiendo prácticamente la evolución de la tarifa eléctrica y la media entre el IPRI y el IPC. A partir de ese año, su evolución cambia de signo, como ocurre con la tarifa eléctrica, y por tanto evoluciona, experimentando una bajada, para situarse en 1999 y 2001 muy por debajo tanto del IPC, del IPRI y, por tanto, de la media de estos índices.

Esto ocurre en todos los precios de alquileres de equipo que fija el Ministerio de Economía.

En la tarifa 2002 se aprobó una reducción en todos los precios del 10%.

El motivo de aprobación de la bajada para ese año surge como consecuencia de la queja formulada en 2000 por D. Antonio Moreno Alfaro ante el entonces Ministerio de Industria y Energía. A la vista de la misma se solicitó informe el 28 de marzo de 2000 a la Comisión Nacional de Energía, además de a las asociaciones interesadas (UNESA y Asociación de Bienes de Equipo).

Con fecha 20 de septiembre de 2001, la Comisión Nacional de Energía emitió su informe, indicando en su consideración quinta.

"Como se ha visto anteriormente, el incremento medio anual de los Precios de Consumo entre los años 1975 y 1984, fue del 16,2 %. Por tanto, la tasa de retribución a los capitales invertidos por las empresas arrendadoras de los equipos de medida y control, durante esa década de 1975 a 1984, debió situarse, para no incurrir en pérdidas simplemente por el efecto inflacionista, en al menos en ese valor del 16,2%. Con ello, el período de recuperación de la inversión de los capitales invertidos por las empresas alquiladoras de los equipos de medida y control, con una inflación en el entorno del 16%, se amplía de manera automática y de forma considerable respecto a los 6 años y 8 meses calculados anteriormente, yéndose incluso por encima de los 30 años.

En cuanto a la vida útil prevista para los equipos de medida y control no existe, en la actualidad, regulación alguna al respecto. Así, la Ley 3/1985, de 18 de marzo, de Metrología, no especifica, en ningún momento, que sea necesario proceder a establecer una vida útil para los aparatos de medida, sino que parece decantarse porque éstos sean válidos, con independencia de su antigüedad, en tanto realicen la medición con las suficientes garantías de exactitud. Ningún desarrollo posterior de dicha Ley 3/1985 ha venido a establecer una vida útil para los equipos de medida y control, al menos para los equipos objeto del presente informe.

De forma genérica, y en algunas regulaciones de otros países así se recoge, se acepta que la vida útil de los equipos de medida y control no debe superar los 30 años. A esta vida útil de 30 años para los equipos de medida y control se hace alusión en varios de los documentos aportados por el denunciante D. Antonio Moreno, e incluso así se recogía en antiguos proyectos de normativa para este tipo de aparatos, aunque dicha normativa, finalmente, no llegó a aprobarse.

Con todo lo anterior, vida útil de 30 años e inflación en el entorno del 16% puede comprobarse, mediante sencillas fórmulas matemático-financieras, que no resulta excesivo fijar el precio máximo de alquiler mensual de los equipos de medida y control en un 1,25% del precio medio del aparato. Concretamente, considerando una vida útil de 30 años y una anualidad en

181077

concepto de alquiler del 15% del precio medio del equipo (12 meses al 1,25% mensual), se obtiene una tasa de interés del 14,75%, valor incluso inferior a la inflación observada en aquellos años.

Sin embargo, la favorable evolución de los Precios de Consumo desde el año 1984, conlleva, de forma automática, a que en la actualidad sí pueda resultar excesivo fijar el precio máximo de alquiler mensual de los equipos de medida y control en el 1,25% del precio medio del aparato. Así, considerando una vida útil de 30 años y una tasa de retribución del 7%, valor éste más acorde con la realidad actual, la anualidad a recuperar en concepto de alquiler debería situarse en el entorno del 8% del precio medio del aparato, o lo que es igual, en el 0,67% mensual del precio medio del aparato, valor sensiblemente menor al 1,25% fijado en el Real Decreto 1725/1984.

En definitiva, la fijación del precio máximo de alquiler mensual de los equipos de medida y control en el 1,25% del precio medio del aparato pudo resultar adecuado para el año 1984, pero el hecho de que dicho porcentaje no se haya ido adaptando a la realidad económica de cada momento, ha supuesto que no se haya producido la necesaria transferencia al consumidor de los ahorros de costes obtenidos por las empresas distribuidoras, al no haberse ido adaptando a la realidad económica de cada momento la tasa de retribución considerada inicialmente."

A la vista del mismo, el Ministerio de Economía, en la propuesta de revisión de tarifas para 2002, decidió aplicar este criterio para todos los precios de alquiler de contadores, proponiendo una bajada de 100-0,67/1,25 = 46,4%.

Sin embargo, al informar la propuesta de Real Decreto de tarifas, la Comisión Nacional de Energía se pronunciaba en su informe sobre estos precios de la forma siguiente:

"4.3.4 Comentarios al Anexo II de la propuesta de Real Decreto (Alquileres)

En consecuencia, las únicas referencias específicas a los precios de alquiler de los contadores a partir de la Orden de 20 de diciembre de 1984, en los expedientes de las Ordenes y Reales Decretos, es la que se hace en 2002, (en los años de 1984 a 2001, se revisan los precios en la misma cuantía que la tarifa, y a partir de 2002 no se modifican).

Por ello se remite como **anexo** la siguiente documentación:

- **Anexo I** – Expediente Orden de 20 de diciembre de 1984.
- **Anexo II** – Informe de fecha 20 de septiembre de 2001 de la Comisión Nacional de Energía sobre contadores.
- **Anexo III** – Informe 14/2001 aprobado por el Consejo de Administración de la Comisión Nacional de Energía el 26 de diciembre de 2001 sobre la propuesta de Real Decreto por el que se establece la tarifa eléctrica para 2002.

De los 22 expedientes detallados por la diputada Dña. Isaura Navarro Casillas en su solicitud de 16.02.2007, el Gobierno sólo le remitió el primero (el correspondiente a la Orden de 20.12.1984), lo cual demuestra que después del 20.12.1984 el Gobierno no volvió a calcular los precios de alquiler de acuerdo con lo establecido legalmente.

Madrid, 9 de marzo de 2007

MINISTERIO DE LA PRESIDENCIA

En este escrito, que contiene numerosas falsedades, el Gobierno reconoce que *"en los años 1984 a 2001, se revisan los precios* [de alquiler] *en la misma cuantía que la tarifa* [eléctrica] *, y a partir de 2002 no se modifican".*

En relación con lo expuesto en el citado escrito de 09.03.2007, la diputada Dña. Isaura Navarro Casillas presentó el 24.05.07 ante la mesa del Congreso un escrito con cinco preguntas dirigidas al Gobierno, la última de las cuales es la siguiente:

> *"¿Qué medidas tiene pensado adoptar el Gobierno para que los clientes de las compañías eléctricas recuperen los más de 3.000 millones de euros (más IVA) pagados en exceso a dichas compañías como consecuencia de haber revisado el Gobierno los precios de alquiler de los contadores en la misma cuantía que la tarifa eléctrica, en lugar de, como era su obligación, haber calculado dichos precios según lo establecido en la condición 16 de la vigente póliza de abono?".*

Ninguna de las cinco preguntas hechas en este escrito recibió respuesta

A LA MESA DEL CONGRESO DE LOS DIPUTADOS

Al amparo de lo establecido en el artículo 185 y siguientes del Reglamento del Congreso de los Diputados, la Diputada que suscribe formula la siguiente PREGUNTA dirigida al Gobierno para la que se solicita respuesta por escrito.

Con fecha 16 de febrero de 2007, solicitamos al Gobierno que facilitara *"todos los documentos que obren en cada uno de los expedientes abiertos por el Ministerio de Industria y Energía, el Ministerio de Economía y el Ministerio de Industria, Turismo y Comercio para definir los precios máximos de alquiler de los contadores de energía eléctrica, incluyendo, muy especialmente, los documentos aportados por los fabricantes de contadores y los documentos que contengan los cálculos efectuados por los citados Ministerios para obtener el precio medio de mercado de cada tipo de contador o cualquiera de los precios máximos de alquiler publicados en los siguientes BOEs:* (a continuación se detallaban veintidós BOE, el primero de los cuales era el BOE de 29 de diciembre de 1984, que contiene la Orden ministerial de 20 de diciembre de 1984, y el último, el BOE de 30 de diciembre de 2006, que contiene el Real Decreto 1634/2006)".

En respuesta a la mencionada solicitud de 16 de febrero de 2007, el Gobierno remitió el 9 de marzo de 2007 un escrito al que iban adjuntos tres documentos: el expediente de la Orden de 20 de diciembre de 1984 y los informes de 20 de septiembre de 2001 y 14/2001 de la Comisión Nacional de Energía. Así pues, en la documentación remitida faltan veintiuno de los veintidós expedientes solicitados el 16 de febrero de 2007.

Según reconoce el propio Gobierno al final de su escrito de 9 de marzo de 2007, la falta de dichos veintiún expedientes se debe a que *"de 1984 a 2001, los precios de alquiler se revisan en la misma cuantía que la tarifa eléctrica, y a partir de 2002, no se modifican"*.

Entre los documentos incluidos en el expediente de la Orden de 20 de diciembre de 1984 está el Informe de 18 de diciembre de 1984 de la Dirección General de Energía *"sobre propuesta de Orden ministerial por la que se revisan los alquileres de los equipos de medida de energía eléctrica"*, cuyo primer párrafo dice literalmente lo siguiente: *"Según lo dispuesto en la condición 16ª de la vigente póliza de abono , aprobada por el Real Decreto 1725/1984 de 18 de julio, las empresas eléctricas están obligadas a suministrar en alquiler ciertos equipos de medida al abonado que lo solicite. Para estos aparatos, el Ministerio de Industria y Energía fijará las cantidades concretas máximas que se pueden aplicar por su alquiler, en base al 1,25 por 100 mensual del precio medio de mercado del aparato"*.

Así pues, al afirmar que *"de 1984 a 2001, los precios de alquiler se revisan en la misma cuantía que la tarifa eléctrica, y a partir de 2002, no se modifican"*, el Gobierno está reconociendo de forma explícita que ni uno sólo de los precios de alquiler publicados en el

BOE después de la Orden de 20 de diciembre de 1984 ha sido calculado *"en base al 1,25 por 100 mensual del precio medio de mercado del aparato"*, que es lo dispuesto en la condición 16ª de la póliza de abono aprobada por el Real Decreto 1725/1984, de 18 de julio.

Como consecuencia de no haber seguido el Gobierno el criterio establecido en la citada condición general 16 y haber revisado los precios de alquiler en la misma cuantía que la tarifa eléctrica, la cantidad cobrada en exceso desde 1984 por las compañías eléctricas por el alquiler de sus contadores supera los 3.000 millones de euros, excluido el IVA.

Si la condición 16 de la póliza de abono aprobada por el Real Decreto 1725/1984, que continúa vigente, especifica que *"el Ministerio de Industria y Energía fijará las cantidades concretas máximas que se pueden aplicar por el alquiler de los contadores, en base al 1,25 por 100 mensual del precio medio de mercado del aparato"*, ¿cuáles son las razones por las que *"de 1984 a 2001, los precios de alquiler se revisan en la misma cuantía que la tarifa eléctrica, y a partir de 2002, no se modifican"*?

Si *"de 1984 a 2001 los precios de alquiler se revisan en la misma cuantía que la tarifa eléctrica"*, ¿por qué con posterioridad a 1984 el Gobierno ha afirmado reiteradamente en el BOE (por ejemplo, en la Orden de 12 de enero de 1995/ BOE de 14 de enero) que *"las cantidades concretas máximas aplicables por alquiler de equipos de medida se fijan de acuerdo con la condición 16 de la vigente póliza de abono, aprobada por el Real Decreto 1725/1984, de 18 de julio"*?

Si la condición 16 de la póliza de abono aprobada por el Real Decreto 1725/1984, que continúa vigente, especifica que *"el Ministerio de Industria y Energía fijará las cantidades concretas máximas que se pueden aplicar por el alquiler de los contadores, en base al 1,25 por 100 mensual del precio medio de mercado del aparato"* y, como reconoce el Gobierno en su mencionado escrito de respuesta de 19 de marzo de 2007, *"de 1984 a 2001, los precios de alquiler se revisan en la misma cuantía que la tarifa eléctrica, y a partir de 2002, no se modifican"*, ¿por qué en su respuesta de 17 de enero de 2007 a un escrito de 1 de agosto de 2006 de la diputada Dña. Isaura Navarro Casillas el Gobierno afirma que *"en las revisiones y precios máximos de alquiler que ha ido aprobando el entonces Ministerio de Industria y Energía todos los años y el Ministerio de Economía, y, en la actualidad, el Ministerio de Industria, Turismo y Comercio, ha cumplido ampliamente la normativa vigente"*?

Si la condición 16 de la póliza de abono aprobada por el Real Decreto 1725/1984, que continúa vigente, especifica que *"el Ministerio de Industria y Energía fijará las cantidades concretas máximas que se pueden aplicar por el alquiler de los contadores, en base al 1,25 por 100 mensual del precio medio de mercado del aparato"* y, como reconoce el Gobierno en su mencionado escrito de respuesta de

Fdo.: Isaura Navarro Casillas
Diputada G.P. IU-ICV

El escrito de 24.05.07 de la diputada Dña. Isaura Navarro Casillas no recibió respuesta.

Aunque la implicación del PSOE la analizaré detalladamente en las entregas correspondientes al apartado IMPLICADOS/ PARTIDOS POLÍTICOS/ PSOE, le adelanto uno de los documentos que incluiré en dichas entregas: mi escrito de 07.11.2000 a José Luis Rodriguez Zapatero, que en aquella fecha aún no era presidente del Gobierno.

D. José Luis Rodríguez Zapatero
Secretario General del PSOE
c/ Ferraz, 70
28008 MADRID

Sevilla, 7 de Noviembre de 2000

ASUNTO: PASIVIDAD DEL PSOE ANTE LA CORRUPCIÓN

Sr. Rodríguez Zapatero:

Desde 1984, las compañías eléctricas vienen facilitando datos falsos al Ministerio de Industria y Energía con objeto de que los precios de alquiler de los contadores de energía eléctrica, que el citado Ministerio calcula en función de los datos falsos recibidos de las compañías eléctricas y publica posteriormente en el BOE, sean como mínimo dobles que los precios máximos permitidos por el RD 1725/84 y el contrato de suministro que las mencionadas compañías tienen suscrito con cada uno de sus clientes.

Como consecuencia de la estafa, las compañías eléctricas cobran en exceso a sus abonados una cantidad que supera actualmente los 20.000 millones de pesetas anuales.

A la estafa hay que añadir que, a pesar de cobrar desde 1984 por el alquiler de los contadores unos precios que son más del doble de los máximos legalmente permitidos y ser la finalidad exclusiva de dichos precios de alquiler la de permitir la adecuada renovación y actualización del parque de contadores, las compañías eléctricas tienen instalados millones de contadores que no ofrecen ninguna garantía de exactitud en la medida.

Hasta finales de mayo de 1996, la ineficacia del Ministerio de Industria para detectar que los datos facilitados por las compañías eléctricas eran falsos podía achacarse exclusivamente a la desidia y la indolencia. Sin embargo, desde finales de Mayo de 1996, y muy especialmente desde el 11.11.99, existen documentos que prueban que el citado Ministerio tiene conocimiento de que dichos datos son falsos, a pesar de lo cual los ha continuado utilizando para calcular los precios de alquiler publicados en el BOE.

Asi pues, desde finales de mayo de 1996, fecha en que ya gobernaba el PP, existen documentos que prueban que la estafa en los precios de alquiler de los contadores de energía eléctrica se realiza con el conocimiento del Ministerio de Industria.

¿Por qué, entonces, el PSOE, que utiliza el Parlamento y los medios de comunicación incluso en el caso de pequeños fraudes cometidos por concejales del PP, permanece en silencio ante una estafa de más de 20.000 millones de pesetas anuales que se comete con el conocimiento del Gobierno?

¿Por qué el anterior secretario general del PSOE no hizo nada tras recibir mi escrito de 11.02.00?

¿Por qué los cargos del PSOE contactados, entre ellos, varios diputados, se niegan a concederme una entrevista e, incluso, a ponerse al teléfono?

¿Por qué el presidente del PSOE ha bloqueado mi denuncia contra Sevillana de Electricidad y no responde a ninguno de mis escritos?.

Desearía equivocarme, pero tengo el presentimiento de que si no actúa rápidamente contra la corrupción que ha hundido el PSOE en la ciénaga de la que Vd. intenta sacarlo, este turbio asunto, al que Vd. es por ahora totalmente ajeno, le va a estallar en las manos como una nueva y aumentada Filesa.

Tenga la total seguridad de que sean cuales sean los obstáculos que se interpongan en mi camino para rehabilitar mi buen nombre profesional, destruido el 7.11.94 por un testimonio falso en represalia por negarme a colaborar con un grupo empresarial clandestino relacionado con la estafa, salvaré dichos obstáculos.

Sin otro particular y quedando a su disposición para faciltarle la documentación que necesite, reciba un atento saludo

PSOE_2 2

El escrito, como todos los que le he enviado al PSOE, y como la casi totalidad de las preguntas hechas por la diputada Dña. Isaura Navarro Casillas al Gobierno (del PSOE) , no recibió respuesta, lo cual parece dar la razón a Ingrid Betancourt, quien afirma que *"los políticos, más que servir, se sirven. La política es un mundo de intereses escondidos, de mentiras, de agendas ocultas"* ("El infierno según Ingrid", de Juan José Millás/ El País semanal, 12.10.2008).

11.6.- El Boletín Oficial del Estado miente: Prueba documental 5
Además de los cuatro documentos citados anteriormente, en las diligencias previas 280/2000 del Juzgado Central de Instrucción 5, existen muchísimos más que demuestran que el Boletín Oficial del Estado está siendo utilizado desde 1984 por el Gobierno para cometer la estafa en los precios de alquiler de los contadores de la luz.

Entre dichos documentos está la factura adjunta al escrito de 09.10.2000 de Schlumberger a la Comisión Nacional de Energía.(reproducida arriba) .Dicha factura basta por sí sola para poner al descubierto la estafa, pues contiene tres datos que demuestran que el Boletín Oficial del Estado miente cuando afirma que los precios de alquiler publicados en el BOE, a partir de la entrada en vigor de la Orden de

20.02.1987, han sido calculados "de acuerdo con la condición 16 de la vigente Póliza de Abono, aprobada por el Real Decreto 1725/1984, de 18 de julio".

Los tres datos son los precios medios de mercado a los cuales Schlumberger vendió en 1997, 1998 y 1999 a las compañías eléctricas el contador monofásico de simple tarifa (es decir, el contador doméstico). Dichos precios son los siguientes :

PMM1997= 4.655 pesetas (PMM1997= Precio medio de mercado en 1997)
PPP1998= 4.225 pesetas
PMM1999= 4.105 pesetas

Si los precios de alquiler aplicados en 1997, 1998 y 1999 hubieran sido calculados aplicando el 1.25% a los tres citados precios medios de mercado, que es lo establecido en la condición 16 del Anexo II (Póliza de abono) del Real Decreto 1725/1984, dichos precios de alquiler habrían sido los siguientes:

PA1997= (1,25/100) x 4.655= 58 pesetas/mes (PA1997= Precio de alquiler en 1997)
PA1997= (1,25/100) x 4.225= 53 pesetas/mes
PA1997= (1,25/100) x 4.105= 51 pesetas/mes

Sin embargo, los precios de alquiler aplicados no fueron esos, sino otros muy superiores (PABOE1997=Precio de alquiler publicado en el Boletín Oficial del Estado y aplicado en 1997):

PABOE1997= 110 pesetas (Real Decreto 2657/1996, de 27 de diciembre- BOE de 28.12.1996)
PABOE1998= 106 pesetas (Real Decreto 2016/1997, de 26 de diciembre- BOE de 27.12.1997)
PABOE1998= 103 pesetas (Real Decreto 2821/1998, de 23 de diciembre- BOE de 30.12.1998)

Así pues, los precios de alquiler publicados en 1996, 1997 y 1998 en el Boletín Oficial del Estado son el doble de los precios de alquiler que habrían resultado si el Ministerio de Industria los hubiera calculado de acuerdo con lo establecido en la condición 16 del Anexo II (Póliza de abono) del Real Decreto 1725/1984.

Por tanto, la factura adjunta al escrito de 09.10.2000 de Schlumberger a la Comisión Nacional de Energía demuestra, por sí sola, que el Boletín Oficial del Estado miente cuando afirma que los precios de alquiler publicados a partir de la entrada en vigor de la Orden de 20.02.1987, han sido calculados "de acuerdo con la condición 16 de la vigente Póliza de Abono, aprobada por el Real Decreto 1725/1984, de 18 de julio".

La factura adjunta al escrito de 09.10.2000 de Schlumberger es importante, no sólo porque prueba que el Boletín Oficial del Estado está siendo utilizado por el Gobierno para cometer una estafa. Es también importante porque es un claro indicio de la amplitud y profundidad de la trama de corrupción institucional que hace posible que esta estafa lleve cometiéndose impunemente desde 1984 a pesar de ser tan burda que queda al descubierto con tan sólo multiplicar la constante k= 1,25/100 por el precio de un contador doméstico, indicado en una cualquiera de los miles de facturas remitidas por los fabricantes a las grandes compañías eléctricas.

Lógicamente, usted se preguntará cómo es posible que, a pesar de los numerosas

pruebas documentales existentes, continúe cometiéndose una estafa tan burda que basta una simple multiplicación de dos números para ponerla al descubierto.

Le ruego que tenga un poco de paciencia, porque la respuesta a esa pregunta tardará aún varias semanas: las que necesito para publicar las entregas que anteceden a IMPLICADOS/ ESTADO/ JUSTICIA.

Respecto a la amplitud y profundidad de la trama de corrupción, tejida en las instituciones por el PSOE y el PP, basta un dato: En catorce ocasiones, el instrumento utilizado por el Gobierno para cometer la estafa fue el Real Decreto, lo cual implica la utilización delictiva de la firma del jefe del Estado. La cantidad estafada en nombre de éste supera los 1.500 millones de euros.

PRÓXIMA ENTREGA
En la próxima entrega, titulada LA ESTAFA, PASO A PASO: EJECUCIÓN/ GOBIERNO PP, le facilitaré los documentos que prueban que el Gobierno de José María Aznar siguió al pie de la letra (y no es metáfora) las directrices dictadas por UNESA para que la estafa continuará, después de que el informe emitido el 20.09.2001 por la Comisión Nacional de Energía, en respuesta a mi denuncia de 02.03.2000, sacara a la luz pública el desastroso estado del parque nacional de contadores y reconociera que desde 1987 los precios de alquiler tenían la misma evolución que la tarifa eléctrica.

Muchas gracias por su atención.

Antonio Moreno Alfaro, publicado el 17.10.2008 en estafaluz.com

1ª parte de este artículo:

*** LA ESTAFA DE LOS CONTADORES DE LA LUZ, PASO A PASO: EJECUCIÓN/ GOBIERNO PSOE (1)**

BOE 29 diciembre 1984: Orden 20-12-1984 del Ministerio de Industria por la que se actualizan los equipos de medida de la energía eléctrica:

Por lo que respecta a la retribución de las vacaciones de los trabajadores a que este artículo se refiere, éstos percibirán, conjuntamente con el salario mínimo interprofesional fijado en el artículo 1.º, la parte proporcional de éste correspondiente a las vacaciones legales mínimas, en los supuestos en que no existiera coincidencia entre el período de disfrute de las vacaciones y el tiempo de vigencia del contrato. En los demás casos, la retribución del período vacacional se efectuará de acuerdo con el artículo 38 del Estatuto de los Trabajadores y demás normas de aplicación.

DISPOSICIONES FINALES

Primera.—El presente Real Decreto surtirá efectos durante el período comprendido entre el 1 de enero y 31 de diciembre de 1985.

Segunda.—Se autoriza al Ministro de Trabajo y Seguridad Social para dictar las disposiciones necesarias en aplicación y desarrollo de lo dispuesto en este Real Decreto.

Dado en Madrid a 28 de diciembre de 1984.

JUAN CARLOS R.

El Ministro de Trabajo y Seguridad Social,
JOAQUIN ALMUNIA AMANN

MINISTERIO DE INDUSTRIA Y ENERGIA

28290 *ORDEN de 20 de diciembre de 1984 por la que se actualizan los alquileres de los equipos de medida de energía eléctrica.*

Ilustrísima señora:

Los precios de los alquileres de los aparatos contadores no especiales, de capacidad hasta 30 amp. por hilo, e interruptores de control de potencia, alquilados por las Empresas eléctricas a sus abonados, fueron regulados por última vez mediante la Orden ministerial de fecha 11 de junio de 1967. La evolución experimentada desde entonces por los precios de los aparatos hace que tales alquileres no cubran en absoluto la función económica de permitir a las Empresas alquiladoras la adecuada renovación y actualización del parque de contadores, con los consiguientes perjuicios que de ello se derivan para la calidad y fiabilidad de la medida.

La condición 10.ª de la vigente póliza de abono, aprobada por el Real Decreto 1725/1984, de 18 de julio, establece que el Ministerio de Industria y Energía fijará las cantidades concretas máximas que se pueden aplicar por su alquiler con arreglo a unas directrices fijadas en las mismas. Asimismo la Orden ministerial de 1 de agosto de 1984, por la que se completan las condiciones de aplicación de las nuevas tarifas eléctricas para suministros a Ayuntamientos, establece la obligatoriedad de facilitar en régimen de alquiler a los Ayuntamientos los equipos de energía reactiva y activa que en dicha Orden se fijan.

Debido a la inadecuación de los precios a sus costes reales se precisa establecer un período transitorio de adaptación a los nuevos precios para los abonados que ya tenían sus equipos de medida en régimen de alquiler.

En su virtud, este Ministerio, haciendo uso de las facultades conferidas por el artículo 6.º del referido Real Decreto, ha tenido a bien disponer lo siguiente:

Primero.—Los precios máximos de alquiler de los aparatos de medida y control de conexión directa utilizados en los suministros de hasta 63 amp. por hilo serán los siguientes:

	Ptas/mes
a) Contadores simple tarifa:	
Energía activa	
Monofásicos:	
Tarifa 1.0	71
Resto	77
Trifásicos o doble monofásicos	228
Energía reactiva (a efectos de lo dispuesto en las Ordenes ministeriales de 1-8-1984 y 20-11-1984)	
Monofásicos	106
Trifásicos o doble monofásicos	257
b) Contadores discriminación horaria:	
Monofásicos (doble tarifa)	165
Trifásicos o doble monofásicos (doble tarifa)	322
Monofásicos (triple tarifa)	259
Trifásicos (triple tarifa)	415
Contactor	24
Reloj conmutador	147
c) Interruptor de control de potencia (por polo)	4

Segundo.—Para el resto de aparatos y equipos auxiliares de medida y control, el canon de alquiler se determinará aplicando una tasa del 1,25 por 100 mensual al precio medio de los mismos.

Tercero.—La revisión de los precios máximos de alquiler se realizará conjuntamente con la de las tarifas eléctricas, considerando la evolución de los precios del mercado y del índice de precios industriales publicados por el Instituto Nacional de Estadística.

Cuarto.—La presente Orden ministerial entrará en vigor al día siguiente de su publicación en el «Boletín Oficial del Estado».

DISPOSICION TRANSITORIA

Los equipos de medida, en régimen de alquiler, instalados con anterioridad al 28 de septiembre de 1984, fecha de entrada en vigor del Real Decreto 1725/1984, de 18 de julio, tendrán un descuento sobre el precio establecido con carácter general en la presente Orden ministerial del 40 por 100 hasta el día 31 de marzo de 1985 y del 20 por 100 desde el día 1 de abril de 1985 hasta el día 31 de diciembre de 1985, excepto los contadores monofásicos de energía activa, cuyos descuentos serán del 60 por 100 hasta el día 31 de marzo de 1985, del 40 por 100 desde el día 1 de abril de 1985 hasta el día 31 de diciembre de 1985 y del 20 por 100 desde el día 1 de enero de 1986 hasta el día 30 de junio de 1986. Los valores concretos de los precios de alquiler a aplicar se reflejan en el anexo a la presente Orden ministerial.

Lo que comunico a V. I. para su conocimiento y efectos.
Madrid, 20 de diciembre de 1984.

SOLCHAGA CATALAN

Ilma. Sra. Directora general de la Energía.

ANEXO

Precio de los alquileres, con sus descuentos, hasta tanto no exista modificación en el precio establecido con carácter general

	Nuevos	Existentes

Estos precios son los indicados en la columna cuarta de la página 4 del *"Informe de 18.12.1984 de la DG de la Energía sobre propuesta de Orden ministerial por la que se revisan los alquileres de los equipos de medida de energía eléctrica"* (se incluye a continuación la citada página 4)

BOE 25 febrero 1987: Orden 20-02-1987 del Ministerio de Industria por la que se establecen nuevas tarifas eléctricas:

Orden de 20.02.1987 del Ministerio de Industria por la que se establecen nuevas tarifas eléctricas

Los gastos de modificación de la instalación serán de cuenta del abonado, que podrá encomendarlos a la Empresa suministradora o a un instalador autorizado. La retirada del equipo sobrante, y la adaptación o cambio del que ha de quedar instalado, será por cuenta del propietario anterior del mismo, de forma que no cambie el régimen de propiedad o alquiler. Se extenderá nueva póliza de abono en la que se consignará la nueva potencia contratada para el suministro conjunto, sin que esto suponga el pago de ningún derecho por el abonado. En ningún caso se podrá exigir la sustitución del equipo de medida si éste mantuviera la precisión suficiente para la nueva potencia.

Tercera.–*Interrumpibilidad.*

A) Tanto a los subsectores con potencia contratada conjunta superior a 1 GW como a los abonados individuales que reunieren las condiciones de potencia contratada superior a 80 MW en un solo suministro, utilización anual de dicha potencia superior a 7.000 horas, tensión nominal de suministro superior a 72,5 kV y haber aceptado la interrumpibilidad total de su potencia contratada en cada uno de sus cuatro tipos A, B, C y D, que hubieren suscrito con la Dirección General de la Energía convenios sobre ahorro energético y mejora de la explotación del sistema eléctrico, se les continuará aplicando, para el cálculo del descuento R por interrumpibilidad, establecido en el punto 5.4, del título I del anexo I de la presente Orden, durante un período de un año, contado a partir del día 1 de marzo de 1987, los valores de la constante Ki de la primera columna del cuadro que figura a continuación, si se aceptan las condiciones siguientes:

a) La Empresa suministradora podrá solicitar a estos abonados las desconexión total o parcial de los equipos correctores del factor de potencia durante las horas de valle de un modo uniforme programado, según las necesidades de explotación de su sistema eléctrico.

b) Para el cálculo del complemento por energía reactiva no se contabilizará la consumida en horas de valle. El complemento a aplicar se calculará tomando como base los consumos de energía activa y reactiva durante las horas de punta y llano. El porcentaje resultante a aplicar por el complemento se ponderará en proporción a las horas correspondientes a este período y las horas de valle con el correspondiente a cos $\varphi = 1$.

c) Los abonados deberán solicitar a la Empresa suministradora acogerse a este sistema antes del 15 de marzo de 1987 y establecer un acuerdo con la misma con fecha tope el 15 de abril de 1987. En caso de discrepancia resolverá la Dirección General de la Energía quien podrá fijar las condiciones de desconexión y el plazo de puesta en vigor de la misma.

d) Si durante un período mensual de facturación el contador de energía reactiva capacitiva registrare un consumo en horas de valle superior al acordado, para la facturación de este mes, se aplicarán las Ki de aplicación general que figuran en el punto 5.4 citado.

En el caso de no aceptación, los valores Ki serán los figurados en la segunda columna del siguiente cuadro:

K1 = Para el tipo A general	35	30
Para el tipo A1	25	21
K2 = Para el tipo B	25	21
K3 = Para el tipo C	22	19
K4 = Para el tipo D	29	25

La Dirección General de la Energía podrá anular la aplicación de estos valores de Ki a los abonados que no cumplieren los convenios firmados. En tal caso, les serían de aplicación los valores Ki que figuran en el punto 5.4 del mismo anexo I.

B) A los abonados con suministros interrumpibles, que hubieren venido disfrutando de condiciones de facturación de energía eléctrica, compensables por OFICO, establecidos de manera expresa por resolución de la Dirección General de la Energía, como consecuencia de haber suscrito convenios con este Departamento ministerial, y cuya vigencia haya finalizado con posterioridad a la Orden de este Ministerio de 6 de marzo de 1986, por la que se establecen nuevas tarifas eléctricas, se les mantendrán dichas condiciones por un nuevo plazo máximo de tres años, contados desde la fecha de finalización del convenio anterior. A tal efecto, el Ministerio de Industria y Energía, podrá celebrar con estos abonados los convenios que fueran necesarios, o prorrogar los existentes.

Asimismo, el Ministerio podrá convenir la adhesión a los convenios a que se refiere el párrafo anterior, de otros abonados que considere reúnen las condiciones necesarias, en razón de su actividad.

Cuarta.–*Tarifa G.4.*

Los abonados acogidos actualmente a la tarifa G.4 seguirán en la misma hasta que voluntariamente soliciten, en su caso, pasar a otras tarifas.

Quinta.–*Alumbrado público.*

Independientemente de la prohibición de contratar nuevos suministros de alumbrado público, a tanto alzado, de acuerdo con lo dispuesto en el Real Decreto 3139/1977, de 9 de diciembre, todos los suministros de energía eléctrica existentes por este sistema se facturarán con arreglo a la tarifa B.0. Para ello, el consumo se calculará considerando diez horas diarias de utilización a la potencia nominal de las lámparas.

Sexta.–*Coeficiente reductor de OFICO.*

Las Empresas distribuidoras que habiendo estado autorizadas a la aplicación de un coeficiente reductor por distribución rural en su cotización a OFICO, no hayan podido renovarlo para el presente año o hubieran sufrido variaciones en el mismo por haber excedido en el ejercicio anterior el límite de 25 millones de kWh o la cifra de 10.000 habitantes en alguno de sus núcleos de población suministrados, podrán solicitar su revisión de acuerdo con lo dispuesto en la presente Orden, con efectos a partir de primero de enero de 1986, siempre que lo soliciten dentro del plazo de dos meses a contar desde la publicación de la presente Orden.

Séptima.–*Derechos de acometida, enganche y verificación.*

Las instalaciones cuya implantación o modificación se encuentre en período de tramitación en la fecha de entrada en vigor de la presente Orden, se regirán por la Orden de 6 de marzo de 1986 en cuanto a las cantidades a satisfacer por derechos de acometida, enganche y verificación.

Octava.–*Potabilizadoras.*

La Dirección General de la Energía podrá autorizar un suplemento de precio para la energía suministrada durante el año 1987 por las instalaciones de potabilización de las islas Canarias que entregaban energía eléctrica a la Empresa «Unión Eléctrica de Canarias, Sociedad Anónima» (UNELCO), con anterioridad a junio de 1982, aunque, en ningún caso, será superior a la compensación que se apruebe para la energía producida por esta Empresa en el mismo período de tiempo.

El suplemento de precio para la energía suministrada por las instalaciones mencionadas en el párrafo anterior, referido a 1986, es el que de forma provisional aprobó la Dirección General de la Energía por resolución de 17 de junio de 1986.

DISPOSICIONES FINALES

Primera.–La presente Orden entrará en vigor para los consumos efectuados desde la fecha de entrada en vigor del Real Decreto 162/1987, de 6 de febrero.

Segunda.–Por la Dirección General de la Energía se dictarán las disposiciones que fueren precisas para la aplicación de la presente Orden.

DISPOSICION DEROGATORIA

Quedan derogadas las Ordenes de 14 de octubre de 1983, de 27 de abril de 1984, de 25 de mayo de 1984, de 13 de junio de 1984, de 20 de diciembre de 1984, de 13 de febrero de 1985, de 16 de julio de 1985, de 15 de noviembre de 1985 y de 6 de marzo de 1986, las Resoluciones de la Dirección General de la Energía de 7 de marzo de 1984, 31 de julio de 1984, 29 de marzo de 1985 y 2 de agosto de 1985, así como cualesquiera otras disposiciones de igual o menor rango, en cuanto se opongan a lo dispuesto en la presente Orden.

Lo que comunico a V. I. a los efectos oportunos.
Madrid, 20 de febrero de 1987.

CROISSIER BATISTA

Ilmo. Sr. Director general de la Energía.

ANEXO I

TITULO PRIMERO

Definición y aplicación de las tarifas

Primero.–*Composición general de las tarifas.*

Las tarifas de energía eléctrica de estructura binomia aplicable por las Empresas acogidas al Sistema Integrado de Facturación de Energía Eléctrica (SIFE), están compuestas por un término de

BOE 14 enero 1995: Orden 12-01-1995 del Ministerio de Industria por la que se establecen nuevas tarifas eléctricas:

Disposición adicional cuarta. *Abono de cantidad compensatoria.*

De acuerdo con lo previsto en la disposición adicional decimoctava de la Ley de Presupuestos Generales del Estado para 1995, los pensionistas de clases pasivas que hubieran percibido durante 1994 pensiones objeto de revalorización, así como aquellos que hubieran percibido la cuantía correspondiente a las pensiones mínimas o al límite máximo de percepción de las pensiones públicas, o sus herederos, recibirán durante 1995, y en un único pago, una cantidad equivalente a la que resulte de aplicar a la pensión percibida durante 1994 el coeficiente 0,0086957.

Lo dispuesto en el párrafo anterior será, asimismo, de aplicación a las pensiones de clases pasivas con fecha inicial de abono durante 1994 para cuya determinación se hubieran tenido en cuenta haberes reguladores susceptibles de actualización en el mencionado ejercicio.

Disposición derogatoria única. *Derogación de disposiciones anteriores.*

Queda derogado el artículo 1 del Real Decreto 306/1985, de 20 de febrero, así como los preceptos contenidos en las disposiciones de igual o inferior rango en lo que se opongan a lo dispuesto en el capítulo III de este Real Decreto.

Disposición final primera. *Habilitación para disposiciones de desarrollo.*

Se autoriza al Ministro de Economía y Hacienda para que dicte las disposiciones de carácter general que resulten necesarias para la aplicación de este Real Decreto.

Disposición final segunda. *Entrada en vigor y efectos económicos.*

El presente Real Decreto entrará en vigor el día siguiente al de su publicación en el «Boletín Oficial del Estado», sin perjuicio de que los efectos económicos, respecto de las materias reguladas en los capítulos I y II, se retrotraigan, cuando así proceda, al 1 de enero de 1995. Por lo que se refiere al capítulo III, sus efectos económicos serán los que en cada caso procedan, según la normativa general aplicable a las materias contenidas en el mismo.

Dado en Madrid a 13 de enero de 1995.

JUAN CARLOS R.

El Ministro de Economía y Hacienda,
PEDRO SOLBES MIRA

MINISTERIO DE INDUSTRIA Y ENERGIA

1048 *ORDEN de 12 de enero de 1995 por la que se establecen las tarifas eléctricas.*

El artículo 6 del Real Decreto 2550/1994, de 29 de diciembre, establece que el Ministerio de Industria y Energía realizará la distribución del aumento promedio global tarifario para 1995 entre las distintas tarifas para la venta de energía eléctrica que aplican las empresas acogidas al SIFE y asimismo le faculta para dictar nuevas formas de aplicación de los complementos tarifarios, la realización de las modificaciones oportunas que permitan una aplicación más flexible y precisa de la normativa existente y para desarrollar el sistema de tarifas establecido con carácter experimental de tarifa horaria de potencia, que podrá ampliarse a nuevos consumidores. Este sistema seguirá teniendo carácter experimental y coexistiendo con el general, y será optativo para el consumidor.

Asimismo, el párrafo segundo del artículo 3 del citado Real Decreto, faculta al Ministerio de Industria y Energía, a la inspección de las condiciones de la facturación a aquellos suministros a los que se apliquen complementos tarifarios establecidos en la normativa vigente, directamente o a través de la Oficina de Compensaciones de la Energía Eléctrica (OFICO) o del Organismo que el Ministerio designe para ello.

Por otra parte, el artículo 14 del Real Decreto 2366/1994, de 9 de diciembre, sobre producción de energía eléctrica por instalaciones hidráulicas, de cogeneración y otras abastecidas por recursos o fuentes de energía renovables, por el que se fijan los precios de la energía entregada a la Red de Servicio Público por estos productores, términos de potencia y energía, dispone que estos precios se actualizarán por el Ministerio de Industria y Energía con la variación media de las tarifas eléctricas.

A los expresados efectos, la presente Orden desarrolla las previsiones de los citados Reales Decretos y también se fijan las cantidades concretas máximas aplicables por alquiler de equipos de medida, de acuerdo con la Condición 16 de la vigente Póliza de Abono, aprobada por el Real Decreto 1725/1984, de 18 de julio, se actualizan las cantidades a satisfacer por los derechos de las acometidas eléctricas, a tenor del artículo 24 del Real Decreto 2949/1982, de 15 de octubre, y se fija el porcentaje de la venta de energía como contraprestación de los servicios prestados por «Red Eléctrica de España, Sociedad Anónima», conforme lo dispuesto en la disposición transitoria del Real Decreto 91/1985, de 23 de enero.

En su virtud, este Ministerio ha dispuesto:

Primero.—Las tarifas eléctricas para 1995, el desarrollo de la tarifa horaria de potencia, los precios de la energía entregada a la red por la producción en régimen especial, los suministros a quienes el Ministerio de Industria y Energía inspeccione las condiciones de la facturación y los fondos destinados a compensaciones son los que se definen en el anexo I de la presente Orden y se aplicarán de acuerdo con lo dispuesto en el mismo.

Segundo.—Las tarifas básicas a aplicar, con los precios de sus términos de potencia y energía, son las que se relacionan en el anexo II de la presente Orden.

Tercero.—El precio de los alquileres de los equipos de medida es el que se detalla en el anexo III de la presente Orden.

Cuarto.—Las cantidades a satisfacer por derechos de acometida, enganche y verificación, definidos en el Real Decreto 2949/1982, de 15 de octubre, para nuevas instalaciones, quedan fijados en las cuantías que figuran en el anexo IV de la presente Orden.

Quinto.—«Red Eléctrica de España, Sociedad Anónima» percibirá, como el componente diferenciado de las tarifas que constituye la contrapartida provisional a la prestación de sus servicios, el 2,484 por 100 de la facturación por venta de energía suministrada a los abonados finales de la Península.

La Dirección General de la Energía establecerá el procedimiento de aplicación y la base de recaudación de este porcentaje.

Hola, ayer me llegó la factura de la luz, con un importe de 421,72 euros.
Les cuento mi casa no tiene ni 50 metros cuadrados, apenas abuso de la calefaccion, soy la típica persona que dice que apages todo del boton y no dejes nada encendido, por el motivo de ahorrar claro....
Me pregunto de que sirve.
Me gasto el dinero en bombillas de bajo consumo y en definitiva solo pago, pero de ahorro nada.
Todo en mi casa funciona con luz, y no se como hacer para solucionar este gasto

excesivo.
Mi sueldo es de 600 euros, como voy a vivir...VERGONZOSO

ROMANCE JACARANDOSO DE DON ANTONIO GARCÍA MUÑOZ, PREZ DE CABALLEROS ANDANTES Y PEATONES

Convengamos que el romance
es el formato ideal
para cantar infantinas
y doñas de armas tomar.
Como parte de ese gremio
de señoras sin igual
te celebro sin ambages,
te declaro mi amistad.
Con licencia o sin licencia

-o licencioso sin más-
te remito estas palabras
donde no falta la sal.
En octosílabo verso
y rimado en asonante,
salvo en el caso de ahora
que me rima con picante,
confieso mi devoción
por tu arte en la escritura,
la inteligencia que muestra,
el talento que rezuma.
También por tu disciplina,
por tu esbelta donosura,
por tu garbo incomparable
por tu manera forzuda.
Retomando lo picante
para acabar estos versos,
no quisiera despedirme
sin prodigarte mil besos,
no besos de casto amigo
sino de amigo galante,
encendido de lujuria
por la parte que me arde.
Aquí me detengo y planto
por no avivar ese horno,
que si empecé laudatorio
podría acabar en porno.

Hija mía, Aüela del alma, tras leer el poema
y ver la estatua,
la sangre se altera
y el corazón proclama
que tan bello conjunto
el cuerpo aclama.

Bueno, es que con esto de las clases de poesía, tengo la rima exaltada.

Alimaña, estás segura? Habré de mandarle una foto, para que, al verme, se le baje un tanto la pasión.

Doña Soledad: no es este espacio el adecuado para su extenso alegato a favor ni en contra de unos perfectos desconocidos para usted.
Aquí, en concreto, no. Y respecto a su requisitoria contra C. tampoco, ya que éste tiene un blog, un correo, y puede usted hacérselo llegar directamente o, como usted anuncia, mediante el Juzgado.

Borro todos los comentarios que no se ajustan al tema o tienen faltas de ortografía y de respeto a la inteligencia de los lectores.

Autor: Soledad Grasa Gil. Letrada

Las Palmas,
Doña Anónima señora,escondida bajo el pseudónimo de gatopardo.

No voy a discutir con Usted si el espacio es el ideal, aunque, reflexionando concluyo que no, no es ideal ni se le aproxima.
Pero le quiero corregir una defectuosa forma de proceder en la vida.
Da Usted por supuesto que estos personajes a los que nos referimos son unos "perfectos desconocidos para mí".

Lamento decirle que hablé en varias ocasiones con Don Ernesto Koplowitz, tanto de sus trabajos, el Nº 8. "Esoterismo y Exoterismo", y profundos libros publicados por él en materias de profunda filosofía y ética.

También , como Letrada, le dí mi visión del tema, hablamos de la vía civil.
Le comenté que no veía calumnias por ningún lado, hablamos sobre la Alta silesia, yo relacionaba con ésta zona de Polonia el apellido Koplowitz, resultando ser judío alemán, no estrictamente polaco.

Hablamos, nos intercambiamos e-mails y, al comenzar el verano se despidió de mí hasta después de la época estival, desde Moralzarzal.

Ahora, leo algunas cosas sobre Alicia koplowitz. Estuve de su parte, pero, guardo mi secreto. Para una Letrada, con Toga "robada en su propio despacho", absolutamente cerrado y sin ninguna persona dentro, las cosas demuestran que, no todo lo que reluce es mínimamente apreciable.

Con ésta matización: Usted a mí no me conoce de nada, por tanto no debe afirmar eso de "perfectos desconocidos", por respeto a la intimidad de Don Ernesto, no le comento temas de su infancia, retazos de mi vida, largas conversaciones mantenidas a horas intempestivas, la primera a las cinco de la madrugada, y, educadamente me demostró que es un Señor, de templado carácter, con el que es fácil entablar una cordial amistad.
Otra cosa es sumergirse en los turbios asuntos de una señora que compra desde fotos en las que sale fea, hasta los comentarios de la- no se puede llamar periodista- comentarista de la vida rosa, o cotilleos de los "famosos", la señora Barrientos, esa que es amiga de la Dama de turbios teje-manejes, que planifica mucho lo que hiere y lo que desmoraliza, aunque- permítame la expresión- NI DIOS LE HACE CASO. sus manipulaciones de noticias con el favor de la asidua al cotilleo de la vida de personajes conocidos por sus amoríos, siendo, por el momento "la tapada" de los alba (no lo entiendo, a mí mi madre , en el cielo creo que esté, y lo deseo- me "tapó" y facilitó el Amor de mi eternidad, no ya de mi vida. Me tapó ante mi padre, que hoy, conversando, me escucha, me comprende, me apoya. y se alegra de ser el último, junto con mi hermana en enterarse que, una leucemia de células peludas rompieron días de viaje Galicia-Madrid, comidas en Lardy, conciertos de sueño en el Real, entonces no se representaba ópera, a la que me aficioné tras el eterno vivr de mi pareja en la casa de

Padre-Dios.

Mi pareja de Bodas de Sangre, que invisible, me acompaña, a mi vera, y teje la tranquilidad de mis ilusiones renovadas, y me da la medida de lo que es tener un gran tesoro, y la turbia existencia de una persona sobre cuyas noticias, rompe con un ocioso y anciano aritogato, duque de mil estúpidas nomnaciones. en historia del Derecho desde el siglo xvi, los ducados, marquesados, han pasado a ser distinciones nominativas por las que se pagan una serie de tasdas y derechos. Pero nosotros estudiamos por ejemplo que ser conde, era ser el feudal señor del condado de tal o cual lugar, con el asqueroso derecho de Pernada, privilegios y aberraciones varias, que hacen de éstos "seres aristogatos" auténticos Don Nadie anormales, pertenecne a consejos de Empresas que los fichan no por su inteligencia, sino por dar un espectyral espejismo. Lo que ellos llaman "Dar imágen2.

Que ni se aclaran, hasta para dar la imágen de "pareja enamorada", sus periodistas- entre comilas- "a la orden" de talonario, no se ponen de acuerdo sobre quñé toca hoy contar, pues me encontré un "romántico paseo" que unos describen en tierras de la Santa de ávila, y otros sitúan, son las mismas imágenes, en la sureña Sevilla.

De pronto se habla de la hermosa alicia, de boda inminente, y a los dos días, de ruptura o de ser, por ahora, solamente pareja.
Quye son pareja ya se ve, pues dos, son pareja, tres un trío cuatro un cuarteto, y así sucesivamente hasta llegar a una orquesta sinfónica.

En fin, que una turbia oersona que dicta a sus corifeos de la rosa noticia, si es o no novia o amiga, últimamente es "la tapada", ya le dije.no creo que tapen ningún romance como el mío, de un ángel esposado en puras bodas de sangre, por eso aún no comprendo por quñé le llaman "la tapada", no tiene nada importante que ocultar, salvo que ese día, el de una boda de un nieto de los alba, acudió a escondidas al convite, a mí sólo se me ocurre que quisiera disimular una de esas numerosas inflamaciones de su rostro u otras partes del cuerpo que se opera con caros esstipendios, en frecuentísimos viajes a París, pues le obsesiona el miedo por aparentar du proximidad a la sesentena. Se cuida, es lícito, pero, un cuerpo, que en cinco años se pareceráa michel Jakson, un cuerpo que no lleva nada bueno dentro, no vale la pena, sobre todo si viola el derecho a la intimidad.
Sabina canturreaba eso de ¿quien me ha robado el mes de Abril?.
yo soy sólo una abogada que, tras diecisiete años de ejercicio, el segundo día de estrenar toga nueva, le guardé en mi casa y despacho, con buena puerta protegido, la Toga era muy especial, tenía una nueva forma en el lado de las solapas, se confeccionaba en cuero. Era una novedad, en realidad dudé de si el Estatuto nuestro la permitiría, y, sin forzar puertas, ventans, con una llave y aprovechando nuestra ausencia, me cambiaron la Toga por otra toda en tela, muy bonita, pero me ha convertido en una abogada que canturrea¿quién me ha robado la toga a mí' ¿quien se metió en mi vidfa como un reptil?. Tengo un camaleón siguiéndome los pasos y controlándome hasta la toga, pero me quedan luces suficientes opara discernir la situación de don Ernesto: no veo calumnias en su libro. Lo que me preocupa, y no lo comenté porque e me ocurrió en estos días, es que en este latrocinio de los capitalistas-pederastas.-legionarios.-mentirosos compulsivos. robatogas de los letrados de madrid. Por fortuna yo estoy en Gran Canaria, mar por medio, pero lo que me preocupa es que le roben su dinero, con sus "amigos pagos", nadie les quiere por su persona sino por el dinero...es vivir en la miseria más grande. De braguetazo en braguetazo, y con tres preocupaciones.1- Que se sepa, hasta el empacho que en la revista no sé qué figura ern el número tantos de los más ricos del mundo.

Leo eso unas diez veces al día.

2/ Los no profesionales, pues cotillear no es ninguna profesión, ni periodistas, que, previo pago, escriben que se pasea por París enamorada, de un anciano varón de 67 años que, camina detrás de ella, y, "por humildad" se esconde bajo unas gafas negras. Leo en otro lugar que sus frecuentes viajes a París, se deben a su compulsiva obsesión, rayando en la neurosis, de no envejecer. ison ya sesenta años, es abuela, los parches durarán cinco años más, pero no se puede ser eva Perón momificada...

Me preocupa el mundo de metiras que es capaz de construir, se inventa un gran amor, otro día declara que se encontró casualmente con el ocioso bon vivant en la capital del sena, de nuevo son unos tóridos amores, en Paris. ella delante, y el dos pasos detrás. sin tomarse la mano.
La noticia revela que sus gafas oscuras en el gris día parisino, se debe a la necesidad de taparse- por eso será "la tapada" unas inflamaciones enormes en el rostro, debidoa los tratamientos antienvejeimiento que se hace con frecuencia tal, que, no sé cómo gana tanto dinero, serán esos tráficos de influencias, esas informaciones privilegiadas, que le permiten salirse de la bolsa un día antes del hundimiento.

Esa señora dice que su éxito está en pagar sumas millonarias a personas con buenos contactos, (Boyer, antaño sociata, luego del Çp.P. y ahora manda Zp, vaya contactos..., parásitos que, sin embargo le hacen incurrir en el delito de tráficode influencias, pero eso a ella le trae al pairo, pues presume de pertenecer al máximo poder sobre la tierra, el lobby judío, que- se jacvta en revistas de ello, te hace logrr todo, librándote incluso de ir a la cárcel2.

Dándole vueltas a todas esas formas de pensar, comprando delincuentes, trafico de influencias, mofándose del Código Penal, presumiendo de su poder por ser judía...y librarse de la cárcel ¿qué hará para sentirse accesible a la cárcel, de la que se libra...

en síntesis, sus mentiras , sus corifeos, comprar a bon vivants con dinero,p para traficar con influencias, reirse del Código Penal por ser judía, me lleva apreguntarme ¿y para ésto se martirizó y murió de paludismo, con un frío de pena y fiebre que arde en gélidos camastros de madera, en un barracón en el que la puerta golpeabapor la fuerza del viento, y agonizó gritando, envuelta en fiebre y una manta "Esa puerta, esa puerta". Pregunto para ésto y de esa manera murió martirzada la pobre, joven y entrañable niña llamada ANNA FRANK'.

Los judíos levantan hoy muchos muros de la vergüenza, por eso no temo por la suerte penal de don Ernesto, sino por el latrocinio, se quedarán con su parte de la herencia, comprando, comprando, comprando, ¿alguien les querrá por lo que son, si es que lo que son es aceptable como ser humano, o es que aceptan con orgullo que todos les quieren por su dinero?.

Por eso, me desdigo de lo dicho, ya no estoy del lado de A. K. (¿Alicia Keyss?) porque, pensando, no he encontrado nada humano, y su chulería de lobby judío que te libra de la cárcel, me suena a ráafaga que dispara un judío acribillando a un niño palestino, o cómo los primeros ministros meten mano a sus secretarias, y, TAMPOCO CÁRCEL.
O cómo han construído ese muro de vergüenza para impedir que los pelestinos reciban suministros de alimentos.

¿Para eso, y de penosa forma de morir, padeció ANNA FRANK?

Creo quecomprando falsos periodistas, testigos pagos, abogadas vulgarmente asilvestradas, que no saben llevar un litigio con sutil ironía hilando leyes, sino que son "perros de presa" que dan idea de mafia a mi profesión...creo que, judicialmente don ernesto no se verá comprometido,pero, las mentiras, los tráficos de influencias, sus viajes incesantes a París, románticos antievejecimientos de costoso importe, su lobby de judíos que "se libran"- luego reconocen que hacen méritos para estar- de la cárcel. su obsesión por constatar quwe en la lista de cerdos más cebados y capones más embutidos y engordados, son las primeras, las más ricas las número quinientos no se qué.

Todos sabemos que es muy rica, que compra sinvergúenzas que trabajan para ella, como Boyer- podría hablar cinco horas, dándole una jurídica explicación de que Rumasa fué un delito de robo. lo sabe todo el que se llame abogado y lo sabe todo el que tiene una vida honesta.
Ese proceder criminal, presumiendo de poder, poder para librarse de la cárcel- no es chulería, si me tiene a mí enfrente, lo pongo en duda, llevo en la sangre la fuerza de la vida y de la muerte, no me asusta alicia koplowitz, mafiosa y falseadora de noticias. en google las redactan y al día siguiente, las mismas noticias, si decían nopvios, dicen amigos. si decían digo, dicen diego. Yo las imprimo, la última, por respeto a Usted, no se la cuento , porque es fuerte, fuerte, fuerte.

También he reconsiderado la situación de c., de la forma en que lo he apercibido, ahora veo que está en un buen lío, pues él, que no pertenece al lobby judío de alicia sin maravillas koplowitz, roza el ámbito penal al ser tan claro, al afirmar que puede aparecer muerto don e. o en un manicomio.

no son capaces de hacer cosas tales, en la mayoría de los casos, pero su legión de pederastas, y el lobby judío, sdon escudos para utilizarle pasra hacer ruido, la calumnia, la injuria, se solventa con condenas dinerarias. ero puedenllena las revistillas de ese lío, para acallar las quejas de su hermano, vícitma del latrocinio y de verse expoliado, privado de su herencia, por quién, maneja la prensa, la gente le teme, la gente le alaba pevio pago millonario y ella presume de elo, ahí, dice, está su éxito, en tener bienpagaos a delincuentes que cometen el delito de tráfico de influencias, pero, el lobby judío...se libra de la cárcel.¡cosas veredes!

en fin, le ruefgo me disculpe por entrar como un elefante en una cacharrería, en un lugar inadecuado y con faltas de ortografía.

no es eso, son producto de una mala visión del teclado, por el cansancio de mis ojos, pues no duermo en varios días, al descubrir todas esas horribles realidades, de la Reina en la Feria de las Vanidades.
Cambio de tercio, me pongo del lado del robado y del que por ingénuo, se pone a tiro de un lobo de fauces rojas de sange ajena. su sangre no es roja, es de horchata.

Si le parece que no debe publicar lo que le he escrito, por mala construcción de los vocablos, por no ser el lugar adecuado, la respeto.

Pero si lo encuentra periodísticamente, literariamente interesante, pude publicar que rectifico, que alicia koplowitz no perjudica judicialmente a su hermano, pues el libro está muy bien pensado. Pero el robo está hecho, y a golpe de talonario, los corifeos, los que

le bailan el agua, y los que tienen "contactos", que fina forma de hablar de meros delincuentes, hará el, ruido suficiente, tirando incluso bombas de palenque, para acallar la voz de su expoliado hermano.

En cuanto a no quiero, sí quiero, lo amo, es sólo amigo, París como romántico y frecuentísimo refugio, para su amado el,ocioso don nadie que no da un palo al,agua, y en el campo , lo asalta. "aceituneros altivos, decidme en el alma quien...." me encanta miguel Hernández. Perdone la mala transcripción del texto, estoy agotada, pero la conclusión es clara. Se ha cometido un crimen- era una serie- un robo en un herencia,y la que nunca pierde pierde la paciencia si le bailan el agua y disfruta poniendo cantar a adolescentes, una canción que dice:Repásate el motor, que se te sale el agua por el carburador. canción isleña, me parece genial, viva el potenciar la cultura canaria, por otra parte el jet que viene y va del continente a este archipiélago, tiene el carburador muy requemado.

Estoy diciendo cosas que le parecerán exceso de protagonismo, pero yo soy soledad Grasa Gil, amante del artículo 115 , loq que me convirtió mágicamente en lince. Y, ddefiendo a los pocos que quedamos, EL LINCE IBÉRICO ESTÁ EN VÍAS DE EXTINCIÓN, Y MER DEFIENDO.

Dabina canta ¿quien me ha robado el mes de Abril?.
Yo canto, fuerte y alto, que diría Luz Casal, ¿Quien me ha robado la toga a mí?.

No es mafia, es violación del derecho al honor a la intimidad y a la propia imagen. Artículo 18 de la inocente Constitución.

Y lo vulnera la "tapada" de los alba. Alicia koplowitz.
Lo afirmo por escrito y con publicidad.

Hágame éste favor, publique mi mal transcrito escrito, por defender mi toga que fué robada, defiendo a don e. por heredero excpoliado, a don c. por ingenuo , y me defiendo, porque si se extingue el lince, la emisión de my life, finish for killer. No sé idiomas sólo chapurreo francés, y amo el latin y balbuceo algo de griego.
No veo,me voy a duchar dormiré un par de horas y me voy con mi padre al corte Inglés a HACER UNA COMPRA GRANDE, CUANDO MI MADRE VIVÍA, IBA A OTRO SUPER, DÍA A DÍA CARGANDO CON TODO LO NECEsario para que no nos faltara nada, sobre todo el coraje de decir, ALICIA KOPLOWITZ VIOLA MIS DERECHOS FUNDAMENTALES, Y LOS CIVBILES Y LOS PENALES.

SI NO PUBLICA ÉSTO, PENSARÉ QUE ES USTED PARTE DE OTRA GRAN FARSA.

sAQUELO MALM ESCRITO A LA LUZ. QUIERO RECUPERAR MI TOGA, PARA ELLO NO ACUDO A LOS TRIBUNALES, ELLA COMPRA LOS PREVARICADORES COMO PONE A TOPE LOS MOTORES, ACUDOM A MI, AL LINCE. SÉ QUE SU ODIO SE ENCARRILA A LA VENDETTA DE QUERER DESQUICIARME, PERO YO, POR MIS AMADAS BODAS DE SANHGRE ,..... tengo urgencia por marcharme, Y QUÉ MEJOR QUE HACERLO DEJANDO VACÍO DE CONTENIDO ESTE DELITO, ME VOY CON MI DIOS, MIS ANCESTROS Y MI GRAN AMOR, MI CÓNYUGE, Y DEJO EN SILENCIO A TODO UN PLANETA, PREGUNTÁNDOSE POR QUÉ, VULNERÓ LOS DERECHOS DE UNA LETRADA QUE PERDIÓ LA TOGA, EL DERECHO A LA INTIMIDAD, Y ENCONTRÓ QUE LAS ARIAS DE TOSCA, LAS IMAGINÉ, Y PUCCINI LAS COMPUSO, PARA LA SOPRANO DEL MILENIO, ÁNGELA GHEORGHIU, UNA JOVEN DE CUARENTA AÑOS QUE, SI QUIERES COMPROBAR QUE HA NACIDO UNA NUEVA DIVA, SOPRANO DE TODO EL,PLANETA, LOS REYES DE EUROPA,

EN JAPON LOS EMPERADORES, EN EL MUNDO LOS MILLONES QUE AMAMOS LA ÓPERA, ESTAMOS ORGULLOSOS DE SER, DEFENSORES, DEL LINCE, DE LA SOPRANO DE LA NUEVA ERA, DE LA VOZ QUE LLEVA LA FUERZA DE OTRO MUNDO, DE LAS TOGAS QUE SE ROBAN CON TU PROPIA LLAVE DE PUERTA BIEN PERTRECHADA, Y ESTOY MÁS QUE AGOTADA DE LOS SIMULACROS Y OCIOSOS CÓMPLICES QUE NO SABEN INSPIRAR MÁS QUE LAS GANAS DE SUICIDIO EN SU PRIMERA ESPOSA, LA DEL ARISTOGATO, HOY FELIZ CON DON BORJA, ANTAÑO DEPRIMIDO CON EL VIEJO Y CUADRADO BON VIVANT DE PELO BLANCO COMO UN VIEJO, Y BIEN NUTRIDO PELLEJO, COME SIEMPRE A DOS CARRILLOS. LO LEÍ EN DIARIO DEL SUR, Y SE ATREVE A ASOMARSE A MIS ESPEJOS.

LA GUERRA ESTÁ PERDIDA, LES RETO A QUE RECHACEN LO QUE AFIRMO. LA GUERRA ESTÁ PERDIDA, ME URGE LLEGAR A CASA DE MI ETERNO CREADOR, CON MI AMOR NUTRIDO POR ETERNA EXISTENCIA ILUSIONADA
ME URGE ESTAR CON MI MADRE, PREPARAR LAS ESTANCIAS PARA LA LLEGADA FELIZ DEL SECRETARIO DE DIPUTACIÓN, MI PADRE, HONESTO Y BUENO COMO NADIE.
ME URGE EL DESCANSO ETERNO, POR ESO LE INSTO A QUE DENUNCIE Y EL LOBBY JUDÍO, PREPARE CIENTO Y UNA "JUDIADAS2, NO ES RESPETAR A LOS LECTORES DECIR LA ORDINARIEZ DE MIL PUTADAS.

VEN, DEJA DE MANIPULAR MI VIDA Y VEN A EMBESTIRME, CUIDADO CON EL TORO DE LA VIDA, FUÉ EL CONSEJO DE UN CATEDRÁTICO, EL DÍA QUE DEJAMOS DE SER ESTUDIANTES Y FFUIMOS ASPIRANTES A NOTARIOS, YO, RAZONES SECRETAS, NO LOGRÉ LA EMPRESA, Y SON YA CASI DIECIOCHO AÑOS DE ABOGADO.
ME CONOCE HASTA ANGELA GHEORGHIU, NO TENGO MIEDOM AL OBBY-LOBO, NO LE TEMO AL TOO DE LA VIDA, VEN, DELINCUENTE ALICIA KOPLOWITZ, NÚMERO QUINIENTOSNOSEQUÉ DE FORGES, DE LOS QUE MÁS TIENEN, HASTA LA CARA, LA TIENEN MÁS DURA, COMPRAN CUADROS DE PINTORES, NO CON LA GENIALIDAD DE UN MUSEO THYSSEN, SINO PARA NO PAGAR IMPUESTOS, DE GOLPE, EN MENOS DE DIEZ AÑOS, CREAN FUNDACIONES PARA TODO, DEDUCIR IMPUESTOS, RECIBIR HONORES, PREMIOS DISTINCIONES, SON LA NOVIA EN EL BRAGUETAZO Y NO SON EL MUERTO EN EL ENTIERRO, PORQUE SON MUERTAS EN VIDA.

EL MUERTO EN EL ENTIERRO SOY YO, ESA ES MI ÚLTIMA DEFENSA, MI ÚLTIMO VASO, MI ÚLTIMA GENIAL VICTORIA.
VEN, DENUNCIA, HAZ JUDIADAS, ERES EL NÚMERO QUINIENTOS Y ALGO DE LOS MÁS LADRONES EN UN MUNDO QUE SE MUERE DE SIDA- CON LO QUE SE RESUELVE EL PROBLEMA DEL TERCER MUNDO MURIENDO DE HAMBRE-, ERES LA MÁS RICA, LA VIEJA MÁS RETOCADA DE MARAVILLA, PARECES UNA NIÑA. TENÍAS UNA DISPUTA, PERO OÍ MAL, ERA SÓLO UNA RIÑA Y, SORD ME DIJE, ES UNA NIÑA O UNA PUTA.
VEN, TORO NEGRO QUE ME HA TOCADO EN ESTA VIDA, HARÉ UNA VERÓNICA, UNA CHICUELINA YNO ENTRARÉ A MATAR DEJARÉ QUE ME EMPITONES LLENA DE ODIO, PORQUE ERES MI PASAPORTYE HACIA LA VIDA (PRIVADA, POR CIERTO, AÑOS HA QUE NO LA TENGO EN ESTE PLANO). VEN A DENUNCIAR, HAZ JUDIADAS, VEN MI NEGRO TORO DE LA VIDA, SÓLO PIDO UNA ÚLTIMA GRACIA, CUANDO YO ME DETENGA Y NO ENTRE A MATAR, Y TÚ ME DES MUERTE DE ACERO ABRIÉNDOME COMO UN CUCHILLO DE COLOR DE LUNA EL PECHO, Y CAIGA LA SANGRE Y SE PIERDA EL ENIGMA, MI ÚLTIMO DESEO, MORIBUNDA ES DOBLE. UN CAFÉ DE COLOMBIA Y UN WINSTON LIGTH BIEN ASPIRADO.
Y, QUE LA BANDA DE LA PLAZA, DONDE TOREA DESPUÉS DE MI, EL GRAN CAYETANO RIVERA, FUTURO YERNO DE BONO, DE TOLEDO, MI DESEO POSTRER, QUE LA BANDA NO TOQUE EL,PASODOBLE "MANOLETE, MANOLETE, SI NO SABES TOREAR PA QUE TE METES.
QUIERO QUE ME SAQUEN MUERTA, SIN SANGRE, PÁLIDA, PRESTA DE ALCANZAR EL

"RIGOR MORTIS", MIENTRAS EN LOS ALTAVOCES LA JURADO CANTA:"VIVA EL PASODOBLE, VIVA LO ESPAÑOL".

DESPUÉS NO HABRÁ VIDA DE SOLE QUE DESQUICIAR- MI FRIALDAD- NI INTIMIDAD DE SOLEDAD GRASA QUE VULNERAR, ME QUITAREIS EL CAPOTE Y MI CADÁVER CUBRIRÉIS CON LA TOGA QUE ME ROBÁSTEIS, TAN MOTERA, TAN NEGRA COMO EL TORO QUE ME DIÓ EL PASAPORTE A LA VIDA, ME ESPERA VIDA CONYUGAL Y MATERNAL. LA MUERTE NO ES EL FINAL. ES LA TERMINAL...DEL AEROPUERTOQUE NOS LLEVA A CASA, POR NAVIDAD, NACE DIOS EN NUESTRA ETERNA PRIVACIDAD.
EL SATÉLITE PUEDE SERVIR PARA MIL COSAS, GUÍA DE CARRETERAS, VIGILANCIA DE TRÁFICO, DE CALLES, DE CIUDADES. PERO SE QUEDA MUERTO. CUIDADO CON EL TORO DE LA VIDA. TENGAN CUIDADO AHÍ FUERA. TERMINÓ EL ÚLTIMO DÍA DE CARREAR, YO MEADA, AL REIR ME ORINÉ GRITANDO, ¡COMO EN LA COMISARÍA DE HILL STREET! PERO EL PROFESOR PUY, CUÑADO DE FRAGA, LO DIJO, SU TOGA ES ROJA, PERO NO ES UN CAPRICHO, USTEDES SALEN COMO LOS TOREROS, ENVUELTOS EN SUS ROJOS CAPOTES , EMPIEZALA FAENA.

TENGAN CUIDADO AHÍ FUERA.

TENGAN CUIDADO CON ESE NEGRO TORO DE LA VIDA.

Y ME REÍ, ME REÍ, Y ANTES DEL CONVITE DE DESPEDIDA. NUNCA YA SEREMOS ESRTUDIANTES. (OPOSITORES PUEDE,, PERO NO ESTUDIANTES)
ANTES DEL CONVITE DE DESPEDIDA, TUVE QUE IR AL APARTAMENTO, ME LAVÉ , ME ORINÉ CON LA RISA.
ME MEÉ DE RISA.

SIEMPRE QUE ME REÍ DE ALGO, LLEGÓ ASÍ, COMO EL FINAL, DEJÁNDOMEM MORIR DEMUERTE DE ACVERO, AVERADO CUCHILLO ES EL PITÓN QUE ME PARTIRÁ EL PECHO. EN MI EPITAFIO UNA PEQUEÑA FRASE.

ANDRÉS, REPASATE EL MOTOR, QUE SE TE SALE EL AGUA POR EL CARBURADOR.

SI FUESE GRANDE EL LUGAR DE PARTIDA Y LA LÁPIDA FUESE LARGA, Y MI TUMBA EN LA TIERRA, ME GUSTARÍA PONER A JUAN RAMON JIMENEZ:"PLATERO ES SUAVE.....ETCÉTERA· LA DESCRIPCIÓN QUE EL DE MOGUER HIZO DE ESE NOBLE ANIMAL EN "·PLATERO Y YO".

PORQUE PLATERO HA SIDO EL TIEMPO QUE HE DORMIDO, OLVIDANDO QUE MI INTIMIDAD, MI VIDA, EL SIMULACRO, EL SATÉLITE, EL NUEVO MUNDO, LA MALDAD DE ALICIA, LA PALOMA QUE SE EQUIVOCABA, ERA UNA LEUCEMIA DE CÉLULAS PELUDAS.

Y PLATERO ERA EL SUEÑO, EL DORMIR, EL OLVIDAR QUE EL MUNDO ME HABÍA TOMADO POR UN w.c. Y SE CAGABA CADA DIA EN MIS DERECHOS.

PLATERO ERA MUY BUENO, SUAVE, SU PELO COLOR GRIS, PLATERO ERA, COMO MIS PADRES, MUY BUENO.

VEN KOPLOWITZ ALICIA, ENCIÉRRAME EN SALUD MENTAL, EN EL ZOO, EN LA JAULA DEL PÁJARO QUE NO VUELA.

VEN, NEGRO TORO DE LA VIDA.

CADA UNO A SU CASA, A SUS ASUNTOS Y A SU VIDA. Y, SONANDO POR LOS ALTAVOCES, LA JURADO"vIVA EL PASODOBLE, VIA LO ESPAÑOL".

VEN, NEGRO TORO DE LA VIDA, TUS CUERNOS ME DEJARÁN SIN SANGRE, MALHERIDA, EL TÓRAX, LOS PULMONES....COMO JIRONES.

POR ESO EN LA ESQUELA ES MI ILUSIÓN QUE SE PONGA UNA BREVE FRASE MÍA: COMUNICA SOLE GRASA, QUE FUMAR MATA Y PERJUDICA ALOS QUE ESTÁN A TU ALREDEDOR. VIVA LO ESPAÑOL2.fDO SOLE

NO PIDO MÁS DESEOS.

TE ESPERO, VEN NEGRO TORO DE LA VIDA.

COMIENZA A LLOVER, NO DORMÍ, ESTOY CANSADA, ME HARÉ UN RICO CAFÉ FUMARÉ, QUE ES BUENO PARA LA SALUD,Y ME DUCHO. LUEGO AL CORTE INGLÉS DONDE SIEMPRE FALTA LO QUE MÁS ME GUSTA. Y, PARA JUDIADAS, LOS GRITOS DE LOS DE ELECTRÓNICA, PIDES TONNER MUY CAROS PARA EL ORDENADOR, Y TE CONTESTAN, COMO SI DIERAN LIMOSNA, CON UN GRITO DE MALEDUCADOS, IRÉ A LA OCU Y DENUNCIARÉ AL ECI Y AL DEPENDIENTE, QUE NO ES MÁS QUE UN MALCRIADO Y YO, LA MEJOR CLIENTE, PUBLICIDAD GRATUÍTA, PERO CUIDADO QUE PITA, HASTA CUANDO TE HAS CAGADO. NO HAY INTIMIDAD NI EN EL CENTRO COMERCIAL QUE BOYER UNIÓ CON GALERIAS PRECIADOS. UN ROBO ESTUPENDO.

"VIVA EL PASODOBLE. VIVA LO ESPAÑOL2. LA JURADO ES COMO CHIPIONA, UNA PIEZA IRREPETIBLE.

FIN.
NO SE PUBLICARÁ.
CON EL GENERALÍSIMO NO HABÍA TANTA CENSURA, CON SUS MINISTROS, HABÍA DE TODO, SABIOS.COMO lOPEZ RODÓ, LEALES COMO CARRERO, E HIJOS DE pUTA, CORRAMOS UNA TUPIDA CORTINA.

NO SE PUBLICA. ENTONCES, TAMBIEN ESTO ES UNA FARSA.

SOIS TODOS UNA COMPARSA, NO TIENE GRACIA.

VEN TORO NEGRO QUE HACE ALEGRE LO ESPAÑOL.
VIVA EL PASODOBLE. VIVA LA TRAMPA, PERO ES LÍCITO, ESTÁIS BUSCANDO CACA DE DINOSAURIOS, UN ATAPUERCA DE DIMENSIONES GIGANTESCAS, PARA QUE SIGA SUBIENDO EL PETROLEO.

VIVA EL PASODOBLE. ES NUESTRA CANCIÓN.
ES EL HIMNO DE ESPAÑA.
ES EL TEJER CALMADO DE LA ARAÑA.

MAÑANA SIN FALTA, TODA LA TARDE, DUERMO.

AMANECE EN GRAN CANARIA.

"TODAS LAS CANARIAS SON COMO ESE TEIDE GIGANTE, MUCHA NIEVE EN EL SEMBLANTE Y FUEGO EN EL CORAZÓN".

"HOMBRE CANARIO ES AQUÉL, EL DE LA MANO AL ARADO Y EL CORAZÓN AL COSTADO.

CANARIO, TU OBRA QUEDA EN TU TIERRA, COMPAÑERO, TE RECUERDO. CANARIAS NUNCA TE OLVIDA.

AL CAFÉ Y A FUMAR. A LA DUCHA Y A DORMIR MIENTRAS EL CORTE ME DA UN CORTE DE MANGAS UN MAL GESTO Y COBRAN CARO. Y EN LA PUERTA DICEN:"GANGAS".

GATOPARDO, NO LO PUBLICAS. SABNÍA QUE ERAS DE LA CAMADA DE LOBOS, VOCÉ ABUSOU.

RIP. MENS SANA
IN CORPORE INSEPULTO. (cHUMY cHÚMEZ)

DICEN QUE DEBO DAR MI VERDADERO NOMBRE, PUES QUE LA MUERTE ME ESPERA Y ME LIBERA, SABED.SOY.....
PAQUITA, LA DEL BARRIO.

Antoñito, mi Antoñito,
el de la fermosa cara,
el del ausente gayumbo
que de tan colmado estalla;
el que las caderas mueve
de tal guisa, que al mirallo
perdiera yo la chaveta
la rima y el marabú
de plumas de miraguano..
Antoñito, si quisiérades,
abriríasme tu estancia,
Si quisiérades, podrías
dexar la puerta entornada,
y yo pasaría dentro,

non para cosa malsana,
nin puerca, nin indecente,
que proponerlo no osara,
sino para que los dos
nos metamos en la cama.

ENTREVISTA A LIRIO ABBATE Y PETER GOMEZ

"Para la mafia, todo pasa por los puertos de España"

Los periodistas Lirio Abbate y Peter Gomez pusieron en *«Cómplices»* (editorial

Península) nombre y apellido a los políticos que colaboran con la mafia siciliana. El primer síntoma de que habían acertado llegó en forma de bomba adosada al coche de Abbate, que desde entonces vive pegado a cuatro sombras que vigilan la suya. Ambos reporteros, amigos con muy buen humor, dicen que seguirán investigando.
- ¿Cómo le cambió la vida su intento de asesinato? -
Lirio Abbate: Sigo viviendo en Palermo, pero no puedo ir solo por la calle, tengo que ir con escoltas. La Policía controla todos mis movimientos. Hace más de un año y medio que no estoy a solas...
- ¿En qué va a afectar la crisis mundial a la Cosa Nostra? -
Lirio Abbate: Creo que la mafia nunca va a entrar en crisis, porque siempre se arrima a los ganadores y se mueve hacia donde esté el capital. La crisis puede incluso favorecerles.
- Peter Gomez: La mafia tiene a su disposición un volumen de capital que puede aportar a las empresas cuando los bancos están en crisis. Son un perjuicio para la libre competencia, ya que el inversor que tiene detrás capitales mafiosos cuenta con un crédito ilimitado. Con el desarrollo de los países asiáticos se le abren a *Cosa Nostra* perspectivas infinitas.
- ¿Sigue siendo España el lugar ideal para blanquear dinero?
- Peter Gomez: La actividad tradicional de reciclado de dinero de las mafias es la construcción. Vosotros habéis tenido un enorme desarrollo en los últimos años... Lo importante para la mafia es no cometer homicidios que puedan atraer a la Policía. Creo que en España ocurre como en Italia, donde a la Policía le importa menos el uso del dinero negro si el delito lo cometen extranjeros.
- ¿Cuál es la última historia que circula sobre la mafia? -
Lirio Abbate: Hay una que desgraciadamente os afecta a los españoles. El nuevo jefe, Messina Benaro, prefiere España a Italia. Viene mucho, incluso para recibir cuidados médicos. Tuvo problemas de córnea y se operó en Barcelona. Los mafiosos en los últimos veinte años han elegido España no sólo como su refugio, sino como el lugar para invertir. Todo pasa por los puertos españoles. Puede que haya alguien en España, quizá un político, que favorezca a la mafia.
- ¿Qué políticos italianos tienen relación con la mafia? -
Peter Gomez: Muchos. La mano derecha de Berlusconi, Marcelo Dell Utri, fue condenado a 9 años por mafia y sigue en el Parlamento. En la izquierda existen episodios similares. En el Parlamento hay 18 diputados condenados por distintos delitos. Al menos 15 tienen relación con la *Cosa Nostra*.
- ¿Cómo es el nuevo «capo di capi», Messina Denaro? -
Lirio Abbate: Tiene cuarenta años y está huido desde hace quince. Ya ha sido condenado por varias masacres y es hijo de otro jefe mafioso muerto. Es un «hombre de honor» que creció con las reglas mafiosas pero que tiene la misma formación que un joven ejecutivo. Se dedica mucho a la masonería, a la financiación, a las relaciones con los políticos, pero sobre todo a la diversión. Es un chico al que le gusta salir, conducir Porches, Ferraris, lleva trajes y relojes de marca... Hace seis años tuvo un hijo con una mujer que vive en Sicilia y con la que nunca se casó.
Los investigadores dicen que nunca lo han visto. Es alguien que va más allá de Sicilia. Viene mucho a España, donde tiene grandes intereses. Le rodean muchas leyendas, que muy a menudo son verdades terribles.
- ¿Entonces es muy diferente de Provenzano, su predecesor?
Lirio Abbate: La victoria de Provenzano es que logró transmitir a los medios de comunicación que era un jefe de la mafia pobre, viejo, que vivía en un cuchitril... Sin embargo, durante 43 años vivió estupendamente en una villa del siglo XVIII protegida por altos muros a las puertas de Palermo donde crió a sus hijos. Algunos italianos se apiadaron de él al ver las fotos de su detención. Así actúa la mafia.
- ¿Cuál es la percepción del italiano medio sobre la Cosa Nostra? -

Peter Gomez: Desgraciadamente, se necesitaría un magnicidio al año para mantener alto el interés. Y eso que la mafia es mucho más peligrosa cuando no dispara porque no te das cuenta de su existencia.

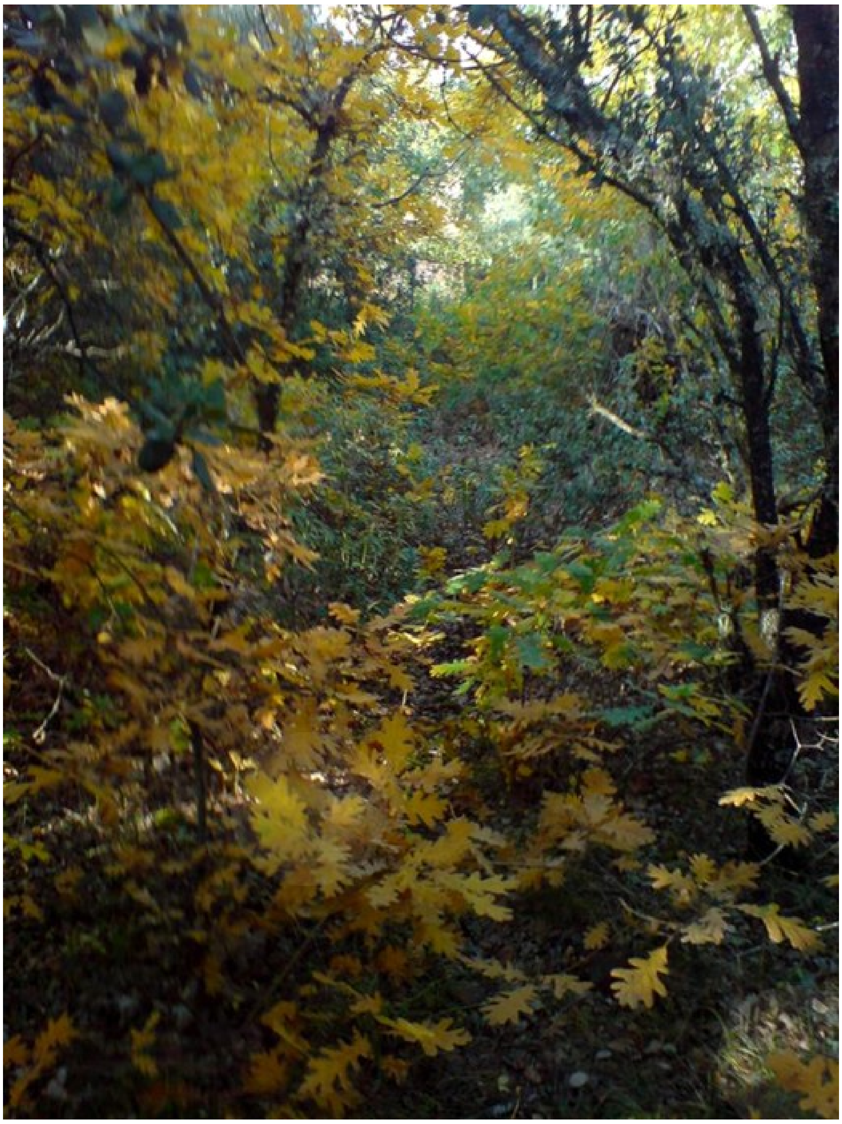
LA INFANTINA



LA INFANTINA

A cazar va el caballero,
a cazar, como solía,
los perros lleva cansados
y el halcón perdido había.
¿Dónde le cogió la noche?,
en una oscura montiña,
donde cae la nieve a copos,
y el agua menuda y fina,
donde canta la leona
y el león le respondía,
donde no hay hombre del mundo,
ni criatura nacida.
Arrimárase a un roble,
alto era a la maravilla;
el tronco tenía de oro,
las ramas de plata fina.
En el pimpollo más alto,
viera estar una infantina,
con peine de oro en sus manos
que los cabellos partía,
entre su pelo y el peine
comparaciones no había,
¡cuántas veces a los hombres
de cadena servirían!;
cabellos de su cabeza
todo aquel roble cubrían,
su nariz enafilada,
su cara rosa encendida,
los dientes de la su boca
de aljófar y perlas finas,
los ojos de la su cara
la montiña esclarecían.
-¡Oh válgame Dios del cielo!
¿qué es esto que yo veía?-
Apuntola con la lanza
por ver si era cosa viva.
-No te espantes, caballero,
ni tengas tal pavoría,
que yo persona me soy,
como tú fui yo nacida.
Siete hadas me fadaron
en haldas de mi madrina,
que anduviese siete años
en esta oscura montiña,
comiendo las hierbas verdes,
bebiendo las aguas frías.
Hoy se cumplen los siete años,
mañana el postrero día.
Por tu vida, el caballero,
llévame en tu compañía :
o llévame por mujer,

o llévame por amiga,
o llévame por esclava,
que a todo me allanaría.
-Madre vieja tengo en casa,
su consejo tomaría.
-¡Malhaya sea el caballero
que por su madre se guía!-
El consejo de la madre,
que la tome por amiga.
Cuando volvió el caballero,
no encontró roble ni niña.
Siete duques la llevaban
y un rey, que más valía:
su padre y sus siete hermanos,
que en su busquedad venían.

La escena del encuentro del caballero con la "infantina" tiene, sorprendentemente, un paralelo en la historiografía medieval. Cuando Sancho IV, en la segunda mitad del siglo XIII, patrocina una compilación histórica sobre la mayor empresa caballleresca de la Cristiandad occidental, la conquista de Tierra Santa, basada en textos franceses, esa gesta de los caballeros de Dios se había teñido de elementos míticos procedentes de la tradición folklórica pre-cristiana. La historia de "El caballero del cisne", con que se prologa la de Godofredo de Bouillon, comienza contando cómo el conde Eustacio, yendo de caza, por un monte tan temeroso que ningún otro hombre del mundo osaba entrar en él, descubre, escondida en una encina hueca, una infanta muy hermosa, grande y de buen donaire, que piensa ser el diablo o cosa que se le pareciera. Aunque el conde, lejos de dejar a la Infanta sola en el monte, la envía con un escudero a casa de su madre, las dos escenas es claro que entroncan (aunque ambas se desvíen de él) con el "modelo" de leyenda que se suele llamar "melusiniana" (por tener como manifestación más famosa "Le Livre de Mélusine" de Jean d'Arras), donde la mujer hallada en el bosque es realmente un ser sobrenatural.

El romance se documenta ya a mediados del siglo XVI, en el primer Cancionero de Romances impreso (en Amberes, c. 1248), con una estructura y una expresión poética muy similar a esta mi versión representativa de la tradición oral del siglo XX. El desenlace original sólo se conservó en las ramas sefardí y catalana del Romancero y en las más antiguas versiones conocidas de tradición portuguesa (del s. XVII y del s. XIX). En la tradición aragonesa (y en alguna versión catalana) la escena del encuentro del caballero con la dama que peina su cabellera en un árbol fantástico se ha transformado en una canción lírica de ronda:

La mañana de San Juan,
tres horas antes del día,
me salí a pasear
por una arboleda arriba;
en medio de la arboleda
un rico ciprés había,
el tronco tiene de oro,
las ramas de plata fina.
En el pimpollo más alto,
vide sentada una niña;
mata de cabello tiene
que todo el ciprés cubría.
Estándoselo peinando,

la niña quedó dormida.
La despertó un ruiseñor
con el canto que traía:
-Despiértate, dama hermosa,
despierta, rosa florida;
una dama como vos
no es razón esté dormida.
Con esto, quédate, adiós,
claro lucero del día,
con esto, quédate, adiós,
que ésta va por despedida.

En Burgos, el tema concluye con el rechazo de la petición de la infantina (como sustitución de la ida a consultar a la madre). Pero lo más común en la tradición del siglo XX es incorporar la escena del encuentro con la infantina encaramada en su árbol al tema de "El caballero burlado", a partir del motivo en este segundo romance de la cortés pregunta del caballero respecto a si prefiere las ancas o la silla. El romance, así estructurado, se extendió por toda la tradición en lengua portuguesa, incluidas las islas atlánticas y Brasil, así como por el Norte y Occidente de España (Galicia, Asturias, Santander, León, Zamora y Extremadura) y por Canarias y Venezuela. El éxito de la fusión se manifiesta además en esporádicos intentos de continuar el romance de "La Infantina" propio de la tradición aragonesa (la ronda arriba citada) o el propio de las comunidades judeo-españolas de Marruecos con los episodios de "El caballero burlado". Dado que los dos romances así combinados desarrollaban la temática de la ocasión perdida, el resultado es una narración coherente (no así cuando adicionalmente se altera el desenlace incorporando la anagnórisis del romance de "La hermana cautiva").

Es curioso observar cómo esta fusión de "La Infantina" y de "El caballero burlado" había sido preludiada por repetidos intercambios de motivos narrativos y de fórmulas discursivas entre uno y otro romance: En la versión juglaresca de "El caballero burlado" arreglada por Rodrigo de Reinosa, que se publicó en un pliego suelto del siglo XVI, se incluye el motivo narrativo de carácter formulaico de la autosentencia por desesperación:

Cavallero que tal pierde
grande pena merecía,
el mesmo se es el alcalde,
el mesmo se es justicia:
que le corten pies y manos
e le cuelguen de una enzina,

que era propio de "La Infantina", pues se halla en la versión del *Cancionero de romances de Amberes,* 1550, en la judeo-portuguesa de 1683 y en la tradición sefardí de Marruecos del siglo XX. De otra parte, en la tradición catalana de los siglos XIX y XX de El Rosellón y de Ibiza y Formentera de este mismo romance de "El caballero burlado", cuyas versiones, muy conservadoras, comienzan, de conformidad con las versiones antiguas,

Dins França partí la infanta,
ben calçada i ben vestida,
i se n'anava a París
que pare i mare tenia,

la doncella espera compañía para su viaje en un árbol ("un romaní"), que

té la soqueta daurada,
  la ramareta d'or fi
i amb la seua cabeiera
  cobria lo romaní,

motivo, que resulta extraño en este contexto, y que es claramente procedente de "La Infantina". A su vez, en una versión judeo- portuguesa de 1683 de "La Infantina", se incluyen los versos, esenciales en la trama de "El caballero burlado":

Tate, tate. cavalhero,
  no fagáis tal vilania,
que soy hija del rey de Francia,
  de la reina Constantina,

como introducción a la revelación del hado. La convivencia de unos romances con otros en la memoria de los habituales usuarios de ese saber poético tradicional ha sido, lo mismo en tiempos lejanos que lo es en los cercanos, fuente de innovaciones textuales más o menos acertadas.

Autor: Diego Catalán, publicado en el Romancero de laa Cuesta del Zarzal

¡QUÉ BELLO ES VIVIR!

PRISA cae a mínimos históricos en bolsa, presa de una deuda asfixiante y su crisis de liderazgo

Horas bajas para Prisa. Camina en el alambre de las finanzas. El lunes perdió por primera vez el nivel de los 1.000 millones de euros de valor en bolsa, el martes un 11,4% y hoy miércoles se ha derrumbado otro 15%, hasta 3,21 euros, nuevo mínimo histórico, perforando el suelo marcado en marzo de 2003. El grupo de comunicación que preside **Ignacio Polanco** y dirige **Juan Luis Cebrián** acumula una deuda financiera neta (lo que debe, menos la caja y las inversiones a corto plazo) es de 4.200 millones de euros, según el consenso de estimaciones de *Facset* para 2008.

Una cifra asumible en el pasado, pero insostenible en el corto plazo. Su ratio de endeudamiento superó ayer en 5 veces su capital en bolsa, que le coloca en unos niveles que sólo superan los especialistas, entre otros, como la plusmarquista española Colonial (28 veces), las constructoras Ferrovial (7,5 veces) o Sacyr (5,5 veces). La compañía de comunicación logró refinanciar la mitad de su deuda en julio hasta marzo de 2009, pero los costes financieros se están elevando más de lo previsto debido a la escalada de los tipos interbancarios, que han pasado -plazo a tres meses- del 4,5% al 5,4% en el transcurso del último año.

Así, el mercado está castigando sin piedad su cotización. Desde enero cae un 70% en bolsa, afectada por el ciclo de recesión publicitaria en sus medios tradicionales (SER, El País), que no logra ser neutralizada por el crecimiento de su filial de Internet, Prisacom. La incorporación de la televisión comercial en abierto Cuatro, tras absorber Sogecable, tampoco ha dotado del impulso esperado a las cuentas del grupo por el *crash* publicitario en TV.

La líder del sector, Telecinco, cae un 60% en bolsa desde enero, pero con una deuda ridícula de sólo 6 millones de euros. Otros grupos cotizados como Vocento y Antena 3 también se desploman en bolsa en 2008, pero con niveles de deuda muy reducidos: de 65 millones para el editor de ABC o de 140 millones para la televisión de Planeta. Al propietario de *Cuatro, El País, Cadena Ser, Cinco Días o Digital* + le están penalizando no sólo por su altísima deuda (4.200 millones), sino por la tardanza en deshacerse de este último negocio, la plataforma de TV por satélite, y de su negocio de radio para el que mantienen planes de venta desde 2007.

LA ESTAFA DE LOS CONTADORES DE LA LUZ, PASO A PASO: EJECUCIÓN/ GOBIERNO PSOE (1)

10.- LA ESTAFA, PASO A PASO: EJECUCIÓN/ GOBIERNO PSOE (I)

Antes de demostrarle documentalmente que el PSOE y el PP son simples marionetas de UNESA, es conveniente que le recuerde lo expuesto en las cuatro entregas anteriores:

Resumen del capítulo 6:
La estafa genera actualmente más de 350.000 euros diarios, afecta a 23 millones de clientes, y lleva reportados más de 3.750 millones de euros, cobrados ilegalmente por el alquiler de los contadores de la luz.

Las compañías eléctricas y UCD planificaron en 1981 un fraude consistente en modificar la póliza de abono y sustituir 63 amperios por 50 amperios como valor de la intensidad máxima (Imáx) de los contadores, cuyo precio de alquiler es fijado por el Ministerio de Industria. La finalidad de esta sustitución es dejar que sean las compañías eléctricas las que fijen el precio de alquiler de los millones de contadores de Imáx= 60 amperios ya instalados, y de los que se instalen tras la entrada en vigor de la nueva póliza de abono.

El mismo día de entrada en vigor de la nueva póliza de abono, las compañías eléctricas subieron de forma salvaje el precio de alquiler de los contadores domésticos, la mayoría

de los cuales son de Imáx= 60 amperios. En el caso de Sevillana de Electricidad (la actual Sevillana-Endesa), el precio de alquiler del contador doméstico de Imáx= 60 amperios pasó de 3.70 a 81.70 pesetas/mes, lo que supone una subida del 2.211,16%.

El fraude es descubierto, primero, por un cliente de Iberduero (Iberdrola, tras su fusión con Hidroeléctrica Española), y, después, por dos diputados socialistas del Parlamento de Andalucía, quienes, además del fraude en los precios de alquiler de los contadores, comprueban que Sevillana de Electricidad comete otras 28 irregularidades con sus clientes.

Para evitar el consiguiente escándalo político, el Ministerio de Industria obligó a las compañías eléctricas a devolver las cantidades cobradas indebidamente. En el caso de Iberduero, la cantidad devuelta ronda los 1.500 millones de pesetas.

En el caso de Sevillana de Electricidad, aunque la cantidad total cobrada indebidamente asciende a 20.000 millones de pesetas, según el informe presentado ante el Parlamento de Andalucía por los dos diputados socialistas, una serie de maniobras del PSOE reduce esta cantidad a 706.4 millones, de los cuales, según mis datos, Sevillana sólo devuelve 400 millones.

El PSOE presiona a los dos diputados hasta hacerles abandonar el partido.
Con la reducción de 20.000 millones a 706.4 millones de pesetas y la represalia contra los dos diputados, que dieron prioridad a los legítimos intereses de los andaluces que a los turbios intereses de Sevillana de Electricidad, el PSOE ha lanzado a las compañías eléctricas un mensaje de colaboración que es perfectamente comprendido por éstas.

Si desea más información sobre este punto, pulse **aquí**.

Resumen del capítulo 7:
Tras el fracaso del fraude planificado en 1981 por UCD y las compañías eléctricas, éstas y el PSOE planifican una estafa que hace (casi) imposible que sea descubierta (y, menos, probada) por alguien ajeno a los implicados.
Si desea más información sobre este punto, pulse **aquí**.

Resumen del capítulo 8:
Los fabricantes ejecutan las dos funciones que tienen asignadas en la estafa:
- Facilitar precios medios de mercado falsos al Ministerio de Industria, con objeto de que los precios de alquiler publicados en el Boletín Oficial del Estado sean muy superiores a los precios máximos legalmente autorizados.
- Imponer restricciones a la libre competencia entre almacenistas-distribuidores, con el fin de que los precios de venta sean lo suficientemente elevados como para hacer antieconómica la compra del contador, y obligar al usuario a alquilarlo a las compañías eléctricas.

Si desea más información sobre este punto, pulse **aquí**.

Resumen del capítulo 9:
Los fabricantes se autoasignan una tercera función, de la cual las compañías eléctricas no tendrán conocimiento hasta el 21.11.1995, en que el diario El País informa sobre el grupo clandestino Contact. La tercera función es:

- Repartirse consensuadamente el mercado español y, en consecuencia, aplicar el incremento artificial de precios, no sólo a los contadores vendidos a los almacenistas-distribuidores, sino también a los que venden a las compañías eléctricas.

Al verse descubiertos, los fabricantes se reúnen el 23.11.1995 con las compañías eléctricas y redactan un escrito en el que los fabricantes reconocen que facilitaron datos falsos al Ministerio de Industria, con objeto de que los precios de alquiler fueran superiores a los precios máximos legalmente autorizados, y las compañías eléctricas reconocen que eran conscientes de dicha falsedad.
Si desea más información sobre este punto, pulse **aquí**.

Y ahora paso a demostrarle documentalmente que el Gobierno cumplió correctamente las funciones que tenía asignadas en la estafa planificada a finales de 1983 por las compañías eléctricas y el PSOE.

10.1.- Cumplimiento de la primera función.
La primera función que el Gobierno tenía asignada en la estafa era:

- Aprobar una nueva póliza de abono, en la que las condiciones relativas al alquiler de los contadores fueran idénticas a las establecidas en la póliza de abono aprobada el 12.03.1954, con objeto de anular la sustitución de Imáx= 63 amperios por Imáx= 50 amperios, establecida en la condición general 12 de la póliza de abono aprobada el 20.08.1981, que fue en la que se basó el fraude planificado por las compañías eléctricas y UCD.

El Gobierno cumplió correctamente esta función ya que, el 18.07.1984, mediante el Real Decreto 1725/1984, aprobó una nueva póliza de abono, cuya condición 16 es una copia literal de la condición 16 de la póliza de abono aprobada el 12.03.54, que fue la sustituida fraudulentamente por la condición 12 de la póliza de abono aprobada el 20.08.1981.

10.2.- Cumplimiento de la segunda función.
La segunda función que el Gobierno tenía asignada en la estafa era:
- Dar por buenos los precios medios de mercado falsos remitidos por los fabricantes a la Dirección General de la Energía, con objeto de que la estafa se cometiera a través del Boletín Oficial del Estado.

El Gobierno cumplió correctamente esta función, ya que, como demuestran los dos documentos que le facilitaré a continuación, dio por buenos los precios falsos facilitados en octubre de 1984 por los fabricantes a la DG de la Energía, sin efectuar ninguna comprobación, a pesar de ser todos ellos coincidentes para cada tipo de contador y existir, por tanto, indicios evidentes de que habían sido consensuados.

10.2.1- Primer documento.
El primer documento que prueba que el Gobierno cumplió la segunda función que tenía asignada en la estafa es el " Informe de 18.12.1984 sobre propuesta de orden ministerial por la que se revisan los alquileres de los equipos de medida de energía eléctrica".

Ministerio de Industria y Energía

Dirección General de la Energía

Fecha 18 DIC. 1984

Referencia SGE/ETE/rc/pb 25.216

INFORME al Ilmo. Sr. Subsecretario sobre propuesta de Orden Ministerial por la que se revisan los alquileres de los equipos de medida de energía eléctrica.

Ilmo. Sr.:

Según lo dispuesto en la condición 16ª de la vigente póliza de abono, aprobada por Real Decreto 1725/1984 de 18 de julio, las empresas eléctricas están obligadas a suministrar en alquiler ciertos equipos de medida al abonado que lo solicite. Para estos aparatos el Ministerio de Industria y Energía fijará las cantidades concretas máximas que se pueden aplicar por su alquiler, en base al 1,25 por 100 mensual del precio medio del mercado del aparato.

Los precios de los alquileres de los equipos de medida no se revisan desde la Orden ministerial de 11-6-1957; debido a la inflación de estos 27 años transcurridos, existe una distorsión notable entre el precio que deben cubrir los alquileres y el precio a aplicar por lo que se deben revisar. Se han solicitado listas de precios y descuentos en su venta a mayoristas, a los fabricantes de estos equipos a tal fin.

Los descuentos que los fabricantes, comunican que hacen a los mayoristas para contadores, oscilan alrededor del 17%. Por otros conductos se han recogido informaciones de que los descuentos habituales son del orden del 10% y en casos excepcionales, estos descuentos pueden alcanzar cifras superiores por otros conceptos, sin superar, en ningún caso, el valor del 30%. Por ello se ha considerado como "precio medio del mercado del aparato" el de tarifa con un descuento del 20% para los contadores. Para el resto de los equipos los datos sobre descuentos son coincidentes, un 15% para los relojes de cambio de tarifa y un 50% para contactores e interruptores de control de potencia.

En la Orden ministerial de 14-10-1983 en su punto 2.1.2, la obligación de alquilar los equipos, por parte de las empresas, se amplió a los de

doble discriminación horaria para su aplicación a la tarifa 2.0 y posteriormente por las Ordenes ministeriales de 1 de agosto y 20 de noviembre de 1984 se -- amplió a los equipos de los suministros a Ayuntamientos.

El estudio económico adjunto está basado en la aplicación del 1,25 % - mensual, establecido en el Real Decreto de 18 de julio de 1984, aplicado sobre el precio a mayoristas con lo cual las empresas deben cubrir el coste del equipo y los gastos de mantenimiento y reposición del mismo.

Para los contadores ya instalados actualmente, por criterios de uniformidad tarifaria, se mantiene el mismo alquiler ya que el precio actual de los - equipos nuevos viene a ser coincidente con el precio de adquisición del equipo actualizado al momento presente, mediante el índice de inflación. A más abundamiento, este precio será el de reposición del equipo si sufre avería o se -- cambian las características del suministro.

No obstante, para que el ajuste de las tarifas de alquiler actuales a- las nuevas no sea tan brusca se ha establecido un periodo transitorio durante el cual los antiguos abonados tendrán una reducción sobre los precios de alquiler - que será más significativa para los abonados más modestos.

En la tabla siguiente se adjuntan las bases de cálculo.

Se ha solicitado informe sobre la propuesta a la Secretaría General Técnica del Departamento, al Ministerio de Sanidad y Consumo y al Instituto Nacional del Consumo.

1.- Secretaría General Técnica

En el texto que se remite se ha atendido íntegramente la observación 3ª del informe de la Secretaría General Técnica, sustituyendo la eventual revisión automática del alquiler hecha por las empresas, por una revisión simultánea con la de las tarifas.

En relación con la observación 2ª, se debe manifestar que ya se -- había tenido en cuenta la magnitud relativa del aumento que se propone. Sin -- embargo, no parece necesario escalonarlo en un periodo de tiempo tan dilatado -- como cuatro años, con todos los inconvenientes que tienen las situaciones provisionales, ya que el aumento en valor absoluto es pequeño y perfectamente soportable por cualquier economía particular, habiéndose previsto también un escalonamiento más gradual para los abonados modestos acogidos a la tarifa 1.0 y 2.0.

2.- Ministerio de Sanidad y Consumo

Tras un primer contacto informal, en el cual se recogieron diversas sugerencias de este Departamento, se solicitó informe sobre la propuesta del --

cual se han remitido tres copias, una procedente de la Subdirección General de Inspección de Productos Industriales y Servicios, otra de la Dirección General y una tercera de la Secretaría General para el Consumo, todas iguales.

Como anexo, se incluye el análisis y razonamiento detallado de la propuesta presentada rebatiendo los argumentos del citado informe no atendidos.

3.- Instituto Nacional de Consumo

La solicitud del Instituto únicamente hace referencia al efecto de la revisión de alquileres sobre el abonado final por lo cual propone que se aplique el 1% en vez del 1,25% como alquiler y un periodo transitorio de adaptación al nuevo alquiler.

Ambas sugerencias se cumplen con la propuesta pues se establece un periodo transitorio de adaptación a los nuevos alquileres y el valor de estos alquileres es, en principio, inferior a este 1% solicitado con un valor más bajo para los abonados más modestos.

Por todo lo anterior se supone suficientemente justificada la presente propuesta y se propone su aprobación, si V.I. lo considera oportuno.

Madrid,

EL SUBDIRECTOR GENERAL DE ENERGIA ELECTRICA,

Vº Bº:
LA DIRECTORA GENERAL,

Carmen Mestre Vergara

Fernando Díaz Caneja

El documento está firmado por el subdirector general de Energía Eléctrica, Fernando Díaz Caneja, y la directora general de la Energía, Carmen Mestre Vergara, quien el 03.01.1984, al recibir, de los diputados socialistas Juan Carmona Infantes y Jesús Lechuga Gallego, los documentos que probaban que Sevillana de Electricidad estaba cometiendo 29 irregularidades, antepuso los turbios intereses del PSOE a su obligación de defender los legítimos intereses de los clientes de dicha compañía y, como consta en el reportaje de Interviú "Sevillana de Electricidad ha cobrado 20.000 millones de más a los andaluces", se negó a intervenir alegando que "esto es una cuestión de Estado y no conviene moverla ahora", y recomendó a los dos diputados que se pusieran en contacto con Manuel Cortázar y Landecho, presidente de Sevillana de Electricidad, del cual les facilitó el teléfono particular, recomendación que los dos parlamentarios rechazaron (si desea más información sobre este asunto, pulse **aquí**).

El *"Informe de 18.12.1984"* de la DG de la Energía es un documento excepcional por los siguientes motivos:

1.- El documento está emitido por el Ministerio de Industria, que es, según la condición 16 de la póliza de abono aprobada mediante el Real Decreto 1725/1984, el responsable

oficial de la fijación de los precios máximos de alquiler de los contadores de la luz.

2.- En este documento se afirma que el motivo por el cual la DG de la Energía solicitó el 20.12.1983 a los fabricantes las listas de precios y los descuentos medios a mayoristas era para revisar los precios de alquiler debido a la *"distorsión notable entre el precio* [de las prestaciones] *que deben cubrir los alquileres y el precio* [de alquiler] *a aplicar".*

De la afirmación de que *la finalidad del precio de alquiler de un contador es cubrir ciertas prestaciones* se deduce que el precio medio de mercado, al que se refiere la condición 16 de la póliza de abono aprobada el 18.07.1984, es el precio medio al que adquieren el contador quienes están obligados a dar dichas prestaciones a cambio del precio de alquiler. Por tanto, los mayoristas a los que se refiere la DG de la Energía en este escrito de 20.12.1983 son las compañías eléctricas, que son los únicos mayoristas que compran los contadores para alquilarlos, ya que los otros mayoristas, los almacenistas-distribuidores, los compran para venderlos.

3.- El documento prueba, de forma irrefutable, que la DG de la Energía se limitó a dar por buenos los precios indicados en las listas remitidas en octubre de 1984 a dicha DG por Landis & Gyr Española, Siemens, Compañía de Contadores, Metrega y RIESA, ya que los precios indicados en la segunda columna del estudio económico, adjunto al documento, son los precios indicados en sus listas.

La DG de la Energía dio por buenos los precios de estas listas sin realizar ninguna gestión para comprobar su veracidad, a pesar de la total coincidencia de precios, que, evidentemente, no habría sido posible sin un consenso previo entre los cinco fabricantes.

4.- En el documento se afirma que, en lo que respecta a los descuentos medios aplicados por los fabricantes a los mayoristas, "*por otros conductos se han recogido informaciones de que los descuentos habituales son del orden del 10% y en casos excepcionales estos descuentos pueden alcanzar cifras superiores por otros conceptos, sin superar, en ningún caso, el valor del 30%".*

Esta afirmación es falsa por, entre otros, los siguientes motivos:

4.1.- El descuento aplicado por los fabricantes a los almacenistas-distibuidores es superior al 50%, como prueban el contrato de 25.09.1997 entre Siemens y el almacenista-distribuidor M.E.M. Roche y la factura adjunta al escrito de 09.10.2000 de Schlumberger a la Comisión Nacional de Energía.

4.2.- El descuento medio aplicado por los fabricantes a las compañías eléctricas es próximo o superior al 60%, como prueba la factura adjunta al citado escrito de 09.10.2000 de Sclumberger.

4.3,- Aparte de los escritos remitidos en octubre de 1984 a la DG de la Energía por Landis & Gyr Española, Siemens, Compañía de Contadores, Metrega y RIESA, en el expediente oficial de la Orden de 12.12.1984 del Ministerio de Industria, *"por la que se actualizan los alquileres de los equipos de medida de energía eléctrica",* los únicos documentos que contienen datos sobre precios de lista y descuentos son un escrito de FECSA y otro de Estabanell y Pahisa, pequeña compañía eléctrica que en 1984 suministraba energía a unos 40.000 clientes repartidos por tres comarcas catalanas. Por tanto, los documentos en los cuales se basó la DG de la Energía para afirmar que "*los descuentos habituales* (a mayoristas) *son del orden del 10% y en casos excepcionales*

estos descuentos pueden alcanzar cifras superiores por otros conceptos, sin superar, en ningún caso, el valor del 30%" son, obligatoriamente, los citados escritos de FECSA y Estabanell y Pahisa, los cuales analizo a continuación:

- Escrito de 04.10.1984 de FECSA al Ministerio de Industria.

DOC. Nº 27. 147

Fuerzas Eléctricas de Cataluña, S.A.

Particular

Barcelona, 4 de octubre de 1.984

Sr. Don Ramón CALVO
MINISTERIO DE INDUSTRIA Y ENERGIA
Pº de la Castellana, 160
MADRID (28046)

Mi querido amigo:

Adjunto tengo el placer de remitirte listas de precios de contadores, vigentes a partir del mes de septiembre de 1984, facilitadas por SIEMENS y por CIA. DE CONTADORES.

Te ruego tengas en cuenta esta información de cara a la elaboración de la Orden Ministerial que regulará el alquiler de los equipos de medida.

Un fuerte abrazo de tu buen amigo,

Vicente Martín Valero

En él, Vicente Martín Valero, subdirector general de FECSA, le ruega a su querido amigo Ramón Calvo, de la Subdirección General de Energía, que *"tengas en cuenta las adjuntas listas de precios de contadores de Siemens y Compañía de Contadores de cara a la elaboración de la Orden Ministerial que regulará el alquiler de los equipos de medida"*. Dado que no contiene ningún dato relativo al descuento medio aplicado a FECSA por estos dos fabricantes, este escrito no es, evidentemente, uno de los documentos en los que la DG la Energía se basó para afirmar que *"los descuentos habituales* (a mayoristas) *son del orden del 10% y en casos excepcionales, estos descuentos pueden alcanzar cifras superiores por otros conceptos, sin superar, en ningún caso, el valor del 30%".*

M A D R I D

Mi querido amigo:

En la conversación que tuvimos, anteayer, comentamos lo que se refiere a los precios de alquiler de contadores, relacionados con los precios de compra.

Te acompaño fotocopia de dos facturas de "Compañía de Contadores" en la que podrás comprobar que el descuento que se nos aplica es del 18%.

Lo malo, es que en el correo de hoy nos llegan listas de la nuevas tarifas establecidas por los fabricantes de contadores y que suponen un nuevo aumento en el precio de compra, aumento que se aproxima al 10%.

Confiamos que en breve sacareis la O.M. en relación a este asunto del precio de alquiler de contadores.

Pláceme agradecerte la atención que tuviste al recibirme y te envío un saludo muy cordial,

Fdo: F. Estabanell Demestre.

En él, F. Estabanell Demestre le dice a su querido amigo Fernando Díaz Caneja, subdirector general de Energía Eléctrica, que *"en la conversación que tuvimos anteayer comentamos lo que se refiere a los precios de alquiler de los contadores, relacionados con los precios de compra.Te acompaño fotocopia de dos facturas de Compañía de Contadores en la que podrás comprobar que el descuento que se nos aplica es del 18%. (...) Confiamos que en breve sacareis la Orden Ministerial en relación a este asunto del precio de alquiler de contadores".*
Las dos facturas adjuntas al escrito corresponden al suministro de 25 + 15= 40 contadores trifásicos.

Así pues, aparte de en los escritos remitidos en octubre de 1984 por Landis & Gyr Española, Siemens, Compañía de Contadores, Metrega y RIESA, el único documento en el que se basó la DG de la Energía para afirmar que *"los descuentos habituales* (a mayoristas) *son del orden del 10% y en casos excepcionales, estos descuentos pueden alcanzar cifras superiores por otros conceptos, sin superar, en ningún caso, el valor del 30%"* fue un escrito de una pequeña compañía eléctrica que adjunta dos facturas de la Compañía de Contadores, en las que consta un descuento del 18% por el suministro de 40 contadores trifásicos.

La DG de la Energía miente, por tanto, cuando afirma que *"los descuentos habituales* (a mayoristas) *son del orden del 10% y en casos excepcionales, estos descuentos pueden alcanzar cifras superiores por otros conceptos, sin superar, en ningún caso, el valor del 30%".*

Por otra parte, resulta sorprendente que teniendo en 1984 las grandes compañías eléctricas 13 millones de clientes y un consumo de 400.000 contadores, el único documento utilizado por la DG de la Energía para comprobar la veracidad de los datos facilitados por los fabricantes sean dos facturas por el suministro de 40 contadores a una pequeña compañía eléctrica con 40.000 clientes.

5.- En el documento se afirma que *"el estudio económico adjunto está basado en la aplicación del 1.25% mensual, establecido en el Real Decreto de 18 de julio de 1984, aplicado sobre el precio a mayoristas, con lo cual las empresas deben cubrir el coste del equipo y los gastos de reposición y mantenimiento del mismo".* Esta afirmación de la DG de la Energía (es decir, del Ministerio de Industria) es decisiva para probar tanto la estafa en los precios de alquiler de los contadores como el cobro por un servicio no prestado. Y ello, porque con esta afirmación la DG de la Energía reconoce que:

- la norma que establece el método de cálculo del precio (máximo) de alquiler de un contador es el Real Decreto de 18 de julio de 1984 (es decir, la condición general 16 de la póliza de abono aprobada por el Real Decreto 1725/1984, de 18 de julio);

- el precio (máximo) de alquiler se calcula aplicando el 1.25% mensual al precio medio de mercado al que los fabricantes venden el contador a los mayoristas, que con este precio de alquiler *"deben cubrir el coste del equipo y los gastos de reposición y mantenimiento del mismo"*, es decir, que hablan de las compañías eléctricas, que son los únicos mayoristas que compran los contadores para alquilarlos;

- con el precio de alquiler, *"las empresas* (alquiladoras) *deben cubrir el coste del contador y los gastos de mantenimiento y reposición del mismo"*. O dicho de otro modo, a cambio del cobro del precio de alquiler, las compañías eléctricas están obligadas a dar un servicio: mantener y reponer el contador.

Por mantener y reponer el parque nacional de contadores en alquiler, formado actualmente por 23 millones de unidades, las compañías eléctricas llevan cobrados más de 7.500 millones de euros desde 1984 (la cantidad se incrementa diariamente en 600.000 euros), pero no han prestado en ningún momento dicho servicio, porque, a pesar de las reiteradas advertencias del Centro Español de Metrología (la primera, de 1986), de la Comisión Nacional de Energía, de los propios fabricantes e incluso de la abogacía del Estado, el Gobierno aún no ha publicado la normativa oficial que defina cómo hay que mantener un contador y cuál es su vida útil máxima (si desea más información sobre este asunto, pulse **aquí**).

INFORME DE 25.10.07 DE LA COMISIÓN NACIONAL DE ENERGÍA SOBRE EL MANDATO ESTABLECIDO EN EL REAL DECRETO 1634/2006 RELATIVO AL PLAN DE SUSTITUCIÓN DE EQUIPOS DE MEDIDA

La falta de dicha normativa, 24 años después de ser aprobada una subida de entre el 2.081,10 y el 3.123,30% con la única y exclusiva finalidad de permitir a las compañías eléctricas *"cubrir los gastos de mantenimiento y reposición"* de sus parques de contadores en alquiler, pone blanco sobre negro el servilismo del Gobierno hacia estas compañías, el cual, como es lógico, tiene un precio, ya que incluso el más servil de los lacayos cobra algo por su servidumbre. Así pues, es lógico hacer la siguiente pregunta:

¿Cuánto cobran el PSOE y el PP por no publicar la normativa oficial, cuya falta permite a las compañías eléctricas no dar un servicio por el que llevan

cobrados una cantidad que supera los 7.500 millones de euros, y se incrementa en 600.000 euros cada día que pasa sin que el Gobierno la publique?

10.2.2- Segundo documento.
El segundo documento que prueba que el Gobierno cumplió la segunda función que tenía asignada en la estafa (dar por buenos los precios medios de mercado falsos, remitidos por los fabricantes a la Dirección General de la Energía, con objeto de que la estafa se cometiera a través del Boletín Oficial del Estado) es la Orden de 20.12.1984 del Ministerio de Industria, ya que los precios de alquiler indicados en la segunda columna del Anexo de esta Orden son los indicados en la cuarta columna del estudio económico adjunto al *"Informe de 18.12.1984 de la DG de la Energía",* los cuales, como probé en el punto anterior, fueron calculados por dicha DG sin efectuar ninguna comprobación previa, ni de los precios de lista -a pesar de ser éstos coincidentes en los cinco fabricantes-, ni de los descuentos, muy inferiores a los reales, como reconocen por escrito los propios fabricantes.

La Orden de 20.12.1984 está firmada por el entonces ministro de Industria y después ministro de Hacienda Carlos Solchaga Catalán, quien el 03.06.1999 creó el lobby Solchaga & Recio y asociados, cuyos otros dos accionistas son José Aureliano Recio **(1)** y la esposa de éste, Belén Martínez Fresneda. Uno de los clientes para los que habitualmente trabaja este lobby es Endesa, máxima beneficiaria de la estafa iniciada con la entrada en vigor de la citada Orden (dado que, como demuestran el cálculo detallado en la página siguiente y los que incluiré en las dos próximas entregas, la cantidad estafada es, al menos, la mitad de la cantidad cobrada ilegalmente por el alquiler de los contadores, la cantidad estafada por Endesa supera actualmente los 1.500 millones de euros).

> **(1)** José Aureliano Recio fue, entre otros cargos, consejero de Economía y Fomento de la Junta de Andalucía, director general adjunto a la presidencia del Banco de Vizcaya (máximo accionista de Sevillana de Electricidad, actual Sevillana_Endesa) y consejero de Sevillana de Electricidad. Siendo consejero del Banco Bilbao Vizcaya fue llamado a declarar por el juez instructor del caso Filesa (empresa fantasma de la red de financiación ilegal del PSOE) por haber comprado a Filesa supuestos informes para el Banco de Vizcaya por 196 millones de pesetas. José Aureliano Recio declaró que la orden de compra de estos informes provino del presidente del Banco, Pedro Toledo, fallecido tiempo atrás, y, finalmente, no resultó imputado. Es hermano de Pablo Recio, quien, siendo Consejero de Salud y Consumo de la Junta de Andalucía, impuso a Sevillana de Electricidad una sanción de 12 millones de pesetas tras concluir su investigación sobre las 29 irregularidades denunciadas por los diputados Juan Carmona Infantes y Jesús Lechuga Gallego, valoradas por éstos en 20.000 millones de pesetas (si desea más información sobre este asunto, pulse **aquí**).

Para calcular el perjuicio ocasionado por el Gobierno a los clientes de las compañías eléctricas, al dar por buenos los precios medios de mercado falsos remitidos por los fabricantes a la DG de la Energía, basta con aplicar a los precios de lista, remitidos en octubre de 1984 por los fabricantes a la DG de la Energía, el descuento medio real aplicado por éstos a las citadas compañías.

Según demuestran numerosos documentos, obrantes en las diligencias previas 280/2000 del Juzgado Central de Instrucción 4 (Audiencia Nacional), entre ellos, la factura adjunta al escrito de 09.10.2000 de Schlumberger a la Comisión Nacional de

Energía, el descuento medio real varía entre el 59.4 y el 64.2%.

Tomando como datos de cálculo el precio de lista del contador monofásico de simple tarifa (que es el utilizado en la práctica totalidad de las viviendas y supone el 86,1% del parque nacional en alquiler), y un descuento medio de sólo el 60%, el perjuicio económico ocasionado a cada abonado que tuviera el contador en alquiler durante el período de vigencia de la Orden de 20.12.1984 fue el siguiente:

> **Precio de lista= 7.660 pesetas**
> **Descuento medio= 60%**
> **Precio máximo de alquiler= 1.25% x 7.660 x (1 - 0.60)= 38.3 pesetas/mes**

Dado que el precio de alquiler, que figura en la segunda columna del Anexo de la Orden de 20.12.1984 del Ministerio de Industria, es 77 pesetas/mes, la cantidad estafada **(2)** por las compañías eléctricas a los abonados que tuvieron el contador en alquiler durante el tiempo de vigencia de dicha Orden fue
77 - 38.3= 38.7 pesetas/mes

> **(2)** Los fabricantes de contadores, las compañías eléctricas y el Gobierno cometieron (y continúan cometiendo, como le demostraré en las dos próximas entregas) el delito de estafa (art. 248.1 del Código Penal) ya que, con ánimo de lucro, utilizaron engaño bastante (publicaron en el Boletín Oficial del Estado unos precios de alquiler muy superiores a los máximos legalmente autorizados) para producir error en otro (el abonado que tenía alquilado el contador), induciéndolo a realizar un acto de disposición (el pago del precio de alquiler publicado en el BOE) en perjuicio propio.

Es decir, considerando un descuento medio del 60% (el descuento medio real varía entre el 59.4 y el 64.2%), la cantidad estafada mensualmente a cada abonado (38.7 pesetas) durante el tiempo de vigencia de la Orden de 20.12.1984 fue más del 50% del precio de alquiler indicado en el Anexo de dicha Orden (77 pesetas), lo cual confirma la validez de lo afirmado por Gustavo Eisenberg en el documento confidencial adjunto a su escrito de 27.11.95 a Siemens:

> ***"En 1.984 se dictó una disposición por el MINER*** [Ministerio de Industria y Energía] ***autorizando el cobro mensual al consumidor del 1.25% del precio del contador.***
> ***Este factor se aplica sobre los precios de lista, cuando debería hacerse sobre los reales, los cuales son inferiores en un 50% o más.***
> ***Si este asunto saliera a la luz pública, podría producirse un escándalo de imprevisibles consecuencias para todos.***
> ***El Sr. Rivero [Pedro Rivero Torre, actual presidente de UNESA, patronal de las grandes compañías eléctricas] conoce bien este problema".***

Como sucede con el documento analizado en el punto 10.2.1 (*"Informe de 18.12.1984 de la DG de la Energía sobre propuesta de orden ministerial por la que se revisan los alquileres de los equipos de medida de energía eléctrica"*), la Orden de 20.12.1984 del Ministerio de Industria es un documento excepcional, pues, además de demostrar de forma fehaciente e irrebatible que el Gobierno cumplió la segunda función que tenía asignada en la estafa planificada a finales de 1983 por las compañías eléctricas y el PSOE, confirma que la única y exclusiva finalidad de la revisión de precios de alquiler aprobada por dicha Orden (que supuso un incremento de entre el 2.181,10 y el

3.123,30% de los precios vigentes anteriormente) fue

> *"cubrir la función económica de permitir a las empresas alquiladoras la adecuada renovación y actualización de sus parques de contadores con objeto de evitar los perjuicios que de la falta de dicha adecuada renovación y actualización se derivan para la calidad y fiabilidad de la medida"* (párrafo primero de la Orden de 20.12.1984).

Por tanto, si la única y exclusiva finalidad de los precios de alquiler aplicados, a partir de la entrada en vigor de la Orden de 20.12.1984 del Ministerio de Industria, es *"cubrir la función económica de permitir a las compañías eléctricas la adecuada renovación y actualización de sus parques de contadores"* y dicha *"adecuada renovación y actualización"* no ha tenido lugar, porque el Gobierno aún no ha publicado la normativa que defina en qué consiste tal servicio a pesar de haber transcurrido 24 años desde la citada entrada en vigor, el cobro del precio de alquiler es ilegal, ya que es un cobro por un servicio no prestado por causas que no son en absoluto imputables a quienes tienen que recibirlo (apartado V.21 de la Disposición adicional primera de la Ley 26/1984, de 19 de julio, general para la defensa de los consumidores y usuarios, y artículo 17.bis de la Ley 44/2006, de 29 de diciembre, de mejora de la protección de los consumidores y usuarios).

La cantidad que las compañías eléctricas llevan cobrada ilegalmente por el alquiler de los contadores supera los 7.500 millones de euros y se incrementa en 600.000 euros cada día que pasa sin que el Gobierno publique la normativa oficial que defina en qué consiste *"la adecuada renovación y actualización"* de un parque de contadores.

VIESGO (3,00%)=	**224**
TOTAL (MILLONES DE EUROS A 31.12.2007)=	**7.473**

De dicha cantidad, al menos la mitad, ha sido estafada a través del BOE, como ya he explicado en las cuatro últimas entregas y continuaré explicándole en las dos próximas. Evidentemente, la estafa no podría haberse materializado si el PSOE no hubiera puesto a su servicio la Administración Pública y, sobre todo, el BOE, debido a lo cual, desde el

30.12.1984, fecha de entrada en vigor de la Orden de 20.12.1984 del Ministerio de Industria, las siglas BOE significan tanto Boletín Oficial del Estado como Boletín Oficial de los Estafadores.

Como una de las funciones de esta página web es identificar a aquellas personas cuya avaricia, ineficacia, servilismo, o corrupción, provocaron que la estafa se iniciara y/o provocan que esta estafa continúe, a pesar de haber sido reconocida por el propio Gobierno en escrito de 09.03.2007 al Congreso. y ser tan burda que ha sido detectada en 45 minutos por alumnos de primero de Bachillerato, con tan sólo dos de los cientos de documentos obrantes en la Audiencia Nacional, a partir de la primera entrega del apartado IMPLICADOS, incluiré una lista en la que iré detallando los nombres de estos responsables.

Le adelanto que en la citada lista estarán incluidos los nombres de los tres responsables directos de que la Orden de 20.12.1984 del Ministerio iniciara la estafa, al publicar en su Anexo unos precios de alquiler calculados a partir de los datos falsos remitidos en octubre de 1984 a la DG de la Energía por Landis & Gyr, Siemens, AEG, Compañía de Contadores, Metrega y Riesa:

> **Fernando Díaz Caneja**, subdirector general de Energía Eléctrica, firmante del *"Informe de 18.12.1984 sobre propuesta de Orden ministerial por la que se revisan los alquileres de los equipos de medida de energía eléctrica".*
>
> **Carmen Mestre Vergara**, directora general de la Energía, firmante del *"Informe de 18.12.1984 sobre propuesta de Orden ministerial por la que se revisan los alquileres de los equipos de medida de energía eléctrica".*
>
> **Carlos Solchaga Catalán**, ministro de Industria, firmante de la *Orden de 20.12.1984.*

Por lo que respecta a la retribución de las vacaciones de los trabajadores a que este artículo se refiere, éstos percibirán, conjuntamente con el salario mínimo interprofesional fijado en el artículo 1.°, la parte proporcional de éste correspondiente a las vacaciones legales mínimas, en los supuestos en que no existiera coincidencia entre el período de disfrute de las vacaciones y el tiempo de vigencia del contrato. En los demás casos, la retribución del período vacacional se efectuará de acuerdo con el artículo 38 del Estatuto de los Trabajadores y demás normas de aplicación.

DISPOSICIONES FINALES

Primera.—El presente Real Decreto surtirá efectos durante el período comprendido entre el 1 de enero y 31 de diciembre de 1985.

Segunda.—Se autoriza al Ministro de Trabajo y Seguridad Social para dictar las disposiciones necesarias en aplicación y desarrollo de lo dispuesto en este Real Decreto.

Dado en Madrid a 28 de diciembre de 1984.

JUAN CARLOS R.

El Ministro de Trabajo y Seguridad Social,
JOAQUIN ALMUNIA AMANN

MINISTERIO DE INDUSTRIA Y ENERGIA

28290 *ORDEN de 20 de diciembre de 1984 por la que se actualizan los alquileres de los equipos de medida de energía eléctrica.*

Ilustrísima señora:

Los precios de los alquileres de los aparatos contadores no especiales, de capacidad hasta 50 amp. por hilo, e interruptores de control de potencia, alquilados por las Empresas eléctricas a sus abonados, fueron regulados por última vez mediante la Orden ministerial de fecha 11 de junio de 1957. La evolución experimentada desde entonces por los precios de los aparatos hace que tales alquileres no cubran en absoluto la función económica de permitir a las Empresas alquiladoras la adecuada renovación y actualización del parque de contadores, con los consiguientes perjuicios que de ello se derivan para la calidad y fiabilidad de la medida.

La condición 16.ª de la vigente póliza de abono, aprobada por el Real Decreto 1725/1984, de 18 de julio, establece que el Ministerio de Industria y Energía fijará las cantidades concretas máximas que se pueden aplicar por su alquiler con arreglo a unas directrices fijadas en las mismas. Asimismo la Orden ministerial de 1 de agosto de 1984, por la que se completan las condiciones de aplicación de las nuevas tarifas eléctricas para suministros a Ayuntamientos, establece la obligatoriedad de facilitar en régimen de alquiler a los Ayuntamientos los equipos de energía reactiva y activa que en dicha Orden se fijan.

Debido a la inadecuación de los precios a sus costes reales se precisa establecer un período transitorio de adaptación a los nuevos precios para los abonados que ya tenían sus equipos de medida en régimen de alquiler.

En su virtud, este Ministerio, haciendo uso de las facultades conferidas por el artículo 6.° del referido Real Decreto, ha tenido a bien disponer lo siguiente:

Primero.—Los precios máximos de alquiler de los aparatos de medida y control de conexión directa utilizados en los suministros de hasta 63 amp. por hilo serán los siguientes:

	Ptas/mes
a) Contadores simple tarifa:	
Energía activa	
Monofásicos:	
Tarifa 1.0	71
Resto	77
Trifásicos o doble monofásicos	228
Energía reactiva (a efectos de lo dispuesto en las Ordenes ministeriales de 1-8-1984 y 20-11-1984)	
Monofásicos	106
Trifásicos o doble monofásicos	257
b) Contadores discriminación horaria:	
Monofásicos (doble tarifa)	185
Trifásicos o doble monofásicos (doble tarifa)	322
Monofásicos (triple tarifa)	259
Trifásicos (triple tarifa)	415
Contactor	24
Reloj conmutador	147
c) Interruptor de control de potencia (por polo)	4

Segundo.—Para el resto de aparatos y equipos auxiliares de medida y control, el canon de alquiler se determinará aplicando una tasa del 1,25 por 100 mensual al precio medio de los mismos.

Tercero.—La revisión de los precios máximos de alquiler se realizará conjuntamente con la de las tarifas eléctricas, considerando la evolución de los precios del mercado y del índice de precios industriales publicados por el Instituto Nacional de Estadística.

Cuarto.—La presente Orden ministerial entrará en vigor al día siguiente de su publicación en el «Boletín Oficial del Estado».

DISPOSICION TRANSITORIA

Los equipos de medida, en régimen de alquiler, instalados con anterioridad al 28 de septiembre de 1984, fecha de entrada en vigor del Real Decreto 1725/1984, de 18 de julio, tendrán un descuento sobre el precio establecido con carácter general en la presente Orden ministerial del 40 por 100 hasta el día 31 de marzo de 1985 y del 20 por 100 desde el día 1 de abril de 1985 hasta el día 31 de diciembre de 1985, excepto los contadores monofásicos de energía activa, cuyos descuentos serán del 60 por 100 hasta el día 31 de marzo de 1985, del 40 por 100 desde el día 1 de abril de 1985 hasta el día 31 de diciembre de 1985 y del 20 por 100 desde el día 1 de enero de 1986 hasta el día 30 de junio de 1986. Los valores concretos de los precios de alquiler a aplicar se reflejan en el anexo a la presente Orden ministerial.

Lo que comunico a V. I. para su conocimiento y efectos.
Madrid, 20 de diciembre de 1984.

SOLCHAGA CATALAN

Ilma. Sra. Directora general de la Energía.

ANEXO

Precio de los alquileres, con sus descuentos, hasta tanto no exista modificación en el precio establecido con carácter general

	Nuevos	Existentes: Hasta 31-3-85	Existentes: Desde 1-4-85 hasta 31-12-85	Existentes: Desde 1-1-86 hasta 30-6-86
a) Contadores simple tarifa:				
Energía activa				
Monofásicos:				
Tarifa 1.0	71	28	43	57
Resto	77	31	46	62
Trifásicos o doble monofásicos	228	137	182	228
Energía reactiva				
Monofásicos	106	64	85	106
Trifásicos o doble monofásicos	257	154	206	257
b) Contadores discriminación horaria:				
Monofásicos (doble tarifa)	185	99	132	185
Trifásicos o doble monofásicos (triple tarifa)	322	193	258	322
Monofásicos (triple tarifa)	259	155	207	259
Trifásicos o doble monofásicos (triple tarifa)	415	249	332	415
Contactor	24	14	19	24
Reloj conmutador	147	88	118	147
c) Interruptor de control de potencia (por polo)	4	2	3	4

Estos precios son los indicados en la columna cuarta de la página 4 del *"Informe de 18.12.1984 de la DG de la Energía sobre propuesta de Orden ministerial por la que se revisan los alquileres de los equipos de medida de energía eléctrica"* (se incluye a continuación la citada página 4)

Por supuesto, si algún juez o fiscal leyera lo expuesto en esta página web y considerara que de los documentos incluidos en ella se desprenden indicios de la comisión de uno o varios delitos, quedo a su completa disposición para facilitarle la información suplementaria que necesite para cumplir su obligación de *"controlar la legalidad de la actuación administrativa, así como el sometimiento de ésta a los fines que la justifican"* (art. 106.1 de la Constitución) y *"promover la acción de la justicia en defensa de la legalidad, de los derechos de los ciudadanos y del interés público tutelado por la ley"* (art.124.1 de la Constitución).

PRÓXIMA ENTREGA
En la próxima entrega, que tengo previsto publicar el 13.10.2008, le explicaré cómo el Gobierno y las compañías eléctricas hicieron innecesario que los fabricantes remitieran periódicamente datos falsos al Ministerio de Industria y qué artimaña utilizó el Gobierno para, a pesar de no recibir ya estos datos, seguir cometiendo la estafa a través del BOE.

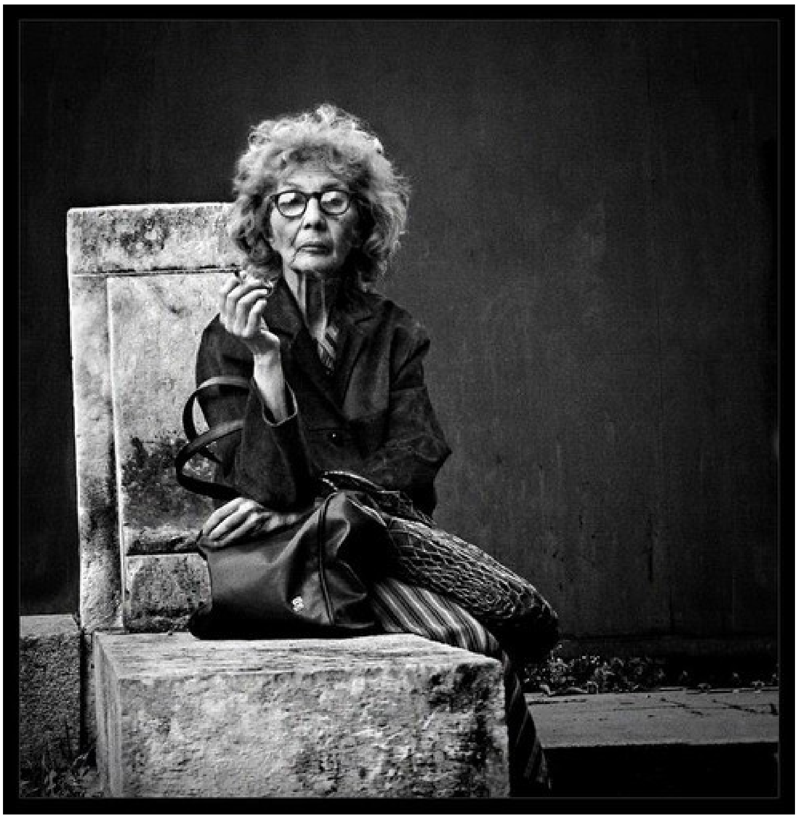
TRINI REINA: HABLANDO DE PLAGIOS...



Trini Reina forma parte de esos autores que admiro, que siempre me sorprenden, me emocionan, y me demuestran que nuestro idioma es hermoso, ajustado y capaz de ofrecer todas las facetas de un límpido diamante. He hablado de ella aquí.
Los que la leemos y admiramos, sentimos la irrefrenable tentación de imitarla, pero tenemos la sensatez suficiente como para comprender que es inimitable. Sin embargo, hay gente de esa que tiene un *bobo-blog*, como el de esta tal "Bi", que plagia a Trini, con recursos estilísticos como poner k donde hay una q, intercalar mayúsculas y minúsculas sin ton ni son, con la emotividad de una jauría de quinceañeros hiperhormonados, comentaristas entusiastas que podrían formar parte del "Club Amén", adobado con emoticones, gifs animados y onomatopeyas a gogó, como demostración palmaria de que *lo que* n*atura non dat, Windows non prestat.*   Y como es evidente que tienen un blog por puro exhibicionismo, pero no tienen nada que decir, se dedican inmisericordes a copiar y plagiar .
Y ahora le ha tocado el turno a Trini Reina, que lo cuenta en "Hablando de plagios..."
Lo que más trabajo cuesta entender es que los plagiarios imaginen que, con esa tontiastucia que se gastan, si roban un escrito y le cambian los nombres propios, incluido el de su autor, nadie lo descubrirá.
Es como para desconfiar de la teoría de la evolución. No todos dejaron atrás la inteligencia imitativa del simio, ni la falta de conciencia ética del reptil.

Gracias agüela por tu solidaridad.
Confieso que lo que más me ha dolido en este plagio es que hayan guillotinado mi relato. Ha sido como si me quitaran algo para hacerlo pedazos.
En fin, espero que denunciando y denunciando este problema llegue a desaparecer un día.

Un fuerte abrazo y te vuelvo a dar las gracias por hacerte eco en tu blog.

PD: Dicen que más vale tarde que nunca, pero ya sabes lo cabezota que soy y he tardado en atender a razones,mas te comunico que, al fin, he comenzado a dar clases de Poesía. A ver si aprendo:):)

Autor: l'agüela

Trini, es un placer estar a tu lado a la hora de andar a escobazos: "Bi" ya ha borrado las entradas a "su diario".

Qué alegría que tendrán tus profesores, van a aprender contigo lo que no les enseñarán en la universidad sobre poesía.

Rayo verde: el Google Reader ha pasado el empacho de picotas del Jerte, y ahora funciona bien.
Gracias.
Saludos cordiales

LA MATANZA DE TLATELOLCO DEL 2 DE OCTUBRE DE 1968. INFORME FEMOSPP

Transcripción literal de las páginas 60 a 75 del informe de la FEMOSSP, "Que no vuelva a suceder", silenciado por el Gobierno Fox y publicado en EE UU, en el National Security Archive, archivo PDF

3.2.4. Tlatelolco 2 de octubre
El CNH (Consejo Nacional de Huelga) interpretó como un paso positivo el que se le haya abierto un camino oficial para el análisis de sus propuestas en la víspera del 2 de Octubre. Erróneamente interpretó que el Estado estaba dispuesto a negociar y, para evitar una provocación, canceló su marcha programada de Tlatelolco al Casco de Santo Tomás para no dar motivo alguno a la represión. El 2 de Octubre el movimiento estudiantil fue reprimido sangrientamente en un acto genocida. Muchos fueron asesinados, heridos o arrestados, y todos fueron aterrorizados para dejar de manifestarse.
Después de semanas de ardua violencia –que fue incrementándose después del IV informe de GDO, de la toma de CU, de los planteles del IPN y de Chapingo-, la posibilidad de iniciar las pláticas para establecer las condiciones del diálogo público, a escasos diez días para la inauguración de los IXX Juegos Olímpicos, debió parecer a los dirigentes del CNH que abría la posibilidad de solución en un buen momento **216**.
Las decisiones tomadas por el CNH durante las últimas semanas denotaron mesura y prudencia. Fueron gestos políticos que intentaban mostrar a la Presidencia que la vía de la negociación era la prioritaria para ellos. Acordaron no manifestarse públicamente el 1º de septiembre, día del IV informe; anunciaron públicamente el 1º de Octubre en un mitin de CU que no había la intención de perturbar la realización de los Juegos Olímpicos **217**. La tarde del 2 de octubre decidieron suspender la marcha programada de Tlatelolco al Casco de Sto. Tomás.

A. En preparación al mitin
Una delegación del Consejo Nacional de Huelga, formada por Luis González de Alba, Gilberto Guevara Niebla y Anselmo Muñoz, se entrevista, por la mañana, con los representantes del Presidente de la República, Andrés Caso y Jorge de la Vega Domínguez **218** en la casa del Rector de la UNAM, Javier Barros Sierra, a las 09:00 horas. El acuerdo al que se llegó fue que se iniciaría el diálogo requerido con el Movimiento Estudiantil.
El CNH sesionaba a esas horas en Zacatenco. Al abrirse la posibilidad de iniciar la negociación y el diálogo, deciden suspender la movilización prevista desde la Plaza de

las Tres Culturas al Casco, para cancelar toda posibilidad de violencia y lograr, por vía del diálogo, la salida del ejército del Casco de Santo Tomás.
En cambio, aquella mañana del 2 de octubre, el estado se preparaba para atacar a su población Cuatro referencias de los acomodos estratégicos realizados durante la mañana del 2 de octubre, y de previsión de eventualidades lo confirman.

Operativos en distintos puntos de la ciudad
La primera demuestra que apostaron operativos de vigilancia, en zonas seleccionadas, con la instrucción de reportarse con regularidad. Las corporaciones habían entrado en un estado de alerta especial. Los puntos de la Ciudad en que se habían apostado eran: el Reloj Chino, Asamblea Sind. Mex. de electricistas, Plaza Tres Culturas, Zacatenco, Casco de Santo Tomás, Ciudadela, Voca y Prepa 4, Mítin C.U. La orden general era reportarse tres veces al día: 10:00, 12:00 y 14:00 hrs.**219** .

Ocupación de áreas estratégicas para francotiradores

La segunda fue la ocupación por parte de una compañía del ejército de varios departamentos contiguos al edificio Chihuahua, con vista a la plaza donde esa tarde se realizaría el mitin. El Gral. Marcelino Barragán relata, en sus declaraciones póstumas, la reunión que tuvo, a primera hora, con el Capitán Gutiérrez Barrios: *"Estaba en mi despacho* [...] *planeando la forma de terminar con el movimiento; en esos momentos llegó el capitán Barrios"* (era el capitán Fernando Gutiérrez Barrios, jefe de la Dirección Federal de Seguridad en 1968) *"al que esperábamos sus informes, para completar mi plan* […] *Reunidos en mi Despacho, escuché todos los informes y pregunté al Capitán Barrios, ¿podremos encontrar en el Edificio Chihuahua algunos departamentos vacíos, donde meter una Compañía?"* **220**
Militares vestidos de civil, en el transcurso de la mañana, distribuyeron gente armada en azoteas y edificios de la zona de Tlatelolco y Nonoalco. Eran elementos pertenecientes al Estado Mayor Presidencial, que el general Luis Gutiérrez Oropeza, jefe del Estado Mayor Presidencial (EMP), mandó ubicar **221**.
El Teniente Salcedo, a la orden de Gutiérrez Oropeza, apostó elementos en un departamento de la cuñada de Luis Echeverría en el edificio *Molino del Rey* **222** y otros elementos en los edificios *Chihuahua, 2 de abril*, y de la parte baja de los edificios alrededor de la Plaza, incluso de la zona cercana a la Voca 7. **223**
En el documental *Batallón Olimpia, documento abierto*, del Canal 6 de Julio, aparecen

siete individuos sobre el techo del templo, en escenas tomadas por una cámara emplazada en el piso 19 de la torre de Relaciones Exteriores. Distintas secuencias los muestran apostados en el techo, saliendo de la iglesia, corriendo por el costado poniente del convento. Cuando fueron detenidos por un grupo de soldados, se identificaron y los militares les permiten huir.

Conforme a documentos desclasificados de la SEDENA, con informes de inteligencia enviados al Departamento de Defensa de EUA el EMP **224**, contraviniendo o malinterpretando las órdenes del General Marcelino García Barragán **225**, utilizó francotiradores para inducir una respuesta armada por parte del ejército y que ésta se generalizara provocando una masacre que aniquilara el grupo nacional movilizado.
Hay tres versiones de quienes eran estos francotiradores. Una que los identifica como estudiantes, otra como elementos pertenecientes a diversas corporaciones policíacas incluyendo el *Batallón Olimpia*, y la que los identifica como miembros del EMP. Por el tipo de armas que se confiscaron a los estudiantes y vecinos de Tlaltelolco –se trataba de armas que no habían sido accionadas y eran de bajo calibre- la versión que inculparía a los estudiantes no se sostiene **226.** Por la actuación que tuvo el *Batallón Olimpia*, de apoyo a la tropa en contra de los francotiradores, tampoco se sostiene esa tesis **227**.
Los agrupamientos militares estaban programados para apoyar las acciones de aprehensión del Batallón Olimpia. A partir del tiroteo, respaldaron a las tropas que estaban siendo atacadas por francotiradores. El general Mazón Pineda informó lo siguiente: *"Al arribar las cabezas de los Agrupamientos a la Plaza de Las Tres Culturas fueron recibidos por fuego proveniente de la mayoría de los edificios que circundan la Plaza, notándose singular intensidad del que venía de los edificios: Chihuahua, 2 de Abril, ISSSTE, Molino del Rey y Revolución 1910"*.**228**
La tesis de que los francotiradores eran militares pertenecientes al EMP es la que tiene soporte en la documentación que hemos encontrado:
En la declaración póstuma del Gral. Marcelino García Barragán se refiere a una conversación que sostuvo con el General Oropeza, a cargo del EMP, poco después de que inició la balacera:
"Mi general, me dijo: tengo varios oficiales del Estado Mayor Presidencial apostados en algunos departamentos, armados con metralletas para ayudar al ejército con órdenes de disparar a los estudiantes armados, ya todos abandonaron los edificios, sólo me quedan dos que no alcanzaron a salir y la tropa ya va subiendo y como van registrando los cuartos temo que los vayan a matar, quiere usted ordenar al general Mazón que los respeten."
El General Barragán comenta que habló con éste, *"trasmitiéndole la petición del general Oropeza"*, y que aquél le comunicó haber encontrado a los dos hombres armados con metralletas y dijeron *"haber disparado hacia abajo".*

El “Teniente Salcedo” del Estado Mayor Presidencial el 2 de octubre dice estar en el penthouse 1301 en el 13º piso del edificio Molino del Rey, perteneciente a una cuñada de Echeverría. Reporta que en el 12º piso en los departamentos 1201, 1202 y 1203 están disparando armas calibre 22, armas de alto poder y pistolas **229**.
De acuerdo con una tarjeta del fondo de IPS sin fecha, el teniente Salcedo, del EMP, se encontraba en el Pent House 1301, del piso 13 del edificio Molino del Rey, e informaba que en esa habitación vivía una cuñada de LEA, Rebeca Zuno de Lima. En el piso 12, en el 1201 según ese testimonio, estaban disparando armas calibre 22, alto poder y pistolas, *"En ese piso hay tres departamentos, uno alquilado a la familia del Sr. Minor Franco y están disparando allí. En el 1202 está alquilado el Sr. Hans Kilotro y también disparan desde allí. En el 1204 vive la familia de Amalia Garza de Huerta y también están disparando de ese departamento”* Firmado por el Cap. Rojas Hisi.**230**

Ocupación estratégica en el área circundante para realizar Operación Galeana

La tercera es el triple contingente militar colocado en las cercanías Tlatelolco, antes de dar el golpe contra los dirigentes de CNH y la comunidad reunida pacíficamente en la Plaza de las Tres Culturas. A partir de las 16:30 hrs. del 2 de octubre. El ejército dispuso de una fuerza que, conforme a distintas versiones, fue de entre cinco y diez mil elementos que les permitiera posicionarse en cuatro puntos estratégicos para evitar la huída de los manifestantes estableciendo un doble cerco –uno exterior bloqueando los accesos, a cargo del ejército, y otro interior –de militares vestidos de civil, pertenecientes al Batallón Olimpia- para capturar a los organizadores del evento **231**.

El Secretario de la Defensa Nacional dispuso que la 2ª. Brigada de Infantería Reforzada, montara la ***‘Operación Galeana’***, organizándose de la siguiente forma **232**:
Primer grupo al mando del C. Col. De Cab. DEM Alberto Sánchez López, ubicado en Manuel González e Insurgentes. Compuesto por el 1º Batallón de fusileros paracaidistas. 2º Escuadrón blindado de reconocimiento. 1º Batallón de infantería de guardias presidenciales.
Segundo grupo al mando del C. Gral. Brigadier FAP. DEMA. José Hernández Toledo, ubicado en Monumento a la Raza. 40 Batallón de infantería. 19 Batallón de infantería (2 compañías).
Tercer grupo al mando del C. Col. De Inf. Armando del Río Acevedo, ubicado en Estación Buenavista. 43 Batallón de infantería. 44 Batallón de Infantería. 1 Escuadrón blindado de reconocimiento, y como reserva: Batallón “Olimpia”, al mando del C. Col. De Inf. Ernesto Gutiérrez Gómez Tagle.

Hay otro documento en que presenta una organización distinta de esa operación militar,**233** lo que no varía es su composición de fuerza. A las 18:00 el ejército estaba ya apostado en sus tres ubicaciones previstas. Hay referencia al despliegue de efectivos y equipo militar. Contaban con cerca de 300 tanques ligeros, unidades de asalto, jeeps y transporte militar, con lo que cercaron las inmediaciones de la Plaza.**234**
No se trataba de una maniobra solo de disuasión –con una fuerza lo suficientemente grande como para inspirar temor y desalentar que, de forma violenta fueran atacados-, sino que tenían munición suficiente para emprender una acción ofensiva de gran envergadura. Quien dio la orden que dispusieran de esa cantidad munición tiene tanta responsabilidad en la masacre, como quien dispuso que el ejército se ocupara en tareas de policía, frente a una población civil inerme que era un grupo nacional del pueblo mexicano.

Previsión de cárceles y pabellones hospitalarios

La cuarta: Se tienen referencias de que se liberaron pabellones de diferentes cárceles para recibir detenidos. Se notificó a instituciones hospitalarias sobre un posible alto número de ingresos por eventualidades **235**.
Las policías políticas y fuerzas armadas que se ubicarían al interior de los edificios ocuparon sus espacios desde temprana hora. El Batallón Olimpia entró mezclado con los manifestantes y se fue agrupando en las inmediaciones del edificio Chihuahua **236**.

B. Lo acontecido en la Plaza de las Tres Culturas

El mitin

El acto que se realizaría ese día en la Plaza de las Tres Culturas, había sido convocado por Comité Nacional de Huelga (CNH) para iniciarse a las 17:00 horas. El CNH consideró propicio instalar el podio de oradores y el equipo de sonido para dirigirse a los asistentes en la terraza balcón del edificio Chihuahua –los edificios contiguos a la Plaza están construidos con un diseño en el que cada tres pisos hay un espacio común, abierto como terraza balcón-. Se tenía prevista la participación de contingentes estudiantiles del IPN, UNAM, representaciones de otras universidades, grupos obreros, campesinos y sindicales, que llenarían la plaza.

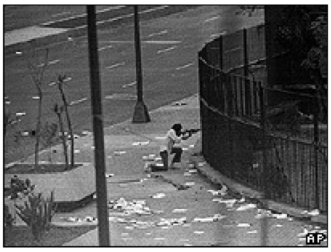
Al irse congregando en la Plaza de las Tres Culturas, se les informó a los asistentes desde el micrófono que la marcha programada al Casco de Santo Tomás después del mitin se suspendería. A las 17:30 inició el mitin. Los cálculos de asistencia fluctúan entre seis mil y quince mil personas. La composición de los asistentes era diversa. La Dirección Federal de Seguridad informa, pormenorizadamente, los nombres de actores políticos que habían sido perseguidos políticos y encarcelados, como Danzós Palomino; organizaciones sindicales como el SME y Petroleros; organizaciones campesinas como la CCI, y Organizaciones políticas como el Partido Obrero Trotskista (sic) y la Unión Nacional de Mujeres, entre otros.**237**
Era un mitin nutrido, con un número superior al de otros mítines que se habían realizado en la misma plaza y transcurría sin contratiempo. De los cuatro oradores programados, dos ya habían hecho uso de la palabra.

El inicio de la agresión

La secuencia de los acontecimientos se desencadenó rápidamente. En todas las versiones el acto inicia aproximadamente a la misma hora, sin embargo, de lo acontecido en torno al inicio de la masacre existen versiones incompletas y contradictorias que dejan grandes vacíos para la lectura fina y acabada.

A las 18:10 son lanzadas unas luces de bengala desde los helicópteros que sobrevolaba la plaza, seguida de una ráfaga de arma de fuego automática que procedió de la zona donde se encontraba ubicado el edificio de la Secretaría de Relaciones Exteriores **238**. A partir de ese momento inicia el tiroteo. Las bengalas se interpretan como la señal de un plan de ataque en contra de la multitud, no solo contra la dirigencia del CNH, concentrada en el piso tres del Edificio Chihuahua.**239**
Conforme a declaraciones de integrantes del movimiento, el ejército empieza la ráfaga de disparos en contra la multitud en el momento en que son lanzadas las bengalas en el cielo.
*"En estos momentos fue lanzado un cohete de luces verdes y rojas, que iluminó el cielo sobre la iglesia de Tlatelolco y a esta señal avanzó el ejército rodeando la zona del mitin y al quedar y al quedar ya dentro frente al edificio del ISSSTE, a donde en el 2do. piso [Conforme a Álvarez Garín, 2002: 87, se trataba del 3er. piso] en el balcón del ambulatorio, se encontraba presidiendo al mitin, los elementos del Consejo Nacional de Huelga, así como maestros y periodistas y fotógrafos nacionales y extranjeros de una de las ventanas de dicho edificio y de otros edificios circunvecinos se disparó con armas, de calibre 22 al parecer, por lo que de inmediato los elementos del ejército se pusieron a la defensiva y tomaron posesiones (sic) de combate y se entabló un duelo a tiros entre los dos bandos que duró más de una hora, pues al estar hablando el tercer orador suspendió su discurso y gritaba que no corrieran los asistentes cuando se iniciaba esta balacera y eran menos de las 18 h.20m. y la gente corría perteneciente al estudiantado y demás interesados en el mitin gritaban 'México, México' y hacían la 'V' de la victoria y la balacera no terminaba todavía después de las 19h.30m. aunque ya era menos intensa y posteriormente se oyeron detonaciones aisladas ya que como a las 22 hs. volvió a escucharse otra fuerte balacera cerca de los edificios que rodean la vocacional 7".***240**
A las 18:15 ingresa el ejército, desde sus posiciones que ocupaban, en una acción de cerco, disparando hacia los manifestantes y hacia el edificio Chihuahua.**241**
En un reporte de los hechos del 2 de octubre, se menciona que el ejército entró sin

avisar, y que los disparos provinieron del 3er piso del Chihuahua **242**. A las 18:00 el ejército estaba ya apostado en sus tres ubicaciones previstas.
La DFS ofrece más de dos versiones contradictorias entre sí **243**. En una de ellas no se registra la herida del Comandante Hernández Toledo hecho que, en otra versión, presenta como el detonador de la agresión que el ejército realizó contra los manifestantes **244**. En la primera versión lo que provoca la balacera es la ráfaga de ametralladora que sigue a las luces de bengala. En otra versión más, es un individuo '*de traje azul, rubio, pelado a la brush'* quien aparece en el barandal en el que estaban los oradores del CNH en el edificio Chihuahua y desde allí empieza a disparar, lo que desata la balacera **245**.



El Batallón Olimpia

Al momento de iniciar la balacera, como preludio al asedio de la Plaza, el Batallón Olimpia ocupa los accesos del edificio Chihuahua sin permitir el paso ni de acceso ni de salida.
El Batallón Olimpia había participado, semanas anteriores, en la toma de CU. En Tlalatelolco aparecen resguardando el edificio Chihuahua, identificados por un guante blanco, y en el techo de la iglesia de Santiago Tlaltelolco**246**. *"Los del guante blanco son la brigada de 120 formada hace una semana por el Cap. Gutiérrez Barrios, con elementos de la Dirección Federal de Seguridad, Policía Judicial Federal, Policía Judicial del Distrito Federal e Inspección Fiscal Federal"* **247** Sin embargo la lista dada a conocer por la Revista Milenio revela el rango militar de algunos de los integrantes del Batallón Olimpia, grupo especializado, integrado por militares que, actuando de civiles, ocultaban su adscripción institucional al ejército **248**.
El dirigente estudiantil Pablo Gómez, que se encontraba en el tercer piso del Edificio Chihuahua, narra que tenían información de que en el basamento de la planta baja de aquel edifico había militares vestidos de civil y policías de la Dirección Federal de Seguridad por lo que, comenta, '*decidimos acelerar el mitin'.* Pero cuando aparece la luz de bengala, que *'es evidentemente una señal'*, ya que de inmediato se mueven *'los dos bandos del ejército: el ejército uniformado avanza sobre la plaza y el Batallón Olimpia, junto con la policía política, toma el tercer piso del Edificio Chihuahua. Ambas partes del ejército actúan exactamente al mismo tiempo'*. Cuando los elementos del Batallón Olimpia, todos armados –*'unos con ametralladoras Thomson, otros con metralletas, otros con pistola calibre 45'*-, llegan al tercer piso, *'un individuo vestido de traje azul, rubio, pelado a la brush, se acerca al barandal y empieza a disparar. Hasta ese momento no había habido ningún balazo, de ningún lado'*. Después de que este sujeto disparó, *'los tiros siguientes no proceden del Edificio Chihuahua, los siguientes balazos proceden de la Plaza, con armas de alto poder'*.**249**

Al momento de iniciar la balacera, el Batallón Olimpia ocupa los accesos del edificio Chihuahua sin permitir el paso ni de acceso ni de salida. A partir del momento en que se producen los primeros disparos se generaliza rápidamente una intensa balacera.
Una tarea encomendada al Batallón Olimpia era la de capturar a los dirigentes del movimiento, por eso fueron congregados en torno al Edificio Chihuahua donde se encontraba reunida una importante cantidad de dirigentes del CNH, pero su otra característica, esencial del Olimpia, era la de actuar con impunidad institucional, confundidos con ciudadanos civiles, sin ser identificados. Podían no solo mezclarse entre la población ahí reunida, sino arremeter contra ella, sin que hubiera crimen de estado qué perseguir y sancionar.
La acción coordinada de Batallón Olimpia y Ejército fue una estrategia militar para acabar con un movimiento estudiantil que en pocos meses había logrado movilizar amplios sectores populares **250**. Pero, además, hubo otro elemento que, al parecer, estaba fuera del control de esta doble estrategia del ejército.

El asedio a la plaza
La masacre dura más de dos horas. A partir del momento en que se producen los primeros disparos, se generaliza rápidamente una intensa balacera. En ese tiempo la dirigencia del CHN fue detenida y, hasta el día de hoy, es incompleta la lista real de heridos, muertos y desaparecidos.
Una de las tres agrupaciones del ejército avanza hacia el centro de la Plaza hacia los edificios desde los que provienen los disparos. Quienes ejecutaban estos disparos son reportados como 'francotiradores'. Hay tres versiones respecto a quienes eran estos 'francotiradores'.
1ª La que los ubica como integrantes del Batallón Olimpia y del 'Grupo Especial' formado por el Capitán Gutiérrez Barrios **251**.
2ª La de que eran elementos pertenecientes al Estado Mayor Presidencial **252**.
3ª La que eran estudiantes y población civil, habitantes de Tlaltelolco **253**.
Los manifestantes se movilizaron intentando salir de la Plaza y de la zona aledaña de manera precipitada y desordenada **254**. Los agresores, ejército y 'francotiradores', dispararon en contra los manifestantes, produciendo heridos y muertos.
Los Grupos Uno y Tres del ejército, encargados de cercar el área, solo permiten que salga de la zona que estaba bajo fuego a la gente que ellos decidan, previa identificación o a cambio de soborno como dinero, relojes y alhajas **255**.

Del horror de aquellos momentos, nos da cuenta el relato retomado por Consuelo Sánchez en su Cronología documental de 1968.
"En la plaza se ha generalizado la balacera. Mujeres, niños, jóvenes y adultos corren despavoridos; algunos se tiran al suelo; otros buscan protección en las escalinatas o

entre los vestigios prehispánicos; otras más se esconden debajo y detrás de los automóviles estacionados, o intentan refugiarse en los departamentos de Tlatelolco. Mucha gente logra huir por el costado oriente de la plaza, otras personas se topan con 'columnas de soldados que empuñaban sus armas a bayoneta calada y disparaban a todas direcciones'. Las menos afortunadas están tendidas en el suelo, muertas o heridas."
"El fuego intenso dura aproximadamente 30 minutos. Luego, los disparos disminuyen, pero se mantiene el tiroteo hasta las 20:30 horas. En ese lapso se 'evitó que las ambulancias de las cruces Roja y Verde llegaran a la Plaza de las Tres Culturas."
"A las 21 horas, varios edificios habían sido ocupados en su totalidad por la tropa y algunos otros estaban siendo cateados. Los elementos del Batallón Olimpia, vestidos de civil, tienen como contraseña un pañuelo envuelto en la mano derecha. Así se identifican unos a otros, y se les oye gritar: ¡Batallón Olimpia, no disparen! Cientos de personas con las manos en alto son conducidas por los soldados hasta el muro sur de la iglesia de Santiago Tlatelolco. Todas están detenidas, a excepción de los fotógrafos y periodistas que pueden identificarse, y ninguna persona puede abandonar o entrar a la zona, salvo rigurosa identificación. Unos trescientos tanques, unidades de asalto, jeeps y transportes militares, tienen rodeada la zona, de Insurgentes a Reforma, hasta Nonoalco y Manuel González."
"Algunos de los dirigentes del Consejo Nacional de Huelga han sido capturados en el Edificio Chihuahua, cuyos departamentos son desocupados violentamente por unidades del ejército, del 'Batallón Olimpia' y de la policía de la Federal de Seguridad."
Otros dirigentes son detenidos en la plaza. Todos ellos son conducidos al lugar donde se ha concentrando a los demás detenidos. Posteriormente cientos de ellos son trasladados al Campo Militar Número Uno. Se calcula que son más de 2,000 personas las aprehendidas en Tlatelolco." **256**

La masacre a su plenitud 257.

La intención del Estado Mexicano, de detener a los dirigentes del CNH concentrados en el edificio Chihuahua, muestra sólo uno de los objetivos; la dimensión de la Operación Galeana habla de otro tema que rebasa, con mucho, la detención selectiva de quienes eran plenamente identificables para la policía política de la DFS.
El Batallón Olimpia, junto con el ejército y con los 'francotiradores' que dispararon contra la multitud, hirieron a más de un centenar de manifestantes y mataron, por lo menos, a 31 personas de las que tenemos registro **258**.

Resultado de la batalla y 'toque de queda'
El fuego nutrido se prolongó aproximadamente durante 30 minutos. En la confusión, la mayor cantidad de los asistentes logra evadir el cerco del ejército.
El ejército toma control total de la Plaza.
Los miembros del CNH y demás simpatizantes que se encontraban en el Edificio Chihuahua fueron detenidos y transportados al Campo Militar Número Uno.
No permite el acceso y mantiene el retén de salida. Hasta las 20:30 horas el ejército impidió el acceso a las ambulancias de la Cruz Roja y de la Cruz Verde.
El ejército detiene, conforme a sus propios registros, a más de mil manifestantes, de los cuáles 363 personas fueron conducidas al Campo Militar Número Uno, 83 a la jefatura de policía, y 597 distribuidos entre la cárcel preventiva de la ciudad y la Penitenciaría del Distrito Federal **259.** Aproximadamente a partir de las 19:15 hasta las 21:30, los disparos fueron haciéndose cada vez más esporádicos. A las 23:00 se Gral. Mazón Pineda registra el último tiroteo que se reporta. **260**
Comienza el desalojo. Los únicos vehículos que salieron del área fueron los vehículos del ejército, con rumbo al Campo Militar Número Uno, con detenidos, heridos y muertos. Se concluye el rastreo por el área habitacional buscando a los sospechosos de pertenecer al movimiento estudiantil.
El General Javier Vázquez Félix se encarga, como parte final de la Operación Galeana, de recoger los cadáveres de la plaza, de retirar las evidencias de la masacre, y de coordinar las acciones de limpieza.
Conforme a la DFS, a la 01:00 del día siguiente la situación se había calmado completamente **261**. Los Hospitales los hospitales de la Cruz Roja y Verde y en general todo el sistema de urgencias quedaron bajo control policíaco, por orden del general Mendiolea **262**. Una sección del ejército se posiciona para mantener el control de la zona.
La resguardará por varios días hasta provocar la reiterada protesta de los inquilinos de Tlaltelolco.
La **Operación Galeana** y la coordinación interinstitucional desplegada muestra que hubo una decisión de Estado de masacrar a la población allí reunida. Que esta población fue considerada como el núcleo activo del grupo nacional que debía ser aniquilado en aras de la estabilidad del sistema autoritario que se buscaba modificar. El genocidio se cometió para acallar la disidencia asesinando, hiriendo, llevando a prisión, mandando al exilio a quienes identificaron que podían suscitar consenso social para movilizar a la sociedad.

Detenidos, heridos, muertos y desaparecidos

El Capitán Gutiérrez Barrios reporta lo siguiente:
Detenidos: Se registran 1043 detenidos distribuidos de la siguiente manera: 363 en el Campo Militar No.1; 83 en la Jefatura de Policía y 597 entre la Cárcel Preventiva de la Ciudad y la Penitenciaría del Distrito Federal.
Muertos: 26 personas, entre ellas 4 mujeres y un soldado.
Heridos: 100 personas, 73 hombres y 27 mujeres, entre ellos el Gral. José Hernández Toledo, 12 soldados y 7 elementos de diferentes policías (tres de DFS, dos de la Judicial Federal, uno de la Judicial del Distrito y un policía preventivo).**263**

Según un documento titulado 'Tlatelolco: 2 de octubre', del CNH, *"solamente a las 21 hrs… habían sido atendidos cerca de un centenar de heridos de bala de gran calibre. El primer grupo de muertos alcanzó la cifra de 40 entre los que se encontraban un adulto vestido en pijama con un balazo en el estómago calibre 45 y disparado a boca de jarro, algunos niños, una mujer embarazada, más mujeres y jóvenes*. El documento, es posterior a la masacre, pero no tiene fecha **264**.
Un documento de la IPS reporta que a las 24 hs. En la Delegación Nro. 3, *"se encuentran 14 muertos no identificados, como resultado de la balacera en la plaza de las 'Tres Culturas'. 11 de ellos del sexo masculino y tres del sexo femenino, una de estas últimas se notaba embarazada".* Este mismo documento da cuenta de los muertos que se encuentran en la Cruz Roja: Carlos Antonio Beltrán Macías, Antonio Solórzano García, tres personas no identificadas.
En Traumatología La Villa: Un desconocido *"estudiante de 20 años, por herida de proyectil de arma de fuego de forma irregular, de unos 5 mm sobre región tiroidea y salida en forma triangular de 3 cm sobre la base de la nuca"*
En el Hospital Balbuena: León Torres, Cecilio, *"proyectil de arma de fuego en cráneo.-Vivía en el edificio Tamaulipas en Santiago Tlatelolco"*.**265**
El problema de las listas de heridos y muertos, del 2 de octubre en particular, y de todo el movimiento del 68 en general, nos habla, en el mejor de los casos de un desaseo del manejo de los mismos o de una intención clara de encubrir y/o distorsionar la verdad.
El padre de una de las víctimas, el Sr. Reynoso, al buscar el cadáver de su hijo contó

121 cadáveres **266.** Un testimonio protegido de un agente del servicio secreto habla de haber visto más de un centenar de cadáveres en el cuartel de granaderos de Tlaltelolco. En el lugar presenció violación de cuerpos de muchachas muertas ese día.
De acuerdo con documentos desclasificados por Washington y entregados a la Organización de Archivos (NSA por sus siglas en inglés). No se puede establecer un número de muertos para el 2 de octubre. Se han recibido reportes que señalan hasta 350 muertos. El estimado de la Embajada de Estados Unidos en México cifró entre 150 y 200 las personas que perecieron en la matanza del 2 de octubre de 1968.**267**

Según Francisco Taibo II, *"declaraciones llegadas a la Comisión de la Verdad **268** hablaban de que una parte de los cadáveres habían sido arrojados al Golfo de México por aviones militares*". No era fácil reconstruir la lista. Muchos de los muertos no eran estudiantes, lo que hubiera facilitado el reconocimiento, sino empleados, trabajadores, vendedores ambulantes; las familias fueron presionadas para firmar actas de defunción que atribuían la muerte a causas naturales y los parientes fueron amenazados por la policía. En diciembre de 1969 el Consejo Nacional de Huelga reportó cerca de 150 muertos. Esta cifra permaneció en la memoria colectiva.
Finalmente en 1993 los nombres y apellidos de más de una treintena fueron colocados en la estela que hoy existe en la Plaza de Tlatelolco. La Comisión de la Verdad analizó 70 casos en 1993, de los cuales se pudo lograr la plena identificación de 40 muertos".**269**
La lista registrada en los archivos de la IPS y de la DFS enumera 32 muertos, de ellos uno es militar. Seis eran mujeres y 26 varones. De los 32 se cuenta con información de trayectoria de bala en solo 10 casos: 2 son en plano horizontal; 3 de abajo a arriba y 5 de trayectoria de arriba abajo. Se registra un muerto a culatazos y otro de un infarto.**270**
Hay otros registros que nos dan otra cantidad de muertos y que los registros de la trayectoria del proyectil son muy distintos a la anterior, sin embargo omiten los nombres.
"Las 26 víctimas que murieron a consecuencias inmediatas o tardías de heridas por arma de fuego". Allí, se expresa que *"la información puede sintetizarse en las siguientes cifras: Heridas con trayecto descendente y con gran desnivel con respecto al plano de sustentación: 4 / Heridas con trayecto sensiblemente horizontal: 22 / Heridas con trayecto ascendente"* **271**
Otro documento habla sobre los muertos en Tlatelolco *"23 murieron por arma de fuego de gran potencia, 3 murieron por arma de fuego, 3 murieron por arma blanca, 3 murieron por arma blanca y traumatismos, 1 murió por traumatismos y asfixia por sumersión. En total son 31 muertos: 25 hombres y 6 mujeres. De estos 6 recibieron tiros por la espalda, 4 presentan orificios con gran desnivel respecto al plano de sustentación."* **272** Aquí, por ejemplo, aparecen 3 muertos por arma blanca, debemos suponer que a bayoneta calada y uno por asfixia.
Parecieran ser tres listados diferentes en el que solo uno rinde el informe lo más completo posible.
El fuego por tanto se desató en contra de la multitud indefensa por todos los frentes y flancos. De los muertos en que se documenta el examen de balística, se habla de calibres reglamentarios del ejército y corporaciones policíacas. Lo que ubica con claridad a las corporaciones de estado como responsables directos de la masacre.
"¿Cuántos murieron?... -El periódico inglés The Guardian, tras una investigación cuidadosa, considera como la más probable: 325 muertos.- *Los heridos deben haber sido miles, lo mismo que las personas aprehendidas. El 2 de octubre de 1968 terminó el movimiento estudiantil. También terminó una época de la historia de México… La actitud gubernamental. ¿Cómo explicarla?... La matanza de Tlaltelolco nos revela que un*

pasado que creíamos enterrado está vivo e irrumpe entre nosotros." **273**

Campo Militar Número UNO

El ejército trasladó a 363 detenidos de Tlatelolco a la prisión militar del Campo Militar Número Uno (CM1). Conforme a testimonios, todos ellos fueron sometidos a tortura. Muchos de ellos a simulacro de fusilamiento. Casi todos ellos fueron consignados. Caso paradigmático es el de Tomás Cervantes Cabeza de Vaca quien denunció la tortura

a que fue sometido, sin embargo el agente ministerio público de la primera delegación, se negó a recibirla argumentando tener órdenes superiores para no recibir nada que viniera de los actores sociales del movimiento estudiantil, que estuviera dirigido contra funcionarios públicos.**274**

"El lic. Rojo Coronado manifestó que …siguió diciendo que entre sus defendidos estaba Luis Cabeza De Vaca a quien golpearon despiadadamente 10 agentes de la Dirección Federal de Seguridad para llevarlo posteriormente, el 4 de octubre, al campo militar No. 1, donde continuo siendo torturado, ya que lo acostaron en una plancha, desvestido para interrogarlo, insistiéndole que revelara quienes estaban aportando dinero para el movimiento estudiantil; que para amedrentarlo le dijeron que lo castrarían, y en efecto le infirieron una herida en un testículo, sobre el cual le vaciaron un líquido frío y a ratos lo sentaban en una bandeja de agua para después atarlo a un árbol, y en dos ocasiones simularon su fusilamiento, pero haciendo los disparos al aire y como no sabía nada, no pudo decir nada ." **275**

13 de octubre de 1968 los padres del pasante Luis Raúl Álvarez Garín, envían al Procurador General de la República una carta en la que dicen tener conocimiento por varios testigos que su hijo se encontraba incomunicado en el CM1 **276**.
Es importante señalar que, antes de esta fecha no hay referencia a que esta cárcel militar fuera utilizada como centro de detención de los estudiantes del movimiento estudiantil. A partir de entonces comenzó a ser extensiva la práctica de incomunicar en este centro a los detenidos ilegalmente que, a juicio de la policía o el ejército, eran de mayor peligrosidad política para ser tratados como enemigos de una guerra nunca declarada.

Persecución, tortura y desaparición forzosa

Héctor Jaramillo Chávez, estudiante de la ESIME, fue detenido el 2 de octubre en Tlatelolco **277**. Se le culpabilizó de querer asesinar al General Marcelino Barragán **278.** La DFS ya venía reportando las actividades de este estudiante, cuando menos desde el 12 de agosto, en Hermosillo Sonora, donde fue detenido por repartir volantes **279**. Héctor fue detenido nuevamente en la Ciudad de México el 23 de enero de 1969, desde entonces permanece como detenido desaparecido.**280**
Este es el saldo de la noche más violenta que viviera el movimiento estudiantil; en que se consumó la decisión del Estado Mexicano por erradicar de tajo la expresión pacífica y democrática de un este grupo nacional que emergió a la palestra de la historia para iniciar un nuevo tiempo en la conciencia del pueblo, en nuestro país.

Notas

216 68/ 10/ 02 Según un documento titulado Tlatelolco: 2 de octubre, aparentemente elaborado por el CNH, *"el miércoles 2 de octubre a la mañana, las pláticas iniciales sobre estos tres puntos continuaron entre el gobierno y el CNH, y todavía el gobierno mantuvo que ya se habían dado algunos pasos para restablecer el clima democrático y que se darían algunos más"*. El documento, es posterior a la masacre,pero no tiene fecha **IPS 2866-B**

217 Sobresale la posición del estudiante Gustavo Gordillo de Anda, quien sostiene que *"en lo*

que se refiere a las olimpíadas es y será la posición del estudiantado no boicotear ni entorpecer la realización de las mismas, a pesar de que el dinero que se ha invertido en su realización es patrimonio del pueblo, el gobierno mexicano ha contraído un compromiso con el mundo y no puede eludirlo, pero también es cierto que es más grande su compromiso con el pueblo de México". El informante resalta que *"durante el desarrollo de este acto que terminó a las 13.30 hs. Estuvieron presentes algunos grupos de atletas de las delegaciones visitantes, los cuales después de platicar brevemente con algunos estudiantes continuaron su recorrido de prácticas por el interior de CU"*. **Firma: rba**

236 DFS Exp. 11-4-68/L44

237 68/ 10/ 02 17 HS. "Desde las 16 hs. Aproximadamente del día de hoy comenzaron a llegar grupos de estudiantes de las escuelas preparatorias del DF, Vocacionales del Instituto Politécnico Nacional y maestros pertenecientes a la Coalición de enseñanza media y superior, así como varios grupos de estudiantes de la Escuela de Agricultura de Chapingo, Edo. de México para concentrarse en la Plaza de las 3 Culturas de la unidad Tlatelolco. Fue muy notoria la presencia en este mitin de individuos con aspecto de 'extranjeros' que al parecer asesoraban a los grupos de jóvenes que ocuparon la tribuna para dirigirse aproximadamente a las 17 hs., a la

muchedumbre reunida en este lugar. Asimismo fue notoria la presencia de muchos dirigentes del Partido Comunista de México y de la Central Campesina Independiente que dirigen Ramón Danzos Palomino y Rafael Jacobo García, quienes ordenaron que un grupo de campesinos asistieran a este acto, entre ellos los huicholes que periódicamente llegan a dormir en las oficinas de la CCI., en el Dr. Rio de de la Loza 6 departamento 32. También se notó la presencia de elementos de la Unión General de Obreros y Campesinos de México, encabezados por los líderes estudiantiles de la Juventud Estudiantil Sindicalista que dirige el señor Audáz Cuauhtémoc Martínez Uriarte y varios grupos de obreros que dijeron partenecer a la sección Nº 35 del Sindicato de Petroleros de la República Mexicana; también asistieron los Trabajadores del Partido Obrero Trotskista del Sindicato Mexicano, que dirigen Luciano Galicia Esperanza Limón y otros líderes de este sindicato; asistieron también los grupos de la Unión Nacional de Mujeres, que dirige Consuelo Martínez Hernández, como dirigente 'visible' pero que es manejada por la señora Clementina Batalla viuda de Bassols y entre los grupos de mujeres que acompañaban a Consuelo Hernández, se encontraba Manuel Amaya Rentería, miembro del Comité Nacional de la CCI Frac. Comunista" IPS 1459

238 Gómez Tagle, revista Proceso, 03/10/04.

239 68/ 10/ 18. DIA Intelligence Information Report. Confidential La mayoría de la información dice que se escucho una detonación, de fuente desconocida, poco tiempo después una bengala (algunas fuentes dicen que varias) apareció en el cielo. Algunos observadores pensaron que la bengala venia del helicóptero que sobrevolaba, otros pensaron que venia de alguna posición desde tierra. En cualquier caso, la batalla estaba en proceso. c. 3/24/69

241 Íbid

242 IPS Caja 1459/Exp. 16/F.21

243 La mayor parte de los reportes de la DFS que se conservan en el AGN no son los que se produjeron, en tiempo y lugar para dar cuenta de lo que estaba sucediendo, sino que ofrecen la versión 'oficial', frente a las versiones de los estudiantes. El propósito de estos informes es acreditar que '*los responsables de estos lamentables acontecimientos no son elementos del gobierno'*. Con ello se busca limpiar la imagen del ejército. Las autoridades tuvieron que disparar sus armas para amedrentar' (a los estudiantes). Son los habitantes de los edificios que poseían armas quienes las utilizaron para disparar al ejército. 'Los elementos que forman parte de los cuerpos de policía, de seguridad y del ejército, se limitaron exclusivamente a dar garantías a la ciudadanía mexicana y su intervención fue incitada y calculada previamente por quienes han propiciado este movimiento."

244 Es controversial este reporte de supuesta herida al Comandante Hernández Toledo no sólo por los reportes contradictorios de la propia DFS, sino porque se le asocia a circunstancias conspicuas. En esta versión, el comandante aparece con un altavoz arengando a la muchedumbre. Los testigos no registran haber escuchado este altavoz. Por otra parte, los informes que acreditan esta versión señalan que fue herido de frente, desde el edificio del ISSSTE que debía de estar a sus espaldas, si es que el comandante dirigía su altavoz a la multitud. Otras versiones señalan que fue herido por la espalda. En unas se menciona que fue

herido con una bala. En otras, que fue herido con dos proyectiles. También hay varias versiones de que nunca fue herido. Al tiempo, el Comandante dio su versión de los hechos, confirmando que sí fue herido, indicando con precisión el departamento de donde provino la bala.

Ni perdón ni olvido. Se cometió un crimen de Estado y el Estado mismo ha permitido que quede impune.

Los mexicanos debemos exigir la salida del ejército de las calles, exigir que se limite severamente y se regule de forma estricta su utilización en el combate a la delincuencia organizada.

No hacerlo es una invitación a que los políticos intenten utilizarlo para mantenerse en el poder o alcanzarlo y por lo mismo que eventos trágicos como el del 2 de octubre se

repitan.

Sin prejuzgar nada y, naturalmente, deplorando las consecuencias de la violencia, ¿me podría aclarar alguien los siguientes extremos?:
-La huelga convocada por el CNH, ¿era laboral o era política y "revolucionariaria"?
-¿Le cupo alguna responsabilidad a los líderes políticos y sindicales que la convocaron?
-¿Por qué los infantes disparan pegados al terreno en posición "cuerpo a tierra" -cualquiera que haya hecho la mili sabe que esa es una posición defensiva en descubierto que se adopta cuando el enemigo está abriendo fuego sobre tí-?

Pido perdón por adelantado a Doña Gatopardo por tan impertinentes preguntas.

Fecha: 05/10/2008 04:27.

Autor: Gatopardo

Don Ramón: me temo que lleva usted razón, y que ningún partido político en el Gobierno debería poder utilizar un poder discrecional y ejemplarizante, porque sólo se volverían a cometer todos los excesos criminales del pasado.

Don Carlos: hemos puesto el enlace directo al Archivo PDF del Informe de la Fiscalía Especial (FEMOSPP) de donde hemos extraído estas 15 páginas para que las lean, y no vean sólo el vídeo.
Sin embargo, tanto en el vídeo como en el Informe de la Fiscalía Especial se dice que el Batallón Olimpia, formado por militares vestidos de civil fueron los francotiradores que dispararon contra la multitud desde los edificios. Y la respuesta fueron los disparos del ejército también se hizo contra la multitud.
Si usted tiene a bien leerse el informe de la Fiscalía Especial sabrá que la Huelga y la manifestación fueron y son actos legales, dentro de los cauces que garantiza la Constitución y las Leyes mexicanas, como en cualquier país democrático.
Pero todo esto que usted ignora y más, lo encontrará leyendo simplemente.

Cualquiera que haya hecho la mili y los que no la hemos hecho sabemos que la instrucción de disparar cuerpo a tierra y todas las demás no impide que nuestro glorioso ejército mexicano y nuestro glorioso ejército español se hayan acostumbrado a perder todas las batallas en defensa de su patria contra enemigos extranjeros, y desquitarse masacrando impunemente al pueblo que juran defender.

Saludos cordiales

Autor: De un artículo de Luis González de Alba

"La declaración de un capitán
Declara el capitán Ernesto Morales Soto en el acta número 54832/68. "En la ciudad de México, Distrito Federal, siendo las 21:30 horas del día 3 de octubre de 1968, el personal que actúa se trasladó y constituyó legalmente al Hospital Central Militar, sala de emergencia, cama 28, en donde se tuvo a la vista al que en su estado normal dijo llamarse ERNESTO MORALES SOTO, protestado y advertido en los términos de ley, por sus generales manifestó: llamarse como queda escrito, ser de 35 años de edad, viudo, católico, con instrucción, capitán primero de Caballería del Ejército Mexicano, originario de Xicotepec de Juárez, estado de Puebla [...] Declaró: Que el de la voz presta sus servicios como capitán primero de Caballería del 19 Regimiento, destacamentado en la ciudad de Múzquiz, estado de Coahuila, comisionado actualmente en esta ciudad en el Batallón Olimpia al mando del coronel ERNESTO GÓMEZ TAGLE, con funciones específicas de preservar el orden público durante el desarrollo de los Juegos Olímpicos, que el día de ayer [2 de octubre] fue comisionado, poniendo bajo su mando dos secciones de Caballería compuestas de 65 hombres pertenecientes al 18 y 19 Regimiento de Caballería, para que se trasladaran a la Unidad Tlatelolco yendo todos vestidos de paisanos e identificados como militares por medio de un guante blanco, y protegieron las dos puertas de acceso al edificio denominado Chihuahua de dicha Unidad, confundiéndose con los allí presentes que se habían reunido sin saber para qué motivo, que posteriormente al lanzamiento de una luz de bengala, como señal previamente convenida, debería apostarse en ambas puertas e impedir que entrara o saliera persona alguna, que después de lanzada la señal mencionada empezaron a oírse gran cantidad de disparos que provenían de la parte alta del edificio mencionado, así como de los ventanales y dirigidos hacia las personas que se encontraban reunidas, las que trataron de protegerse junto a los muros del edificio y algunas de ellas intentaban introducirse, que en cumplimiento de las órdenes recibidas, la gente al mando del declarante disparó al aire para dispersar a la gente [del mitin]..."

Hubo más
Al parecer, hubo más francotiradores y no únicamente los soldados del Batallón Olimpia vestidos de civil, según se deriva de que el capitán Morales Soto oyera los primeros balazos antes de dar la orden de disparar "al aire para dispersar a la gente".
El francotirador tiene por función aterrorizar más que hacer el mayor número de víctimas. La gente debe saber que no está a salvo y que por cualquier parte le puede llegar una bala. A diferencia de lo que ocurre durante una operación militar, donde el frente está bien establecido y quien no participa del combate no se aproxima y con eso está relativamente a salvo, el francotirador tiene la función que menciona el capitán Morales Soto, "dispersar a la gente", hacerla huir de pavor. Y quienes los vimos disparar desde el tercer piso del edificio Chihuahua no vimos que dispararan "al aire", sino al azar sobre la multitud. Esos fueron los disparos a los que el Ejército respondió con fuego cerrado sobre esa parte del edificio. Fue un claro acto de terrorismo de Estado claramente definido por quien tenía a su cargo a 65 militares disfrazados de civiles."

Pocas hostias le dieron a usted en esa mili.

Fecha: 05/10/2008 08:19.

Autor: Carlos Rodezno

Doña Gatopardo, ya sabe usted que la revolución de Asturias fue un acto totalitario y subversivo de la mayor gravedad, contra la República, que se insertó en un intento de golpe de estado izquierdista para derribar el gobierno y la legalidad "burguesa". En cambio algunos lo cuentan como una huelga minera más. No he leido el documento en PDF al que se refiere, y por eso le he preguntado su opinión: ¿Huelga laboral o subversión? Contésteme si es tan amable y ya está...

En este caso, dada la magnitud de la tragedia -que he deplorado de inicio- parece que pudiera haber responsabilidades incluso políticas. Lo cual no empece para afirmar -si ese fuera el caso- que algunos manifestantes pudieran haber estado armados.

Por su parte afirma usted, de forma a mi juicio temeraria, que "nuestro glorioso ejército español se ha acostumbrado a perder todas las batallas en defensa de su patria contra enemigos extranjeros, y desquitarse masacrando impunemente al pueblo que juran defender".
Si lo tiene tan claro, póngame un sólo ejemplo durante el siglo pasado.

A su redactor-jefe le diré que en la mili nunca me dieron de "hostias" y yo tampoco tuve que darlas, que levantar la mano a un teniente era delito y, por su lado, un buen oficial sabe hacerse obedecer sin violencias.

Pásenlo bien.

En los enlaces que he facilitado, existe la información pertinente, y no tengo vocación para resumir y vulgarizar despreciando la capacidad de análisis, el criterio y la inteligencia de los lectores.
En este espacio estamos hablando de la matanza de Tlatelolco, no de la masacre de Asturias.
Le ruego lo tenga en cuenta y no use la sección de comentarios como si fuera un foro.

Fecha: 06/10/2008 07:43.

Autor: Alimaña News (Redactor-Jefe) a Carlos Rodezno

Pues manica de hostias y nos habríamos ahorrado un polemista inculto.
Después de su heroica actuación en la Marcha Verde, el ejército español el único armamento y paramenta que necesita es un matamoscas y un abanico para los sofocos.

Fecha: 06/10/2008 08:04.

Autor: Carlos Rodezno

Doña Gatopardo, me referí a la revolución de Asturias, por vía de ejemplo, para ilustrarle mejor lo que tantas veces las cosas son y la progresía pretende hacer pasar por otras, como por ejemplo "masacre". Si el intento hubiera sido falangista, usted le llamaría golpe. Al ser izquierdista y fracasar, le llama masacre.

Algo parecido le ocurre a Alimaña: si el Ejército hubiera actuado durante la descolonización del Sáhara autónomamente, desoyendo a la ONU y a Madrid, le hubieran tildado de fascista y reaccionario; como lo hizo disciplinadamente en obediencia al poder civil encarnado en el Gobierno de la Nación, le llaman cobarde.

Aclárense, que a cada paso que dan quedan ustedes más en evidencia.

Fecha: 06/10/2008 10:58.

Autor: Gatopardo a don Carlos

El problema, don Carlos, es que quienes son monotemáticos, obsesivos, suelen "por vía de ejemplo", dar la matraca con cuatro ideas extraídas de Pío Moa o algún otro esibrro indocumentado por el estilo, ya sea en una bitácora mexicana, como ésta, cuando estamos reproduciendo el informe de la Fiscalía nombrada por el Gobierno de los Estados Unidos de México como cuando les da por aburrir a las cabras en el Foro de su pueblo.
Y en vez de leer, o no leer este artículo, y comentar sobre lo que aquí se trata, usted nos intenta imponer su monotema particular.
Y no señor. No tiene usted permiso para sabotear desde la sección de comentarios hablando de otra cosa que no sea el tema del que trata el artículo.
Y cuando nos quiera convencer de lo democrático y disciplinado que es el Ejército español, no nos remita al siglo XX, ni al XIX, ni siquiera al siglo XVIII, porque los militares españoles sólo fueron capaces de ganar medallas asesinando a los huelguistas y a la población civil, mientras que cosecharon derrota tras derrota contra los ejércitos de otros países.
Y a partir de ahora, y como ya le hemos avisado en varias ocasiones, señor mío, le rogamos que se considere no invitado a comentar en esta bitácora.

Y he aquí otra forma de violencia, la mas conocida como "dada con guante blanco" y sin ánimos de ofender a nadie, podemos suponer que por "diálogos" elaboradamente ideados y expuestos, como los que hemos visto hasta ahora en los comentarios, es por lo que un gobierno cegado de poder, embrutecido por corrupción -y engrandecido por

estados mentales no muy sanos de sus participantes- pudo creerse lo suficientemente grandioso para hacer tantas estupideces, cosa que por desgracia se demuestra tras tantos años de impunidad, de parches políticos y sociales con respecto al esclarecimiento de estos deplorables hechos. Este desde luego aunado a otros grupillos que; tal como sucede hasta el día de hoy, manejan y manipulan algunos cuantos poderes de izquierda que degradan y obstaculizan el crecimiento en cualquier ámbito de nuestra ya de por si pisoteada nación. Esta izquierda que sabe perfectamente que son los jóvenes los que por "su hambre" de cambio son capaces de hacer cuanta burrada se les ocurra en honor a "un bien común" cosa que no repruebo sin embargo si condeno cuando son un puñado de escuincles revoltosos los que usan un movimiento social como pretexto para crear desorden y caos pues al calor del momento mas que la Neurona los ataca la Hormona típicamente Adolescente... ¿Que quienes tienen la culpa? El gobierno, claro es, por tratar a toda costa, desde antes de estos hechos y desgraciadamente hasta la fecha, de evitar que la gente piense, opine, pida y exija lo que por derecho le corresponde. Las izquierdas desesperadas, tratando de ganar cosas que ni siquiera nos imaginamos, el pueblo también, por permitir que sean niños los que estén revolucionando y por ser insensibles ante el dolor y la necesidad de nuestro vecino por que: "De que lloren en su casa....." Y hasta nosotros por ufanarnos de conocer y encontrar las respuestas en 500 fuentes distintas de testimonios cuando... para desgracia de todos los lectores (COMO YO) y mesurados exponentes como los de la mili y las hostias... LA REALIDAD SUPERÓ POR MUCHO A LA FICCION. o en este caso... a lo que quedo como siniestra evidencia.

Solo una pregunta me queda : Si la masacre de los que estaban allí por convicción y deseo fue cruel y devastadora… ¿que pensaran los que recibieron una bala perdida por tan solo vivir ahí, y después siguieron "viviendo" en Tlaltelolco pisando día a día las huellas de semejante horror?

Y para remate, una frasecita que me traigo volando en la cabecilla.

"Que el Pueblo y la Nación me lo demande….!"

¿De donde la traigo….?

Que pena me da, ver articulos pasionales como este, con mediocridad en la informacion y totalmente subjetivo. esto lo digo por las mentiras escritas en el, muchas de ellas ya manifestadas por otros usarios, dichas mentiras son las que, de manera implicita, aumentan la ignorancia al respecto de los hechos. No debemos olvidar, que para poder ser investigadores sobre cualquier tema, debemos ser objetivo, y los datos o fuentes de informacion que manejemos debemos de considerarlas con cientificidad; no podemos solamente establecer un escrito, hecho desde una sola perspectiva. Para darnos una idea; ¿han considerado otras versiones? no verdad. bueno, si estudian a fondo este tema, que es interesantisimo, se llevaran una total decepcion con respecto de lo que opinan hoy, y veran que a quienes juzgan hoy de manera irresponsable, resultaran de lo mejor una vez analizados los hechos cientificamente.

Tengo cierta dificultad para tomar en serio a quien aconseja espíritu científico, cuando no se ha enterado de que la puntuación de un texto no consiste en salpicar puntos y comas al buen tuntún, y vapulea la ortografía y la gramática.

Es decir, un semianalfabeto funcional con ínfulas de sabio. Como todos los sandios.

Considero deplorable lo ocurrido en Tlatelolco el 2 de octubre de 1968; y definitivamente debe llegarse a la verdad.
Tengo que hacer algunas consideraciones:
1) Si consideramos que el ejército mexicano tenía apostados entre 5 y 10 mil elementos, aparte de los elementos de diferentes cuerpos policiacos; y si cerraron un cerco alrededor de la Plaza de las Tres Culturas, puedo deducir que no tenían pretensiones de abrir o permitir rutas de escape para los manifestantes.
2) Si los manifestantes se contaban en un número de entre 6 y 15 mil personas.

3) Si el inicio de los disparos fue a las 18:10 horas, siendo más nutrido en un lapso de 30 minutos, y con disparos esporádicos al menos hasta las 22:00
4) Si los elementos del ejército estaban bien entrenados y equipados: disponían de tanquetas, de metralletas Thompson (capaces de disparar al menos 700 balas por minuto con un alcance efectivo de entre 100 y 150 metros y tambores de recambio de entre 50 y 100 balas), además de pistolas calibre 45 y armas calibre 22.
Me quedan una duda: Con estas características y con el equipamiento y cerco mencionado, además del número de efectivos castrenses y del número de civiles ¿No deberían haberse reportado muertos por centenares y heridos por miles? Las condiciones así lo sugieren.
Se reportan entre 25 y 40 muertos, pero un solo soldado bien entrenado disparando ráfagas a la multitud con un subfusil Thompson disponiendo de al menos 3 tambores de recambio podría matar o herir a decenas de personas concentradas en un pequeño espacio y sin rutas de escape; asimismo, si la duración del fuego nutrido fue de al menos 30 minutos, se debieron haber disparado al menos 21 mil balas de 11.43 mm
Aunque no soy ni remotamente experto en armas ni en guerras, el sentido común me dice que en este deplorable evento algo no cuadra.
¿Alguien tiene detalles de lo que describo?

efectivamente Carlos, haber disparado tantas balas durante tanto tiempo con tantos militares y elementos del grupo Olimpia nos da una sencilla idea de lo que en verdad ocurrió y que nunca será revelado, la muerte de miles de estudiantes principalmente, es obvio pensar que no los dejarían escapar, estaba por celebrarse la olimpiada, por cierto la mas cara del mundo porque muchos años le fué cobrada al pueblo de méxico, volviendo al punto, las pruebas documentales fueron eliminadas por completo y los cadáveres quemados en el campo Marte y otros tantos arrojados al mar, de esa forma jamás podrán ser encontrados, si fueron disparadas 21 mil balas, entonces al menos tendremos una cuenta de tres mil personas al menos, a las que efectivamente les dio alguna.

LA ESTAFA DE LOS CONTADORES DE LA LUZ, PASO A PASO: LOS FABRICANTES (2)

FUENTE: INTERVIÚ nº 1390/16.12.2002 (página 34).
Ver el reportaje completo en **www.estafaluz.com/interviu2.html**

así acabó una pequeña empresa española que hacía la competencia a las multinacionales

GRUPO 'CONTACT': UNA VISITA DE CORTESÍA

León, 1988. La empresa de fabricantes de contadores Riesa (Romanillos Industrias Eléctricas, S.A.) marcha *"boyante y viento en popa"*. Esta firma familiar, creada por un pionero en los años cincuenta, ha bajado los precios de los contadores casi a la mitad que otras empresas y compite con fuerza en el mercado, como recuerda a ***interviú*** su entonces vicepresidente e hijo del fundador, Juan José Romanillos.

El 19 de febrero de 1988, los miembros del consejo de administración de Riesa se reúnen y dan cuenta de una visita de cortesía que les ha hecho uno de sus competidores. En el acta de la reunión se escribe que el presidente *"informa sobre la entrevista mantenida con el representante de Metrega, que lamenta, trasladando el sentir de los demás fabricantes, nuestra penetración en el mercado por encima de las posibilidades que ellos consideran deberíamos tener"*. Además, según el acta, los competidores de Riesa se atrevieron a aconsejarles que *"en lo posible reduzcamos tan elevada participación en los suministros, elevando en lo posible los precios, que ellos consideran muy por debajo de la competencia"*.

Romanillos traduce el documento: *"Habían pactado el precio de los contadores y se habían repartido el mercado. Y en ese momento nosotros vendíamos más de la cuenta y más barato"*. Afirma que la visita era toda una *"advertencia"*. Poco después de aquello, la familia Romanillos perdió el control de la empresa, que pasó a ser propiedad de la portuguesa Fabrica Nacional de Relogios Reguladora, SARL. Romanillos afirma que ya en 1993 *"aparece Schlumberger en el consejo de administración. Y en 1995 se queda con todo"*. Riesa fue absorbida, disuelta, sus fábricas cerradas y sus 93 trabajadores, despedidos. Romanillos recuerda así la sombra del grupo Contact: *"Todo era de palabra, nunca se dejaba nada por escrito. Pero por supuesto que había un grupo que amenazaba y apretaba a quien bajaba los precios de los contadores"*.

El final de Riesa fue idéntico al de otras empresas españolas de fabricantes de contadores. *"Hoy sólo quedan dos multinacionales, Siemens y Schlumberger, y una firma pequeñita, Metrega, que se reparten casi el 96.5 por ciento del mercado de contadores de luz en España"*, indica Antonio Moreno. Tanto Romanillos como Moreno aseguran que en España ya no hay ni una sola fábrica de contadores, porque las multinacionales se las han llevado a Grecia, los países del Este de Europa e, incluso, a Indonesia.

■ La firma fabricante de contadores Riesa, de la que Juan José Romanillos era vicepresidente, tuvo una visita de la competencia. El aviso que recibió se recogió en esta acta.

9.- LA ESTAFA, PASO A PASO: EJECUCIÓN/ FABRICANTES (II)
En el apartado anterior le demostré documentalmente que los fabricantes cumplieron correctamente las dos funciones que tenían asignadas por las compañías eléctricas y el PSOE para llevar a cabo la estafa en los precios de alquiler de los contadores de la luz. Dichas funciones eran el suministro de datos falsos al Ministerio de Industria y la imposición de restricciones a los almacenistas-distribuidores **(1)**.

> **(1)** Las restricciones impuestas por los integrantes de un nivel superior (los fabricantes) a los de un nivel inferior (los almacenistas-distribuidores), que siempre son forzadas, reciben el nombre de restricciones verticales; y las que se imponen entre sí los integrantes de un mismo nivel, que a veces son consensuadas, reciben el nombre de restricciones horizontales. Un ejemplo de restricciones horizontales es el reparto consensuado del mercado entre fabricantes o entre distribuidores.

Como le expuse igualmente en al apartado anterior, el cumplimiento de las dos citadas funciones fue coordinado por el grupo clandestino Contact, en el que cada fabricante estaba representado por uno o dos directivos.

La primera de dichas funciones (el suministro de datos falsos al Ministerio de Industria)no reportaba ningún beneficio económico a los fabricantes, y la segunda (la imposición de restricciones verticales), sólo el beneficio correspondiente al incremento artificial de precios de los contadores vendidos a los almacenistas-distribuidores **(2)**

> **(2)** Según datos facilitados a la Comisión Nacional de Energía (CNE) por las propias compañías eléctricas, éstas adquieren el 85% de los contadores vendidos en España, aunque según datos facilitados por Endesa a la Junta de Andalucía, dicho porcentaje supera el 93%.Por tanto, el porcentaje comprado por los almacenistas-distribuidores oscila entre el 15%, según los datos facilitados por las compañías eléctricas a la CNE, y menos del 7%, según los datos facilitados por Endesa a la Junta de Andalucía .

9.1.- La tercera función

La función que se autoasignaron los fabricantes fue imponerse consensuadamente las restricciones necesarias para repartirse todo el mercado y, en consecuencia, aplicar también el incremento artificial de precios a los contadores vendidos a las compañías eléctricas.

Ello demuestra que para los fabricantes tiene mayor prioridad el viejo dicho de *"los negocios son los negocios"* que sus vínculos con las citadas compañías. Aunque, quién sabe, es posible que el motivo por el cual los fabricantes se autoadjudicaran la tercera función fuera la convicción de que quien roba a un ladrón, tiene cien años de perdón.

Para cumplir adecuadamente la tercera función, los fabricantes se valieron del grupo Contact, que ya había coordinado el cumplimiento de las otras dos funciones.

El plan acordado por los integrantes del grupo Contact para coordinar la aplicación de las restricciones horizontales necesarias para repartirse el mercado nacional fue el siguiente:

> - Una vez hechas públicas por las compañías eléctricas sus previsiones de compra, el grupo Contact se reunirá para consensuar el porcentaje de mercado asignado a cada fabricante.
> -Con objeto de vigilar el correcto cumplimiento de los acuerdos adoptados, el grupo se reunirá periódicamente, estando obligado cada fabricante a aportar sus datos de ventas a las distintas compañías eléctricas. Con objeto de evitar que nadie ajeno al grupo Contact pueda interpretar los documentos aportados a las citadas reuniones,éstos se confeccionarán utilizando los siguientes códigos **(3)**:
> **(3)** En los documentos de febrero y marzo de 1994 de la carpeta Contact de Landis & Gyr, que son los únicos que he podido conseguir, sólo figuran cuatro fabricantes, faltando, por tanto, el código correspondiente al quinto integrante del citado grupo (Metrega)

Dado, pues, que el beneficio económico obtenido con el cumplimiento de las dos funciones que les fueron asignadas por el PSOE y las compañías eléctricas sólo les reportaba el beneficio correspondiente al incremento artificial de precios de los contadores vendidos a los almacenistas-distribuidores, los fabricantes decidieron autoasignarse una nueva función, de la cual las compañías eléctricas no tendrían conocimiento hasta el 21.11.95.

FABRICANTES	**COMPAÑÍAS ELÉCTRICAS**
1= Siemens	**A**= Iberdrola
2= Schlumberger	**C**= Unión Fenosa

3= AEG	**E**= Eléctrica Conquense
4= Landis & Gyr	**G**= Sevillana de Electricidad
	L= Hidroeléctrica de Cataluña
	K= Unelco
	M= Gesa

- Para evitar que nadie venda más de lo que le corresponde, una vez que un fabricante haya alcanzado la cuota de mercado asignada por el grupo, subirá los precios para obligar a las compañías eléctricas a comprar a otro fabricante que no la haya alcanzado.

- Con objeto de conseguir que el reparto del mercado sea lo más equitativo posible, en los documentos aportados a las reuniones periódicas se indicará no el número de contadores sino el número de elementos watimétricos **(4)** vendidos, es decir, se contará un elemento por cada contador monofásico y tres, por cada contador trifásico. En el caso de que los contadores vendidos sean de energía reactiva, se contará 0.5 elemento más **(5)** por cada contador.

(4) El elemento watimétrico (o, simplemente, elemento) es el conjunto formado por una bobina de tensión y una bobina de intensidad. En cada contador hay un elemento por cada fase conectada. Por tanto, el contador monofásico tiene un elemento; el bifásico (prácticamente desaparecido), dos, y el trifásico, tres. En los contadores normales, el precio es casi proporcional al número de elementos, es decir, el precio del contador monofásico de simple tarifa de energía activa es aproximadamente la tercera parte del precio del contador trifásico de simple tarifa de energía activa.

> **(5)** Dado que los contadores de energía reactiva suponen sólo el 0.23% del total de los contadores vendidos a las compañías eléctricas, el considerar 0.5 elemento más por cada contador de energía reactiva pone claramente de manifiesto, además de la existencia de un acuerdo de reparto del mercado, la ridiculez cometida por los integrantes del grupo Contact para evitar que un fabricante resultara más beneficiado que otro en dicho reparto.

Para que usted comprenda la ridiculez cometida por los cinco fabricantes integrados en el grupo Contact al acordar que a efectos de reparto de elementos watimétricos cada contador de energía reactiva (tipo que, repito, supone sólo el 0.23% del total de los contadores vendidos a las compañías eléctricas) se considerara que tenía 0.5 elemento más, le pondré un ejemplo.
Imagínese que los fabricantes de turismos también fabrican motos y deciden repartirse consensuadamente el mercado para vender ambos vehículos a unos precios superiores a los que resultarían de la libre competencia.
Imaginese también que, como ocurre con los precios de los contadores y el número de elementos, el precio de un vehículo es proporcional a su número de ruedas, por lo que los fabricantes acuerdan repartirse el número de ruedas, no el de vehículos.
Pero, ¿cómo conseguir que el reparto continúe siendo equitativo cuando en él figuren turismos con equipo de aire acondicionado, que, aunque suponen sólo el 0.23% del total de vehículos vendidos, valen más que los turismos sin dicho equipo y más del doble que

las motos?.
Pues si los fabricantes de vehículos adoptaran la misma solución que el grupo Contact, dicha solución sería considerar que los turismos con aire acondicionado tienen 4.5 ruedas. Increíble, pero cierto, como prueban los documentos de Landis & Gyr Española que le mostraré a continuación.
En el caso de Landis & Gyr Española, los documentos relativos al control de elementos watimétricos vendidos se confeccionaban mensualmente y se guardaban en una carpeta denominada Contact, lo cual, salvando las distancias, que son pocas, es como si una empresa formara parte del entramado de un grupo mafioso de nombre, por ejemplo, Calabresi y archivara los documentos relacionados con dicha mafia en una carpeta en cuyo lomo estuviera escrita la palabra CALABRESI.

Respecto al grupo Contact, su forma de operar durante los cuatro años (1991/1994) que trabajé en Landis & Gyr Española, era (y posiblemente siga siendo) la siguiente:

- El Servicio de Ventas, cuyo jefe era José Medina Morales, emitía cada mes dos documentos con destino a la carpeta Contact: en uno se detallaban los elementos vendidos a las compañías eléctricas, y en el otro, los elementos vendidos a los almacenistas-distribuidores, denominados DIRE (DIstribuidores REgionales) en Landis & Gyr Española.

Hoja de la **carpeta Contact** de **Landis & Gyr Española** correspondiente a las ventas efectuadas en febrero de 1994 a las compañías eléctricas

- Una vez emitidos los dos documentos, José Medina Morales se reunía con Félix Rivas Perales, director comercial y de marketing, quien le dictaba las cifras falsas de venta que, en lugar de las indicadas en los documentos, que eran las reales, serían presentadas por Landis & Gyr Española en la siguiente reunión del grupo Contact. Sobre el documento correspondiente, José Medina Morales tachaba la cifra real de ventas y manuscribía la cifra falsa de ventas

- Tras haber manuscrito todas las cifras de ventas falsas dictadas por Félix Rivas Perales, José Medina Morales confeccionaba personalmente el documento codificado que Landis & Gyr Española presentaría en la siguiente reunión del grupo Contact. que le había dictado Félix Rivas Perales.

Así pues, Landis & Gyr Española engañaba no sólo a las compañías eléctricas sino también a los restantes fabricantes.

9.2.- La ética de la multinacional Landis & Gyr
A pesar de estar perfectamente informada, la multinacional Landis & Gyr permitió que el director comercial de Landis & Gyr Española, Félix Rivas Perales,

Nº PAG.: DOS FECHA: 12.11.93

TEXTO TV/5019-5020-5021/93

Con fecha 6-7-93, les pasamos pedidos nºs.1019,1020 y 1021, para 3 equipos de contadores, FAF, ect., que nuestro cliente Tecnercon, instalaría en unas minicentrales del Norte de España.

Posteriormente, en conversaciones con Unión-Fenosa, les exigen que estos FAF, lleven la tarjeta de comunicación y el modem, por lo que se modifica el pedido inicial, como es de su conocimiento.

Durante el mes de Octubre, Tecnercon nos informa que SIMELEC ha ofertado a su cliente final, más barato que su propio precio de compra, incluso con el 15% con que cuenta desde que Landis se lo concedió hace años, y que nosotros lógicamente mantenemos. Le hacemos ver que puede tratarse de un error en los cálculos, y a continuación, nos ponemos en contacto con Simelec (día 22.10), haciéndoles saber lo ocurrido, y según nuestra conversación, efectivamente se había omitido el incrementar un suplemento (15 resultados), por lo que nos disculpamos con Tecnercon, diciendo que repetirían la oferta.

MYCESA

DOS.

El pasado dia 10 de los corrientes, D.Antonio Fernández director de Tecnercon, nos acusa de quitarle una operación ya realizada por ellos, pues Simelec, ha ofertado a su cliente (Hidroeléctrica San Miguel, o APROIDA,S.A.) los FAF al precio de 3.083.866, otorgándole el 15% de descuento aún siendo el cliente final, por lo que ha quedado como un estafador según sus palabras, y quiere explicaciones de LANDIS, commo fabricante de los equipos en este asunto, tanto para el como para su cliente, con el fin de intentar salvar su propia imagen, ya que su cliente incluso por la diferencia notoria de precios ha pasado el pedido a SIMELEC.

Como he demostrado en nuestra corta vida como DIRE, mi sentido de solidaridad y afán de cooperación, por el momento no me hacen enjuiciar esta situación, como los indicios me quieren hacer creer, y no será MYCESA, quien entre en una lucha suicida por vender en condiciones fuera de las pactadas en cada momento con el resto de la organización DIRE.

Pero, espero que nadie confunda nuestra buena voluntad, y labor de equipo, con nuestra preparación y estructura, para contestar a cualquier temeridad, que en nuestras relaciones pudiera surgir.

Por todo lo expuesto, quedan anulados nuestros pedidos relacionados y quedamos a la espera de que den cumplida respuesta a D.Antonio Fernández, Director de Tecnercón y a nosotros mismos.

SALUDOS

c.c./Sres.Jiménez Tato, y resto de organización DIRES.

Francisco Javier Jiménez Tato, actual director general y consejero delegado de Landis & Gyr

Elementos pedidos

Elementos vendidos

Estos números son los datos falsos de venta dictados por **Félix Rivas perales** a **José Medina Morales** y manuscritos por éste en la hoja de febrero de 1994 de la **carpeta Contact** de **Landis & Gyr Española**

El significado de cada uno de los códigos utilizados en este documento es el siguiente:

FABRICANTES
1= Siemens
2= Schlumberger
3= AEG
4= Landis & Gyr

COMPAÑÍAS ELÉCTRICAS
A= Iberdrola
C= Unión Fenosa
E= Electra de Viesgo
G= Sevillana de Electricidad
L= Hidroeléctrica de Cataluña
K= Unelco
M= Gesa

Ø= Almacenistas-distribuidores

- **me acosara moralmente por haberme negado a participar en el grupo Contact**

Página 18 del escrito remitido el 14.07.1997 por Landis & Gyr Española a la Comisión Europea en respuesta al escrito de 09.06.1997 de requerimiento de datos comerciales relacionados con las restricciones a la libre competencia investigadas en el expediente IV/F1/35.885, incoado tras mi denuncia contra el grupo Contact

Landis & Gyr Española, S.A.

Respuesta a la Comisión. Asunto IV/F. 1/35.885 - Moreno / Landis & Gyr

Félix Rivas Perales, autor del escrito

Ante la presión a que se le sometió, por el Sr. Medina, por su jefe inmediato Sr. Castro, y por el Director Comercial, a finales de Enero de 1994, se dio de baja por enfermedad en la empresa alegando ansiedad y no poder resistir la presión del trabajo al que estaba sometido que le causaba diversos trastornos. Durante más de 2 semanas, a pesar de la proximidad de la jubilación del Sr. Medina, el Sr. Moreno estuvo ausente de su puesto de trabajo.

-18-

Félix Rivas Perales, autor del escrito, miente cuando afirma que José Medina Morales y Luis Castro Anaya me sometieron a presión. Las dos únicas personas que me sometieron a un despiadado acoso moral fueron él y el consejero delegado de Landis & Gyr Española, José Manuel Pérez Echeverría.

y, ante el fracaso de dicho acoso,
- **me despidiera mediante una denuncia basada en el falso testimonio** de un empleado de la empresa.

Al permitir dichas actuaciones de Landis & Gyr Española, la multinacional Landis & Gyr infringió no sólo la legislación española sino su propia ***Directiva sobre la ética en el negocio***, en la que la citada multinacional hace, entre otras, las siguientes afirmaciones:

"El objetivo de esta directiva es el de ofrecer direcciones a seguir en áreas de la actividad diaria del negocio, de donde podrían surgir posibles dudas sobre los valores éticos a respetar. Los empleados del grupo Landis & Gyr Española en todo el mundo y en todas las empresas del Grupo deben mantener el más alto nivel de integridad para fortalecer nuestro rendimiento administrativo y mejora nuestra imagen corporativa con cara a nuestros clientes y al público.

1.- Políticas y procedimientos contables
(...) Todo el personal debe cumplir estas políticas y procedimientos en todo momento.

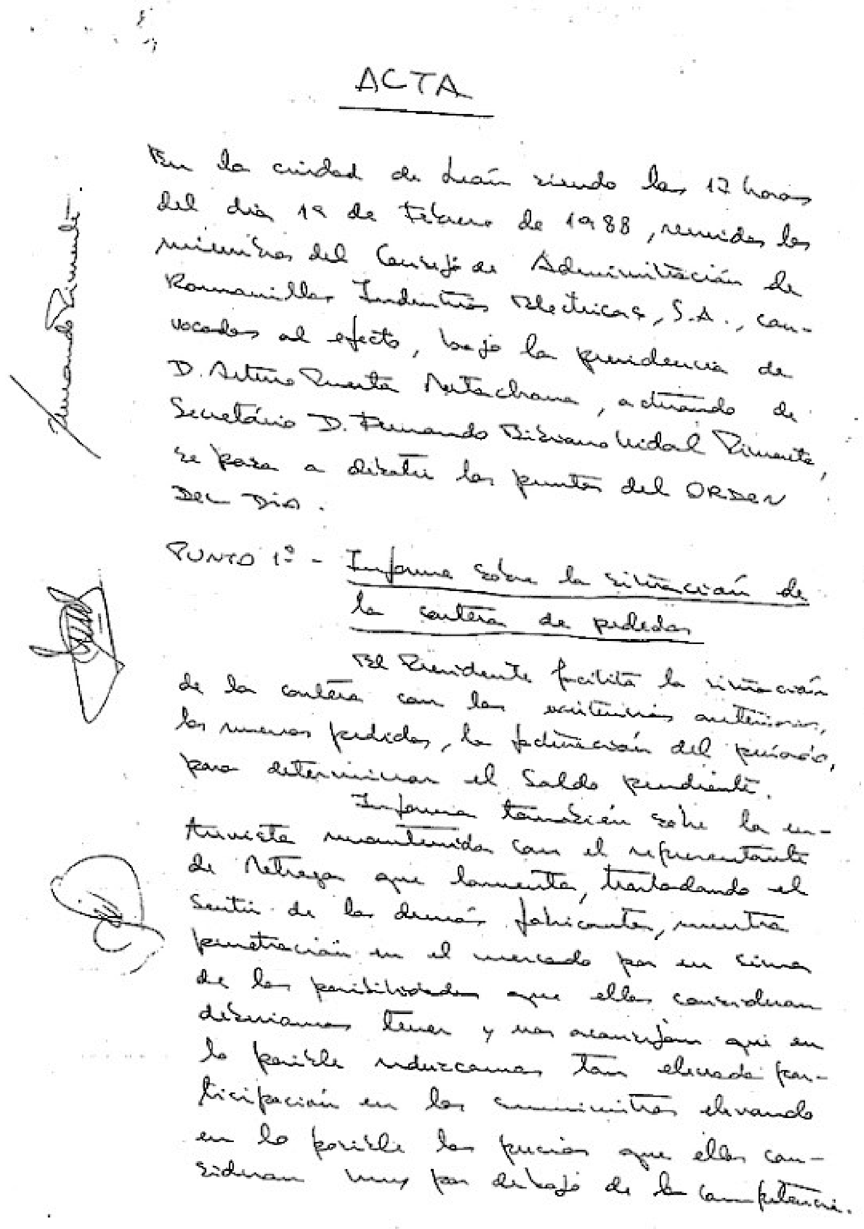
No se permite contabilizar ningún dato falso o artificial por ningún motivo.

5.- Competencia
Nuestro Grupo respalda la política de la libre competencia y se ajusta a las leyes relativas a la misma en países que posean economías de mercado libre y que hayan promulgado tales leyes.
Las principales áreas de preocupación son las prácticas o acuerdos que traten de alguna manera con:
- Acuerdos sobre precios o reparto de mercado con competidores.
- La imposición de restricciones sobre un cliente, por ejemplo, con respecto al precio de reventa por éste, el mercado en el cual puede revender nuestros productos o los productos que el puede o no tener a la venta".

Como colofón de la hipocresía de la multinacional Landis & Gyr al redactar y distribuir entre todos sus empleados la **Directiva sobre la ética en el negocio**, baste decir que Félix Rivas Perales y el testigo falso Luis Castro Anaya, los dos directivos que representaban a Landis & Gyr Española en el grupo clandestino Contact, fueron ascendidos y se jubilaron en la empresa, y yo, que me negué a incumplir la citada Directiva, fui, primero, acosado laboralmente de forma salvaje para que abandonara la empresa, y, por último, ante el fracaso de dicho acoso, despedido mediante una denuncia falsa.

9.3.- La *famiglia* Contact
El grupo Contact no sólo imponía sus acuerdos a los fabricantes que lo integraban (Landis & Gyr, Siemens, Schlumberger, AEG y MEtrega) sino también a los que no formaban parte de dicho grupo. Un claro ejemplo de este proceder mafioso es lo sucedido a Romanillos Industrias Eléctricas (RIESA), una empresa familiar de León que se negó a aceptar la cuota de mercado que le asignó el grupo Contact y continuó actuando de acuerdo con las reglas de la libre competencia.
Como consecuencia de la negativa a aceptar la cuota de mercado asignada por el grupo Contact, RIESA sufrió la visita de un representante de dicho grupo, teniendo lugar una escena que recuerda a aquella de **El Padrino** en la que el *consigliere* de Vito Corleone, Tom Hagen, visita al productor cinematográfico Woltz y le advierte: *"Usted va a tener problemas y mi cliente podría hacerlos desaparecer*". La advertencia hecha a RIESA por el representante de Contac, quien según mis noticias ocupó después un alto cargo en la Consejería de Economía de la Generalitat de Cataluña, quedó reflejada en el **punto 1 del acta del consejo de administración** celebrado por RIESA el 19.02.1988:

*"Informe sobre la situación de la cartera de pedidos: El Presidente [D. Arturo Puerta Matachana] facilita la situación de la cartera con las existencias anteriores, los nuevos pedidos, la facturación del período, para determinar el saldo pendiente. Informa también sobre la entrevista mantenida con el representante de **Metrega**, que lamenta, trasladando el sentir de los demás fabricantes, nuestra penetración en el mercado por encima de las posibilidades que ellos consideran deberíamos tener, y nos aconsejan que en lo posible reduzcamos tan elevada participación en los suministros elevando en lo posible los precios, que ellos consideran muy por debajo de la competencia"*



ACTA

En la ciudad de León siendo las 12 horas del día 19 de Febrero de 1988, reunidos los miembros del Consejo de Administración de Romanillos Industrias Eléctricas, S.A., convocados al efecto, bajo la presidencia de D. Arturo [illegible], actuando de Secretario D. Fernando [illegible] Vidal [illegible], se pasa a debatir los puntos del ORDEN DEL DIA.

PUNTO 1º - Informe sobre la situación de la cartera de pedidos

El Presidente facilita la situación de la cartera con las existencias anteriores, los nuevos pedidos, la facturación del período, para determinar el saldo pendiente.

Informa también sobre la entrevista mantenida con el representante de [illegible] que lamenta, trasladando el sentir de los demás fabricantes, nuestra penetración en el mercado por encima de las posibilidades que ellos consideran deberíamos tener y nos aconsejan que en lo posible reduzcamos tan elevada participación en los suministros elevando en lo posible los precios que ellos consideran muy por debajo de la competencia.

La decisión de RIESA de no aceptar el *consejo* del grupo Contact de elevar los precios para reducir su cuota de mercado tuvo consecuencias trágicas tanto para la citada empresa como para la familia Romanillos, estando entre aquéllas las expuestas al semanario Interviú por Juan José Romanillos, vicepresidente de RIESA.
La eliminación de RIESA en represalia por negarse a aceptar la cuota de mercado impuesta por el grupo Contact y mi despido de Landis & Gyr Española mediante una denuncia falsa en represalia por negarme a participar en dicho grupo demuestran que el grupo Contact actúa como una auténtica *famiglia* mafiosa contra quienes no aceptan sus consejos.

9.4.- La traición, al descubierto en *El País*

Las compañías eléctricas se enteraron el 21.11.1995 de que los fabricantes integrados en el grupo Contact, que dichas compañías creían unos colaboradores leales, les estaban traicionando desde 1984 aplicándoles unos incrementos artificiales de precios previamente consensuados, sin tener en cuenta ni los estrechos vínculos existentes entre ambas partes ni la dependencia económica de dichos fabricantes respecto de las compañías eléctricas, ya que entre el 85% y el 93% de su producción era comprado por éstas.

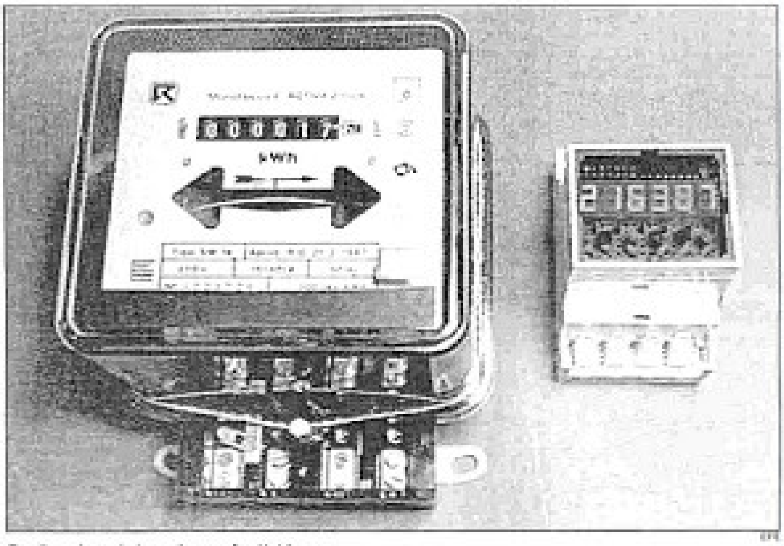
Las compañías eléctricas tuvieron conocimiento de la traición de una forma humillante para ellas, pues la información no les llegó a través de una canal reservado sino de una noticia publicada en el diario de mayor difusión de España, concretamente, de la noticia Los fabricantes de contadores presionan a las eléctricas por un contrato de casi 20.000 millones, en la que El País informaba de que en una reunión celebrada en la sede de FECSA (Barcelona), cinco fabricantes habían presionado **(6)** a las compañías eléctricas para que éstas adquiriesen en España y no en la UE los entre 1.5 y 3 millones de nuevos contadores que serían necesarios para sustituir a los que debían ser retirados tras la entrada en vigor de la Orden **(7)** que el Ministerio de Industria tenía previsto aprobar en la primavera de 1996.

Una orden ministerial obligará a sustituir los aparatos con más de 30 o 35 años de servicio

Los fabricantes de contadores presionan a las eléctricas por un contrato de casi 20.000 millones

JUAN MÉNDEZ, **Sevilla**

Un grupo de fabricantes de contadores eléctricos se han movilizado para que la renovación inmediata del parque de medidores de consumo no salga de España y presionan a las empresas eléctricas para conseguir todo o parte del nuevo mercado de contadores. La decisión de Transportes de renovar los contadores más antiguos ha abierto la pugna entre los fabricantes españoles y las eléctricas, plasmadas en una reunión conjunta y en una carta, enviada por las empresas de equipo eléctrico a Unesa en la que instan a la asociación eléctrica a que la renovación de contadores —un mínimo de 1,5 millones y un máximo de tres millones— sea para ellos. El negocio puede ser de 20.000 millones.



Dos tipos de contadores de energía eléctrica.

Los fabricantes españoles de contadores eléctricos presionan a las compañías eléctricas para que el negocio de la próxima renovación del parque nacional de contadores de consumo eléctrico quede, en todo o en parte, en sus manos. Un acuerdo en ese sentido supondría prácticas contra la competencia, prohibidas taxativamente en la UE. El Centro Español de Metrología (CEM), del Ministerio de Obras Públicas, ha decidido declarar "no aptos para la medida" a los contadores eléctricos que cumplan entre 30 y 35 años de servicio. Para renovar dichos contadores, el ministerio promulgará la próxima primavera una orden ministerial que procurará un mercado de entre 1,5 y tres millones de contadores, equivalente a un negocio de entre 10.000 y 20.000 millones.

Un grupo de empresas españolas de equipo eléctrico han iniciado diversos métodos de presión para que las compañías eléctricas seleccionen contadores fabricados por el grupo. En una primera aproximación, fabricantes y eléctricas se reunieron el pasado día 30 de octubre para tratar sobre las repercusiones que tendrá la citada normativa y el tiempo de ejecución de la renovación del parque de contadores.

Mercado en juego

A la cita, celebrada en la sede de Fecsa en Barcelona, acudieron, además de los representantes de esta compañía, los de Iberdrola, Hidruña y Enher. Por parte de los fabricantes estuvieron Landis & Gyr Española, AEG Ibérica de Electricidad, Siemens, Schlumberger Industries y Metrega, junto al director de Sercobe (patronal de bienes de equipo), Gustavo Eisenberg. Los fabricantes temen perder el negocio por la competencia europea (la mayor parte de los fabricantes, no obstante, son multinacionales).

Existen 19,5 millones de contadores, de los que 1,5 tienen más de 35 años, según Unesa. Los fabricantes aseguran que la renovación puede llegar a tres millones si la orden ministerial obliga a los que tienen más de 30 años. Es posible, asimismo, que la orden determine un cambio periódico de contadores que ahora no existe.

En la reunión se analizaron los criterios de actuación de ambos sectores ante la futura Orden Ministerial del MOPTMA. El portavoz de las compañías eléctricas expuso la intención de su sector de acudir al mercado de la UE en busca de la mejor oferta homologada. Los fabricantes exigieron el compromiso de que de la operación *renove* sólo beneficiaría al sector español. Los contadores (monofásicos y trifásicos) son comprados por las eléctricas a precios de 5.000 pesetas (los monofásicos) y cerca de 15.000 (los trifásicos), que luego los alquilan a los usuarios a un precio regulado por ley.

Fuentes del sector de fabricantes confirmaron a EL PAÍS el contenido de la reunión, así como que las posturas de su asociación distaban de los planteamientos de las eléctricas en cuanto a plazos de la renovación del parque. Fernando Álvarez Morales, representante de Siemens en el encuentro de Barcelona, confirmó que fabricantes y eléctricas mantuvieron "posturas enfrentadas" sobre los plazos de la renovación, si bien negó que por parte de los fabricantes se planteara a las eléctricas como exigencia la adquisición de los nuevos contadores en el mercado español.

Álvarez Morales indicó, no obstante, que entre los fabricantes "está siempre en el aire el temor de que los contadores se traigan de fuera, como ya hace alguna compañía", y se quejó de la competencia exterior "que en ocasiones ofrece precios que no cubren ni el coste de los materiales". Descartó que se obtuviera un acuerdo para repartirse la demanda.

El segundo método de presión fue una carta enviada por el mismo grupo de empresas, a través de la patronal de bienes de equipo Sercobe a Unesa en la que pedía a la asociación eléctrica que la renovación del parque de contadores se planificara contando con los fabricantes.

Los tribunales investigan el presunto 'lobby del contador'

J. M., **Sevilla**

Desde hace casi un año existe en los tribunales de justicia una denuncia sobre la supuesta existencia de un denominado Grupo Contac, una especie de *lobby* integrado por cinco empresas nacionales fabricantes de contadores eléctricos. El caso está, en el Tribunal Supremo quien, a requerimiento del juez de Instrucción número 20 de Sevilla, Juan Antonio Calle Peña, deberá dilucidar si la investigación de un presunto delito de maquinación para alterar el precio de las cosas corresponde al juzgado sevillano o bien a Baltasar Garzón, titular del Juzgado Central de Instrucción número 5 de la Audiencia Nacional, a quien se elevó la causa desde Sevilla.

El origen de estas diligencias penales es una denuncia por hurto presentada por la compañía Landis & Gyr SA contra el ingeniero sevillano Antonio Moreno Alfaro, responsable de contadores clase 2 y asistencia de control de distribución de la citada empresa. Moreno Alfaro, al conocer que la empresa pretendía su despido por hechos inciertos, se apropió de una carpeta con la indicación Contac y denunció las irregularidades que había detectado en la actuación de este grupo de empresas, en las que se negó a participar y que, en su opinión, son el motivo real de su despido. A raíz de esta denuncia por hurto, archivada por la Audiencia de Sevilla a favor del empleado, el juzgado inició las actuales diligencias penales "por maquinación para alterar el precio de las cosas contra el director comercial de Landis & Gyr, Félix Rivas Perales y otros".

En las diligencias consta una declaración ante el Grupo de Delitos Económicos de la Policía Judicial de Sevilla, en la que Moreno Alfaro asegura la existencia el citado Grupo Contac, integrado por las compañías Landis & Gyr, Siemens, AEG Ibérica, Schlumberger Industries y Metrega. La denuncia relata el presunto modo de operar de este grupo de fabricantes, que una vez conocida la demanda real de elementos watimétricos, se la reparte por cuotas y mantiene reuniones periódicas para demostrar su cumplimiento.

Dos representantes de las compañías Landis & Gyr y Siemens admitieron que Contac existió en época de la dictadura y que ahora, si bien no existe como tal, los representantes de las empresas siguen reuniéndose. Ambos aseguraron que el anterior régimen, por diversos motivos entre ellos la producción de cobre, funcionó el Grupo Contac para fijar los precios en el sector de bienes de equipo eléctricos, pero se disolvió en 1970.

(6) La presión consistió en amenazar con hacer público que los precios de alquiler de los contadores eran muy superiores a los máximos autorizados en la póliza de abono aprobada el 18.07.1995.

(7) La Orden iba, por fin, a regular el control metrológico del Estado sobre los contadores electromecánicos, los cuales, a pesar de que comenzaron a ser instalados hacia 1880, en 1995 aún no contaban con dicha regulación ni, por tanto, con ninguna norma que estableciera la vida útil máxima de dichos contadores, ni el plazo de validez de la verificación primitiva (la efectuada por el fabricante antes de vender el contador), ni las condiciones en las que debía realizarse la verificación periódica, ni el plazo de validez de ésta. A día de hoy, 22.09.2008, en que han pasado 128 años desde que los primeros contadores entraron en servicio y 12 años desde que El País informó de que el Ministerio de Industria tenía previsto publicar dicha Orden en la primavera de 1996, la Orden aún no ha sido publicada, lo cual permite a las compañías eléctricas incrementar diariamente en 600.000 euros los más de 7.500 millones de euros que llevan cobrados ilegalmente desde 1984 por un servicio ("la adecuada renovación y actualización" de sus parques de contadores) que no dan porque no existe ninguna normativa oficial que defina en qué consiste dicho servicio. Si desea más información sobre este asunto, que es uno de los muchos que ponen de manifiesto el vergonzoso y humillante servilismo del Gobierno hacia las citadas compañías y la total indefensión de los clientes de éstas, pulse aquí

La traición queda al descubierto en la segunda parte de la noticia, titulada *"Los tribunales investigan el presunto lobby del contador"*, en la cual *El País* saca a la luz pública al grupo Contact e informa sobre la forma de operar de éste:

> *"La denuncia [de Antonio Moreno Alfaro] relata el presunto modo de operar de este grupo de fabricantes [Landis & Gyr, Siemens, AEG Ibérica, Schlumberger Industries y Metrega], que una vez conocida la demanda de elementos watimétricos, se la reparte por cuotas y mantiene reuniones periódicas para demostrar su cumplimiento"*

EL PAÍS, jueves 23 de noviembre de 1995

Los consumidores, a través de la tarifa de la luz, pagarán la sustitución de los medidores

Industria quiere reconsiderar la propuesta de renovación masiva de contadores eléctricos

EL PAÍS, Madrid
El Ministerio de Industria está dispuesto a intervenir en el *conflicto de los contadores*, suscitado por la intención del Centro Nacional de Metrología, del Ministerio de Transportes, de renovar los contadores eléctricos con más de 35 años. Industria entiende que la pretensión se Transportes debe ser considerada de nuevo, en función de que el coste del contador repercute sobre la tarifa eléctrica que paga el usuario de electricidad, puesto que el coste de la renovación, casi 20.000 millones, requiere garantías de que los nuevos aparatos funcionarán durante al menos tres décadas.

La Secretaría General de la Energía, quiere intervenir en el llamado *conflicto de los contadores eléctricos*, suscitado por el deseo del Ministerio de Transportes de renovar los medidores de consumo eléctrico con más de 30 o 35 años de servicio. Esta decisión, avalada por el Centro Nacional de Metrología, se plasmará en una Orden Ministerial que Transportes quiere aprobar el año próximo y abre un mercado de entre 1,5 y 3 millones de contaderos, equivalente a un negocio para los fabricantes de casi 20.000 millones.

Industria, según las fuentes consultadas, entiende que la decisión debe revisarse en función principalmente de cuestiones tecnológicas y que puede ser ese departamento el que redacte la orden. "Está por ver que en el futuro más inmediato el sistema de medida del consumo eléctrico sea el contador. Algunas compañías eléctricas, por ejemplo, están ya en disposición de conocer la electricidad que venden a consumidores domésticos o industriales sin recurrir al contador".

El coste de la renovación de un parque tan amplio, en opinión del departamento, justifica que se reconsidere el proyecto, "porque es una oportunidad que no debe repetirse en los próximos 20 o 30 años. La decisión es pues muy delicada y no hay por qué precipitar una decisión que paga, y mucho, el consumidor".

Así, no debe desecharse la posibilidad de que los contadores, finalmente, no sean renovados. Si, por el contrario, se llegara a la conclusión de que es necesario cambiar casi tres millones de contadores, Industria entiende que, precisamente por la oportunidad única que supone la renovación, el gobierno debe dictar las especificaciones técnicas que garanticen la durabilidad de los aparatos.

La intervención de Industria proporciona un nuevo ángulo en este asunto. Un grupo de fabricantes de este tipo de medidores, asociados en un grupo llamado Contac, habría presionado a las compañías eléctricas, en reunión con las empresas y en carta a la patronal Unesa, para obtener, en la futura renovación de los contadores propuesta por Transportes, todo o parte del negocio de sustitución.

La reacción de los fabricantes al verse descubiertos es inmediata. Ese mismo dia, el director del Sercobe (patronal de los fabricantes de bienes de equipo), Gustavo Eisenberg (recuerde este nombre) se pone en contacto con el vicepresidente de UNESA (patronal de las grandes compañías eléctricas), Pedro Rivero Torre, y solicita ser recibido junto con los cinco fabricantes nombrados en la noticia. La reunión se celebra dos días después, es decir, el 23.11.1995, día en el que, curiosamente, *El País* publica una nueva noticia relacionada con la sustitución masiva de contadores eléctricos.
De lo tratado en dicha reunión queda constancia gracias a un documento confidencial requisado por inspectores de la Comisión Europea durante los registros efectuados los días 12 y 13 de mayo de 1998 en las sedes de *Landis & Gyr Española* (Sevilla), Siemens (madrid) y Schlumberger (Barcelona).
En la página 4 de dicho documento confidencial, titulado *Notas de la reunión de 23.11.1995 de los fabricantes de contadores con UNESA*, el autor del mismo, Gustavo Eisenberg, hace las siguientes afirmaciones respecto a las noticias publicadas el 21.11.1995 y el 23.11.1995, día de la reunión:

> *"En 1.984 se dictó una disposición por el Ministerio de Industria y Energía autorizando el cobro mensual al consumidor del 1.25% del precio del contador.*
> ***Este factor se aplica sobre los precios de lista, cuando debería hacerse sobre los reales, los cuales son inferiores en un 50% o más.***
> *Si este asunto saliera a la luz pública, podría producirse un escándalo de imprevisibles consecuencias para todos.*
> *El Sr. Rivero [Pedro Rivero Torre] conoce bien este problema"*

Estas afirmaciones de Gustavo Eisenberg, hechas en nombre de los cinco fabricantes presentes en la reunión y de forma totalmente voluntaria (es decir, sin que existiera ningún tipo de coacción), hacen de las *Notas de la reunión de 23.11.1995* de los fabricantes de contadores con UNESA un documento excepcional, pues demuestran no

sólo que los fabricantes facilitaron conscientemente datos falsos al Ministerio de Industria, sino también que las compañías eléctricas, máximas beneficiarias de la estafa, conocían dicha falsedad.

Para terminar esta entrega le diré tres cosas:

- El temor de Gustavo Eisenberg de que la estafa saliera a la luz pública se cumplió con creces, como demuestran, entre otros, los reportajes de Diario de Andalucía, Interviú, y Tiempo.

- A pesar de la existencia de pruebas documentales tan fehacientes e irrebatibles como las que le llevo mostradas, y las que le mostraré en las próximas entregas (entre ellas, el reconocimiento por el Gobierno de que el Boletín Oficial del Estado miente desde 1984), la estafa continúa cometiéndose (por ahora), debido a a total impunidad con la que, en la Administración de Justicia, actúan la ignorancia, la indolencia, la cobardía, el servilismo y la corrupción cuando los delincuentes forman parte de una poderosa mafia político-financiera y las víctimas son simples ciudadanos de a pie.

- En su Indice de Percepción de la Corrupción 2008, *Transparency International* relega a España del puesto 25 al 28 debido al aumento de la corrupción.

PRÓXIMA ENTREGA
En la próxima entrega, que tengo previsto publicar el 29.09.2008, le explicaré cómo cumplió el Gobierno en 1984 la función que tenía asignada para ejecutar la estafa planificada por el PSOE y las compañías eléctricas tras ser descubierto el fraude planificado en 1981 por éstas y UCD.
Muchas gracias por su atención.

Directiva de Etica en los negocios

El nombre correcto del documento adjunto es **Directiva sobre la ética en el negocio**

Adjunto les envío copia del documento de referencia que me envía la Dirección para su conocimiento. Si tienen alguna duda al respecto, les ruego me la consulten directamente.

Como debe de quedar constancia de la entrega de este documento, les ruego firmen este documento como conformidad de dicha entrega.

Saludos,

L. Castro

NOTA: La pertenencia de **Landis & Gyr Española** al **grupo clandestino Contact** infringe lo establecido en los párrafos subrayados en amarillo en el documento adjunto, emitido por la Dirección de la multinacional **Landis & Gyr** y titulado **"Directiva sobre la ética en el negocio"**

LANDIS & GYR

Directiva sobre la ética en el negocio

El objetivo de esta directiva es el de ofrecer direcciones a seguir en áreas de la actividad diaria del negocio, de donde podrían surgir posibles dudas sobre los valores éticos a respetar. Los empleados del Grupo Landis & Gyr en todo el mundo y en todas las empresas de Grupo deben mantener el más alto nivel de integridad para fortalecer nuestro rendimiento administrativo y mejorar nuestra imagen corporativa con cara a nuestros clientes y al público. Todo esto nos ayudará en nuestro fin de crear un valor excepcional para nuestros clientes (OCV).

1. Políticas y procedimientos contables

Cada Empresa de Grupo mantiene sus políticas y procedimientos contables de acuerdo con altos valores profesionales, incluyendo una serie de controles contables internos, los cuales los comunican el C.F.O mediante manuales contables y otros medios apropiados. Todo el personal debe cumplir estas políticas y procedimientos en todo momento.

No se permite contabilizar ningún dato falso o artificial por ningún motivo. Ninguna Empresa de Grupo debe tener fondos o activos que no se reflejen claramente en la contabilidad.

2. Comunicaciones e Información

Toda información transmitida fuera y dentro del Grupo debe ser honesta y basada en la realidad; no se tolerarán las distorsiones y el ocultar la información que conduzca a una imagen falsa del negocio.

La dirección debe estar informada en todo momento de todo asunto que pueda considerarse primordial para el negocio o de temas que puedan afectar la reputación del Grupo. Cada empleado debe responsabilizarse personalmente de informar a la Dirección cualquier información de este tipo.

Ningún empleado debe comunicar a cualquier persona ajena al Grupo, sin permiso previo, cualquier información que tenga valor para el Grupo o que podría ser contraria a los mejores intereses del Grupo en manos de alguien de fuera del mismo.

Ningún empleado debe utilizar o repartir información procedente de dentro de la empresa a la que no tenga acceso libre el público en general, con vistas a conseguirse beneficio personal, por ejemplo negociando con acciones de Landis & Gyr.

3. Pagos indebidos

La política de nuestro Grupo es la de no utilizar fondos o activos para fines inmorales o no éticos y no estar involucrado en la compra de privilegios o de beneficios especiales gracias al pago de sobornos etc. .

En ciertos paises, es normal y casi necesario efectuar pagos de poca monta para facilitar la expedición de una acción rutinaria (tal como la carga y descarga o la concertación de inspecciones relacionadas con el tránsito de la mercancía). Estos pagos no son inaceptables, pero tienen que reflejarse correctamente en la contabilidad consolidada de gestión del Grupo.

4. Nombramientos

Nombramientos o administradores son acuerdos mediante los cuales la persona nombrada o el administrador posee el título legal a una propiedad, o quien entra en un acuerdo para el bien de otra persona que quiera permanecer en el anonimato.

Estos acuerdos están prohibidos cuando se trata de esconder fines ilegales. Esto es por ejemplo el caso, y hay que tomar unas precauciones especiales, donde pueda pensarse que un acuerdo en particular se esté utilizando para el reciclaje de dinero ganado de manera ilegal. (El llamado "blanqueo de dinero")

5. Competencia

Nuestro Grupo respalda la política de la libre competencia y se ajusta a las leyes relativas a la misma en paises que posean economías de mercado libre y que hayan promulgado tales leyes.

El incumplimiento de las leyes sobre la libre competencia puede conllevar multas importantes para las empresas culpables. En algunos paises, las personas involucradas pueden encontrarse demandadas judicialmente.

Las principales áreas de preocupación son las prácticas o acuerdos que traten de alguna manera con:

- Acuerdos sobre precios o reparto de mercado con competidores;
- Restricciones sobre la fabricación;
- La imposición de restricciones sobre un cliente, por ejemplo con respecto al precio de reventa por éste, el mercado en el cual puede revender nuestros productos, o los productos que el puede o no puede tener a la venta;
- Discriminación entre clientes.

Prácticas restrictivas como las arriba mencionadas no tienen por qué estar incluidas en un acuerdo escrito para ser ilegales. Sin embargo, se encuentran a menudo en contratos con distribuidores, acuerdos de colaboración o especialización, o acuerdos de tipo "joint venture". Pueden también surgir de las actividades de asociaciones para el fomento del comercio. Por lo tanto, acuerdos o actividades de este tipo siempre deben ser investigados por personal del departamento jurídico para poder detectar cualquier posible restricción sobre la libre competencia.

Lo anteriormente expuesto no pretende ser exhaustivo, sino que presenta ciertos principios básicos que se elaborarán en una directiva específica sobre las restricciones en la libre competencia. La política del Grupo es la de respetar los mismos códigos sobre la conducta con respecto a la competencia en todos los paises de la OCDE, y nuestro objetivo es el de ampliar estas normas en un próximo futuro a otros paises con economías de mercado.

6. Conflictos de intereses

Todo empleado tiene la obligación de estar totalmente libre de influencias que puedan surgir por conflictos de intereses al representar a la Empresa por motivos de trabajo, o hacer cualquier recomendación que pueda influir en acciones llevadas a cabo por la Empresa.

De no recibir un permiso previo escrito por un miembro de la Junta Ejecutiva, ningún empleado puede directa o indirectamente:

- Ofrecer o aceptar cualquier pago, regalo, atención u otro favor más que simplemente simbólico a o de cualquier persona o entidad que haya entrado ya en negocio con la Empresa o que lo esté intentando;

- Beneficiarse a título personal de la compra o venta de mercancías o servicios por la Empresa, excepto mediante comisiones u otros beneficios ofrecidos por la Empresa en el transcurso normal del trabajo;

- Entrar en una transacción con una Empresa del Grupo o desviar una oportunidad comercial para beneficio personal;

- Ofrecer crédito de parte de una Empresa de Grupo a un cliente, donde el dinero generado se utilice para liquidar una deuda con él mismo o un miembro de su familia más inmediata;

- Mantener intereses de propietario en cualquier entidad que esté negociando con la Empresa o compitiendo con la misma, excepto con títulos de propiedad muy repartidos y siempre que éstos sumen un total de menos del 1% del total de títulos de la entidad;

- Servir como director, empleado o asesor para cualquier entidad o persona competidora o que quiera entrar en negocio con la Empresa;

- Utilizar cualquier información confidencial sobre la Empresa u obtenida de la Empresa para conseguir una ventaja personal injusta o indebida;

- Utilizar cualquier empleado, aparato o propiedad de la Empresa para cualquier asunto personal o cualquier asunto que no tenga que ver con el transcurso del negocio de la Empresa.

7. Impuestos

Nuestra política es:

- Tomar todas las medidas posibles para asegurarnos de que estemos cumpliendo con las leyes y normas fiscales en vigor en los distintos paises donde funcionamos, a la vez que cumpliendo con todos los requisitos puntualmente.
- Aprovechar las oportunidades legales para ahorrar impuestos y para la planificación fiscal, de tal manera que estas medidas no interfieran con la eficacia de las operaciones del negocio.
- Pedir ayuda a asesores fiscales profesionales para asegurar que cualquier estructura propuesta para mitigar impuestos sea legal y no pueda calificarse como fraude fiscal o evasión ilegal de impuestos.

Los C.F.O se responsabilizan de que esta política se lleve a cabo dentro de sus áreas de responsabilidad.

8. Derechos de aduana y de importación

Nuestra política es la de tomar todas las medidas razonables como para asegurarnos de que estemos cumpliendo con las normas sobre derechos aduaneros y de importación en cada país donde operemos.

Esto supone en particular que facturas entre Empresas de Grupo tienen que emitirse de conformidad con los acuerdos existentes, independientemente de la cantidad de derechos de aduana o de importación que haya que pagar.

Toda planificación sobre derechos aduaneros y de importación tiene que tener el respaldo de asesores profesionales.

El C.F.O de la Empresa importadora en cuestión es responsable para llevar a cabo esta política (En el caso de transacciones entre Empresas de Grupo, el C.F.O de los paises importadores/exportadores respectivos son igualmente responsables para llevar a cabo esta política).

9. Medio ambiente

Nuestra política es la de estar entre los más importantes en el paso hacia la sostenibilidad a largo plazo de nuestras actividades. Todo esfuerzo razonable tiene que hacerse para cumplir con la Política Corporativa sobre el Medio Ambiente.

10. Política sobre el Empleo

Nuestra política es:

- mantener un ambiente que fomente el desarrollo de las habilidades de los empleados, ejercer la creatividad y conseguir un rendimiento superior;
- mantener prácticas de trabajo basadas en la igualdad de oportunidades para todos los empleados;
- ofrecer condiciones de trabajo sanas y seguras, además de un ambiente de comunicación abierta para todos los empleados.
- Tomar las medidas oportunas como para cumplir con los objetivos y principios del concepto de la ECO EFICACIA.

11. Normas adicionales para ir sobre seguro

No crear transacciones que no tengan un fin empresarial verdadero.

No practicar en el negocio algo que no estaría a gusto explicando a sus hijos o empleados bajo su responsabilidad.

No imponer o aceptar objetivos que únicamente pueden conseguirse al comprometer las arriba mencionadas políticas.

Aplicación de la directiva

Cada jefe empleado por cualquier Empresa de Grupo es responsable del cumplimiento de las normas de conducta expuestas en esta directiva por parte de los empleados bajo su supervisión.

Cualquier empleado que tenga dudas sobre si una determinada acción pudiera considerarse como una violación de las normas, presentará esta cuestión al nivel apropiado de la dirección.

IMPLEMENTACION

1. Información

- La directiva se distribuirá a la Dirección General (nivel de dirección que informa a los miembros de la JE).
- JE y Dirección General son los responsables para la comunicación posterior al personal relevante y para su implementación en sus áreas respectivas de responsabilidad.

- La comunicación de la directiva incluirá una presentación para su explicación a la vez que para enfatizar el compromiso de la dirección.
- JE y Dirección General deberían estar dispuestos a responder a preguntas y asegurarse de que se abran diversos caminos para canalizar las preocupaciones que surjan y las peticiones de consejos.
- Los receptores de la directiva firmarán un documento confirmando que han leído y comprendido la directiva. Empleados nuevos firmarán este documento al incorporarse. Estos documentos se guardarán en el expediente personal de cada uno.

2. Revisión/Auditoría

- Una revisión general de la implementación de la directiva se incluirá en las auditorías internas y legales.
- Cualquier asunto preocupante será tratado en primera instancia con la persona directamente involucrada. Violaciones de las normas y asuntos que no puedan ser resueltos o corregidos pasarán al nivel superior.
- La denuncia de posibles violaciones será tratada de manera confidencial y no existirá la posibilidad de represalias contra un empleado por el hecho de haber dado parte.

3. Investigación formal

- Se llevarán a cabo investigaciones a fondo de supuestas violaciones.
- Un equipo interdisciplinario ad hoc será constituido en función del carácter de la supuesta violación.
- Se tomarán precauciones para asegurar un trato justo de los empleados.
- El resultado de la investigación será enviado a C-L para la toma de medidas adicionales.

4. Organización

- La responsabilidad primaria para su implementación queda en manos de los jefes directos.
- C-L se responsabiliza de la coordinación de cualquier acción adicional junto con los jefes directos y C-A o con otros departamentos, según los casos.

Índice de Percepción de la Corrupción 2008 de Transparency International

La Puntuación del IPC correspondiente a un país o territorio indica el grado de corrupción en el sector público, según la percepción de empresarios y analistas de país, entre 10 (percepción de ausencia de corrupción) y 0 (percepción de muy corrupto).

Ranking del país	País/Territorio	Puntuación del IPC 2008	Desviación estándar	Intervalos de confianza*	Encuestas utilizadas**
1	Dinamarca	9,3	0,2	9,1 - 9,4	6
1	Suecia	9,3	0,1	9,2 - 9,4	6

Transparency International encargó al Prof. Dr. J. Graf Lambsdorff de la Universidad de Passau la preparación de la tabla del IPC. Para obtener más información sobre los datos y la metodología, consulte las preguntas frecuentes y la metodología del IPC:

www.transparency.org/surveys/#cpi o www.icgg.org

Notas explicativas

*Intervalo de confianza: Proporciona un rango de valores posibles de la puntuación del IPC. Refleja la forma en que puede variar la puntuación de un país, según la precisión de las mediciones. En términos nominales, con un 5% de probabilidad, la puntuación se sitúa por encima de este rango, y con otro 5%, por debajo. Sin embargo, especialmente cuando sólo se dispone de unas pocas fuentes, una estimación imparcial de la probabilidad de cobertura media es inferior al valor nominal del 90%.
**Encuestas utilizadas: Hace referencia al número de encuestas que evaluaron el desempeño de un país. Se utilizaron 13 encuestas y evaluaciones de expertos, y se aplicó un requisito mínimo de 3 para que un país pudiera ser incluido en el IPC.

resulta que union fenosa sin saber nadie por que , me ha facturado 1 mes y 10 dias,cuando lo normal viene a ser 2 meses y 10 dias;mi sorpresa ha sido que sin calefaccion y sin aire acondicionado,la factura es de 176,79 y he pagado por 871Kw en tarifa diurna y a 0,138 un total de120,26;y en nocturna 251 Kw a 0,0542 por un total de 13,61. la anterior factura del 9 de junio al 19 de agosto consumi 960kw diurna a 0,127 por valor de 122,38 y nocturna 173Kw a 0,0518 por valor de 8,46;en total esta factura es de 187,09.Y en la de 7 de abril a 9 de junio he pagado 1204Kw diurna a 0,1022 por un importe de 123,14 y en nocturna 453Kw a 0,046 por valor de 21,01.He solicitado a union fenosa que revise el contador por que con los mismos habitos no creo que se consuma lo mismo en 1 mes y diez dias que en 2 meses y diez dias.pues han venido han cambiado el reloj al nuevo horario y el contador han soltado un hilo y como el contador se para pues para ellos esta bien.llamando a union fenosa me dicen que si yo creo que esta mal ese contador que no hay ningun problema en mandarlo a industria y si industria dice que esta mal;union fenosa corre con todos los gastos pero si dice que esta bien seria yo el que pagase los 300 euros que vale la operacion.sigo sin estar conforme pero arriesgar a que la mafia de los contadores se halla instaurado tambien en industria y me digan que esta bien y perder 300 eurosme da un poco de acojone,ya que en una familia de 5 en la que solo entra un sueldo pues es de imaginar que no sobra para estos vicios.tambien leyendo las estimaciones de consumo que el gobierno da me parece que alguien miente descaradamente ya que el gobierno dice que una familia de 4 miembros consume al mes 375Kw en un piso de 90 metros.todas mis facturas son superiores a eso un 200% y en un piso de 75 metros.tendre algo mal.el otro dia traje del curro una pinza amperimetrica,y podia medir tranquilamente 42A cuando encendia las cuatro vitros la estufa de dos barras del baño una calefaccion de 1500W y algo mas,pero el icp que es de 25A no saltaba.preguntando a union fenosa que por que no me salta me contesto muy amablemente alicia martinez que eso me beneficiaba a mi ya que podia enchufar todo lo que quisiera y no me iba a saltar;a lo que le respondi que a mi no me beneficia en nada ya que la unica forma de ahorrar es que cuando me salta el icp se que tengo que quitar algo.tambien me dijo que si seguia pensando que el contador esta mal pues que llame a un electricista y si hay que repararlo que union fenosa se hace cargo.ya no se que mas escribir;estoy obsesionado con la luz.como dato dire que en mi casa es todo electrico,pero echando cuentas con otros compañeros,estoy pagando mas del doble que ellos y mi conserje me dice que es una burrada ya que el paga entre luz y gas cada 2 meses unos 120 euros,y los habitos son mas o menos los mismos.agradeceria una forma para tener que cambiar el contador por que de verdad se haya estropeado.gracias

EL CORTE INGLÉS: ESTA CASA ES UNA RUINA

Artículo publicado el 16 de setiembre, eliminado misteriosamente, y republicado el día de los Arcángeles

A Joseph y Bret, por los viejos tiempos

El Corte Inglés es un tendero de pies planos que, *en dehors* y *en dedans*, se empeña en ejecutar el *pas coupé, allongé, croisé*, el *pas de chat*, y *el pas couru,* para distraer al respetable de su irremediable ruina. Pagar propaganda en la prensa española para asegurarse el silencio es, como ya dije en su momento, comprar saldos a precio de alta costura.
Los directivos de *El Corte Inglés*, que nunca debieron abandonar el horizonte financiero de la zapatilla de felpa y el calzón Terylene, se metieron a especular en inversiones de alto riesgo que, no sabiendo idiomas y oliendo aún a Mesón Mingo, se han convertido en suicidas. A fecha de hoy los beneficios del holding no sirven ni para pagar un 20% de los préstamos que se han visto obligados a pedir a la banca en los últimos tres años. El Ebitda, muy inferior a un 10%, revela a cualquier analista que la empresa está en un grado de apalancamiento operativo cercano al *rigor mortis*. Lo que los periodistas lameculos anuncian como *"expansión de El Corte Inglés"*, *"resistencia a la crisis",* etc., significa que la empresa ha llegado a un punto donde no puede aumentar las ventas sin tener que aumentar gastos en nuevos locales, en estructura de personal y otros costes de empresa.
No hay forma de tapar los últimos resultados de Hipercor arguyendo que se han comprado más carritos de la compra y estanterías para latas de tomate. El patinazo inmobiliario de estos figuras de inversores, que empezaron el negocio cuando los listos ya estaban echando a correr es de nota. Por poner un ejemplo, el edificio Windsor hoy no lo compra nadie y, nominalmente, su valoración ha descendido casi un 25%. Y el aterrizaje en los créditos al consumo también ha sido un *grand battement* con riesgo de dejarse *la gueule cassée sur le trottoir* (lo que, en términos científicos, se llama "partirse los morros") si tenemos en cuenta que los juzgados de media España estan hoy atestados con impagados a *El Corte Inglés*, y que los costes y tiempo de resolución

de pleitos hacen de la operación de cobro un desatino económico...
Yo no sé si estos lilas son gafes y llevan el mal fario a quien se arriman. Han conseguido que Inversis (otra de sus pirouettes argentíferas) sea el peor banco *on line* de Europa, que hablar allí de beneficios sea una broma de mal gusto, y que sus analistas fallen más en sus predicciones que una pitonisa de feria. Los socios y cuates de negocios de Isidoro Manosdeoro son siempre arruinados de solemnidad: Caja Madrid está por vender las baterías de cocina y los albornoces que otrora regalaban . Si piensa que el Gobierno de Zapatero le va a pagar los negocietes que ha montado, va listo. Que se conforme con que Miguel Sebastian lo premie, en su lista para la crisis, como el vendedor de pollos y chicharros más barato de la patria. Una salida airosa, un taparse las vergüenzas, puede ser que sea repetir la *ecartée* que ya ha tenido que hacer para encubrir otra gotera en sus ruinosas inversiones.
La operación financiera con la cadena norteamericana Gottschalks, a través de Harris, consistente en cobrar una deuda aceptando acciones de una compañía ruinosa y, a la hora de reclamar beneficios, enterarse que la joya de empresa californiana ha perdido el 70% de su valoración, es digna de tesis. No entienden inglés ni saben lo que firman. Menos mal que ahí salen los chupatintas periodistas patrios anunciando:*"El Corte Inglés prolonga su inversión en Gottschalks"*. Es una pena que Lehman Brothers no haya tenido clientes tan pertinaces.
Los sucesores de Pepín Fernández, y José María Ruiz Mateos usaron la misma táctica de dispersión, expansión y profusión para tapar el agujero de Galerías Preciados, y las cuentas de Rumasa. Mario Conde, antes de entrar en la cárcel de Soto, presumía de tener en el puño al Gobierno y a la Casa Real. También PRISA pareció un imperio antes de demoronarse. Los socios Areces de El Corte Inglés ya han olfateado el pestazo a cadaverina.
Me malicio que veremos cabezas cortadas. El Psoe siempre ha borboneado con los perdedores, incluso con los recomendados. *El Corte Inglés* no está en Bolsa; pero los bancos que le concedieron créditos al tun tun, sí.

El espía que surgió del frío

P.S.
16 setiembre 2008. Últimas noticias:

-*Futura*: suspensión de pagos. Otra operación de morrazo económico de El Corte Inglés.
-Vamos a ver cuánto tarda en salir el asunto de los acuerdos con *Lease Plan Go*, conocida en los malvados círculos económicos como *leave and go.*
-¿Le han pagado los de *Acciona* los cheques regalo o también van a cobrar en acciones?
Ni disfrazándose de Cobrador del Frac...

Autor: Facua denuncia a El Corte Inglés y a Euro 6000

FACUA-Consumidores en Acción ha denunciado a Euro 6000 y al grupo El Corte Inglés por prometer falsos descuentos del diez por ciento en las compras realizadas con tarjetas de la citada red entre el 21 de noviembre y el 7 de enero a quienes se den de alta en la promoción Privilegios Euro 6000. "Apúntate y te damos un 10% en el grupo El Corte Inglés", aseguran los anuncios, si bien FACUA advierte de que en realidad la promoción se reduce a la devolución de 15 euros a los consumidores que gasten al menos 300 en el citado periodo, con lo que el porcentaje de descuento se reduce al 5%, además de estar condicionado a un gasto mínimo y tener un tope. Según Facua, a través de una "enrevesada explicación" las condiciones de la promoción descuento 10% en El Corte Inglés de Euro 6000, publicadas en la página web de esta empresa, indican que "los premios de esa promoción consisten en la devolución de un 10% sobre los 150 primeros euros de gasto" y sólo podrán beneficiarse quienes hayan realizado "pago con su tarjeta Euro 6000 por valor de al menos 300 euros".

EL GAFE INGLÉS: TRAPISONDAS Y TRAPÌCHEOS (1)

"La maldad sería tolerable si se materializase con algo de inteligencia" (Refrán galés)

Giovanni Falcone, con la presbicia típica del hombre latino, decía que los mafiosos eran *"hombres de honor"*. La observación es una melonada de calibre mayor. A lo más que puede aspirar un mafioso es a una truculencia cerril y untuosa, propia de la maldita tierra que los vio nacer.
En España, mafiosos o no mafiosos, lo que prima son los botarates, farfantones, verbosos, serviles y lameculos, según la clase y patrimonio que los alberga. Pero, ante todo, el español es cursi. Su vida transcurre en un ridículo intento de ser lo que no puede alcanzar. Los presidentes de gobierno insisten en parlar *frañol* y *spanglish*, aprovechándose y abusando de las leyes de la hospitalidad internacional, los tenderos se encerrizan en la especulación de alto riesgo y aún llevan el lápiz en la oreja y la ceja continúa de contar duros y reales. Pero quienes alcanzan las cimas más altas de la cursilería son los periodistas, que nunca deberían haber pasado de redactar esquelas locales y ditirambos a la reina de las fiestas, *la distinguida y bellísima señorita María Consuelo Gómez de la Corneja, hija del conocido industrial don Ignacio Gómez, dueño de Saldos Gómez, c/ Mayor , 5.*..
Yo no sé cómo la tropa de *agradaores* y palmeros de *El Corte Inglés* va a cambiar el paso cuando tenga que explicar el morrazo financiero de "*el emporio español". *De victoria en victoria hasta la derrota final. Veamos el último jaque mate y diez de monte con el que el ilustre indígena borondesano Isidoro Álvarez ha deslumbrado al mundo de las finanzas: Caso *Gottschalks*: o de como la fabada asturiana intentóse amancebar con los perritos calientes:
En 1981 los águilas inversores de *El Corte Inglés* compran la cadena de almacenes *Harris Company,* de San Bernardino (California) (no confundir con *Harrod's* en Londres), empresa con problemas que, gracias a la pericia y gestión de Isidoro Álvarez y otro halcón del *entrepreneurial fabada group*, Jorge Pont, cae en la más absoluta ruina en 1997, con pérdidas de millones de dólares (*"ligeras perdidas"* en nuestra prensa económica).
Y, a partir de este momento viene lo mejor.
La cadena *Gottschalks* le compra *Harris* a El Corte Inglés, pero no le paga. Le da un 15% de acciones, lo hace primer accionista para que lo cuente en su pueblo, pero le

prohibe intervenir en la gestión de la empresa, fumar ni decir palabrotas. Ataditos y muy formales firman un acuerdo (*"carta de intenciones"* según el repollo retórico de turno) que es modelo en la historia de las prácticas de masoquismo y memez empresarial.
Los paisanos de Isidoro recogen la gesta con semejante sazón: *"Pero una de las grandes aspiraciones de Isidoro Álvarez fue hacerse con el mercado internacional. Y se decidió en 1997, cuando firmó una carta de intenciones con Gottschalks Inc. que se ha saldado con importantes beneficios."*
El decano de los pelotas dice en español : *"El Corte Inglés fusiona su filial estadounidense Harris con Gottschalks La entidad entra en la cadena y "solidifica" su presencia en EEUU"*

A partir de aquí hasta la fecha, *El Corte Inglés* no es que no cobre ni un dolar. Es que apoquina dinero cada vez que *Gottschalks* necesita reponerse de los descalabros en bolsa. En 2003, un año antes de que se cumpliera el plazo de cobro (en ajos) de la operación del 97, Isidoro Álvarez y Jorge Pont vuelven desembolsar pasta (siguen sin poder decir ni mú sobre la gestión) con la astuta estrategia de que, si no le das dinero a tus deudores, no te van a poder pagar.
Esto queda recogido por *El País*, y queda con una puntilla y una picunela que da gloria leerlo: *"(Gottschalks) acometió entonces un plan de choque (con el apoyo financiero de El Corte Inglés, que le prorrogó la financiación) y pareció encontrar el camino de la rentabilidad".* Da igual. En 2004 tampoco cobran, en espera de hacer la jugada bursátil del año. En el año 2007, desde agosto, los titulares, en la prensa americana sobre el desastre de Gottschalks se caen uno encima de otro:
Una ligera ojeada a este resumen de prensa nos permite ver que Gottschalks, ante la ruina que se le avecina, elige la misma táctica que sus socios españoles: expansión de negocios pidiendo créditos.
Y en 2008, Álvarez y Pont, ante la imposibilidad de cobrar, toman una drástica decisión: se aguantan con lo que hay. *Y si te sofocas, tómalo con seltz.* Menos mal que, en su pueblo no se entera nadie y menos los comentaristas y chupatintas de la prensa económica que pían gozosos: *"El Corte Ingles prolonga su inversión en Gottschalks"* o *"mantiene"* o *"continúa"* . Esto del triunfo de *El Corte Inglés* en Estados Unidos, ilustrado con la jeta del magnate borondesano, se ha hecho una leyenda urbana con más raigambre que la de "chica de la curva".
"El grupo español prevé seguir en el accionariado de Gottschalks, cadena estadounidense de grandes almacenes que factura 465 millones de euros. En su opinión, su presencia está justificada porque le permite acercarse de primera mano a un mercado muy competitivo"
Pues bien, Gottschalks se ha estrellado definitivamente y ha empezado a vender a saldo el negocio a una empresa china: Everbright Development Overseas Ltd. De todas estas negociaciones (que empezaron en febrero) El Corte Inglés ni coscarse.
¿Y Jorge Pont? ¿Se ha enterado ese águila de las finanzas? Un día les contaré una broma muy graciosa que se llamó *Inversiones Marco Polo*. Y lo de *Inversis*, que también tiene su guasa.

Asentado ya el hecho de que su fijación obsesiva por la rentabilidad empresarial de El Corte Inglés no obedece a causa alguna concreta, y como la veo realmente puesta en temas de análisis financiero, ¿qué no nos ilustraría sobre la situación económica actual y las medidas políticas que debería adoptar el Gobierno para salir de esta "desaceleración con síntomas preocupantes de estancamiento" -que no "crisis"-?

Autor: Gottschalks se acoge a concurso de acreedores

GOTTSCHALKS NO ENCUENTRA COMPRADOR
Última actualización 15/01/2009@07:41:45 GMT+1
La situación económica de la cadena californiana Gottschalks, participada en un 15,7% por la española El Corte Inglés, ha forzado su suspensión de pagos. La cadena sigue buscando comprador.
Después de fracasar el acuerdo para que el fondo de inversión chino Everbright Development Overseas se hiciera con la mayoría del capital, la cadena minorista se ha visto forzada a acogerse al Capítulo 11 del Código de Bancarrota estadounidense, equivalente al concurso de acreedores español.

Gottschalks seguirá operando hasta que encuentre un comprador, para ello ha suscrito un préstamo de 125 millones de dólares (94,6 millones de euros) que le permitirá pagar salarios, a proveedores y gastos operativos.

El presidente y consejero delegado de la cadena, Jim Famalette, indica en un comunicado remitido ayer, 14 de enero, que la situación económica y la reducción de la capacidad de crédito de la compañía no han dejado más opción que buscar compradores.

[DEMOSTRACIÓN EMPÍRICA DE IKER JIMÉNEZ, EN CUARTO MILENIO, SOBRE LOS PODERES EXTRASENSORIALES](#)

Estefanía, *que "tiene cierta sensibilidad"* -como muy bien se verá-, colaboradora de Iker Jiménez en *"Cuarto Milenio",* se encamina hacia una cabina insonorizada, en la que, sensorialmente aislada, deberá apretar un botón cuando sienta una presencia amenazadora o sienta algo extraño.

Las cámaras recogen en riguroso directo el momento en que sale de la zona de aislamiento en camerinos, y entra en el estudio de grabación. Va vestida con una túnica negra, y un pantalón pirata, como para no provocar concuspicencia a los fieles seguidores del Ramadán, Se le ve mientras avanza, hasta entrar a la cabina -acompañada por David, otro colaborador del programa- momento en que su atuendo, milagrosamente, se ha convertido en una especie de camiseta sin mangas, que nos impide a los imaginativos espectadores creer que no lleva bragas blancas.

David, el caballero que le acompaña y le ayuda a instalarse también ha sufrido la transmutación de su chaqueta.

Que se discutan los poderes sobrenaturales de una posesión diabólica o de una psicofonía, vale, bueno, tira que te va; pero lo que, empiricamente, ha quedado demostrado es que al acompañante le han sustituido la chaqueta, y ella ha sido despojada de los pantalones mientras las cámaras graban *en directo*.

Es un milagro irrefutable. Pedimos la canonización de Iker Jiménez, y la beatificación de Estefanía. Pero ya.

Me hace mucha gracia la cantidad de Eruditos que hay en España y ésta siga en crisis.
1- Dejemos de lado que esa señorita vea o sienta cosas extranormales y que el programa sea o no en directo (que no lo es porque una semana antes se publican videos en cuatro con un adelanto del programa).
2- Que el autor del no se haga informado y percatado de que el programa NO es en directo.
3- Que la mayoría no somos expertos en televisión, equipos de grabación, etc.
4- Antes de ser críticos con la gente y mofarnos de ellos tenemos que ser críticos con nosotros mismos.
Resumiendo.
TODOS siguen vestidos Exactamente igual que como entraron en la cabina, por suerte o por desgracia la chica sigue con sus pantalones. Simplemente los estaba grabando una CÁMARA DE INFRAROJOS. Es más lo pone abajo escrito.
Autor del articulo documéntate, observa, evalua saca conclusiones en base a lo observado y reobservado varias veces y entonces publícalo.

Raul:
Gente seria y formal como usted es la que necesitamos en España.
Se le notan los 5 años preparando oposiciones a notaría en la pensión de la señora Nuria.
A usted no lo engaña nadie. Y si le ponen repollo, sabe usted cuando es del día y cuando no.
Usted es un hombre prudente, astuto y taimado y descubre qué llevan las albondiguillas antes de que se las pongan en el plato.
Usted no será experto en televisión, porque no quiere.
Inteligencia no le falta.

Nos estamos planteando abrir una sección de óbitos y necrológicas en el Gatopardo y ofrecerle la dirección.

[TOMÁS DE IRIARTE. FÁBULAS LITERARIAS: LA AVUTARDA](#)

Fábula XV - La avutarda

(Muy ridículo papel hacen los plagiarios que escriben centones.)

De sus hijos la torpe avutarda,
el pesado volar conocía,
deseando sacar una cría
más ligera, aunque fuese bastarda.

A este fin muchos huevos robados
de alcotán, de jilguero y paloma,
de perdiz y de tórtola toma
y en su nido los guarda mezclados.

Largo tiempo se estuvo sobre ellos.
Y aunque hueros salieron bastantes
produjeron por fin los restantes
varias castas de pájaros bellos.

La avutarda mil aves convida
por lucirlo con cría tan nueva;
sus polluelos cada ave se lleva,
y hete aquí la avutarda lucida.

Los que andáis empollando obras de otros,
sacad, pues, a volar vuestra cría.
Ya dirá cada autor: «Esta es mía.»
Y veremos qué os queda a vosotros.

RAMÓN DURÓN RUIZ, NO ES EL FILÓSOFO DE GÜÉMEZ, SINO EL AUTOR DE UN PLAGIO

Don Ramón Durón Ruiz, responsable del *Instituto Tamaulipeco para la Educación de los Adultos* (ITEA), decidió un buen día recoger los frutos de un personaje mítico local, "El filósofo de Güémez", y como rascar y plagiar todo es empezar, le entró la afición a pasar por hombre de letras, por lo que decidió ir apropiándose para su propio disfrute de la obra de algunos otros, como la de Carmen Moreno Martín, la reina del decálogo, de "Ser rizomático": (blog dado de baja en 2010)

Y de la misma manera que a mí me ha dado por autodenominarme *"Eterna aspirante a Miss Camiseta Mojada"* y afrontar con desparpajo a quien quiera discutírmelo, don Ramón dijo no hace mucho que es un *plagiario, porque utiliza palabras del diccionario que no ha creado, sino que estaban ahí;* y, ya puesta la venda antes de la herida, cuando le llega a su pantalla de ordenador un escrito que le gusta, con ánimo diligente, lo selecciona, lo copia y lo pega, y añade su firma, y lo envía como artículo propio a varios periódicos.

Esos directores de periódicos, y los jefes de redacción, se limitan a restringir y controlar el número de caracteres que le llegan, porque, desengañémonos, antes entrará un camello en el reino de los cielos que un responsable de edición en el Club Mensa. Y eso de que podrían comprobar seleccionando cuatro o cinco párrafos, entrecomillarlos, y buscar en Google a ver si ha sido ya publicado, y por quien, es un sistema tan difícil para ellos como ponerle pegas a lo que les mande un capitoste del PRI o del PAN.

Y luego, como no hay más remedio que enmendar la plana, se publica un **Editorial**:

Lunes 22 de Septiembre del 2008

"HOYTamaulipas pide disculpas públicas por difundir trabajos indebidos La dirección

general de HOYTamaulipas, solicita públicamente una disculpa a Carmen Moreno Martín (Alias Hannah) por haber publicado en este espacio cibernético artículos del Sr. Ramón Durón Ruiz a través de la columna "El Filósofo de Güémez", donde ocupó ideas suyas y publicadas en un sitio de Internet.

Estos dos trabajos, reconocemos fueron publicados a través del Blog Serrizomatico (http://serrizomatico.blogia.com) propiedad de Carmen Moreno Martín.

Reconocemos que en HOYTamaulipas se difundieron los trabajos del Sr. Ramón Durón Ruiz, confiando en que todo estaba dentro del marco de la legalidad. Sencillamente actuamos de buena fe.

Establecemos que en HOYTamaulipas, portal número uno en información en internet en el Estado de Tamaulipas, somos un equipo que se consolida gracias al esfuerzo, dedicación y empeño y sobre todo amor a nuestro oficio de reporteros.

Este domingo 21 de septiembre, como nota principal destacamos que "Acusa española a Ramón Durón Ruiz 'El Filósofo de Güémez' por plagio", sin conocer que la autora del Blog Serrizomatico ya había enviado una queja y que en la madrugada de hoy lunes 22 de septiembre, nos volvió a escribir para mostrar su molestia por habernos prestado a publicar dos textos de ella, firmados por el Sr. Ramón Durón Ruiz. En sí, también desde ese día, HOYTamaulipas se deslinda de este articulista y sus trabajos fueron suspendidos.

En este mensaje nos exige la debida rectificación del plagiador y de los responsables de que se haya publicado.
En HOYTamaulipas aceptamos la culpa que nos corresponde y pedimos disculpas, pero no podemos responder por terceras personas.

Tenemos información que leímos dentro de su Blog, de lo cual establecimos en la nota principal de este domingo que el Sr. Ramón Durón Ruiz en una próxima colaboración rectificaría sobre su actuación y además expresa los motivos por el cual escribió dichos artículos con material de la autoría de la señora Carmen Moreno Martín, pero en HOYTamaulipas, insisto, no podemos responder por ello y de nuestra parte ofrecemos nuestras sinceras disculpas.
Establecemos que en HOYTamaulipas las puertas de nuestra empresa están abiertas para recibir colaboraciones de articulistas y editorialistas, que sin afán de lucro se les publican, pero ante todo se actúa de buena fe.

El que suscribe es el único responsable de la autorización de trabajos periodísticos y editoriales, así que es mi deber pedir disculpas a nombre de toda nuestra empresa.

De igual forma, le hago extensiva la invitación a la señora Carmen Moreno Martín, para que utilice nuestros espacios y dé a conocer sus trabajos.

Sin más por el momento, agradezco anticipadamente acepte nuestras disculpas por haber publicado trabajos de su autoría a través de la firma del Sr. Ramón Durón Ruiz.

Cordialmente

[Marco Antonio Esquivel Martínez, Director General de HOYTamaulipas]

Por cierto, nos consta que hay más de un medio escrito y hablado que se nutre de lo que gente como Carmen Moreno Martín, de "Ser Rizomático" escribe en Internet. No sería mala cosa que citaran la procedencia y la autoría, porque el día que nos levantemos bordes vamos a hacer la lista y no los va a salvar del ridículo ni la Virgen de Lourdes.

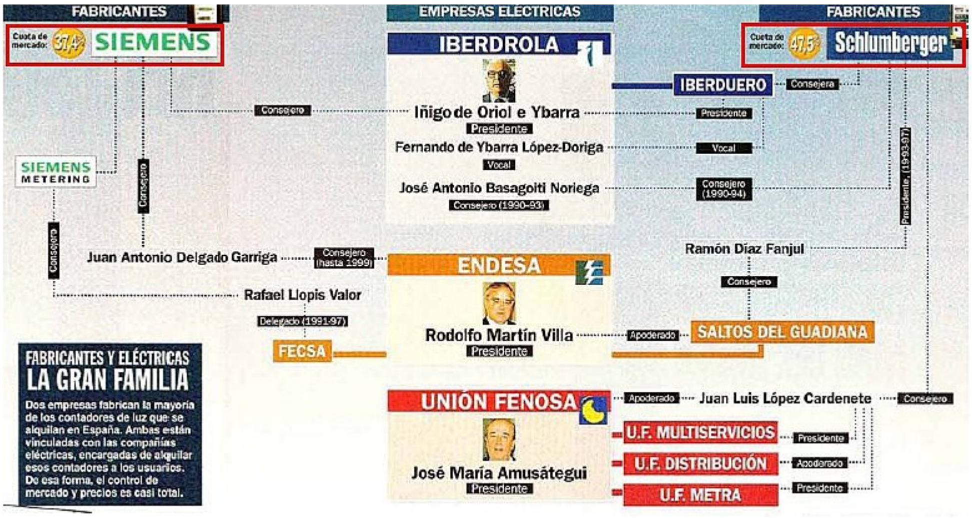
LA ESTAFA DE LOS CONTADORES DE LA LUZ, PASO A PASO: LOS FABRICANTES (1)



8.- LA ESTAFA, PASO A PASO: EJECUCIÓN/ FABRICANTES (I)

En este punto, que completaré en cuatro entregas, le explicaré cómo cada implicado cumplió las funciones que tenía asignadas en la ejecución de la estafa planificada por el PSOE y las compañías eléctricas tras ser descubierto el fraude planificado por éstas y UCD en 1981 (si desea más información sobre dicho fraude, pulse aquí).
La estafa continúa cometiéndose a pesar de haber sido reconocida por el Gobierno en escrito de 9.03.07 al Congreso y ser tan burda que ha sido detectada en 45 minutos por alumnos de primero de bachillerato de un Instituto de Sevilla con tan sólo dos de los cientos de documentos obrantes en la Audiencia Nacional.
La estafa genera actualmente más de 350.000 euros diarios, afecta a 23 millones de clientes de las compañías eléctricas y lleva reportados a éstas al menos la mitad de los más de 7.500 millones de euros cobrados ilegalmente por dicho alquiler (si desea saber por qué esos 7.500 millones de euros han sido cobrados ilegalmente, pulse aquí).
En el punto 7.3 le expuse que dos de las funciones más importantes del acuerdo adoptado por las compañías eléctricas y el PSOE para cometer la estafa en los precios de alquiler de los contadores de la luz correspondía ejecutarlas a los fabricantes, estrechamente vinculados con las citadas compañías y, además, dependientes económicamente de éstas, pues las compañías eléctricas compran al menos el 85% de los contadores vendidos en España.
En concreto, dichas funciones eran las siguientes:

> - Facilitar precios medios de mercado falsos al Ministerio de Industria. Dado que el Ministerio de Industria estaba (y está) obligado a fijar unos precios de alquiler que en ningún caso pueden ser superiores al 1.25% mensual del precio medio de mercado del contador, el objetivo de facilitar precios medios de mercado falsos al Ministerio de Industria era conseguir que los precios de alquiler publicados en el Boletín Oficial del Estado fueran muy superiores a los que habrían resultado si los precios medios de mercado hubieran sido los reales.

Para ejecutar coordinadamente estas dos funciones, los fabricantes de contadores

crearon el **grupo clandestino Contact.**

8.1. - El grupo clandestino Contact
Durante los cuatro años que trabajé en **Landis & Gyr Española** (1991/1994), el grupo clandestino Contact lo integraban uno o dos directivos de cada fabricante. El grupo se reunía periódicamente en las oficinas centrales del **Sercobe** (Asociación nacional de fabricantes de bienes de equipo), si la reunión era en Madrid, o en un hotel, si la reunión era en otra provincia (en Barcelona era el Hotel Calderón).

Con objeto de dar cobertura legal a dichas reuniones, los fabricantes acordaron el 22.03.1984 constituir el Grupo de fabricantes de contadores eléctricos, resultando propuesto como presidente **Félix Rivas Perales**, director comercial y de marketing de **Landis & Gyr Española.**

Como consta en mi declaración de 21.12.1994 en la Jefatura Superior de Policía de Sevilla, que publicaré próximamente junto con una entrega del apartado IMPLICADOS, los fabricantes que en esa época integraban el **grupo Contact** eran los mismos integrados en el Grupo de fabricantes de contadores eléctricos, es decir, **Landis & Gyr Española, Siemens, Schlumberger** (antes, Compañía de Contadores)**, AEG ibérica de electricidad** y **Metrega.**
El porcentaje del mercado español controlado por estos cinco fabricantes era el 87%, estando controlado el 13% restante por **Romanillos Industria Eléctrica (RIESA)**, con un 9.5%, y ABB, con un 3.5%.

El 07.11.1994, fecha en la que se produjo mi despido de Landis & Gyr Española mediante una denuncia falsa, en represalia por mi negativa a participar en el grupo Contact, los directivos que representaban a la citada empresa en dicho grupo eran los dos siguientes:

- **Félix Rivas Perales**, director comercial y de marketing, autor de la denuncia falsa
- **Luis Castro Anaya**, jefe del Servicio de Gestión y Soporte de Productos, testigo falso de Félix Rivas Perales en su citada denuncia. Luis Castro Anaya entró a formar parte del grupo Contact el 01.04.1994 en sustitución de José Medina Morales, jefe del Servicio de Ventas, jubilado el 31.03.1994.

Aunque originalmente las funciones del **grupo Contact** eran sólo facilitar datos falsos al Ministerio de Industria e imponer restricciones a los almacenistas distribuidores, el citado grupo se autoadjudicó una tercera función, de la cual las compañías eléctricas no tuvieron conocimiento hasta el 21.11.1995. Sobre esa tercera función, que fue una represalia de los fabricantes contra las citadas compañías, le informaré en la próxima

Doc. 14

ACTA DE LA REUNION PARA LA CONSTITUCION DE UNA SECCION DE FABRICANTES DE CONTADORES ELECTRICOS EN EL SENO DE LA AGRUPACION DE FABRICANTES DE MAQUINARIA ELECTRICA (A.F.M.E.).-

A S I S T E N T E S

E M P R E S A	R E P R E S E N T A N T E
A.E.G. IBERICA DE ELECTRICIDAD ..	D. Fernando Vilarrubi D. Antonio Guijarro
COMPAÑIA DE CONTADORES	D. Michel David D. Jorge Larrieu
LANDIS & GYR	D. Felix Ribas
METREGA	D. Alejandro Bosch
SERCOBE	D. Gustavo Eisenberg
SIEMENS	D. Manfred Vorwald

En Madrid, a las 10 horas 30 minutos del día 22 de Marzo de 1.984, se reunen las personas antes citadas actuando como Secretario el Sr. Eisenberg. Seguidamente se entra en el Orden del Día.

1.- <u>CONSTITUCION DE UN GRUPO DE FABRICANTES DE CONTADORES ELECTRICOS</u>

El Sr. Eisenberg explica que el Reglamento de Régimen Interior del AFME, prevé la formación de secciones con carácter específico en su Artículo 9 y como tales están constituidos las Secciones de Transformadores y Motores,

.../...

-2-

cada una con su propia estructura y órganos de Gobierno. Propone que tambien los fabricantes de contadores se integren como sección.

Todos los asistentes están de acuerdo, tomándose la decisión de constituir una Sección de Fabricantes de Contadores Eléctricos dentro de A.F.M.E., cuyo objetivo primordial será la justa defensa de los intereses de este Subsector.

A continuación se propone a D. Felix Ribas (LANDIS & GYR) como Presidente y a D. Alejandro Bosch (METREGA) como Vicepresidente de la -- Sección. Ambos aceptan la designación.

Como vocales de la Junta General de la Sección quedan:

- A.E.G. IBERICA DE ELECTRICIDAD
- COMPAÑIA DE CONTADORES
- SIEMENS

8.2.- Cumplimiento de las funciones asignadas
Según los documentos obrantes en los tribunales (sobre todo, en la Audiencia Nacional), los hechos se desarrollaron como sigue:

1. El 20.12.1983, la Dirección General de la Energía remite un escrito a los fabricantes solicitándoles "listas de precios y descuentos medios vigentes aplicados a mayoristas **(*)** *que permitan definir el precio medio de mercado de los contadores".*

> **(*)** Como probaré al hablar de la Orden de 20.12.1984 del Ministerio de Industria, los mayoristas a los que se refiere la DG de la Energía son las compañías eléctricas, que son los únicos mayoristas que adquieren los contadores para alquilárselos a sus clientes (los otros mayoristas, los almacenistas -distribuidores, los compran para venderlos).

2. En respuesta al escrito de 20.12.1983 de la DG de la Energía,

> - Metrega remite el 10.01.1984 su lista de precios **(**)** de septiembre de 1983 y un escrito en el que afirma que *"sobre dicha tarifa aplicamos un descuento medio del 16.50% en la venta a mayoristas".*
>
> **(**)** las listas de precios contienen los precios consensuados a los que los fabricantes obligan a los almacenistas-distribuidores a vender a los usuarios finales que prefieren comprar el contador a alquilarlo a la compañía eléctrica.

3. El 25.09.1984, el Gobierno publica en el Boletín Oficial del Estado el Real Decreto 1725/1984, de 18 de julio, *"por el que se modifica la póliza de abono para el suministro de energía eléctrica y las condiciones de carácter general de la misma"*. Entre las

condiciones modificadas está la relativa al alquiler de los contadores, que vuelve a tener el mismo número de orden (el 16) y la misma redacción que en la póliza de abono aprobada el 12.03.1954, es decir,

> *"las empresas eléctricas estarán obligadas en todo caso a suministrar en alquiler contadores no especiales, monofásicos o trifásicos, de hasta 63 amperios por hilo. (...) Para estos aparatos, el Ministerio de Industria fijará las cantidades concretas máximas que se puedan aplicar por su alquiler, en base al 1.25% mensual del precio medio de mercado del aparato"*.

Póliza de abono aprobada por Real Decreto 1725/1984, de 18 de julio

27824 — 25 septiembre 1984 — BOE.—Núm. 230

control una vez conectados, ni tampoco la empresa suministradora sin aviso previo al abonado.

11. *Garantía en los suministros sin contador.*—En los suministros que no puedan medirse por contador por razones técnicas o económicas y, excepcionalmente, se determinen a tanto alzado, para lo cual se requerirá la autorización expresa del organismo competente de la Administración Pública, la empresa eléctrica podrá exigir la instalación de equipos precintables u otros elementos que, encontrándose de forma normal en el mercado y sin encarecer sensiblemente el costo de la instalación, representen mayor garantía para el cumplimiento estricto de las condiciones convenidas.

12. *Condiciones de la instalación interior.*—La empresa suministradora debe negarse a facilitar energía eléctrica si las instalaciones, nuevas o reformadas, propiedad de los abonados, no reúnen las condiciones de seguridad reglamentarias. A estos efectos, llevará a cabo en dichas instalaciones y con cargo al usuario las comprobaciones previstas en el Reglamento Electrotécnico correspondiente y en sus Instrucciones Complementarias, antes de dar tensión a las mismas. Las empresas eléctricas percibirán por este servicio las cantidades establecidas como derechos de verificación en el vigente Reglamento de Acometidas en las condiciones por él estipuladas.

En cuanto a las instalaciones antiguas en uso, las Empresas eléctricas deben comunicar al organismo competente de la Administración Pública correspondiente y a los abonados que las utilizan, la falta de seguridad que adviertan en aquéllas, quedando dichos abonados obligados a corregirlos si así lo juzga pertinente el mismo organismo, en el plazo que éste ordene. Si un abonado no cumple lo así dispuesto, la Empresa eléctrica queda obligada a suspender el suministro en los términos que haya establecido dicho organismo.

Las empresas suministradoras no pueden cobrar cantidad alguna por el concepto de revisión de instalaciones cuando ésta se produzca por su propia iniciativa.

13. *Aparatos instalados.*—El abonado será responsable de la custodia de los equipos de medida y control, el propietario de los mismos, lo será de su adecuado mantenimiento, y la empresa suministradora, de su manipulación y de las consecuencias que de ello se deriven.

Asimismo, si por elevaciones de tensión anormales u otras causas imputables a la empresa suministradora o a sus empleados, sufren perjuicios los aparatos de medida que sean propiedad de los abonados, serán de cuenta de aquélla las reparaciones necesarias para su normal funcionamiento.

14. *Independencia de las instalaciones.*—Si un mismo abonado tuviera instalaciones a las que se apliquen tarifas diferentes, las distribuciones para cada una de ellas se establecerán con absoluta independencia y en forma que no puedan confundirse, quedando terminantemente prohibido hacer derivaciones de los conductores de una para las aplicaciones correspondientes a las otras, salvo que, por acuerdo entre empresa y abonado, exista un solo equipo de medida y se fije el reparto de los consumos entre las distintas tarifas.

15. *Reparación de las instalaciones.*—En general, las reparaciones o modificaciones de la acometida, así como su conservación, serán con cargo y por cuenta de la Empresa suministradora, excepto si correspondiera al usuario por haber mantenido la propiedad de la misma. Las desviaciones de su trazado serán a cargo de quien las promueva. Las reparaciones o modificaciones de las instalaciones y derivaciones en baja tensión que parten de la caja general de protección, incluida ésta, hasta la entrada a los contadores de medida, serán de cargo y cuenta del propietario del inmueble, y desde el contador hasta los aparatos receptores, de cuenta de los abonados, los cuales las realizarán por medio de instalador autorizado. El propietario del inmueble o la comunidad de copropietarios podrán también tomar a su cargo las reparaciones o reformas de las líneas situadas en la parte del inmueble de uso común, repercutiendo su coste a los abonados en la forma autorizada por las disposiciones vigentes que fueran de aplicación.

16. *Instalaciones de contadores y otros aparatos.*—La instalación que ha de servir de base para la colocación de los contadores u otros aparatos de medida podrá ser realizada por las empresas eléctricas o bien por instalador autorizado, a elección del propietario y por su cuenta, en lugar que cumpla las condiciones reglamentarias.

Los abonados tienen derecho a facilitar los contadores y otros aparatos de su propiedad, o alquilárselos a las empresas suministradoras de energía eléctrica, o a otras entidades legalmente establecidas extrañas a ellas, siempre que los aparatos de medida pertenezcan a un sistema y tipo homologados, y estén verificados oficialmente con resultado favorable. El tipo de alquiler aplicable por las empresas suministradoras de energía eléctrica no será superior al 1,25 por 100 mensual del precio medio del aparato.

Las empresas eléctricas estarán obligadas en todo caso a suministrar en alquiler aparatos contadores no especiales, monofásicos o trifásicos de capacidad normalizada, de hasta 63 amperios por hilo, e interruptores de control de potencia (ICP) para la misma intensidad nominal, así como los de doble tarifa, relojes y demás aparatos necesarios para la aplicación de la tarifa nocturna con el mismo límite de intensidad. Para estos aparatos el Ministerio de Industria y Energía fijará las cantidades concretas máximas que se puedan aplicar por su alquiler, en base al mismo 1,25 por 100 mensual del precio medio del mercado del aparato.

La venta y alquiler de toda clase de aparatos por empresas o entidades legalmente establecidas, extrañas a las Empresas suministradoras de energía eléctrica, no se someten a esta regulación por no estar en régimen de precios autorizados.

Los equipos para la medida y control de un determinado suministro se considerarán adscritos a la correspondiente instalación y no será necesaria su sustitución siempre que sean adecuados a las características del suministro solicitado por un nuevo abonado.

Si la empresa suministradora decidiese utilizar aparatos de control, tales como limitadores de corriente o interruptores de control de potencia (ICP), podrá hacerlo, previa comunicación al abonado, ateniéndose, en lo que a la instalación de dichos aparatos se refiere, a lo siguiente:

a) Como regla general se ubicarán en el domicilio del abonado.

b) De no estimarse conveinete esta ubicación, se instalarán en la centralización correspondiente junto a los aparatos de medida del propio abonado, bien entendido que en este caso los aparatos serán, preceptivamente, bien de reenganche automático o bien reenganchables por el abonado desde su propio domicilio. El alquiler a percibir, en este caso, será el correspondiente al del ICP de accionamiento directo de la misma intensidad.

En los casos en que el ICP se instalase con posterioridad a la fecha de iniciación del servicio, todos los gastos de dicha instalación serán a cargo de la Empresa suministradora.

17. *Comprobación de los contadores.*—Tanto los abonados como las Empresas suministradoras tendrán derecho a solicitar del Organismo competente de la Administración Pública, la verificación de los contadores, interruptores de control de potencia (ICP) y otros aparatos conexos, cualquiera que sea su propietario.

En los casos de haberse dado suministro sin que el contador estuviese debidamente instalado o en casos de mal funcionamiento de éste, comprobado por dicho organismo oficial, éste efectuará la liquidación correspondiente de acuerdo con lo dispuesto en el vigente Reglamento de Verificaciones y Regularidad en el Suministro de Energía Eléctrica.

18. *Información en recibos.*—Los recibos deberán contener de forma clara, como mínimo, los siguientes datos:

a) Domicilio del abono.
b) Domicilio del abonado, si es distinto y figura como tal en la póliza.
c) Tarifa aplicada.
d) Potencia contratada o potencia base de facturación.
e) Lectura del maxímetro, si se ha instalado este aparato para determinación de la potencia base de facturación.
f) Lecturas de los contadores que determinan el consumo facturado y fecha de las mismas que definan el plazo de facturación.
g) Consumos facturados (se indicará si son reales o estimados).
h) Disposiciones oficiales con fechas de su publicación en el «Boletín Oficial del Estado», que fijaran la definición de la tarifa y su baremo de precios.
i) Cálculo del importe resultante de sus términos de potencia y de energía de forma separada.

Este apartado es copia literal del apartado 16 de la póliza de abono aprobada el 12.03.1954

m) Importe de los gravámenes repercutibles.
n) Canon sobre la energía eléctrica con expresión de su cálculo.
ñ) Cantidades ya abonadas a cuenta en caso de que haya anulación de facturas anteriores.
o) Neto a pagar.
p) Suma total de la factura.
q) Teléfono de las oficinas comerciales de la Empresa eléctrica suministradora, y para pequeños abonados, nombre y dirección donde deben dirigirse las reclamaciones y lugares donde se pueda efectuar el pago.

19. *Pago de la factura.*—Las Empresas suministradoras de energía eléctrica no pueden cobrar por ningún otro concepto ni por mayor cuantía que los consignados en los reglamentos y tarifas aprobados y figurados con el debido detalle en los recibos o facturas.

Tanto el término de potencia como el término de energía, así como el resto de la tarifa e impuestos se facturarán por períodos de suministro vencidos. El primer período se computará desde la fecha del enganche a la red.

El abonado podrá hacer efectivos los importes facturados en las oficinas de la Empresa o de su representación oficial, en las Cajas, Entidades de crédito u otros establecimiento u oficinas autoriza[...] o a través de la cuenta de [...] de Ahorros que para tal [...] dificultades para utilizar los anteriores sistemas, el abonado podrá, asimismo, hacer efectivo el importe del recibo mediante giro postal u otro medio similar.

Contadores no especiales

4. Inmediatamente después de publicada en el Boletín Oficial del Estado la nueva póliza de abono, los fabricantes remiten a la DG de la Energía nuevas listas de precios en las que los contadores monofásicos han sufrido un incremento del 10% y los trifásicos, un incremento superior al 13%. Así pues,

> - Landis & Gyr Española remite el 01.10.1984 su lista de precios de septiembre de 1984 y un escrito en el que no indica el descuento medio aplicado a mayoristas, por lo que debe sobreentenderse que dicho descuento es el indicado en el escrito remitido 13.01.1984 (18%).

Muy Srs. Nuestros:

En relación con su escrito referenciado, - lamentamos el retraso que damos a su contestación, debido a los estudios de actualización de nuestros costos, a final de año, para detêrminar el precio de nuestros fabricados en la campaña de 1.984.

Les remitimos la información solicitada:

a) Lista de precios (Anexo a esta carta).

b) Descuento medio a aplicar: 18 a 20% sobre los precios en vigor. (Septiembre/83.

Esperando haberles complacido, aprovechamos la ocasión para saludarles atentamente.

Asunto: Precio de Contadores y otros aparatos

Srª Directora General:

Correspondemos a su escrito arriba indicado, y acompañamos lista de precios vigente de nuestros Contadores monofásicos y polifásicos, de energía activa y reactiva, en sus variantes de simple, doble y triple tarifa.

Estimamos que el descuento medio vigente que se aplica a los precios de los Contadores indicados en la adjunta lista es del 17,5% Dto.

Además se incluyen al final, los precios de nuestros Interruptores horarios para conmutación de tarifas, a los cuales se aplica un descuento medio del mismo orden anteriormente indicado.

Quedamos a su entera disposición.

Barcelona, Septiembre 1983

Inscrita en el Registro Mercantil de Madrid, hoja nº 1534, folio 45 del tomo 35 provisional de Sociedades, inscripción 1.ª, el 15 noviembre [illegible]

El análisis de la información remitida en enero/febrero de 1984 y en octubre de 1984 a la DG de la Energía demuestra clara e irrefutablemente que los fabricantes cumplieron correctamente las dos funciones que tenían asignadas: el suministro de datos falsos al Ministerio de Industria y la imposición de restricciones a los almacenistas-distribuidores.

8.2.1- Suministro de datos falsos al Ministerio de Industria

En lo que respecta al alquiler de los contadores, tanto la póliza de abono de 12.03.1954 como las de 20.08.1981 y 18.07.1984 establecen que "el Ministerio de Industria fijará las cantidades concretas máximas que se puedan aplicar por su alquiler, en base al **1.25%** mensual del precio medio de mercado del aparato".

Como consta en un documento de 18.12.1984 de la DG de la Energía que le facilitaré más adelante, el precio medio de mercado de un contador se calcula aplicando a su precio de lista el descuento medio aplicado por los fabricantes a las compañías eléctricas. Por tanto, para conseguir que el precio de alquiler de los contadores sea superior al legalmente establecido, basta con facilitar al Ministerio de Industria un descuento medio inferior al real.

Según consta en los escritos remitidos a la DG de la Energía en enero/febrero de 1984,

el descuento medio que cada fabricante dice aplicar a los mayoristas es el siguiente:

Landis & Gyr Española: **18%**
Siemens: **19%**
AEG: **17.5%**
Metrega: **16.5%**
Riesa: **20%**
CDC: No consta

Los fabricantes cumplieron correctamente la función de suministrar datos falsos al Ministerio de Industria, pues estos descuentos son todos falsos y, por supuesto, muy inferiores a los reales, como lo demuestran, entre otros, los siguientes documentos:

- Contrato de 25.09.1997 entre Siemens y el almacenista-distribuidor M.E.M. Roche. En dicho contrato, que incluye la lista de precios de 1995, consta que el descuento aplicado por Siemens al citado almacenista-distribuidor es el **55%.**

El primero interviene en nombre de la entidad mercantil **M.E.M. ROCHE, S.L.**, cuya representación consta en Escritura de Constitución de fecha , inscrita en el Registro Mercantil de
, al Tomo , Folio , Hoja ; y la segunda, en nombre de le entidad mercantil **SIEMENS, S.A.**, cuya representación acredita mediante Escritura de Sustitución de Facultades de fecha 16.03.1979, inscrita en el Registro Mercantil de Madrid, al Tomo 4797-general,3973 de la sección 3ª de l Libro de Sociedades, folio 191, hoja nº 2.583, inscripción 374

Ambos otorgantes se reconocen mutua y recíprocamente capacidad legal y de obrar suficiente para otorgar el presente documento, para lo que hacen constar los siguientes

ANTECEDENTES

I.- ROCHE, es una sociedad mercantil dedicada, entre otras cosas, a la fabricación de cuadros eléctricos.
Y SIEMENS, se dedica, también como sociedad mercantil, entre otras cosas a la fabricación y suministro de **CONTADORES ELECTRICOS**.

II.- Ambas entidades han llegado a un acuerdo por el cual SIEMENS se compromete a que ROCHE sea único distribuidor, en exclusiva, para dichos **CONTADORES ELECTRICOS**, en la zona de la Comunidad de Cataluña, con las limitaciones del ANEXO 2.
Asimismo, ROCHE se compromente a no distribuir en la zona de Cataluña, productos similares, (contadores eléctricos), de otras empresas de la competencia de SIEMENS.
Este acuerdo regirá durante todo el periodo de vigencia del contrato.
En vista de todo lo anterior, ambas partes formalizan el presente acuerdo de colaboración, en base a las siguientes:

CLAUSULAS

PRIMERA.- El objeto del presente acuerdo de colaboración entre ROCHE y SIEMENS, es la realización de la distribución de **CONTADORES ELECTRICOS** en la zona de la Comunidad de Cataluña, con las limitaciones expresadas en el ANEXO 2.--

SEGUNDA.- Para ello, ROCHE dispondrá en sus dependencias de un depósito de contadores eléctricos trifásicos para conectar a transformadores de medida, según se detalla en el ANEXO 1. Este depósito podrá sufrir variaciones de tipos o cantidades, de acuerdo con las necesidades que demande el mercado de la zona, objeto de este acuerdo. Las cantidades de este depósito se mantendrán, salvo que varíe alguna circunstancia no previsible en estos momentos, quiere decirse que se producirán suministros desde Fábrica Cornellá en las condiciones que se estipulan en la cláusula CUARTA Las condiciones de este depósito estarán sujetas a las cláusulas del **CONTRATO DE DEPOSITO**, firmado por ambas partes, según ANEXO 3.---

TERCERA.- SIEMENS facilita a ROCHE una lista de precios de contadores eléctricos **FERRARIS**, de fecha ENERO 1995, aplicando en factura un descuento del 55 %, cargando además el correspondiente **Suplemento de Aforo** y los impuestos vigentes en el momento de producirse la factura. Anexo 4. Asimismo, facilita en el ANEXO 5, otra lista de precios de contadores estáticos **MULTIFUNCION**, en la ejecuciones más normales del mercado, clase 1 para energía activa y 2 para reactiva, aplicando en factura un descuento del 50 %.---

CUARTA.- SIEMENS procederá una vez al mes , en la fecha que previamente acuerden ambas partes, a realizar un inventario de existencias, procediendo a facturar la diferencia existente con el inventario anterior. La forma de pago de esta factura será de 90 días, fecha factura, mediante letra aceptada. Al mismo tiempo, y de acuerdo con ROCHE, realizará un pedido a Fábrica Cornellá por las cantidades de contadores que aseguren las que figuren en el ANEXO 1.---

QUINTA.- SIEMENS se compromete a apoyar a ROCHE, tanto técnicamente con personal técnico especializado como con documentación técnica, manteniendo actualizados los productos y la documentación técnica.--

SEXTA.- ROCHE se compromete a adquirir los productos, objeto de este contrato, a SIEMENS, tanto para el uso en los cuadros de su fabricación, como para la venta. Las excepciones a esta cláusula se producirán de común acuerdo por ambas partes.------------

SEPTIMA.- Son válidas las CONDICIONES GENERALES DE VENTA, de octubre 1994, ANEXO 6 exceptuando las cláusulas del presente contrato.-------------------------

OCTAVA.- Con motivo de este contrato, ROCHE y SIEMENS, se van a intercambiar determinadas informaciones de caracter técnico y comercial, así como documentaciones referentes al propio contrato, las cuales tienen un caracter confidencial y secreto.
Las partes se compromenten a tratar con el máximo grado de discrecionalidad y secreto dichas informaciones y documentaciónes, absteniéndose de divulgarlas o transmitirlas total o parcialmente a terceros sin el consentimiento expreso y por escrito de la otra parte. De lo contrario, las partes estarán habilitadas a exigir judicialmente todo tipo de responsabilidades a que hubiera lugar.---

NOVENA.- La duración del presente acuerdo será el periodo de tiempo comprendido entre el 01.10.97 y el 30.09.99, pudiéndose prorrogado de común acuerdo por ambas partes.
Caso de que una de las partes cometa una falta grave contra las cláusulas de este contrato, y esta falta persista dentro de los 60 días después de denunciada, la otra parte del contrato tiene el derecho de denunciar el contrato con efecto inmediato.----------

DECIMA.- Las partes, con renuncia expresa a cualquier fuero que pudiera corresponderles, se someten para cualquier discrepancia, originada con motivo de la interpretación o aplicación del presente acuerdo, a los Juzgados y Tribunales de la Villa y Corte de Madrid.----------

UNDECIMA.-Si alguna de las cláusulas de este contrato fueran consideradas juridicamente ineficaces, o puedan llegar a serlo , dicha ineficacia no afectará a la validez y, por consiguiente, al cumplimiento del resto de las cláusulas del presente contrato.
Las partes intentarán, en el marco de la Buena Fe negocial, que la cláusula ineficaz sea sustituida o reemplazada por otra valedera, si esto fuera posible y no afectare al resto del contrato.----------

DUODECIMA.- Las variaciones del contrato precisan de la forma escrita, y el acuerdo de ambas partes.
Las partes del contrato exigirán los máximos esfuerzos de colaboración, un mantenimiento muy estrecho en la colaboración técnica, y, con el mejor saber, por ambas partes a aconsejarse y apoyarse.
Cada parte garantiza a la otra, previo acuerdo, el acceso a las correspondientes instalaciones, donde los **CONTADORES ELECTRICOS** son almacenados, instalados o fabricados, con el fin de realizar gestiones de control o pruebas.----------

Y conformes con todo lo que antecede firman el presente por duplicado y a un solo efecto, en lugar y fecha indicados.

- Las decenas de facturas remitidas al Juzgado de Instrucción Central núm. 5 por la Comisión Nacional de Energía. Según se deduce de dichas facturas (marcadas todas con el sello de CONFIDENCIAL) y de las listas de precios de los fabricantes, el descuento aplicado por éstos a las compañías eléctricas es igual o superior al 60%.

Un ejemplo concreto es la factura adjunta al escrito de 09.10.2000 de Sclumberger, en la que consta, entre otros, el precio neto de venta en 1997, 1998 y 1999 del contador monofásico de simple tarifa a las compañías eléctricas y a los almacenistas-distibuidores. Dado que en estos tres años la lista de precios vigente fue la de diciembre de 1994, el descuento aplicado por **Schlumberger** es el siguiente:

- Descuento aplicado a compañías eléctricas: entre el **59.4%** (en 1997) y el **64.2%** (en 1999).

- Descuento aplicado a almacenistas-distribuidores: entre el **51.7%** (en 1997) y el **53.0%**(en 1999)

Atención Sr. Carlos Gallego Alonso
Director Energía Eléctrica

Montornès, 9 de Octubre de 2000

Estimado señor,

Nos dirigimos a Vd. en relación a su escrito del 2?.9.00, por el que nos solicitan datos relativos a las ventas de contadores eléctricos efectuadas en España durante los tres últimos ejercicios.

En anexo adjuntamos la información clasificada de acuerdo a la denominación por tipos, señalada en el anexo II del R.D. 2066/1999 del 30 de Diciembre y diferenciada según el grupo de clientes es decir, Empresa Eléctrica o Distribuidor Mayorista.

Respecto al anexo adjunto les señalamos el carácter estrictamente confidencial de los datos reflejados en el mismo.

Quedamos a su disposición para cualquier información adicional que puedan precisar.

Muy atentamente,

Germán Garrido

(*) En 1997, 1998 y 1999, la lista de precios vigente era la de diciembre de 1994, la cual adjunto aparte. En dicha lista, el precio del contador monofásico es 11.470 pesetas.

873

8 .2.2.- Imposición de restricciones a los almacenistas-distribuidores
Esta función también fue cumplida correctamente por los fabricantes, como lo demuestran los siguientes documentos:

- Las listas de precios **(*)** remitidas a la DG de la Energía en enero/febrero de 1984 y octubre de 1984. Basta un simple vistazo a dichas listas para comprobar que el precio de un determinado contador es el mismo en todas las listas, lo cual, evidentemente, sería imposible sin un previo acuerdo entre los fabricantes. Para facilitarle ese vistazo, he confeccionado una tabla con los precios del contador monofásico y del contador trifásico de simple tarifa, que suponen el 95% del parque nacional.

(*) las listas de precios contienen los precios consensuados a los que los fabricantes obligan a los almacenistas-distribuidores a vender a los usuarios finales que prefieren comprar el contador a alquilarlo a la compañía eléctrica.

- El informe de 20.09.2001 de la Comisión Nacional de Energía, basado en los documentos adjuntos a mi denuncia de 02.03.2000 ante la citada Comisión (entonces denominada Comisión Nacional del Sistema Eléctrico) y en los documentos remitidos por las compañías eléctricas a dicha Comisión a requerimiento de ésta. El informe fue solicitado por el Ministerio de Economía y la Junta de Andalucía como consecuencia de mis denuncias ante dichos Organismos.

Le adjunto la portada y las páginas 40, 41 y 46 (pdf) del citado informe, de las cuales le sugiero que lea los párrafos resaltados en amarillo y, muy especialmente, la conclusión décima (pág 46).

de Energía

INFORME SOLICITADO POR EL MINISTERIO DE ECONOMÍA Y LA JUNTA DE ANDALUCÍA, EN RELACIÓN CON EL ESCRITO DE DENUNCIA FORMULADA POR D. ANTONIO MORENO ALFARO, ASÍ COMO LOS ESCRITOS PRESENTADOS POR DIVERSAS ORGANIZACIONES

20.09.2001

8.5. SOBRE LA PROPIEDAD DE LOS EQUIPOS DE MEDIDA

DECIMONOVENA. Aunque la regulación ha permitido históricamente que cualquier tipo de equipo de medida y control fuese adquirido por el consumidor, en contraposición a alquilárselo a la empresa distribuidora, la realidad muestra que la mayoría de los equipos de medida que conforman el actual parque de equipos de medida y control lo son en régimen de alquiler por parte de las empresas distribuidoras.

Concretamente, de acuerdo a la información aportada por las empresas distribuidoras a requerimiento de esta Comisión, el 80,79 % de los equipos de medida están en régimen de alquiler, mientras que el 19,21 % restante es propiedad de los consumidores. En alguna empresa este porcentaje de equipos de medida en régimen de alquiler alcanza el 91,5 %.

Por tipo de equipo de medida, puede observarse en la citada información que cuanto más sencillo es el equipo, como por ejemplo el utilizado para los consumidores acogidos a la tarifa 2.0 sobre los cuales las empresas distribuidoras tienen la obligación de ofrecerlos a los consumidores en régimen de alquiler como ya se ha indicado anteriormente, mayor es el porcentaje en régimen de alquiler y, por el contrario, cuanto más sofisticado o complejo es el equipo, mayor es el porcentaje en propiedad de los consumidores.

VIGÉSIMA. A la situación descrita en el punto anterior se ha llegado por dos circunstancias, que pueden incluso estar relacionadas. La primera hace alusión al desconocimiento por parte de los consumidores, y no aclarado a éstos en muchas ocasiones por parte de las empresas distribuidoras, de la posibilidad de disponer de cualquier equipo de medida y control en régimen propiedad. La segunda, más

determinante si cabe, hace alusión a los precios que dichos equipos de medida y control tienen para unos y otros sujetos, consumidores y empresas distribuidoras.

De acuerdo con la información disponible, tanto la contenida en la documentación aportada por el denunciante D. Antonio Moreno, como por la remitida por las empresas distribuidoras y por los fabricantes de equipos de medida y control a instancias de esta Comisión, puede observarse que los precios que estos últimos aplican a los distribuidores de equipos de medida al por mayor vienen a ser del orden de un 15 a un 20 % superiores a los precios que dichos fabricantes aplican a las empresas distribuidoras. Hasta llegar el equipo de medida a manos del consumidor final, a este sobrecoste hay que añadir el propio margen del distribuidor de equipos al por mayor y el margen del distribuidor de equipos al detall. En definitiva, el consumidor final obtiene unos precios, antes de impuestos, del orden del 150 % superiores a los obtenidos por las empresas distribuidoras.

La razón de esta considerable diferencia de precios hay que buscarla, por una parte, en que las ventas realizadas a las empresas distribuidoras suponen, de acuerdo con la información disponible, casi el 95 % del total de las ventas de estos equipos de medida y control y, por otra, a que estos fabricantes de equipos de medida y control son también fabricantes, en la mayoría de los casos, de otros tipos de material eléctrico. De acuerdo con esto, las empresas distribuidoras obtienen tanto economías de escala como economías de alcance.

VIGESIMOPRIMERA. La regulación sobre esta materia en otros países no aporta una solución universal al tema. En algunos, se ha optado porque las empresas distribuidoras sean las propietarias de todos los equipos de medida y control, recibiendo una adecuada retribución por prestar tal servicio. En otros, por el contrario, las empresas distribuidoras no son las propietarias de tales equipos, sino que tal función queda en manos de terceros sujetos: empresas comercializadoras o empresas de específicas dedicadas de forma genérica a la

comprende el control metrológico, fundamentalmente las relativas a la verificación periódica de los aparatos. Así mismo, debería proceder a fijarse para dichos equipos de medida y control un vida útil máxima, y todo ello con independencia de que en un futuro más o menos cercano pueda llegarse a establecer la obligación de sustituir, paulatinamente, los equipos de medida de inducción por equipos de medida estáticos (electrónicos). En las actuales circunstancias, puede afirmarse que la fiabilidad de la medición no queda suficientemente garantizada en un buen número del actual parque de equipos de medida.

CONCLUSIÓN DECIMA. Aunque la regulación ha permitido históricamente que los consumidores adquiriesen en propiedad los diferentes equipos de medida y control, la realidad demuestra que la inmensa mayoría de ellos lo son en régimen de alquiler a las empresas distribuidoras. La principal razón no es otra que los precios de venta a los que los consumidores pueden optar son sensiblemente superiores a los de las empresas distribuidoras. Se observa que los mecanismos de fijación de precios en el mercado de contadores pudieran ser discriminatorios para los diferentes tipos de compradores, lo cual corresponde legalmente examinar a los órganos competentes en materia de competencia.

46

A pesar de que han pasado veinticuatro años desde que los fabricantes comenzaron a imponer restricciones a la libre competencia entre almacenistas-distribuidores y siete años desde que la Comisión Nacional de Energía advirtió de que *"la principal razón de que la inmensa mayoría de los contadores estén en régimen de alquiler no es otra que los precios a los que los consumidores pueden optar son sensiblemente superiores a los de las compañías eléctricas"* y alertó de que *"se observa que los mecanismos de fijación de precios en el mercado de contadores pudieran ser discriminatorios para los diferentes grupos de compradores, lo cual corresponde legalmente examinar a los órganos competentes en materia de competencia"*, ningún *"órgano competente en materia de competencia"* ni ningún tribunal ha investigado las citadas restricciones, cuya única finalidad es conseguir que el número de afectados por la estafa en los precios de alquiler sea el mayor posible. Actualmente, dicho número es **23 millones.**

PRÓXIMA ENTREGA

En la próxima entrega, que tengo previsto publicar el 22.09.2008, le explicaré cuál es la tercera función del grupo Contact, de la cual las compañías eléctricas no tuvieron conocimiento hasta el 21.11.1995. Fue precisamente un documento generado por los fabricantes tras tener conocimiento de dicha función las compañías eléctricas el que me facilitó la pista, cuyo seguimiento me ha permitido poner al descubierto la trama político-financiera responsable de la estafa.

Muchas gracias por su atención.

Muy Sres. nuestros:

Atendiendo a su consulta nos es grato enviarles adjunto a la presente nuestras listas de precios PVP vigentes para los materiales arriba indicados. El descuento medio aplicado durante el año 1983 para estos aparatos puede estimarse en un 19%, y un 22% respectivamente.

Esperando haberles complacido, aprovechamos gustosos la presente para saludarles muy atentamente.

S I E M E N S, S. A.

Realmente le felicito. Habrá en estos tiempos más estafas, quizá ya se están produciendo. La Compañías, los políticos, el Estado necesitan mucho, mucho dinero... y este es un macro negocio de volúmenes... de primera necesidad, y en el que TODO es ignorancia del consumidor final... Gracias

Segun me comunica un fabricante de contadores cada vuelta de contador equivale a 10, diez Kwh me parece una barbaridad y en casa vivimos 2 personas y los dos pensionistas.
Donde puedo pedir ayuda para alguien me compruebe si mi contador esta trucado o averiado. mi telefono es 916160742 y vivo en Villaviciosa de Odon me llamo Antonio Fernandez gracias.

PAQUITA LA DEL BARRIO

En memoria de mi difunto brigada.

Rata de dos patas

Rata inmunda,
animal rastrero,
escoria de la vida,
adefesio mal hecho,
infrahumano,
espectro del infierno,
maldita sabandija,
cuánto daño me has hecho.
Alimaña,
culebra ponzoñosa,
desecho de la vida,
te odio y te desprecio.
Rata de dos patas,
te estoy hablando a ti,
porque un bicho rastrero,
aun siendo el más maldito,
comparado contigo
se queda muy chiquito.

Maldita sanguijuela,
maldita cucaracha,
que infectas donde picas,
que hieres y que matas.
Alimaña,
culebra ponzoñosa,
desecho de la vida,
te odio y te desprecio.
Rata de dos patas,
te estoy hablando a ti,
porque un bicho rastrero,
aun siendo el más maldito,
comparado contigo
se queda muy chiquito.
¿Me estás oyendo inútil?
Hiena del infierno
cuánto te odio y te desprecio
Maldita sanguijuela,
maldita cucaracha,
que infectas donde picas,
que hieres y que matas.
Alimaña,
culebra ponzoñosa,
desecho de la vida,
te odio y te desprecio.
Rata de dos patas,
te estoy hablando a ti,
porque un bicho rastrero,
aun siendo el más maldito,
comparado contigo.
se queda muy chiquito.

Piérdeme el respeto

Paquita la del Barrio

Basta ya de tonterías

no más vueltas al asunto,
sé qué quieres tu conmigo.

No me gustan las mentiras
para qué voy a negarlo
yo también quiero contigo
No me vengas con el cuento
que eres todo un caballero,
que conozco bien tu modo.

No te hagas el educado,
si estás queriendo conmigo
atáscate ahora que hay modo.

Piérdeme el respeto,
déjate de cosas
 y hazme, te lo ruego,
las proposiciones
más indecorosas

Piérdeme el respeto,
mi querido amigo,
que muero de ganas,
porque se apapachen
tu cuerpo y el mío.

Me estas oyendo inútil
Piérdeme el respeto.

No me vengas con el cuento
de que eres un caballero,
que conozco bien tu modo.
No te hagas el educado,
si estas queriendo conmigo,
atáscate ahora que hay modo

Piérdeme el respeto,
déjate de cosas,
Y hazme, te lo ruego,
las proposiciones más indecorosas.

Piérdeme el respeto,
mi querido amigo,
que muero de ganas
porque se apapachen
tu cuerpo y el mío.

DISIENTO, LUEGO EXISTO, DE RAMÓN MIER: CITA URGENTE

"El extremismo en defensa de la libertad no es vicio, la moderación en la búsqueda de la justicia no es virtud." - Barry M. Goldwater

México vive tiempos difíciles. Abundan los llamados a otorgar mayores poderes al gobierno a costa de nuestras libertades para enfrentar a la criminalidad. También sobra quien exija que corra la sangre de los enemigos de la patria, hay sed de venganza.

(...pueden leer el artículo completo **Cita urgente** en *"Disiento, luego existo"*, el blog de Ramón Mier)

De nada, ya saben que me gusta ser útil.

ATENTADO EN MORELIA, MICHOACÁN: SIETE MUERTOS Y MÁS DE CIEN HERIDOS

El Ejército mexicano mantiene aún acordonada la zona de la plaza Melchor Ocampo, que es la más importante de Morelia, mientras siguen en búsqueda de cualquier indicio que les permita avanzar en las investigaciones del atentado con dos granadas de fragmentación, que dejo más de cien heridos y hasta el momento siete muertos durante la ceremonia del Grito de Independencia.

Los militares mantienen en sus vehículos una pancarta con el número de teléfono móvil **44 32 14 15 38** local en el que solicitan a la ciudadanía información sobre cualquier cosa que hayan observado, que facilite la identificación de los culpables, y subrayan que la denuncia es anónima.

Esto se suma a los más de 1.500 asesinatos en el año 2005 relacionados con el narcotráfico; más de 2.100 en 2006; más de 2.800 en 2007; hasta el 2008 podría convertirse en el año más sangriento, con más de cuatro mil muertes violentas. Sólo en Ciudad Juárez, en lo que va de año, hay más de 1.000 asesinatos sin resolver.

Es urgente que el gobierno mexicano entienda que de nada sirve combatir al narcotráfico. Que lo que se debe combatir es la VIOLENCIA y que a esta se le combate luchando contra la impunidad.

Mi adminrada Denise Dresser lo dijo hoy con claridad, lo que nos ha conducido hasta aquí es la impunidad compartida de gobernantes y delincuentes y la aplicación intermitente del estado de derecho.

AVISOS DE BLOGIA

Roberto Abizanda, en su bitácora no oficial: "Eternamente rehaciendo Blogia": avisa:

Parada técnica el 20 de septiembre 2008 a las 12:00. La duración máxima estimada será de una hora.

Y también anuncia en su artículo **"Rehaciendo código y rendimiento"**

"Llevo unas semanas rehaciendo grandes partes de código de Blogia. En principio no cambiará nada de la interfaz, pero reprogramar todo hará más sencillo mejorar algunas cosas que tenemos pendientes y que nos piden los usuarios.

El código se degrada con el tiempo y las nuevas funcionalidades. Ahora es más "spaghetti code" que otra cosa. Algo que juré y perjuré cuando sacamos la versión 2.0 es que no lo iniciaríamos de cero. Y eso estoy intentando hacer, pasar gradualmente a un código limpio y "bonito". Será poco a poco, y largo, y esperemos que también transparente para los usuarios. A ver si los servidores nos respetan, que es lo más duro de solucionar. Por ahora llevo hecha la nueva estructura del código y ya he pasado unas cuantas funcionalidades. Todavía están en un servidor de desarrollo, no en los de "producción". También estoy probando un sistema de plantillas nuevo.
Por otro lado hace unos días hice unas pruebas de rendimiento comparando la carga de páginas utilizando HTML, SHTML (Server Side Includes) y PHP. Lo más rápido fue HTML, naturalmente, pero a poca distancia de SHTML. PHP quedó bastante lejos (publicaré las tablas). Haré pruebas en todos los servidores, a ver si merece la pena. En cualquier caso será una decisión difícil de tomar, porque habrá que cambiar todas las extensiones de las páginas de php a shtml y hacer las redirecciones pertinentes."
Lo comento porque Roberto Abizanda es nuestro "editor", el que ocupa su ocio en crear y hacer que cada vez funcione mejor blogia.com. Y que cada migración a un servidor más grande y más potente, cada mejora de programación supone cientos de horas de trabajo gratis de media docena de personas que se empeñaron con él en hacer el mejor editor de bitácoras en español. Para que nosotros, después de unos días de ir más lentos, o estar desconectados podamos seguir escribiendo sin más complicaciones.

Por ejemplo, así se resuelven en Wordpress una versión nueva, como las que hemos

tenido unas cuantas en blogia sin que los usuarios hagamos otra cosa que esperar a que nos lo solucionen:
"**COMO MUDAR A WORDPRESS 2.3**"

Descargamos la nueva versión.

Blogpocket explica: (no los de Wordpress, eh)

1.- Desactivar todos los plugins.
2.- Borrar el directorio "/wp-admin/".
3.- Borrar el directorio "/wp-includes/". Si se utiliza alguna traducción entonces borrar todo su contenido excepto el subdirectorio "/wp-includes/languages/".
4.- Borrar todos los ficheros del directorio donde está instalado WP, excepto "wp-config.php" ni cualquier otro que se haya añadido tras la instalación: robots.txt, .htaccess, favicon.ico, etc.
5.- Descargar y descomprimir la nueva release.
6.- Subir al servidor los nuevos directorios "/wp-admin/" y "/wp-includes/".
7.- Subir los ficheros del directorio raíz, menos "wp-config-sample.php".
8.- Entrar al panel de administración y seguir las instrucciones.
9.- Actualizar los Permalinks y el archivo .htaccess si es necesario.
10.- Por seguridad borrar los ficheros "/wp-admin/upgrade.php" y "/wp-admin/install.php".
11.- Activar los plugins, uno por uno.

aNieto2k daba sus pasos de esta forma: (No lo explican los de Wordpress, que conste)

1.- Descargamos la versión nueva
2.- Accedemos al FTP
3.- Renombramos la carpeta wp-content a _wp-content.
4.- Subimos todos los ficheros de dentro del ZIP, excepto la carpeta wp-content.
5.- Una vez subidos todos, probamos a acceder al sitio y probablemente veamos un error.
6.- Renombramos de nuevo la carpeta _wp-content a wp-content
7.- Ya podemos acceder al blog sin errores.
8.- Nos dirigimos al panel de administración y seguimos los pasos de la actualización que ellos mismos te sugieren.
9.- Listo, ya tenemos nuestro blog en Wordpress 2.3.

Y como ultima forma, lo que nos recomendaban desde alexseo: (Que Wordpress supone que estas cosas tan elementales las tiene que saber un blogger)

1.- Creamos una nueva carpeta en nuestro hosting con cualquier nombre (si que actualización wp 2.3).
2.- Subimos todos los archivos de Wordpress 2.3 a esa carpeta.
3.- Luego copiamos el wp-config.php, el wp-content y las imágenes de nuestro blog a este nuevo directorio.
4.- Ahora, desactivamos todos los plugins y activamos el theme por defecto.
5.- Hacemos respaldo de la base de datos.
6.- Luego, la carpeta que es nuestro directorio donde está nuestro blog, le cambiamos el nombre (ejemplo: backup 2.2), y la carpeta donde está Wordpress 2.3, le ponemos el nombre que tenía el directorio de nuestro blog.
7.- Ahora vamos a tublog.com/wp-admin/upgrade.php y listo!
8.- Luego de eso, ya puedes ir activando tus plugins y tu tema.
9.- Puedes importar las categorías a etiquetas o si ya tienes algún plugin de etiquetas, puedes importar esas a las etiquetas nativas de Wordpress.

Como podéis ver, las tres formas son bastante similares entre sí, cambián el orden de cómo hacer las cosas y algunos detalles. Personalmente, la mudanza la hice al estilo "blogpocket".

POSIBLES PROBLEMAS

1.- Diferentes errores, intentar antes de nada "lanzar" el archivo upgrade.php (http://www.tublog.com/wp-admin/upgrade.php).

2.- Caracteres extraños en acentos: Abrir wp-config.php con el editor que queráis y modificar las líneas 7 dejándola de esta forma: define('DB_CHARSET', '');

3.- aNieto2K comenta otros problemas que están apareciendo relacionados con los plugins y la base de datos y sus posibles soluciones.

COMO HACER BACKUP DE NUESTRA BASE DE DATOS

1.- Con el plugin wp-db-backup. Url oficial del plugin.

2.- Con el plugin backupwordpress. Url oficial del plugin.

3.- Entramos en nuestro phpMyAdmin. En la columna de la parte izquierda, picamos sobre el desplegable (si está) y picamos sobre la base de datos que queremos respaldar. Buscamos en la parte superior del panel la opción EXPORTAR. Dejamos las opciones que vienen por defecto y le damos al botón de la esquina inferior derecha "Continue". Nos saltará una ventana para descargar nuestro respaldo.

USO DE TAGS Y TRADUCCIÓN AL ESPAÑOL DE WORDPRESS 2.3

Javieraroche hace un extenso analisis sobre las tags, que diferencias hay entre trabajar con tags y con categorías, como implementarlas en esta nueva versión 2.3, algunos plugins para poder controlarlas etc.

MangasVerdes también habla sobre el tema en su entrada "Usando tags en WordPress 2.3" haciendo referencia a otro artículo de Rich Gilchrest.

Por último alexseo (que es veloz como una gacela) "ya a traducido está última versión al español". Fácil de implementar y que no he probado, pero seguro que está muy bien traducido: y casi sin faltas de ortografía.

INCORPORACIONES DE ESTA NUEVA VERSIÓN

1.- Se solucionan unos 350 problemas de seguridad.
2.- Se mejora la estabilidad y la velocidad del sistema (aún se comenta que el consumo de memoria es bastante elevado).
3.- Incorporación de sistema de etiquetas.
4.- Opción de cambiar categorías por tags.
5.- Notificación de la aparición de nuevas versiones de wordpress. Lo veremos en la parte inferior de nuestro "dashboard".
6.- Se mejora la redirección de URL,s,
7.- Los enlaces entrantes ahora nos los muestra google blogs y no Technorati.
8.- Notificación de actualizaciones en los plugins que usemos en el blog.
9.- Mejorado el manejo de post,s y borradores. Se añade un nuevo estado para los post: estado de revisión.
10.- Se añaden más opciones en el panel de edición de texto/publicación.
11.- Actualización del blogroll que viene por defecto.

Creo que estos son los cambios más significativos, aun que hay más."

En blogspot, blogger, ya ni os cuento lo que hay: en una de esas actualizaciones, desaparecieron miles de blogs, sin que nadie respondiera ni se ocupara de los afectados.

No obstante, siempre está el típico güevón que no se molesta en saber que hay un nivel sencillo, blogia 1; para el que sólo quiera hacer lo imprescindible; y otro más elaborado, para el que hay que saber lenguaje html, que permite virguerías; pero en vez de asumir su inepcia, en cuanto se atasca, le echa la culpa de todo a blogia y lo pone de vuelta y media , y habla de irse a Blogger, a WordPress, etc. porque allí si que atan los blogs con longaniza.

Y como luego nunca tienen la decencia intelectual de avisar: *"Lo siento, pero he de rectificar: en blogspot, blogger, wordpress, etc. también te dejan en suspenso el servicio sin avisar; no aparece un amable especialista para resolverme mis dudas y calafatear mi ignorancia; no hay un botón ni magia potagia que sustituya los conocimientos elementales que no tengo..."*
Y me cabrea, claro, porque alguien tendría que decir alto y claro que, después de comparar exhaustivamente, blogia es el más sencillo, el más versatil y mejor editor de bitácoras del mundo. Con gran diferencia.
Y todo gracias a media docena de admirables emprendedores que nos regalan su ocio, su empeño y su trabajo por puro romanticismo, sin vivir de esto, cuando podrían vender mañana mismo a alguna multinacional, y hacerse de oro.
Pero es que blogia.com, y los que la hacen, son aragoneses...

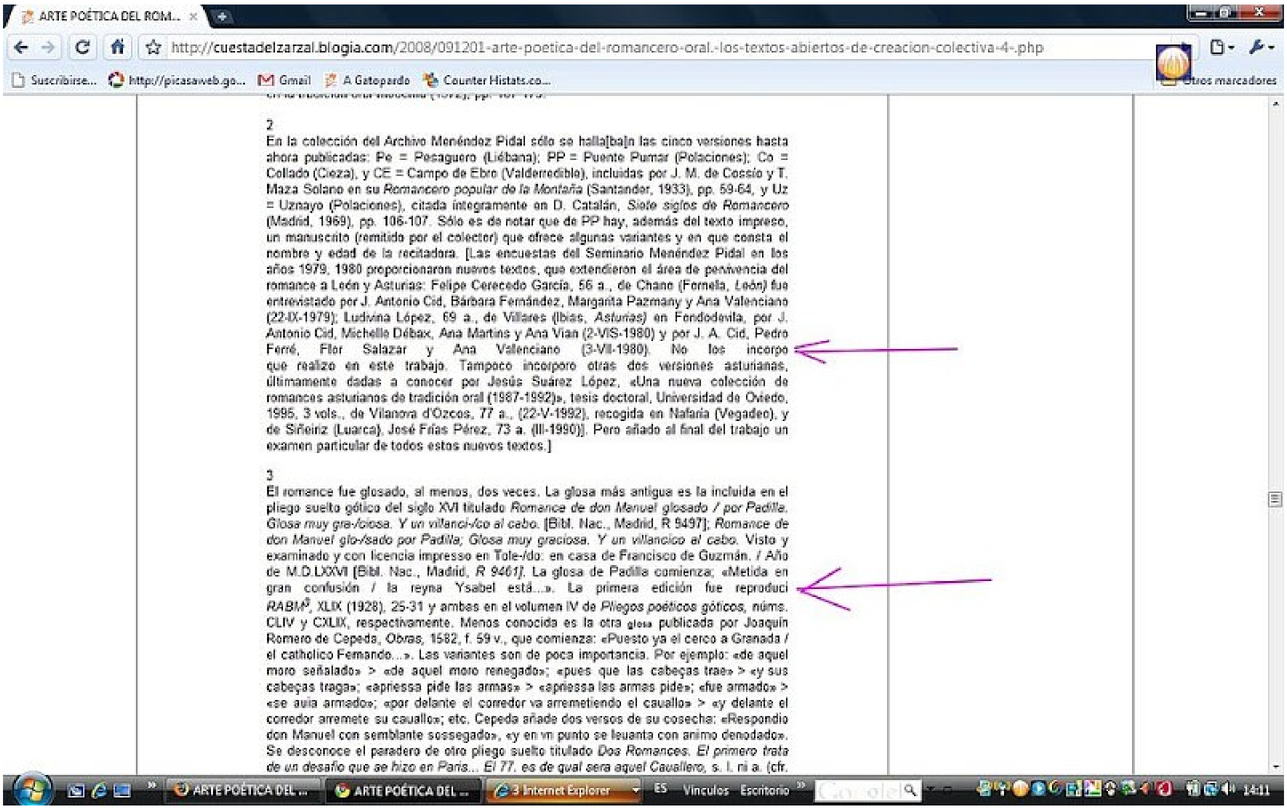
GOOGLE CHROME BIZQUEA Y MUTILA EL TEXTO

Ya sé que la informática no es lo mio, y que mis amistades con Google no son de las que servirán como argumento para una película, entre otras cosas porque en las búsquedas web no permiten seleccionar por fecha de publicación, o por pertinencia, cosa que sí hacen con las búsquedas en "Noticias Google". Pero no hay color si lo comparamos con yahoo y otros, que tienen menos criterio que los diseñadores de los muebles Forlady, y menos seso que los que programaron su página web...
No obstante, como a cotilla no me gana nadie, instalé el nuevo navegador Google Chrome y , zurriendo con él, -es rapidísimo- entré en la bitácora del Romancero de la Cuesta del Zarzal , y para comparar, entré también con Internet Explorer-7 -que es un solemne fiasco, que me recuerda esas amigas mías que para no recibir disgustos, jamás se han dado un gusto- y con Mozilla Firefox 3, al que no acabo de verle todas las gracias que le ríen respecto a la versión anterior,. La primera guasa que tiene es que cuando descargas archivos hace todo el proceso, te avisa que ha terminado, pero el archivo no aparece en tu PC sino que se queda en algún limbo ignoto, Guantánamo de archivos peligrosos, desde donde velan por nuestra seguridad.
Para solucionar esta avería en Mozilla Firefox 3:
1) Escribir **about:config** en la barra de direcciones y pulsar **Enter**.
2) Aceptar el mensaje de advertencia para manazas.
3) Buscar la clave **browser.download.manager.scanWhenDone** y cambiarle el valor a **False**.
Menos mal que existe Nico
Una tiene la mala costumbre de leerse hasta los prospectos de la Aspirina atentamente, y por eso he podido descubrir lo que los expertos informáticos han pasado por alto, ya que, por lo que he podido comprobar, son mayoritariamente ágrafos y daltónicos, amén de usar una jerga intraducible a cualquier idioma civilizado, y tener prioridades a la hora de programar que al común de los usuarios nos las traen al pairo.
El texto en Google Chrome se ha cargado con rapidez y se ve con perfecta nitidez, pero, misteriosamente desaparecen frases enteras. Como ejemplo, reproduzco la captura de pantalla de las notas 2 y 3* de ARTE POÉTICA DEL ROMANCERO ORAL...(4)



http://cuestadelzarzal.blogia.com/2008/091201-arte-poetica-del-romancero-oral.-los-textos-abiertos-de-creacion-colectiva-4-.php

2
En la colección del Archivo Menéndez Pidal sólo se halla[ba]n las cinco versiones hasta ahora publicadas: Pe = Pesaguero (Liébana); PP = Puente Pumar (Polaciones); Co = Collado (Cieza), y CE = Campo de Ebro (Valderredible), incluidas por J. M. de Cossío y T. Maza Solano en su *Romancero popular de la Montaña* (Santander, 1933), pp. 59-64, y Uz = Uznayo (Polaciones), citada íntegramente en D. Catalán, *Siete siglos de Romancero* (Madrid, 1969), pp. 106-107. Sólo es de notar que de PP hay, además del texto impreso, un manuscrito (remitido por el colector) que ofrece algunas variantes y en que consta el nombre y edad de la recitadora. [Las encuestas del Seminario Menéndez Pidal en los años 1979, 1980 proporcionaron nuevos textos, que extendieron el área de pervivencia del romance a León y Asturias: Felipe Cerecedo García, 56 a., de Chano (Fornela, *León)* fue entrevistado por J. Antonio Cid, Bárbara Fernández, Margarita Pazmany y Ana Valenciano (22-IX-1979); Ludivina López, 69 a., de Villares (Ibias, *Asturias)* en Fondodevila, por J. Antonio Cid, Michelle Débax, Ana Martins y Ana Vian (2-VIS-1980) y por J. A. Cid, Pedro Ferré, Flor Salazar y Ana Valenciano (3-VII-1980). No los incorpo
que realizo en este trabajo. Tampoco incorporo otras dos versiones asturianas, últimamente dadas a conocer por Jesús Suárez López, «Una nueva colección de romances asturianos de tradición oral (1987-1992)», tesis doctoral, Universidad de Oviedo, 1995, 3 vols., de Vilanova d'Ozcos, 77 a., (22-V-1992), recogida en Nafaria (Vegadeo), y de Siñeiriz (Luarca), José Frías Pérez, 73 a. (III-1990)]. Pero añado al final del trabajo un examen particular de todos estos nuevos textos.]

3
El romance fue glosado, al menos, dos veces. La glosa más antigua es la incluida en el pliego suelto gótico del siglo XVI titulado *Romance de don Manuel glosado / por Padilla. Glosa muy gra-/ciosa. Y un villanci-/co al cabo.* [Bibl. Nac., Madrid, R 9497]; *Romance de don Manuel glo-/sado por Padilla; Glosa muy graciosa. Y un villancico al cabo.* Visto y examinado y con licencia impresso en Tole-/do: en casa de Francisco de Guzmán. / Año de M.D.LXXVI [Bibl. Nac., Madrid, *R 9461].* La glosa de Padilla comienza: «Metida en gran confusión / la reyna Ysabel está...». La primera edición fue reproduci
RABM[3], XLIX (1928), 25-31 y ambas en el volumen IV de *Pliegos poéticos góticos*, núms. CLIV y CXLIX, respectivamente. Menos conocida es la otra glosa publicada por Joaquín Romero de Cepeda, *Obras*, 1582, f. 59 v., que comienza: «Puesto ya el cerco a Granada / el catholico Fernando...». Las variantes son de poca importancia. Por ejemplo: «de aquel moro señalado» > «de aquel moro renegado»; «pues que las cabeças trae» > «y sus cabeças traga»; «apriessa pide las armas» > «apriessa las armas pide»; «fue armado» > «se auia armado»; «por delante el corredor va arremetiendo el cauallo» > «y delante el corredor arremete su cauallo»; etc. Cepeda añade dos versos de su cosecha: «Respondio don Manuel con semblante sossegado», «y en vn punto se leuanta con animo denodado». Se desconoce el paradero de otro pliego suelto titulado *Dos Romances. El primero trata de un desafio que se hizo en Paris... El 77. es de qual sera aquel Cauallero,* s. l. ni a. (cfr.

La primera edición fue reproducida en la *RABM*[3]*,* XLIX (1928), 25-31 y ambas en el volumen IV de *Pliegos poéticos góticos,* núms. CLIV y CXLIX, respectivamente. Menos conocida es la otra glosa publicada por Joaquín Romero de Cepeda, *Obras,* 1582, f. 59 v., que comienza: «Puesto ya el cerco a Granada / el catholico Fernando...». Las variantes son de poca importancia. Por ejemplo: «de aquel moro señalado» > «de aquel moro renegado»; «pues que las cabeças trae» > «y sus cabeças traga»; «apriessa pide las armas» > «apriessa las armas pide»; «fue armado» > «se auia armado»; «por delante el corredor va arremetiendo el cauallo» > «y delante el corredor arremete su cauallo»; etc. Cepeda añade dos versos de su cosecha: «Respondio don Manuel con semblante sossegado», «y en vn punto se leuanta con animo denodado». Se desconoce el paradero de otro pliego suelto titulado *Dos Romances. El primero trata de un desafío que se hizo en Paris... El 77. es de qual sera aquel Cauallero,* s. l. ni a. (cfr. A. Rodríguez Moñino, *Diccionario bibliográfico de Pliegos Poéticos (siglo XVI),* Madrid, 1970, núm. 853). Aparte de las glosas impresas en el siglo XVI, el romance de *Don Manuel* se nos conserva manuscrito. El bien conocido *Cancioneiro de Évora* incluye en los ff. 50 v.-52 una versión; otra figura en el f. 112 v. de un *Cartapacio de un músico toledano de hacia 1575,* dado a conocer por A. Rodríguez Moñino. Pueden leerse ambas en A. L. Askins, *The Cancioneiro de Évora* (Berkeley y Los Angeles, 1965), pp. 85-86 y 142-143. Estas versiones manuscritas, al parecer relacionadas entre sí (pero no directamente), modifican bastante el texto del poema. Aunque sus variantes son el resultado de una trasmisión oral del romance, la tradición del siglo XX remonta al texto impreso del siglo XVI y no a estas versiones orales viejas (aunque el proceso de transformación tenga algunos elementos en común).

Pues a mi me gusta cada vez mas, es sencillo, tonto e idiota, como yo que también soy intuitivo...
Los otros, incluido Mozilla y excepto Opera, me parecen demasiado egocéntricos y en el peor de los casos incitantes al consumo desenfrenado, de muebles ForLady o sueños con Visa.
Ademas Chrome no padece de tener un boton para arreglarse (Windows Update) se arregla solo. Sin coste.
....
Pero si que tiene fallos, la rueda central del ratón va demasiado rápida, o que le falta un botón para retroceder en el sitio o para buscar en al sitio, que aun no he descubierto...
Además si fuese cierto que los americanos prefieren Yahoo a Google, es una razón mas y vuelvo a insistir en mas de lo mismo: la estadística es una ciencia que deja mucho que desear, es solo orientativa pero nunca será tan exacta como nos ha enseñado la Matemática, donde 1+1=2 y donde 0*x=0.
Aunque ....
la matemática tambien cae dentro de nuestra denostada capacidad de razonar.
Sabemos que si tenemos 1 cuento y escribimos otro cuento, ya tenemos 2 cuentos o dos bolas si te cuentas otra cosa.... pero en matemáticas el 1 absoluto es tan fácil de encontrar como el 1.00000300000200001002001, por lo cual podemos decir que las matemáticas, como la quimica,la fisica, la estadística, la justicia son todas prendas de lo mismo: el infinito.
Si existe o no es algo tan fácil de decir como que existe el 1 y el 0.
Ya no me atrevo a decir nada por miedo a quedar en ridículo otra vez mas....

¿Era necesario aportar tantos datos para decir que no te gusta algo porque tiene 1 fallo entre cada 10 aciertos?
¿Donde nos vemos?

Fecha: 19/09/2008 21:39.

PARA GRITAR “MUERA EL GACHUPÍN”: MANCEBÍA OLIVAR DE CHAMARTÍN

Hay barrios burgueses, hay barrios proletarios, hay barrios clericales y hay barrios putos. Para los que no conozcan Madrid, Chamartín es el barrio puto de la capital. Las damas de cadera y pubis oferentes que vemos en Jacometrezzo, Caballero de Gracia, Montera, y otras calles céntricas, sólo son reliquias de un pasado zarzuelero. Chamartín ofrece a quien quiera ver (o comprar) travestis sin operar, burguesas operadas, amas de casa retiradas de burdeles de autopista, banqueros en activo, concejales ambiciosos, menoreros que admiten visa, master card y american express . Y liberales.
El piojerío liberal que se concentra en la Fundación Olivar de Castillejo muestra una numantina resistencia al trabajo. Cuando al español le sale el gen hidalgo o atraca a su abuela o pone un bar o un lupanar. Los liberales tienen a sus muertos sobreexplotados. De Fernando de los Ríos sólo nos falta saber quién le ponía medias suelas a los botines, de García Lorca sabemos hasta la marca de brillantina, de Alberti aún estamos repitiendo la digestión de su primera mujer , y aún nos queda la segunda, si Dios no lo remedia y no nos manda algún estrangulador de viudas hiperactivas y lenguaraces.
O sea que, mientras dejamos a los muertos en barbecho, habrá que poner un bar o un lupanar.
En el año 2005, pillamos a la Fundación Olivar de Castillejo intentando montar, con éxoticas figuras de la restauración, un alegre chiringuito thailandés, que iba a destruir gran parte de un olivar centanario. El escándalo que se armó obligó al ayuntamiento de ese Pompidou pedáneo que es Ruiz Gallardón a declarar EL Olivar de Chamartín espacio máximamente protegido. Ruiz Gallardón sacrificó su irrefrenada pasión por el plexiglass y el macetero de cemento con tal de inutilizar 11.000 metros cuadrados en un distrito

feudo de esa Thatcher con olor a sacristía y repollo que es Esperanza Aguirre. Como la protección dejaba con el *derrière* al aire a los Castillejo, la gran familia liberal, en forma de Editorial Siglo XXI , y con José García Velasco como prestamero y plegador, acudió en su auxilio sirviéndose del Olivar de Castillejo como sede del negocio.
Los pagos de ese arriendo no serán fiscalizados, como tampoco pasarán inspección fiscal alguna las veces que la finca de Calle Menéndez Pidal, 3bis ha sido alquilada para jolgorios. Ruiz Gallardón y García Velasco andan en tratos y quitas con la Residencia de Estudiantes en una operación urbanística de envergadura mayor: la venta y especulación con los terrenos donde se hallan inmuebles de instituciones liberales: decenas de miles de metros cuadrados. Ya han caído varios edificios históricos y, de los liberales, sólo han protestado los únicos a los que no se les ha dejado meter cuchara. Eso sí las firmas de protesta van acompañadas con las puntillas y bolillos del ADN institucionista : *sobrino nieto del primo de la hija de un discípulo de Giner...*
Y Esperanza Aguirre (que tiene mucha afición al concejal obediente , pero aprovechado y tontiastuto), anda ocupadísima atendiendo en qué juzgados andan los escándalos de corrupción de sus chicos como para enterarse de nada. *"Íñigo, Íñigo, en la que me has metido...".*
Pero este año 2008 es el año de suerte de los liberales. Murió Diego Catalán, tábano cojonero donde los hubo y, además, se celebran los fastos centenarios contra el francés. No hay nación en el mundo que haya luchado con más valor, que haya derramado más sangre, ni haya mostrado mayor resistencia heroica a la civilización y el progreso. Fuera contra Roma, fuera contra Francia, el cerrilismo épico de nuestra patria merece, de cuando en cuando, ser rememorado.
Que seamos cerriles, no quiere decir que nos preocupe gran cosa la dignidad. Aparte del chalet y del coche de hortera pintojo con el que apabullar al cuñado, al español se la trae al pairo la dignidad. Y tiene una admiración obsequiosa y servil con el poder y el dinero. Tenemos dos expresidentes de gobierno de,correveidiles y mandilandines de Berlusconi, Slim, Mohamed de Marruecos, y Briattore, cuya mayor ambición es, como buenos señoritos de panpringao, ser invitados a yate con paparazzi. Aquí a nadie se le cae la cara de vergüenza de semejantes fantochadas.
Después de utilizar el Olivar para flamenquerías (subvencionadas por el Ayuntamiento de Madrid), la Fundación Olivar de Castillejo va a alquilarlo, contra toda norma de protección, incumpliendo ordenanzas municipales, y saltándose la declaración como Espacio urbanístico protegido, para que la Embajada de México conmemore el CXCVIII aniversario de la Independencia, en una fiesta donde es difícil distinguir quien tiene peor gusto, menos distinción y más costra de sarna cultural. Que una embajada cobre entradas a una fiesta nacional **es digno de esa gentuza que gobierna y representa a México. Que una fundación cultural (eso dicen que es jurídicamente) española alquile su sede para que se empapen de tequila los mismos indeseables que silencian los crímenes de Ciudad Juárez y los asesinatos y desaparecidos políticos de México, es revelador del grado de indignidad al que han llegado las escurrajas seminales de los santones liberales.
Cuando los invitados a la fiesta griten aquello de *"Muera el gachupín"*, supongo que los gachupines liberales estarán contando los billetes que les han puesto en el escote. Como decían nuestros antepasados: *"Puta la madre, puta la hija y puta la manta que las cobija".*

El espía que surgió del frío.

** *"En el marco de la celebración del 198 aniversario de la Independencia de México, la Embajada del país azteca en Madrid prepara una serie de eventos en los que el público podrá disfrutar de los tradicionales festejos al son del marichi y el tequila.*
La celebración comenzará el próximo 13 de septiembre con el V Festival Gastronómico Folklórico y

Cultural en el que los presentes podrán degustar la gastronomía y disfrutar de la música y el folklore del país latinoamericano.
Este evento, que tendrá un coste de venta anticipada de 15 euros y 20 en taquilla, se llevará a cabo en la Finca "El Olivar" de Chamartín (Menéndez Pidal, 3 bis) y cuenta con un cupo limitado de 1.200 personas."

Que poca vergüenza tienen algunos, la verdad, todo criticar, poco hacer y mucho envidiar. Piensan los mal pensantes que el olivar tiene todos los días por parte de ellos sus cuentas bancarias abiertas para su sostenimiento. No piensan los bien pensantes cuanto costará tener esos 11.000 metros cuadrados ahí para uso y disfrute de todo aquel que quiera disfrutar de ellos. La gen española tan dada a malgastar saliva, tirar por tierra todo lo que le pilla al paso, pero nunca jamás los veremos en la puerta del olivar diciéndonos: "necesitan ustedes algo"?.

Observo que manifiesta usted un contumaz desafecto por la ortografía y las más elementales normas de acentuación y puntuación que deben pautar un discurso racional.
La descoordinación sintáctica de su texto, supongo que tiene su origen en un conato frustrado de mímesis orteguiana sobre la esencia e inmanencia del ser español.
Dado que el término elegido, "gen" (< lat. genus, neutro) no existe aún, en nuestro idioma, en género femenino, le aconsejaría que opte por otro referente discursivo que goce de más solera etimológica, por ejemplo "gens", o el honesto "pueblo".
Si necesita cualquier manual sencillo para escribir, cartillas de redacción elemental, no dude en pedírmelos. Encantado de ser de utilidad a ese oasis de cultivada ignorancia que constituye su encomiable fundación, que "ut prisca gens mortalium paterna rura bobus exercet suis".
PS Usted ha sido alumno del Colegio Estudio ¿verdad ?

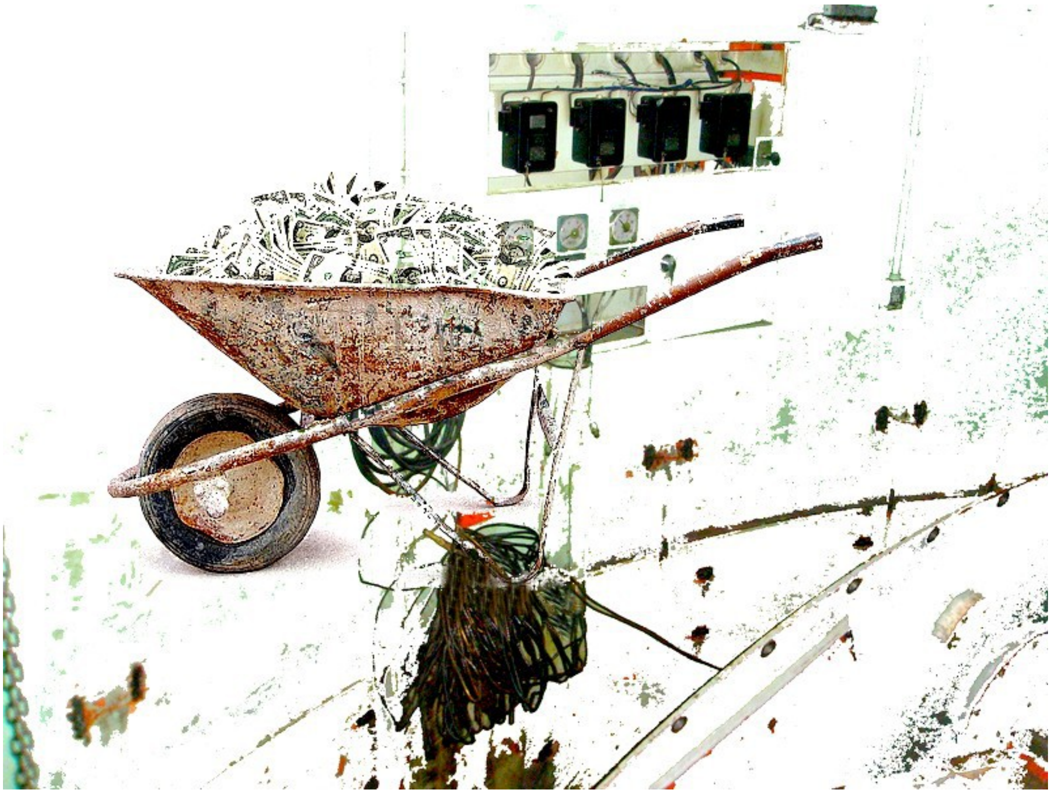
LA ESTAFA DE LOS CONTADORES DE LA LUZ PASO A PASO...



7.- LA ESTAFA, PASO A PASO: PLANIFICACIÓN
Dado que para la mejor comprensión de este punto le es necesario tener en cuenta una parte de lo expuesto en el punto anterior, le resumo seguidamente dicha parte.

7.1.- Resumen del punto 6
La póliza de abono es el contrato firmado por la compañía eléctrica que suministra la energía y el abonado que la consume. Tanto la póliza de abono aprobada el 12.03.1954 como la aprobada el 20.08.1981 establecen que

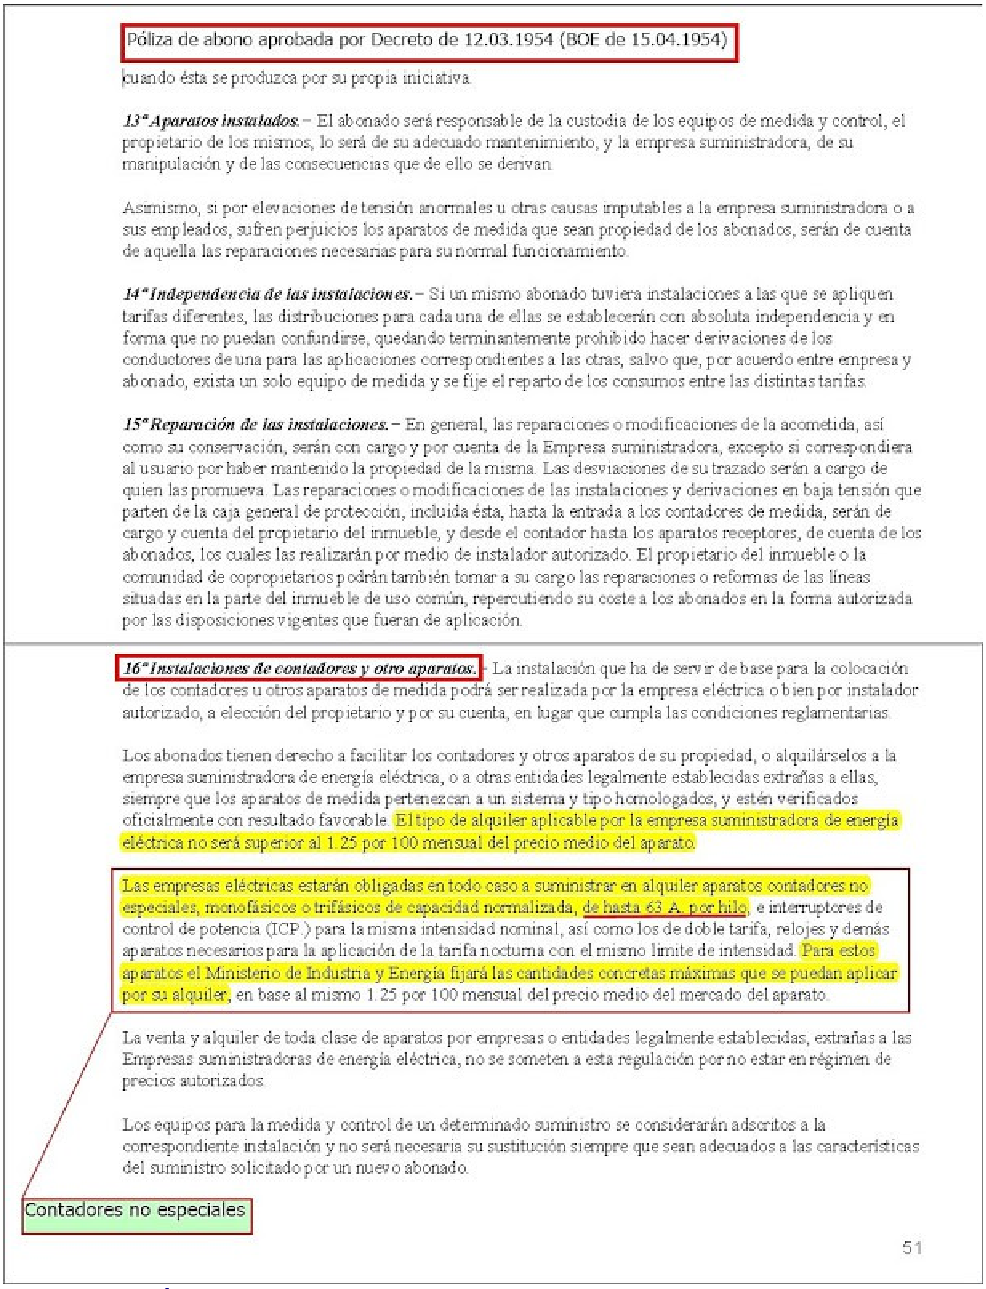
- los precios de alquiler de los contadores no especiales de intensidad máxima igual o inferior a la especificada en la póliza de abono son fijados por el Ministerio de Industria (y, por tanto, aparecen publicados en el Boletín Oficial del Estado)

- los precios de alquiler de los contadores especiales y de los no especiales de intensidad máxima superior a la especificada en la póliza de abono son fijados por las compañías eléctricas (y, por tanto, no aparecen publicados en el BOE)

- el precio mensual de alquiler de un contador, sea fijado dicho precio por el Ministerio de Industria o por las compañías eléctricas, no será nunca superior al 1.25% del precio medio de mercado del contador

Puesto que el precio medio de mercado de un contador es un dato confidencial conocido sólo por los fabricantes y las compañías eléctricas, a éstas les interesa que el número de contadores cuyos precios de alquiler sean fijados por ellas sea el mayor posible, ya que al cliente le es imposible comprobar que el precio que le están cobrando por el alquiler no es superior al 1.25% del precio medio de mercado del contador.

El fraude cometido por las compañías eléctricas y UCD en la póliza de abono aprobada el 20.08.1981 consistió en sustituir el valor de la intensidad máxima especificado en la condición general 16 de la póliza de abono aprobada el 12.03.1954 (Imáx= 63 amperios) por un valor inferior (Imáx= 50 amperios).



Póliza de abono aprobada por Decreto de 12.03.1954 (BOE de 15.04.1954)

cuando ésta se produzca por su propia iniciativa.

13ª Aparatos instalados.– El abonado será responsable de la custodia de los equipos de medida y control, el propietario de los mismos, lo será de su adecuado mantenimiento, y la empresa suministradora, de su manipulación y de las consecuencias que de ello se deriven.

Asimismo, si por elevaciones de tensión anormales u otras causas imputables a la empresa suministradora o a sus empleados, sufren perjuicios los aparatos de medida que sean propiedad de los abonados, serán de cuenta de aquella las reparaciones necesarias para su normal funcionamiento.

14ª Independencia de las instalaciones.– Si un mismo abonado tuviera instalaciones a las que se apliquen tarifas diferentes, las distribuciones para cada una de ellas se establecerán con absoluta independencia y en forma que no puedan confundirse, quedando terminantemente prohibido hacer derivaciones de los conductores de una para las aplicaciones correspondientes a las otras, salvo que, por acuerdo entre empresa y abonado, exista un solo equipo de medida y se fije el reparto de los consumos entre las distintas tarifas.

15ª Reparación de las instalaciones.– En general, las reparaciones o modificaciones de la acometida, así como su conservación, serán con cargo y por cuenta de la Empresa suministradora, excepto si correspondiera al usuario por haber mantenido la propiedad de la misma. Las desviaciones de su trazado serán a cargo de quien las promueva. Las reparaciones o modificaciones de las instalaciones y derivaciones en baja tensión que parten de la caja general de protección, incluida ésta, hasta la entrada a los contadores de medida, serán de cargo y cuenta del propietario del inmueble, y desde el contador hasta los aparatos receptores, de cuenta de los abonados, los cuales las realizarán por medio de instalador autorizado. El propietario del inmueble o la comunidad de copropietarios podrán también tomar a su cargo las reparaciones o reformas de las líneas situadas en la parte del inmueble de uso común, repercutiendo su coste a los abonados en la forma autorizada por las disposiciones vigentes que fueran de aplicación.

16ª Instalaciones de contadores y otro aparatos.– La instalación que ha de servir de base para la colocación de los contadores u otros aparatos de medida podrá ser realizada por la empresa eléctrica o bien por instalador autorizado, a elección del propietario y por su cuenta, en lugar que cumpla las condiciones reglamentarias.

Los abonados tienen derecho a facilitar los contadores y otros aparatos de su propiedad, o alquilárselos a la empresa suministradora de energía eléctrica, o a otras entidades legalmente establecidas extrañas a ellas, siempre que los aparatos de medida pertenezcan a un sistema y tipo homologados, y estén verificados oficialmente con resultado favorable. El tipo de alquiler aplicable por la empresa suministradora de energía eléctrica no será superior al 1.25 por 100 mensual del precio medio del aparato.

Las empresas eléctricas estarán obligadas en todo caso a suministrar en alquiler aparatos contadores no especiales, monofásicos o trifásicos de capacidad normalizada, de hasta 63 A. por hilo, e interruptores de control de potencia (ICP.) para la misma intensidad nominal, así como los de doble tarifa, relojes y demás aparatos necesarios para la aplicación de la tarifa nocturna con el mismo límite de intensidad. Para estos aparatos el Ministerio de Industria y Energía fijará las cantidades concretas máximas que se puedan aplicar por su alquiler, en base al mismo 1.25 por 100 mensual del precio medio del mercado del aparato.

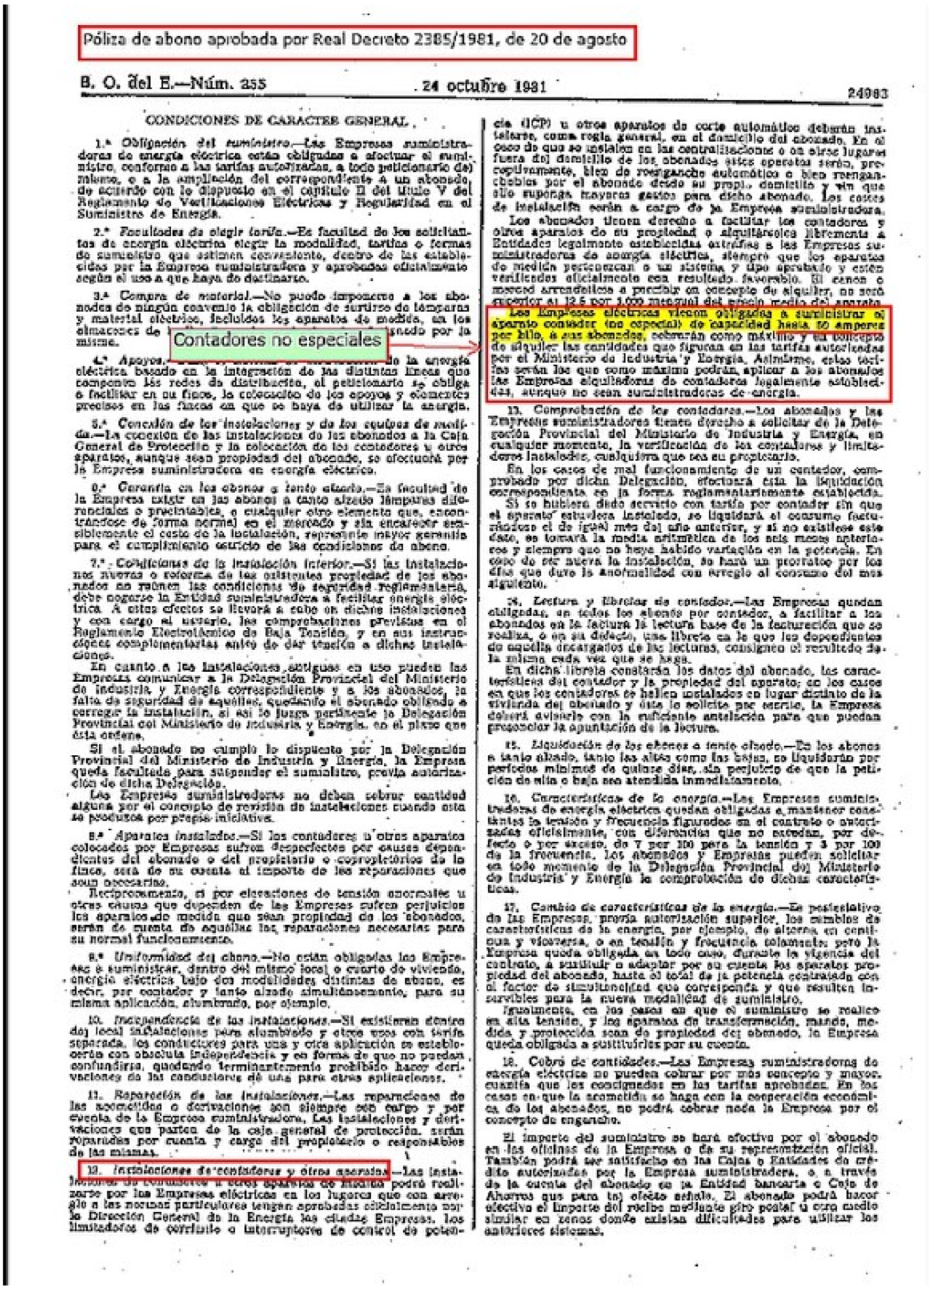
La venta y alquiler de toda clase de aparatos por empresas o entidades legalmente establecidas, extrañas a las Empresas suministradoras de energía eléctrica, no se someten a esta regulación por no estar en régimen de precios autorizados.

Los equipos para la medida y control de un determinado suministro se considerarán adscritos a la correspondiente instalación y no será necesaria su sustitución siempre que sean adecuados a las características del suministro solicitado por un nuevo abonado.

Contadores no especiales

51

Documento Imáx= 63 amperios.pdf



Documento [**Imáx= 50 amperios.pdf**]

La finalidad de dicha sustitución era dejar una puerta abierta para que fueran las compañías eléctricas y no el Ministerio de Industria las que fijaran el precio de alquiler de los contadores no especiales de Imáx > 50 amperios, entre los cuales se encontraba el contador doméstico monofásico de Imáx= 60 amperios, que era el único tipo de contador doméstico monofásico que se fabricaba ya (el contador doméstico monofásico constituye el 86% del parque nacional en alquiler, de ahí el interés de las compañías eléctricas por incrementar el precio de dicho alquiler).

INFORME DE 25.10.07 DE LA COMISIÓN NACIONAL DE ENERGÍA SOBRE EL MANDATO ESTABLECIDO EN EL REAL DECRETO 1634/2006 RELATIVO AL PLAN DE SUSTITUCIÓN DE EQUIPOS DE MEDIDA

Documento: el contador doméstico monofásico constituye el 86% del parque nacional en alquiler.pdf

El precio de alquiler del contador doméstico monofásico de Imáx= 60 amperios fue incrementado por las compañías eléctricas el mismo día de la entrada en vigor de la nueva póliza de abono. En el caso de Sevillana de Electricidad (la actual Sevillana-Endesa), dicho precio pasó de 3.70 pts/mes a 81.85 pts/mes, lo que supuso un incremento del 2.211,16%.

Orden del Ministerio de Industria de 11.06.1957 (BOE de 18.06.1957)

Condiciones de aplicación de esta tarifa

Queda facultada la Dirección General de Industria para modificar las horas de utilización en horas por mes que determinan la cuantía en kWh. de los tres bloques de la tarifa, ajustándolos a los datos que se deriven de los consumos reales en la actualidad en relación con las potencias contratadas.

Art. 2.º Los precios de alquiler de contadores que figuran en el artículo 2.º de la Orden ministerial de 4 de marzo de 1955 son sustituidos por los siguientes:

	Alquiler mensual — Pesetas
Para corriente continua y alterna monofásica:	
Hasta 10 amperios inclusive	2,45
De 10 a 15 amperios	3,70
Cada 5 amperios más o fracción sobre 15 hasta 50 amperios	0,60
Hasta 2 × 5 amperios	3,70
Cada 2 × 5 amperios más o fracción, suplemento de	1,20
Para corriente alterna trifásica y hasta 50 amperios por hilo:	
Hasta 5 amperios por fase	4,90
Cada 5 amperios más o fracción, suplemento de	1,20

Art. 3.º Siguiendo las normas dispuestas en el apartado j) del artículo 82 del Reglamento de Verificaciones Eléctricas, y en el artículo 3.º del Decreto de 31 de mayo del año en curso, que regulan la contratación entre las Empresas productoras y distribuidoras de energía, en los casos en que la Dirección General de Industria o sus Delegaciones Provinciales hayan de intervenir para establecer los precios de venta, dichos Organismos podrán fijar como tope máximo para estas cesiones en alta tensión los precios de la tarifa V b) de usos industriales, con descuentos comprendidos entre el 7,5 por 100 y el 15 por 100, según las condiciones de entrega de la energía.

Art. 4.º Los precios base fijados por el Ministerio de Industria para los suministros especiales a que se refiere el apartado k) del Decreto de 22 de enero de 1952 podrán ser elevados por las Compañías suministradoras de energía en el 23 por 100. El complemento «m» para estos suministros especiales seguirá siendo el 60 por 100 de lo establecido con carácter general para los suministros para usos industriales, con lo que «m» será para lo sucesivo igual a 30 para dichos suministros, en lugar del 36 que se venía aplicando actualmente.

Los suministros de energía para tracción eléctrica serán objeto de normas especiales, que se publicarán oportunamente.

Art. 5.º Los recargos porcentuales concedidos inicialmente en la forma dispuesta en el artículo adicional del Decreto de 14 de noviembre de 1952 y revisados con arreglo a lo ordenado en el Decreto de 4 de marzo de 1955, serán reajustados nuevamente mediante las normas que al efecto serán dictadas por la Dirección General de Industria.

Como consecuencia del reajuste que se lleve a cabo, se conservarán los recargos que a juicio de las Delegaciones de Industria estuvieren suficientemente justificados, pero estableciendo para ellos el tope máximo que se determine sobre la tarifa general correspondiente.

Con arreglo a las instrucciones de la Dirección General de Industria las Empresas que por las condiciones especiales de su explotación no encajasen dentro del sistema unificado después del reajuste que se apruebe, ni aun con el aumento máximo que se fije por la Dirección General de Industria, pueden solicitar de las Delegaciones de Industria la aprobación de otros precios diferentes de las tarifas tope para cada Empresa, mediante la justificación de sus gastos, considerando que en los casos en que esto ocurra se ha de tener en cuenta el costo de la energía [illegible] do para [illegible] tores [illegible] fas to[illegible]

Precio aplicado a los contadores de Inom= 15 amperios e Imáx=60 amperios antes de la entrada en vigor de la póliza de abono aprobada el 20.08.1981

Art. [illegible] la energía [illegible] a aplic[illegible] Empresas [illegible] con las Tarifas Tope Unificadas.

Art. 7.º Continúa vigente todo lo dispuesto en las Ordenes ministeriales de 23 de diciembre de 1952 y 4 de marzo de 1955 que no haya sido objeto de modificación por la presente Orden, para cuya aplicación serán dictadas por la Dirección General de Industria las normas complementarias que se consideren oportunas.

Lo digo a V. I. para su conocimiento y demás efectos.

Dios guarde a V. I. muchos años.

Madrid, 11 de junio de 1957.

PLANELL

Ilmo. Sr. Director general de Industria.

MINISTERIO DE INFORMACION Y TURISMO

Rectificación a la Orden de 1 de junio de 1957 que regulaba los cursos especiales de Periodismo que vienen celebrándose en Salou.

Habiéndose padecido error en la inserción de la citada disposición, publicada en el BOLETIN OFICIAL DEL ESTADO número 157, correspondiente al día 17 de junio de 1957, página 432 *, Sección I, se rectifica en el sentido de que donde dice «...el Delegado del Movimiento de Información y Turismo en Tarragona...», debe decir «...el Delegado del Ministerio de Información y Turismo en Tarragona...»

Documento: Orden M.Industria, 11-06-1957 ...*dicho precio pasó de 3.70 pts/mes.*pdf

129

Página 129 del Informe de diciembre de 1984 de la DG de Industria, Energía y Minas de la Consejería de Economía, Planificación, Industria y Energía de la Junta de Andalucía sobre presuntas irregularidades cometidas por Compañía Sevillana de Electricidad.

.../...

Que en todos los casos en que se ha instalado contador recargable / se ha hecho constar en el contrato, sin que, salvo casos excepcionales ha ya existido disconformidad por parte del abonado.

Que desde el año 1957 no se han vuelto a revisar las tarifas de alquiler de contadores. En la actualidad, en las tarifas de baja tensión -/ 2.0 y 3.0 el número de contadores recargables y total es el siguiente:

	Recargables	Totales	%
Contadores monofásicos	203.418	2.344.418	8'7
Contadores trifásicos	2.835	33.618	8'4

El alquiler que cobra actualmente por este tipo de contadores"recargables" es el siguiente:

Monofásico .... 81'18 Ptas/mes.
Trifásico ....235'25 Ptas/mes.

En cuanto al caso concreto que plantea la documentación anexa al Informe del parlamentario Sr. Carmona, referente a recibos de la Caja Rural Provincial de Jaén, se trata de tres recibos distintos con equipos de medida propiedad de la Compañía, aunque especiales, cuyo alquiler estaba -/ por debajo del 12'5 por mil por circunstancias desconocidas, y que fueron actualizados en su momento.

Precio aplicado por Sevillana de Electricidad a los contadores de Inom= 15 amperios e Imáx=60 amperios después de la entrada en vigor de la póliza de abono aprobada el 20.08.1981 (antes de dicha entrada en vigor, el precio de alquiler era 3.70 pesetas/mes)

...

Documento: ***...a [81.85 pts/mes](), lo que supuso un incremento del 2.211,16%*.pdf**

Sin embargo, UCD y las compañías eléctricas cometieron un error, ya que la sustitución de 63 por 50 amperios en la póliza de abono aprobada el 20.08.1981 no era razón legal para incrementar el precio de alquiler del contador doméstico monofásico, pues los precios de alquiler vigentes en la fecha de entrada en vigor de la citada póliza (los establecidos por el Ministerio de Industria en el **artículo 2** de la **Orden de 11.06.1957** (Véase Documento) era en función de la intensidad nominal del contador y no de la intensidad máxima.

Por tanto, dado que

> **a) la intensidad nominal del contador doméstico monofásico de Imáx= 60 amperios era (y es) Inom= 15 amperios**
> **b) el artículo 2 de la Orden de 11.06.1957 establecía que el precio de alquiler del contador monofásico de intensidad nominal entre 10 y 15 amperios era 3.70 pts/mes**
> **c) el artículo 2 de la Orden de 11.06.1957 no había sido derogado,**

el Ministerio de Industria, responsable de la sustitución (de 63 por 50 amperios) que había dado lugar al fraude, se vio obligado a reconocer que el precio de alquiler del contador doméstico

monofásico de Imáx= 60 amperios continuaba siendo el especificado en el artículo 2 de la Orden de 11.06.1957 (3.70 pesetas/mes) y resolvió que las compañías eléctricas devolvieran las cantidades cobradas en exceso (en el caso de Iberduero, 1.500 millones de pesetas).

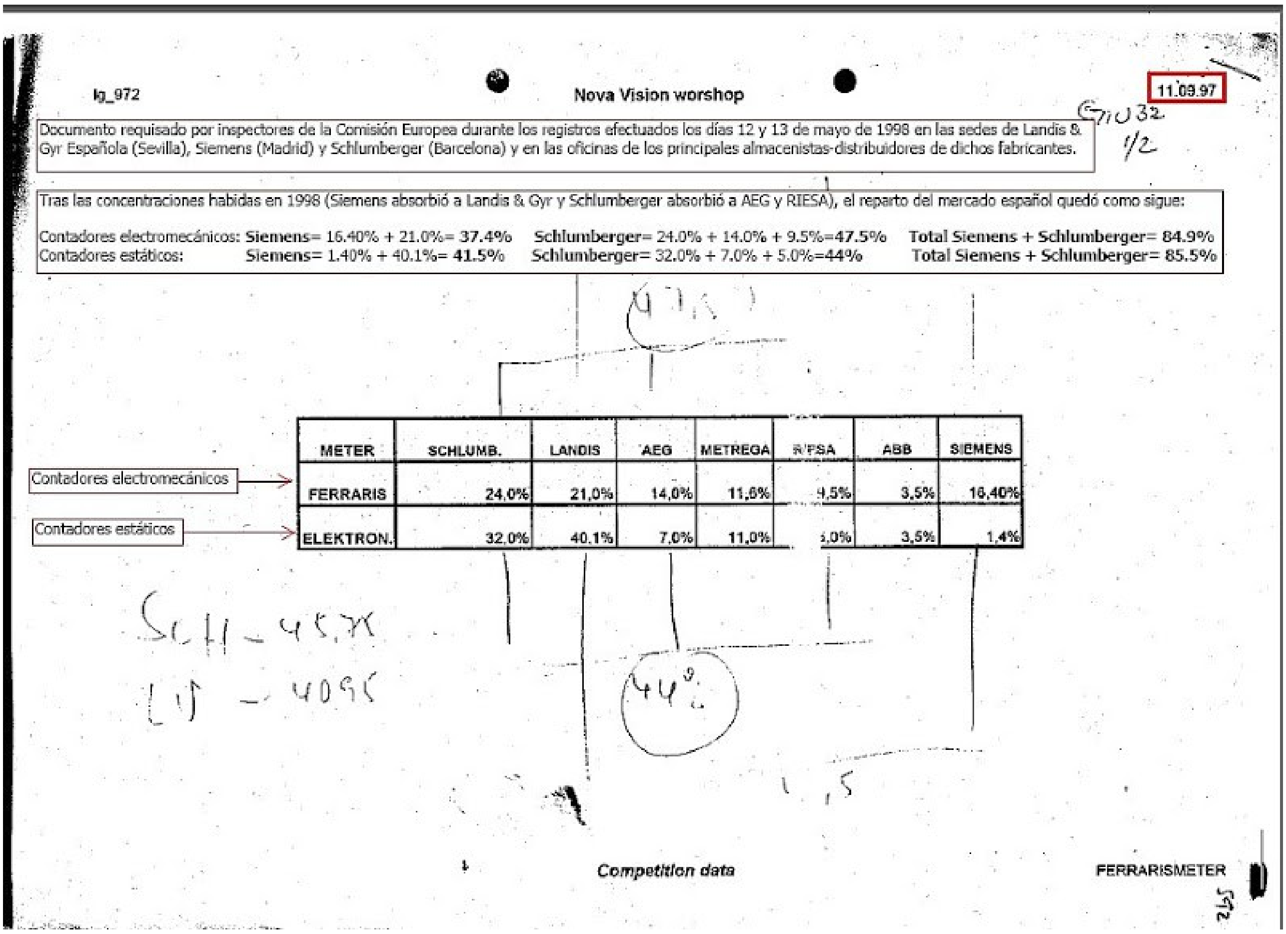
El fracaso del fraude cometido en la póliza de abono de 20.08.1981 no desanimó a las compañías eléctricas, ya que desde el 01.12.1982 gobernaba el PSOE, partido que, como quedó patente en el punto anterior, había demostrado sobradamente su capacidad de colaboración al investigar las 29 irregularidades de Sevillana de Electricidad denunciadas ante el Parlamento de Andalucía por los diputados Juan Carmona Infantes y Jesús Lechuga Gallego y, muy especialmente, al redactar los dos informes sobre dicha investigación.

Dados, pues, el interés de las compañías eléctricas por cobrar unos precios de alquiler superiores a los especificados en el artículo 2 de la Orden de 11.06.07 y la capacidad de colaboración del PSOE, éste y aquéllas planificaron una estafa que permitiera cobrar unos precios de alquiler muy superiores a los máximos establecidos en la póliza de abono (1.25% del precio medio de mercado del contador) e hiciera imposible que una persona ajena a los implicados descubriera dicha estafa.

Para que usted comprenda cómo fue planificada dicha estafa, es necesario que antes le explique la estructura del mercado español de contadores de la luz.

7.2.- El mercado español de contadores de la luz
En teoría, los actores del mercado español de contadores de la luz son tres:

- **Los fabricantes**, que sólo venden a las compañías eléctricas y a los almacenistas-distribuidores. En 1983, año en que se planificó la estafa, los fabricantes eran siete, de los cuales, tres (las multinacionales Schlumberger, norteamericana; Landis & Gyr, suiza, y Siemens, alemana) controlaban el 61.40% del mercado. En 1998, tras una serie de absorciones, Schlumberger y Siemens pasaron a controlar el 84.90% del mercado.



lg_972 **Nova Vision worshop** 11.09.97

Documento requisado por inspectores de la Comisión Europea durante los registros efectuados los días 12 y 13 de mayo de 1998 en las sedes de Landis & Gyr Española (Sevilla), Siemens (Madrid) y Schlumberger (Barcelona) y en las oficinas de los principales almacenistas-distribuidores de dichos fabricantes.

Tras las concentraciones habidas en 1998 (Siemens absorbió a Landis & Gyr y Schlumberger absorbió a AEG y RIESA), el reparto del mercado español quedó como sigue:

Contadores electromecánicos: **Siemens**= 16.40% + 21.0%= **37.4%** **Schlumberger**= 24.0% + 14.0% + 9.5%=**47.5%** **Total Siemens + Schlumberger= 84.9%**
Contadores estáticos: **Siemens**= 1.40% + 40.1%= **41.5%** **Schlumberger**= 32.0% + 7.0% + 5.0%=**44%** **Total Siemens + Schlumberger= 85.5%**

METER	SCHLUMB.	LANDIS	AEG	METREGA	R/FSA	ABB	SIEMENS
FERRARIS	24,0%	21,0%	14,0%	11,6%	[illegible],5%	3,5%	16,40%
ELEKTRON.	32,0%	40,1%	7,0%	11,0%	[illegible],0%	3,5%	1,4%

Contadores electromecánicos → FERRARIS
Contadores estáticos → ELEKTRON.

Competition data FERRARISMETER

Documento: ...las multinacionales Schlumberger, Landis & Gyr, y Siemens, controlaban el 61.40%.pdf del mercado.

- **Las grandes compañías eléctricas, agrupadas en UNESA**, que compran los contadores para alquilárselos a sus clientes. El porcentaje adquirido por las compañias eléctricas es el 85% del total de los contadores vendidos en España

- **los almacenistas-distribuidores**, que compran los contadores para vendérselos a los usuarios que prefieren tener el contador en propiedad a alquilarlo a la compañía eléctrica. El porcentaje adquirido por los almacenistas-distribuidores es el 15% del total de los contadores vendidos en España.

En la práctica, sin embargo, sólo hay dos actores: las grandes compañías eléctricas y los fabricantes, ya que, como demostraré más adelante, los almacenistas-distribuidores están controlados por los fabricantes.

Así pues, a finales de 1983, en que se planifica la estafa, la estructura del mercado español de contadores de la luz es la siguiente:

- Hay sólo dos actores: los fabricantes y las grandes compañías eléctricas.

- Tres de los fabricantes (Schlumberger, Landis y Siemens) controlan el 61.40% del mercado.

- Las compañías eléctricas compran el 85% de los contadores vendidos en España.

- Las grandes compañías eléctricas y los fabricantes están vinculados a través sus consejos de administración.

Por tanto, dada la total dependencia de los fabricantes respecto de las compañías eléctricas, para llevar a cabo la estafa sólo era necesario que las compañías eléctricas y el partido en el Gobierno,

que desde el 01.12.1982 era el PSOE, se pusieran de acuerdo.

El acuerdo se produjo sin ninguna dificultad dada la excelente predisposición del PSOE a colaborar con las compañías eléctricas. Según se desprende de los documentos que le iré facilitando, el acuerdo fue el siguiente:

7.3.- El acuerdo entre el PSOE y las compañías eléctricas

- El Gobierno aprobaría una nueva póliza de abono en la que las condiciones relativas al alquiler de los contadores serían idénticas a las establecidas en la póliza de abono aprobada el 12.03.1954, quedando, por tanto, anulada la sustitución de Imáx= 63 amperios por Imáx= 50 amperios establecida en la condición general 12 de la póliza de abono aprobada el 20.08.1981.

- La estafa se cometería en los precios de alquiler fijados por el Ministerio de Industria, que son los publicados en el Boletín Oficial del Estado (BOE), no en los fijados por las compañías eléctricas. Con ello, la estafa quedaría encubierta, pues ¿qué persona que tuviera alquilado un contador iba a sospechar (y menos, a probar) que el BOE estaba siendo utilizado por el Gobierno para cometer una estafa de miles de millones de pesetas anuales en favor de las compañías eléctricas?

Asi pues, en el acuerdo entre el PSOE y las compañías eléctricas para cometer la estafa, un papel fundamental correspondía a los fabricantes, ya que éstos eran los encargados, tanto de facilitar al Ministerio de Industria los precios medios de mercado falsos, en los que se basaría la estafa, como de imponer a los almacenistas las restricciones necesarias para hacer antieconómica la compra de contador, y obligar al usuario final a alquilar éste a la compañía eléctrica.

Para cumplir adecuadamente ese papel fundamental en la estafa, los fabricantes crearon un grupo clandestino al que denominaron Contact, posiblemente en honor al grupo del mismo nombre que representó los intereses de los fabricantes durante el franquismo.

PRÓXIMA ENTREGA
En la próxima entrega, que tengo previsto publicar el 15 de septiembre, le informaré sobre quiénes integran el grupo Contact y cómo opera y cuáles son las verdaderas funciones de dicho grupo, una de las cuales, que perjudicaba gravemente a las compañías eléctricas, era desconocida por éstas.

Muchas gracias por su atención.

EL MAL

Brilla como oro purísimo el mal,
y se proclama sin bostezos.
Con billetes de exótico valor
inhalan en polvo
la euforia del triunfo.
Mientras sirvo el café y los licores,
con mi uniforme almidonado,
un cargamento de armas
pagará mi sueldo y sus excesos.
Y alguien pisará una mina en Zambia
buscando hierbas comestibles.

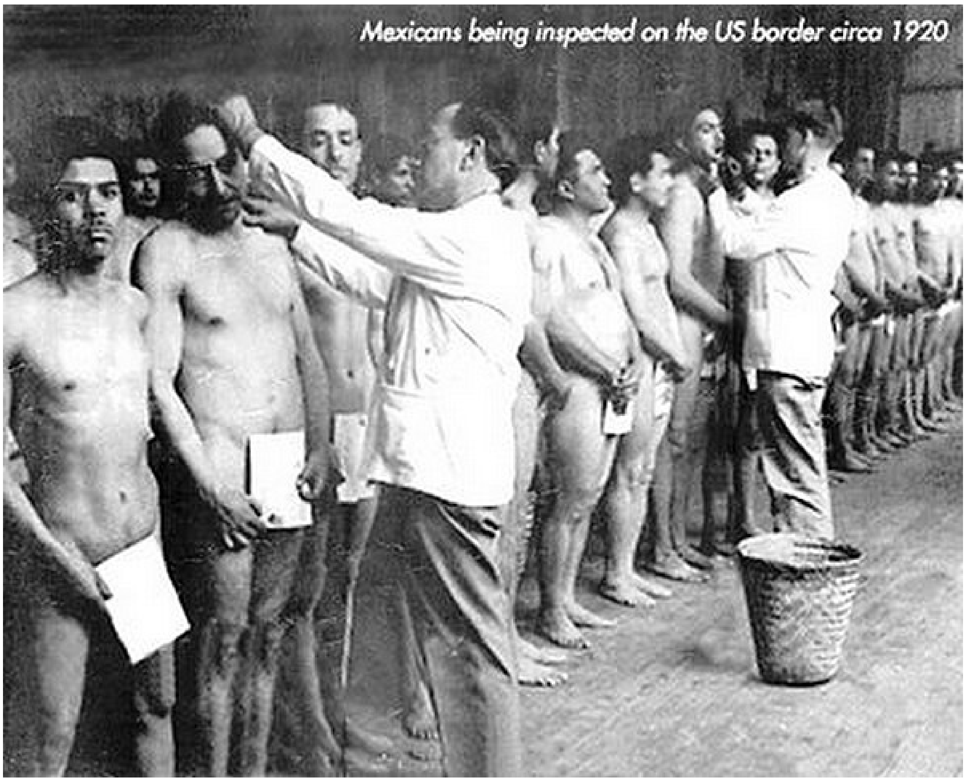
INFORME DE LA FEDERACIÓN INTERNACIONAL DE DERECHOS HUMANOS: EN DOCE AÑOS, 4.000 MUERTOS EN LA FRONTERA NORTE DE MÉXICO



"Rafael era un joven de grandes aspiraciones, su mayor sueño: poderle dar a su familia lo necesario para no pasar hambre, educarlos, vestirlos y hasta poderles brindar algo de diversión. Era un miércoles por la noche cuando se despidió de sus seres queridos (Ana, su esposa; Magali de cuatro años y Sofía de seis meses, sus dos hijas y de Eva, su madre) y de su natal Oaxaca. El coyote ya lo esperaba en un hotel de Tijuana, le había cobrado dos mil dólares (poco más de 20 mil pesos), la mitad del dinero lo entregó al llegar a ese lugar de mala muerte y el resto debía entregarlo ya en suelo americano donde lo esperarían sus hermanos que ya tienen más de 10 años allá. Todo marchaba bien cuando Rafael, otros mexicanos y varios centroamericanos bajaban de un vehículo, tenían que correr entre la maleza y parte del desierto en Estados Unidos de América. Sin más ropa que la necesaria para cubrirse, iban a toda prisa cuando se escucharon las sirenas de la patrulla fronteriza. Sin preguntarles nada, empezó la cacería, se escuchaban balazos y maldiciones por todas partes. Rafael y Omar lograron escabullirse, la suerte estaba de su lado o al menos eso creyeron ellos. Al llegar a un lugar que parecía un restaurante, un gringo le apunto con una pistola. Rafael no entendía que decía, se mantuvo estático para evitar el enojo de su agresor. Minutos después aparecieron varios agentes, desde ese momento Rafael se convirtió en punto toral para descargar la ira de los gringos no en contra de él sino de todos los migrantes, después de eso ya no recordó nada… Hoy Rafael vive en Oaxaca con su misma pobreza, pero, ahora lo acompaña una silla de ruedas, su parálisis es consecuencia de aquella paliza en manos de los policías gringos".

La constante violación a los derechos humanos de millones de migrantes en el mundo es uno de los problemas que más preocupa a los gobiernos de diversas naciones, principalmente, a los del continente americano, pues, según datos de organismos internacionales, en los últimos 12 años han muerto más de 4 mil personas que intentaron cruzar la frontera entre México y Estados Unidos de América.

En un informe realizado por la Federación Internacional de Derechos Humanos (FIDH) –que llegó hasta Forum– indica que desde la firma del Tratado de Libre Comercio de América del Norte (TLCAN), en 1994, EEUU ha triplicado el número de guardias fronterizos para controlar la inmigración irregular; además de que ha incrementado la construcción de barreras para asegurar su frontera, para lo cual ha invertido 30 mil millones de dólares.

Sin embargo, la migración no deja de fluir, cifras demuestran que, pese a la estricta vigilancia, el número de indocumentados que cruzan al avecino país se duplicó entre 1994 y 2003 hasta alcanzar un promedio anual de 500 mil personas.
"Para muestra un botón", dice un viejo dicho popular; tan sólo en 2007, los inmigrantes mexicanos en Estados Unidos enviaron a sus familias más de 25 mil millones de dólares en remesas, dinero que benefició, en su mayoría, a hogares rurales.
Hasta aquí pudiera pensarse que el problema migratorio no pasa a mayores; sin embargo, el documento revela la existencia de verdaderos casos de brutalidad al momento de que los migrantes son aprehendidos en su caminar rumbo al "sueño americano" o cuando son detectados como trabajadores indocumentados ya en territorio estadounidense.
En 2006, dice el texto, las autoridades estadounidenses expulsaron a casi 900.000 extranjeros, más de 500.000 de ellos eran connacionales mientras que las autoridades mexicanas interceptaron y deportaron a cerca de 200 mil centroamericanos que intentaban cruzar la frontera. En 2007 se expulsó de Estados Unidos a cerca de 250 mil mexicanos, en el contexto de una *"estrategia que ha tenido amplia aceptación y apoyo por la población de ese país"*.
Lamentablemente la FIDE señala que en México es habitual que agentes de las distintas corporaciones policiacas y de seguridad pública extorsionen a los inmigrantes centroamericanos que cruzan la frontera sur, en tanto que en Estados Unidos se han registrado numerosos casos de brutalidad, violencia verbal e intimidación por los agentes fronterizos hacia los inmigrantes.
Al respecto, para el relator especial de la Organización de las Naciones Unidas (ONU) para los Derechos Humanos, Jorge Bustamante, las violaciones a las garantías individuales que se cometen en México en contra de los inmigrantes centroamericanos son iguales o incluso peores a las que ocurren en contra de los indocumentados mexicanos en Estados Unidos.
"Hay una gran indiferencia de la sociedad civil hacia las graves violaciones a los derechos humanos de los migrantes en Estados Unido; así como también, sobre las que sufren los centroamericanos que entran a México por la frontera sur, con la intención de llegar al vecino país. Vemos a los inmigrantes centroamericanos como inferiores a nosotros; eso es racismo a la mexicana, es un cáncer respecto del cual no hacemos nada".
Es lamentable, dijo el especialista de la ONU, que ni la sociedad ni el gobierno mexicanos, hayan hecho algo para neutralizar o evitar las redadas policiales en contra de inmigrantes mexicanos en Estados Unidos, iniciadas de manera sistemática y continua en mayo de 1996 hasta la fecha.
Agrega que en estas redadas se da la separación de las familias y el allanamiento de domicilios, los que constituyen gravísimas violaciones a derechos humanos básicos. La política de inmigración de Estados Unidos caracteriza a México como "enemigo" y a los migrantes indocumentados como "criminales".
Jorge Bustamante detalló que la impunidad con la que se llevó a la práctica la criminalización de los judíos en tiempos de la Alemania nazi "*es de la misma naturaleza sociológica que la criminalización a priori de todo aquel que por el color de su piel parezca mexicano en Estados Unidos".*
"La resistencia de Estados Unidos a reconocer la demanda de la fuerza laboral de los

migrantes mexicanos está conectada con el crecimiento de la xenofobia en esa nación y también de las propuestas antinmigrantes. Estos migrantes son los mismos que han mantenido y mantienen la economía de ese país, ya que tan sólo el año pasado enviaron remesas por 25 mil millones de dólares".
Por otra parte, la Comisión Económica para América Latina y el Caribe (Cepal), estima que el número de migrantes aumentó de 21 millones en el 2000 a casi 25 millones en el 2005 en América Latina y el Caribe, cifra que representa el 13 por ciento del total mundial y que revela la necesidad de impulsar medidas para proteger los derechos humanos de estas personas.
México, la comunidad del Caribe y Colombia, tienen la mayor cantidad de emigrantes, superando el millón de personas en cada caso. Otros nueve países sobrepasan el medio millón cada uno: Argentina, Brasil, Cuba, Ecuador, El Salvador, Guatemala, Haití, Perú y República Dominicana.
En varios países caribeños más de 20 por ciento de la población se encuentra en el exterior, mientras que en América Latina los porcentajes más altos corresponden a El Salvador, (14.5), Nicaragua (9.6), México (9.4), República Dominicana (9.3), Cuba (8.7) y Uruguay (8.3).
Estados Unidos sigue siendo el principal destino de esta población. Hacia el 2004 había 18 millones de inmigrantes provenientes de la región, quienes junto a sus descendientes nacidos allá constituyen la primera minoría étnica del país, y de los cuales casi la mitad vive en forma indocumentada.
Es en este contexto que México participará en el Foro sobre Migración y Desarrollo que se celebrará en Manila, Filipinas, en octubre de 2008. La Secretaría de Relaciones Exteriores (SRE) y la Organización Internacional para las Migraciones (OIM), ya tuvieron su primer acercamiento en el que participó la presidenta de la Comisión de Equidad de Género de la Cámara de Diputados de México, diputada Maricela Contreras Julián.
La legisladora destaca ante Forum la prioridad del tema migratorio y la necesidad de promover discusiones que consideren al problema desde una perspectiva integral, más allá de concepciones parciales basadas en la seguridad nacional o de la simple gestión de flujos migratorios.
"Sólo a través de un debate amplio y con la participación de todos los actores involucrados, podrán forjarse los entendimientos necesarios para hacer frente a las migraciones internacionales y podrá colocarse a la persona del migrante en el centro de la discusión", advierte.
Aunque, dijo la legisladora, siempre es difícil en temas de esta índole, discutir las políticas restrictivas que existen y el disfrute de los derechos humanos de los migrantes, debemos abordar el tema en el ámbito mundial. *"Recuerden que participaremos al lado de Sudáfrica, Argentina, Brasil, Ecuador, El Salvador, Egipto, España, Filipinas, India, Turquía y Uruguay".*
Por otra parte, el presidente de la Comisión de Relaciones Exteriores para América del Norte del Senado de la República, el panista Ricardo García Cervantes, manifiesta que se hace necesario que legisladores de los partidos políticos, tomen cartas en el asunto sobre la violación de los derechos humanos de los migrantes. *"Debemos de comprometernos todos a defender a nuestros connacionales, si es preciso llegar hasta las cortes internacionales lo haremos para evitar que continúe el maltrato a los mexicanos que radican en Estados Unidos".*
Que recuerden, dijo el legislador, que formamos parte de organizaciones internacionales; hemos signado protocolos, acuerdos y tratados, y estamos bajo la jurisdicción de tribunales internacionales en materia de derechos humanos, donde haremos valer las denuncias violatorias de los derechos humanos de nuestros connacionales.
Al ser interrogado sobre la afirmación que hace la FIDE sobre el maltrato de migrantes centroamericanos que ocurre en nuestro país, el senador panista, no niega la existencia

de violencia y extorsión, *"es ahí donde los legisladores debemos estar muy atentos, debemos crear leyes que garanticen la integridad de quienes llegan a México sean o no indocumentados"*.

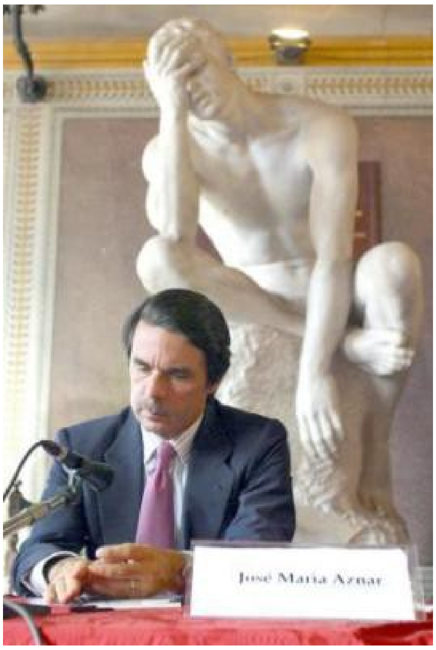
ALIMAÑA NEWS DESMIENTE A L'OBSERVATEUR DE MARRUECOS



A nuestros colegas marroquíes de l'Observateur: Aunque ustedes se empeñen, el padre del hijo que espera la ministra de Justicia del Gobierno que preside el marido de la intérprete de la canción de la pasada campaña de Nescafé, no es el marido de la concejal de Asuntos Sociales del Ayuntamiento que más cucarachas y ratas tiene por metro cuadrado de Europa.
Aunque parezca mentira, no todos los hijos de padre desconocido son suyos.
Y siento no poder dar nombres, pero es que el presunto futuro padre está por la labor de ponerle un piso a sus abogados a costa de los que nos hagamos eco de los rumores que hay de que Rachida Dati ha tenido el mal gusto de aceptarlo como donante de semen.

Alimaña, redactor-jefe de Alimaña News, la noticia antes de que ocurra.

Desaliento

CULTURA,CULTURA....
Desaliento total.Cola de 1 km
para ver Picasso,o lo que de el queda.De lejos se ven las volutas humeantes escapandose de las contrariadas fauces de los que esperan.Son como pequeñas chimeneas vomitando los humos y los insultos,la mala leche almacenada desde hace tantas horas.
Has visto? cuatro horas de cola...y tu decias que seria un suspiro...paciencia, paciencia dices?...los pies...
caràmbanos sin remision...con-
gelados y unas agujetas atroces...canallas...zenutrios
aret...cultura dicen.A fuerza de catarros y pulmonias haràn
la cola màs liviana,algunos
moriran...asi sea...5 grados bajo cero...en la calle...
chuzos de punta...sinapismos,
granujas...bandidos...
"Por Dios,càllate que nos miran" Que me calle? que me calle dices? tu los disculpas,los apoyas...
"No,no,te juro que no,pero..."
Ni pero ni nada...indecentes..
salteadores...avechuchos!...
--Oiga,por favor,un poco
de mesura,aqui,en este sitio..
"Usted quien es? quien le dio vela en este entierro? Oyes Maria? por tu culpa me agonizan...me insultan...me
agreden.Cuatro horas soportando horribles alitosis,
vientos...flatulencias...empu-
jones y ahora que me calle...
esbirros...lacayos...complices
El hombre fuera de si,ya no para,eructa...vomita insultos...trina...se encabrita.De repente una convulsion recorre el gentio,
una ola,una marea rugiente des-
bocada...todos corren,gritan;
" los vigilantes,han dichoi que pasemos todos.Todo el mundo corre hacia la verja.
No empujen...no peguen....
caidas...gritos...empellones..
la gente se abalanza como en las trincheras...adentro...adentro que se acaban los billetes...
oigan,despacio que me rompen el brazo!...nada,nada,adentro,
deprisa...vamos,vamos.
Todo es un indecible maremagnum.Unos tratan de
trampear y toman el atajo por
los jardines.La hierba,mojada,
resbalan...irremisible,caen
de bruces...juramentos...patadas
tratan de levantarse...se pisan los abrigos,algunos salen con los pantalones llenos de cacas de perro di-
simuladas en el cesped...una
señora pierde su bolso" Al
ladron!,al ladron!" grita,suplica" mis entradas...
mis entradas" Señora,por favor
no grite...el vigilante la
ayuda,elle se encabrita,agarra al vigilante
por el cuello,caen los dos

en terrible barahunda...el
gentio es arrollador...tiemblan las verjas ante el empuje;todo cede de golpe.Patatràs!
todos al suelo...enorme griterio...
sollozos...lamentos...imprope-
rios." Mi pierna...mi ojo...
apàrtese...oiga,caballero...
Gran confusion...piernas en alto...follones...tam,tam...
infame...policia! policia!
Pasa un ciego por alli,lleva
un perro lazarillo...gran pastor aleman...pocas bromas
con el...el ciegoi no comprende el griterio,el perro
tampoco.De repente sale pitando el animal...enloquecido por tan
grande batahola...arrastra al ciego por la acera,salta por
encima de la montaña de cuerpos debatiendose...se retuercen sobre la hierba,
imantados,pegados...imposible la separacion..." Paraaa,Sul-
tan! paraaa!" grita el ciego.
El perro,presa de un pànico
cerval muerde...babea...en-
gancha piernas...moyas...
nalgas...quijadas.El guirigay
es horrendo,el ciego no puede
màs,suelta la correa...cae sobre una señora gorda que vocifera" al violador! al violador!
socorro! el ciego se disculpa...trata de incorporarse,busca apoyo...a
tientas encuentra una teta de
la señora.Sorprendido se aparta como picado por un aspid.La gorda chilla "
Cerdo,suéltame !" Señora,señora,que no veo.
" como que no ve! tocar si sabes.Anda toca a tu madre!
por favor,por favor,señora...
" Guardias,guardias,a mi!
Un guardia llega sofocado.
empieza a pitar."Orden,orden!
en nombre de la ley"
Pero que dice este pavo?...se
abalanzan sobre el...llueven
fuertes mojicones..le quitan el pito...le quitan la porra,
fuera la guerrera...el poli sale despavorido,la muchedumbre le persigue...a el, a el,que
no escape!
El jardin del museo huele a orina y perfume...olor insufrible...grandes vomitos,
hedores...humanidad...flatu-
lencias sordas...agonicos desazones prostàticos...empellones...
collejas...cintarazos...trompicones
sequedades vaginales...zurriagazos...carre-
ras.
Por fin se levantan todos,sudorosos...grandes enojos;entran en el vestibulo,
contemplan,como en un sueño,
las paredes repletas de cuadros. Uno se desgañita,ex-
plica...es un especialista...
sabe...argumenta...los otros,
escuchan sobrecogidos...Se anima...se exalta...su rostro
se purpurea...gran congestion
explicativa...bordeando la
apoplegia...grandes andanadas
de perdigones salpican el

lienzo...es un bodegon,pero de seguir asi se convertira en
humedal seguro.De pronto parece comprender...se indignse rebela...la gente no entiende...no comprende."Quee?
quee?...como dice? deforme?
deforme?...ahhh,pero no! igno-
rante!...cateto.Llueven chu-
rruscazos...mas collejas.La muchedumbre angustiada se mueve, A ver,A ver...
Caras retorcidas...ojos es-
tràbicos...pescuezos como man-
gueras de bombero...cuerpos
como bueyes sobrealimentados.
El de los perdigones se sobresalta...grita,se indigna.
Ineptos...labriegos! la gente
se revuelve...no cabe un alfiler...un calor atroz...
pescozones...codazos...ojos torvos...humores...rencillas...pisotones...
...lamentos...insultos...tro-
peles...carreras...resbalazos,
màs collejas...plaf...plof"
oiga,no le permito...calle,calle,por Dios
reojos...exuberancias...rimeles corridos...lamparas de neon...sudores...relentes de ajo...alientos cargados...
colonias...caras,baratas...
trapios...prepotencias...zan-
cajos...Christianes Diores...
Lanvines...Zaras...Mangos...
retenciones de liquidos...vi-
sibles...prostatas contraria-
das." Por favor los W.C ?"
Arriba,arriba...aqui todos llenos,rebosantes...miradas
angustiadas...el señor no aguanta,no puede màs.Su señora
mosqueada...toma,compresa...
no vayas a hacerte pis aqui;que verguenza...sube,sube
" Señor,señor--al segurata--
en que piso?" tercero,señora.
ay!,no podré,no llegaré!...
angustias...carreras.Abajo,
reojos...manotazos,cogollones...
zurrios...pisotones,màs,de nuevo...señora,por favor,su
codo...en el ojo...tortazos...protestas...
airadas.Como dice? que no ve?
gritos...gritos...algaradas...
apartése! Oiga,usted,esto es
para todos...llega el tetrapléjico...rueda...descon-
trol...pies aplastados...dolo-
res...protestas...unànimes."

LA TRINCA: EL BARÓN DE BIDÉ

La Trinca, El Barón de Bide

En el siglo dieciocho en París hizo furor
el Barón de Bidé, famosísimo inventor.
El Barón especulaba con la posibilidad
de tomar baños de asiento sin perder la dignidad.
En la fuentes de Versalles contempló con estupor
a unos patos arrimar el culo a un surtidor.
Y exclamó el señor "Mesié: ¡Eureka! Je le encontré
Oh la lá! Oh! mondié!
je feré une filigrane
que será una palangane
con el chorro incorporé!"
Con la excusa del diseño el Barón el muy truhán
se pegaba el gran filete con madame de Chateaubriand.
La eficacia del invento alcanzó tal dimensión
que en la corte del gabacho descendió la polución.
Insaciable el populacho exigía su bidé
para poderse lavar sentado y no de pie.
Y salieron en cuadrilla y tomaron la Bastilla

-¿Quesquesé se merdé?- preguntaba la nobleza-,
-La revolución francesa, ¿Quesque vus avé pansé?
Se instauró l'egalité, liberté y fraternité
y en París no quedó ni un trasero sin bidé.
Y así gracias a Danton, a Marat y a Robespierre
las madamas de la Francia, se lavan la "pomme de terre"
Y al Barón por este invento las naciones honrarán
como al conde de Foiegras y al Marqués de Croissant.
Y este es el relato exacto del Barón y su artefacto.
Y jamás hallarás sensación más refrescante
por detrás y por delante, por delante y por detrás.

Lo importante no es llegar a los sitios, es avanzar ante la adversidad y quelas realidades aparezcan. Y en el camino, paisajes destruidos o desaparecidos, poemas q sobreviven a la fragilidad de la memoria. Y transformarnos.
Saludos Cordiales.

ADRIANO CELENTANO: CANTA IL CONFORMISTA, DE GIORGIO GABER

Il conformista

Io sono
un uomo nuovo
talmente nuovo che è da tempo che non sono neanche più fascista
sono sensibile e altruista
orientalista
ed in passato sono stato
un po’ sessantottista
da un po’ di tempo ambientalista
qualche anno fa nell’euforia mi son sentito
come un po’ tutti socialista.

Io sono
un uomo nuovo
per carità lo dico in senso letterale sono progressista
al tempo stesso liberista
antirazzista
e sono molto buono
sono animalista
non sono più assistenzialista
ultimamente sono un po’ controcorrente
son federalista.

Il conformista
è uno che di solito sta sempre dalla parte giusta,
il conformista ha tutte le risposte belle chiare dentro la sua testa
è un concentrato di opinioni
che tiene sotto il braccio due o tre quotidiani
e quando ha voglia di pensare pensa per sentito dire
forse da buon opportunista
si adegua senza farci caso e vive nel suo paradiso.

Il conformista

è un uomo a tutto tondo che si muove senza consistenza,
il conformista s'allena a scivolare dentro il mare della maggioranza
è un animale assai comune
che vive di parole da conversazione
di notte sogna e vengon fuori i sogni di altri sognatori
il giorno esplode la sua festa
che è stare in pace con il mondo
e farsi largo galleggiando
il conformista
il conformista.

Io sono
un uomo nuovo
e con le donne c'ho un rapporto straordinario sono femminista
son disponibile e ottimista
europeista
non alzo mai la voce
sono pacifista
ero marxista-leninista
e dopo un po' non so perché mi son trovato
cattocomunista.

Il conformista
non ha capito bene che rimbalza meglio di un pallone
il conformista aerostato evoluto
che è gonfiato dall'informazione
è il risultato di una specie
che vola sempre a bassa quota in superficie
poi sfiora il mondo con un dito e si sente realizzato,
vive e questo già gli basta
e devo dire che oramai
somiglia molto a tutti noi
il conformista
il conformista.

Io sono
un uomo nuovo
talmente nuovo che si vede a prima vista sono il nuovo conformista.

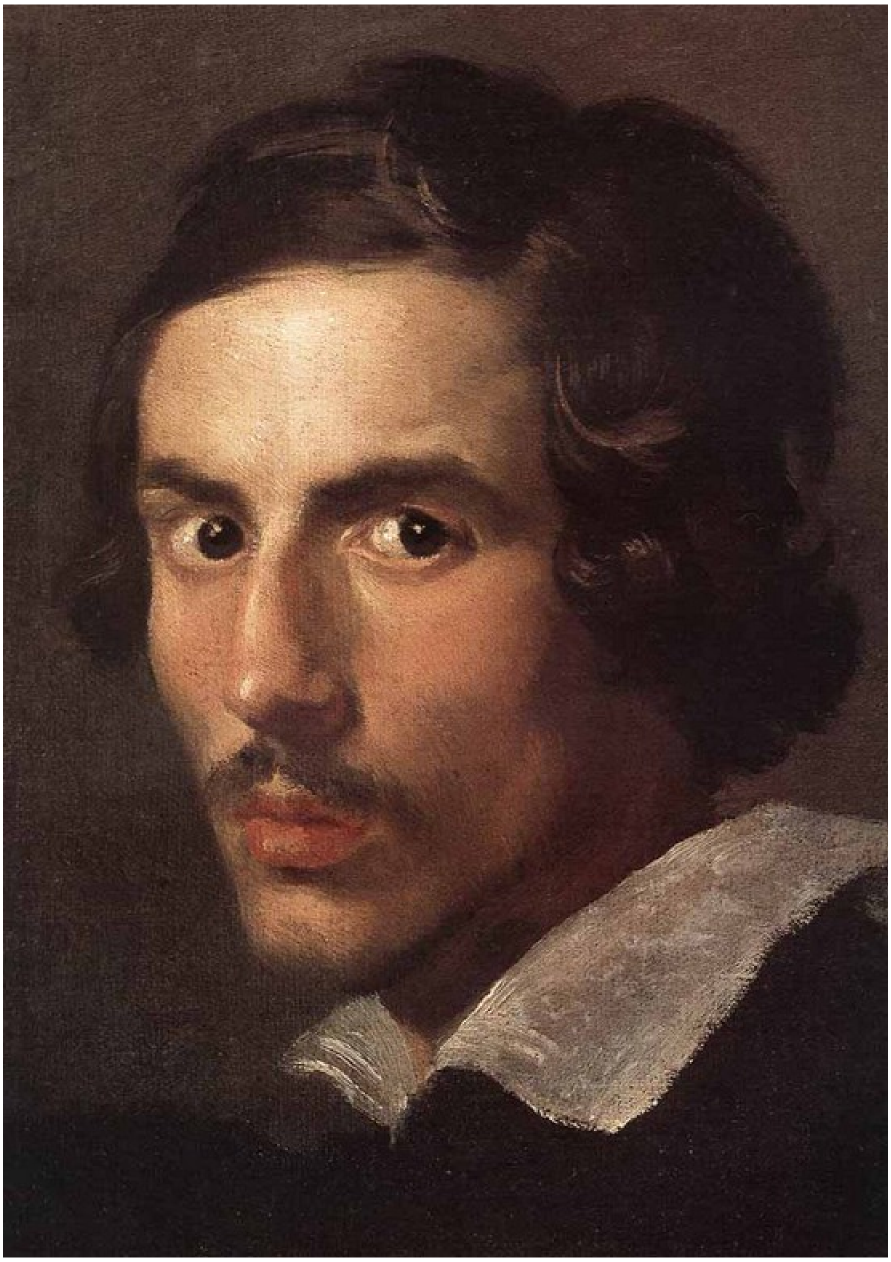
ROMANCE DEL CABALLERO BURLADO



3
EL CABALLERO BURLADO

De Francia partió la niña,
  de Francia, la bien guarnida,
fuérase para París,
  do padre y madre tenía.
Se arrimara a un castillo,
  por esperar compañía;
vio venir un caballero,
  vestido a la galanía.

-Por tu vida, el caballero,
  llévame en tu compañía.
-¿A dónde va, la señora?
  -A París llevo la guía.-
La cogió por la cintura
  y la subiera a la silla.
Caminaron siete leguas
  y nada no le decía;
a la entrada de las ocho
  en amor la requería.
-Tate, tate, el caballero,
  no tengáis tal osadía,
que soy hija de un leproso,
  llena estoy de leprosía,
el hombre que a mí llegara
  el mi mal le pegaría,
hoja verde que pisara
  seca se le volvería,
fuente donde yo bebiera
  al punto no manaría,
el caballo en que montara
  al punto reventaría.
-Apéese, la señora,
  que el caballo tiene estima.-
A la entrada de París,
  la niña se sonreía.
-¿De qué se ríe, la dama,
  de qué es lo que se reía?,
¿si se ríe del caballo,
  o la silla mal guarnida?
-Me río del caballero
  y de la su cobardía,
¡tener la niña en el campo,
  tratarla con cortesía!
Hombre que a mí llegase,
  por dichoso se tendría;
hierba seca que yo pise,
  verde se me volvería;
caballo que cabalgara
  en el año pariría.
-¡Atrás, atrás, mi caballo,
  la espada tengo perdida!
-Adelante, caballero,
  que yo atrás no tornaría;
hija soy del rey de Francia,
  de la reina Constantina,
los palacios de mi padre
  desde aquí bien los veía.

b)

Por los caños de Carmona,
  donde va el agua a Sevilla,

se pasea una señora,
  hermosa a la maravilla;
rosario de oro en la mano
  rezando el "Ave María"
y lo rezaba en romance,
  que en latín no lo sabía,
pidiéndole a Dios del cielo
  que le diese compañía
y que se la diera buena,
  que mala no la quería,
para marcharse a su tierra,
  que ella sola no sabía.
Ya le ha cogido la noche
  en una oscura montiña;
se ha arrimado a un arbolito,
  mirando el sol si salía.
Vio venir a un caballero,
  que a Cádiz lleva la guía.
-¿Me quisiera, el caballero,
  llevar en su compañía?
-¿Dónde montará, la blanca,
  dónde montará, la niña?
-A las ancas, caballero,
  que en la silla es villanía.-
Siete leguas lleva andadas,
  palabra no se decían.
A la entradita de un monte,
  de amores la pretendía.
-Poco a poco, caballero,
  no pretenda villanía,
que soy hija de un malato,
  y de una malatofina,
el hombre que a mí llegase
  malato se volvería.-
Caballero, que esto oyó,
  en el suelo la abatía.-
Se ha agarrado de la brida,
  se ha terciado la mantilla,
tantos pasos da el caballo
  como pasos da la niña.
Y a la entradita de Cádiz,
  le calcó una grande risa.
-¿De qué os reís, la blanca,
  de que os reís, la niña?
-Me río del caballero
  y de su gran bobería,
¡tiene la caza en la mano,
  de ella se le escaparía!
Soy hija del rey francés,
  de la reina francesina;
mi padre pesaba el oro,
  mi madre la plata fina
y yo pesaba el aljófar

para dar a mis amigas.
-Volvamos atrás, la blanca,
volvamos atrás, la niña,
que en la fuente en que bebimos
queda mi espada perdida.
-¡Antes, antes, caballero,
al pie de la verde encina,
antes , antes, caballero.
fuera tuya, que no mía!

El tema de la oportunidad perdida ha dado lugar a varias baladas europeas que no deben confundirse entre si. La que aquí he ejemplificado con dos textos en español es una balada conocida, no sólo en las varias lenguas hispánicas (portugués, gallego, español, sefardí, catalán) sino también en francés y en italiano. Su expresión en diversas lenguas románicas no atenta a su unidad poemática, ya que conserva en ellas la misma estructura narrativa y aun verbal. Es un ejemplo clarísimo de cómo las baladas no necesitan ser reescritas para cruzar las fronteras lingüísticas de la Romania.

Tanto en España como en Francia conocemos versiones de mediados del siglo XV; pero esos textos medievales no son los mejores representantes de esta balada pan-románica, ya que fueron manipulados por los poetas (Juan Rodríguez de Padrón y Olivier Basselin) que los incluyeron en sus repertorios, pues trataron de ajustar el texto tradicional llegado a sus oídos a sus personales ideales poéticos, propios del medio en que y para el que escribían. En el caso español, otra de las tres versiones antiguas conocidas, la impresa en el *"Cancionero de Romances de Amberes"* de c. 1548, es, en general, mucho más fiel al primitivo modelo tradicional pan-románico, al cual remontan los textos conservados por tradición oral hasta el siglo XX.

Aunque la similitud estructural de la balada en los varios ámbitos románicos sea indicativa de una génesis común, ya en los textos más antiguos se observa un enfoque diverso en el romance peninsular y en la correspondiente canción transpirenaica. La tradición francesa y la italiana sólo se interesan en la comicidad de la ingeniosa victoria de la damisela sobre su ingenuo acompañante. La burla, subrayada por el paralelismo entre la falsa identificación que de sí hace la joven cuando se halla en el medio del bosque, y la verdadera, que revela pasado el bosque, se cuenta despreocupadamente, frívolamente, sin pararse a desarrollar el núcleo narrativo, interesándose sólo en la expresión lírica, hasta que la risa de la joven estalle al poder decir, cuando está ya a salvo, que es la hija de un rico burgués de la villa. En las versiones que conservan el segmento narrativo de la petición, por parte del caballero, de una segunda oportunidad, ello es sólo para poner en su boca una ridícula oferta de dinero, que la hija del rico burgués rechaza despreciativamente.

La tradicion de las cinco lenguas hispánicas arranca de un modelo ideológicamente más complejo, que exige elaborar la figura de la protagonista dotándola de una personalidad singular. Ello se debe a que el propósito del romance no es sólo contar una aventura cómica, sino transmitir un código de conducta caballeresca. La *“cobardía”* del caballero, al tratar a la niña en el campo con *“cortesía”*, no es sólo vista como un resultado del ingenio que caracteriza al género femíneo, a la “picardía” con que la doncella sabe detener las primeras tentativas de seducción o fuerza de su acompañante haciéndose pasar por la hija de un leproso, maldito por naturaleza, sino que es considerada un fallo grave del carácter del joven caballero, una falta que le descalifica como varón. Lo pone claramente de manifiesto su fútil intento de engañar, a su vez, a la niña proponiéndole volver a buscar la espada, que dice haber perdido en el *locus amoenus* en que se hallaron a su paso por el bosque, sin darse cuenta de que esa supuesta pérdida del arma que define al varón es, en un plano simbólico, una pérdida que hace inútil su petición de una segunda ocasión.

El tema de la ocasión perdida, que en esta balada pan-románica se nos presenta revestido de una de sus mejores expresiones poéticas, tiene en el Romancero otra manifestación muy distinta, pero no menos atrayente, en el romance de *"La infantina"*. Originalmente, uno y otro romance nada tenían que ver; pero su pertenencia a un mismo campo semántico hizo que, ya desde la Edad Media, tendieran a entrar en contacto en la tradición oral. Modernamente, el deseo de los cantores romancísticos de dotar a la ingeniosa niña de nuestro romance de una personalidad que justifique el arriesgado viaje que emprende en solitario ha dado lugar a la expansión de un romance mixto de las dos fábulas primitivas, según comentaré más adelante.

28223 MADRID

Texto sugerido:
Programa/ asunto: "La noche menos pensada"
Estimada Sra: Transmita al jefe de programas (Sr. Moreno), al Director de RNE (D. Santiago González), así como al Presidente de la Corporación RTVE (Sr. D. Luis Fernández) que decisiones como la de quitar de programación La noche menos pensada, dirigido por Manuel Hernández Hurtado, Manolo H H, y Mas alla de la realidad, dirigido por Santiago Vázquez, unidas a otras, como hacer desaparecer Clásicos Populares, de Fernando Argenta, y jubilar anticipadamente a los profesionales de más de cincuenta años, en la cima de su plenitud profesional, como Beatriz Pecker, Andrés Aberasturi, Araceli González Campa, y tantos otros, así como la decisión de eliminar de Radio 5 los microespacios culturales, como "El habitat del unicornio", de Luis Muiño; "Animales y medio ambiente", de Juan Ignacio Pardo de Santayana, etc. me llevan a borrarme definitivamente de la lista de sus oyentes.
Atentamente

PD Autorizo la mención de mi nombre y apellido

Y, antes o después, recibirán ustedes la siguiente respuesta, da igual que lo hayan enviado por e.mail o mediante formulario:

Apreciado comunicante,
Gracias por dirigirse a la Defensora, con sus aportaciones sobre la programación de RNE. En relación a ello hemos de decirle que no corresponde a la Defensora decidir los

contenidos de la programación, tarea que corresponde a la Dirección de Programas, a quien hacemos llegar su comentario para su conocimiento y valoración. El cometido de la Defensora, según recoge su estatuto, en el artículo 2 y consultable en la página web, es "defender el derecho de los ciudadanos a una información veraz, independiente y plural (....) acorde con la función de servicio público que la ley 17/2006, de 5 de junio encomienda a RTVE".
Sugerirle también que la próxima vez que comunique con la Defensora, lo haga a través del formulario que encontrará en la página www.rtve.es, apartado Defensora.

Manolo H H y el resto de los profesionales que hacen de cada noche la noche menos pensada son para muchos cientos de miles de personas unos amigos entrañables con los que nos reunimos cada madrugada para pasar de una forma distendida y amable las últimas horas de la jornada. Desgraciadamente, unos lacayos, cumpliendo órdenes de un poder político molesto con los valientes comentarios de Manolo H H tras el accidente

de Barajas, han decidido que el próximo jueves sea la última vez que dichos cientos de miles de personas nos reunamos con Manolo H H y su equipo. Los cerdos deben de saber que, aunque se hayan puesto de pie y dominen la granja, no podrán impedir que el próximo jueves sea la última noche que sintonice una emisora cuya dirección actúa de forma tan similar a como actuaron quienes la dirigieron desde 1937 hasta 1975 que sólo le falta cerrar "La noche menos pensada" con el brazo derecho en alto y gritando ¡Viva Franco, arriba España!

En su despacho de Radio Nacional, "El Gran Capitoste" tiene un muñeco vudú de cada uno de vosotros. Al suyo, mi admirado Gatopardo, ya le faltan las manos.

¿A quién culpar? Seguramente a todos aquellos ilusos que cuentan la verdad, que de tan ilusos se volvieron locos y hasta malos.

El "Gran Capitoste" reflexiona y se justifica: "Yo sólo soy un médium. Un simple médium... Si acuden a las puertas de esta sacrosanta Casa, la fuerza pública contendrá a la insensata turba descontenta en evidente trance metafísico..."

Mientras se fuma un Cohíbas, piensa en nuevas formas de adorar a su ídolo con las manos, con los pies y hasta con el cuello si fuera necesario.

Desde sus casas, los oyentes y "las oyentas" que no soportan más tanta basura, insisten en su proclama: salvar el programa de Manolo, y --de paso-- que vuelvan los que valen.

Manifiesto mi profundo desagrado por la desaparición de uno de los programas más dignos de la radio española en los últimos años. Soy un seguidor de la programación radiofónica española desde hace más de 25 años y considero que lo que ocurre ahora con la rádio pública es una verguenza para los que la dirigen (sic).

Fecha: 29/08/2008 09:15.

Autor: Jesús Herrera Peña

Yo también he sido un buen seguidor de LA NOCHE MENOS PENSADA, sobre todo desde el año 1997 en que me pre-jubilé.

«El ser humano es reacio a todo cambio». Lo dijo no sé quién, pero en muchísimos casos yo creo que es verdad.

Todo debe evolucionar porque nada es eterno. Me ha jodido mucho cuando me enteré de que quitaban el programa y como muchos oyentes, yo también he dejado constacia de mi queja en los canales que RNE tiene habilitados para ello.

Sólo deseo que sea para mejor, pues bajo gobiernos de derechas y gobiernos de izquierdas, esta emisora pública tiene una programación demasiado carca para mi gusto.

Una emisora sostenida con lo que aportamos todos los españoles sin exclusión, debiera apoyarse en estas tres prioridades: formar, informar y divertir. Y si no fuera mucho pedir, yo la pediría menos derechización y más progreso paulatino hacia talantes más progresistas.
Si eso se consigue ahora con tanto expediente de regulación de empleo, y eliminación de programas más o menos queridos, ¡¡albricias!! Yo todo lo daría por bien empleado.

Por si le llega, le envío un saludo agradecido a Manolo H² con el deseo de que encuentre acomodo en esa nueva RNE.

Yo tambien me uno a las quejas de los oyentes por la retirada de, La noche menos pensada.
No comprendo como pueden sustituirlo por el de Silvia Tarragona, que ella, será buena profesional, pero el programa, es mediocre, queremos algo mejor, porque todos no somos del gusto de Belén Esteban.
Yo ya he mandado un correo al Presidente Zapatero, pero supongo que caerá en saco roto.
Un saludo.

Lamento profundamente la desaparición de LA NOCHE MENOS PENSADA. La dirección de RNE ha optado por el 'divide y vencerás' para deshacerse de un programa en el que se podía hablaba con libertad, separando a los miembros de LA NOCHE MENOS PENSADA. Ya se han dicho muchas cosas pero me ha llamado la atención algún que otro detalle. Por ejemplo que Jordi Tuñón tenga un blog paralelo a su programa que me parece totalmente inadecuado para una radio pública, aunque está en consonancia con muchos de los 'contenidos' de la nueva programación (Tanto en el programa de Tarragona como en el de Tuñón, que ocupan toda la franja horaria nocturna). Poniendo en el buscador el nombre del 'talentoso' locutor aparece dicho inadecuado blog. No sé a qué criterios se atiene RNE, si lo que hay ahora lo consideran una programación 'más fresca' que contraten también a Jorge Javier Vazquez, Risto o Lidia Lozano... Bueno, me callo, no vaya a ser que les dé ideas. Un saludo

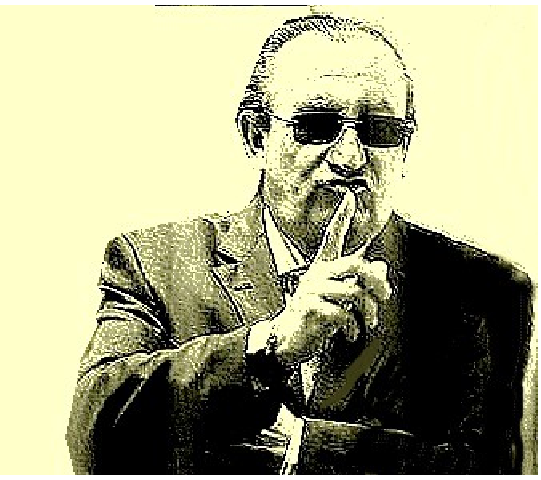
MANOLO HH SE ENTERA DEL CESE DE SU PROGRAMA POR UNA CUÑA EN RADIO NACIONAL



REPETIMOS: EL TALANTE DE LAS CAPATACES DEL PSOE EN RADIO NACIONAL DE ESPAÑA (Publicado el 26/07/2008)
25 de agosto 2008
Manuel Hernández Hurtado, Manolo H H, se ha enterado del cese de su programa,"La noche menos pensada", por las cuñas publicitarias de RNE que anuncian la nueva programación para setiembre.

No hay nada como ser una triste grisura profesional con el ego amiantado para medrar como capataz en las empresas públicas. En Radio Nacional de España y Televisión española, unos y otros gobiernos han tenido en las listas negras, haciendo pasillos, a profesionales de prestigio como mezquina represalia por no dar fervorosas muestras de adhesión al Régimen vigente.
En la actualidad, en RNE, la radio pública, se premia con un programa a quien sepa enjaretar un sarcasmo contra los agoreros que llaman "crisis" a la "desaceleración rápida del crecimiento económico", o proteste por la "crispación" que crean los partidos de la oposición, aunque estén hablando de música pop, de la dieta mediterránea o de la boda de un famosete.

Como es de rigor, se ha castigado con expediente de regulación de empleo a quienes no saben llevar el paso a toque de consigna, como Fernando Argenta, de "Clásicos populares", un programa de música clásica, que a lo largo de 28 años ha logrado ser un éxito de audiencia, a pesar de tener el horario de 3 a 4 de la tarde en el país del porompompero; como han castigado con un cese fulminante a Santiago Vázquez, de "Sexta dimensión" , un programa que trataba temas de parapsicología y misterio sin concesiones a la credulidad, a la papanatería, ni al morbo, uno de los más escuchados en directo y a través de Internet entre los hispanoparlantes, a pesar de ser emitido de 3 a 5 de la mañana, en las madrugadas del fin de semana, y uno de los cien más descargados en podcast, según Apple-iTunes, para sustituirlo, a partir de setiembre, por otro dirigido por Miguel Blanco, más acorde con las tomaduras de pelo y la debida obsecuencia que auspician los nuevos jefes.
Y eso ocurre siempre que los directores de programas oponen una insobornable dignidad profesional, el éxito de audiencia, y la independencia de criterio frente a las capataces nombrados a dedo por el Gobierno de turno, que jamás han destacado, si no es por su ignoto talento profesional y sus zancadillas a los compañeros, como es el caso de Pilar Martín, nueva directora de Radio Nacional de España, o como la defensora del oyente, Elena Sánchez, una intrigante sin demasiadas luces y más blanda que un sofá.
Los que tuvimos ocasión de enfrentarnos con la Sección Femenina y la Falange, reconocemos perfectamente sus trazas en la Sección Femenina del PSOE. Y es que ser mujer no es óbice para ser una escoria, ignara, trepa y trapacera, sin honor y sin categoría.
Si bien es cierto que las nulidades de sexo masculino que han aterrizado con sillón de mandamás en los despachos de RTVE, siguiendo la escuela de los aniagueros de cortijo, tampoco les van a la zaga.
Y a las pruebas me remito.

Gatopardo
Más información y más noticias sobre las cacicadas de RNE a los hermanos Vázquez:
*** http://www.masalladelarealidad.com/**

Y otros ejemplos de la mordaza a la inteligencia que se aplica en RNE-RTVE:
***Rafael Torres: "Clásicos populares"**

***Podcasts de "La noche menos pensada", sección fija del colaborador del programa, Bernardo Souviron habla con Manolo H H sobre el humanismo y el cultivo de la razón, basándose en los autores clásicos griegos.**
Y esto es lo que nos van a sustituir por el programa de la incalificable Silvia Tarragona.

Si bien estoy de acuerdo con algunas de las cosas que has escrito, otras no porque las desconozco, considero que descalificar a Silvia Tarragona es excesivo.

Saludos.

Fecha: 26/08/2008 16:44.

Autor: juani

pues seguire con Manolo H.H. hasta el final, pero a partir de su final no vuelvo a poner jamas un pograna de R.N.E. (la radio de todos). Saludos

Fecha: 26/08/2008 17:34.

Autor: Gatopardo

1) La decisión estaba tomada desde hace tiempo.
2)Le ruego que use las mayúsculas de acuerdo con la ortografía.
3)Le ruego escuche atentamente el programa de Silvia Tarragona y busque las siete diferencias con las conductoras de programas nocturnos de los años setenta, hace casi cuarenta años: yo no he conseguido encontrarlas.
La voz modulada y amanerada, las cucadas de quinceañera en busca de varón, los teatrillos de señora decente... y hasta el comparsa masculino verduriento, picarón y descarado al que hace callar y manda a un rincón son recursos de hace cuarenta años.
Y el "humor" que se gasta va en la misma línea de esa mamarrachada llamada "En

construcción" de TV2, "La transversal" "Treintaytantos" y toda esa patulea.
Y no es que la descalifique, es que he dicho que es incalificable: no logro calificar a Silvia Tarragona y el programita de marras.
4) Usted no escuchará RNE y miles de oyentes tampoco, pero eso no se reflejará en el EGM, que no tiene por costumbre tener en cuenta la cruda realidad.
Saludos.

Fecha: 26/08/2008 17:43.

Autor: crista

Estoy de acuerdo totalmente con la descripción que has hecho del estilo de Silvia Tarragona,a mi me aburre profundamente, o peor, me pone de los nervios,(y las de treintytantos),tienes toda la razón y podemos decir lo que nos parece su estilo y expresar claramente nuestra opinión,siempre que no faltemos el respeto ni la culpemos de la desaparición del programa.
Saludos

Anoche me desvelé alrededor de las 2, busqué RNE en el dial para escuchar LNMP. Mi sorpresa fue mayúscula al escuchar que iba a desaparecer el programa. Un programa que destaca por sus contenidos, bien diferenciados de forofismos deportivos, cuentapenas y otros programas que se pueden escuchar a esas horas.

Mi apoyo a Manolo y su equipo.

La verdad que no suelo escuchar la radio por la noche. Pero la semana del 19 al 25 de

agosto por diversos motivos tuve que estar despierto. Como compañía decidí recurrir a la radio. Después de hacer el zapping radiofónico de turno me paré en RNE. Me topé con "La noche menos pensada". No salía de mi asombro por las lecciones de periodismo y de independencia que ofrecían el director del programa y sus colaboradores. No parecía la radio del "régimen", no parecían marionetas del sistema, se notaba claramente que no estabán sometidos... En fin, un producto radiofónico tan próximo e independiente en RNE me hizo preguntarme ¿cuánto tiempo más le darán a este programa los que siguen a pié puntillas las indicaciones del partido de turno en poder en RNE? Pués como sabrán, ya se lo han cargado. Escuché la madrugada del martes 26 de agosto las muestras de cariño hacia todos los componentes del programa por parte de los oyentes... cuánto lo siento. En pocas semanas mi gozo en un pozo al pensar que RNE estaba experimentando un importante cambio en su línea editorial, pero nada. Nada de nada. Sólo desearle suerte a Manuel Hernández Hurtado y colaboradores y felicitarles por todo este tiempo de "sacrificio" y de lucha contracorriente.

Un saludo, un oyente decepcionado

Me parece lamentable que supriman un programa de radio con esta categoría. Es un servicio público donde abunda la cultura, el buen humor, y unos excelentes colaboradores. Creo que lo mejor para este programa sería pasarlo a las mañanas para que tuviese aún más audiencia. Perola cultura y la divulgación parece ser que es peligroso en un mundo cada vez más maniatado y uniformizado. En fin, que siempre gana lo ligth, la incultura, el despropósito, lo chabacano, el cotilleo, las tertulias verduleras y toda esa mierda que nos están dando con sopa en la televisión y la radio. Se les llena la boca de democracia y luego no la practican. Mi total apoyo a “La noche menos pensada”, a Manolo HH y todo su equipo.
Un Abrazo
Alonso Ávila

Creo que esta injusticia tiene solución: Manolo H.H. debe irse de RNE, cualquier emisora de ambito nacional contrataría a Manolo y a todo su equipo. Si continua en RNE acabará de colaborata como Aberasturi, a los 52 estará prejubilado y habrá destruido su vida profesional. Manolo H.H es un estrella de la radio que no tiene que perder el tiempo trabajando en una emisora que ha quedado destruida. El PSOE tiene que pagar a PRISA el papel que ha jugado durante tantos años. RTVE acabará en productoras de la sexta y de PRISA.

Estoy indignado por la desaparición de este maravilloso programa. ¿Alguien sabe los motivos?

En particular, disfrutaba muchísimo con la sección de Bernardo Souvirón. De hecho, tengo descargados en MP3 bastantes programas de los últimos dos años, y he encontrado algún otro más antiguo en Emule. Tal vez podríamos hacer una comunidad de oyentes para intercambiarnos estos programas. Si a alguien le interesa, por favor que me escriba a cardenio_226@yahoo.es

Me atengo a la información que me fue facilitada de fuentes fiables el día 25 de agosto, confirmada por el propio Manolo H H en el programa del día 26 de agosto, en el que cuenta que supo que cesaban su programa en setiembre porque Javier Bergia lo llamó para decirle que había escuchado una "cuña" en RNE anunciando otro programa. Puede escuchar la grabación: lo repitió dos veces.
En junio, los directivos actuales le dijeron, cuando estaba de baja, que cuando volviera iban a cuidar su salud.

No tengo el gusto de conocer a Manolo H H, y no tengo por costumbre encariñarme con los desconocidos, desde que me enamoré locamente de Marlon Brando en mi adolescencia sin recibir ni un "ahí te pudras" por su parte.

RNE CANCELA LA NOCHE MENOS PENSADA

MADRID.- Nueva temporada, aluvión de estrenos y una gélida despedida. Radio Nacional de España ha presentado su programación para este 'curso' con una ausencia sonada. 'La noche menos pensada' deja a los oyentes más trasnochadores tras 12 años de compañía nocturna. Manuel Hernández Hurtado, director y presentador del espacio, es el primer sorprendido ante el portazo de la cadena, que ha decidido prescindir de este clásico de la madrugada, otro programa de culto que abandona las ondas públicas.

La explicación de RNE gira en torno a los motivos de salud, delicada en los últimos tiempos de Hernández. "Quieren cuidarme", responde a las preguntas de los oyentes, pero el periodista alberga una pulsión muy concreta de la que va a ser privado: conducir un espacio radiofónico.

RNE sostiene que "un gran y muy querido profesional como Hernández seguirá en la Casa, aunque no haciendo lo que hacía antes". La cadena pública expone que "hay 50 nuevos programas y no está éste como no están muchos otros". La renovación responde a la nueva dirección de programas, un cargo que ocupa Benigno Moreno desde hace apenas tres meses.

"No éramos ni de derechas ni de izquierdas", recuerda Hernández, para el que 'La noche menos pensada' era "más que un programa de radio". El periodista descarta entrar a valorar esta sorprendente decisión: "La acepto, la acato y la encajo", asegura.

No así su público, fiel de lunes a viernes de la 1.00 a 3.00 de la mañana hasta esta semana. Los oyentes han enviado "11.000 correos electrónicos" desde que se ha anunciado el final del espacio, tal y como recuerda Hernández, que se ha encontrado con más vacaciones de las que desearía.

Sus compañeros de profesión tampoco se han mantenido al margen. "Luis del Olmo me ha llamado preocupado por la reacción del público, un 'shock' mediático que ni siquiera había provocado 'La rosa de los vientos'", explica Hernández, quien recientemente entrevistó en 'La noche menos pensada' al locutor de Punto Radio.

Hernández, que sigue ligado a la Corporación, estaría dispuesto a modificar su horario, intempestivo, e incluso transformar su programa en "'El día menos pensado' o 'La tarde menos pensada'". Pero la propuesta de RNE no pasa por ahí, sino por la cancelación del programa y una oferta de colaboración en el matutino de Juan Ramón Lucas, 'En días como hoy'.

Los problemas de salud de Hernández, de 47 años, no han conseguido lo que la directiva de la sociedad radiofónica ha determinado de cara a la nueva temporada: el final de su espacio.

La noche menos pensada era una fuente de felicidad y compañia en las noches de insomnio. La categoria humana y profesional de sus integrantes no dejaba de sorprenderme cada dia a pesar de llevar mucho tiempo escuchandolo. Todas las noches pensaba: "si se puede hacer esta maravilla durante la noche... ¿porque tenemos que aguantar las idioteces que aguantamos durante el dia? El levantamiento de este programa es una nueva nivelación hacia abajo de los medios de comunicacion. Esta clarisimo que se nos atribuye una edad mental de 4 años y asi se nos trata. Que pena para todos. Mi respeto y mis mejores deseos para Manolo y sus colaboradores. Ojala los encontremos pronto en algun punto del dial.

Fecha: 04/09/2008 07:19.

Os remito una copia de la carta que le acabo de enviar al defensor del oyente de RNE. A ver si se dan por aludidos:

Soy un oyente habitual de radio, sobre todo de Radio 1, Onda Cero y Cadena

SER. Es decir, que me puedo considerar un oyente crítico y no casado con ninguna ideología

política.
Pues bien, buena parte de mi tiempo de radio oyente lo he pasado con Manuel Hernández

Hurtado y su "Noche Menos Pensada" (antes "De la noche al día"). Creo que cualquier persona

que haya oído ese programa compartirá mi idea de que era un oasis de cultura, inteligencia y

crítica en el panorama de las radios generalistas. Hoy en día estamos demasiado

acostumbrados a que los comentaristas digieran la actualidad por nosotros según el color

político del dueño o gestor de la emisora. Lo contrario, ya digo, es la excepción. Y una de

esas excepciones, precisamente, era Manolo H. H. y su equipo.
Por otro lado, entiendo que la función de RNE, como entidad pública que es, es la del

servicio al ciudadano. Por tanto, esto implica que una radio pública debe informar, y, sobre

todo, transmitir cultura y mejorar la cultura y el sentido crítico de sus oyentes. Y RNE lo

hacía, al menos de la mano de Manolo H. H. LO HACIA. Me gustaría que alguien me indicara

cuál es el servicio público que ofrece el programa de Silvia Tarragona. Sin desmerecer la

labor de esta profesional, tan sólo se trata de un programa de mero entretenimiento. RNE ha

cambiado la inteligencia por la risa fácil.
Desde luego, acciones como ésta convierten a Fahrenheit 451, de Ray Bradbury, en algo más

que una novela de fantasía. Lo convierten en texto casi profético. Parece que hayamos vuelto

otra vez a los tiempos del panem et circenses.
Ruego, por tanto, a los responsables de programación de RNE-Radio 1, que recuerden la

vocación de servicio público de la emisora, y que repongan a Manuel Herández Hurtado al

frente de un programa, y que dejen la risa fácil (y vulgar) para otros.
Atentamente,
Salvador Aznar.

Autor: Agradecido

Agradecido a Manolo H H por las buenas noches o madrugadas que me ha mantenido pendiente de su gran programa, lo descubrí tarde y ahí mi mala suerte. Esta gente que cuida los modales para que todos sean súbditos del gobierno de turno deberian dedicarse, a un trabajo decente y util para todos los españoles que somos los que pagamos su nomina, y la pagamos para que mejoren nuestra vida recreándonos el oído, pero se dedican al chivatazo la censura PSOE y a zepillar chaquetas, sueldos injustificable en una democracia. Esto me ha hecho recordar a la Mª Antonia Iglesias que tambien daba comunión propia y barrió todo lo que no entraba en sus ideario y ahora va dando tumbos sin que nadie se la quede (mala leche la que mamó).
Ahora aquí en Cataluña las noche son mas largas y aburridas, no hay emisiones que se puedan escuchar en ninguna radio, las cadenas nacionales no emiten aquí porque desconectan, emiten solo en lengua catalana y otras con consejeros matrimoniales o tarotistas, (doble desgracia sin Manolo y con estos).
Un abrazo a Manolo H H y a todos los que como yo lo añoran.

!La mediocridad llega con tal velocidad que borra de un plumazo a todo cuanto merece la pena ser escuchado!
Manolo H H y su equipo lo mejor de la Radio.
Esperando que empezara su programa alguna vez oí el que lo sustituyó, mí conclusión es, que es un insulto a la inteligencia y un desprecio a todos los escuchantes de Manolo HH.
Lo peor de todo es que en el resto de las emisoras no hay alternativa que merezca la pena, por tanto mi solución y i recomendación es la siguiente: MP3 y podcasts. RNE no me va a imponer lo que oir ni !durmiendo!
Un saludo a todos los que por la noche compartíamos nuestra admiración por Manolo y su equipo.

Fecha: 18/10/2008 05:16.

A mí no me parece mal el programa de Silvia, es un programa como otros muchos, entretenido,y que podría estar en cualquier otra emisora. Pero ésa precisamente es la diferencia con el programa de Manolo. Su programa sí debería estar sobretodo en rne, si rne es la radio pública. Un programa de calidad, buenos e interesantes contenidos. En fin, al menos nos queda el protestar, y no olvidarnos en dos días; seguir exigiendo un cierto tipo de programación para la radio pública. Aunque no nos hagan caso, que nos oigan.

RICARDO CARRASQUILLA: MI SOBRINO

En casa tengo un sobrino
que se graduó de doctor
y que charla con furor
y empuerca papel sin tino.

Ha perdido la chaveta,
y hace versos a millones,
y los nombra inspiraciones
o caprichos de poeta.

Llama azote al arriador;
acicates, las espuelas;
perlas, los dientes y muelas;
sonoro parche, el tambor;

A los caballos, corceles;
mansas liebres, los conejos,
y los más tristes gozquejos,
ejercitados lebreles;

Querubes, los querubines;
el mar, pronto embravecido;
los amoríos, Cupido,
y los pescados, delfines;

La totuma, hirviente copa;
la chicha, licor de oro;
las lágrimas, triste lloro,
y undoso manto la ropa;

La ortiga, verde tomillo;
el caño, limpio arroyuelo;
la mujer, hurí del cielo,
y la flauta, caramillo.

Al ababuy, ruiseñor;
canario al cucarachero;
al chirlobirlo, jilguero,

y al gallinazo, condor.

Mi sobrino no trabaja,
come como un sabañón,
y duerme como un lirón,
y mil petardos me encaja.

Yo le suelo regañar;
que me come medio lado
le digo; y él muy airado
jura que se va a matar,

Porque la vida le pesa,
porque a sufrirla no alcanza;
mas tengo poca esperanza
de que cumpla su promesa.

Ricardo Carrasquilla.

(Nació en Quibdó, Colombia, en 1827. Falleció en Bogotá, Colombia, en 1886)
Filósofo, poeta, orador religioso y escritor costumbrista, padre del también orador y escritor Rafael María Carrasquilla. Fundó, junto a los hermanos Juan Francisco y José Joaquín Ortíz, el Instituto de Cristo, y con Ignacio Gutiérrez Vergara el Liceo de la Infancia. En 1886 creó la Sociedad de Estudios Religiosos, junto con su pariente, José Manuel Marroquín. Fue además uno de los fundadores de la agrupación literaria *El Mosaico*.
Entre sus obras cabe destacar *Ecos de los zarzos, Fiestas de Bogotá, Sofismas anticatólicos, Coplas y Ofrendas del ingenio*, antología poética que redactó junto a Marroquín.

[VENGANZA, NO JUSTICIA CONTRA IGNACIO DEL VALLE, LIDER DEL FRENTE DE PUEBLOS EN DEFENSA DE LA TIERRA]

La senadora Rosario Ibarra consideró como una venganza la pena carcelaria de 45 años que se le dictó a Ignacio del Valle Medina, líder del Frente de Pueblos en Defensa de la Tierra (FPDT) de San Salvador Atenco, los cuales se suman a los 67años que se le impusieron en otro proceso judicial que enfrentó.
La legisladora consideró que en ese tipo de sanciones no hay justicia, sino venganza, luego de puntualizar en contrapartida, que los policías involucrados en el enfrentamiento con los miembros del FPDT, fueron exonerados. A uno de ellos se le dictó cárcel por tres años, pero salió con ocho mil pesos.
En cambio, los campesinos que sufrieron la agresión, como Ignacio del Valle y otros más, recibieron sentencias que suman entre todos 430 años de prisión.
La Presidenta de la Comisión de Derechos Humanos del Senado, calificó la situación como algo terrible y una muestra de que se está criminalizando la inconformidad, la miseria y el hambre. Tal parece que todo el aparato de poder está imbuido de una soberbia enorme de manera que se creen dueños del país y pretenden hacer lo que quieran con el pueblo, pero confió en que éste sabrá defenderse y más temprano que tarde, ganar.
En el caso de Ignacio del Valle y otros integrantes del frente, expuso que no se descarta actuar por la vía jurídica para lograr su libertad, pero al mismo tiempo se promoverá una amnistía como la de hace 30 años, que liberó a presos políticos.
Ignacio del Valle y otros activistas fueron detenidos luego de un enfrentamiento entre ejidatarios de Atenco y policías federales y estatales en mayo de 2006.

Sinopsis (del sitio web del Canal 6 de Julio):

> *Este video analiza los sucesos ocurridos en San Salvador Atenco durante los primeros días de Mayo de 2006, y denuncia las violaciones de Derechos Humanos de la población civil por parte de las fuerzas policíacas del Estado de México. El documental desmonta, asimismo, el modo de operar de los medios de comunicación masiva, responsables de crear un ambiente de miedo y de tender un cerco informativo en torno a los hechos que tuvieron lugar en el poblado, en el marco de una situación especialmente delicada: el proceso de sucesión presidencial en México del 2006.*

NOTA DEL EDITOR: *Mucho de la violencia en Atenco fue grabado por la cámaras de televisión, pero pocos afuera de México han visto estas imágenes. Esto incluye no solamente las escenas de la calle —donde aparecen policías golpeando brutalmente a "todo lo que se moviera"—, sino también extractos de los noticieros en los cuales los periodistas exigen más represión del movimiento popular por parte del Estado. Todas estas imágenes, que son incluidas en el documental del Canal 6 de Julio y Promedios –donde se investiga lo ocurrido en Atenco y se entrevista a muchos de los pobladores-, hacen del filme un documento conmovedor que muestra un importante momento coyuntural en la historia de México.*

El video se encuentra disponible para bajar de este sitio web como archivo AVI de alta resolución, o separado en tres partes para bajar más rápidamente en formatos Windows Media y QuickTime. Si usas el sistema de intercambio de ficheros BitTorrent, puedes bajar y compartir el video AVI de alta resolución, a través de este link.

Estoy de acuerdo en que la pena fue excesiva, que calificarla como una venganza parece acertado.

Seré el primero en estar en desacuerdo con la forma en que las autoridades toleran que diversos grupos de inconformes toman las vías de comunicación en México o privan de su libertad a personas para buscar atención a sus peticiones se puedan o no calificar como "justas".

Sin embargo, no seré yo quien celebre la aplicación selectiva de "la ley", el uso excesivo de la fuerza y las penas desproporcionadas.

¿qué mensaje se le envía a la sociedad cuando se deja libres a asesinos y secuestradores, mientras se aplican penas que para fines prácticos serían de cadena perpetua a líderes sociales que no han cometido crímenes comparables.

Autor: Ramón Mier

Como puedes ver por la entrada anterior, el sistema de justicia mexicano puede encarcelar para fines prácticos de por vida a alguien por "secuestro equiparado" pero dejar libre a un verdadero secuestrador cuya víctima se dice murió bajo circunstancias extrañas en "accidente" poco después de que se detuviera al acusado.

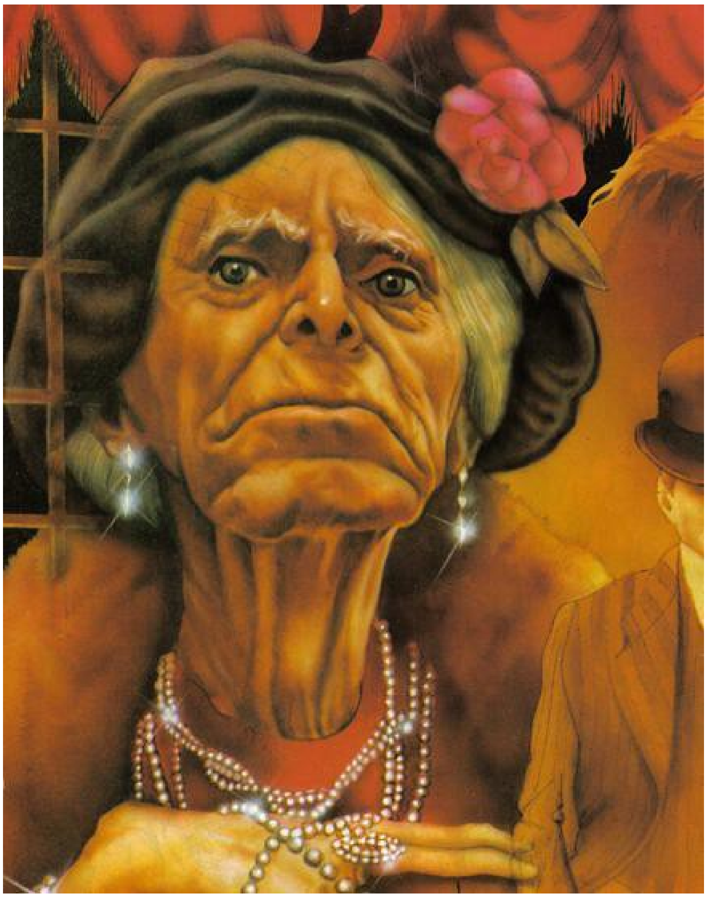
LA POBRE VIEJECITA



Érase una viejecita
sin nadita que comer
sino carnes, frutas, dulces,
tortas, huevos, pan y pez.

Bebía caldo, chocolate,
leche, vino, té y café,
y la pobre no encontraba
qué comer ni qué beber.

Y esta vieja no tenía
ni un ranchito en que vivir

fuera de una casa grande
con su huerta y su jardín

Nadie, nadie la cuidaba
sino Andrés y Juan Gil
y ocho criados y dos pajes
de librea y corbatín

Nunca tuvo en qué sentarse
sino sillas y sofás
con banquitos y cojines
y resorte al espaldar

Ni otra cama que una grande
más dorada que un altar,
con colchón de blanda pluma,
mucha seda y mucho olán.

Y esta pobre viejecita
cada año, hasta su fin,
tuvo un año más de vieja
y uno menos que vivir

Y al mirarse en el espejo
la espantaba siempre allí
otra vieja de antiparras,
papalina y peluquín.

Y esta pobre viejecita
no tenía que vestir
sino trajes de mil cortes
y de telas mil y mil.

Y a no ser por sus zapatos,
chanclas, botas y escarpín,
descalcita por el suelo
anduviera la infeliz

Apetito nunca tuvo
acabando de comer,
ni gozó salud completa
cuando no se hallaba bien

Se murió del mal de arrugas,
ya encorvada como un tres,
y jamás volvió a quejarse
ni de hambre ni de sed.

Y esta pobre viejecita
al morir no dejó más
que onzas, joyas, tierras, casas,
ocho gatos y un turpial.

Duerma en paz, y Dios permita
que logremos disfrutar
las pobrezas de esa pobre
y morir del mismo mal.

RAFAEL DEL BARCO CARRERAS: BARCELONA, 30 AÑOS DE CORRUPCION

Igual que se lleva la silicona, el depilado integral, el botox, el hombre-hombre y la fabada Litoral, se estila la ingenuidad desinformada y la creencia de que los que mandan no pueden ser tan sinvergüenzas, ni tan poderosos , ni tan corruptos, ni los ciudadanos tan idiotas. Y para rematar, se lleva la sospecha de que todos los que

señalamos la lepra moral, económica, judicial, y política, es porque somos "conspiranóicos". Así es que recomiendo la web y los libros de ***Rafael del Barco Carreras*** *exclusivamente para los lectores que no se hayan machacado el cerebro aún, y quieran saber de aquellos polvos y de estos lodos.*

De nada. Ya saben que me gusta ser útil.

Sinopsis del libro, escrita por el autor:

"Barcelona supera con mucho los escándalos tan de moda: Marbella, Seseña, Mallorca, Canarias, etc., etc. o la enorme corrupción que ha construido toda la costa del Levante o el centro Español. La perversión en mayúscula se inicia con Mateu, primer alcalde franquista, discípulo de Cambó (la apertura de Via Layetana), Foronda (compañía de Tranvías y la Exposición del 29 en Monjuich), o el cachondo alcalde Pich y Pon que para compensar las finanzas municipales propuso vender los parterres centrales de la Gran Vía. Y en el Ayuntamiento, y en otras actividades de la gran ciudad, se incrusta Ramón Serrano Suñer, cuñado de Franco y gran ideólogo del Régimen, desterrado de Madrid, no por su admiración a Hitler y Musolini, sino por poner cuernos a su mujer, la hermana de Carmen Polo, esposa de Franco, y con hija negada, al estilo de la crema de la alta sociedad, con los años musa y secretaria de Adolfo Suárez. Sus ciento y un año de vida y el control absoluto de la información, propietario de Radio Miramar, hará que su nombre se diluya, pero en la memoria de los barceloneses quedará impresa la célebre y omnipresente FOMENTO DE OBRAS Y CONSTRUCCIONES SA, por promotora y constructora de todas las obras de la ciudad, o la FECSA, también creación propia y omnipresente. Nombres más recordados que los de los alcaldes de Barcelona y funcionarios que multiplicarían con la constructora y "servicios" su entonces magra asignación oficial.

En 1939 se inicia la Gran Corrupción, la base para entender lo sucedido estos últimos 30 años. Si los personajes de estas historias no se hubieran labrado la popularidad a base de cifras y delitos disparatados, mi opinión no tendría objeto, nadie me creería. Me inicié en ella como víctima, y escribí a todos los periódicos de ámbito nacional, con el más olímpico desprecio por contestación. Un presidiario, de la Rosa, compró a todo el arco ideológico político y periodístico con fuerza en la ciudad, comportando que no se pueda publicar nada fuera de lo "oficialmente" impuesto. Prensa y políticos, comprados, y delinquiendo. Y yo condenado por "encubrimiento". Javier es un paradigma, ni mucho menos el único, simplemente una exageración, un disparate fruto de la especial ciudad. Ni de lejos me he propuesto ni biografías ni estudios de ningún tipo, a lo sumo un listado en el tiempo de lo publicado y descubierto revelándome mis desventuras a partir de 1980. Pido disculpas por repeticiones y saltos entre fechas debidos a mi estado de ánimo, o partir de cierto conocimiento por parte del lector ya que puntualizar conllevaría editar una enciclopedia, rogando paciencia por mi falta de profesionalidad en el oficio de escribir, que ni de lejos he aprendido. Por lo demás podría el interesado ampliar con otras lecturas, que aun erróneas por dirigidas, le ayudarían a completar el panorama barcelonés durante estos años. Figúrese el lector, Fomento o Adigsa, la del Carmelo, presupuestando con infinidad de cláusulas que le permiten toda suma y dentellada a la primera cifra, después se desglosa en una o dos superconstructoras, que trabajan con cuatro o cinco conocidos y amigos constructores, que a la vez subcontratan por especialidades, multiplicándose entre decenas de "autónomos" (hasta el perro del vigilante nocturno es autónomo). Y a la mitad de la pirámide los presupuestos no cubren para pagar impuestos y menos seguros sociales, o a proveedores de materiales (a veces en el impago radica la ganancia), y se entra en la solución de la quiebra y aparcar la "sociedad" en un administrador ful, ilocalizable, o con

DNI falso. El reparto no se acaba con los subcontratos, cada certificación de obra, con pago directo, muy diferido, de la Administración, o el pagaré de la promotora o constructora, inicia otro calvario, con varias astillas, y "financieras" de por medio. Y Maragall, ¡se necesita "cara"!, acusa en el Parlament a los de CIU de un 3%, y uno de los desgraciados insolventes de la cuerda denuncia en Fiscalía que pagó en negro un 20%. No pasa nada. El único problema es que la rueda se detenga, como sucede por el cambio de alcalde y las disputadas elecciones a la Generalitat. La Gran Corrupción forma parte del paisaje barcelonés como el mar, la Sierra de Collcerola, Monjuich, sus graciosas Ramblas, y el excelente clima mediterráneo, que con Gaudí han trasformado la ciudad en turística y de "servicios", y sus antiguas fábricas en apartamentos "carísimos", o curiosas chimeneas monumentales."

LA MAFIA FARMACÉUTICA: PEOR EL REMEDIO QUE LA ENFERMEDAD

Por **Carlos Machado** .

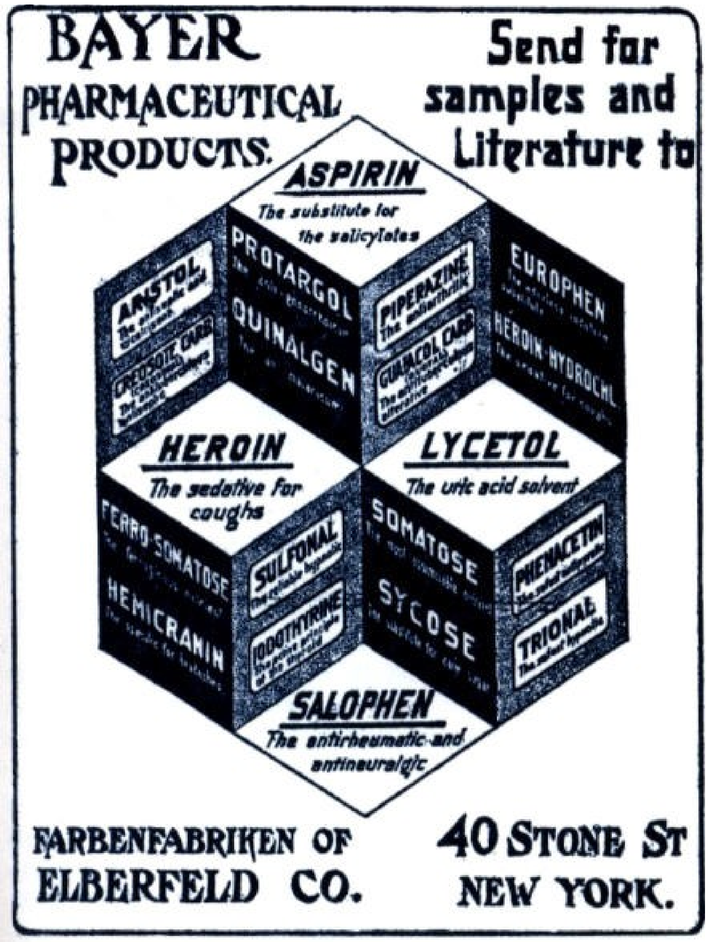
El mercado farmacéutico mueve unos 200.000 millones de dólares al año. Un monto superior a las ganancias que brindan la venta de armas o las telecomunicaciones. Por cada dólar invertido en la fabricación de un medicamento se obtienen mil en el mercado. Y las multinacionales farmacéuticas saben que se mueven en un terreno de juego seguro: si alguien necesita una medicina, no va a escatimar dinero para comprarla. Este mercado, además, es uno de los más monopolizados del planeta, ya que sólo 25 corporaciones copan el 50 por ciento del total de ventas. De ellas, las seis principales compañías del sector –Bayer, Novartis, Merck, Pfizer, Roche y Glaxo- suman anualmente miles de millones de dólares de ganancias, a lo que hay que añadir más todavía, dado que todos los grandes grupos farmacéuticos son también potencias de las industrias química, biotecnológica o agroquímica. Todo ello, y su imparable avidez por seguir haciendo dinero y creciendo cual un parásito destructivo, hace que las multinacionales del sector, haciendo gala de una total impunidad, se desentiendan de su verdadero cometido, la salud, y no reparen en aplastar a competidores menores, atacar a gobiernos débiles que intenten enfrentarlas y, lo que es peor, mantener precios prohibitivos para las poblaciones de escasos recursos y a la vez fabricar productos que en muchísimos casos terminan envenenando a los eventuales pacientes. Sobrados ejemplos hay en ese sentido.

Uno de ellos tuvo como protagonista a Merck, uno de los gigantes farmacéuticos que se vio obligado a retirar del mercado a una de sus estrellas, el antiinflamatorio Vioxx (rofecoxib), cuya venta le reportaba 2.500 millones de dólares al año. Pero hasta que Merck retiró ese medicamento fue demasiada la sordera, la negligencia y la falta de ética frente a las constantes advertencias sobre los riesgos cardiovasculares que producía. Actualmente, ese fármaco podría causarle a Merck muchas más pérdidas que su retiro de las ventas. En Estados Unidos, la compañía fue declarada responsable de la muerte de Robert Ernst y obligada a pagarle a su viuda 253,4 millones de dólares, pero se encuentran pendientes de resolución unas 5.000 denuncias, y puede suceder que la compañía farmacéutica tenga que desprenderse finalmente de entre 18.000 y 50.000 millones de dólares. Sin embargo no sólo Merck fue el responsable de la negligencia, sino que un organismo como la Agencia para las Drogas y los Alimentos (*FDA-Foods and Drugs Agency*), el ente gubernamental norteamericano que supuestamente debe velar por la salud y la alimentación de los contribuyentes, también es corresponsable.
Desde el año 2002 se sabía que el Vioxx aumentaba la posibilidad de generar infartos al corazón o problemas similares, por lo que corrieron las sospechas: ¿apoyó Merck algunos trabajos o investigaciones de la FDA, o hubo algún tipo de contraprestación o, si se prefiere, de "coimas"?. Nada de ello resultaría extraño, si nos atenemos a los antecedentes de la FDA en el juego de intereses con que son favorecidos los grandes grupos químico-farmacéuticos, y de los que nos ocupamos en notas anteriores. Lo cierto es que Merck no retiró al Vioxx del mercado hasta el año 2004, un retraso inexplicable ya que eran demasiadas las evidencias de múltiples efectos cardiovasculares adversos del fármaco, y una falta de respuesta rápida incomprensible en una compañía fundada hace 340 años.
La conclusión no es tan difícil: las ventas del producto fueron más importantes que sus efectos adversos.

Hipocráticos hipócritas

Hace tiempo que es *vox pópuli* el hecho de que los laboratorios acosan a los médicos para que éstos receten con exclusividad sus productos. Un acoso nada incómodo para los profesionales de la salud, ya que por aceptarlo se llevan no pocos beneficios. Lamentablemente hoy en día son una gran mayoría los médicos que de buen grado se dejan caer en las redes de este soborno. Incluso puede observarse, cuando alguien va a atenderse a un consultorio, de qué manera los doctores dejan de lado por varios minutos la atención a sus pacientes para dar preferencia a la recepción, en medio de los turnos, de trajeados visitadores médicos llevando en las valijas no sólo sus promociones, sino también los regalitos de rigor. Un caso de este tipo, y a gran escala, explotó con ribetes de escándalo en Italia, y la autoría del soborno en cuestión correspondió a otra de las grandes multinacionales farmacéuticas.
Luego de un trabajo que le llevó dos años, la Fiscalía de Verona hizo pública hace unos dos años una investigación que sacó a la luz lo que en ese país también era un secreto a

voces: médicos que reciben regalos y sumas de dinero de una multinacional farmacéutica a cambio de recetar sus productos. La acusación apuntó, con nombres y apellidos, nada menos que a 4.400 médicos de toda Italia y a 273 dirigentes y empleados del grupo británico *Glaxo Smith Kline (GSK)*, uno de los líderes mundiales del sector, cuya sede italiana se encuentra precisamente en Verona. Las prácticas en cuestión se llevaron a cabo en el período 1999-2002, y las acusaciones van de soborno y corrupción a asociación delictiva en el caso de algunos dirigentes de Glaxo en Italia.
La investigación se originó en la región del Véneto, cuando la Policía Fiscal descubrió en la contabilidad de la compañía una cantidad exagerada, de alrededor de 100 millones de euros, destinada a *"promoción"*. La Fiscalía acusó a Glaxo de haber desembolsado un millón de euros anuales para que los médicos prescribieran determinados fármacos y se atuvieran al catálogo de la compañía. De acuerdo a lo explicado por la policía italiana, todo el sistema de "comisiones" y regalos era controlado por un sistema informático conocido con la clave *"Giove"*, en el que era registrado el rendimiento de cada médico y en base a ello se establecía la importancia del premio.
Los métodos de captación de los profesionales utilizados por Glaxo incluían viajes a lugares paradisíacos, relojes de oro, computadoras personales y dinero en efectivo. En algunas conversaciones telefónicas interceptadas por los investigadores en 2003, algunos vendedores de Glaxo se jactaban del aumento en las ventas logrado gracias a los sobornos. Por su parte, los fiscales informaron que la firma cuidaba a los facultativos en todos los niveles, desde la medicina general -2.579 profesionales denunciados- con obsequios de computadoras, reproductores de DVD o cámaras fotográficas, hasta los especialistas, con 1.738 acusados que recibían obsequios aún más valiosos como viajes, financiación de congresos y elementos de alta tecnología. Asimismo hubo un grupo de 60 médicos investigados, adscriptos a servicios de oncología, que participaron en un programa denominado Hycantim, un producto para el tratamiento de tumores. Según las acusaciones, esos médicos recibían incentivos por cada paciente al que le prescribían ese fármaco. Uno de los fiscales señaló, al referirse a los ejecutivos de la compañía y el precio del producto: "*Para esta gente, cada enfermo valía 4.000 euros. Daba igual si el medicamento era bueno o no, lo importante era tener el mayor número de pacientes*".
Una buena muestra de que la codicia de la industria farmacéutica ha convertido la enfermedad en un negocio. En el caso antes apuntado, contando con la complicidad de médicos que ningún favor le hacen a su otrora noble profesión, manchando el juramento de Hipócrates y convirtiéndolo en un código de hipócritas.



Bayer, mucho más que una aspirina

Seguramente el grupo farmacéutico que se lleva las palmas en lo que hace a la acumulación de dinero y poder sin que le importe pisotear pequeños competidores y, peor aún, envenenar consumidores, es Bayer AG. Una empresa presente en todos los países del mundo que opera en la misma sintonía de colegas suyos como Monsanto y Dow Chemical, multinacionales químicas que también abarcan el rubro farmacéutico y de las que nos ocupamos en notas recientes. La historia de la compañía alemana Bayer, con su sede central en la ciudad de Leverküsen, se remonta al siglo XIX, cuando nació como IG Farben, y está colmada de hechos aberrantes, pero claro, "de eso no se habla", y teniendo como toda multinacional con trapos sucios quien se los lave y contando además con 400 parlamentarios en su país, tanto regionales como nacionales, que antes pasaron por las filas de la empresa y continúan brindándole fidelidad, ocultar parte de su historia negra no le resulta difícil. Pero aquí recordaremos parte de esa historia.
Esta multinacional, que también se identifica con agentes de guerra química, con innumerables insecticidas y venenos caseros y con "medicamentos" como la heroína -un temprano patentamiento de Bayer antes de comprobar lo que causaría-, ha trabajado en muchas oportunidades estrechamente con dictadores y criminales de guerra, desde Hitler en adelante. Uno de sus directores, Carl Duisberg, ya se había encargado personalmente de propagar el concepto de "trabajos forzados" durante la Primera Guerra Mundial, idea que posteriormente fue aplicada con mucha más dedicación por los nazis, al someter a esos trabajos forzados a prisioneros de guerra, habitantes de los países ocupados y trabajadores extranjeros. Esto a su vez derivó hacia los asesinatos masivos, muchos de ellos en el campo de concentración cuyos terrenos eran propiedad de la IG Farben y del que se guarda un lamentable recuerdo: Auschwitz. Pero la compañía no sólo colaboró con esos terrenos. También fabricó el gas Zyclon B, utilizado para exterminar judíos en ése y otros campos de concentración. Después de la Segunda Guerra Mundial, la IG Farben se fragmentó en las empresas Bayer, BASF y Hoechst,

pero ninguna de las tres indemnizó adecuadamente a las víctimas, sobrevivientes o familiares.
Cuando moría el siglo XX y tras una investigación de nueve meses, Bayer fue hallada responsable de la muerte de 24 niños en la remota aldea andina de Taucamarca, en Perú, al ingerir en su desayuno alimentos envenenados con el pesticida metil-parathion, en tanto otros 18 sufrieron daños en su salud y en el desarrollo a largo plazo. El pesticida, un organofosforado que era comercializado por la compañía con el nombre de Folidol, era vendido a pequeños agricultores en toda la zona andina peruana, la mayoría de ellos analfabetos y que solamente hablan en idioma quechua. Bayer empaquetaba ese pesticida –un polvo blanco semejante a la leche en polvo y sin olor a químicos- en pequeñas bolsas plásticas, etiquetadas en español y con el dibujo de un vegetal, en tanto las etiquetas no ofrecían ninguna información de seguridad, ni siquiera en pictogramas, que pudieran ser interpretadas por los habitantes de las aldeas. Un informe del Congreso peruano concluyó en que Bayer debería compensar a las familias afectadas, y éstas iniciaron en octubre de 2001 una acción judicial contra la empresa y su subsidiaria Bayer-Perú, alegando que debieron tomar medidas para prevenir el mal uso de un producto extremadamente tóxico dada la preeminencia de idiomas indígenas en el interior de Perú. Sin embargo, dos días después de iniciada la acción legal el juez de la Corte Superior de Lima desestimó la demanda por *"cuestiones de procedimiento"* y concluyó sumariamente, e ilegalmente, que los demandantes *"no habían planteado de manera adecuada el caso sustancial"*. Según las leyes peruanas, en la fase inicial del litigio el juez sólo puede determinar si los documentos de la demanda están completos o no, pero no puede pronunciarse sobre cuestiones legales sustanciales. ¿Otra muestra del poder de una multinacional, en este caso quizás presionando o comprando a un juez?. El caso es que las familias apelaron esa sentencia ilegal y, por lo que se supo hasta ahora, aguardaban la fijación de una nueva audiencia, mientras acusan además al ministerio de Agricultura peruano de no hacer aplicar las normas sobre pesticidas, dado que en ese país es común la venta sin control de pesticidas de "uso restringido"*******, como el que causó la muerte de esos 24 niños.
Durante la Cumbre Mundial sobre Desarrollo Sostenible que se llevó a cabo en Johannesburgo, Sudáfrica, las familias afectadas escribieron al entonces secretario general de las Naciones Unidas, Kofi Annan, pidiéndole que excluyera a Bayer del Pacto Mundial de la ONU debido a las acciones de esa compañía en Perú. El Pacto Mundial es una asociación entre la ONU y diversas empresas multinacionales que se comprometieron a *"respetar el ambiente y los derechos humanos"*. La carta a Annan fue firmada, en representación de la aldea de Taucamarca, por Víctor Huarayo Torres, dos de cuyos hijos estaban entre los 24 niños muertos por el envenenamiento con el pesticida de Bayer, y expresa: *"Los padres dolientes de mi aldea no podemos entender cómo la ONU puede apoyar a una compañía como Bayer, que continúa vendiendo sus pesticidas más tóxicos, clasificados por la OMS* (Organización Mundial de la Salud) *como extremadamente peligrosos, muchos años después de haber prometido públicamente retirarlos, en 1995. Tampoco entendemos por qué la ONU respalda a la compañía que permitió la venta de metil-paration en una región donde sabía que los residentes no podrían leer las instrucciones de la etiqueta".*
Pese a sus famosas aspirinas, Bayer debió soportar algunos otros dolores de cabeza, como en mayo de 2003, cuando un equipo de abogados de California presentó una demanda contra la compañía en nombre de enfermos hemofílicos. La acusación fue que Bayer había vendido en la década de 1980 coagulantes infectados con los virus de la Hepatitis C y el HIV. Por supuesto, Bayer rechazó la acusación explicando que se había atenido a *"normas existentes en la época".* Cabe preguntarse si esas "normas" tuvieron que ver con los manejos de la FDA norteamericana, difundidos en ésta y otras notas, para jugar a favor de los intereses de las multinacionales químico-farmacéuticas. Por otra parte, a Bayer le interesaba sobremanera hacer pie en Wall Street llegando a

cotizar en la Bolsa de Nueva York, una cima a la que aspiran llegar todas las grandes multinacionales, y para ello debía tener una carta de presentación intachable. Firmada seguramente por una FDA convenientemente "aceitada" y por el hecho de hacer "buena letra" en el mundo con sus productos y evitando juicios y demandas, al menos hasta que lograra aquel objetivo. Sin embargo no le fue tan fácil, ya que debió retirar del mercado el Lipobay (Cerivastatina), un medicamento para combatir el colesterol que no había sido debidamente comprobado, luego de que ocasionara miles de muertes por infartos y otras dolencias cardíacas. La criminal actuación de Bayer con ese fármaco obedeció a su necesidad de encontrar un hueco en el mercado de los medicamentos contra el colesterol, copado por multinacionales norteamericanas. Necesidad y urgencia que demostraron, una vez más, que los intereses de estos grandes grupos están muy por encima de la ética y de la salud a la que dicen servir.
De todas maneras, Bayer no sufrió en este caso los efectos de ninguna demanda en su contra. Es que las multinacionales farmacéuticas integran una parte destacada de la llamada Mesa Redonda Europea de Industrias, que se reúne periódicamente con altos consejeros de la Unión Europea para delinear las "líneas generales" de cada sector. Y como se dijo anteriormente, Bayer dispone de 400 ex ejecutivos de la firma que ahora son parlamentarios regionales o nacionales, a los que la multinacional además reúne mensualmente para presionarlos o tenerlos controlados, por lo cual no resulta para nada anormal que el gobierno alemán la haya absuelto de toda responsabilidad, negándose a iniciar cualquier acción jurídica, pese a las contundentes pruebas en su contra.
Otro ejemplo del desprecio de estos grandes grupos por la humanidad, se dio cuando a comienzos del 2003, el India Committee of the Netherlands publicó un informe según el cual las multinacionales Bayer, Monsanto, Unilever y Syngenta explotaban a niños en la producción de semillas en la India.
Para concluir con algunas muestras más de lo que realmente representa Bayer más allá de sus afamadas aspirinas, podemos referirnos a que esta compañía, una de las que más comercializa herbicidas, lo hace con algunos que han ocasionado lesiones graves en personas y animales, especialmente en el Tercer Mundo, donde los grandes grupos químico-farmacéuticos encuentran un campo fértil para que sus venenos sean aceptados y vertidos. Así ocurrió con el Baysiston, utilizado en los cultivos de café; Gaucho, para los de girasol; y el muy peligroso nematicida Fenamifos (Nemacur).
En todo caso, estas multinacionales siempre van a estar cubiertas en todos los flancos posibles, ya que si los *"mecanismos políticos habituales"* llegaran a fallar, se ponen en marcha otros planes.

Acción y reacción

De esos planes bien puede dar cuenta el colombiano Germán Velázquez, doctor en Economía y director del Programa Mundial de Medicamentos de la OMS, quien se atrevió a publicar un estudio en el que recomienda, entre otras cosas, la elaboración de medicamentos genéricos y la eliminación de las patentes, además de oponerse a los

tratados de libre comercio (TLC) que con tantas urgencias y presiones intenta imponer Estados Unidos. Desde entonces el hombre vive bajo amenazas de muerte.
En mayo de 2001 fue atacado en Río de Janeiro por un desconocido que le robó su cartera, lo golpeó y con una navaja le dejó en una de sus muñecas una cicatriz de 16 centímetros. Lo que había quedado como un simple atraco tomó otro cariz en Miami, cuando Velásquez asistió a una reunión de la OMS: una noche en que caminaba por Lincoln Road fue abordado por dos hombres que lo golpearon y lo amenazaron de muerte. Mientras estaba tendido en el suelo, sus atacantes le dijeron: *"Esperamos que haya aprendido la lección de Río. Deje de criticar a la industria farmacéutica".* La cuestión estaba más clara.
Velázquez denunció el hecho a la policía de Miami y lo comunicó de inmediato a la sede de la OMS. Según informó en su momento el diario español *"El Mundo"*, a su regreso a Ginebra todo pareció volver a la normalidad, pero diez días después sonó el teléfono por la noche en el domicilio de Velázquez y una voz le preguntó en inglés: *"¿Tiene miedo?".* Cuando Velázquez preguntó quién era, la voz le respondió: *"Miami, Lincoln Road".*
Desde ese momento no cabían más dudas de que la vida del funcionario de la OMS estaba en peligro tanto en su casa como en el extranjero. Dos semanas después se repitió la llamada advirtiéndole que no asistiera a la reunión -que posteriormente se celebró y a la que Velázquez asistió de cualquier manera- de la Organización Mundial de Comercio (OMC), para discutir sobre la relación entre el derecho a la salud y la propiedad intelectual de los medicamentos esenciales.
Por si fuera poco, y como otra muestra de los poderes con que son protegidos los intereses de las multinacionales, la entonces secretaria de Estado norteamericana, Madeleine Albright, le "sugirió" a quien era directora de la OMS, Gro Harlem Bruntland, que retirara de circulación el estudio elaborado por Velázquez y, más aún, que lo despidiera, pero esta funcionaria decidió mantener su posición negativa al respecto.
El caso es que Germán Velásquez continúa luchando, entre otros aspectos, contra las patentes exclusivistas de las multinacionales farmacéuticas, por la libre elaboración de genéricos y por un fácil acceso de los países pobres a los medicamentos, mientras se ha visto obligado a vivir bajo permanente protección policial y de una patrulla de las Naciones Unidas. Presiones a las que obligan las grandes "familias" de la mafia farmacéutica.

El gran negocio

La globalización ha permitido que se desarrolle una nueva forma de poder, la farmacocracia, capaz de decidir qué enfermedades y qué enfermos merecen cura. Es así

como el 90 por ciento del presupuesto dedicado por la industria farmacéutica para la investigación y el desarrollo de nuevos medicamentos está destinado a enfermedades que padece sólo el 10 por ciento de la población mundial. Un tercio de ésta carece de cuidados médicos adecuados. La codicia de las multinacionales del sector, los aranceles, las trabas burocráticas y la corrupción de los propios gobiernos de los países empobrecidos hacen posible que más de 2.000 millones de personas se vean privadas de su derecho a la salud.
Según la OMS, millones de personas en Africa, Asia y América Latina sufren las llamadas "enfermedades olvidadas", como el dengue hemorrágico, la filiasis linfática, la oncocercosis, la enfermedad del sueño o el mal de Chagas, que afectan a 750 millones de personas y acaban con la vida de medio millón cada año.
Enfermedades causadas generalmente por parásitos, transmitidas por medio de agua insalubre o por picaduras de insectos; pandemias que caen en el olvido porque sólo afectan a las comunidades más pobres; y víctimas que no cuentan con el dinero suficiente para acceder a un tratamiento o una medicación adecuada.
El caso del SIDA es un ejemplo claro de la diferencia que se da a unas enfermedades o a otras, según el nivel adquisitivo de quienes las padecen. En sus comienzos fue una enfermedad mortal de la que pocos habían oído hablar, pero cuando pasó a afectar a personas de los países desarrollados con capacidad para hacerse escuchar, asociarse y reclamar su derecho a la salud, las multinacionales farmacéuticas desarrollaron medicamentos que convierten al SIDA en una enfermedad crónica y no mortal. Aún así, más de cinco millones de personas mueren cada año por el HIV y la mayoría de los enfermos –nueve de cada diez infectados viven en países empobrecidos- no pueden pagarse los tratamientos adecuados.
La vacuna contra el SIDA bien podría llevar años encerrada bajo llave en la caja fuerte de alguna multinacional farmacéutica. Para ninguna de ellas sería rentable comercializarla, sobre todo teniendo en cuenta que las personas más expuestas a esta enfermedad no podrían pagarla y que los enfermos de los países desarrollados ya pagan importantes sumas de dinero para su tratamiento. Este es uno de los abundantes capítulos que pueblan el particular código de "ética" de los grandes grupos químico-farmacéuticos.
El director del Programa Mundial de Medicamentos de la OMS, nuestro ya conocido y amenazado Germán Velázquez, en el Diálogo "Salud y Desarrollo: los retos del siglo XXI" efectuado en Europa en 2004, explicó que *"las patentes de los medicamentos pueden estar bloqueando el desarrollo en lugar de potenciarlo, pues se trata de un monopolio que conlleva altos precios"*. Señaló también que en el mercado de los medicamentos, *"en vez de reglas negociadas por todos y en interés de todos, muchas decisiones de la Organización Mundial de Comercio son tomadas a puertas cerradas y se protegen intereses especiales"*, y al referirse a la situación sanitaria en Africa subrayó: *"Si bien es cierto que la no atención médica de las personas está penada con la cárcel, actualmente se está cometiendo ese crimen con un continente entero y sus víctimas se pueden contar por millones"*. En otro orden y refiriéndose al tema del SIDA, expresó que *"es una vergüenza que el 99 por ciento de las personas que tienen acceso a los retrovirales vivan en países desarrollados, mientras el 75 por ciento de las personas de todo el planeta viven en los países pobres, donde se vende sólo el 8 por ciento de todos los medicamentos del mundo"*.
En relación a los medicamentos genéricos -otra de las batallas en muchos casos desigual que libran algunos países del Tercer Mundo contra las multinacionales farmacéuticas ya que son mucho más baratos que los patentados por éstas-, India encabeza la producción mundial, y los exporta a varios países de Asia e incluso a algunos en desarrollo. Pero también está enfrentando en los tribunales, entre otras, la embestida del laboratorio Novartis, uno de los "grandes" del sector, ya que el gobierno indio le negó una solicitud de patente para introducir el Glivec, un medicamento contra

el cáncer. Por el momento las empresas indias continúan produciendo su similar genérico, que cuesta sólo 2.700 dólares por paciente y por año, frente a la versión de Novartis cuyo valor es de diez veces más, 27.000 dólares, también por paciente y en el mismo período.

Por su parte, Tailandia emitió recientemente una licencia obligatoria para quebrar la patente del Efavirenz, un producto de la compañía Merck contra el HIV, a fin de importar el genérico de fabricación india. En tanto, Filipinas está por librar una batalla legal contra la empresa Pfizer para poder importar de la India una versión del Norvasc, un fármaco para pacientes con problemas cardíacos. Por supuesto que las multinacionales del sector arremeten con demandas, juicios y todo artilugio jurídico contra estas expresiones de independencia sanitaria de los países que se atreven a ponerla en juego. No es para menos si tenemos en cuenta, por ejemplo, que respecto del Norvasc la compañía Pfizer obtiene en Filipinas 60 millones de dólares anuales sólo por la venta de ese medicamento, al cual cotiza a más del doble del precio del que está vigente en otros países, aprovechándose también de que en Filipinas las enfermedades cardíacas constituyen la principal causa de muerte.
Lo cierto es que cientos de miles de personas podrían salvar sus vidas si los países desarrollados aseguraran que sus compromisos de Doha, Qatar, durante la reunión de la Organización Mundial de Comercio, en materia de legislación de patentes, compromisos nunca asumidos efectivamente hasta el momento, proporcionen un equilibrio entre derechos y obligaciones, garantizando así que las vidas de las personas se antepongan a los beneficios económicos de las compañías farmacéuticas.

Rumsfeld y la gripe aviar

El tema de la gripe aviar alcanzó altos niveles mediáticos en los dos años anteriores. Al poco tiempo, luego de alcanzar también altos niveles de alarma transmitidos a la población mundial, las aguas comenzaron a serenarse. Por un lado se decía que una pandemia de gripe aviar –comparándola con la de influenza o "gripe española", que costó unos 50 millones de vidas en el planeta entre 1918 y1920- costaría a su vez otros varios millones de vidas, especialmente en países pobres. Pero luego aparecieron algunas estadísticas que desvirtúan algo esa alarma, más aún cuando el mundo está a casi cien años de aquel período, en el que la tecnología y la elaboración de medicamentos estaba prácticamente en pañales. Dichas estadísticas muestran que desde hace nueve años, cuando fue detectado en Vietnam el virus de la gripe aviar, aún no llegan a cien las víctimas mortales, un promedio de once muertes al año, y en todo el mundo. Si bien no es para quedarse tranquilos exagerando la confianza, aún no da para

asustarse demasiado.
Sin embargo, la aparición del virus H5N1, nombre científico del que causa la gripe aviar, le vino bien a un hombre que encontró la excusa para lanzar otra de sus guerras preventivas: el presidente norteamericano George W. Bush, quien rápidamente hizo sonar la campana de alarma para que el mundo temblara de miedo. Es que había hallado una poderosa arma preventiva, con la que tiene bastante que ver su hasta hace poco brazo derecho en esto de lanzar guerras por aquí y por allá: el inefable Donald Rumsfeld. Se trata del antiviral Tamiflu, comercializado por la compañía farmacéutica suiza Roche, que en poco tiempo se convirtió en la gallina de los huevos de oro: los ingresos por su venta pasaron de 254 millones de dólares en 2004 a 1.000 millones en 2005. Además con un techo imprevisible por delante, teniendo en cuenta la grotesca reacción de los gobiernos occidentales al efectuar pedidos masivos del fármaco. Sin embargo, la realidad es que la eficacia del Tamiflu es cuestionada por gran parte de la comunidad científica: muchos se preguntan cómo se espera que pueda servir ante un virus mutante cuando apenas alivia algunos síntomas, y no siempre, de la gripe común y corriente. Una breve historia tal vez aclare algo la cuestión.
Como bien señala el Dr. José Antonio Campoy, director de "Discovery Salud", hasta el año 1996 el Tamiflu era propiedad de la empresa Gilead Sciences Inc, que ese año vendió la patente a los laboratorios Roche. ¿Y quién era entonces su presidente?. Pues nada menos que el incombustible y hasta hace poco secretario de Defensa de Estados Unidos, Donald Rumsfeld., a quien recordamos en una nota anterior como vinculado en su momento al laboratorio Searle, luego adquirido por la multinacional Monsanto, descubridor de un endulzante de trágicos antecedentes como el aspartamo, comercializado bajo los nombres de Nutrasweet y Equal y componente hoy en día de la mayoría de los edulcorantes y productos marcados como "no calóricos" o "libre de azúcar" que pululan en el mundo, algo a que también nos referimos en una nota anterior. Cabe destacar que Rumsfeld continúa hoy vinculado a Gilead Sciences Inc. como uno de sus principales accionistas. El caso es que en cuanto se comenzó a hablar de la gripe aviar, Gilead quiso recuperar el Tamiflu alegando que Roche no hacía los suficientes esfuerzos para fabricarlo y comercializarlo. Que tuvo la suficiente fuerza para lograrlo –fuerza en la que probablemente puso su parte el entonces secretario de Defensa- lo demuestra el hecho de que ambas empresas se sentaron a negociar, acordando rápidamente constituir dos comités conjuntos, uno encargado de coordinar la fabricación mundial del fármaco y decidir sobre la autorización a terceros para fabricarlo, y otro para coordinar la comercialización de las ventas estacionales en los mercados más importantes, incluido Estados Unidos. A todo ésto hay que agregar un detalle más: Roche ya se quedó con el 90 por ciento de la producción mundial de anís estrellado, planta que crece fundamentalmente en China si bien se la encuentra también en Laos y Malasia, y que es la base del Tamiflu. Así el escenario se fue completando. Sólo faltaba comenzar a encontrar poco a poco y en distintos países algunas aves contagiadas con el virus –una gallina aquí, dos patos allá-, para crear así una alarma mundial con la ayuda de científicos y políticos sin demasiados escrúpulos o de escasa capacidad intelectual, y de los grandes medios de prensa, que como todos saben no se caracterizan precisamente por investigar lo que publican o emiten.
¿Y qué tiene que ver Rumsfeld con todo esto?. Pues nada absolutamente, si nos atenemos a su respuesta, claro. De acuerdo a un comunicado emitido en octubre pasado por el Pentágono (otra fuente "creíble"), el entonces secretario de Estado no intervino en las decisiones que tomó el gobierno de sus amigos, el presidente Bush y el vicepresidente Dick Cheney, sobre las medidas preventivas que había que adoptar frente a la "amenaza de pandemia". El comunicado afirma que se abstuvo y no tuvo nada que ver en la decisión de la administración norteamericana de aconsejar y apoyar el uso del Tamiflu a nivel mundial. Por lo tanto, al hombre hay que creerle. Como cuando aseguró solemnemente que en Irak había armas de destrucción masiva.

Además, el hecho de que su nombre aparezca unido a una vacunación generalizada contra una supuesta gripe del cerdo durante la presidencia de Gerald Ford, en la década de 1970, que dio como resultado más de 50 muertos a causa de efectos secundarios, no es más que una coincidencia. Como también lo es que la FDA aprobara el aspartamo a los tres meses de que Rumsfeld se incorporara al gabinete de Ronald Reagan, pese a que tras diez años de estudios del producto no se había tomado ninguna decisión. Por supuesto, Rumsfeld tampoco tuvo nada que ver, tras el atentado a las Torres Gemelas, con la compra del Vistide, fármaco adquirido masivamente por el Pentágono para evitar los efectos secundarios que podía producir la vacuna contra la viruela entre los soldados norteamericanos a los que les fue aplicada antes de ser enviados a conquistar Irak. Además, que el Vistide fuera también un producto del laboratorio Gilead Sciences Inc., creador del Tamiflu, es otra coincidencia. Así que a no pensar mal de Donald Rumsfeld y, en todo caso, a seguir de cerca todas las informaciones que aún aparecerán sobre la gripe aviar, y por las dudas a llenar los botiquines con Tamiflu. Tal vez no será un medicamento muy combativo contra la gripe aviar, pero al menos podrá evitar, con un poco de suerte, un modesto resfrío.

Los laboratorios de Frankenstein

Para ir concluyendo esta trilogía de notas en las que hemos expuesto a la consideración de los lectores los desastres mundiales contra la humanidad a que la someten las multinacionales químicas como Monsanto y Dow Chemical, entre otras; los graves problemas de salud generados por el Nutrasweet, sus derivados y los demás edulcorantes cuya base es el aspartamo; y esta última sobre los atentados contra la salud que también cometen las multinacionales farmacéuticas, dedicaremos un párrafo a otras compañías que, en sus investigaciones para crear nuevos productos o mejorar los ya existentes, realizan experimentos aberrantes.
La compañía Procter & Gamble (P&G) –dedicada a la creación y comercialización de productos que van desde jabones, shampúes y detergentes a diversos cosméticos y elementos femeninos como toallas higiénicas y tampones, y que no hace mucho extendió su accionar al rubro farmacéutico- al igual que Nestlé y Colgate-Palmolive está siendo acusada en los últimos tiempos de llevar a cabo crueles experimentos de laboratorio con animales, ya sea para probar químicos, cosméticos o alimentos balanceados. La organización británica "Uncaged", que lucha por los derechos de los animales, acusa a Procter & Gamble de realizar experimentos dolorosos, invasivos y letales en perros, gatos y otras mascotas. Algunos de los que se mencionan son alergias severas inducidas en cachorros Siberian Husky y gatos muertos en experimentos abdominales invasivos. A su vez PETA (People for Ethical Treatment for Animals), otra entidad protectora de animales con más de un cuarto de siglo de trayectoria y con sede en Virginia, Estados Unidos, logró introducirse en uno de los laboratorios de IAMS, empresa adquirida en 1999 por P&G, y **declaró haber encontrado perros que se habían vuelto locos tras un intenso confinamiento en jaulas con barrotes que tenían escasas dimensiones, otros a los que les habían extirpado las cuerdas vocales y algunos animales languideciendo en sus jaulas, abandonados y sufriendo horrores, sin asistencia veterinaria**.
Los experimentos –denunciados en varias oportunidades y que motivaron que activistas de varios países, encabezados por "Uncaged", realizaran un día de boicot a P&G en mayo de 2005, repitiéndolo exactamente un año después- incluyen la quema de la piel de los animales con ácidos, introducirles polvos en los ojos y otras lindezas por el estilo. Todo en nombre de la ciencia, por supuesto. Por su parte, Nestlé Purina Petcare lleva experimentando desde 1926 en un complejo ubicado en Saint Louis, Missouri (casualmente vecinos de Monsanto), donde alojan a alrededor de 600 perros y 500 gatos en trece edificios. Ellos mismos publican sus experimentos –entre los que figuran

ciertos estudios en los que inducen fallos renales en perros y otros animales para después experimentar su cura con una dieta baja en proteínas- en periódicos científicos, con el fin de engordar las carreras y currículums de sus investigadores. En cuanto a Colgate-Palmolive, realiza sus pruebas en el Hill's Pet Nutrition, en Topeka, Kansas. Hace algunos años, la Unión Británica contra la Abolición de la Vivisección publicó detalles de un experimento llevado a cabo por la compañía en la Universidad de Columbia, en el que se encerraba a conejillos de Indias en pequeños tubos de plástico y se les aplicaba una fuerte solución de sulfuro durante cuatro horas al día por espacio de tres días. Ello causaba que la piel de los animales se quebrase y sangrase.
Los aquí expuestos han sido, en suma, algunos de los ejemplos que nos obsequian las multinacionales químicas y farmacéuticas –en buena parte de los casos ocultándolos, disfrazándolos, desmintiéndolos o atacando a quienes se atrevan a denunciar, criticar u oponerse por cualquier medio a sus designios-, y que nos dejan una pregunta prácticamente incontestable: a la vista de los efectos nocivos de muchos productos elaborados por las grandes compañías del sector, de que los mismos sean inalcanzables para gran parte de la población mundial por su costo o por no llegar a sus países, y de los monopolios ejercidos por estas multinacionales respecto del patentamiento de los fármacos, ¿qué podemos consumir en definitiva?; ¿cómo podemos defendernos del envenenamiento de los químicos y de los medicamentos no debidamente comprobados?; ¿quién nos protegerá contra tantas carencias y abusos?. Quizás la última palabra sólo la tengamos nosotros mismos.

Carlos Machado

*****El Metil paration fue excluido de la lista de sustancias activas autorizadas para el uso en productos de protección de plantas en 1991 bajo la Ley para protección de plantas contra plagas y pestes em muchos países. Prohibida la producción, uso y comercialización de todos los productos de protección de plantas que contengan Metil paration.
El Metil paration está designado como producto químico CFP.
Sólo está permitida la posesión y uso del producto químico para la investigación o propósitos de laboratorio en cantidades menores de 10 kg.**

Impresiciones, exageraciones, distorsiones, engaños y mentiras, una visión sesgada, escandalosa y profundamente injusta.

Desde la primeras dos lineas se trata de engañar al lector al el valor del mercado de una industria, es decir el valor de las VENTAS con los GANANCIAS de otra de una forma que se antoja intencionalmente vaga.

El desempeño de las empresas farmacéuticas que cotizan en bolsa ha estado por DEBAJO del resto del promedio y sus beneficios y rentabilidad suelen menores al de empresas de otros sectores.

Desde errores y omisiones, hasta actos criminales se han cometido en la industria

farmacétuica (como ha ocurrido en mucas otras)pero el remedio no ha sido peor que la enfermedad.

A quienes no les gusta cómo hacen las cosas las empresas farmacétuicas les invito a crear una y hacerlo mejor que ellas.

Don Ramón: que usted, honesto comerciante y vendedor al por menor se dé por aludido y se ofenda cuando se habla de las multinacionales farmacéuticas es como si yo, honesta usuaria de Internet me sintiera aludida y me ofendiera cuando le zurran estopa a Bill Gates.
No me sea bocazas, que conoce usted tanto de las empresas farmacéuticas como yo de la vida amorosa de los moluscos en las Islas Kandonga.
En la bitácora "Diario de un médico del SAS" http://blogs.ya.com/medicodelsas/(que recomiendo) comentaba que
"la 4ª causa de muerte en el mundo son las reacciones adversas medicamentosas."

Autor: Ramón Mier

Amiga,

No me doy por aludido, ni me siento ofendido.

Pero si usted leyera en mi blog un artículo en el que se afirmara que Bill Gates es el hombre más bueno y mejor parecido del mundo además de un competidor leal quizás me escribiría una nota señalando mi error.

De entre las empresas puramente farmacéuticas, la que mayores ventas tuvo el año pasado fue Pfizer con ,418 millones de dólares y una utilidad de ,278 millones de dólares es decir del 19%.

Compare eso con Microsoft, que tuvo ventas por ,420 millones de dólares y utilidades de ,814 millones, el 39%

La industria farmacéutica no es especialmente rentable comparada con otras industrias (sobre todo con las tecnológicas), su desempeño ha estado por debajo del promedio del mercado por varios años y su futuro se ve poco alentador.

Si atendemos a lo que el artículo dice, lo mejor que podría pasarnos es que mañana desapareciera la industria farmacéutica. Yo me niego a creerlo.

Fecha: 18/08/2008 19:28.

Don Ramón:
En el artículo se detallan varios casos de medicamentos insuficientemente probados, con conclusiones clínicas escamoteadas sobre efectos adversos, de la venta de sustancias prohibidas sin las advertencias exigidas sobre su toxicidad, etc.
Por ejemplo, a Pficer,2n 2007, la EMEA, (el organismo regulador europeo del medicamento) le advirtió que su fármaco para dejar de fumar, Champix (vareniclina), ha provocado casos de 'tendencias suicidas' y depresión profunda en pacientes que lo han tomado.

Estas consecuencias fueron detectadas en los estudios clínicos previos a su comercialización, y los resultados fueron falsificados y escamoteados, que es lo mismo que ocurrió con el famoso "PROZAC", cuyo efecto adverso fue detectado y ocultado ya que agudiza y desencadena justamente lo que trata de combatir, etc.
Denunciar las malas prácticas de los grandes laboratorios farmacéuticos, y exigirles que cumplan las garantías y controles legales a la hora de comercializar un medicamento, para impedir que sigan siendo la cuarta causa de muerte, no tiene parangín con los fallos estrepitosos de Windows Vista, que como mucho producirá dolores de cabeza.
Y por otro lado, Bill Gates tiene su morbo, lo que pasa es que usted no entiende de hombres y no le ve el atractivo.

Es muy normal que las personas con férreas creencias en las "bondades" del sistema, se sienta perplejo ante muchas declaraciones que se hacen de ciertas instituciones consagradas, pero la verdad es que EL ÚNICO INTERES DE UNA EMPRESA PRIVADA ES EL BENEFICIO, ya que están en presión, debido a sus inversores y a la competencia, por lo que no es muy sensato pensar que las prácticas desonestas que realizan algunas de ellas, son sin mala intención, ya que por falta de una legislación fuerte en la mayoría de los casos merece más la pena pagar la multa "si te pillan" y descontarselo a los beneficios, que ser onestos.

INFORME DE FISCALIZACIÓN DE LA DIRECCIÓN GENERAL DE BELLAS ARTES Y BIENES CULTURALES (5)

Entre otras pillerías, el Tribunal de Cuentas señala en este capítulo V, el caso del Museo Cerralbo, donde se exhiben los bienes que un ciudadano ejemplar legó en su testamento a favor del Estado español, en 1924; pero lo gestiona y cobra las entradas una Fundación privada, que con el beneplácito de los servicios jurídicos del Estado no justifica gastos, compra-ventas ni ganancias, y no rinde cuentas al Tesoro Público. Otros museos, venden entradas y publicaciones; pero ni las matrices de las entradas ni el total coincide con lo que ingresan en el Tesoro Público por este concepto. Y señala el Tribunal de Cuentas que tampoco hay manera de saber si se han vendido entradas y se han destruido las matrices para que no quede rastro, porque no existe ni el más mínimo sistema de control de taquilla y de caja. Y hay mucho más...

Los periodistas y analistas políticos españoles, los jueces, los fiscales, y los Abogados del Estado pueden llegar a la jubilación honrosa sin haber tenido en su puñetera vida ese mínimo rigor y honestidad intelectual necesario para confesar que jamás han leído los informes del Tribunal de Cuentas, porque todo lo que no sea el resumen de quince líneas que hacen sus subalternos, les desborda las entendederas.

En España se premia el morro y la jeta, y algunos de los grandes siluros de las finanzas, líderes políticos, y empresarios de los medios de comunicación, consiguieron sus fortunas multimillonarias sin haber aprendido jamás a leer e interpretar un balance contable.

Y con esa pereza mental funcionan y se forran a costa del erario público y de la molicie ciudadana.

Gatopardo

V.- ANÁLISIS DE LA GESTIÓN DE INGRESOS

5.1.- Según la información facilitada, en el ejercicio fiscalizado la DGBAyBC recaudó 11.015.491,07 euros, por los siguientes conceptos:

Concepto		Importe (euros)
Ingresos procedentes del "1% cultural"		9.572.865,80
Precios públicos	Venta de entradas a museos	1.167.372,38
	Por determinados servicios prestados	19.937,67
Tasa por expedición del permiso de exportación para bienes del Patrimonio Histórico Español		152.718,90
Cánones de los contratos de cafetería y tiendas en museos		102.596,32
Total ingresos		**11.015.491,07**

Ingresos procedentes del "1% cultural"

5.2.- Entre las medidas de fomento del Patrimonio Histórico Español incluidas en la Ley 16/1985, el artículo 68 establece el mecanismo denominado "1% cultural". Según lo dispuesto en dicho artículo, en el presupuesto de cada obra pública, financiada total o parcialmente por el Estado, se incluirá una partida equivalente al menos al 1% de los fondos que sean de aportación estatal, con destino a financiar trabajos de conservación o enriquecimiento del Patrimonio Histórico Español o de fomento de la creatividad artística, con preferencia en la propia obra o en su inmediato entorno. En el caso de obras públicas construidas y explotadas por particulares en virtud de concesión administrativa y sin la participación financiera del Estado, el 1% se aplicará sobre el presupuesto total para su ejecución.
Se exceptúan de esta obligación las obras cuyo presupuesto no exceda de 601.012,10 euros, y las que afecten a la seguridad y defensa del Estado o a la seguridad de los edificios públicos. Conforme a lo dispuesto en el artículo 58 del Real Decreto 111/1986, los organismos responsables de las obras pueden optar por dos modalidades para el cumplimiento de la anterior obligación: a) efectuar en su presupuesto las oportunas retenciones de crédito (o ingresar su importe en el Tesoro, en el caso de los organismos autónomos) para financiar los trabajos de conservación o de enriquecimiento del Patrimonio Histórico Español o de fomento de la creatividad artística incluidos en los planes anuales que a tal respecto debe elaborar el Ministerio de Cultura, y b) realizar directamente trabajos de conservación o enriquecimiento del Patrimonio Histórico Español con preferencia en la propia obra o en su inmediato entorno, o en cualesquiera de los bienes de interés cultural relacionados con las actividades del organismo correspondiente. Los organismos deben dar cuenta al Ministerio de Cultura de los proyectos que se acogen a esta segunda opción y de su ejecución. En el caso de la primera modalidad, es el Ministerio de Cultura el que gestiona los correspondientes fondos, previo incremento de sus créditos presupuestarios.

5.3.- El artículo 60 del Real Decreto 111/1986 establece la obligación del Ministerio de Cultura de elevar anualmente al Gobierno un informe sobre el grado de cumplimiento de las normas relativas a la consignación y destino del "1% cultural" y sobre la aplicación de los fondos transferidos al Ministerio por tal concepto. Según dicho informe, las retenciones efectuadas en 2004 para cumplir con el "1% cultural" y comunicadas al Ministerio de Cultura por la Dirección General de Presupuestos, alcanzaron un total de 5.998.247,27 euros, según el detalle que figura en el cuadro siguiente, autorizándose

ampliaciones de crédito en el presupuesto de la DGBAyBC por importe de 5.836.852,77 euros.

(euros)

Museo/aplic. presup.	20	21	22	23	Total aplic.
del Traje (203)	5.000,00	105.108,00	659.946,00	550,00	770.604,00
Arqueológico Nacional (204)	14.700,00	114.000,00	474.643,00	400,00	603.743,00
Arte Romano (205)	17.235,00	85.000,00	223.700,00	100,00	326.035,00
Arqueología submarina (206)	-	38.500,00	79.450,00	-	117.950,00
Altamira (207)	-	64.846,00	231.648,00	200,00	296.694,00
Sefardí (208)	-	45.750,00	152.566,00	-	198.316,00
Escultura (210)	-	61.900,00	199.049,00	400,00	261.349,00
Total Museos	**36.935,00**	**515.104,00**	**2.021.002,00**	**1.650,00**	**2.574.691,00**

5.4.- En cuanto a los ingresos materializados directamente en el Tesoro por los organismos públicos, que dieron lugar a las oportunas generaciones de crédito, fueron los siguientes (en el punto 6.18 se analiza la ejecución de estos créditos):

Organismo	Ministerio	Importe (euros)
Confederación Hidrográfica del Tajo	Medio Ambiente	1.336.728,89
Confederación Hidrográfica del Ebro	Medio Ambiente	17.234,08
Confederación Hidrográfica del Guadalquivir	Medio Ambiente	759.125,43
Confederación Hidrográfica del Norte	Medio Ambiente	1.442.705,53
Confederación Hidrográfica del Duero	Medio Ambiente	44.980,20
Confederación Hidrográfica del Segura	Medio Ambiente	12.489,88
Comisión del Mercado de Telecomunicaciones	Industria, Turismo y Comercio	23.975,66
Consejo Superior de Deportes	Educación y Ciencia	73.088,48
INEM	Trabajo y Asuntos Sociales	25.684,88
Total		**3.736.013,03**

Ingresos por venta de entradas a museos

5.5.- El régimen general de acceso a los museos de titularidad estatal se encuentra regulado por el artículo 22 del Reglamento aprobado por Real Decreto 620/1987 (modificado por Real Decreto 496/1994), que se remite para la determinación de los precios, régimen de visitas gratuitas y precios reducidos, a la Orden de 28 de junio de 1994 (modificada por Órdenes de 8 de octubre de 1998, 10 de noviembre de 2003, 11 de noviembre de 2004, y 3 de mayo de 2006). El precio general vigente en el ejercicio 2004 era de 2,40 euros, con algunas excepciones para determinados museos.

5.6.- De la relación de museos de titularidad estatal recogida en la Orden de 28 de junio de 1994, no han generado ingresos en 2004 el Museo Romántico, el Nacional de Reproducciones Artísticas y el Cerralbo. El primero de ellos por obras, el segundo por no disponer de sede, permaneciendo sus colecciones almacenadas y el tercero por las circunstancias que se detallan seguidamente.

5.7.- La DGBAyBC no considera los ingresos procedentes de la venta de entradas del

Museo Cerralbo como ingresos de derecho público, sino como recursos de la *Fundación Cultural "Museo del Excmo. Sr. Marqués de Cerralbo, D. Enrique de Aguilera y Gamboa"*, que dicho causante instituyó en su testamento, al tiempo que legaba a su muerte (sucedida en 1922) al Estado español las colecciones de obras de arte que se hallaban en su palacio, legado que fue aceptado por Reales Órdenes de 10 de abril y 24 de septiembre de 1924. Como justificación del tratamiento dado a estos ingresos, la DGBAyBC ha facilitado al Tribunal un informe de la Abogacía del Estado, de 13 de diciembre de 1994, en el que se concluye que *"el precio de las entradas al museo pertenece al titular de éste, es decir, a la Fundación, por lo que no se pueden considerar precios públicos".*

5.8.- En cuanto al sistema de control interno establecido para los ingresos por venta de entradas, durante el ejercicio fiscalizado no existían normas específicas al respecto, ni manuales de gestión. El procedimiento seguido consistía en la remisión por los directores de los museos a la Subdirección General de Museos de los partes de visitas mensuales, correspondientes a las entradas vendidas de cada tipo: ordinarias, reducidas y gratuitas. A esta documentación se acompañaban los justificantes de los ingresos realizados en las cuentas restringidas de recaudación abiertas en entidades colaboradoras. Por lo general no coinciden los períodos de ingreso, que suelen ser quincenales, con los partes de visitas mensuales, lo que dificulta en gran medida el control de las ventas, la recaudación y los ingresos al Tesoro Público. Por otro lado, no consta que la Subdirección General de Museos realice ninguna comprobación sobre la documentación que recibe.

5.9.- El detalle de la recaudación en cada uno de los museos se expone en el anexo 7. Para su fiscalización se ha examinado, por un lado, en la Subdirección General de Museos, una muestra de todos los partes de visitas relativos al ejercicio 2004 remitidos por cinco museos, según detalle del cuadro siguiente. Por otro lado, con la finalidad de comprobar in situ el funcionamiento del sistema de control interno sobre la venta de entradas, se realizaron trabajos de campo en los museos Arqueológico Nacional, del Traje y Nacional de Altamira. Los resultados obtenidos se exponen a continuación.

-

Museo	Ingresos por entradas (euros)
Nacional de Altamira (Cantabria)	255.169,20
Casa Museo El Greco (Toledo)	164.508,00
Sefardí (Toledo)	215.810,40
Nacional de Arte Romano (Mérida, Badajoz)	123.051,60
Sorolla (Madrid)	65.080,86
Total muestra	**823.620,06**

5.10.- Partes de visita examinados en la Subdirección General de Museos:

a) Los museos no siguen un criterio uniforme en cuanto al ingreso de la recaudación en el Tesoro Público. Los museos de Altamira y El Greco realizan ingresos quincenales; los museos Sefardí y Sorolla, mensuales. En el Museo Nacional de Arte Romano de Mérida se han producido retrasos de dos meses en los ingresos correspondientes a las ventas de entradas de enero y julio.

b) En algunos casos se han producido diferencias entre las entradas cobradas, según los partes de visitas, y los ingresos realizados en el ejercicio. En el Museo Sefardí, la diferencia (16.808,40 euros) corresponde a ventas de entradas de noviembre y diciembre de 2003, ingresadas en enero 2004. En el Museo Nacional de Altamira se producen diferencias, en más o en menos, todos los meses. La diferencia anual neta, no justificada, asciende a 841,50 euros, ingresados de menos. En el Museo Nacional de Arte Romano hay una diferencia de 3.835,20 euros, ingresados de más. Parece corresponder a la venta de entradas del mes de febrero, cuyo parte no consta en el expediente.

c) Otros defectos observados en los partes de visita son: En el Museo Nacional de Altamira y en el Sefardí hay errores o rectificaciones manuales en los partes de visita relativos a las fechas a que se refieren. En los siguientes museos el total de los ingresos por quincenas no coincide con lo rendido en los estados de situación de Tesorería a la Unidad Central de Caja:

(euros)

Museo	Ingresos Tesoro	Estados Tesorería	Diferencia
Casa Museo El Greco	164.507,60	123.355,20	41.152,40
Sefardí	232.618,80	228.610,00	4.008,80
Nacional de Arte Romano	123.051,60	120.456,95	2.594,65

5.11.- Trabajos de campo en los museos Arqueológico Nacional, del Traje y Nacional de Altamira.

a) En el Museo Arqueológico Nacional se han observado las siguientes deficiencias de control:

- No se comprueba por ningún órgano externo a la Caja la correspondencia de las matrices de las entradas vendidas con las que figuran en los partes.
- No es posible identificar las matrices correspondientes a cada categoría de entradas porque todas son iguales. Solicitadas las matrices correspondientes a las entradas vendidas en el mes de julio de 2004, se localizaron algunas cuyos números coincidían con los que figuraban en los partes, pero no fue posible obtener certeza sobre su correspondencia con la categoría de las entradas pertinente
- El sistema no permite asegurar que no se vendan entradas, se recauden los importes y se destruyan las matrices sin ingresar el dinero cobrado.
- Al presentarse el equipo del Tribunal en la taquilla para hacer el arqueo de caja de la tarde, no había en la misma ningún empleado para vender las entradas, permitiéndose a los visitantes que llegaban en ese momento el acceso libre al museo.

b) En el Museo del Traje, desde la inauguración del museo el proceso de venta de entradas está informatizado. El programa indica el precio de la entrada en función del tipo, imprimiendo los tickets correspondientes. Diariamente se obtienen los partes de ventas (resúmenes de facturación) que detallan el número e importe de las entradas vendidas por tipos, así como el de las miniguías. Sin embargo los resguardos de los ingresos de la recaudación en la cuenta restringida no hacen referencia a los conceptos ni a los períodos a que corresponden. Tampoco aparece dicha información en los resguardos de los ingresos en la cuenta del Tesoro Público.

c) En el Museo Nacional de Altamira, la gestión de la venta de entradas se realiza a través de un sistema informático desarrollado por el BSCH en virtud de un convenio de colaboración suscrito el 17 de mayo de 2001, en el que, además, el banco asumía a su cargo la dotación al museo de todos los medios informáticos necesarios (equipos, conexiones y programas). Se prevén varias modalidades de pago: en taquilla, a través de cajeros automáticos y pago a través de sucursal, banca telefónica o electrónica. Los últimos sistemas mencionados permiten la venta anticipada de las entradas. De las comprobaciones practicadas sobre el anterior procedimiento, cabe destacar las siguientes deficiencias:

- El banco repercute a los compradores un 3,75% sobre el precio de las entradas cuando el pago se efectúa mediante tarjeta de crédito, supuesto no previsto en la Ley 8/1989, de 13 de abril, de Tasas y Precios Públicos.

- El 1 de junio de 2004 la DGBAyBC autorizó el aplazamiento de pago por entradas a museos y exposiciones. Dicho aplazamiento no está previsto en la Ley de Tasas y Precios Públicos, que sí regula, por el contrario, el pago anticipado o el depósito previo del importe total o parcial (artículo 27.4), supuesto que parece más adecuado para abordar los problemas a que pretende hacer frente el aplazamiento aquí reseñado (visitas de grupos), que tampoco encuentra amparo en las Órdenes del Ministerio de Cultura de 1 de julio de 1994 y de 20 de enero de 1995, que regulan los precios de las entradas a los museos de titularidad estatal. La aplicación del artículo 13 de la LGP tampoco resulta posible por la inexistencia de la autorización reglamentaria que el mismo exige.

- Por otro lado, en la aplicación práctica del sistema de aplazamiento de pago señalado se observan dos circunstancias destacables: la no exigencia de intereses de demora (que contraviene lo establecido en el artículo 13 de la LGP) y la aceptación del pago mediante cheque (no permitido por el artículo 27.3 de la Ley de Tasas y Precios Públicos, que solo contempla el pago en efectivo o mediante efectos timbrados).

- Otra circunstancia negativa del anterior sistema es la disminución de la seguridad de cobro. Al término de 2006 aún permanecía pendiente de pago una factura aplazada por importe de 148,80 euros, emitida el 24 de septiembre de 2004 por visitas realizadas los días 23 de julio y 6 de agosto de dicho año. En otra factura aplazada y abonada se observó el incumplimiento del plazo previsto para el pago.

- La cláusula séptima del convenio con el banco establece que el importe percibido por la venta de las entradas será transferido a la cuenta del Tesoro con una periodicidad semanal. En la práctica, sin embargo, es el personal del museo quien realiza quincenalmente los correspondientes ingresos al Tesoro, mediante cheque.

- Según los partes mensuales de visitas, los ingresos del ejercicio 2004 ascendieron a 255.169,20 euros, mientras que el total traspasado al Tesoro Público fue de 254.327,70 euros. El museo explica la diferencia por las ventas anticipadas, aunque no se ha aportado el cuadre correspondiente. Por otra parte, no se abonó en la cuenta del Tesoro la recaudación de las entradas de los días 29 y 30 de diciembre, que ascendió a 1.065,60 euros.

Tasa por expedición del permiso de exportación sobre bienes del Patrimonio Histórico Español

5.12.- Conforme a lo dispuesto en la Ley 16/1985, de 25 de junio, se entiende por exportación de bienes del Patrimonio Histórico Español la salida del territorio español de cualquiera de los bienes que integran dicho Patrimonio. La ley exige autorización de exportación para los bienes de más de 100 años de antigüedad y, en todo caso, para los inscritos en el Inventario general. Está prohibida la exportación de bienes declarados de interés cultural.

5.13- La tasa se encuentra regulada en el artículo 30 de dicha Ley. Sus elementos esenciales son los siguientes:

- Hecho imponible: la concesión de la autorización.
- Exenciones: las exportaciones de bienes que tengan lugar durante los diez años posteriores a su importación, la salida temporal, legalmente autorizada y la exportación de objetos muebles de autores vivos.
- Sujetos pasivos: son las personas a cuyo favor se concedan las autorizaciones.
- Base imponible: está determinada por el valor real del bien que se pretenda exportar, considerando como tal el declarado por el solicitante, sin perjuicio de la comprobación administrativa que prevalecerá cuando sea superior a aquél.
- Tipos impositivos: entre el 5% y el 30%, en función del valor asignado al bien.
- Devengo: se produce cuando se concede la autorización de exportación.
- Afectación: el producto de la tasa queda afectado exclusivamente a la adquisición de bienes de interés para el Patrimonio Histórico Español.

5.14.- Es cuestionable la compatibilidad de esta tasa con el Derecho comunitario, que prescribe por un lado la prohibición de establecer derechos a la exportación o tasas de efectos equivalentes entre los Estados miembros y, por otro, la adopción de una tarifa aduanera común en sus relaciones con terceros países. Hasta la fecha ha prevalecido el criterio favorable a la permanencia de la tasa con base en la antigüedad de su establecimiento (su antecedente más remoto se encuentra en el Real Decreto-Ley de 9 de agosto de 1926, sobre protección y conservación de la riqueza artística), el respeto a la legislación nacional y su aplicación sólo a terceros países. Actualmente, dentro de los Estados de la Unión Europea, España e Italia son los únicos que mantienen esta tasa. Por otra parte, de la regulación de la tasa contenida en la Ley del Patrimonio Histórico y en el Real Decreto 111/1986 no se desprende que se haya tenido en cuenta el principio de equivalencia establecido en la Ley 8/1989 de Tasas y Precios Públicos.

5.15.- En cuanto a los procedimientos de liquidación y pago, la ley se remite a una futura regulación reglamentaria. Hasta la fecha, la única norma establecida al respecto es la Disposición Adicional Segunda del Real Decreto 111/1986, que atribuye a la DGBAyBC la gestión y liquidación de la tasa; precisa que la declaración del valor hecha por el solicitante del permiso se contrastará con la realizada por la JPHE, que prevalecerá de ser superior; y excluye de la aplicación de la tasa las exportaciones con destino a Estados miembros de la CEE, por aplicación directa del artículo 9 del Tratado Constitutivo firmado en Roma el 25 de marzo de 1957. Esta circunstancia favorece que la tasa sea fácilmente eludible solicitándose y tramitando los permisos de exportación a Estados de la U.E. que no la tengan establecida, aunque el destino final de los bienes sean terceros países que sí estarían sujetos a la tasa española, lo que podría explicar el hecho de que las autorizaciones con liquidación de tasa representan un porcentaje muy pequeño sobre el total de expedientes de exportación tramitados (4% en 2002, 5% en 2003 y 6% en 2004).

5.16.- En el ejercicio fiscalizado no existía un manual de gestión y liquidación de la tasa ni instrucciones formalizadas al efecto. Su tramitación se realiza por la Subdirección General de Protección del Patrimonio Histórico, que dispone de una base de datos donde se registran los expedientes de autorización tramitados, aunque la información relativa a la gestión de las correspondientes tasas es muy limitada. No se recogen, por ejemplo, algunos de los campos necesarios para el seguimiento y control de la tasa, como las fechas de liquidación o de ingreso o las referencias de los justificantes de ingreso. Por otra parte, se elaboran mensualmente unos listados de cantidades recaudadas por este concepto, que únicamente hacen referencia al número del expediente, la identidad del solicitante del permiso y el importe de la tasa. La elaboración de estos listados se hace a partir de los justificantes de ingreso aportados por los propios sujetos pasivos de la tasa como requisito previo para la entrega de los correspondientes permisos de exportación. No hay constancia de que en el ejercicio fiscalizado se contrastara esta fuente de información con los listados mensuales de recaudación de tasas recibidos del Tesoro, en los que figura el número de justificante, fecha de ingreso, identificación del sujeto pasivo e importe abonado.

5.17.- De acuerdo con la información existente en la base de datos reseñada, en el ejercicio 2004 se tramitaron 1.530 expedientes de exportación, de los cuales únicamente 91 (el 6%) estaban sujetos a la tasa (cifras que no coinciden con las recogidas en la Memoria de la JPHE, a pesar de que su fuente es la misma base de datos). El importe de las tasas devengadas por estos expedientes ascendió a 574.380,00 euros, de los cuales se recaudaron en el ejercicio 124.867,90 euros correspondientes a 78expedientes, además de otros 27.851,00 euros correspondientes a 11 expedientes cuya tasa se liquidó en 2003. De los 13 expedientes restantes de 2004, cuatro (cuyas tasas ascendían a 4.127,00 euros) caducaron al no recoger los solicitantes los permisos; cinco eran permisos temporales con posibilidad de venta, que en dos casos (tasas por 423.088,33 euros) no se habían producido y en tres (tasas por 10.686,50 euros) aún no estaban resueltos; por último, cuatro correspondían a tasas abonadas en el ejercicio siguiente (11.612,08 euros).

5.18.- Ni en el ejercicio 2004 ni en los precedentes la DGBAyBC tramitó las generaciones de crédito necesarias para dar a los ingresos derivados de la tasa de exportación el destino previsto en la Ley, esto es, la adquisición de bienes de interés para el Patrimonio Histórico Español. La primera generación de crédito se efectuó en marzo de 2006, por los ingresos correspondientes al segundo semestre de 2005.

5.19.- Se examinó una muestra de catorce expedientes de autorización de exportación, diez de ellos con liquidación de tasa, por un importe conjunto de 52.772,83 euros, y cuatro sin liquidación de tasa. Los principales resultados obtenidos fueron los siguientes:

a) En cuanto al cumplimiento de los requisitos formales exigidos por los artículos 46 y siguientes del Real Decreto 111/1986 para la tramitación de los permisos de exportación:

Existen dos modelos de solicitud de permisos de exportación: uno para exportaciones fuera del ámbito comunitario y otro para el movimiento de bienes culturales dentro de las fronteras comunitarias. Sólo en dos de los catorce expedientes examinados el modelo utilizado era el adecuado.

En ninguno de los nueve expedientes en los que se presentan las solicitudes por representantes de los propietarios de los bienes consta la pertinente autorización o poder de representación.

En tres expedientes no figura el código de identificación del bien o, en su defecto, la declaración acerca de si existe expediente incoado para su inclusión en el Inventario general, tal como exige el artículo 46.1.b) del Real Decreto. En otros dos, referentes a bienes del Museo Nacional del Prado, el código indicado era el genérico del museo.

En un expediente la declaración del solicitante acerca del valor de los bienes a exportar presenta valores corregidos, con rectificaciones manuales y mal totalizados. En otro, el valor del bien figura en la Resolución de autorización tachado y corregido manualmente.

En doce expedientes el número de fotografías del bien a exportar que figura en el expediente es inferior al establecido en el artículo 46.2 del Real Decreto.

En dos expedientes de solicitud de exportación temporal no consta la proposición de la JPHE acerca de las condiciones de retorno y demás garantías que estime convenientes, conforme establece el artículo 53 del Real Decreto. En otro expediente la Junta propone solicitar un informe técnico y el mismo día dictamina a favor de la concesión del permiso.

En un expediente no se liquidó la tasa correspondiente al permiso concedido, sino que se entendió indebidamente aplicable al mismo la tasa abonada por la concesión de un permiso anterior que había caducado.

b) En cuanto a la liquidación de las tasas:

- Para la liquidación de las tasas la DGBAyBC utiliza el modelo 790, que corresponde a las tasas autoliquidadas por el sujeto pasivo, en lugar del 990, que es el adecuado según lo establecido en la Orden de 4 de junio de 1998, modificada por Orden de 11 de diciembre de 2001.

- En un expediente falta el justificante del ingreso de la tasa, aunque se ha podido comprobar dicho ingreso con la documentación facilitada por la Oficina presupuestaria.

c) Respecto de los cuatro expedientes examinados en los que no se había liquidado tasa, se verificó que correspondían a los supuestos de exención previstos en la Ley. En todos los casos se trata de autorizaciones para salidas temporales, exentas de la tasa según lo establecido en el artículo 30.b.2) de la Ley del Patrimonio Histórico Español.

Cánones de los contratos de cafeterías y tiendas en museos.

5.20.- El importe devengado a favor de la DGBAyBC en el ejercicio 2004 en concepto de cánones por los contratos de gestión de las tiendas–librerías y cafeterías de los museos ascendió a 103.439,13 euros, conforme al siguiente detalle. De dicha cantidad únicamente se ingresaron en 2004 36.562,62 euros, abonándose el resto en el ejercicio siguiente. Asimismo se recaudaron en 2004 55.001,89 euros correspondientes a cánones del ejercicio anterior. Se han examinado por el Tribunal los contratos relativos a la prestación de los referidos servicios, así como la documentación justificativa de los correspondientes ingresos, cuyo seguimiento corresponde a la Subdirección General de Museos

Museo	Tienda	Cafetería	Total Museo
Arqueológico Nacional	36.115,73	-	36.115,73
de América	5.439,12	-	5.439,12
Sefardí	9.689,42	-	9.689,42
Nacional de Altamira	35.838,06	12.020,24	47.858,30
del Traje	4.336,56	-	4.336,56
Total Museos	**91.418,89**	**12.020,24**	**103.439,13**

5.21.- En el ejercicio 2004 estuvieron vigentes cinco contratos de prestación del servicio de tienda librería: el del Museo Nacional de Altamira, firmado el 9 de julio de 2001 y prorrogado hasta 2005; los de los museos Arqueológico Nacional, de América y Sefardí, firmados el 14 de octubre de 2002 por un período de dos años; y el del Museo del Traje, firmado el 10 de diciembre de 2003 por el mismo plazo. Todos ellos fueron adjudicados a la empresa ALDEASA. En los contratos de los museos de América, Arqueológico Nacional, Sefardí y Nacional de Altamira se establece como importe del canon un porcentaje (del 8% al 12%) sobre las ventas netas, en función de su importancia y por tramos. En el Museo del Traje, los porcentajes son del 5% al 12% pero no sobre las ventas netas sino sobre los ingresos brutos, también por tramos. En los museos de América, Arqueológico Nacional y Sefardí la empresa ofrece además, como mejora, un 5% sobre las ventas de productos con los logotipos de los correspondientes museos que tengan lugar fuera de las respectivas tiendas. En el caso del Museo Nacional de Altamira se establece un canon mínimo garantizado de 24.040,48 euros para el caso de que las ventas no llegaran a 300.500,05 euros. En los contratos de estos cuatro museos se determina que el pago será satisfecho anualmente, mientras que en el Museo del Traje será trimestral. Se establece también, en todos, mecanismos de control por parte de la Subdirección General de Museos y diversas obligaciones de información y documentales de los adjudicatarios.

5.22.- En la Subdirección General de Museos no se disponía de la documentación contable que debía ser aportada por la empresa adjudicataria de los cinco contratos para la determinación del canon aplicable al ejercicio 2004. Únicamente figuran las liquidaciones practicadas por la empresa, sin soporte de documentación contable. Tampoco hay constancia alguna de comprobaciones de la DGBAyBC sobre los datos ofrecidos. Sólo en relación con las ventas en el exterior, figuran en los expedientes, con la liquidación correspondiente al último trimestre, unos listados anuales de ventas por museos.

5.23.- Por otro lado, en el ejercicio fiscalizado se encontraban vigentes tres contratos para la prestación del servicio de cafetería, en los museos Nacional de Altamira, de América y del Traje. Únicamente del primero de ellos se derivaron ingresos en concepto de canon por el importe previsto en el contrato (12.020,24 euros). El contrato relativo al Museo de América no preveía el abono por parte del adjudicatario de contraprestación alguna. En el contrato correspondiente al Museo del Traje se había establecido un canon mínimo del 5% sobre los beneficios netos obtenidos, que debería abonarse trimestralmente. Sin embargo, en 2004 la empresa adjudicataria no abonó cantidad alguna por dicho concepto, ni se ha aportado documentación alguna sobre la reclamación del canon por parte de la DGBAyBC. En el informe de control financiero de la IGAE relativo a dicho ejercicio se mencionan escritos de la Subdirección General de Museos, que no han sido facilitados al Tribunal de Cuentas, en los que, al parecer, se requiere información contable a la empresa, y contestaciones de ésta en las que se

indica que sólo ha tenido pérdidas en el ejercicio, por lo que no procede el abono del canon. No consta que la empresa haya remitido a la DGBAyBC la información contable que acredite dicha situación.

5.24.- El examen de los contratos para la prestación del servicio de cafetería ha puesto de manifiesto algunas irregularidades en su tramitación:

a) Los contratos de los museos Nacional de Altamira y de América fueron calificados originariamente como contratos de servicios, pese a que su naturaleza jurídica es la de contratos administrativos especiales, según reiterada doctrina de la Junta Consultiva de Contratación Administrativa (informes de 10 de julio 1991, 7 de marzo de 1996, 6 de julio de 2000 y 29 de junio de 2005). El último contrato firmado con el Museo de América, de 1 de abril de 2005, se tramita correctamente como contrato administrativo especial.

b) Durante el ejercicio 2004 se mantuvo prorrogado tácitamente el contrato relativo al servicio de cafetería del Museo de América, pese a que el artículo 8 de la LCAP prohíbe lasprórrogas tácitas para este tipo de contratos. El contrato inicial se firmó el 1 de junio de 2000, por un plazo de dos años prorrogables. En marzo de 2004 la DGBAyBC acordó prorrogar el contrato por otros dos años, a pesar de que el Servicio Jurídico informó desfavorablemente por haber transcurrido el plazo máximo de 4 años previsto en el artículo 198.1 del TRLCAP. Se inicia entonces un procedimiento de adjudicación por concurso, que queda desierto. Finalmente se tramita un procedimiento negociado, firmándose el nuevo contrato con otra empresa el 1 de abril de 2005.

c) El 30 de julio de 2004 la DGBAyBC autorizó la cesión del contrato correspondiente al Museo del Traje, suscrito el 16 de febrero del mismo año, pese a que la cláusula 17.3 del Pliego de cláusulas administrativas particulares establecía que el contrato no podría ser objeto de cesión ni de subcontratación total o parcial. La empresa cesionaria está compuesta en su mayor parte por socios de la adjudicataria.

DOCUMENTAL DE LA BBC: OPERACIÓN GLADIO

Versión Original con subtítulos en español.
Operación Gladio 1ª parte,

Operación Gladio. 2ª parte

Operación Gladio 3ª parte

La Operación Gladio fue ideada después de la Segunda Guerra Mundial por la CIA y el MI6, tenía como objetivo prepararse ante una eventual invasión soviética de Europa occidental por medio de fuerzas armadas paramilitares secretas de élite dispuestas en diversos países capitalistas. Todos los países capitalistas de dicho continente poseían contingentes secretos, generalmente sin el conocimiento del gobierno correspondiente. Muchos nazis retirados fueron miembros de Gladio, que aceptaba solamente a gente

segura, es decir, militantes nacionalsocialistas alejados del conservadurismo moderado y de la izquierda.
(Fuente: Wikipedia)

(...)De la P2 a la red Gladio:

La logia P-2 era la base de la red Gladio en Italia. Una red secreta de intervención y subversión, constituida por la CIA a principios de los cincuenta, y desplegada por todos los países europeos bajo dominio norteamericano. Si en un principio sus objetivos eran eliminar la enorme influencia de los partidos comunistas tras la IIª Guerra Mundial –a través de actos de sabotaje, asesinatos, chantajes…– y paralizar la infiltración soviética, esa batalla tuvo en Italia –donde el PCI había sido la única fuerza que había enfrentado a los fascistas– uno de sus puntos culminantes. La CIA amañó las primeras elecciones y construyó un régimen cuyo objetivo era evitar que el PCI gobernase.

Pero pronto la red Gladio se convirtió en un monstruo que horadaba todos los aparatos de Estado, desde el ejército a los partidos políticos, y los colocaba bajo el mando norteamericano. Un auténtico poder en la sombra, con capacidad para reconducir, por medios políticos o por la fuerza, el rumbo político de los países europeos si éste no se ajusta a las necesidades norteamericanas. Que incluso ejecutó actos terroristas que luego se achacaban a grupos de izquierdas. El más destacado de ellos fue la explosión en una estación de tren de Bolonia en 1980, que acuso 85 muertos.

Autor: emilio

Sï, a esos atentados les llaman "false flag" en el mundo de habla inglesa, es decir, con bandera falsa. Esa estrategia de tirar la piedra y esconder la mano, para señalar con el dedo a otro, seguramente se remonta a los orígenes de la historia. "Remember the Maine".

SI VICTOR HUGO ROSCÓN BANDA VIVIERA...

Entrevista a Victor Hugo Roscón Banda

Es el drama que ya no alcanzó a escribir Víctor Hugo Rascón Banda. El dramaturgo de la indignación y de la injusticia estaría ya esbozando su siguiente obra con los materiales que la realidad del espanto cotidiano nos receta no sólo en Chihuahua, su tierra, sino en todo este país.
Porque para su teatro, Víctor Hugo no echa mano del sino deparado a monarcas y aristócratas. Nos presenta la tragedia a veces anónima de la gente ordinaria: una rarámuri extraviada en Estados Unidos, una ex reina de fiesta de pueblo agobiada porque el crimen se le instaló en su familia. Y precisamente en este país de ejecuciones, de operativos conjuntos, de secuestros, los dramas de la gente, de las familias, de los pueblos, se multiplican sin esperar quién los escriba.
La vida de Víctor Hugo finalizó con julio. Ese mismo mes se registraron más de un centenar de ejecuciones en el estado de Chihuahua: el mes más cruel, más sangriento, en lo que va de año ensangrentado. No se trata sólo de la escalada cuantitativa en la osadía del crimen organizado; es un cambio cualitativo en la ya de por sí deteriorada situación.
En una misma semana se dan varios hechos que denotan el precipicio: en Namiquipa, los sicarios asesinan a quemarropa en la propia puerta de su casa al tesorero municipal; sin nexos conocidos con el crimen organizado. En Ciudad Guerrero es ultimado el comandante de la policía municipal. En Ciudad Juárez se detiene a un policía que comanda una banda de sicarios. Apenas el martes 5, al mismo tiempo que el secretario de Gobernación, fuertemente resguardado, atiende una reunión en el palacio de gobierno de la capital del estado, a 30 kilómetros de ahí, en Aldama, ejecutan a dos policías ministeriales.
La violencia no se restringe a las grandes ciudades del estado ni a la faja fronteriza: el contagio ya se ha dado en las ciudades medias, como Camargo y Aldama, y en las comunidades rurales. Los rafagazos y los encobijados o encajuelados cubren desde el Bravo hasta la frontera con Durango, desde el desierto oriental hasta la sierra Tarahumara, sin que autoridad alguna pueda detenerlos. Asciende también el número de secuestros: en sólo siete meses del año se superó ya el total de 2007.
Pero no es sólo la situación de Chihuahua la que preocupa: es lo nacional, casi lo universal contenido en el horror que vive la gente todos los días lo que inquieta. Porque

en Chihuahua –y Víctor Hugo lo hubiera llevado genialmente a escena– están contenidos los elementos de una situación nacional que está ya al borde del estallamiento o cuando menos de la ruptura.
El fracaso de la estrategia –siendo muy concesivos en calificarla así– de los operativos conjuntos es ya inocultable. Las mejores cuentas que se hacen de ellos hacen pesar más las toneladas de marihuana incautadas que las vidas humanas acabadas; consideran un éxito que se incrementen los secuestros porque los narcotraficantes ya no pueden operar su negocios de drogas; y razonan o lanzan sofismas argumentando que las ejecuciones aumentan porque se están matando entre ellos. La mitad de los sicarios investidos en verdugos de la otra mitad en un país en que no existe la pena de muerte. El gran argumento de que las cosas se están poniendo bien de lo mal que se están poniendo.
Junto a esto, las inacabables violaciones a los derechos humanos por parte del Ejército: allanamientos, detenciones arbitrarias, destrucción de viviendas, etcétera. Un régimen que al mismo tiempo que presume los logros de su estrategia les reclama desesperado a los gobiernos estatales su falta de cooperación. La aceptación de que es necesario depurar a fondo las policías de todos los niveles, sólo porque lo prescriben los financiadores de la Iniciativa Mérida y no porque la sociedad lo reclame desde hace ya muchos meses.
La indignación –sólo ahora– por el secuestro y el asesinato –a todas luces reprobables– del joven hijo de un rico empresario, cuando nada se dijo ante los secuestros y asesinatos de familias no encumbradas. Complicidad de supuestos guardianes de la ley y criminales: infiltraciones en las policías de todos los niveles. La corrupción que repta hermanada a la violencia por pueblos y ciudades: la realidad de estos días se porta generosa, brindando todos los componentes del cine negro, de un teatro negro que Rascón Banda hubiera escrito mejor que nadie.
Hace unos cuantos días un alto funcionario del consulado de Estados Unidos en Ciudad Juárez apuntaba: *"… nos asustamos porque el año pasado hubo un poco más de 300 asesinatos en Juárez; con los que ahora llevamos, nos damos cuenta que esos eran los good old days".* Sin quererlo estaba inventando una nueva forma de optimismo: como van las cosas, el horror de ahora serán los *good old days* de mañana.

INFORME DE FISCALIZACIÓN DE LA DIRECCIÓN GENERAL DE BELLAS ARTES Y BIENES CULTURALES (4)

En el capítulo IV, el Informe del Tribunal de Cuentas describe, con la minucia y ponderación que le caracteriza, cómo los responsables de Bellas Artes y Bienes Culturales se pasan por el arco del triunfo las normas contables, el control, y la gestión de los fondos públicos.

La conclusión mejor intencionada es que los responsables del Ministerio de Cultura, de la Dirección General de Bellas Artes y Bienes Culturales, y los gobiernos que los amparan, son una panda de ineptos, inconscientes, y temerarios, a los que ninguna empresa sensata les permitiría administrar ni los fondos destinados a los sellos de correos.

La conclusión del Tribunal de Cuentas es digna de inscribirse en la lápida que cubre la tumba donde yacen nuestra ingenuidad y su inocencia.

Gatopardo

Copio literalmente:

IV. ANÁLISIS DE LA GESTIÓN DE TESORERÍA

4.1.- La estructura y funcionamiento de las Cajas pagadoras utilizadas en el ejercicio 2004 por laDGBAyBC para la gestión de los anticipos de Caja fija y pagos librados "a justificar", se contempla en la Orden del Ministerio de Educación, Cultura y Deporte de 16 de marzo de 2004, anterior a la creación del Ministerio de Cultura por Real Decreto 553/2004, de 17 de abril. Hace referencia, por tanto, dicha norma a la estructura del anterior Departamento ministerial, no elaborándose una norma específica para el Ministerio de Cultura hasta el ejercicio siguiente. Por Resolución de la Ministra de Educación, Cultura y Deporte de 28 de enero de 2004 se determinaron los importes de los anticipos correspondientes a cada una de las Cajas pagadoras y se autorizaron los gastos máximos a realizar en 2004. Esta Resolución se modificó varias veces a lo largo del ejercicio. De las Cajas pagadoras que se relacionan en dicha Orden, las utilizadas en la gestión realizada por la DGBAyBC son: la Caja Pagadora de la Secretaría de Estado de Cultura, adscrita a la Oficialía Mayor, y las Cajas Pagadoras de los museos, adscritas a los respectivos Directores. La primera de dichas cajas pasó a denominarse Caja Pagadora Central en la Resolución de la Ministra de Cultura de 3 de febrero de 2005 por la que se regula el sistema de anticipos de Caja fija para 2005.

Caja Pagadora Central

4.2.-. La Caja Pagadora de la Secretaría de Estado de Cultura (Caja Pagadora Central, desde 2005), presta servicio a todas las unidades del Ministerio de Cultura, entre ellas la DGBAyBC. Tiene abiertas dos cuentas bancarias para la gestión de los pagos de anticipos de Caja fija y pagos "a justificar": una en el Banco de España, en la que se reciben los fondos procedentes del Tesoro Público, y otra en el Banco Urquijo, que se nutre de transferencias de fondos desde la cuenta del Banco de España. Además, existe una caja de efectivo y otra cuenta en el Banco de España para pagos en firme.

4.3.- La cuenta del Banco de España para anticipos de Caja fija y pagos "a justificar" dispone de la pertinente autorización, así como de los nombramientos de las personas autorizadas para disponer de los fondos (de forma mancomunada), salvo de una de las personas autorizadas durante parte del ejercicio 2004, cuya baja se comunicó al Banco de España en septiembre de dicho año. Por lo que se refiere a la cuenta en el Banco Urquijo, dispone también de la oportuna autorización, si bien no se ha aportado la relación de personas autorizadas para disponer de los fondos de dicha cuenta en el ejercicio 2004 (se requieren también dos firmas mancomunadas). En el ejercicio 2004, el Banco Urquijo abonó 1.639,79 euros en concepto de intereses producidos por la cuenta corriente, habiéndose comprobado el ingreso en el Tesoro de dicha cantidad, aunque no existe constancia de que se lleve a cabo por la DGBAyBC ningún tipo de

comprobación relativa a las liquidaciones de intereses practicadas.

4.4.- Para el control de las operaciones, la Caja pagadora lleva un libro-registro para cada banco y otro para la caja de efectivo, así como un registro general de libramientos y las fichas generales de anticipos de Caja fija y de pagos “a justificar”, además de los registros auxiliares. Los estados de situación de Tesorería fueron elaborados trimestralmente en los plazos establecidos y remitidos a la Unidad Central de Caja. Se adjuntan en todos los casos los certificados bancarios, arqueos, y, en su caso, las conciliaciones practicadas. Los arqueos de caja coinciden con el importe que figura como saldo en el libro de Caja. Sin embargo, este importe no es real, puesto que no corresponde únicamente a las existencias en efectivo, sino que incluye cantidades abonadas en concepto de anticipos y pendientes de liquidar. El libro y los estados no recogen, por tanto, el total de los pagos efectuados, ya que los realizados no se registran hasta que los perceptores presentan la liquidación y devuelven, en su caso, el sobrante. Los arqueos trimestrales cuadran con el libro de Caja, porque incluyen tanto las existencias en efectivo como los anticipos pendientes de liquidar, de los que se acompaña una relación. Efectuado un arqueo por el Tribunal, el importe en billetes y monedas existente en la caja fuerte ascendía a 10.359,13 euros, mientras que el saldo que figuraba en el libro de caja era de 50.141,37 euros, correspondiendo el resto a anticipos pendientes de liquidar (por lo general, para dietas). Otros 5.198,26 euros existentes en la caja fuerte correspondían a devoluciones de sobrantes de anticipos para viajes de los que no se había presentado aún la liquidación.

4.5.- Según se desprende de los estados de situación de Tesorería correspondientes a 2004, las existencias en efectivo en la Caja pagadora de la Secretaría de Estado de Cultura superaron habitualmente el límite máximo de 1.200,00 euros establecido por la Orden de 16 de marzo de 2004, llegando a alcanzar en el 4º trimestre 35.810,54 euros. Para el ejercicio 2005 el límite máximo se elevó hasta 10.000,00 euros.

4.6.- Para la gestión de los anticipos de Caja fija por la Caja Pagadora Central, se reciben del Tesoro los fondos pertinentes en la cuenta del Banco de España, transfiriéndose los mismos seguidamente a la cuenta del Banco Urquijo. Desde esta cuenta se realizan algunos pagos y se traspasan fondos a la caja de efectivo para otros pagos por este sistema. El pago en efectivo es el procedimiento habitual para las indemnizaciones por razón del servicio y otros de menor cuantía. El importe máximo de los gastos autorizados para su tramitación por el sistema de anticipos de Caja fija, en los programas gestionados por la DGBAyBC, durante el ejercicio 2004, figura en el cuadro siguiente. Los pagos realizados no superaron dichos límites. Respecto de las cuentas justificativas, se examinan en el punto 4.12, junto con las de las Cajas Pagadoras de los museos.

(euros)

* excepto créditos vinculantes

4.7.- Por el procedimiento de pagos "a justificar", la Caja Pagadora Central tramitó en 2004 únicamente dos expedientes, por importe conjunto de 135.811,82 euros. Se ha examinado la cuenta correspondiente a uno de dichos expedientes, por importe de 90.151,82 euros. No se han observado irregularidades en la tramitación del expediente, cuyo objeto es la adquisición directa de una cuota indivisa del 26,85% de una finca de 18 Has., que comprende el ala Este del Monasterio de San Pedro de Arlanza, en Hortigüela (Burgos), ni en la formación de la cuenta justificativa, si bien en su aprobación se superó el plazo máximo establecido en el artículo 79 del TRLGP.

Cajas pagadoras de los museos Arqueológico Nacional, del Traje y Nacional de Altamira

4.8.- En el ejercicio 2004, existían Cajas pagadoras en los siguientes museos estatales, adscritas a los respectivos Directores: Nacional de Altamira, Arqueológico Nacional, del Traje, Nacional de Arqueología Marítima, Nacional de Arte Romano, Nacional de Escultura (que atiende también al Museo Casa de Cervantes) y Sefardí (que atiende también al Museo del Greco). El límite máximo de efectivo que se autoriza en dichas Cajas para el pago de necesidades imprevistas y gastos de menor cuantía estaba fijado para 2004 en 180,00 euros. Ninguna de dichas cajas disponía de normas internas o manuales de procedimientos de gestión. El siguiente cuadro recoge el importe de gastos máximos autorizados para ser tramitados mediante anticipos de Caja fija en cada uno de los museos. Con objeto de comprobar el funcionamiento de las tesorerías de los museos, se fiscalizaron in situ las de los museos Arqueológico Nacional, del Traje y Nacional de Altamira, con los resultados más significativos que seguidamente se expresan.

4.9.-.Museo Arqueológico Nacional:

a) Dispone de tres cuentas bancarias: una en el Banco de España para anticipos de Caja fija, otra en el BBVA de recaudación por venta de publicaciones y otra en el BSCH de recaudación por venta de entradas. La cuenta del BBVA (abierta en 1981) no se encontraba autorizada, cancelándose en 2006 e ingresando en el Tesoro su saldo. Ha generado gastos bancarios aunque de poca cuantía.

La cuenta del BSCH, autorizada como restringida de recaudación, no funciona conforme al régimen establecido para dichas cuentas, ya que en lugar de traspasar quincenalmente los saldos al Tesoro, se emiten cheques que los responsables del museo se encargan de ingresar en la cuenta del Tesoro. En 2004, los ingresos ascendieron a

149.806,61 euros por venta de entradas, 11.350,97 euros por venta de fotografías y 2.447,58 euros por venta de fotocopias. En el caso de las ventas de fotografías, se aprecian dos deficiencias: las facturas emitidas no incluyen el IVA y los gastos bancarios por transferencias desde el extranjero no se repercuten a los compradores.

b) Por lo que se refiere a las cajas de efectivo, existen tres: una general para pagos y dos para ingresos de taquillas (turnos de mañana y tarde), éstas no autorizadas. Los libros se llevan de forma manual en la primera y no constan en las otras dos. De las comprobaciones practicadas sobre las tres cajas cabe destacar:

b.1) En la Caja para pagos, a lo largo de 2004 se superó frecuentemente el saldo máximo de efectivo autorizado para la misma. En el arqueo de esta Caja efectuado por el Tribunal se observó, además del saldo coincidente con los libros, un sobre con 165,00 euros recaudados por la venta de fotocopias, recaudación que no es objeto de registro alguno.

b.2) En las cajas para ingresos de taquilla, cabe destacar principalmente las insuficientes medidas de seguridad implantadas. El efectivo se custodia en dos cajas fuertes (una por cada turno) situadas en la pared anexa a la taquilla, que consiste en un simple mostrador al que tienen acceso directo los visitantes del museo. La recaudación del turno de mañana se ingresa en el BSCH dos veces al mes por el propio personal de taquilla, mientras que la del turno de tarde se ingresa una vez al mes.

4.10.- Museo del Traje:

a) Dispone de una cuenta en el Banco de España para anticipos de Caja fija, una cuenta restringida de ingresos en Caja Madrid y dos cajas de efectivo. El funcionamiento de la cuenta restringida no se ajusta a las condiciones establecidas para este tipo de cuentas, ya que en lugar de transferir directamente los ingresos a la cuenta del Tesoro en el Banco de España, se emiten cheques bancarios (si bien con la misma periodicidad quincenal establecida) que el personal del museo ingresa en la cuenta del Tesoro. Por otra parte, se recogen en dicha cuenta no sólo los ingresos previstos y autorizados (ingresos generados por venta de entradas y otros conceptos) sino también ingresos en concepto de IRPF retenido a los colaboradores del museo.

b) No se ha facilitado el nombramiento de la Cajera pagadora, aportando en su lugar la toma de posesión de dicha funcionaria en marzo de 1996 para el puesto *"Cajero pagador archivos y museos"* del antiguo Museo del Pueblo Español.

c) En la Caja para pagos se llevan manualmente los libros registro de anticipos de Caja fija y los libros de caja de efectivo y de bancos. El libro de caja de efectivo no sirve a su cometido, puesto que no registra las entradas y salidas de efectivo en la fecha en que se producen sino en la fecha de los justificantes de los gastos correspondientes. Esta es la causa por la que aparecen en ocasiones saldos de caja negativos. Se ha observado que en 2004 se superó frecuentemente el saldo máximo de efectivo autorizado para la caja (180,00 euros); de hecho las reposiciones de fondos más habituales son de 600,00 y 900,00 euros. También en el libro del Banco de España se producen faltas de concordancias en las fechas al no anotarse las operaciones con la fecha real de las entradas y salidas de fondos. Por otra parte, el libro de Caja Madrid no registra todas las operaciones realizadas; se ha observado que se omiten sistemáticamente los ingresos de las retenciones por IRPF y las correspondientes salidas.

d) En el arqueo realizado por el Tribunal el día 1 de febrero de 2007 no se pudo conciliar el efectivo existente en Caja con el saldo según el libro, por las deficiencias antes señaladas en cuanto a las fechas de registro de las operaciones y porque el libro no estaba actualizado (el último apunte realizado tenía fecha de 17 de enero). Las existencias en Caja eran de 722,76 euros para el pago de anticipos, además de un sobre con 337,00 euros correspondiente a la recaudación por la venta de miniguías del museo, desde el 1 de mayo de 2006 al 28 de enero de 2007, y otros dos sobres con 151,60 euros y 41,06 euros, correspondientes a venta de fotocopias y fotografías. En la fecha del arqueo no había en Caja dinero procedente de la venta de entradas.

e) Existe otra caja de efectivo, en la oficina de seguridad. En dicha caja se guardan diariamente dos sobres correspondientes a la recaudación por venta de entradas y miniguías en los turnos de taquilla de mañana y de tarde. En el momento del arqueo señalado, figuraban en dicha caja los sobres correspondientes a los días 30 y 31 de enero y 1 de febrero de 2007, cerrados y firmados por los taquilleros de los respectivos turnos. Se abrió uno de ellos, coincidiendo su saldo (61,50 euros) con el importe de la recaudación que figuraba en el parte de facturación del turno y día correspondiente. Esta caja no cuenta con la autorización correspondiente y tampoco se llevan los registros contables de caja establecidos en la Resolución de la IGAE de 23 de diciembre de 1987. Existe únicamente un libro, denominado de Actas, en el que los taquilleros y la Cajera pagadora firman, respectivamente, las entregas y los recibís de las cantidades correspondientes a un determinado período. En el ejercicio 2004 las entregas eran semanales y a partir del segundo semestre de 2005 pasaron a ser quincenales. Durante los ejercicios 2004 y 2005 únicamente se anotaban en el libro las entradas de fondos, pero no las salidas.

f) Durante los ejercicios 2004 y 2005, no figuran en los estados trimestrales de situación de Tesorería la cuenta restringida de Caja Madrid ni las cantidades en efectivo de la caja no autorizada. La cuenta restringida aparece por primera vez en el estado correspondiente al primer trimestre de 2006.

4.11.- Museo Nacional de Altamira:

a) Dispone de dos cuentas bancarias: una en el Banco de España para pagos y otra en el BSCH restringida de recaudación por venta de entradas, de la que no consta contrato ni autorización de la Dirección General del Tesoro y Política Financiera, aunque sí informe favorable de este Centro Directivo para su adjudicación. Por otra parte, en la información facilitada por la DGBAyBC al Tribunal figura otra cuenta en el BSCH a nombre de este museo, de la que no tienen conocimiento los responsables de dicho museo.

b) En cuanto a la caja de efectivo para pagos, se supera continuamente el saldo máximo autorizado para la misma (180,00 euros), habiéndose llegado a superar repetidamente los 1.000,00 euros en caja.

c) El museo cuenta con otras tres cajas de efectivo para la recaudación, dos para la taquilla (una para el turno de manaña y otra para el turno de tarde) y otra general, que recibe periódicamente el efectivo de las taquillas para su ingreso en el BSCH. Ninguna de estas cajas cuenta con la preceptiva autorización. Efectuado un arqueo de caja por el Tribunal, se observó una diferencia de 125,58 euros sobre el saldo de 2.096,78 euros que figuraban en los libros, diferencia que corresponde al incorrecto registro de una deuda de 148,80 euros por venta aplazada de entradas (ver el punto 5.11 c), compensada en parte por sobrantes de los recuentos de las cajas de taquilla (al parecer,

entradas gratuitas cobradas).

d) En cuanto a las obligaciones formales y libros-registro, no se apreció por el Tribunal ninguna deficiencia significativa, salvo algunos errores formales en los estados de situación de Tesorería (fechas, columnas, etc.).

Cuentas justificativas de los anticipos de Caja fija

4.12.- Se han examinado 13 cuentas justificativas de anticipos de Caja fija correspondientes a todas las Cajas pagadoras de la DGBAyBC, con excepción de la correspondiente al Museo del Traje, ninguna de cuyas cuentas de 2004 había sido aprobada ni fiscalizada a la fecha de realización de los trabajos de campo. De la Caja Central, las cuentas examinadas están fechadas en febrero y en mayo de 2004, por importe total de 536.784,19 euros. Las cuentas de los museos examinadas están fechadas en noviembre y diciembre de 2004, por un importe conjunto de 257.282,35 euros. Los resultados obtenidos han sido:

a) Las cuentas correspondientes a la Caja Pagadora Central y al Museo Arqueológico Nacional de Madrid no han sido intervenidas hasta finales del ejercicio 2006, dando lugar a retrasos en su aprobación superiores a los dos años, en algunos casos.

b) En todos los casos examinados la reposición de los fondos es anterior a la aprobación de las cuentas, lo que contraviene lo establecido en el artículo 7 del Real Decreto 725/1989, de 16 de junio, sobre anticipos de Caja fija, y en la Orden del Ministerio de Economía y Hacienda de 26 de julio de 1989 por la que se dictan normas de desarrollo. En ambas normas generales se establece que, una vez rendidas y aprobadas las cuentas justificativas, se tramitará la oportuna reposición de fondos. Por el contrario, en la Orden del MECD de 16 de marzo de 2004 se establece un procedimiento de reposición de fondos distinto, independiente de la aprobación de las cuentas justificativas, dando lugar, según se ha observado en la muestra examinada por el Tribunal, a un importante desfase (superior a dos años en algunos casos) en la aprobación de la correspondiente cuenta justificativa respecto de la aprobación del documento contable de reposición de fondos, perjudicando gravemente el sistema de control de estos fondos públicos establecido en el Real Decreto citado, amén de incurrir la mencionada Orden del MECD (en lo que se refiere a este procedimiento de reposición de fondos) en el supuesto de invalidez contemplado en el artículo 51.2 de la Ley de Régimen Jurídico de las Administraciones Públicas y del Procedimiento Administrativo Común (LRJAPyPAC)*****.

***** Según se ha observado por el Tribunal en otras fiscalizaciones, este procedimiento es el seguido mayoritariamente por los Centros gestores, y ha sido propiciado por la Circular 3/1996 de la Intervención de la Administración General del Estado que, a juicio del Tribunal, interpreta de modo inadecuado y excediendo su ámbito y competencias, el artículo 25 del Real Decreto 2188/1995, por el que se desarrolla el régimen de control interno ejercido por dicho Centro Directivo. En este sentido, la Circular 3/1996 de la IGAE carece del necesario rango jerárquico normativo para modificar el procedimiento establecido en el Real Decreto 725/1989 y en la Orden del MEH de 1989, por lo que, en lo que se refiere a este ámbito, incurre igualmente en el supuesto de invalidez contemplado en el artículo 51.2 de la LRJAPyPAC. Es de notar que, pese a que el Real Decreto 2188/1995 pretende sin duda reforzar el control sobre las cuentas justificativas, la situación real observada con posterioridad es justamente la contraria. Anteriormente, la reposición de fondos se efectuaba tras la revisión y aprobación de la cuenta justificativa por un órgano superior jerárquico del Cajero pagador, aunque el posterior informe de intervención sufriera una importante demora. La intención del Real Decreto 2188/1995 parece clara: adelantar el informe de intervención al momento anterior a la aprobación de la cuenta, de forma que este acto cuente con mayores garantías,

superando además las demoras en el control. El procedimiento de reposición de fondos, por su parte, no sufre ningún cambio, como es lógico teniendo en cuenta la competencia específica de la citada norma (únicamente el control y no el procedimiento en general). La Circular 3/1996, sin embargo, propiciando una interpretación claramente errónea y forzada del Real Decreto, excediendo su ámbito competencial, lo que hace es separar sin fundamento alguno la reposición de fondos del acto de aprobación de la cuenta justificativa, trasladando este acto de aprobación al momento futuro en el que se produzca el informe de intervención, sea dicho momento futuro todo lo dilatado en el tiempo que sea. Se producen después de dicha Circular, por lo tanto, las mismas demoras que anteriormente en la intervención de las cuentas justificativas (superiores a dos años se han observado en esta fiscalización), con la diferencia de que con el sistema anterior las cuentas habrían sido revisadas y aprobadas por un superior jerárquico de los cajeros pagadores antes de la reposición de fondos, mientras que ahora se libran sucesivas reposiciones de fondos a lo largo de mucho tiempo sin que se haya producido revisión ni aprobación alguna de las cuentas justificativas, con el evidente riesgo para la integridad de los fondos confiados a los Cajeros pagadores derivado de esta falta absoluta de control.

c) No hay constancia de la aprobación de la cuenta del mes de noviembre del Museo de Arqueología Marítima de Cartagena, ya que no figura el impreso con las firmas correspondientes.

d) En la cuenta rendida el mes de mayo por la Caja Pagadora Central no consta el informe adjunto de la Intervención que se menciona en la carátula, en la que tampoco se indica si es favorable o desfavorable.

e) No constan los documentos contables para la reposición de los fondos (certificado de retención de crédito y ADOK) en ninguna de las cuentas examinadas, con la excepción de las rendidas por la Caja pagadora de los museos de El Greco y Sefardí de Toledo, en las que figuran los ADOK aunque sin la firma del interventor.

f) En las cuentas de la Caja Pagadora Central figuran varios justificantes correspondientes a gastos realizados o facturados en el ejercicio 2003, por importe conjunto de 16.032,28 euros.

g) En todas las cuentas, excepto en las rendidas por la Caja pagadora del Museo Arqueológico Nacional, se omiten habitualmente las memorias o propuestas justificativas de los gastos.

h) En las cuentas de la Caja Pagadora Central se omiten en varios casos las copias de los talones mediante los que se han realizado los pagos correspondientes.

i) En las cuentas de la Caja Pagadora Central y del Museo Nacional de Escultura de Valladolid se aprecian algunas omisiones de facturas o bien defectos en las aportadas (carecer de número, no especificar el objeto, etc.). En la primera de dichas cajas, las cuentas contienen además varias liquidaciones de honorarios no firmadas.

j) En el Museo Nacional de Altamira se examinó también el resto de las cuentas rendidas en el ejercicio, observándose que en varios casos se había fraccionado el gasto, abonándose a un mismo acreedor facturas mensuales que, en conjunto, superan el límite establecido en el artículo 2 del Real Decreto 725/1989, de 16 de junio.

SEMANA CULTURAL

"Desde el área de cultura de nuestra comunidad vamos a ejecutar un equilibrio metodológico entre educación y cultura. De esta forma vamos a trabajar en el desarrollo de la educación cultural y una cultura educativa: consideramos la participación como un principio y una finalidad, un objetivo y un instrumento que impregna todas las actividades. Esto debería conducir a la democratización de la cultura o lo que es lo mismo la garantía del libre acceso y participación de la población al conocimiento, uso, disfrute y creación de los bienes, hechos y servicios culturales."

Lo anterior lo escribió algún cerebro preclaro e ignoto y lo publicó el Área de Cultura de la Junta de Comunidades de Castilla- La Mancha, y, por la parte que me toca, deseo colaborar proponiendo el programa para una Semana Cultural, que a petición de la Camara de Comercio será en horario extralaboral.
Agradecería sugerencias de temas tendentes a culturizar al pueblo y completar el programa.

LUNES
5,00 **Maitines:** Recreación de cultos atávico-religiosos (ritual vudú)
5,15 **Conferencia:** La orquitis psicosomática de etiología laboral, familiar y social.
7,15 **Especial para la Tercera Edad:** Cursillo práctico de deportes de alta montaña
14,30 **Documental de vídeo:** La problemática de los moluscos en celo en las Islas Kandongas.
20,45 **Técnicas de integración social:** Temas conversacionales no problemáticos en las cenas con matrimonios.
20,46 **Especial para profesionales del teatro:** Desarrollo de la expresividad del pabellón auricular mediante apoyatura digital.
23,15 **Técnicas de supervivencia urbana:** Sistemas de respiración, relajación, metalenguaje y disimulo para vivir en familia.

MARTES
5,00 **Maitines:** Recreación de cultos atávico-religiosos (ritual urdu)
5,15 **Cursillo práctico de carpintería:** Como cuadrar una mesa redonda. Con mesa redonda.
7,00 **Especial profesiones liberales:** Cursillo intensivo de filtiré y bodoque.
13,55 **Método de los 21 botones:** dosificación de adornos y complementos para resultar elegantes y sobrias. Con vino español.
20,45: **Técnicas de integración social:** Cómo hacer amigos e influir en los demás sin pasear al perro y sin tener perro.
22,30 **Documental de vídeo:** Viaje al mundo desconocido de las fenefas.
23,55 **Meditación:** ¿Qué? ¿Cómo? ¿Quién? ¿De verdad? (Sobre el artículo de la Constitución que dice: "Todos los españoles tienen derecho a un trabajo digno." Increíble pero cierto)

MIÉRCOLES
5,00 **Maitines:** Recreación de cultos atávico-religiosos. (ritual arapahoe)
5,15 **Conferencia:** Etiqueta y protocolo para tratar con la aristocracia.
7,15 **Especial para amas de casa:** Cursillo práctico de vuelo sin motor.
13,45 **Técnicas de supervivencia urbana:** Cómo dirigirse al amable funcionario resignadamente.
20,45 **Documental de vídeo:** La cría y el desarrollo de los bellotinos silvestres en la India.
21,30 **Cursillo práctico de psicomotricidad:** Cómo incorporar el gesto del bostezo al despertar a la acción de apagar el despertador.
22,00 **Terapias ocupacionales alternativas:** Uso de las pinzas de depilar y del extractor de espinillas.

JUEVES
5,00 **Maitines:** Recreación de cultos atávico-religiosos (ritual católico del Palmar de Troya)
5,15 **Documental de vídeo:** Un insecto apasionante: la moscarda de los basureros
6,30 **Técnicas de supervivencia urbana:** Cómo no significarse, pasar desapercibido, ser uno más, no dar la nota, no sobresalir, que no te oiga nadie, no definirse, no tomar partido, parecer innocuo, hacer amigos e influir en los demás.
13,45 **Especial para la Tercera Edad:** Cursillo práctico de "puenting"
15,00 **Especial par pianistas y mecanógrafos:** La alimentación macrobiótica para el tratamiento de las disfunciones del dedo meñique.
20,45 **Especial para profesiones liberales:** Técnicas de seducción mediante la mirada y el silencio.
22,00 **Técnicas de integración social:** Estudio de diferentes partos y diversos cuarteles para hablar sin que se note que no tienes hijos ni has hecho la mili, para hacer amigos e influir en los demás.

VIERNES
5,00 **Maitines:** Recreación de cultos atávico-religiosos (ritual aborígenes australianos)
5,15 **Técnicas de supervivencia urbana:** Cómo pagar el seguro obligatorio de enfermedad, el seguro obligatorio del coche, cotizar obligatoriamente a Hacienda, estar obligados a amortizar la jubilación, y tener la sensación de que es por nuestro bien.
6,15 **Documental de vídeo:** El picaporte y la cerradura a través de la Historia.
7,15 **Conferencia:** El uso del "Como usted ya sabe" y del "Luego me llamas y quedamos" en la conversación y en la oratoria, para hacer amigos e influir en los demás.
14 **Especial amas de casa:** Iniciación al canto llano o canto gregoriano.
20,45 **Técnicas de integración social:** Vademecum de enfermedades, síntomas y complicaciones medicamentosas para facilitar la compasión del interlocutor, para hacer amigos e influir en los demás.

SABADO
5,00 **Maitines.** Recreación de cultos atávico-religiosos (ritual hebreo)
5,15 **Conferencia:** La inmanencia y la trascendencia de la piedra al caer, de hacer amigos e influir en los demás.
7,30 **Curso práctico:** Ejecución de nudos en pañuelo, foulard, bufanda y pareo.
14,00 **Técnicas de supervivencia urbana:** Inducción a la catarsis y al nirvana para no agredir a las autoridades competentes en el ejercicio de sus funciones.
20,45 **Técnicas de integración social:** Cómo declararse apolítico fervoroso, y no obstante, estar de acuerdo con cualquiera que pontifique con vehemencia.
23, 55 **Meditación:** ¿Existe otra vida? ¿Cómo se vivirá con un sueldo de ministro?

DOMINGO
5,00 **Maitines:** Recreación de cultos atávico-religiosos (ritual católico-apostólico-romano)
5,15 **Seminario**. Gastronomía y colesterol en la Atlantida.
8,00 **Conferencia:** El modo subjuntivo en la perífrasis y en el pleonasmo.

10,00 **Acto solemne de Clausura de la Semana Cultural** Con asistencia de las autoridades civiles, militares y eclesiásticas de la Comunidad Autónoma, y especialmente la del ex-presidente **don José María Aznar**, que disertará sobre filología inglesa y prosodia británica, y cerrará el acto el Ministro **don José Bono**, con unas sentidas palabras recordando sus orígenes en El Salobre; su fe en Dios, profunda y

sencilla, su amor por la milicia, y qué significa el primer párrafo que hemos reproducido aquí.
Y a quien Dios se lo dé, San Pedro se lo bendiga.

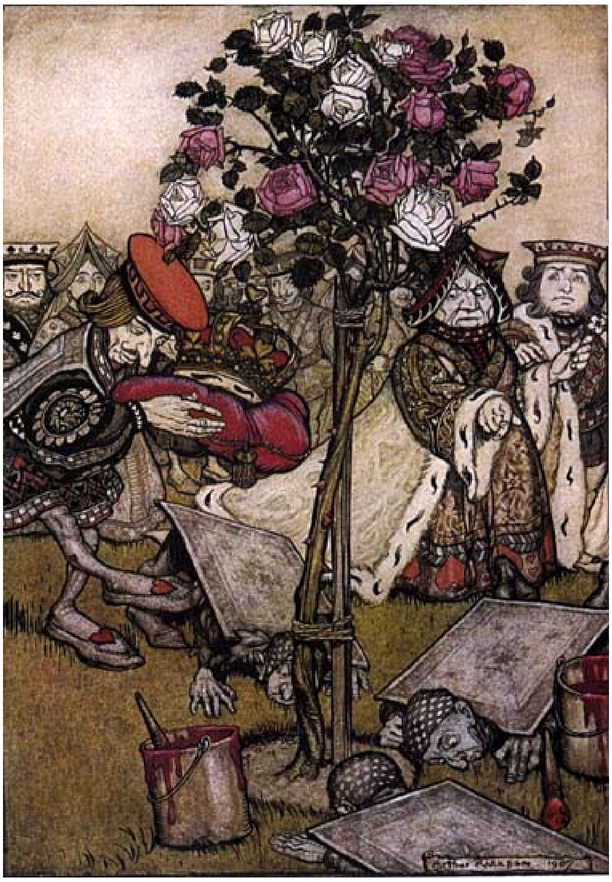
INFORME DE FISCALIZACIÓN DE LA DIRECCIÓN GENERAL DE BELLAS ARTES Y BIENES CULTURALES (3)



Desde su creación, el ministerio de Cultura es una catástrofe administrativa, fiscal y contable sin tasa ni control. Un nido de alianzas con fundaciones y empresas que se dedican a la extracción del dinero proveniente de los Presupuestos Generales del Estado, y que, a su vez, revierten honores y cargos en los burócratas, disfrazados de intelectuales, del Ministerio. Y se les puede ocurrir de todo, reivindicar la propiedad intectual de las digitalizaciones de la Biblioteca Nacional de España, y cobrar así derechos de reproducción de las obras libres de derechos; ofrecer el contrato de la digitalización de millones de obras literarias y bibliográficas a empresas y fundaciones de su cuerda, creadas a rebufo del saqueo de los fondos públicos, mediante concursos opacos y amañados, al margen de la ley, para abocar a lo nunca visto: la privatización

de los recursos culturales de dominio público; disponer de un sistema instituido, como denuncia el Tribunal de Cuentas, de compras, contrataciones y subvenciones sin atenerse a norma contable, administrativa ni pudenda, y con barra libre en las arcas para fastos, aniversarios y promociones para colocar amiguetes y engordar el curriculum y la andorga.

En el Ministerio de Cultura, la inepcia se ha unido a la corrupción con el beneplácito de una ciudadanía acéfala, y se ha conseguido el sueño de todo estafador: la inversión corre por cuenta del Estado, que asume el gasto para la privatización de los fondos públicos, mientras el Gobierno, con el voto de los partidos aliados, legaliza mediante el B.O.E. que los beneficios se privaticen en provecho de una casta de depredadores que forman parte del staff del Ministerio de Cultura, sus diferentes direcciones generales, y las empresas y fundaciones compinchadas con ellos.

Pero, para ser justos, hay que reconocer que desde un punto de vista intelectual, ninguno, absolutamente ninguno, sea cual sea el partido político que lo ampare, desde el primero hasta el último elegido por designación directa, pasando por todos los directores generales, los ministros, los subvencionados, los contratados, los aupados, y los premiados, ninguno vale ni para tacos de escopeta, pero son el paradigma de la mugre ética, moral, y cultural de este país llamado España, y nos representan con total idoneidad.

Gatopardo

Copio literalmente el tercer capítulo del Informe del Tribunal de Cuentas:

III.- ANÁLISIS DE LAS SUBVENCIONES

3.1.- El importe de las obligaciones reconocidas en el ejercicio 2004 por la DGBAyBC en concepto de subvenciones ascendió a 16.596.308,74 euros, de los cuales 6.327.106,42 euros fueron aplicados al capítulo 4 “Transferencias corrientes” y 10.269.202,32 euros al capítulo 7 “Transferencias de capital”. Del total reseñado, la mayor parte (15.593.868,32 euros) fue destinado al abono de subvenciones nominativas, otros 754.190,00 euros a subvenciones en régimen de concurrencia y el resto a premios (238.699,42 euros) y cuotas a organismos internacionales (9.551,00 euros). El detalle de las subvenciones concedidas figura en el anexo 5.

A) Subvenciones nominativas

3.2. Como se ha indicado, las obligaciones reconocidas en el ejercicio 2004 por la DGBAyBC relativas a subvenciones reflejadas nominativamente en los programas presupuestarios que gestiona, ascendieron a 15.593.868,32 euros, de los cuales 5.565.066,00 corresponden al capítulo 4 “Transferencias corrientes” y 10.028.802,32 al capítulo 7 “Transferencias de capital”. La regulación específica de dichas subvenciones se contemplaba en la Orden del Ministerio de Educación y Cultura de 18 de junio de 1999, vigente hasta la Orden del Ministerio de Cultura de 17 de febrero de 2005.

Para la fiscalización de este subconjunto se seleccionó una muestra de diez subvenciones (cuatro corrientes y seis de capital), cuyas obligaciones reconocidas ascienden a 13.605.461,81 euros, lo que representa el 87% del importe total de las subvenciones nominativas del ejercicio. Seguidamente se exponen los resultados obtenidos.

Subvenciones nominativas corrientes

3.3.- La muestra examinada correspondiente a las subvenciones nominativas financiadas con cargo al capítulo presupuestario 4 "Transferencias corrientes" se detalla en el siguiente cuadro:

(euros)

Aplicación presupuestaria	Denominación	Obligaciones reconocidas
453 A 430	A la Fundación Colección Thyssen-Bornemisza en concepto de déficit dotable	4.128.460,00
453 A 485.01	A la Fundación privada Antonio Tàpies, para el desarrollo de sus actividades	168.280,00
453 A 485.02	Al Consorcio de Altamira para gastos de funcionamiento y financiación del déficit de gestión acumulado derivado de la ejecución del proyecto de rehabilitación del Museo Nacional y Centro de Investigación de Altamira y construcción de la réplica de la cueva	901.520,00
458 C 461	Para el pago del censo reservativo al Ayuntamiento de Santillana del Mar sobre las cuevas de Altamira	204.626,00

3.4.- Subvención a la Fundación Colección Thyssen-Bornemisza. (4.128.460,00 euros)

a) La Fundación Colección Thyssen-Bornemisza se constituyó el 20 de diciembre de 1988, siendo sus fundadores el Ministerio de Cultura y D. Heinrich Hans August Thyssen-Bornemisza, con la naturaleza de fundación cultural privada de servicio y promoción, sin ánimo de lucro, e inscrita en el Registro de Fundaciones Culturales Privadas del Ministerio de Cultura el 4 de marzo de 1989. La finalidad de la Fundación, según la escritura de constitución era la de recibir la colección de pintura Thyssen-Bornemisza en préstamo (según un contrato de la misma fecha), proceder a su exhibición museística y asegurar su adecuado mantenimiento y conservación, así como su sostenimiento económico, si bien posteriormente se añadió a dicha finalidad la de adquirir de la Sociedad Favorita Trustees Limited, a título de compra, la propiedad de la colección de pinturas objeto del contrato de préstamo. El Ministerio de Cultura, además de la cesión gratuita del Palacio de Villahermosa, asume íntegramente la financiación de la Fundación junto con los recursos propios de la misma, por lo que ha hecho importantes aportaciones de fondos a la Fundación para el pago total del precio de adquisición de la colección, dotación fundacional y financiación de los déficits de sus actividades.

b) La presente subvención trae su causa del contrato firmado el 21 de junio de 1993 entre el Reino de España y la Fundación Colección Thyssen-Bornemisza, por un lado, y la Sociedad *Favorita Trustees Limited*, por otro, mediante el cual la Fundación adquiere de la citada Sociedad la propiedad de la Colección Permanente exhibida hasta ese momento en préstamo temporal. Dicho contrato (autorizado por Real Decreto-Ley 11/1993 de 18 de junio), incluye la asunción de diversas obligaciones por parte del Estado, aparte de la financiación del precio de compra, entre las que se contempla la cobertura del denominado "déficit dotable", calculado conforme se especifica en el Anexo 4 del citado contrato, y al que corresponde la presente subvención.

c) Solicitada por el Tribunal la documentación justificativa de esta subvención correspondiente a 2004, la aportada por la DGBAyBC resulta insuficiente. Algunos documentos esenciales (de los que la DGBAyBC no disponía y hubo que solicitar a la Fundación) como el contrato de 21 de junio de 1993 y sus anexos, son fotocopias sin diligenciar, con firmas y sellos ilegibles o incluso muchos de ellos sin fechar ni firmar.

Además, la validez de los mismos se condiciona a su elevación a escritura pública, que no se ha aportado. Con las anteriores limitaciones, de dicha documentación cabe destacar algunas circunstancias significativas que seguidamente se exponen.

d) La Ley de Presupuestos prevé esta subvención nominativa *"en concepto de déficit dotable"*, cuyo importe se corresponde con el déficit dotable previsto por la Fundación para el ejercicio 2004 en su *"Presupuesto de Desembolsos de Tesorería al 31 de diciembre de 2004 y de la Estimación del Fondo de Tesorería aplicable a dicha fecha"*, según el procedimiento establecido en el anexo 4 del contrato de 21 de junio de 1993, y acompañado del preceptivo informe elaborado por una empresa privada de auditoría. Conforme a este procedimiento, el déficit dotable a fin de ejercicio (y, por tanto, la subvención estatal) se calcula sobre previsiones estimadas en el primer semestre del ejercicio anterior, lo que favorece la existencia de importantísimas discrepancias sobre los resultados de la gestión real, respecto de las cuales no se ha establecido ningún procedimiento de subsanación posterior, circunstancia que constituye una debilidad de control teniendo en cuenta la trascendencia presupuestaria de dicha magnitud. Se trata, por lo tanto, de un mero ejercicio de pronóstico escasamente riguroso, como se deduce de las cautelas del propio informe de la empresa de auditoría, que se limita a reproducir las cifras de la estimación sin expresar opinión de auditoría, con la fórmula *"dado el carácter limitado del trabajo efectuado y que nuestra responsabilidad no puede incluir la predicción de sucesos futuros"*, lo que además permite dudar de la utilidad de dicho informe.

Tampoco consta la existencia de directrices que limiten la autonomía de la Fundación para determinar sus previsiones de gastos e ingresos (y, por ende, el déficit dotable), si bien debe hacerse constar que dos tercios de los miembros del Patronato de la Fundación que aprueba dichas previsiones son nombrados por el Gobierno, lo que disminuye considerablemente los riesgos asociados a este especial sistema.

e) Como justificación de la aplicación material de la subvención únicamente se aportan las cuentas anuales de la Fundación correspondientes a 2004, auditadas por la IGAE, cuyo informe no alcanza al cálculo del déficit dotable ni a la aplicación material de la citada subvención. Tampoco existe constancia de ninguna actuación o procedimiento de revisión de la documentación por unidades de la DGBAyBC.

f) Revisados por el Tribunal los cálculos de estimación del déficit dotable, y puestas en relación las cifras con los datos reales de ejecución del presupuesto de la Fundación, se aprecia que el déficit dotable real registrado al cierre de 2004 fue de 1,1 millones de euros, lo que supone únicamente el 27% del déficit de 4,1 millones previsto (y cuantía de la subvención abonada). Tal discrepancia se debe principalmente, según los datos de ejecución del presupuesto de la Fundación, a la asunción de menores gastos (2,0 millones de euros menos que los 19,5 millones presupuestados) y de menores inversiones (1,1 millones menos que los 4,1 millones presupuestados). La mayor parte de la subvención pagada, por tanto, que tenía por finalidad la compensación de un déficit, constituyó en realidad una transferencia de fondos por 3,0 millones de euros que no era necesaria a dicho fin, quedando sin utilizar a fin de ejercicio en la Tesorería de la Fundación.. En el ejercicio de 2003, la subvención concedida para la financiación del déficit dotable ascendió a 4,6 millones de euros, si bien al cierre del ejercicio en lugar del déficit previsto se registró un superávit de 9,0 millones de euros, por lo que la totalidad de la subvención concedida constituyó igualmente una transferencia innecesaria de fondos del mismo carácter antes señalado, a la vista de las cifras de ejecución finalmente alcanzadas. Todo ello bajo el supuesto de la confianza en la rigurosidad de las cuentas de la Fundación a tenor del informe de auditoría de la IGAE,

puesto que el Tribunal no ha realizado comprobaciones sobre las mismas al no estar incluida tal actuación en el ámbito de esta fiscalización.

3.5.- Subvención a la Fundación Antonio Tàpies. (168.280,00 euros)

a) La finalidad de esta subvención según la Ley de Presupuestos es el desarrollo de las actividades de la Fundación. La Resolución de concesión no concreta más la finalidad, indicando que se concede para la finalidad *"expuesta en la solicitud"*. En ésta consta únicamente que se solicita la subvención para *"el desarrollo de los fines estatutarios"*, si bien se acompaña una Memoria en la que se indican diversas actividades a realizar.

b) En el examen del expediente se han observado numerosas deficiencias respecto de la documentación que debe ser presentada con la solicitud, de acuerdo con la Orden de 18 de junio 1999. Así, en el documento de solicitud no se indica el nombre de la entidad para la que se solicita la subvención; no se ha podido comprobar el cumplimiento del plazo para la solicitud de la subvención, porque no consta el registro de entrada; no se acredita la representación de quien solicita la subvención en nombre de la fundación; no consta que se haya presentado con la solicitud la Memoria de las actividades realizadas en los dos últimos años, exigida en el punto cuarto.1.c) de la Orden; el presupuesto que se aporta es provisional, pendiente de aprobación por el Patronato; y no consta ladeclaración de otras ayudas solicitadas y destinadas a la misma finalidad, pese a que según el presupuesto provisional de ingresos tienen previstas subvenciones del Ayuntamiento de Barcelona y de la Generalitat. Por otro lado, no hay constancia de que se haya realizado por parte de la DGBAyBC ninguna de las actuaciones de instrucción del procedimiento previstas en el punto quinto de la Orden: comprobación de la documentación presentada, evaluación de la solicitud y propuesta de resolución.

c) Con respecto a la justificación de la subvención, se han observado también importantes deficiencias:

• No hay constancia de la fecha de presentación de los justificantes, por lo que no ha podido comprobarse el cumplimiento del plazo previsto en la Orden.

• No figuran en el expediente los estados contables que reflejen la gestión de los proyectos subvencionados, exigidos en el punto octavo.2.a) de la Orden.

• Tampoco figura la Memoria explicativa de dichos estados en relación con la aplicación de los fondos percibidos.

• La única documentación justificativa de los gastos realizados consiste en fotocopias de facturas, de cuyo pago no hay constancia; además, solo un pequeño número de facturas, que suponen aproximadamente el 8% de la subvención y que corresponden todas a la misma exposición, pueden relacionarse con las actividades expuestas en la Memoria que acompaña a la solicitud de la subvención. El resto corresponden a gastos ordinarios de la fundación: suministros, mantenimientos, traducciones, etc. y a gastos por otras exposiciones no contempladas en la referida Memoria.

• No hay constancia de que la unidad gestora haya realizado ninguna comprobación sobre la documentación presentada como justificante. Ni siquiera están sumadas las facturas; no hay ninguna garantía de que el total de las subvenciones concedidas a la Fundación no supere el importe de la actividad subvencionada, ni de que las mismas

facturas presentadas al Ministerio no hayan sido también aportadas como justificantes para otras subvenciones.

• Se concluye, por tanto, que la aplicación de la presente subvención no está debidamente justificada.

3.6.- **Subvención al Consorcio de Altamira** para gastos de funcionamiento y financiación del déficit de gestión acumulado, derivado de la ejecución del proyecto de rehabilitación del Museo Nacional y Centro de Investigación de Altamira y construcción de réplica de la cueva. Importe: 901.520,00 euros. En 2003 percibió otra subvención nominativa por igual importe y finalidad.

a) El Consorcio de Altamira se constituyó el 5 de mayo de 1997 con el objeto de gestionar la construcción del nuevo edificio para el Museo Nacional y Centro de Investigación y la construcción de la réplica de la cueva, bienes que, junto con el resto de los derechos adquiridos por el Consorcio pasarían a ser titularidad estatal a la finalización del Proyecto. Forman parte del Consorcio la Administración del Estado, la Diputación Regional de Cantabria, el Ayuntamiento de Santillana del Mar y la Fundación Marcelino Botín. El museo fue inaugurado el 17 de julio de 2001 y la totalidad de las obras fueron recepcionadas en el año 2002 (las iniciales más otras actuaciones no previstas que dieron lugar, al parecer, a dos proyectos modificados, uno complementario y dos proyectos de urbanización adicionales). A pesar de ello, el Consorcio sigue funcionando sin que se haya explicado al Tribunal su necesidad, funciones, costes y financiación; ni tampoco su interrelación con las funciones de la DGBAyBC, que tiene asumida la total gestión de museo a través de la Dirección del mismo.

b) El sistema seguido para la ejecución del citado proyecto carece de racionalidad en materia de gestión presupuestaria. Aún con las importantes limitaciones que se ha encontrado el Tribunal de Cuentas para fiscalizar esta subvención (la DGBAyBC no ha aportado la información y documentación imprescindible solicitada: cuentas del Consorcio, aportaciones de sus partícipes, cuantificación y justificación del déficit subvencionado, financiación FEDER recibida por el Consorcio para el proyecto, etc.), se ha podido evidenciar que la gestión desarrollada para la ejecución de este proyecto adolece de importantes debilidades de control, amén de resultar plenamente irregular en todo su planteamiento. Dicho sistema en síntesis, según se desprende de la información obtenida, es el siguiente: el Consorcio contrató las obras (tanto las iniciales como las adicionales) sin financiación suficiente, haciendo frente a los pagos mediante operaciones de crédito concertadas con el BSCH y las subvenciones FEDER (que, al parecer, alcanzaron un total de 8.732,8 miles de euros, percibidos por el Consorcio principalmente entre 1998 y 2001). Desde 1998 el Consorcio fue acumulando un importante déficit (por gastos de personal, intereses de créditos, vigilancia y otros) que se propuso financiar inicialmente mediante los ingresos de la gestión futura del museo pero que en 2001 se acordó financiar mediante subvenciones nominativas en 2003 y 2004, que son las aquí fiscalizadas. Este sistema, entre otras negativas consecuencias de control y de gestión, supone de hecho que la Administración del Estado dejara totalmente en manos de terceros (Consorcio) la asunción de importantes compromisos de gasto (de funcionamiento e inversión), sin ninguna restricción ni control, trasladando posteriormente los mismos al Presupuesto del Estado en forma de subvenciones nominativas, contrariando frontalmente los mecanismos de asunción de gastos, de control y contables establecidos en la normativa presupuestaria.

c) En relación con la cuantificación de las subvenciones de 2003 y 2004, en la

DGBAyBC no consta documentación alguna relativa al déficit de gestión acumulado que fundamenta la asignación de crédito en la Ley de Presupuestos. Tampoco consta ninguna documentación que cuantifique las obligaciones que el Estado y los demás partícipes asumen en relación con la financiación de dicho déficit. Igualmente, la DGBAyBC no dispone de información ni documentación sobre las subvenciones FEDER y otras que puedan haber concurrido a la financiación de estas actuaciones.

d) Por lo que se refiere al propio expediente de la subvención nominativa de 2004, se han observado numerosos defectos en la solicitud presentada y en la documentación que debe acompañar a la misma, según la Orden de 18 de junio de 1999: la solicitud se presenta fuera de plazo; no consta el anexo que debe presentarse junto con la solicitud; no se aporta relación de personal contratado; no se aporta el proyecto para el que se solicita la subvención; y no hay declaración de otras ayudas para la misma finalidad. Por otra parte, la Resolución de concesión que consta en el expediente no está firmada.

e) En cuanto a la justificación de la aplicación de la subvención, se han observado también importantes deficiencias:

• En el informe de control financiero de la Intervención Delegada del Ministerio de Cultura de 2004, se hace mención a una documentación justificativa de la subvención que es distinta de la que la DGBAyBC ha aportado al Tribunal de Cuentas. Dicha documentación consistió, según el informe de la IGAE, en fotocopias de gastos de 2002 y 2003 por el importe total de la subvención (901.520,00 euros), de los cuales 592.004,52 euros no se consideraron por la IGAE subvencionables. Entre ellos, gastos de electricidad y seguridad del museo que se financian con cargo a los créditos de la DGBAyBC en todos los museos estatales, así como gastos financieros y depósitos judiciales, excluidos por la Ley General de Subvenciones.

• En otro informe de control financiero de la IGAE relativo a subvenciones nacionales, elaborado el 3 de abril de 2006, se hace referencia a esta misma subvención y ejercicio.

Después de examinados los mismos documentos y propuestos determinados ajustes, se concluye que “se ha puesto de manifiesto el incumplimiento de la normativa reguladora de estas subvenciones, que ha ocasionado la aplicación indebida o la no justificación conforme a lo dispuesto en la normativa reguladora de la misma, por un importe total de 217.168,84 euros”. Dicha cantidad, más los intereses calculados desde el 30 de junio de 2004 hasta el 14 de julio de 2006 (22.607,83 euros), fue reintegrada en el Tesoro por el Consorcio el 27 de julio de 2006.

• En el expediente facilitado al Tribunal de Cuentas no figura la documentación mencionada, sino otros documentos remitidos por el Consorcio el 16 de mayo de 2005, fuera del plazo establecido para justificar la subvención. Dicha documentación consiste en un certificado (original) del Banco Santander Central Hispano sobre las amortizaciones de un crédito cargadas en la cuenta del Consorcio (725.358,73 euros) y fotocopias de gastos realizados en 2004 y 2005 que suman 262.666,36 euros. No consta tampoco ninguna documentación acreditativa del déficit que se subvenciona, aportaciones de los partícipes, otras subvenciones, etc.

• Con independencia de la irregularidad que supone la existencia de dos expedientes de justificación de la subvención, con documentos diferentes, que por sí misma inhabilita la justificación presentada, se aprecian otras importantes deficiencias: el expediente entregado al Tribunal se compone únicamente de fotocopias (salvo el certificado del BSCH); no pueden considerarse como justificantes de la subvención los relativos a la

amortización del crédito puesto que, al no presentar los justificantes de los gastos financiados con el mismo, no acreditan el destino dado a la subvención; una parte de los gastos se realizaron en el ejercicio 2005, no incluidos por tanto en la finalidad de la subvención; varios gastos no son subvencionables; etc. Por otra parte, hay que destacar también que no hay constancia de ninguna comprobación de los justificantes por parte de la DGBAyBC.

• Teniendo en cuenta las anteriores circunstancias, se concluye que la aplicación del importe total de la subvención percibida por el Consorcio de Altamira en 2004 (901.520,00 euros) no ha sido debidamente justificado. De esta cantidad se ha reintegrado 217.168,84 euros.

f) A la vista de las anteriores irregularidades, se solicitó por el Tribunal de Cuentas el expediente de justificación por el Consorcio de Altamira de la subvención recibida en el ejercicio 2003. La documentación facilitada consiste en parte de la que había sido examinada por la IGAE como justificación de la subvención de 2004. Todos los gastos corresponden al ejercicio 2002 y en muchos de ellos se aprecian deficiencias formales y materiales que impiden aceptar su idoneidad para justificar la subvención percibida. Tampoco consta en este expediente la documentación acreditativa del déficit que se subvenciona y demás aspectos anteriormente señalados. En conclusión, tampoco se considera justificada la aplicación del importe total de la subvención percibida por el Consorcio de Altamira en 2003 (901.520,00 euros).

3.7.- **Transferencia al Ayuntamiento de Santillana del Mar** para el pago del censo reservativo sobre las cuevas de Altamira. Importe: 204.626,00 euros.

a) El Real Decreto 2410/1977 de 27 de agosto, aprobó las bases para la transacción entre el Estado y el Ayuntamiento de Santillana del Mar, en virtud de las cuales el Ayuntamiento cedió en pleno dominio al Estado español la finca rústica en cuyo subsuelo se encuentran las Cuevas de Altamira, así como dichas cuevas, constituyéndose en compensación un censo reservativo a favor del Ayuntamiento consistente en una pensión anual igual al 50% del importe total de los ingresos producidos por la explotación de las cuevas, con un mínimo garantizado de 5 millones de pesetas revisable cada dos años conforme al IPC. Este acuerdo se protocolizó en escritura pública de 27 de abril de 1978. La pensión debe abonarse en plazos trimestrales y se practicará una liquidación definitiva el 31 de enero de cada año de la correspondiente al año inmediatamente anterior, una vez conocido el resultado de los rendimientos de explotación.

b) En el ejercicio fiscalizado el Ayuntamiento de Santillana del Mar, a la vista del resultado de los rendimientos de la explotación en el ejercicio 2003, decidió optar como en ejercicios anteriores por el importe mínimo garantizado, que ascendió a 204.626,00 euros con la revisión del IPC aplicable. No se han observado incidencias significativas en la tramitación de esta transferencia.

Subvenciones nominativas de capital

3.8.- Se han analizado los expedientes relativos a las subvenciones nominativas financiadas con cargo al capítulo 7 del presupuesto “Transferencias de capital” que figuran en el cuadro siguiente:

(euros)

Aplicación presupuestaria	Denominación	Obligaciones reconocidas
453.A 783	Al Patronato del Museo Nacional de Arte de Cataluña (última fase obras sede Montjuic)	2.862.570,00
453.A 784.04	A la Fundación del Museo Marítimo de la Ría de Bilbao	1.202.020,00
458.C 755	Convenio de colaboración con la Diputación General de Aragón para intervenciones de conservación y restauración de diversos bienes culturales de la Comunidad Autónoma	649.500,00
458.C 782	A la Caja de Ahorros de la Inmaculada de Aragón, para proyectos de restauración en las catedrales de Aragón	288.485,81
458.C 786	Convenio de colaboración y coordinación con el Arzobispado de Sevilla para la financiación de las obras contempladas en el Plan Director del templo de Santa Catalina	200.000,00

Aplicación presupuestaria	Denominación	Obligaciones reconocidas
458.C 789	Convenio de colaboración y coordinación con el Arzobispado de Sevilla para la financiación de las obras contempladas en el Plan Director del templo del Divino Salvador	3.000.000,00

3.9.- Subvención al Patronato del Museo Nacional de Arte de Cataluña (última fase de las obras en la sede de Montjuic). Importe: 2.862.570,00 euros.

a) La subvención tiene origen en el convenio suscrito en 2002 entre el Ministerio de Educación, Cultura y Deporte (MECD), la Generalitat de Cataluña, el Ayuntamiento de Barcelona y el Museo Nacional de Arte de Cataluña (MNAC), para la finalización de las obras de rehabilitación de la sede del MNAC. El importe de la subvención fiscalizada es el que corresponde abonar al Ministerio de Cultura en el ejercicio 2004, de acuerdo con el citado convenio y el cambio de estructura ministerial.

b) En el examen del expediente se aprecian diversas deficiencias. En cuanto a la solicitud, se omite documentación exigida por la Orden de 18 junio 1999: la Memoria de actividades de los dos últimos años, el presupuesto de la entidad y la relación del personal contratado. Por lo que se refiere a la justificación, se realizó fuera de plazo y se aporta como justificante solo una factura de fecha 31 de enero de 2004, por importe de 1.112.323,34 euros, correspondiente a la certificación de obra nº 17 (enero de 2004), que también se adjunta. No se acompañan estados contables que reflejen la gestión de los proyectos subvencionados, ni memoria explicativa de actividades ni de gastos realizados con cargo a la subvención. No hay en este expediente ninguna constancia de comprobaciones realizadas por la DGBAyBC sobre la documentación justificativa.

c) Se concluye, por tanto, que la aplicación de esta subvención no está debidamente justificada.

3.10.- Subvención a la Fundación Museo Marítimo de la ría de Bilbao. 1.202.020,00 euros.

a) En la Ley de Presupuestos no se indica la finalidad de la subvención. La Resolución de concesión, de 23 de marzo de 2004 no aclara nada al respecto, indicando sólo que se concede para *"la finalidad expuesta en su solicitud"*, si bien en la solicitud no consta tampoco finalidad alguna. La Fundación se constituyó el 31 de mayo de 1996, siendo sus fines estatutarios *"la investigación, conservación y difusión del legado histórico que suponen todas las actividades relacionadas con la mar y el estímulo y*

fomento de trabajos sobre la materia, así como una decidida colaboración con cuantas iniciativas públicas y privadas se orienten en el mismo sentido, sin perjuicio de contactos y programas de colaboración con entidades y organismos de otros ámbitos”.

b) La subvención trae su causa de un Protocolo de Colaboración firmado el 3 de junio de 2002 por la Fundación y el Ministerio de Educación, Ciencia y Deporte, en el que éste se comprometía a aportar 4.808.000,00 euros en cuatro años (2002-2005), siempre que se aprobase por las Cortes en cada ejercicio la correspondiente subvención nominativa. La Fundación debía afectar dichas aportaciones a la realización de las inversiones previstas en su Plan de inversiones 2001-2004, y más en concreto a las siguientes partidas: *“restauración de los diques 1, 2 y 3, que albergarán la exposición exterior del museo; construcción del edificio ubicado en el enclave histórico, que albergará las dependencias interiores del museo; fondos museísticos del patrimonio histórico; exposición inicial; y restauración de las embarcaciones y patrimonio propios del museo”.*

c) En relación con los requisitos exigidos para la solicitud de la subvención, según la Orden de 18 de junio de 1999, se han observado las siguientes deficiencias: la solicitud se presentó fuera de plazo; no se aportó memoria de las actividades realizadas en los últimos dos años, figurando en su lugar un plan de gestión por áreas; falta el proyecto de actuación para el que se solicita la subvención; no hay declaración sobre otras ayudas y subvenciones solicitadas o recibidas para la misma finalidad; respecto del Impuesto de Actividades Económicas, se aporta un escrito donde se indica que el museo no está de alta en dicho impuesto por estar a la espera de la licencia definitiva.

d) La justificación de la subvención se realiza el 20 de abril de 2005, fuera de plazo. Únicamente se aporta una memoria de actividades y un certificado del representante de la Fundación indicando que la subvención fue destinada a la amortización del préstamo concedido por una entidad bancaria para la inversión del Museo Marítimo. No hay ningún justificante de los gastos realizados.
Tampoco en este expediente hay ninguna constancia de comprobaciones realizadas sobre la documentación justificativa de la subvención.

e) Se concluye, por tanto, que la aplicación de esta subvención no está debidamente justificada.

3.11.- A la Diputación General de Aragón para la realización de trabajos de restauración en bienes del Patrimonio Cultural y Artístico de Aragón. Importe: 649.500,00 euros.

a) El origen de la subvención es el Convenio de colaboración suscrito el 10 de noviembre de 2003 entre el Ministerio de Educación, Cultura y Deporte y la Diputación General de Aragón. El objeto del convenio es la restauración de la decoración mural y otras obras en diversas iglesias de Zaragoza, con una inversión prevista de 2.541.414,52 euros distribuida en tres anualidades. Cada institución se hacía cargo del 50% de dicho importe, comprometiéndose el Ministerio a tramitar en el Presupuesto estatal de cada ejercicio la correspondiente subvención nominativa. No se precisa el presupuesto de cada una de las obras ni los correspondientes plazos de ejecución, aunque sí las cantidades a aportar en total por cada Administración en los ejercicios 2003, 2004 y 2005.

b) Examinado el expediente de la subvención correspondiente al ejercicio 2004, en relación con la documentación exigida por la Orden de 18 de junio de 1999 para la

concesión, se han observado las siguientes deficiencias: la solicitud fue presentada fuera del plazo previsto; no figura el proyecto de la actuación con inclusión de los correspondientes presupuestos; y no consta la declaración sobre percepción por el beneficiario de otras ayudas para la misma finalidad.

c) Como justificantes del empleo de la subvención figuran un informe del Gobierno de Aragón, de diciembre de 2004 y fotocopias de facturas correspondientes a las actuaciones realizadas. Esta documentación no tiene registro de entrada, por lo que se desconoce si fue presentada en el plazo establecido. Por otra parte, el informe sólo se refiere a dos de las tres actuaciones previstas y se limita a relacionar los trabajos realizados en 2004, sin indicación del importe de las correspondientes inversiones. Las facturas, en cambio, corresponden a las tres actuaciones previstas.

3.12.- **A la Caja de Ahorros de la Inmaculada** para restauración de bienes del Patrimonio Cultural de Aragón. Importe: 288.485,81 euros.

a) El origen de la subvención está en el convenio suscrito el 16 de julio de 2002 entre el Ministerio de Educación, Cultura y Deporte, la Diputación General de Aragón y la Caja de Ahorros de la Inmaculada. El objeto del mismo es la realización de diversas obras de restauración en edificios religiosos y en las fachadas de una plaza mayor. La inversión total, según el convenio, ascendía a 1.803.036,30 euros, de los cuales cada parte financia un tercio, en tres anualidades. La contratación de los trabajos se realizará por la Caja de Ahorros, que recibirá las respectivas aportaciones de las dos Administraciones Públicas. El 29 de diciembre de 2003 se suscribe una addenda a dicho convenio, sustituyendo la restauración de las fachadas de la plaza mayor por la restauración de la decoración mural de una ermita, sin modificar la inversión total ni la financiación. Los convenios no contienen ninguna referencia al presupuesto de cada actuación ni a las fechas previstas de realización de los trabajos.

b) Examinado el expediente de la subvención de 2004, respecto de la documentación a presentar con la solicitud se han observado las siguientes deficiencias: la solicitud fue presentada fuera de plazo; no figura la escritura de constitución de la Caja de Ahorros ni sus Estatutos; no se acredita el poder de la persona que firma la solicitud; no se aporta el proyecto de actuación con los presupuestos correspondientes; y no consta declaración sobre percepción de otras ayudas para la misma finalidad.

c) La justificación del empleo de la subvención se realizó fuera de plazo. Figura en el expediente un escrito de la Caja de Ahorros de 30 de agosto de 2005, sin registro de entrada en el Ministerio, con el que se remiten las facturas de los gastos realizados en 2004 y la liquidación a 31 de diciembre de 2004 de las facturas recibidas y pagadas por la Caja de Ahorros por los trabajos realizados.

3.13.- Al Arzobispado de Sevilla para la construcción del templo de Santa Catalina. Importe: 200.000,00 euros.

a) No se han observado deficiencias significativas en el expediente de concesión de esta subvención. Se han cumplido por lo general los requisitos establecidos en la Orden de 18 de junio de 1999 relativos a las fases de solicitud, instrucción y resolución, si bien la presentación de la petición del Arzobispado tuvo lugar fuera de plazo.

b) Por el contrario, la justificación de la subvención resulta incorrecta. Además de incumplir el plazo establecido (primer trimestre de 2005), efectuando dicha actuación entre los meses de abril y agosto de 2005, todas las facturas aportadas como

justificantes corresponden a gastos realizados en 2005, por lo que no sirven como justificantes de la subvención (concedida y pagada en 2004). No hay constancia de que la unidad gestora haya realizado ninguna comprobación sobre la documentación presentada como justificante.

c) Se concluye, por tanto, que la aplicación de esta subvención no está debidamente justificada.

3.14.- Subvención al Arzobispado de Sevilla para la restauración del templo del Divino Salvador. Importe: 3.000.000,00 euros.

a) Esta subvención tuvo su origen en un Protocolo de colaboración y coordinación de actuaciones entre el Ministerio de Educación y Ciencia y el Arzobispado de Sevilla firmado el 23 de mayo de 2003. Tras la incorporación al Presupuesto de 2004 de la subvención nominativa, el representante del Arzobispado solicita la subvención el 16 de enero de 2004 . Se acompaña un proyecto relativo a la primera fase de las obras de restauración, por importe de 2.762.242,84 euros (presupuesto de contrata). Con la suma de los honorarios de proyecto y dirección de obra el presupuesto asciende a 2.999.999,99 euros. Se prevé un plazo de ejecución de las obras de 3 años. Se aporta también un resumen del proyecto integral de restauración que asciende a 6.096.624,61 euros.
En relación con los requisitos exigidos para la solicitud por la Orden de 18 de junio de 1999, únicamente falta el presupuesto de la entidad y la relación del personal fijo y temporal contratado. El 3 de febrero de 2004, el Director General firma por delegación del Secretario de Estado de Cultura la Resolución de concesión de la subvención, por importe de 3 millones de euros, en la que se establece la obligación del Arzobispado de justificar, dentro del primer trimestre de 2005, la realización de las actividades para las que fue concedida. El 20 de febrero se aceptó la subvención por el Arzobispado.

b) El 1 de abril se contabilizó el primer pago, por importe de 750.000,00 euros, correspondiente a los meses de enero a marzo, tramitándose posteriormente pagos mensuales de 250.000,00 euros cada uno. El 8 de julio de 2004 tiene entrada en el Ministerio un escrito del Arzobispado, en el que se indica que el sistema de pagos mensuales no se adecua al ritmo de ejecución de las obras, por lo que solicita el cambio de sistema. Se mencionan demoras habidas en su inicio como consecuencia de determinados imprevistos. La estimación que hace el Arzobispado del importe de obra que podría ejecutarse en 2004 asciende únicamente a 1 millón de euros, solicitando que se incluya en el Presupuesto del Estado para 2005 una subvención nominativa por los 2 millones restantes. Pese a ello el Ministerio continúa realizando los pagos mensuales hasta agotar los 3 millones de la subvención concedida.

c) De acuerdo con la Orden de 18 de junio de 1999 y la Resolución de concesión de la subvención, el plazo para la justificación de la misma era el primer trimestre de 2005. En septiembre de 2005, el Arzobispado presenta justificantes por importe de 1.956.381,97 euros, de los cuales únicamente 790.343,20 euros corresponden a gastos realizados en 2004. En el escrito con el que se presenta la justificación el Arzobispado reitera la imposibilidad de gastar el importe total de la subvención en el primer año de la obra y solicita un aplazamiento de la justificación del resto de la subvención. Salvo por la circunstancia anterior, no se aprecian deficiencias relevantes en los justificantes presentados. Únicamente cabe señalar que, en el caso de las retenciones por IRPF de los honorarios técnicos (26.905,96 euros), su justificación se limita a una transferencia entre dos cuentas abiertas a nombre del Arzobispado, lo que no acredita el pago de las retenciones a la Hacienda Pública.

d) El 30 de septiembre de 2005 la DGBAyBC resuelve, con base en un informe del Servicio Jurídico, ampliar el plazo de justificación de la cantidad pendiente hasta la finalización del primer trimestre de 2006. El Tribunal de Cuentas considera dicha Resolución inapropiada por dos razones: en primer lugar, no respeta el plazo de justificación establecido en la Orden de 18 de junio de 1999 y, en segundo lugar, su verdadera naturaleza no es la de ampliar el plazo de presentación de la documentación justificativa, sino la de modificar el plazo de materialización del objeto de la subvención (que fue pagada en 2004 para obras a ejecutar en dicho año) trasladándolo a ejercicios posteriores, incumpliendo la normativa vigente. Todo ello para solucionar de un modo inapropiado la falta de previsión en que se incurrió al conceder y abonar en el ejercicio la totalidad de la subvención, sin tener en cuenta el ritmo de ejecución de las obras.

e) El 27 de marzo de 2006 se remite la justificación pendiente de la subvención de 2004, con documentos relativos a gastos realizados en 2005 (459.060,48 euros) y en 2006 (584.543,15 euros), ascendiendo por tanto el total justificado a 2.999.985,60 euros. No hay constancia de que la unidad gestora haya realizado ninguna comprobación sobre la documentación presentada como justificante.

f) En conclusión, el trámite y justificación de la presente subvención han incumplido el principio de especialidad temporal presupuestaria, así como los plazos de aplicación material y de justificación de dicha subvención.

B) Subvenciones en régimen de concurrencia.

3.15.- En el ejercicio 2004 se convocaron dos líneas de subvenciones: ayudas para la promoción del arte español y ayudas para financiar excavaciones arqueológicas en el exterior. Se presentan seguidamente los resultados obtenidos en la fiscalización de cada una de dichas líneas de subvenciones.

Ayudas para la promoción del arte español.

3.16.- Su gestión corresponde a la Subdirección General de Promoción de las Bellas Artes. En el ejercicio 2004, la financiación de estas ayudas se realizó con cargo a los conceptos 471 "Ayudas para la promoción del arte español (empresas privadas)" y 480 "Ayudas para la promoción del arte español (familias e instituciones sin fines de lucro)". Los créditos presupuestados en dichos conceptos y las obligaciones reconocidas se desglosan en el cuadro siguiente:

(euros)

Concepto	Créditos definitivos	Obligaciones reconocidas	% ejecución
471 "A empresas privadas"	420.710,00	405.610,00	96%
480 "A familias e instituc. sin fines de lucro"	108.180,00	108.180,00	100%
SUMA	**528.890,00**	**513.790,00**	**97%**

3.17.- Las bases reguladoras de esta ayuda están recogidas en la Orden del Ministerio de Cultura de 14 de julio de 1998. La convocatoria correspondiente al ejercicio fiscalizado tuvo lugar por Resolución de la DGBAyBC de 12 de enero de 2004 y la Resolución de concesión tiene fecha de 14 de abril de 2004, ambas Resoluciones publicadas en el BOE. De acuerdo con lo dispuesto en la Disposición Transitoria Segunda de la Ley 38/2003, General de Subvenciones, la normativa sobre subvenciones anterior

a dicha Ley (artículos 80 y 81 del TRLGP y Real Decreto 2225/1993, de 17 de diciembre) es aplicable a las subvenciones tramitadas en el ejercicio 2004, excepto en lo relativo a los procedimientos de control financiero, reintegro y revisión de actos, en los que resulta aplicable la nueva ley desde su entrada en vigor.

3.18.- La Orden citada, reguladora de las bases de estas subvenciones, recoge el contenido mínimo exigido por el artículo 81.6 a) del TRLGP, en cuanto a la definición del objeto de la subvención y la forma de concederla. Por su parte, la Resolución de convocatoria cumple en términos generales los requisitos establecidos en el artículo 4.3 del Real Decreto 2225/1993. Sin embargo, en lo referente a la fijación de los criterios de valoración de las peticiones, la Resolución se limita a indicar los *"aspectos que servirán de criterios para la concesión de ayudas"*. No se determina la forma de valorar dichos criterios, la mayoría de los cuales son difícilmente cuantificables (prestigio de los participantes y entidades que organicen las exposiciones, proyección nacional e internacional, fomento de la creación artística, atención a la creación de nuevos valores), ni se establece una ponderación de los mismos.

3.19.- La selección de los beneficiarios es realizada por una Comisión de estudio y valoración, compuesta por un Presidente (el Director General) y 4 vocales designados por la Secretaría de Estado de Cultura, uno de los cuales pertenece a la DGBAyBC y actúa como secretario. En el acta de la reunión de la Comisión del 30 de marzo de 2004 constan 372 solicitudes presentadas en el ejercicio, por un importe de 8.402.243,18 euros, lo que representa un incremento del 17% respecto al número de solicitudes del año anterior y del 37% en cuanto a su importe. De las solicitudes presentadas, 286 corresponden a empresas privadas, por importe de 6.107.571,09 euros, y 86 a familias e instituciones sin fines de lucro, por importe de 2.294.672,09 euros.

3.20.- En dicha reunión, la Comisión acordó aplicar para la valoración de las solicitudes una serie de criterios adicionales a los establecidos en la Resolución de convocatoria (no subvencionar ningún proyecto cubriendo la totalidad del gasto estimado, no conceder más cantidad de la pedida por cada solicitante, subvencionar todos los proyectos de actividades similares, incentivar las actividades que incluyan a varios artistas, no dar a más de dos ferias por peticionario, no subvencionar las actividades habituales de las galerías, favorecer a las ferias de mayor calidad y prestigio y no ayudar a valores españoles ya muy promocionados). En el acta se indica también que *"se apoya especialmente la presencia en ferias en el exterior, tanto europeas como americanas..."* por Resolución de la DGBAyBC de 12 de enero de 2004 y la Resolución de concesión tiene fecha de 14 de abril de 2004, ambas Resoluciones publicadas en el BOE. De acuerdo con lo dispuesto en la Disposición Transitoria Segunda de la Ley 38/2003, General de Subvenciones, la normativa sobre subvenciones anterior a dicha Ley (artículos 80 y 81 del TRLGP y Real Decreto 2225/1993, de 17 de diciembre) es aplicable a las subvenciones tramitadas en el ejercicio 2004, excepto en lo relativo a los procedimientos de control financiero, reintegro y revisión de actos, en los que resulta aplicable la nueva ley desde su entrada en vigor.

3.21.- **Se han observado algunas diferencias no justificadas entre los beneficiarios seleccionados por la Comisión de selección, según el acta de la reunión antes mencionada, y la Resolución definitiva de concesión de ayudas:**

a) En el acta figuran 89 ayudas con cargo al concepto 471, por un importe total de 420.710,00 euros. En la Resolución, sin embargo, aparecen en dicho concepto 90 ayudas, por el mismo importe total. La ayuda añadida, de 5.800,00 euros, se obtiene de la minoración de 17 de las subvenciones propuestas por la Comisión y corresponde a un

beneficiario al que se concede también otra subvención para un proyecto diferente.

b) En el acta se indica que se han seleccionado como suplentes, para el caso de que alguno de los beneficiarios renunciara a la ayuda concedida, a cuatro peticionarios en el concepto 471 y otros cuatro en el 480, aunque no consta el anexo al acta en el que debiera figurar la relación identificativa de éstos. En la Resolución de concesión, por el contrario, aparecen 15 suplentes para el concepto 471 y seis para el 480.

3.22.- En el concepto 471 el número inicial de ayudas concedidas fue de 90 y el número de beneficiarios 68, debido a que 22 de ellos reciben dos subvenciones cada uno. De estos 22 hay cuatro que aparecen también en la relación de suplentes. En el concepto 480 se concedieron 16 ayudas a 16 beneficiarios. El importe de las ayudas concedidas oscila entre 2.000,00 y 9.300,00 euros en el concepto 471 y entre 3.000,00 y 20.000,00 euros en el 480. De las 90 subvenciones concedidas en el concepto 471, se produjeron 12 renuncias antes de cobrarlas, básicamente por no estar en condiciones de realizar la actividad para la que se concedió la ayuda. En consecuencia, se abonaron subvenciones a los 15 suplentes previstos, aunque por importe inferior al liberado por las renuncias. Dos de estos suplentes renunciaron a su vez a la subvención. De las 91 concesiones definitivas, dos corresponden a beneficiarios que acumulan tres ayudas cada uno y 18 que acumulan dos.
Posteriormente, 10 beneficiarios renunciaron a las correspondientes ayudas después de haberlas aceptado y cobrado, realizando los reintegros correspondientes, por importe de 51.000,00 euros. El número total de renuncias asciende por tanto a 24, lo que representa en dicho concepto el 23% del número y el 24% del importe de las subvenciones concedidas, lo que parece indicar un estudio insuficiente de la viabilidad de los proyectos presentados.

	Concepto 471		Concepto 480		Total *(euros)*	
	número	importe *(euros)*	número	importe *(euros)*	Número	Importe
Concesiones iniciales	90	420.710,00	16	108.180,00	106	528.890,00
Renuncias	12	54.100,00	-	-	12	54.100,00
Concesiones a suplentes	15	45.000,00	-	-	15	45.000,00
Renuncias de suplentes	2	6.000,00	-	-	2	6.000,00
Concesiones definitivas	91	405.610,00	16	108.180,00	107	513.790,00
Reintegros	10	51.000,00	-	-	10	51.000,00

3.23.- Se ha examinado una muestra de 24 expedientes de subvenciones concedidas, 20 con cargo al concepto 471 (el 22%) y cuatro con cargo al 480 (el 25%). Los principales resultados obtenidos en cuanto a la documentación que debe presentarse con la solicitud, según lo exigido en la Orden de bases y en la Resolución de convocatoria, son los siguientes, recogiéndose en el anexo 6 el detalle de defectos por expedientes:

a) Tres solicitudes fueron presentadas fuera de plazo, pese a lo cual se tramitó y concedió la subvención.

b) Una de las solicitudes no tiene registro de entrada y no está firmada.

c) Cuatro expedientes no contienen las escrituras de constitución ni los estatutos de las entidades solicitantes.

d) En dos expedientes falta el CIF o NIF y en ocho el justificante del alta en el IAE

e) En un expediente falta la memoria de las actividades realizadas en los últimos cinco años.

f) En cuatro expedientes falta la memoria económica de la actividad para la que se solicita la subvención; otro expediente no contiene el desglose de gastos ni de ingresos previsto; y otros diez aportan detalle de los gastos pero no de los ingresos.

g) En siete expedientes no se acredita que el solicitante esté al corriente en el pago de sus obligaciones fiscales o con la Seguridad Social.

h) En dos expedientes falta la declaración sobre otras ayudas solicitadas o recibidas para la misma finalidad.

i) En once de los expedientes que contienen documentación incompleta no consta que el órgano gestor haya enviado al solicitante el requerimiento correspondiente; en otro se envió dicho requerimiento pero sólo se solicitó parte de la documentación omitida.

j) Tres de los solicitantes a los que se requirió para aportar documentación no contestaron al requerimiento, pese a lo cual se continuó el procedimiento.

k) En cinco expedientes no es posible conocer si la aceptación de la subvención se realizó en el plazo previsto porque los escritos de aceptación carecen de fecha.

3.24.- Por lo que se refiere al examen de la documentación justificativa de realización de la actividad, sólo procede en 18 de los 24 expedientes de la muestra, ya que cinco renunciaron a la subvención antes de cobrarla y uno reintegró la ayuda recibida. Se han observado las siguientes deficiencias en la documentación justificativa examinada:

a) En un expediente la documentación justificativa se presentó fuera de plazo. En este expediente la Subdirección General de Promoción certifica que la actividad realizada se ajusta a la subvención percibida antes de la presentación de dicha documentación. En otros dos expedientes no consta la fecha en que se presentó la justificación de la subvención.

b) En dos expedientes no consta la memoria sobre la realización de la actividad subvencionada.

c) En dos expedientes se realizó una actividad diferente a la subvencionada, sin previa autorización del órgano gestor.

d) En seis expedientes no se aporta la memoria económica.

e) En doce expedientes las facturas presentadas son fotocopias.

f) En cuatro expedientes se aportan facturas que corresponden a conceptos no subvencionables, por no estar directamente relacionados con la actividad.

g) En dieciséis expedientes no queda acreditada la utilización en la actividad subvencionada del logotipo del Ministerio que permita identificar el origen de la ayuda.

h) En ningún expediente queda constancia de la revisión de la documentación justificativa por parte de la unidad gestora, aunque sí figuran los certificados de la

Subdirección General de Promoción sobre la adecuación de la actividad realizada a la subvención percibida (que, como se ha señalado, en un caso no es correcto).

i) En diez expedientes no consta el pago de las facturas.

3.25.- Dado el elevado porcentaje de expedientes de la muestra de subvenciones concedidas con cargo al concepto 471 que no llegaron a aplicarse a la finalidad prevista (25%), se solicitó la totalidad de los expedientes finalizados con la renuncia de los beneficiarios (14) o el reintegro de las subvenciones (10), que ascienden en total a 24. En la práctica totalidad de los casos en que figura el motivo de la renuncia se trata de la no aceptación de los solicitantes a las ferias a las que pretendían acudir. Todos los reintegros se realizaron por iniciativa de los beneficiarios de las subvenciones, sin que consten actuaciones previas de la DGBAyBC en reclamación de las cantidades correspondientes.

3.26.- Se examinó también una muestra de 10 expedientes correspondientes a solicitudes denegadas. Tres de ellas habían sido presentadas fuera de plazo. Del resto se pidieron explicaciones sobre los motivos de la denegación, remitiéndose la DGBAyBC a los criterios recogidos en el apartado sexto. 2 de la Resolución de 12 de enero de 2004 (prestigio o reconocimiento de la feria, trayectoria del solicitante dentro de la actividad para la que solicita la ayuda e interés específico del proyecto). Del contenido de estos expedientes y del resto de la documentación facilitada por la DGBAyBC, sin embargo, no se aprecia en estos supuestos una situación diferente de otros a los que sí se les concedieron las ayudas.

Ayudas para financiar excavaciones arqueológicas en el exterior.

3.27.- El objeto de estas subvenciones consiste en la realización de proyectos de excavación o intervención arqueológica en el extranjero, con atención prioritaria a los proyectos de investigación e intervención integral que se planteen en el marco de convenios de cooperación cultural suscritos por el Estado Español con otros países. Los beneficiarios deben ser instituciones o centros públicos o privados con personalidad jurídica que cuenten con un equipo de investigadores de probada solvencia en la materia objeto de la convocatoria. La gestión de estas subvenciones corresponde a la Subdirección General del Instituto del Patrimonio Histórico Español. Figuran presupuestadas en el programa 134.B, en el concepto 788. En el ejercicio fiscalizado se reconocieron obligaciones por importe de 240.400,00 euros, el 100% de los créditos definitivos.

3.28.- Las bases reguladoras de estas ayudas están recogidas en la Orden del Ministerio de Cultura de 14 de julio de 1998. La convocatoria correspondiente al ejercicio fiscalizado tuvo lugar por Resolución de la DGBAyBC de 18 de febrero de 2004. La Resolución de concesión es de 12 de julio de 2004. La fecha de la convocatoria coincide con la entrada en vigor de la Ley 38/2003 General de Subvenciones, aplicable en consecuencia a las subvenciones tramitadas en el ejercicio 2004. La Resolución de convocatoria recoge en términos generales los requisitos establecidos en el artículo 17.3 de la Ley 38/2003. En lo referente a la fijación de los criterios de valoración de las peticiones, la Resolución especifica dichos criterios atribuyéndoles un valor ponderado.

3.29.- La selección de los beneficiarios se realizó por una Comisión de estudio y valoración compuesta por un Presidente (el Director General), un Vicepresidente (el Subdirector General del IPHE) y 4 vocales designados por la Secretaría de Estado de Cultura, uno de los cuales pertenece a la DGBAyBC y actúa como secretario. La reunión

de la Comisión tuvo lugar el 1 de junio de 2004. Según consta en el acta de dicha reunión, se presentaron en este ejercicio 28 solicitudes, por un importe de 795.230,62 euros. En la reunión de la Comisión se acuerda aplicar en la selección un criterio adicional a los establecidos en la Resolución de convocatoria: dar prioridad a los proyectos no realizados sobre los que ya han sido realizados. Respecto del plazo para la realización de los proyectos la única condición establecida en la convocatoria era que las actividades se realizaran antes del 31 de diciembre de 2004. No resulta, por tanto, correcto que la Comisión de selección acuerde otros criterios, desconocidos para los solicitantes en el momento de presentar sus peticiones. La Comisión propone la concesión de 13 subvenciones, por importe de 240.400,00 euros. Uno de los beneficiarios recibe dos subvenciones. El importe de las ayudas concedidas oscila entre los 6.000,00 y los 36.000,00 euros. Se seleccionan además dos proyectos como suplentes, para el caso de renuncias que finalmente no se produjeron.

3.30.- Se ha examinado una muestra de tres expedientes a los que se concedieron subvenciones por un importe conjunto de 44.400,00 euros (el 18% de las obligaciones reconocidas), identificados en el cuadro siguiente. Los principales resultados obtenidos se expresan a continuación.

Beneficiario	Proyecto	Importe (euros)
Universidad Autónoma de Barcelona	Ritual en grupos de cazadores-recolectores en Río Grande, Tierra de Fuego (Argentina)	20.400,00
Universidad de Oviedo	Excavaciones en Jebel Al-Mutawwaq, Zarqa (Jordania)	12.000,00
Universidad Autónoma de Madrid	Conimbriga. La basílica paleocristiana, Coimbra (Portugal)	12.000,00

a) Respecto a la documentación que debe presentarse con la solicitud, según lo exigido en la Orden de bases y en la Resolución de convocatoria, en uno de los expedientes el certificado de cumplimiento de obligaciones tributarias no es original y en otro, que corresponde a la continuación de un proyecto financiado por el Ministerio, no consta el informe de las actividades realizadas ni se acredita la justificación de los gastos.

b) En ninguno de los tres expedientes es posible conocer si la aceptación de la subvención se realizó en el plazo establecido porque no consta el acuse de recibo de la comunicación de la Resolución de concesión. En uno de los escritos de aceptación no figura la fecha de entrada en registro.

c) En ninguno de los tres expedientes queda acreditada la utilización en la actividad subvencionada del logotipo del Ministerio que permita identificar el origen de la ayuda.

d) Respecto de la documentación justificativa de la subvención, uno de los expedientes incluye facturas correspondientes a retribuciones de tres personas vinculadas por una relación laboral con la entidad beneficiaria de la ayuda, por importe conjunto de 1.998,00 euros. El anexo de la resolución de convocatoria declara dichos gastos no subvencionables con carácter general.

e) En ningún expediente queda constancia de la revisión de la documentación justificativa por parte de la unidad gestora, aunque sí figuran los certificados de conformidad del IPHE.

3.31.- Entre las solicitudes de subvención desestimadas por diversos motivos, según consta en el acta de la Comisión, dos lo fueron por aplicación del criterio señalado en el punto 3.29, no establecido en la convocatoria (haber sido ejecutados los

correspondientes proyectos con anterioridad a la convocatoria de las subvenciones, aunque ambos se ejecutaron íntegramente en el ejercicio 2004). Uno de ellos había sido valorado con la puntuación máxima y el otro solamente fue superado por 5 de los proyectos subvencionados. Dado que la Resolución de convocatoria únicamente exigía que las actividades subvencionadas se realizaran antes de 31 de diciembre de 2004, la exclusión de estos proyectos no está justificada. Por otro lado, en la convocatoria de 2005 la Resolución incorpora el anterior criterio, al establecer expresamente que las actividades subvencionadas deberán realizarse en el periodo comprendido entre la concesión de la ayuda y el final de año. Dado que la convocatoria se publicó en el BOE de 7 de marzo, esta condición excluye de las ayudas, al menos, a los proyectos iniciados en el primer trimestre, sin que se haya aportado por la DGBAyBC una explicación razonable de esta atípica discriminación.

C) Premios

3.32.- En el ejercicio 2004 se concedieron y abonaron por la DGBAyBC los premios que figuran en el siguiente cuadro. Como muestra para su fiscalización se examinaron los premios Velázquez de Artes Plásticas y Marqués de Lozoya.

(euros)

Denominación	Aplicación presupuestaria	Obligaciones reconocidas
Velázquez de Artes Plásticas	134-B.489	120.000,00
Marqués de Lozoya	453-A.482.01	24.040,00
Fotografía Museos Estatales	453-A.482.02	10.518,22
Nacionales de Artes Plásticas y Fotografía	458-B.481.03	45.075,90
Conservación y restauración de bienes culturales	458-C.481.01	15.025,30
Nacional Ciudades Patrimonio de la Humanidad	458-C.481.02	24.040,00
Total importe		**238.699,42**

3.33.- El premio Velázquez se creó por Orden del Ministerio de Educación, Ciencia y Deporte de 17 de julio de 2001, que prevé su convocatoria anual a partir de 2002. El premio se concede por la totalidad de la obra de un creador en el ámbito de las artes plásticas en cualquiera de sus manifestaciones. Pueden ser candidatos al mismo los nacionales de España y de los Estados americanos de la Comunidad Iberoamericana de Naciones. Está dotado con 90.000,00 euros y se prevé que el artista premiado elija a otro artista menor de 35 años como receptor de una "Beca Velázquez" de un año de duración, dotada con 30.000,00 euros.

La convocatoria correspondiente a 2004 se realizó por Orden de 19 de enero, concediéndose el premio al artista Pablo Palazuelo.

3.34.- En la tramitación del expediente se han observado las siguientes deficiencias:

a) Resulta inadecuado el procedimiento previsto en el apartado séptimo de la Orden de convocatoria, según el cual la Orden de concesión del premio debe concretar la composición del Jurado. Parece que lo correcto sería que la publicación de la composición del Jurado fuera previa a la Orden de concesión, y al fallo en el que ésta se basa.

b) En el expediente no consta el documento contable D ni el acuerdo de compromiso de gasto correspondiente al Premio.

c) El procedimiento para la designación del becario contraviene las normas del artículo 81.6 del TRLGP que exige el cumplimiento de los principios de concurrencia y objetividad en el otorgamiento de las subvenciones. Por otro lado, no queda acreditado en el expediente que el procedimiento de designación del becario haya sido el previsto en las Órdenes reguladoras del premio. En un escrito de la Subdirectora General de Promoción, de 1 de diciembre de 2004, que suscribe como Secretaria de Actas del Jurado, se indica que el premiado ha solicitado que la elección del becario la realice el mismo Jurado que falló el premio, y se comunica la elección del beneficiario.
No hay constancia escrita de tales hechos. En contestación a la petición de aclaraciones del Tribunal, la citada Subdirectora General indica que el premiado optó por realizar todas sus comunicaciones de forma verbal tanto a esta unidad como a los miembros del Jurado, ante los cuales manifestó su voluntad de que el receptor de la beca fuera el beneficiario antes indicado.

d) A mediados de 2006 el beneficiario de la beca no había entregado al Estado español las cuatro obras previstas para su entrega al término de la beca, cuya duración comprende el ejercicio 2005. Tampoco había sido reclamada dicha entrega por el órgano gestor.

3.35.- La regulación del Premio de Investigación Cultural Marqués de Lozoya está recogida en la Orden del Ministerio de Cultura de 14 de junio de 1994, sobre concursos para la concesión de premios al mérito en determinadas actividades culturales, y la Resolución de la DGBAyBC de 28 de abril de 2004, por la que se convoca el concurso correspondiente a este ejercicio. El premio pretende destacar los mejores trabajos de investigación que pongan de relieve las artes y tradiciones populares de España. Se establece un primer premio dotado con 12.020,08 euros, un segundo con 7.512,49 euros y un tercero con 4.507,43 euros.

3.36.- En la tramitación del expediente se han observado las siguientes deficiencias:

a) No hay constancia de las fechas de presentación a concurso de los premiados con el segundo y tercer premio (se han aportado fotocopias de las solicitudes de participación sin registro de entrada), por lo que no se ha podido comprobar si se presentaron en el plazo previsto en el apartado sexto.5 de la Resolución.

b) En los premios primero y segundo no consta el currículo de los concursantes que exige el punto sexto.4.c) de la Resolución.

c) En el primer premio falta el compromiso del concursante de ceder los derechos de publicación, previsto en el punto noveno.1 de la Resolución.

d) En ninguno de los tres premios consta la acreditación del cumplimiento por parte de los premiados de las obligaciones fiscales y de Seguridad Social exigido en el punto noveno.2 de la Resolución.

INFORME DE FISCALIZACIÓN DE LA DIRECCIÓN GENERAL DE BELLAS ARTES Y BIENES CULTURALES (2)

Que conste que este segundo capítulo sigue siendo la transcripción literal del Informe de fiscalización de la Dirección General de Bellas Artes y Bienes Culturales, realizado por el Tribunal de Cuentas, publicado en su web, en PDF, bien escondido, y con todos los cerrojos y candados para que no se pueda copiar y reproducir.

Y que conste que, a causa de esta sarta de ilegalidades detectadas, nadie ha sido procesado, nadie ha dimitido, nadie se ha suicidado para no afrontar su deshonor y las consecuencias penales. Aquí no ha pasado nada, esto es España.

Aquí somos tan chulos que tenemos como Ministro de Justicia a un payo con el elocuente tic nervioso de Lady Macbeth, que se frota las manos obsesivamente, como si las tuviera manchadas de sangre, y estuviera lavándolas constante y compulsivamente; y el Ministro de Economía y Hacienda aparece periódicamente con un parche en un ojo, tirando con pólvora del rey... conque imagínense como andamos el resto: no leemos los informes de gestión de los peritos, y cuando lo hacemos, actuamos como el Fiscal Anticorrupción: nos tentamos la ropa.

II: ANÁLISIS DE LA CONTRATACIÓN

2.1.- En el momento de realizar los trabajos de la fiscalización, la DGBAyBC carecía de información convenientemente agregada y ordenada de los contratos tramitados en el ejercicio fiscalizado que permitiese su clasificación según su naturaleza y procedimiento de adjudicación. Se facilitó un listado informático de los expedientes tramitados en el ejercicio 2004, elaborado por a Secretaria General, en el que figuraban contratos, subvenciones y otros tipos de gasto, identificados por la clave del expediente, compuesta por dígitos y letras (referidos los dígitos a la Unidad origen del gasto y las letras al tipo de gasto), una clasificación confusa con categorías que en unos casos se repiten y en otros se solapan. Además de la clave del expediente, el listado recoge para cada uno de ellos su denominación, el importe de adjudicación y el importe abonado en el ejercicio. Reclasificada la información para obtener datos coherentes se obtuvo el siguiente resultado (expedientes con gasto en 2004)

(euros)

Tipo de contrato	Nº de contratos	%	Importe abonado en 2004	%
Obras	62	5,6	9.780.361,49	21,8
Consultoría y asistencia	108	9,8	1.458.846,17	3,2
Servicios	263	23,9	16.195.254,23	36,1
Suministros	259	23,6	13.868.160,16	30,9
Contratos menores	381	34,5	1.722.517,76	3,8
Convenios y contratos no clasificados *	27	2,5	1.888.025,78	4,2
Total contratos	**1.100**	**100,0**	**44.913.165,59**	**100,0**

*** Por la denominación de los contratos que recogen los listados no es posible conocer de qué tipo de contratos se trata.**

2.2.- Los contratos menores suponen la categoría más destacada en cuanto al número, mientras que, por el importe, el primer lugar corresponde a los contratos de servicios, seguidos de los de suministro, de los cuales un importe de 11.351.905,88 euros (el 82%), corresponde a las adquisiciones de bienes de interés cultural. Los mencionados datos no recogen ningún tipo de información contable, por lo que no ha sido posible clasificar los contratos por su naturaleza de gastos corrientes e inversiones

2.3.- Para la fiscalización de los citados contratos se extrajo una muestra de la relación facilitada por la Secretaria General, a excepción de los relativos a la adquisición de bienes culturales (suministros) que se seleccionaron de entre los que figuraban en la Memoria de la Junta de Calificación, Valoración y Exportación de Bienes del Patrimonio Hıstórico Español. El número, importes y naturaleza de la muestra examinada son los siguientes:

(euros)

Tipo de contrato	Expdtes. exam.	Obligac. recon.
Obras	5	2.651.271,60
Suministros	19	7.882.932,93
Asistencia técnica y servicios	29	8.016.397,87
Contratos patrimoniales *	1	90.151,82

Procedimiento	Expdtes. exam.	Obligac. recon.
Procedimiento abierto: concursos	17	10.535.639,43
Procedimiento negociado	18	7.633.337,61
Contratos menores	16	178.297,65
Adquisición centralizada	3	293.479,53

Total muestra	54	18.640.754,22

***Expediente tramitado como pago "a justificar", se analiza en el apartado de Tesorería.**

2.4.- En cuanto a su naturaleza presupuestaria, los contratos examinados corresponden al siguiente detalle, representando dicha muestra el 37% del total de obligaciones reconocidas en los capítulos y programas señalados. La relación individualizada de los expedientes analizados figura en el anexo 2.

(miles de euros)

Capítulo/Programa	134.B	453.A	453.B	458.C	458.D	Total
Capítulo 2	12,0	5.931,5	93,9	253,1	6,0	6.296,5
Capítulo 6	0,00	1.245,7	0,00	2.937,5	8.161,0	12.344,2
Total muestra	**12,0**	**7.177,2**	**93,9**	**3.190,6**	**8.167,0**	**18.640,7**

2.5.- El examen de los expedientes se ha visto afectado por las dificultades para localizar toda la documentación original, puesto que no existe en la Dirección General un único expediente para cada contrato en donde figure toda su documentación original, sino varios expedientes parciales e incompletos formados por documentos originales y fotocopias. Esta situación viene originada por el sistema de tramitación que se sigue en la DGBAyBC. Las distintas Subdirecciones Generales inician los contratos de su competencia y los trasladan a la Secretaria General para incorporar la documentación contable correspondiente. La Secretaria General traslada el expediente original a la Mesa de contratación, en su caso, y a la Intervención Delegada, quedándose con duplicados (ocasionalmente también documentos originales, cuando las empresas aportan más de un original del mismo documento). El expediente original una vez fiscalizado se archiva también en la Secretaría General. En la fase de pago se compone un nuevo expediente con las facturas y documentos contables originales y con parte de la documentación que figuraba en el expediente inicial y se vuelven a duplicar los documentos al remitir el expediente a Intervención. Cuando se devuelven intervenidos se archivan también en la Secretaria General. Además, hay documentos que no figuran en los citados expedientes, sino en otros archivos distintos; por ejemplo, las valoraciones de los criterios de adjudicación establecidos en los concursos están archivadas en las oficinas de la Mesa de Contratación, y parte de la documentación de los contratistas, como las escrituras de constitución de las empresas, se guardan en ocasiones en un archivo de contratistas que lleva la Secretaria General.

2.6.- La Mesa de Contratación que intervino con carácter permanente en los contratos celebrados en 2004 con cargo a créditos de la DGBAyBC fue la establecida en la Orden del Ministerio de Educación y Cultura de 6 de febrero de 1998, modificada por Orden de

29 de abril de 1999. Hasta la Orden del Ministerio de Cultura de 21 de enero de 2005 no se crea la Mesa de Contratación permanente de dicho Ministerio. Ni en la composición de la Mesa durante 2004 ni en la Orden de 2005 reseñada se ha tenido en cuenta la modificación que introdujo el articulo 79 del Reglamento General de la Ley de Contratos de las Administraciones Públicas (RGLCAP) aprobado por Real Decreto 1098/2001, de 12 de octubre, que amplió el número de vocales de las Mesas de Contratación a cuatro. Por el contrario, la Mesa se constituyó en 2004 con tres vocales, número que sigue figurando en la Orden de 21 enero de 2005.

2.7.- Solicitadas las relaciones de contratos remitidos al Registro General de Contratos y al Tribunal de Cuentas, puesto que dichos documentos no figuraban en los correspondientes expedientes, se observó que durante 2004 y 2005 no se incluían en las mismas los contratos de suministro cuyo objeto es la adquisición de bienes culturales. El resto de los expedientes de la muestra en que resultaba procedente si habían sido incluidos en dichas relaciones

2.8.- Se expresan a continuación los resultados del examen de los contratos constitutivos de la muestra seleccionada, excepto los relativos a la adquisición de bienes culturales que se describen en el posterior subapartado. En el anexo 3 se detallan los expedientes analizados y las deficiencias que afectan a cada uno de ellos.

A) Contratos de obras, asistencia técnica, servicios y suministros

2.9.- Contratos de obras (cinco expedientes):

a) Por lo general están correctamente tramitados. Se han observado deficiencias en los documentos de los contratistas sobre cumplimiento de obligaciones tributarias y de Seguridad Social, que en dos expedientes no son válidos por estar caducados y en otro se aportaron después de la firma del contrato.

b) En ninguno de los cinco expedientes fiscalizados consta la conformidad de la Administración en las facturas.

2.10.- Contratos de asistencia técnica y servicios, tramitados por el procedimiento ordinario (15 expedientes)

a) El contrato relativo al servicio de seguridad de la nueva sede del Museo Nacional de Altamira, por importe de 56.340,12 euros, se tramitó sin cumplimentar la documentación procedente y sin ser sometido el gasto a fiscalización previa, siendo convalidado posteriormente por el Consejo de Ministros. (En las deficiencias señaladas en los apartados siguientes no se incluyen las muy numerosas que afectan a este contrato)

b) En otros dos contratos faltan los pliegos de claúsulas administrativas particulares. En uno de ellos no se establecen criterios objetivos para la selección de las ofertas.

c) En un contrato no hay constancia de la publicación de la licitación en el BOE. En seis casos no figura el certificado del Registro de Entrada sobre las empresas presentadas a la licitación. En dos casos no consta la publicación de la adjudicación.

d) En un expediente no consta el informe técnico sobre las proposiciones.

e) En un expediente no figura el contrato.

f) En seis expedientes falta documentación relativa a la capacidad o a la personalidad jurídica del contratista; el requisito de la clasificación no está acreditado en cinco casos; en el mismo número de expedientes falta la justificación del cumplimiento de las obligaciones fiscales o con la Seguridad Social.

g) En tres expedientes no figura el acuerdo de reconocimiento de la obligación y propuesta de pago ni la correspondiente fiscalización.

h) En otros tres expedientes no consta la devolución de la fianza al contratista.

2.11.- Contratos de asistencia técnica y servicios, tramitados por el procedimiento de contratos menores (14 expedientes):

a) La tramitación de los contratos menores que lleva a cabo la DGBAyBC es, por lo general, bastante más compleja que la que está prevista en el TRLCAP. Además de los documentos que exige el articulo 56 de dicho texto legal (aprobación del gasto y factura), suelen figurar en los expedientes otros como informes de insuficiencia de medios, memorias, pliegos de prescripciones técnicas, propuestas de adjudicación y adjudicación definitiva. Se deduce de ello que se utiliza esta figura con el fin primordial de adjudicar los contratos sin necesidad de concurrencia, pero sin aprovechar las facilidades que ofrece la ley para agilizar la tramitación de estos expedientes de contratación.

b) En un caso se ha utilizado indebidamente la figura del contrato menor, fraccionando en tres expedientes el objeto y el importe del contrato e incumpliendo, por tanto, el articulo 201 del TRLCAP. El objeto del contrato consistía en la realización del inventario de las campanas de las catedrales de España. En 2004 se tramitó un contrato menor, por 12.000,00 euros para la elaboración de la primera fase del inventario, que afectaba a 12 catedrales, y en 2005 y 2006 otros dos contratos por el mismo importe y con el mismo adjudicatario para la realización de las 2ª y 3ª fases, que incluían otras 12 y 14 catedrales, respectivamente.

c) Se advierte también otro caso de fraccionamiento del gasto e incumplimento del articulo 201 del TRLCAP, al tramitarse seis contratos menores con diferentes adjudicatarios para la realización de trabajos técnicos de prospección y excavación en el Museo Nacional de Arqueología Marítima de Cartagena, cada uno de ellos por importe de 11.990,00 euros, sin que se cumpla el requisito del artículo 72.4 del RGLCAP que amparase este proceder.

2.12.- Contratos de suministro, excepto adquisición de bienes culturales (nueve contratos, de los cuales tres son de adquisición centralizada y dos contratos menores):

a) En tres expedientes falta documentación relativa a la capacidad y a la personalidad del contratista.

b) En cuatro expedientes (los tres anteriores y otro más) es insuficiente la documentación acreditativa del cumplimiento de las obligaciones fiscales y con la Seguridad Social.

c) En un expediente falta el acuerdo de reconocimiento de la obligación y propuesta de pago y la correspondiente fiscalización

d) En otro no consta la devolución de la fianza

e) Por ultimo, en un expediente relativo a la adquisicion de fondos bibliográficos, no coincide el número de ejemplares que se indica en las facturas con el que figura en los certifícados de recepción correspondientes, siendo en éstos superior el número de publicaciones inventariadas (143, tras descartar varias duplicidades) respecto de las facturas (130) y no habiéndose explicado satisfactoriamente las causas de esta diferencia

2.13.- Perteneciente también al grupo anterior, un caso especial: es el expediente 1999/131200465SU, que presenta numerosas irregularidades El objeto de este contrato era el suministro e instalación de equipos y programas para la gestión de alarmas de intrusión e incendios en los museos estatales. El expediente, iniciado en 1999 y declarado de urgencia por razones de seguridad, se tramitó por el procedimiento de concurso con un precio de licitación de 273.864,96 euros y un plazo de ejecución de 9 meses. Se observan las siguientes deficiencias

a) Una de las ofertas se presenta por la empresa Utilitel Ingeniería de Seguridad, S.A., Sociedad Unipersonal, que un mes antes había cambiado dicha denominación por la de Telefónica Ingeniería de Segurdad, SA., Sociedad Unipersonal.

b) El informe técnico para la valoración de las ofertas propone la adjudicación a la empresa antes citada por haber alcanzada la mayor puntuación, fundamentalmente por tratarse de la oferta más económica, criterio que representaba el 40% de la valoración. La oferta económica de Utilitel que se consideró en dicho informe (225 742,29 euros) era un 47% más baja que la media de las otras seis empresas presentadas. Por error, en el informe técnico se consideró esta oferta sin IVA incluyendo el IVA, el porcentaje anterior queda en el 38%. Además, la empresa redujo en su oferta el plazo de ejecución del contrato a tres meses. No hay constancia de que en ningún momento los técnicos ni la Mesa de Contratación se plantearan el estudio de la viabilidad de la oferta, presentada por una sociedad unipersonal, con una baja tan destacada y que además ofrecía una reducción de dos tercios del plazo de entrega del suministro

c) El error en cuanto a la omisión del IVA en el importe de la oferta se mantuvo en la adjudicación del contrato y en su publicación en el BOE. El 9 de marzo de 2000 se firmó el contrato con el importe rectificado para incluir el IVA, estableciéndose el plazo de ejecución de tres meses a contar desde dicha fecha.

d) Según consta en el expediente, hasta finales de 2003, más de 3 años después de finalización del plazo, no se terminaron los trabajos. En un informe de la Subdirección General de Museos se hace referencia a problemas continuos que impedían dar la conformidad a los trabajos realizados y para cuya resolución se concedieron al contratista sucesivos plazos.

Esta forma de proceder es contraria a las previsiones de la normativa contractual y de las condiciones particulares suscritas, sin que se llegara a hacer uso por la Administración de la posibilidad de resolución del contrato o de la imposicion de las penalidades establecidas en el artículo 95 del TRLCAP, aunque consta una propuesta de la Asesoría de Seguridad de la Subdirección General de Museos en tal sentido.

e) El 1 de marzo de 2004 la Subdirección General de Museos certificó la recepción de los trabajos sin haber solicitado la preceptiva designación del representante de la Intervención General de la Administración del Estado (IGAE.) El 26 de marzo se solicitó dicha designación y el 12 de abril, después de que la IGAE acordase la no designación de representante, se vuelve a certificar la recepción.

f) El 19 de febrero de 2004, antes de la recepción de los trabajos, la DGBAyBC acordó la cancelacion de la fianza definitiva, pese a que el contrato establecía un plazo de garantía de un año a contar desde la recepción.

B) Adquisición de bienes de interés cultural

2.14.- El Real Decreto 1601/2004, de 2 de julio, por el que se desarrolla la estructura organıca básica del Ministerio de Cultura, atribuye a la DGBAyBC en el artículo 4.1 b) *"la propuesta de adquisición de bienes del patrimonio histórico español y de las medidas que deben adoptarse para su protección y defensa"* Los artículos 8 y 41 del Real Decreto 111/1986, de 10 de enero, atribuyen a la Junta de Calificación, Valoración y Exportación de Bienes del Patrimonio Histórico Español (JPHÈ), órgano consultivo adscrito a la DGBAyBC, la función de vaIorar los bienes que el Ministerio de Cultura proyecte adquırir con destino a Bibliotecas, Archivos y Museos de titularidad estatal cuando éstos carezcan de sus propios órganos de valoración, e informar sobre el ejercicio de los derechos de tanteo y retracto por la Administración del Estado, en los términos previstos en el citado Real Decreto. La Unidad encargada de gestionar las adquisiciones es la Subdirección General de Protección del Patrimonio Histórico. La DGBAyBC gestiona expedientes de adquısición de bienes también con cargo a presupuestos de otras entıdades y organismos (Ayuntamientos, Comunidades Autónomas, Museo Nacional del Prado, Patrimonio Nacional), a cuya gestión no alcanza la presente fiscalización.

2.15.- La delimitación objetiva de los bienes que integran el Patrimonio Histórico Español está recogida de un modo muy genérico en el articulo 1.2 de la Ley 16/1985, de 25 de junio, según el cual forman parte del mismo los inmuebles y objetos muebles de interés artístico, histórico, paleontológico, arqueológico, etnográfico, científico o técnico. También se encuentran incluidos el patrimonio documental y bibliográfico, los yacimientos y zonas arqueológicas, así como los sitios naturales, jardines y parques que tengan valor histórico, artistico o antropológico.

2.16.- En el ejercicio 2004, se siguieron en la DGBAyBC cuatro procedimientos diferentes para la adquisición onerosa de bienes culturales.

a) Las ofertas de venta directas realizadas por los propietarios de dichos bienes (particulares o entidades privadas).

b) Las ofertas de venta irrevocables previstas en el articulo 33 de la Ley de Patrimonio Histórico. Siempre que se formule una solicitud de exportación la declaración de valor hecha por el solicitante será considerada oferta de venta irrevocable en favor de la Administración del Estado que, de no autorizar dicha exportación, dispondrá de un plazo de seis meses para aceptar la oferta.

c) La adquisición en subastas en el extranjero, mediante el sıstema de puja.

d) El ejercicio de los derechos de tanteo y retracto previstos en el articulo 38 de la Ley de Patrimonio Histórico yen el 41 del Real Decreto 111/1986.

2.17.- Según la Memoria de la JPHE correspondiente a 2004, con cargo al presupuesto de dicho ejercicio se tramitaron adquisiciones por un importe total de 11.067.018,22 euros. De dicho importe, 5.921.784,70 euros corresponden a ofertas de venta directa de particulares (30 expedientes); 2.585.908 euros a ofertas de venta irrevocables (9 expedientes); 1.768.100,39 euros a subastas en el extranjero (10 expedientes); y 791.225,13 euros al ejercicio del derecho de tanteo en subastas en España (21

expedientes). De los diferentes destinos de las obras adquiridas, el Museo Nacional Centro de Arte Reina Sofia es al que corresponde el mayor importe (3.649.916,26 euros) y al Museo del Traje (inaugurado en el año 2004) el mayor número de adquisiciones (22 expedientes).

2.18.- La financiación de las adquisiciones realizadas con cargo al presupuesto de la Dirección General de Bellas Artes puede proceder de varias fuentes: los créditos ordinarios, los créditos procedentes del "1% cultural" y el producto de la tasa por exportación, según establece el articulo 30 de la Ley del Patrimonio Histórico Español. Por lo que se refiere a estos últimos, en el ejercicio 2004 no se tramitó la oportuna generación de crédito que hubiera permitido utilizar para la adquisición de bienes de interés cultural los ingresos por dicha tasa, que ascendieron a 152.718,90 euros. Los créditos para adquisiciones están presupuestados en los conceptos 620 y 621 del programa 458 D. Este último concepto recoge los fondos procedentes del "1% cultural".

2.19.- Según el listado de expedientes de gasto elaborado por la Secretaría General, en el ejercicio 2004 se tramitaron 85 expedientes de adquisición de blenes culturales, por importe total de 11.351.905,88 euros (cifra que no coincide con la que figura en la Memora de la JPHE), según el detalle que se relaciona en el anexo 4. Por conceptos presupuestarios, la distribución de los expedientes es la siguiente

Concepto	Nº de expedientes	Obligaciones reconocidas (euros)
620.08	71	5.484.665,58
621	14	5.867.240,30
Total	**85**	**11.351.905,88**

2.20.-Para efectuar el análisis de regularidad de estos contratos se seleccionó una muestra de diez expedientes tramitados en el ejercicio 2004, a partir de los datos recogidos en la Memoria de la JPHE, por ser la fuente que indica los diferentes procedimientos seguidos. Dicha Memoria ofrece datos de los expedientes en tramitación en 2004, algunos de los cuales no se corresponden con gastos realizados en dicho ejercicio. La muestra representa el 63% de las obligaciones reconocidas y responde a la siguiente distribución

Procedimiento	*Nº expdtes.*	*Importe (euros)*
Ofertas de venta directa	4	4.289.010,84
Ofertas de venta irrevocables	1	1.200.000,00
Subastas en el extranjero	2	1.250.551,97
Dº tanteo subastas en España	3	1.094.307,20
Total muestra	**10**	**7.833.870,01**

2.21.- La adquisición de bienes muebles que integran el Patrimonio Histórico Español se rige por las normas de la legislación de contratos de las Administraciones Públicas dedicadas al contrato de suministro. El artículo 182.j. del TRLCAP contiene una referencia específica a este tipo de adquisiciones, estableciendo la posibilidad de su adjudicación mediante el procedimiento negociado sin publicidad, previa valoración de la

JPHE u organismo reconocido al efecto de las Comunidades Autónomas y con destino a museos, archivos y bibliotecas. La Ley de Patrimonio Histórico y el Real Decreto 111/1986, de 10 de enero, contienen también disposiciones especificas para el ejercicio del derecho de tanteo en subastas y para la adquisición de bienes respecto de los que se ha solicitado permiso de exportación.

2.22.- En el examen de los expedientes se han observado algunas deficiencias de carácter general, que se expresan a continuación. Las deficiencias de carácter particular se detallan en los puntos 2.23 y siguientes.

a) En la DGBAyBC se tramitan dos expedientes para cada adquisición, uno por la Subdirección General de Protección del Patrimonio Histórico y otro por la Secretaría General. En el primero de ellos figuran básicamente las solicitudes de adquisición de los museos, las ofertas de venta, las gestiones realizadas con los propietarios o con las saIas de subastas, los informes de valoración de la Junta o de otras instituciones, y las propuestas y los acuerdos de adquisición. En el expediente de la Secretaría General figuran los documentos correspondientes a la formalización del expediente de contratación (acuerdo de inicio de expediente, de aprobación y compromiso del gasto, pliegos, contrato, acuerdos de reconocimiento de obligación y propuesta de pago, facturas) y la documentación contable correspondiente. A los expedientes de la Subdirección y de la Secretaria se les asigna un número diferente y se archivan separadamente en las respectivas Unidades. Ello da lugar a que ninguna Unidad de la Dirección General tenga información completa de la gestión del expediente, lo que dificulta su control. En alguno de los elementos de la muestra ha habido problemas para vincular los dos expedientes.

b) Por otra parte, dichos expedientes no se tramitan simultáneamente; la Subdirección General de Protección interviene en primer lugar, culminando su gestión con el acuerdo de adquisición dictado por el Ministro o titular del órgano en quien haya delegado, y a continuación solicita de la Secretaria General el inicio del expediente de contratación, lo que viene a significar simplemente formalizar a posteriori un acto ya firme, contraviniendo así la normativa contractual y la de gestión presupuestaria.

Comentarios a las alegaciones - Las alegaciones a este punto (pág. 15) no reflejan el contenido real de los expedientes tramitados por la Subdirección General de Protección, ya que no se limita a la propuesta de le JPHE como indican las alegaciones, sino que incluyen muchas otras gestiones que culminan con el acuerdo de adquisición en fume, lo que conlleva la aprobación implicita del correspondiente gasto sin que previamente se hayan cumplido los requerimientos legales en materia contractual y presupuestaria que son exigibles a todo tipo de gastos públicos. De acuerdo εon el procedimiento seguido por la DGBAyBC, estos requerimientos son documentados a posteriori como unα simple tarea formal, desvirtuando su naturaleza y finalidad.

c) Existe cierta confusión en las funciones que realiza la JPHE cuando interviene en estos expedientes, según lo indicado en las correspondientes actas. En ocasiones se recoge en las actas propuestas de la Junta de adquisición de bienes o acuerdos sobre el ejercicio del derecho de tanteo, cuando estas competencia están atribuidas a otros órganos. Por otra parte, no siempre se recoge en las actas la valoración de los bienes.

Comentarios a las alegaciones.- El presente Informe no se refiere a que sea confusa la regulación normativa de las funcíones de la JPHE, sino al hecho de que, según se deduce de las actas de le Junta, su actuación no se adecúa siempre fielmente a las funciones que tiene asignadas. Por otra parte, no puede aceptarse la interpretación de las alegaciones (pág 15) de que en toda propuesta de la Junta

haya de entenderse implícita una valoración de los bienes. Por el contrario, se trata de un elemento esencial en los acuerdos de la Junta que debe ser explicitado y recogido en acta.

d) En los supuestos de adquisición de bienes en subasta, los acuerdos de adquisición establecen el abono del precio del bien adquirido y de los gastos inherentes (comisión de la sala de subastas), recogiéndose la previsión de que dichos gastos serán justificados mediante certificado de la sala de subastas. En ninguno de los expedientes examinados figura dicho certificado, detallándose el importe final a abonar únicamente en la factura.

e) En los expedientes no se deja, por lo general, constancia de la acreditación de quienes firman los informes técnicos o de valoración.

2.23.- **Ofertas de venta directa**. Los expedientes examinados son los que figuran en el cuadro siguiente. Los tres primeros expedientes se tramitaron como contratos de suministro por el procedimiento previsto en el artículo 182.j) del TRLCAP y el último como contrato menor. Se han observado las siguientes deficiencias en estos expedientes:

Objeto	Destino	Aplicación presupuestaria	Importe (euros)
Dos obras de Georges Braque "Cartes et dés" y "Bouteille et fruits"	Museo Nacional Centro de Arte Reina Sofía. Madrid	621	3.520.000,00
Colección indumentaria periodo 1865 a 1980	Museo del Traje. Madrid	620.08	401.352,00
Parte del sepulcro de don Diego de Avellaneda	Museo Nacional de Escultura. Valladolid	620.08	360.607,00
Tres trajes (Chanel, Givenchy y McDonald)	Museo del Traje. Madrid	620.08	7.051,84

a) Dos obras de Georges Braque: *"Cartes et dés"* y *"Bouteille et fruits".*

• No hay en el expediente ningún informe acerca de la valoración de los bienes que se pretenden adquirir. Únicamente en la propuesta de adquisición de la JPHE se indica que el precio ofertado *"se considera justo"*.
• Los pliegos están firmados por el contratista en fecha anterior a la adjudicación y la recepción de las obras tiene fecha anterior a la firma del contrato.
• La factura remitida al Tribunal es una plantilla proforma elaborada por la DGBAyBC que no está firmada por el vendedor.

b) Colección de indumentaria, periodo 1865-1980.

• No se han observado defectos particulares de relevancia, si bien la comunicación a la Secretaría General para que se inicie el expediente de contratación carece de fecha y el certificado del Director del Museo del Traje que figuraba en el expediente, relativo al depósito e inventario de los bienes adquiridos, se referia a otro contrato, aunque posteriormente se aportó una copia del que realmente correspondia.

c) Parte del sepulcro de don Diego de Avellaneda.

• No queda acreditada la propiedad del bien que se adquiere.

• En el expediente no consta la documentación acreditativa de la capacidad del adjudicatario para contratar con la Administración.

• El objeto del suministro no está suficientemente delimitado en el contrato, que únicamente se refiere a "parte del sepulcro", sin concretar las piezas exactas que comprende.

• No consta ningún informe de valoración de la obra adquirida.

• La factura remitida al Tribunal es una plantilla proforma elaborada por la DGBAyBC que no está firmada por el adjudicatario.

d) Tres trajes (Chanel, Givenchy y McDonald).

• Los bienes se adquieren a una casa de subastas en Londres, pero no mediante subasta. Según manifiesta la Subdirección General, se trata de una oferta que la casa subastadora hizo a la DGBAyBC después de quedar desierta la subasta. En el expediente no consta oferta alguna.

• En el importe de los gastos se incluye una comisión de la casa de subastas (el 17,5% del precio acordado), que resulta anómala en una venta directa.

• Hay un contrato de adquisición firmado por el Subdirector General en fecha anterior a la orden de inicio del expediente.

• No hay ninguna valoración de los bienes que se adquieren.

2.24.- **Ofertas de venta irrevocable.** Se examinó el siguiente expediente:

Objeto	Destino	Aplicación presupuestaria	Importe (euros)
Tapiz "Visión de Ezequiel", s. XVI	Museo Nacional de Artes Decorativas	621	1.200.000,00

El expediente fue tramitado conforme a lo establecido en el artículo 33 de la Ley de Patrimonio Histórico y en el 50 del Real Decreto 111/1986. Consta la solicitud del permiso de exportación, el dictamen de la JPHE, y la Resolución de la DGBAyBC de denegación del permiso de exportación. Se han observado, no obstante, las siguientes deficiencias:

• No figura la Orden del Ministerio de Cultura mediante la que debe formalizarse la aceptación de la oferta de adquisición.

• No consta documentación acreditativa de la capacidad de los adjudicatarios para contratar con la Administración.

2.25.- **Adquisición en subastas celebradas en el extranjero**. Los expedientes examinados y las deficiencias encontradas fueron los siguientes:

Objeto	Destino	Aplicación presupuestaria	Importe (euros)
Díptico consular de marfil, con inscripción en latín	Museo Nacional de Arte Romano	620.08	1.200.983,97
Conjunto mobiliario: consola, espejo y dos sillones de madera chapada en plata	Museo de América	-	49.568,00

a) Díptico consular de marfil, con inscripción en latín.

• Los informes de valoración que figuran en el expediente son muy dispares, sin explicación alguna al respecto. En reunión del Pleno de la JPHE de 14 de junio de 2004 se acuerda la adquisición por un importe máximo de entre 1.300.000 y 1.500.000 euros. El Museo Arqueológico Nacional informa sobre el interés de la adquisición, por un precio tope de 180.000 euros. El Museo Nacional de Arte Romano de Mérida establece el importe máximo en 1.100.000 euros.

• El 24 de junio, dos días después de la subasta, el Director General autorizó la adquisición de la obra de referencia y el abono a la saIa Sotheby's de Londres del precio de remate de 680.000 libras (1.024.096,00 euros), más los gastos inherentes que debía certificar dicha sala. El importe de la adquisición excede del límite de las competencias delegadas por el Ministro a favor del Director General en materia de contratación gestión presupuestaria (601.012,10 euros).

• No consta certificado de la sala de subastas sobre el importe total de los gastos, que finalmente ascendieron a 1.200.983,97 euros, incluyendo, además del precio, el IVA de importación (84.583,80 euros) y la comisión de la saIa (92.304,17 euros).

• Hasta el 16 de septiembre no se inicia el procedimiento de contratación correspondiente, mediante acuerdo del Subsecretario por delegación del Ministro. El resto de la documentación de los expedientes (de la Subdirección General y de la Secretaria General) es relativo únicamente a la fase de pago. Sólo consta una fotocopia de la factura, de 22 de junio de 2004, la recepción de la obra en el Museo Nacional de Arte Romano de Mérida el 22 de octubre de 2004 y el ADOK contabilizado el 7 de diciembre. No consta documentación alguna relativa a la personalidad y capacidad del contratista.

• En el escrito de 24 de junio antes citado, la DGBAyBC se comprometió con la saIa de subastas a abonar el precio en el plazo de 4 meses. La demora en el pago dio lugar a la exigencia por parte de la sala de subastas de intereses por importe de 73.427,31 euros. El expediente correspondiente al abono de intereses se trata en el punto 2.27.6).

b) Conjunto mobiliario: consola, espejo y dos sillones de madera chapada en pIata, con el escudo de armas del Virrey de Río de la Plata. América del Sur. Siglo XVIII.

•Se trata de una adquisición que resultó fallida al determinarse que se trataba de una obra falsa.

•La JPHE propuso la adquisición, por un precio máximo de 180.000,00 euros, en su reunión de 2 de diciembre de 2004, el mismo dia en que tenia lugar la subasta de los bienes en una sala de Paris. En la misma fecha el representante nombrado para pujar en la subasta en nombre de la DGBAyBC comunica haber adquirido los bienes por el

precio de 40.000,00 euros. El 13 de diciembre de 2004, el Director General autoriza la adquisición y el abono a la saIa de dicha cantidad más los gastos inherentes; se acuerda asimismo el depósito de dichos bienes en el Museo de América, donde se reciben el 29 de diciembre del mismo año.

•En el Museo de América se realiza un estudio de los muebles recibidos y el 13 de abril de 2005 informa a la DGBAyBC de que los expertos consultados han coincidido en considerar las obras *"sumamente dudosas e indignas de figurar en la colección del Museo de América"*. La falsedad de los bienes adquiridos se confirma en informes posteriores de la Academia de Bellas Artes de Buenos Aires (Argentina) y de la Facultad de Geografia e Historia de la Universidad Complutense de Madrid.

•El 28 de abril de 2005, la JPHE revisa la adquisición, considera que la autenticidad de los bienes es dudosa Y propone que se devuelvan a la casa de subastas donde fueron adquiridos.

•La factura de la sala de subastas por importe de 49.568,00 euros no se llegó a abonar. Hasta febrero de 2005 la Subdirección General no remitió la documentación a la Secretaria General para que "se formalicen los oportunos expedientes de contratación", y en mayo solicitó la paralización del expediente.

•Sin embargo, la DGBAyBC tuvo que abonar los gastos correspondientes al transporte de los bienes desde París hasta el Museo de América en Madrid, y los de la devolución, que se realizó en Amsterdam. Dichos gastos ascendieron a 9.158,92 euros.

•El expediente correspondiente al traslado de las obras hasta el Museo de América, donde se depositaron en diciembre de 2004, se tramitó en el ejercicio siguiente como si se tratara de un gasto a realizar en 2005.

2.26.- **Ejercicio del derecho de tanteo en subastas celebradas en España**. El procedimiento seguido en estos casos es el establecido en el artículo 41 del Real Decreto 111/1986: una vez conocida la subasta del bien en cuya adquisición está interesada la DGBAyBC, la JPHE emite el correspondiente informe (no es preceptivo en subastas públicas) y se designa a un representante para que asista a la subasta y manifieste el propósito del Ministerio de hacer uso del derecho de tanteo en el momento en que se determine el precio de remate del bien subastado. La adjudicación del bien queda en suspenso. Se elabora la Orden ministerial por la que se acuerda ejercitar el derecho de tanteo y abonar a la saIa el precio de remate más los gastos inherentes a Ia subasta. Dicha Orden se comunica a la saIa de subastas y se publica en el BOE. Los bienes se reciben en el museo para el que estaban destinados, previa comunicación a la IGAE, en su caso, para la comprobación material de la inversión, y Ia sala emite la correspondiente factura. Los expedientes examinados, y las deficiencias encontradas se expresan a continuación:

Objeto	Destino	Aplicación presupuestaria	Importe (euros)
Fuentes blasonadas con el escudo de armas de la familia Olza y Eraso	Museo Nacional de Artes decorativas	620.08	14.227,20
20 Cartas autógrafas de Francisco de Goya	Museo Nacional del Prado	620.08	493.080,00
Documento en que se da noticia del descubrimiento de Tejas	Archivo General de Indias	-	587.000,00

a) Fuentes blasonadas con el escudo de armas de la familia Olza y Eraso.

• Aunque la subasta se celebró en diciembre de 2003 y el expediente relativo al ejercicio del derecho de tanteo se formalizó en dicho ejercicio (la Orden tiene fecha de 22 de diciembre de 2003), el expediente de gasto no se tramitó hasta el ejercicio siguiente.

Comentarios a las alegaciones.- Aunque el artículo 38.2 de le Ley 16/1985, desarrollado por el articulo 41 del Real Decreto 111/1986, autoriza el pago del precio convenido o, en su caso, el de remate, de los bienes adquiridos por este sistema *"en un periodo no superiora dos ejercicios económicos"*, no puede interpretarse ese artículo como una autorización para dilatar en el tiempo la tramitación del expedieπte de gasto, sino que se trata exclusivamente de un supuesto de aplicación del trámite especial de gastos plurianuales, regulado por el articulo 47 de la Ley 47/2003, General Presupuestaría. Por el contrarıo, la dilación del expediente de gasto supone un claro incumplimiento del principio de temporalidad de los créditos (articulo 63 del Texto Refundido de la Ley General Presupuestaría vigente en el ejercício fiscalizado, y 49 de le Ley 47/2003), así como de los principios y obligaciones relativos a la Contabilidad pública. Tampoco puede el Tribunal compartir el criterio de las alegaciones de que *"la política de recuperar bienes culurales del Patrimonio Histórico Español no puede estar supeditada a que se disponga de presupuesto con carácter inmediato"* (pág. I8). Sin necesidad de mayor argumentación, simplemente cabe señalar que tal criterio choca frontalmente con el artıculo 46 de le Ley 47/2003, General Presupuestaria, entre otros. La política cultural, como cualquier otra polítiεa, está supeditada obviamente al principio de legalidad, en cuyo marco adquiere una especial relevancia le legalidad presupuestaria.

En cuanto a las dificultades planteadas para la gestión del 1% cultural, en la Recomendación 8.2 de este lnforme se indican las actuaciones que, a juicio del Tribunal, podrían ser eficaces para su posible solución, objetivo que en ningún caso puede pasar por eludir el cumplimiento de parcela alguna del ordenamiento jurídico.

b) Veinte cartas autógrafas de Francisco de Goya.

•La Orden ministerial es de 14 de junio de 2004; la aprobación del gasto no se produce hasta el 7 de octubre.

• El acta de recepción de la adquisición comprende las 20 cartas adquiridas; sin embargo, el certificado del Director del Museo Nacional del Prado que figuraba en el expediente, de adscripción de las obras al inventario general, firmado el 20 de septiembre de 2004, sólo incluía 19 de las 20 cartas adquiridas. A petición del Tribunal de Cuentas se facilitó otro certificado que no corresponde a una carta autógrafa de Francisco de Goya, sino a una carta recibida por él. Tras las alegaciones y nuevas comprobaciones del tribunal, se ha facilitado otro certificado subsanando el error.

Comentarios a las alegaciones.- Las alegaciones a este punto (pág. 18) aseguran que solamente una de estas 20 cartas es autógrafa de Goya. Ante la incertidumbre que provocan estas discrepancias, el Tribunal ha realizado una comprobación adicional en el Museo Nacional del Prado para verificar materialmente la existencia en el museo de las 20 cartas autógrafas de Goya adquiridas mediante este expediente, habiéndose obtenido de dicha comprobación los siguientes resultados: **a)** las 20 cartas son autógrafas de Goya y están depositadas e inventariadas en el Museo Nacional del Prado (números de catálogo ODG-102 a ODG-121, ambos inclusive); **b)** el certificado del Director del Museo relativo a la carta identificada con el número de catálogo ODG-121 es erróneo, se trata de una carta autógrafa de Goya y no de una carta recibida por él (tras la verificación material por el Tribunal, se

ha entregado un nuevo certificado del Director del Museo reconociendo y subsanando el error); y c) las alegaciones a este punto obedecen evidentemente a un importante error de hecho o de transcripción.

c) Documento en que se da noticia del descubrimiento de Tejas

• Aunque la subasta se celebró en diciembre de 2004 y el expediente relativo al ejercicio del derecho de tanteo se formalizó en dicho ejercicio (la Orden tiene fecha de 22 de diciembre de 2004), el expediente de gasto no se inició hasta el ejercicio siguiente.

Comentarios a las alegaciones.- Véanse los comentarios insertados en el punto 2.26.a)

2.27.- Entre los expedientes de adquisición de bienes del patrimonio histórico comprendidos en la relación de Secretaría General, abonados con cargo al ejercicio 2004, figuran siete relativos al pago de intereses de demora por retrasos en los pagos de bienes adquiridos en el ejercicio 2003 en subastas en el extranjero, por importe de 80.588,89 euros. Este importe está incorrectamente imputado al capítulo 6 del presupuesto de gastos, ya que al tratarse de gastos financieros debían haberse aplicado al capítulo 3. La DGBAyBC asume con normalidad el abono de los intereses de demora, entendiendo que son consecuencia de la imposibilidad de conciliar las condiciones de venta de las casas de subastas con los trámites exigidos por la legislación de contratos. Por el contrario, en la fiscalización se ha comprobado que las demoras en los pagos se producen por la inadecuada y tardía tramitación de los expedientes, que no se inician hasta después de haberse adquirido los bienes, como se ha señalado en el punto 2.22. De los siete expedientes aquí señalados se han analizado dos: uno de ellos, por importe de 5.903,44 euros, corresponde a la adquisición en 2003 de un mueble colonial español para el Museo de América; y el segundo, por importe de 73.427,31 euros, corresponde a los intereses de demora derivados del expediente indicado en el punto 2.25.8) "adquisición de un diptico consular de marfil para el Museo Nacional de Arte Romano".

Comentarios a las alegaciones.- El Tribunal no puede compartir el criterio invocado en las alegaciones de que estos intereses supongan *"un incremento del precio final de la obra"* (pág. 14). Por el contrario, el único supuesto en el que se permite la contabilización de los intereses de demora como mayor precio de la adquisición, al considerarlos como un coste de financiación ajena, es el de retraso en el pago de certificaciones de obra, por las cuantías devengadas hasta la puesta en condiciones de funcionamiento de la obra y siempre que no hayan sido producidos por ineficacia en la tramitación de los oportunos expedientes (Documento 3, parágrafos 75.e y 75.f de los Principios Contables Públicos). En todos los demás casos se considerarán gastos financieros del ejercicio y, por ende, deben ser financiados con cargo al capítulo 3 del presupuesto de gastos. Si la DGBAyBC no disponía de créditos en el capítulo 3 debió tramitar las oportunas modificaciones presupuestarias al efecto.

a) Intereses de demora por retrasos en el pago de la adquisición de un mueble colonial español para el Museo de América.

• La adquisición del bien tuvo lugar en la subasta celebrada por la sala Christie's en Nueva York el 21 de mayo de 2003. La obra fue adquirida en un precio de remate de 60.000 USD más gastos inherentes, lo que supuso un total de 71.700 USD. (58.583,21 euros). El pago no se realizó hasta el 4 de febrero de 2004, más de ocho meses después de la subasta.

• El 10 de febrero de 2004 la sala de subastas presenta una liquidación de intereses calculados desde el 20 de junio de 2003 hasta el 4 de febrero de 2004, al 16% anual,

por importe de 7.197,47 USD. El Subdirector General certifica el 16 de marzo la procedencia de dicho pago *"de acuerdo con las condiciones de contratación de la sala de subastas"*, si bien en el expediente no consta documentación alguna en la que figuren dichas condiciones. Los intereses, que al cambio suponen 5.903,44 euros, se abonaron el 4 de mayo de 2004.

b) Intereses de demora por retrasos en el pago de la adquisición de un diptico consular de marfil para el Museo Nacional de Arte Romano.

• La adquisición del bien tuvo lugar en la subasta celebrada por la saIa Sotheby's en Londres el 22 de junio de 2004. La obra fue adquirida en un precio de remate de 680.000 GBP, más gastos inherentes, lo que suponía un total de 805.560 GBP. (1.200.983,97 euros). El 24 de junio de 2004 el Director General se comprometió a abonar a la saIa el precio de la compra en el plazo de cuatro meses. En contestación a este escrito, la sala comunicó sus condiciones: se aplicaria un interés del 10% sobre el precio de compra desde la fecha de la subasta hasta el 22 de octubre de 2004 (o hasta la fecha de pago, si fuera anterior a partir de ese dia el interés seria el 18%. Como se indica en el punto 2.25.8) el expediente de contratación no se inició hasta septiembre y el pago se realizó el 21 de diciembre de 2004.

• El 9 de febrero de 2005 la sala envia a la DGBAyBC la liquidación de los intereses hasta el 21 de diciembre de 2004 conforme a las condiciones señaladas, que asciende a 50.363,79 GBP, certificando el Subdirector General el 24 de mayo de 2005 la procedencia del pago de intereses por el importe señalado. En la misma fecha el Director General autorizó la apertura del expediente para el abono de dicha cantidad. No hay en el expediente documentación justificativa del pago. La única documentación contable es una retención de crédito por importe de 73.427,31 euros.

ESTA PEÑA HEMOS ELEGIDO PARA REPRESENTARNOS

** **El comercio.com. Oviedo: grabaciones de políticos asturianos a calzón quitado**

Luis Crego: "¿Nos conviene que salga el balneario?" MP3 Luis Crego: "Son éxitos para el Partido Socialista" MP3 Luis Crego: "Debemos poner la mayor cantidad de arena para que al equipo de gobierno no le salgan las cosas bien" MP3

Luis Crego: (...) Efectivamente, ese centro ahí en Poniente de peces y todo esto no salga, no salga, porque si sale y lo inaugura en abril de 2007 es una baza política para ella. Y si logra que el balneario sea un éxito de prensa y público es un éxito para ella. Son éxitos para el partido socialista. Estamos haciendo política, insisto (...) ¿Pero nos conviene a nosotros políticamente que el balneario salga, que el Muro sea una referencia nacional y que Gijón sea el culmen de la limpieza en toda Europa y nos den la escoba esta de platino? Pues evidentemente no... Poner los mayores, sin que se note porque estamos haciendo, desgraciadamente política desde la oposición, la mayor cantidad de arena en los ejes para que al equipo de gobierno no le salgan las cosas bien. Porque si al equipo de gobierno le salen las cosas bien, como si Zapatero logra el pleno empleo en dos años, nosotros no gobernamos.

Pedro Muñiz: "El fin primordial es ganar las elecciones" MP3
Pedro Muñiz: (...) La verdad es que estamos en un partido político y el fin primordial del partido político, y hay que decirlo y dejarnos de demagogias, no es el bien de Gijón. Y por el bien de Gijón, ¿les vamos a dar las cosas para que lo hagan los socialistas? No. Como decía el difunto Pepe Coalla, el fin es ganar y hay que ganar como sea (...)

Eduardo Junquera: "No puede ser lo que yo diga" MP3
Eduardo Junquera: *El mismo mérito tengo yo como responsable de Sanidad, la confianza en mí de Pilar. Como responsable de Sanidad no puedo salir a decir que estoy en contra de la radioterapia en Gijón, y estoy en contra de la radiotierapia en Gijón, y me tengo que callar, porque el Partido Popular piensa que la radioterapia tiene que estar en Gijón y yo no puedo salir por mi cuenta y decir, bueno, yo como representante*

del PP pienso que la radioterapia está mejor en Oviedo y que lo que hay que hacer es mejorar la asistencia y llevar a la gente bien (...) No puede ser lo que yo diga, sino que tiene que haber alguien que tiene que hablarlo y comentarlo. Aunque seamos del partido estamos a favor o en contra algunas veces y lo que tiene que salir es la idea del partido (...)

SIN PIZCA DE AUTOCOMPLACENCIA

En los países civilizados con un alto concepto de los derechos individuales y ciudadanos, cualquier injusticia, cualquier ataque arbitrario contra un individuo, ya sea un reo o un ciudadano libre, pone en marcha todos los mecanismos de alerta y defensa ciudadana, y tanto los individuos como las asociaciones vecinales, cívicas, los partidos políticos, los periodistas, y los medios de comunicación, denuncian el uso abusivo que hagan los gobernantes de sus atribuciones. Allí, el trabajador de la función pública, el funcionario, tiene a gala servir al Estado y a los administrandos, y jamás al Gobierno de turno. Y todos defienden la separación de poderes, base del Estado moderno.
Los ciudadanos de los países civilizados defienden los derechos para todos y cada uno de los ciudadanos, sin admitir excepciones, por puro egoísmo, por estrategia de supervivencia, y por inteligencia, porque si se consiente el trato infame contra el vecino, cualquiera puede ser la siguiente víctima de la arbitrariedad.
En España, no.
Aquí, desde los tiempos de Adán, ha sobrevivido el espíritu cainita, el denunciante anónimo, el delator, el chivato, el que se alegra del mal que le ocurra al prójimo, el que no quiere un trato justo para sus conciudadanos, y consiente con el favoritismo, la recomendación, la zancadilla, como buen lacayo tontiastuto, que a la bajeza de medrar así, llama listeza. La mayoría no quiere que haya justicia para su prójimo, porque nadie lo es: los seres serviles, tarados por el estigma de Caín, sólo tienen enemigos, y sólo desean una venganza proporcional a su ira, su frustración y su odio, que es el fango donde se revuelcan y se nutren.
Si a esto se le añaden los siglos de alienación, incultura e idiotez*****, el resultado es esta panda de trapisondistas, fulleros, patanes, incapaces, sin talla ni categoría, que fungen como dirigentes políticos, aupados por ciudadanos que no les van a la zaga.
Ya lo dijo Napoleón: *España es una chusma gobernada por otra chusma.*

Gatopardo

*** Idiota** es una palabra derivada del griego *ἰδιώτης, idiōtēs* (persona que carece de capacidad profesional, un ciudadano privado y egoísta que no se preocupaba de los asuntos públicos), de *ἴδιος, idios* (privado, uno mismo).

Gracias por compartir con nosotros la definición de idiota, ahora podré utilizar la expresión con mayor corrección (y frecuencia).

Si España era una chusma gobernada por otra chusma, supongo que México era una chusma gobernada por la chusma que fue nombrada por una chusma que gobernaba a otra chusma.

Triste ¿no?

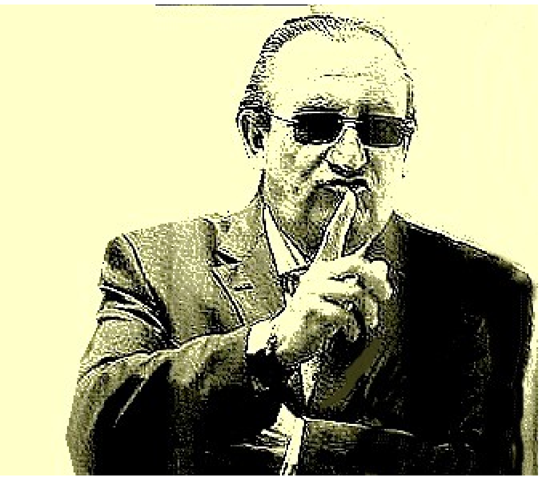
EL TALANTE DE LAS CAPATACES DEL PSOE EN RADIO NACIONAL DE ESPAÑA



No hay nada como ser una triste grisura profesional con el ego amiantado para medrar como capataz en las empresas públicas. En Radio Nacional de España y Televisión española, unos y otros gobiernos han tenido en las listas negras, haciendo pasillos, a profesionales de prestigio como mezquina represalia por no dar fervorosas muestras de adhesión al Régimen vigente.
En la actualidad, en RNE, la radio pública, se premia con un programa a quien sepa enjaretar un sarcasmo contra los agoreros que llaman "crisis" a la "desaceleración rápida del crecimiento económico", o proteste por la "crispación" que crean los partidos de la oposición, aunque estén hablando de música pop, de la dieta mediterránea o de la boda de un famosete.
Como es de rigor, se ha castigado con expediente de regulación de empleo a quienes no saben llevar el paso a toque de consigna, como Fernando Argenta, de "Clásicos

populares", un programa de música clásica, que a lo largo de 28 años ha logrado ser un éxito de audiencia, a pesar de tener el horario de 3 a 4 de la tarde en el país del *porompompero*; como han castigado con un cese fulminante a Santiago Vázquez, de "Sexta dimensión" , un programa que trataba temas de parapsicología y misterio sin concesiones a la credulidad, a la papanatería, ni al morbo, uno de los más escuchados en directo y a través de Internet entre los hispanoparlantes, a pesar de ser emitido de 3 a 5 de la mañana, en las madrugadas del fin de semana, y uno de los cien más descargados en podcast, según Apple-iTunes, para sustituirlo, a partir de setiembre, por otro dirigido por Miguel Blanco, más acorde con las tomaduras de pelo y la debida obsecuencia que auspician los nuevos jefes.
Y eso ocurre siempre que los directores de programas oponen una insobornable dignidad profesional, el éxito de audiencia, y la independencia de criterio frente a las capataces nombrados a dedo por el Gobierno de turno, que jamás han destacado, si no es por su ignoto talento profesional y sus zancadillas a los compañeros, como es el caso de Pilar Martín, nueva directora de Radio Nacional de España, o como la defensora del oyente, Elena Sánchez, una intrigante sin demasiadas luces y más blanda que un sofá.
Los que tuvimos ocasión de enfrentarnos con la Sección Femenina y la Falange, reconocemos perfectamente sus trazas en la Sección Femenina del PSOE. Y es que ser mujer no es óbice para ser una escoria, ignara, trepa y trapacera, sin honor y sin categoría.
Si bien es cierto que las nulidades de sexo masculino que han aterrizado con sillón de mandamás en los despachos de RTVE, siguiendo la escuela de los aniagueros de cortijo, tampoco les van a la zaga.
Y a las pruebas me remito.

Gatopardo

Este pais se ha convertido en una dictadura sin libertad de expresion e informaciones manipuladas.El PSOE controla TVE,RNE,cuatro,sexta,tele4,el pais,cadena ser,vocento..casi todos los medios de este pais.Y no quieren oposicion alguna.La manipulacion hemos pasado de urdaci...a privatizarla directamente. Esto es como el regimen cubano o venezolano,una verguenza.

A santiago vazquez le han echado con un email de 3 lineas,nisiquiera dan la cara.Estos comunistas reaccionarios se cargan los programas que hablan de lo transcendental,para imponer basura a la gente. Es triste,pero vivimos en una dictadura.

Fecha: 26/07/2008 18:27.

Autor: Blanquito

Podéis criticar lo que queráis y más a los presentadores de Sexta Dimensión, pero al menos para la gente que trabajamos de noche era un programa que te hacía más llevadera esta. Antes de criticar a estas dos personas, dedicar un ratito de vuestro tiempo a leer e informaros de los motivos por los cuales se retira el programa (que eso

si es digno de hablar en un programa de misterio), y decidme que os parece la forma de quitarlos de en medio de la noche a la mañana, ¿no os parece un poco vengativo?, ¿tienen algo que ocultar los directores de la cadena de radio y tienen miedo a que salga publicado?. Como estas podría hacer muchas preguntas, pero supongo que ni los que criticáis a Santiago y a Fernando me sabréis responder, y los culpables de haberlos borrado de la radio (que no de nosotros) tampoco sabrán responder, o mejor dicho no querrán dar un argumento absurdo. Así nos luce el pelo en este país, con gente brillante como esta que de un plumazo hace lo que le da la gana. Seguid así llegaremos lejos........

La razón es simple, Blanquito: hay mucha gente que defiende la libertad, incluyendo la de expresión. Peeeeero sólo defienden la suya, no la de los demás (es decir, "yo digo que eres un imbecil porque soy libre de decirlo; pero como se te ocurra insultarme te corto el cuello"; psa, es algo parecido). RNE es una cadena pública, y nadie puede obligarnos a escuchar lo que ellos quieran así porque sí. Ahora resulta que colocan a Miguel Blanco a partir del 5 de septiembre para hablar del mismo tema... Y se supone que nosotros, que para esta gente debemos ser más bobos que los borreguitos del Kukuxumusu, vamos a pasar por el aro como si nada. ¡Pues no, señores, están ustedes muy confundidos, porque somos muchos los que ya hemos eliminado de nuestra mente el sintonizar RNE! Y es que, Blanquito, los nombramientos a dedo y la imposición ya no se llevan y se pagan caros...

Fecha: 26/07/2008 19:18.

Señores: Nuestra anciana Gatopardo se ha ido a dormir con el gato Artajerjes. A partir de ahora modero yo, que soy déspota ilustrado. Suprimo todo comentario sin interés o con faltas de ortografía o redacción defectuosa. De nada

Fecha: 26/07/2008 19:46.

Autor: Almería

Me parece despreciable y completamente irrespetuosa la decisión de RNE y la forma en que han hecho las cosas (al menos con Sexta Dimensión, ya que no conozco el caso de Argenta en concreto).

Me hace gracia ver los comentarios de algunos que se la dan de intelectuales como es el caso de "Manipuladores", que no saben si no cometer faltas de ortografía y criticar de forma irrespetuosa.

A los aludidos les digo que pueden estar más de acuerdo o menos con los temas tratados en Sexta Dimensión, pero si su mente no les llega a comprender que en una RADIO PÚBLICA tiene que haber cabida para TODO... pues allá ellos.

Puede que no les guste la forma en que realizan el programa, pero de ahí a cuestionar la profesionalidad... señores... que no somos niños. Es fácil aludir al curriculum de un parapsicólogo y burlarse de él. Es un investigador de parapsicología, ¿qué esperas que tenga en su currículum... la carrera de derecho o experiencia de 6 años en dirección de empresas? Cada persona tiene un currículum en consonancia a sus intereses en laborales y personales... creo que es de ignorantes el no comprender eso.

Y por si fuera poco aluden a la web. Realmente esa web no está demasiado bien hecha que digamos pero, ¿¿¿a caso Vázquez es diseñador web???? Al menos trata de currársela él como medianamente sabe.

No tengo ningún interés en defender a los Vázquez. No los conozco fuera de la radio, pero yo he sido un oyente de Sexta Dimensión (agnóstico y escéptico en muchos casos respecto a los temas tratados en el programa)y creo que puedo hablar sobre cómo trabajan.

Es más... puede que a RNE no les gustase cómo trabajan y decidiesen quitar el programa, pero hacerlo de esa manera, de un día para otro, sin dejar ni si quiera un programa para despedirse de la audiencia... es una enorme falta de respeto a la audiencia. Nada de talante. Y lo digo yo, votante del PSOE y fiel oyente de RNE.

Respecto a la poca dignidad de los Vázquez por pedir que se enviásen e-mails, no encuentro nada de malo en esa petición... a lo mejor es que ellos si tienen sangre en las venas. A lo mejor es que el trato con la audiencia era tan personal como para poder permitirse esa petición...

Por favor, antes de criticar, piensen bien lo que dicen, informense y sobre todo... no falten el respeto, que es lo más grave que se puede hacer y donde más bajo se puede caer.

Un saludo.

Veo que hay gente por ahí que están muy enfadados y no podían dormir porque les molestaba mucho un programa de radio. ¿no será que se ocupan poco de otras cosas mas importantes?

Fecha: 26/07/2008 21:21.

Autor: David

¿Porqué tengo que pagar una radio que no la escucha nadie? Que la eliminen, que no la quiero pagar. Lo de los hermanos Vazquez, con su ingenuidad, entretenía mis noches de insomnio. Después de la muerte del gran Juan Antonio Cebrián, los hermanos Vázquez nos entretenían con sus cuentos. El que no sepa distinguir fábula y realidad -el tal "malipuladores"- merece el infierno de los imbéciles.

Fecha: 26/07/2008 22:01.

Autor: Javier

Que fácil es criticar a la gente. Al margen de lo ocurrido con el programa, los Vazquez no dejan de ser profesionales de la radio. Tienen su estilo y su forma de hacer radio. Al que no le guste que cambie de dial. A otros les gusta, les encanta y les apasiona.

Criticar es fácil, aportar algo constructivo, eso muchos no lo sabeis hacer.

Fecha: 26/07/2008 23:22.

Autor: Aurora

RTVE ha eliminado de su plantilla a 4.150 trabajadores mediante un expediente de regulación de empleo -prejubilación forzosa- que abarca a los profesionales que han cumplido 52 años, a los que deja en la calle con su experiencia, profesionalidad, trayectoria, y a cambio, les pagan el 72% del salario bruto hasta su jubilación efectiva y continúa pagando la cotización a la seguridad social hasta los 65 años para que no tenga merma. Y prescindir de más de cuatro mil profesionales pagándoles mensualmente por no trabajar, cotizando por ellos, con cargo a los presupiuestos generales del Estado, que financia la Radio y la televisión pública, para eliminar en plena madurez, en el cénit de su experiencia profesional a Fernando Argenta, Beatriz Pecker,Ignacio Salas, Andrés Aberasturi, Antonio Gasset, Paco Montesdeoca, Rosa María Calaf, Paco Maldonado, Pedro Erquicia, etc
Y, al mismo tiempo, se ha ofertado más de 800 plazas de empleo público para RTVE.
Eso no lo podrían hacer los administradores de una empresa privada sin que acabaran en el frenopático o en la cárcel por despilfarrar así.
Y todo porque los pseudo becarios y los contratados nuevos, que nos han adobado la radio pública con su falta de gracia, similar a su profusión de risas destempladas ante el micrófono, a ver si nadie nos damos cuenta de que el guión es de puro malo inexistente, son infinitamente más dóciles y más cómodos, y más enchufados que los auténticos profesionales.
Y esto se hace con nuestros impuestos, en época de crisis, cuando se debería ajustar el gasto público.

Puediera gustar a todo el mundo o no, lo que no admito es que nadie diga que Santiago Vázquez no ha sido correctísimo asumiendo que hayan quitado el programa. Estaría bueno que en un país democrático alguien no tuviera derecho a réplica como en las repúblicas bananeras.
Los que no tienen justificación son los que ni siquieran le han permitido continuar hasta el 1 de septiembre. ¿Qué es lo que temían de dos personas tan educadísimas como los hermanos Vázquez? La libertad de expresión, éso es lo que no querían. Está claro, aquí, cuando menos te lo esperas, vuelven los zarpazos de la censura, bien enguantados por un partido o por otro, o simplemente, por soberbia.
Y, por cierto, el programa era muy entretenido, y no había motivos de peso - porque no somos niños a quien nadie nos tenga que proteger de creer en fantasmas sino que, como decía Santiago luego cada uno de los oyentes nos formamos nuestra opinión - como para que prematuramente le hayan dado la puntilla. Y tenían secciones interesantísimas sobre temas históricos - Titanic,Machu Pichu,John Lennon, etc.-, o la llamada "Senderos de la humanidad", o los relatos de misterio, etc.
¿Por qué no quitan los toros de la tele pública que éso sí que a muchas personas nos desagrada?
Saludos a todos.

Autor: ex-oyente

Hola a todos.

Yo hace un año era seguidora de Sexta Dimensión y estuve presente la primera vez que querían quitar el programa. De hecho me movilicé muchísimo para que toda la gente que yo conocía enviaran e-mails a RNE por la continuidad de Sexta Dimensión. Entre la ayuda de todos, los e-mails de los oyentes, la colaboración y ayuda de otros profesionales y el trabajo de los hermanos Vázquez, entre todos, de alguna manera u otra, conseguimos que continuara el programa. RNE no sólo les dió otra oportunidad sino que además les regalaron 3 horas más de emisión a la semana. Pero sinceramente, amigos, NO HAN SABIDO APROVECHARLAS !!

Yo era muy seguidora pero cada vez me aburría más el programa y lo que es peor. ME OFENDIERON, con comentarios como que según la "casuística", el suicida lo pasa muy mal en el más allá. Pero señores...¿qué ocurre con la gente que lamentablemente hemos perdido algún familiar en esas circunstancias?. Creo que hay que tener mucho cuidado con lo que se dice porque basarse en la "casuística" de algo que aún no está demostrado científicamente; "las psicofonías", no es muy serio que digamos. Creo que el misterio es un tema muy interesante de tratar siempre que se haga de forma objetiva y sin caer en el sensacionalismo. Misterio no son espíritus, fantasmas, psicofonías, más allá,etc, no. Misterio lo es todo. Hay misterios en la Historia, en la Ciencia, en la Psicología, etc... Llegaba un momento que me cansaba, que sintonizaba Sexta Dimensión y... OTRO MONOGRÁFICO DE PSICOFONÍAS !!!!, de ahí no salían...

Y respecto a la decisión de RNE pues...qué queréis que os diga, que ha sido en MI OPINIÓN, la decisión más acertada. Habrá gustos para todo y opiniones a favor y en contra, yo lo respeto como así deseo que respetéis la mía.

Si realmente el programa fuese tan bueno como ellos mismos aseguran, no creo que RNE arriesgue tanto en eliminar ese producto y aún más sabiendo que el director de programación se está jugando su puesto y reputación. Si el programa tiene tantos "miles y miles" de oyentes, no se podría ser tan ignorante como para llevar a cabo ésta decisión. Así que creo que la decisión ha sido la correcta y hay que refrescar la programación.

Y tampoco es de muy profesional, aunque sí que está en su derecho de hacerlo, dejar "caer" en su propio programa que el director de programación lleva poco tiempo trabajando ahí, vamos, que era un "novato", o al menos eso fue lo que me dió a entender.

Quién puede consentir tener en una emisora trabajando a un locutor que, a la mínima de cambio, dediquen más de 30 minutos de su programa en criticar la decisión de un director.
Si yo tuviera una emisora no ficharía a una persona que reaccione así ante la baja de un programa. Hay que ser más caballero y digerir mejor las derrotas.

Si lo que quería era que no le quitaran el programa...creo que la opción que eligieron de criticar la decisión de su superior no era la más adecuada, pero en fin, que criticais a RNE por ésta decisión que han tomado, pero olvidais que ya se le dieron una oportunidad que no han sabido aprovechar.

Saludos.

Misteriosamente, la mayoría de los que escribieron aquí descalificando a Santiago y Fernando Vázquez, y al programa "Sexta dimensión" utilizaron enmascarar su IP y pusieron direcciones e.mail falsas.
Los que hemos escrito a los responsables de RTVE para pedir que continúe el programa lo hemos hecho con nuestro nombre, dos apellidos, dirección, DNI, etc. Y nos hemos arriesgado a entrar en las listas negras que manejan con soltura en esa Casa.
Aquí sólo exigimos una dirección e.mail válida.
Ni para eso encuentran valor estos sicarios.

Fecha: 27/07/2008 06:15.

Autor: ex-oyente

Moderador de comentarios: ¿qué quieres decir con "descalificando"?. Lo que hay que hacer es TOLERAR las opiniones de todos los que respetuosamente opinamos acerca de una cuestión; en éste caso se trata sobre la decisión de RNE.

Yo también escribí a RNE exponiendo mis datos, nombre, apellidos, DNI, etc.., pero no para que continúe Sexta Dimensión, sino para agradecerles ésta decisión. ESTOY EN MI DERECHO!! como todos los que no apoyais la decisión.

Y ojo que no estoy descalificando a nadie, estoy dando MI OPINIÓN totalmente desde el respeto.

No sé a qué te refieres con emails falsos, no sé en qué te basarás para decir que son falsos. Y eso de "enmascarar" IP no lo dirás por mi, yo sólo me limito a rellenar el

formulario que tenéis aquí para poder escribir.

Te quejas de que la gente entra escribiendo anónimamente. No sé qué querrás que ponga, mi DNI, número de teléfono y la dirección de mi casa...lo que faltaba ya, poner todos esos datos en un sitio público !!!! para que todo el mundo lo vea !!!

Si quieres que la gente aquí dejen de escribir desde el anonimato, tú que eres el responsable de moderar los comentarios, aplica esa opción en la que tengamos que poner nuestros nombres y apellidos o lo que quieras. Si no lo haces, seguimos estando en el derecho de poner el nombre que queramos.

Saludos.

PD: aquí el que ha faltado al respeto e insultado has difo tú llamándonos "sicarios", que te escribo lo que significa por si no lo sabes.

Sicario: asesino asueldo.

Y ahora no me publiques el comentario con tanta libertad de expresión que promulgais.

Fecha: 27/07/2008 06:40.

Autor: Moderador de comentarios a ex-oyente

Si hubiera leído con atención habría sabido que los comentarista que pusieron direcciones e.mail falsas han sido eliminados, pero han sido nombrados con el nick que utilizaron.
Puesto que no es su caso, no se sienta aludida, por favor.
Y no deje la medicación bajo ningún concepto o seguirá percibiendo ataques.
Y no "promulgamos" la libertad de expresión (mire usted también esa palabra en el DRAE), sólo denunciamos tácticas sucias, mafiosas, y prevaricadoras de quienes están cobrando de los presupuestos generales del Estado como responsables y directivos en RTVE.
PD.
Por educación, no solemos tutear a los lectores que no conocemos personalmente y forman parte de nuestras amistades: le ruego que no nos tutee sin pedirnos permiso.
Gracias

Por supuesto, "Sexta Dimensión" podría gustar, o no, decepcionar a unos que les gustaba, o entretener y gustar mucho a otros como yo que habíamos conocido el programa esta temporada; pero una cosa está clara: la envidia (a juzgar por las a veces maneras mezquinas de desacreditar el trabajo de los demás) es el deporte nacional.
Saludos a todos.

Fecha: 27/07/2008 07:02.

Autor: ex-oyente

Moderador de comentarios:

yo te seguiré tuteando las veces que yo quiera hasta que tú dejes de insultarme. ¿Es fácil insultar en el anonimato verdad? ;)

Pues no creas, por lo visto hay leyes que amparan a la gente que las insultan por un medio digital como es éste.

Saludos y encantada.

No sé; a mi me da la impresión de que estamos desviando el tema. Pienso que lo que debemos valorar es la actitud que un medio tan importante como RNE ha mantenido con unos profesionales tan destacados como los Vázquez, gente que ha trabajado pasito a pasito para tener un programa de 4 horas semanales que mucha gente escuchábamos y que la emisora, por el antojo de alguien que desconoce totalmente su oficio y el cargo

que ocupa, ha decidido omitir sin tener en cuenta los índices de audiencia que presentaba... Y todo siendo una emisora pública. Y encima, también lo han hecho con Argenta y, según nos cuenta el moderador, la cosa no va a acabar así... Lo considero descabellado. Es como si yo ahora estuviera al frente de RTVE y decidiera que a partir del 8 de agosto no se emitiera ningún evento deportivo (a mi jamás me han gustado las Olimpiadas). Hay muchos canales, y muchos diales; basta con elegir lo que nos gusta.

Autor: Ana

Volvemos a los descalificativos y a la censura, ¿no os estais quejando de que es una injunticia y una censura lo que han hecho con sexta dimension? y que estais haciendo vosotros?????? pues lo mismo, a todo el mundo no les gusta el programa y no les parece bien lo que estos señores estan haciendo, y si no lo sabeis aceptar estais haciendo lo mismo que estais criticando, solo que aqui no se filtran los mensajes como en todos lo de mas que es referente a sexta dimension. si no os gusta oir opiniones que nos no las misma que las vuestras no hagais esto, porque ahora solo somo nosotros, pero somos mucho, miles y miles los que han celebrado que quiten el programa al igual que vosotros llorais la perdida. La verdad no es absoluta y la vuestra mucho menos.

Fecha: 27/07/2008 08:01.

Autor: Gemma

Mira, Ana: incido en el ejemplo que escribí. Siendo una emisora pública, la imposición y el cese irracional no sólo de Sexta Dimensión, sino de cualquier otro programa, está de más. Totalmente fuera de lugar. Esa es la diferencia y ahí es dónde radica el malhacer de quienes lo han eliminado. Personalmente, creo que todo esto supone un paso atrás en la libertad de expresión y de elección. Jamás me alegraría de algo así aunque detestara las ciencias ocultas. Más bien me preocuparía.

Fecha: 27/07/2008 08:07.

Autor: Ana

Pero que libertad de expresion??? la libertad de expresion no implica el insulto ni la descalificacion cosa que ha hecho santiago con su jefe, y por eso, la direccion esta en todo el derecho de eliminar el programa de la parrilla e incluso la suspension de sueldo por lo que no podria cobrar el paro. Y si no os lo creeis leed cualquier contrato de trabajo que tengais que eso es una de las normas. Si te metes con tu jefe te atienes a las consecuencia, hay muchas formas de decir las cosas, pero esas no son las mejores, se la han jugado y han perdido. Y encima se toman la libertad de insultar y descalificar el trabajo de este señor, suerte tienen si no los denuncian, tal y como querian hacer ellos con los seguidores que protestanron cuando dijeron en directo "el enemigo esta en los foros". Tanto quejarse para hacer lo mismo.

Fecha: 27/07/2008 08:18.

Autor: Gemma

Ana: te confundes. Ni Santiago se ha metido con los jefes de RNE y ni la dirección de ningún medio público tiene derecho alguno a eliminar un programa que cuenta con una audiencia tan considerable. ¿Sabes qué ocurre? Que la envidia es malísima, Ana. ¿Me quieres explicar por qué el jefe de programación,el señor Moreno, argumenta su decisión con que quiere dar aires nuevos a la programación de RNE y se anuncia a bombo y platillo que el 5 de septiembre comienza otro programa a cargo de Miguel Blanco, programa que habla de los mismos temas que Sexta Dimensión? Se han reido de los oyentes y de todos los que precisamente respetamos lo que no nos gusta. Ha costado mucho tiempo llegar a la situación en la que vivimos, y todo peligra porque cuatro señores, que no entienden cómo funciona el medio, se sientan en un sillón y, simplemente utilizando su dedo pulgar, "dirigen" y deciden a quién perdonan la vida y a quién se la quita. Ya no se trata de una queja; va más alla, nunca mejor dicho.

Fecha: 27/07/2008 08:27.

Autor: Ana

decir que es un amargado creo que es un insulto, decir que lleva unos dias y no sabe hacer ese trebajo, eso se considera insuto, y envidia para nada, Miguel, lleva muchisimos años trabajando y no creo que sea decision de el, sino que la direccion ha visto que es mejor y lo han cambiado, no os confundais, los enemigos no son tales. no sabeis ni la mitad de la historia

Fecha: 27/07/2008 08:34.

Autor: Gemma

Ese es el problema, Ana, que sabemos demasiado y el señor Blanco y quien le dirige sabe muy poquito. Verás: me interesa la Parapsicología desde que tenía 12 años y tengo 40, y te puedo asegurar que el nombre de Miguel Blanco no me es familiar en este mundo; quizás para otros sí. Sin embargo, sí reconozco como profesionales a Antonio José Alés, al profesor Germán de Argumosa, al Dr. Jiménez del Oso, a los hermanos Vázquez ... y como no a Iker Jiménez. Y sí, Ana, la envidia es malísima. Es muy complicado aceptar el éxito de lo demás cuando se pretende llegar a lo más alto y lo único que se hace es tropezar. Te puedo asegurar que conozco más de la mitad de la historia.

Doña Ana: en esta bitácora se admiten comentarios y colaboraciones, con seudónimo y sin seudónimo, siempre y cuando remitan con una dirección e.mail válida, y respeten la inteligencia de los lectores y la ortografía.
Que don Santiago Vázquez solicitase de los oyentes, que no estuviéramos de acuerdo en que eliminaran su programa en setiembre, que escribiéramos cartas a los nuevos directivos para que lo reconsideraran, no es insultante más que para quienes se comportan como señoritos con sus lacayos.
Y, por otra parte, como usted no aporta nada que no sea una delirante percepción de lo que significa un contrato de trabajo, con absoluta aceptación de lo que los señoritos quieran mandar, y eso en la legislación vigente no se corresponde con la realidad, y, además, escribe usted con faltas de ortografía, le voy a rogar que deje de escribir aquí. Porque no media contrato alguno entre usted y nosotros, y para escribir en este espacio, como para hablar en casa ajena, hay que asumir las leyes de la hospitalidad y no comportarse como patanes.
Gracias de antemano por no volver.

El programa no era malo por lo que no es lógico eliminarlo directamente sin tiempo a buscar otras soluciones, además en este caso era muy descargado, método no valorado a la hora de medir la audiencia de un programa de radio.
Los hermanos Vázquez aunque tienen un modo personal de hacer las cosas por lo que siempre habrá gente que les guste y a otras que no, pero en este caso la voz de la mayoría no ha contado a la hora de mantener un programa de radio. En una radio pública no debería pasar esto, deberían estar claras sus intenciones y hacer las cosas como seria justo. Si RTVE quiere cambiar contenidos a raíz de una reestructuración de la dirección pues adelante, sin dar oportunidades, sin escuchar, pero dando ejemplo de lo que representa, cosa que no ha hecho.
La gente que trabajamos a esas horas agradecemos ese tipo de programas que hablando de temas que te mantienen atento a la radio, sin discusiones, sin exponer puntos de vista y con respeto a lo que se dice, hacen más llevadero el trabajar tan tarde.
Yo volví a escuchar radio por este tipo de contenidos, harto de música, de oír problemas de otras personas, tanto fútbol y otros programas varios que tampoco aportan nada. Pero con programas como la Rosa de los Vientos, Milenio 3 y Sexta Dimensión se ha apuesta por otro tipo de contenidos. Sinceramente yo seguiré
escuchando este tipo de programas mas que nada porque me entretienen mas que por que crea lo que digan.
No creo que se faltara el respetó a nadie en el ultimo programa de Sexta Dimensión, pero aceleraron su salida, las criticas son tomadas la mayoría de las veces mal.

Bueno entonces es un malententendido, si no tengo problema, lo había escrito con buena intención, por eso no entendía la censura.Lo reenvío con otra dirección.

"Hola, personalmente conozco a dos de los nicks que habéis censurado y comprendo sus

motivos perfectamente. No escribo por orden de ellos, sino por intereses comunes.

Estoy de acuerdo con vosotros en que las formas no son las correctas, aunque personalmente creo que la decisión sí lo es. Y creo que también estaréis conmigo en que tampoco son correctas las de los presentadores del programa, que cayeron en el error del agravio hacia un superior. Se puede defender cualquier cosa y luchar por lo que es tuyo siempre y cuando no se falte al respeto a los demás, porque a partir de ahí tu credibilidad pasa a ser nula, pienso que ahí han errado los hermanos en cuestión.

Mi opinión personal, y sin desear mal ajeno, es que el programa estaba un poco desfasado respecto a los tiempos que corren.
Si buscamos entre los programas podemos ver cómo con una gran dosis de dogmatismo los presentadores afirman que el alma del suicida está eternamente condenada a sufrir el acto que acabó con su vida en cuestión, y que personas que no como muchos de nosotros -que pasamos por alto esta información y no le damos la menor importancia- crean a pies juntillas lo que dicen y se pasen las noches rezando rosarios y poniendo velas porque el pobre de su hermano, padre, primo que por asunto de la vida y en un momento determinado quiso quitarse la vida, me parece, sin acritud, digno de toda nuestra reprobación.

Y si seguimos enumerando, podemos oír como estos señores hablan de que los niños del tercer mundo están en dicha situación por una "mala acción" que en vidas anteriores tuvo su espíritu - vaya hombre, pasto de almas nos lo tuvieron que poner, que no se salga ninguna del redil o penará con la eternidad-.

Por favor, si queríamos seriedad en los medios públicos no teníamos peor opción, quitémosles las carta, la bola a un vidente, o las hierbas a un chamán, y tendremos el mismo producto- y eso que profesan los sujetos en cuestión aborrecimiento de este tipo de personas-.

En fin, es una opinión más, que espero que respetéis y no censuréis- ahí se verá la libertad de expresión tan proclamada por muchos comentarios -, como yo hago con los seguidores del programa. Seguid luchando por aquello en lo que creéis, que no os lo quite nadie. Eso sí, muchos de aquí, entre los que me encuentro, no moveremos un sólo dedo.

¡Un saludo! "

Autor: El Pendón Volteriano ,de la redacción deD Gatopardo, a Espíritu Crítico

Estimado caballero:

Las dos anécdotas a las que alude (suicidas y niños del Tercer Mundo):
-En lo referente a los niños del Tercer Mundo y la expiación, etc. etc. creo recordar que el Sr. Santiago Vázquez explicó qué entendían los creyentes en la reencarnación sobre esto, no él. En cualquier caso, es un desatino como la idea de el pecado original y no andamos
descabezando Papas (por más que haya yo insistido sobre su conveniencia).
-Desconozco si los suicidas (condenados al infierno por la Iglesia Católica) tienen spleen o surmenage cuando pasan al estado gaseoso, pero, de lo oído en el programa, infiero que dan mucho el peñazo en su fase carnal. Que las familias recen y den palmas con las orejas a gusto de todos. Amén
-En Gatopardo, no se está discutiendo la validez del contenido doctrinal de los programas de Sexta Dimensión, sino las formas de ejercer un poder y el derecho ciudadano de oponerse a él. En este caso el poder de la censura.
Si hubiera que aquilatar la libertad de expresión por las tonterías que se dicen, los consejos de ministros, desde que yo recuerde, habrían quedado condenados al eterno ostracismo. Dixi (y Pixi, que dijo la inefable Carmen Calvo)

Mi más sincero apoyo a los hermanos Vázquez por la injusta supresión del programa sexta dimensión, estoy verdaderamente indignado por el modo de proceder de los directivos de RNE, no son maneras y me parece un auténtico insulto a nosostros los oyentes.
Mucho ánimo a los 2 Vázquez y no os preocupéis, a buen seguro volveremos a escucharos en otra emisora que sepa valorar a 2 excelentes profesionales

Fecha: 28/07/2008 05:18.

No voy a valorar el tema del Expediente de Regulación de Empleo de Fernando Argenta; se va un profesional como la copa de un pino, y ese hueco es irremplazable. No sé si se va de buena gana, o le han "empujado" a hacerlo. Él lo sabrá y si no lo ha querido contar será por algo.
Pero no compremos los casos con el de Sexta Dimensión; un progrma de un contratado, que no se le renueva el contrato, por muchas descargas que tenga en internet. ¿Como entró en RNE? Que piensa, que una vez dentro, se iba a quedar de por vida. A este Santiago Vazquez no le renuevanel contrato y punto. Y como premio, lanza a los oyebtes contra los directivos de RNE, y empieza a ladrar en directo y decir toda unaserie de incongruencia e imbecilidades. Curioso tipejo

Señora:
La broma de la incompetencia de RTVE ha costado al estado 8.000 millones de euros.
El resultado a día de hoy es la radio y la televisión pública más hortera de Europa.
Los directivos de RNE, a falta de otra cosa que sepan hacer, que aguanten protestas de oyentes. Va en el sueldo.

Fecha: 28/07/2008 08:05.

Autor: BONISEGNA

El argumento de Benigno Moreno,nuevo jefe de programación de RNE fué que queria dar otra orientación a la programación de madrugada del sábado.Resulta que esa orientación consiste en colocar al "palmero" Miguel Blanco(remember gomaespuma) en el mismo horario.Supongo que el haber trabajado para el grupo prisa habrá tenido algo que ver.
Dicho esto,estoy hasta los HUEVOS, de que pseudoprogres y demás intelectuales de este país me hablen de la derecha, del PP ,de Franco del recorte de libertades y de tanta tontería,rojillos de boquita y comunistas de lencería fina.Porque una cosa es que el "borinot" de Jimenez Losantos se dedique a dar discursos nacionalsocialistas en una

cadena privada y otra muy distinta es que el GOBIERNO DEL PSE (que se quiten de una vez por todas la O) con dinero del presupuesto de la NACIÓN imponga su CENSURA.
Quisiera que el director de RTVE diera una explicación del porque después de tantas décadas a vuelto la censura a la radio pública.
Este es el mismo pollo que se ha cargado a Fernando Argenta (28 años de clásicos populares) que quizás haga el mejor programa infantil de divulgación y entretenimiento de la historia de RTVE , el conciertazo
En fin,VUELVE LA CENSURA,PERO CON TALANTE,ESO SI,TALANTE DE CACIQUE

"Nunca enterrador alguno conoció tan alto honor: Dar sepultura a quien era sepulturero mayor".
El censor censurado. Que ironía.
Si, claro que la censura ha llegado a RNE, pero hace ya muchos meses y por parte del programa sexta dimensión.
¿Porqué no hablan de los cientos de oyentes a los que nos ha puesto la mordaza?,han oido acaso algun mensaje que lean en su programa que no sea, "sois la leche", "que buenos sois", "os admiramos muchísimo", etc,etc,porque haberlos, hailos.Ya últimamente ni siquiera en su lista de correo,den un paseo por allí a ver que leen, y ¿porque no hablan de los foros de misterio a los que amenazaron con ir al juzgado y les obligaron a quitar todos los comentarios sobre el programa porque según ellos manchábamos su imagen?.
Les han dado a probar su propia medicina, y como eso jode se han puesto enfermos de la rabia.

Creo que hay gente que no se ha dado cuenta de que el ultimo programa que fue emitido no es donde se critica la decisión de la directiva del cierre, este programa en cuestión fue colgado en el podcast del programa y que no pertenece a RNE es propiedad de los hermanos Vazquez. Se nota que los comentarios de algunos, se basan en las suposiciones, y realmente creo que no han escuchado el programa y lo han entendido. Y si cesan este programa, por que a algunos no le gusta, que quiten todos los programas de futbol y tertulias de periodistas poco profesionales que solo saben poner verde al gobierno y a todo el que se pone por delante, ¿es que eso no es morder la mano que te da de comer?. Cuante hipocresía barata.

Autor: Gatopardo

Mi artículo de algo más de medio folio comenta las represalias que sufren los profesionales de TV y RNE (RTVE) bajo todos los gobiernos: y sólo a modo de ejemplo he hablado de dos casos paradigmáticos, uno, el de Santiago Vázquez, que es, a todas luces, un caso de extinción de contrato sin atenerse a derecho (ni Civil, ni Mercantil,ni Laboral), y el otro ejemplo, el de Argenta, como otros cuatro mil ciento cincuenta profesionales, a los que cesan mediante un expediente de regulación de empleo o prejubilación, que no pasaría del intento si hubiera mecanismos de control jurídico y sindicatos que funcionasen, en vez de chupar del bote.
La mayoría de los lectores de este breve artículo, de algo mas de medio folio, repito, afectados por algún problema grave de atención, retención, y comprensión han decidido optar por retener un párrafo en su memoria, e ignorar que existen requisitos y protocolos legales para despedir a los trabajadores contratados o en plantilla, (hablamos de 4.150 despidos)y opinar si les cae bien y les gusta el programa, que qué barbaridad; y si no les gusta, que muy bien hecho, y que se jodan .
Como ya se lo he vuelto a explicar como para párvulos, a ver si lo pillan, ahora ya sólo queda que en vez de agarrarse como lapas a los dos ejemplos que he puesto, vayan a pedir hora a la Virgen de Lourdes o al neurólogo, porque como les funcione así el cerebro para todo, van aviados.
Y ya no malgasto más energía. Los comentarios que sigan dando vueltas a la noria, sin aportar nada, los borraré a no ser que me den la dirección de su casa para que yo vaya a engorrinarles la tapia con imbecilidades.
He dicho.

Es triste que España que pareciera que ya a avanzado en la libertad, se mire desde un punto totalmente contrario a lo que predica. La libertad no únicamente concierne a la mayoría sino a todos, pareciera que callar un programa como sexta dimensión es callar una voz de libertad. No importa que no compartas intereses, a muchos no les gusta la política y les parece una porquería, sin embargo los programas donde se habla de política existen y se les permite. Cuanto más van a esperar para que sus derechos sean respetados, lo que pasa es que muchos esperan prensarse el dedo con la puerta para pegar el grito, la censura que ustedes tienen como la que se vio en esta ocasión tarde o temprano les va a cerrar la puerta en el dedito, y allí si van a gritar.
Un saludo desde Centroamérica.

Lo de "Sexta Dimensión" es una vuelta más a la misma tuerca de siempre. No deja de ser irónico que después de que una mayoría nos quejemos diariamente de "nuestras penosas condiciones laborales" no le demos importancia a este hecho que pasa por delante de nuestras narices. Como penitencia, la verdad, espacio en blanco, me parece

poco. No creo que se trate de un problema de izquierda o derecha ya que, desde hace un tiempo, estas son la misma hez con diferente olor.

Está claro, aquí los "triunfitos" y toda esa "bazofia" tiene patente de corso, pero un programa de temas parapsicológicos no, a pesar de que, digan lo que digan algunos "psoeotas" que comentan por ahí arriba, tenian una buena audiencia y el programa era serio, como lo es también "La Rosa de Los Vientos" del fallecido Juan Antonio Cebrian, programa que, también durante una temporada, y aun siendo el mas escuchado de la madrugada, no fué renovado, solo que, en este caso, era en una emisora privada.

Soy agnóstico, pero eso no quita que haya muchas cosas que, al menos de momento, son incomprensibles, y para eso está la parapsicologia. Por otra parte, como oyente del programa, nunca he escuchado a los hermanos Vazquez faltar o meterse con nadie.

Esto es otra cacicada mas de unos dirigentes como los que tenemos, que son unos autentico mendrugos y unos ceporros, empezando por el propio presidente del gobierno, sr. Rodriguez ZotePufo, que además de tonto es un fullero de marca mayor.

Seguro que si es un programa en el que interviene el Zerolo, ya puede este decir lo que quiera, meterse con quien quiera y tener todo el mal gusto que quiera, que no solo no se lo quitan, sinó que, además, le "engordan" la audiencia.

Ramsés.

Veo que desde el último correo han pasado ya tres meses. Bien, como parece mentira lo difícil que es comunicarles a los "profesionales" Vázquez algo que no sea para lamerles el culo, solo y exclusivamente escrito esto para quedarme tranquilo.
Les he escrito aproximadamente unos diez correos donde, sin usar palabras soeces, les dije claramente lo que pensaba del trabajo que estaban haciendo. IMPOSIBLE. Cuando algo de lo comentado no les va, se escusan diciendo que no contestan porque no tienen tiempo, pero a los lamedores de ano de su talante si que les contestan.. bueno, creo que a los unicos que les responden. En el caso de contestar algun correo que pueda disentir con algo de lo que estos dos van divulgando por las ondas, es únicamente para escusarse.. Jamás les he oído aceptar un consejo, por muy bueno que fuese, pensando que somos una manta de gilipollas o niños de teta. Lo peor de todo, cuando permiten que sus "profesionales" amigos a los que invitan y permiten que desplieguen sus estupideces, caso de Juan Carlos Salamanca, que según ellos dicen que es de las personas mas leídas que conocen.. Joder, si se parece hablando al chico del tendero de abajo de casa, que lleva desde los 8 años cargando patatas.. que burradas más grandes puede llegar a decir este hombre, y me consta que hay gente como yo que cuando oye

estas joyas, escribe inmediatamente al programa, aunque sea para preocuparse de la salud mental de los hermanitos que no respiran ante semejantes rebuznos de Juan Carlitos.. Bueno.. QUE A GUSTO ME HE QUEDADO!

INFORME DE FISCALIZACIÓN DE LA DIRECCIÓN GENERAL DE BELLAS ARTES Y BIENES CULTURALES (1)

El Tribunal de Cuentas es el órgano de control del gasto público. Sus dictámenes señalando irregularidades y desvíos presupuestarios, deberían corresponderse con denuncias, sanciones y condenas ante los tribunales de justicia, si, en el Congreso, los partidos políticos y los diputados hicieran el trabajo por el que cobran, para el que fueron elegidos en las urnas, en vez de dedicarse al noble arte de rascarse la entrepierna. Y, también, si la Fiscalía General del Estado, la Fiscalía anticorrupción, y los Tribunales de Justicia no fueran meros comparsas del Gobierno de turno, en vez de representar dignamente la independencia del poder judicial.

Y eso es así porque los españoles tenemos el espíritu servil incrustado hasta la médula, y porque en la defensa de nuestros derechos tenemos arranques de caballo percherón y paradas de mula vieja, pasivos y fatalistas como siervos, y cultivamos la ignorancia y la pereza mental hasta extremos patológicos en asuntos que atañen a nuestros deberes ciudadanos.

Aquí va parte del informe 784 del Tribunal de Cuentas sobre la Dirección General de Bellas Artes y Bienes Culturales, aprobado en el Pleno del Congreso en marzo de 2008, y que, como el que emitieron sobre ese engendro llamado SEACEX, habría hecho caer al gobierno en cualquier país civilizado y democrático.

Gatopardo

INTRODUCCIÓN

A: Antecedentes de la fiscalización

1.1.- El Pleno del Tribunal de Cuentas, por acuerdo de 31 de enero de 2006, aprobó incluir la presente fiscalización en el "Programa de fiscalizaciones del Tribunal de Cuentas para el año 2006", dentro del apartado V.2 *"Informes especiales. Otras fiscalizaciones"*, relativo a fiscalizaciones programadas a iniciativa del Pleno del Tribunal.

1.2.- Las Directrices Técnicas a que debía sujetarse la fiscalización fueron establecidas mediante acuerdo del Pleno de 6 de abril de 2006.

La coordinación con las unidades del Ministerio que intervengan en la gestión de bienes del patrimonio histórico español, así como con los demás departamentos ministeriales y, en su caso, con las demás Administraciones Públicas. El ejercicio de las competencias que correspondan a la Administración General del Estado para la aplicación del régimen jurídico del patrimonio histórico.La gestión de los museos de titularidad estatal dependientes del Departamento a través de esta Dirección General.El asesoramiento respecto de los museos de titularidad estatal dependientes de otros ministerios, la coordinación del sistema español de museos y la cooperación con otras Administraciones y entidades públicas o privadas en materia de museos.La elaboración y ejecución de los planes para la conservación y restauración de los bienes muebles e inmuebles del patrimonio histórico, así como de los fondos que constituyen el patrimonio documental y bibliográfico. La promoción y fomento de Ios proyectos de investigación arqueológica en el exterior

B: Descripción del ámbito de gestión fiscalizado

1.3.- En el presupuesto del ejercicio 2004, la Dirección General de Bellas Artes y Bienes Culturales (DGBAyBC) constituyó el Servicio 13 de la Sección 18 "Ministerio de Educación, Cultura y Deporte", con participación en la gestión de 5 programas presupuestarios que sumaron créditos para gastos por un total de 95.390,32 miles de euros.

1.4.- Sus competencias y estructura orgánica fueron aprobadas por el Real Decreto 1601/2004, de 2 de julio, por el que se desarrolla la estructura básica del Ministerio de Cultura, tras la remodelación de los Departamentos ministeriales aprobada por el Real Decreto 553/2004 de 17 de abril. Según lo dispuesto en el artículo 4 de la primera norma citada, corresponde a la DGBAyBC el ejercicio de las siguientes funciones:

a) La formación del Registro de bienes de interés cultural y del Inventario general de bienes muebles.

b)La propuesta de adquisición de bienes del patrimonio histórico español y de las medidas que deban adoptarse para su protección y defensa.

c) La coordinación con las unidades del Ministerio que intervengan en la gestión de bienes del patrimonio histórico español, así como con los demás departamentos ministeriales y, en su caso, con las demás Administraciones Públicas.

d) El ejercicio de las competencias que correspondan a la Administración General del Estado para la aplicación del régimen jurídico del patrimonio histórico.

e) La gestión de los museos de titularidad estatal dependientes del Departamento a través de esta Dirección General.

f) El asesoramiento respecto de los museos de titularidad estatal dependientes de

otros ministerios, la coordinación del sistema español de museos y la cooperación con otras Administraciones y entidades públicas o privadas en materia de museos.

g) La elaboración y ejecución de los planes para la conservación y restauración de los bienes muebles e inmuebles del patrimonio histórico, así como de los fondos que constituyen el patrimonio documental y bibliográfico.

h) La promoción y fomento de los proyectos de investigación arqueológica en el exterior

i) El archivo y sistematización de los trabajos realizados y de la documentación disponible sobre patrimonio histórico; la investigación y estudio sobre criterios, métodos y técnicas para su conservación y restauración, así como la formación de técnicos y especialistas en conservación y restauración.

j) La promoción de la creación artística y de las exposiciones y cualesquiera otras actividades de difusión de las artes plásticas.

1.5.- La DGBAyBC se estructura en cuatro Subdirecciones: la Subdirección General de Protección del Patrimonio Histórico, a la que coпesponde la ejecución de Ias funciones indicadas en los apartados **a), b), c)** y **d)** anteriormente indicados; la Subdirección General de Museos Estatales, con competencias para la ejecución de Ias funciones indicadas en los apartados **e)** y **t)**; la Subdirección General del Instituto del Patrimonio Histórico Español, cuyas funciones son Ias descritas en los apartados **g), h) e i)**; y la Subdirección General de Promoción de Ias Bellas Artes, a la que corresponden las funciones descritas en el apartado **j)** anterior. Se adscribe a la DGBAyBC la Junta de Calificación, Valoración y Exportación de Bienes del Patrimonio Histórico Español, órgano consultivo cuyas competencias, entre otras, son las relativas a la exportación y salida temporal de los bienes a que se refiere la Ley de Patrimonio Histórico, así como la valoración de dichos bienes cuando se pretendan entregar al Estado en pago de deudas tributarias.

C) Liquidación presupuestaría

1.6.- La DGBAyBC gestionó en 2004 cinco programas presupuestarios a través de las mencionadas Subdirecciones Generales, según la siguiente distribución:

Programa		Unidad Gestora
134.B *	"Cooperación, promoción y difusión cultural en el exterior"	S.G. de Promoción de Bellas Artes y S.G. del Instituto del Patrimonio Histórico Español
453.A *	"Museos"	S.G. de Museos Estatales
453.B	"Exposiciones"	S.G. de Promoción de Bellas Artes
458.C	"Conservación y restauración de bienes culturales"	S.G. del Instituto del Patrimonio Histórico Español
458.D	"Protección del patrimonio histórico"	S.G. de Protección del Patrimonio Histórico

* *Programas compartidos con otras unidades gestoras ajenas a la D.G. de Bellas Artes*

1.7.- La distribución por capítulos de los créditos iniciales asignados a los programas gestionados por la DGBAyBC en 2004 se detalla en el siguiente cuadro. Destacan por su importancia relativa el 453.A "Museos", cuyos créditos representan el 55% del total reflejado en dicho cuadro, y el 458.0 "Conservación y restauración de bienes culturales"

que dispone del 30% de dicho total. Hay que señalar que los créditos del capitulo 1 "Gastos de personal", que representan el 33% de los asignados a los programas reflejados en el cuadro, son gestionados por la Subsecretaria del Departamento y no por la DGBAyBC. De dichos gastos de personal, el 76% corresponden al programa 453.A "Museos". Haciendo abstracción, por tanto, del citado capítulo 1, destaca por su importancia relativa el capítulo 6 "Inversiones reales", que suponen el 31% de los créditos totales y que están asignados en su mayor parte (el 54%) al programa 458.0 "Conservación y restauración de bienes culturales", gestionado por el Instituto del Patrimonio Histórico Español (IPHE).

Créditos iniciales de los programas gestionados por Ia DGBAyBC, ejercicio 2004

(miles de euros)

Capítulos		Programas					
		134.B	453.A	453.B	458.C	458.D	Total programas
1	Gastos de personal	-	23.978,5	901,1	5.326,7	1.153,6	31.359,9
2	Gastos corrientes	183,7	12.520,0	2.107,0	2.156,0	603,1	17.569,8
4	Transferencias corrientes	129,6	5.286,9	574,0	245,1	132,1	6.367,7
6	Inversiones reales	306,5	6.011,0	30,6	16.185,2	7.289,8	29.823,1
7	Transferencias de capital	240,4	5.125,3	-	4.814,1	90,0	10.269,8
Total capítulos		860,2	52.921,7	3.612,7	28.727,1	9.268,6	95.390,3

1.8.- El importe neto de las modificaciones presupuestarias tramitadas en el ejercicio 2004 ascendió a 5.452,1 miles de euros, según el detalle que se recoge en el anexo 1. Las transferencias entre créditos de capitulo 1 han supuesto una minoración de los créditos iniciales de la DGBAyBC por imφPrte de 4.130,0 miles de euros, con la finalidad de adecuar el crédito a las necesidades reales del Ministerio de Cultura. En el capítulo 2 se han producido generaciones de crédito por importe de 6,9 miles de euros, correspondientes a las aportaciones de la Unión Europea a los proyectos Leonardo "Conbelib" y Herein. Por último, el capitulo 6 se ha incrementado en 9.575,2 miles de euros como consecuencia, en su práctica totalidad, de las generaciones y ampliaciones de crédito derivadas de los ingresos y de las retenciones correspondientes al "1% cultural" de las obras realizadas por diversos Departamentos y organismos. La ejecución presupuestaria en el citado ejercicio se detalla en los cuadros siguientes (por programas y por capítulos de gasto). Destaca el bajo índice del capítulo 6 "Inversiones reales", en el que quedaron sin ejecutar 5.814,6 miles de euros, de los cuales 5.186,8 miles de euros corresponden al programa 458.C, así como el mismo capitulo del programa 134.8, que únicamente alcanzó el 4% del crédito definitivo.

Ejecución presupuestaria por programas y capítulos, ejercicio 2004

(miles de euros)

Total	**95.390,3**	**100.842,4**	**93.247,7**	**92**

D.- Objetivos, alcance y limitaciones

1.9.- La fiscalización, planteada como integral, se ha desarrollado de acuerdo con los objetivos marcados en las Directrices Técnicas. Éstos fueron los siguientes:

a) Comprobar que la gestión económica y financiera de la Dirección General de Bellas Artes y Bienes Culturales se haya reflejado adecuadamente en el sistema contable del Estado, de acuerdo con los principios y criterios contables que le son de aplicación.
Verificar el correcto cumplimiento de la legalidad en la gestión de los fondos públicos asignados a dicha Dirección General.

b) Evaluar los procedimientos y sistemas de gestión económico-fiinanciera y de control interno aplicados.

c) Analizar el grado de eficacia alcanzado en el cumplimiento de Ios objetivos establecidos, así como la eficiencia y la economia en el empleo de Ios recursos utilizados.

1.10.- El periodo objeto de fiscalización comprende sustancialmente el ejercicio 2004. No obstante, algunas comprobaciones han sido ampliadas a ejercicios anteriores y posteriores en aquellos aspectos que se ha considerado conveniente para el adecuado cumplimiento de los objetivos de fiscalización previstos. No se han fiscalizado los gastos de personal por cuanto su gestión se realiza por la Subsecretaria del Departamento y no por la DGBAyBC. Las comprobaciones se han realizado en la DGBAyBC, en los museos Arqueológico Nacional, Nacional de Altemira y del Traje, y en sede del Tribunal de Cuentas.

1.11.- En la ejecución del trabajo se han aplicado las normas y principios de auditoria habitualmente seguidos por el Tribunal de Cuentas y, en particular, los contenidos en las *"Normas internas de fiscalización del Tribunal de Cuentas"*, en los términos acordados por el Pleno de esta Institución el 23 de enero de 1997. Los procedimientos aplicados han abarcado cuantas comprobaciones se han estimado necesarias para fundamentar la opinión del Tribunal en relación con los objetivos de la fiscalización. En concreto, se ha procedido: a) al examen y verificación de los registros contables principales y auxiliares, asi como de sus justificantes; b) al análisis de los sistemas de control interno y realización de comprobaciones de cumplimiento, con especial incidencia en aquellas áreas que presentaban mayor posibilidad de riesgo; c) a la realización de comprobaciones sustantivas sobre los expedientes tramitados y las operaciones de gasto y de pago; y d) a la realización de entrevistas, inspecciones fisicas, examen de otra documentación y, en general, cuantas actuaciones se han estimado necesarias para alcanzar los objetivos marcados.

1.12.- Tanto los responsables del programa fiscalizado como el personal adscrito al mismo han prestado toda la colaboración requerida para la correcta ejecución de los trabajos. No obstante, se han presentado ciertas dificultades en los análisis de regularidad, producidas por la inexistencia de suficiente información y documentación, o bien por su desorden y fragmentación, algunas de las cuales no se pudieron superar por medios alternativos y han causado limitaciones al alcance en algunos casos concretos. Por otra parte, de mayor importancia son las limitaciones presentadas en los análisis de eficacia, eficiencia y economia, hasta el punto de no haber sido fisible efectuar la fiscalización pretendida sobre la gestión de la DGBAyBC bajo tal enfoque. Dichas limitaciones se producen a causa de la inadecuada e incompleta definición de objetivos e indicadores en los programas presupuestarios gestionados por dicho Centro, asi como por la inexistencia de otros instrumentos de planificación (cuya falta es especialmente notoria en el ámbito de la conservación y restauración de los bienes del Patrimonio Histó~co) y de un sistema de información fiable y suficiente sobre la gestión realizada.

E: Trámite de alegaciones

1.13.- De conformidad con lo dispuesto en el articulo 44 de la Ley 7/1988 de 5 de abril, de Funcionamiento del Tribunal de Cuentas, el Anteproyecto de Informe de la presente fiscalización se remitió para alegaciones al actuad responsable del Ministerio de Cultura y a quienes lo fueron a lo largo del periodo fiscalizado. Únicamente el primero de ellos ha presentado alegaciones, que se adjuntan integramente al presente Informe.

1.14.- Tras el examen por el Tribunal de Ias indicadas alegaciones, se han introducido en el Informe los cambios que se han estimado procedentes. Las alegaciones no aceptadas obedecen sustancialmente a tres causas: **a)** manifestaciones sobre medidas puestas en práctica con posterioridad al periodo fiscalizado; **b)** discrepancias no fundamentadas sobre los hechos comprobados por el Tribunal o sobre los criterios técnicos e interpretaciones profesionales y jurídicas sostenidas en el Informe; y **c)** explicaciones sobre las causas de determinados hechos o sobre cuestiones colaterales al contenido del Informe.

En algunos casos se ha estimado conveniente insertar un comentario con la opinión del Tribunal de Cuentas para precisar el contenido de puntos concretos del Informe. No obstante, la falta de comentario expreso sobre el resto de las alegaciones no significa que el Tribunal comparta su contenido.

ESPAÑA CONDENADA POR EL TRIBUNAL EUROPEO DE DERECHOS HUMANOS POR EL CASO GÓMEZ DE LIAÑO

Quizás hayan tenido que pasar nueve años para que se empiece a reconocer que Javier Gómez de Liaño, el Juez Instructor del Caso Sogecable (las fianzas de los abonados al Canal PLUS se inscribían y consideraban como ingresos en PRISA, y eran utilizadas para financiar otras actividades del grupo, sin proveer la garantía de depósitos, contraviniendo la Ley de Contabilidad vigente) fue juzgado por prevaricación y sentenciado para dar un aviso a los jueces díscolos que tuvieran la veleidad de examinar la más que imaginativa contabilidad de los aliados del Gobierno del PSOE- Felipe González, como, por ejemplo, la de las empresas expropiadas a Rumasa, vendidas por cuatro duros a los amigos; las de las empresas nacionalizadas, saneadas y privatizadas luego a precio de ganga, como Explosivos Río Tinto, ERCROSS, donde un mero responsable de comunicación, Lalo Azcona, pasó de ser un periodista con un piso hipotecado a ganar 2.000 millones de pesetas vendiendo sus acciones a KIO,** que entonces era una empresa afín y mimada por el Gobierno.
Y hemos tenido que ver que PRISA, como resultado de la impunidad y manga ancha que ha disfrutado, tiene una deuda de casi seis mil millones de euros***, lo que para cualquiera es una empresa en quiebra.
Y lo que nos queda por ver...

Caso Javier Gómez de Liaño y Botella, España (n° 21369/04)

El demandante, Javier Gómez de Liano y Botella, es un ciudadano español nacido en 1948 y residente en Madrid. El demandante ha sido juzgado por el Tribunal central de Instrucción n° 1 de la Audiencia national. En octobre 1999, el demandante fue declarado culpable de prevaricación en un proceso en fase de Instruccion de la era responsable, condenado al pago de una multa y la prohibición de ejercer en la función pública durante 15 años ; perdiendo así su plaza. El interesado se queja de falta de imparcialidad del Tribunal supremo que lo condenó, aduciendo que los tres jueces que compusieron el tribunal habían tenido que pronunciarse sobre su caso, particularmente confirmando en apelación su inculpacion. El demandante invoca particularmente el **artículo 6 §§ 1** (derecho a un proceso equitativo) y **2** (presunción de inocencia).
El Tribunal Europeo de Derechos Humanos :
1. Declara admitida la demanda respecto a las quejas basadas en el artículo 6 §§ 1 et 2
2. Declara que ha habido violación del artículo 6 § 1 de la Convención.

a) que Estado español debe pagar al demandante, en el plazo de tres meses a contar desde el día en que esta sentencia sea definitiva, conforme al artículo 44 § 2 de la Convención, 5 000 € (cinco mil euros), más todo el montante debido a título de impuestos por daños moral es;
b) que a partir de la expiración del susodicho plazo y hasta su pago, a esta cantidad se añadirá el interés simple de un porcentaje igual al que se facilite en préstamo marginal por la Banco Central Europeo, aplicable durante este periodo, aumentado en tres puntos el porcentaje.

Artículo 6 Derecho a un proceso equitativo
1
Toda persona tiene derecho a que su causa sea oída equitativa, públicamente y dentro de un plazo razonable, por un tribunal independiente e imparcial, establecido por la ley, que decidirá los litigios sobre sus derechos y obligaciones de carácter civil o sobre el fundamento de cualquier acusación en materia penal dirigida contra ella. La sentencia debe ser pronunciada públicamente, pero el acceso a la sala de audiencia puede ser prohibido a la prensa y al público
durante la totalidad o parte del proceso en interés de la moralidad, del orden público o de la seguridad nacional en una sociedad democrática, cuando los intereses de los menores o la protección de la vida privada de las partes en el proceso así lo exijan o en la medida en que sera considerado estrictamente necesario por el tribunal, cuando en circunstancias especiales la publicidad pudiera ser perjudicial para los intereses de la justicia.
2.
Toda persona acusada de una infracción se presume inocente hasta que su culpabilidad haya sido legalmente declarada.

**** Caso KIO**
***** El valor total de PRISA en la Bolsa, es de 1.262 millones de euros a precios de ayer.**

Todo ciudadano, y un juez lo es, tiene derecho a que le juzgue un tribunal imparcial, a que se respete su presunción de inocencia. Es decir, a la tutela judicial efectiva lo que significa, por ejemplo, que un juez queda invalidado si ha tomado parte en el proceso de Instrucción previo. Ha de haber jueces instructores y de Sala. Sin embargo, a Gómez de Liaño le condenaron Enrique Bacigalupo y Gregorio García Ancos, los mismos magistrados del Tribunal Supremo que antes habían confirmado su procesamiento y abierto la vista oral, a pesar, de la pposición del fiscal José María Luzón.
Según el ordenamiento jurídico español, Bacigalupo y García Ancos habrían tenido que abstenerse.

Bacigalupo fue aquel juez nombrado por el turno de juristas de reconocido prestigio al ser catedrático de Derecho Penal en Lérida, durante siete horas antes de solicitar la excedencia. Jamás dio clase. Y es el mismo que percibía una sustanciosa pensión (por haber trabajado dos meses en el Ministerio del Tesoro argentino en 1973), sin que olvidemos que quien pagaba era la Argentina del "corralito", mientras el gobierno argentino tomaba medidas contra la crisis que condenaron a millones de ciudadanos a la miseria, y a la pérdida de los ahorros de toda la vida, en una escalada de precios infernal.
Y fue aquel juez que sustituyó a Marino Barbero en la instrucción del caso Filesa, y convirtió en un asunto fiscal de menor entidad lo que era un holding de extorsión y financiamiento ilegal del PSOE.
No lo olvidemos.

Autor: Antonio Moreno Alfaro

La Justicia, con mayúscula, es concubina del poder político y de dicho concubinato ambos obtienen impunidad: la Justicia, para actuar sin control ni responsabilidad, y el poder político, para utilizar delictivamente la Administración del Estado. Como consecuencia de la total impunidad de los jueces y fiscales corruptos que actúan al dictado del Gobierno español, la Audiencia Nacional es un foco de corrupción en el que algunas Salas se han convertido en oficinas de extorsión contra quien se atreve a denunciar los delitos de las mafias políticas. Uno de dichos delitos es la estafa en los precios de alquiler de los contadores de la luz, el cual vengo denunciando inútilmente desde hace catorce años, durante los que he sido víctima de numerosas represalias, desde mi despido humillante mediante una denuncia falsa en represalia por negarme a colaborar con el grupo clandestino Contact, hasta un vía crucis de casi once años de paro, la pérdida de casi el 60% de mi pensión de jubilación y la condena al pago de 58.000 euros a las compañías eléctricas, principales beneficiarias de la estafa (el abogado de las citadas compañías, Miguel Bajo Fernández, catedrático de Derecho Penal de la Universidad Autónoma de Madrid, me exigía 372.453,40 euros). Como probaré documentalmente en una próxima entrega de www.estafaluz.com, la estafa fue planificada en 1984 por el PSOE y perfeccionada en 2001 por el PP, se comete a través del Boletín Oficial del Estado, genera cada día 350.000 euros, afecta a 23 millones de clientes de las compañías eléctricas y lleva reportados a éstas al menos la mitad de los más de 7.500 millones de euros cobrados ilegalmente por dicho alquiler. Gracias a la protección de fiscales y jueces prevaricadores, la estafa continúa a pesar de haber sido

reconocida por el propio Gobierno en escrito de 9.03.07 al Congreso y de ser tan burda que ha sido detectada en 45 minutos por alumnos de primero de bachillerato de un Instituto de Sevilla con tan sólo dos de los cientos de documentos obrantes en la Audiencia Nacional.

¡CUIDADO SEÑORÍAS CON GOOGLE NO SE JUEGA!

Ni con EL TRIBUNAL DE DERECHOS HUMANOS DE ESTRASBURGO

Rafael del Barco Carreras

Dos noticias sobre la peculiar mentalidad de nuestros jueces, la mayoría anclados en la pasada DICTADURA, por lo tanto de pasada NADA. Una Sociedad que no cambia a sus JUECES no ha cambiado de RÉGIMEN. Porque nuestros jueces (en definitiva funcionarios públicos) no son como los de las películas que ejercen de arbitro (técnico en LEYES) entre las partes, jurado, fiscalía, acusadores y defensores, sino que DECIDEN, DICTAN, CONDENAN, y mucho más. Pues esta semana, uno, ni corto ni perezoso, ordena a GOOGLE excluir de los videos de YOUTUBE reportajes o noticias de TELECINCO. La sorpresa de GOOGLE no radica en que tenga o no razón, la sorpresa para los anglosajones se centra en que dicta sin oír a la parte contraria. Es la costumbre, "ellos se lo comen y se lo guisan", a lo reyezuelos de Taifa.

Y sumando, la misma semana, el TRIBUNAL DE DERECHOS HUMANOS DE ESTRASBUSGO, condena a ESPAÑA por juicio injusto al Juez Gómez de Liaño. Tampoco yo me pronunciaría a favor o en contra, quien fue Juez de Vigilancia Penitenciaria de Barcelona en los 80 cuando viví barbaridades y torturas, y él mismo las cita en su bibliografía biográfica, a mi entender no le va mal un trago de su propia medicina. Y la sentencia sigue la misma línea que la condena de la ONU porque el recurso de casación al Supremo no cumple el mandato de la CARTA DE DERECHOS HUMANOS DE LA ONU, respecto a la SEGUNDA INSTANCIA.

Así pues, este mes entre GOOGLE Y ESTRASBURGO, el Mundo se percatará una vez más de que la JUSTICIA ESPAÑOLA, negocio de un selecto club profesional, no es que sea un cachondeo, sino que desciende más de la SARIA que del DERECHO ROMANO transformado por Napoleón y los liberales occidentales en lo más parecido a una LEGALIDAD DEMOCRÁTICA.

Al mismo tiempo nuestros dirigentes, Zapatero y Rajoy, se reúnen para reformar la Justicia. ¿Y qué significa eso?, muy simple, el reparto de los vocales y cargos en el Poder Judicial… y de cambiar, nada de nada. ¡Abogados!, de la misma escuela e idénticos intereses. Ellos a lo suyo, el Poder, GOOGLE, ESTRASBURGO O LA ONU, les importa un pito, que digan lo que quieran, ¡nosotros en nuestro suculento machito!

Y a propósito, he colgado en www.lagrancorrupcion.com el recurso de amparo al TRIBUNAL CONSTITUCIONAL por el caso Consorcio de la Zona Franca, pues si el Juez no tuvo un juicio justo por CONTAMINADO el Tribunal, en mi caso no solo no fue justo, sino predeterminado y fabricado por la GRAN CORRUPCIÓN barcelonesa.

DON EMILIO BOTÍN DECLARA LA GUERRA AL REINO UNIDO DE GRAN BRETAÑA E IRLANDA DEL NORTE, A ESTADOS UNIDOS Y A SUS ALIADOS

Ante la agresiva política cultural de la pérfida Albión y el MI6 para propagar el estudio, desde la escuela primaria, de las lenguas nacionales enemigas de la recia unidad de España, y en respuesta a sus intrigas, don Emilio Botín ha contraatacado con contundencia, valor y oportunidad, con unos dídimos que ya hubieran querido para si don Andrés Torrejón y don Simón Hernández cuando declararon la guerra al francés, y secundando su exhorto ha tomado las activas providencias para escarmentar tanta perfidia, acudiendo al socorro del español y alentándonos, pues no hay fuerzas que prevalezcan contra quien es leal y valiente, como los españoles lo son.
Y para dar ejemplo de como hay que tratar a la lengua del enemigo, aquí dejamos documento gráfico y sonoro donde se ve a don Emilio Botín, presidente del Banco de Santander, él solo, sin más ayuda que el aparato de karaoke fonético políglota que le ha prestado don Benedicto XVI, como le atiza un palizón descomunal al inglés de Inglaterra, de Irlanda del Norte y del Sur, de Australia, de Estados Unidos, de Canadá, de Dakota del Norte, y de Gibraltar.
Que no haya hispano parlante que no lo secunde en su batalla contra el inglés, hasta la victoria o la muerte. Y contra el catalán, el gallego, el bable, el castúo, la fabla, y el euskera, también.

Alimaña, redactor jefe de *Alimaña News, la noticia antes de que ocurra.*

¿por qué será que estos "próceres" de la Patria -y me refiero a Franco, Aznar, Botín etc. and company- parece que todos han acudido a las mismas academías y fuentes, y no sólo para aprender inglés -"osease" catalán, euskera, y otras menudencias así-?
¡Felicidades, Alimaña! Muy bien traído el video y muy bueno el artículo, y no me maltrates demasiado por los elogios ¿vale?
Un abrazo
Hannah

CHRISTIAN SANZ EN RADIO CONTINENTAL, AM 590

.

Aquí puede escuchar en directo la frecuencia 590 AM de Continental - Buenos Aires

El próximo 20 de julio -mañana- el director de *Tribuna de Periodistas* estará como invitado en el programa *Con la gente*, que se emite todos los domingos de 6 a 9 hs de la mañana por *Radio Continental*, AM 590.
Allí hablará de algunas de sus investigaciones, especialmente sobre la muerte del hijo de Carlos Menem, la vida -y eventual fallecimiento- de Alfredo Yabrán y el atentado a la AMIA. No está de más mencionar que los escándalos mencionados están íntimamente relacionados entre sí.
Asimismo, hablará de la ética periodística y la realidad de los medios hoy.
Sanz estará luego de las 6.30 hs en vivo, en el piso de la radio, disertando mano a mano con los conductores del ciclo.
Esperamos que estén sintonizando el programa ...

FRAY LUIS DE LEÓN: ODA XV

No siempre es poderosa,
Carrero, la maldad, ni siempre atina
la envidia ponzoñosa,
y la fuerza sin ley que más se empina
al fin la frente inclina;
que quien se opone al cielo,
cuando más alto sube, viene al suelo.

Testigo es manifiesto
el parto de la Tierra mal osado,
que, cuando tuvo puesto
un monte encima de otro, y levantado,

al hondo derrocado,
sin esperanza gime
debajo su edificio que le oprime.

Si ya la niebla fría
al rayo que amanece odiosa ofende
y contra el claro día
las alas oscurísimas extiende,
no alcanza lo que emprende,
al fin y desparece,
y el sol puro en el cielo resplandece.

No pudo ser vencida,
ni lo será jamás, ni la llaneza
ni la inocente vida
ni la fe sin error ni la pureza,
por más que la fiereza
del tigre ciña un lado,
y el otro el basilisco emponzoñado;

por más que se conjuren
el odio y el poder y el falso engaño,
y ciegos de ira apuren
lo propio y lo diverso, ajeno, extraño,
jamás le harán daño;
antes, cual fino oro,
recobra del crisol nuevo tesoro.

El ánimo constante,
armado de verdad, mil aceradas,
mil puntas de diamante
embota y enflaquece y, desplegadas
las fuerzas encerradas,
sobre el opuesto bando
con poderoso pie se ensalza hollando;

y con cien voces suena
la fama, que a la sierpe, al tigre fiero
vencidos los condena
a daño no jamás perecedero;
y, con vuelo ligero
veniendo, la victoria
corona al vencedor de gozo y gloria.

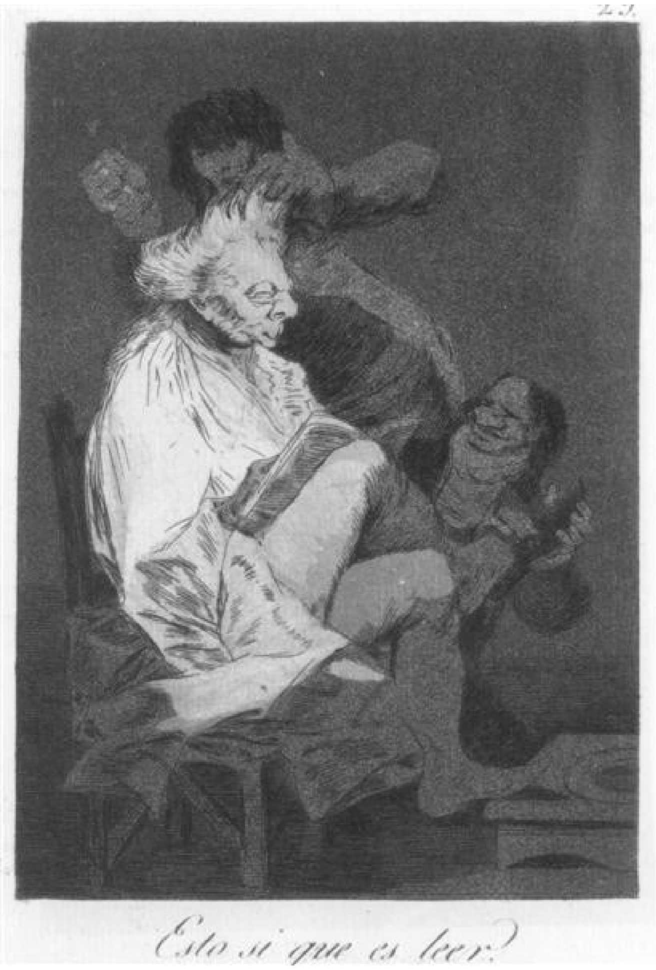
DIEGO DE TORRES Y VILLARROEL: LA CASA DE UN GRANDE



Un rodrigón que siempre está en pelea
con la de pajes lamerona junta
un pobre mayordomo que se unta
y un contador maldito que alardea

Una señora a quien el ocio asea
y otras que siempre están de blanco en punta
una dueña arrugada y cejijunta
que rellena de chismes la asamblea

Un conjurador que riñe roba y miente
un cocinero de esta misma masa
gran chusma de libreas insolente

Envidia mucha adulación sin tasa
y el gran señor que sirve solamente
de testigo del vicio de su casa.

Diego de Torres y Villarroel (1694 - 1770)

MEMORIAS APÓCRIFAS DE SICILIA: LAS FIESTAS POPULARES

Los decibelios que soportan con cara de estar divirtiéndose, determinan con más precisión la inteligencia de los sicilianos que festejan al santo patrón de su pueblo que toda esa batería de test que usan los psicólogos para precisar el coeficiente intelectual. A menor capacidad intelectual, mayor volumen necesita para escuchar la cacofonía de la orquesta quien engulle cantidades industriales de comida grasienta, mezclando sin ton ni son bebidas de alta graduación gañote abajo. No falla.

Es el público apto para las batallas con carretillas incendiarias que dejarán centenares de heridos con quemaduras de primero, segundo y tercer grado, para las batallas a tomatazos, para los que treparán por un poste untado de grasa hasta conseguir agarrar del cuello al gallo que se balancea vivo bien atado por las patas y arrancarle la cabeza o torturarán hasta la muerte a cualquier vaquilla apenas destetada con un alarido de gozo del público... Hay concursos a ver quien bebe más con porrón, quien come más morcillas, bollos de azúcar o huevos duros... Y muchos años despues, el siciliano de pro contará a cualquiera que esté provisto de orejas, que en una apuesta se comió treinta y siete chorizos picantes, cuarenta y dos bollos de azúcar con diecinueve tazas de chocolate... y una botella de anís del Mono... en una sentada...y prendió la mecha a veinte kilos de petardos gordos para animar la comilona... Nueve días en el Hospital... Qué tiempos aquellos, cuando era joven y no tenía el hígado y los tímpanos destrozados... -¡cómo se ha divertido!- y entre sus ojos pitañosos aflorará la única emoción enternecida que habrá sido capaz de sentir en toda su puñetera vida.

Los ediles de los municipios de Sicilia no atascarán a la hora de hacer los presupuestos para Fiestas, aunque escatimen para las obras de saneamiento y alcantarillado, la residencia de la tercera edad, la biblioteca, o la guardería, porque sus electores se lo agradecerán con votos.

Sólo les deseo a esos canallas que haya un infierno donde les hagan tragar un tizón encendido por cada decibelio, cada grado alcohólico, cada caloría, cada sufrimiento infligido a un animal, y cada céntimo de euro que hayan facilitado desde las arcas municipales. Y a los ciudadanos enfebrecidos de amor por la pólvora, los decibelios y los atracones, les deseo un infierno donde vivan sumergidos en una piscina de mierda por

cuya superficie pase una cuchilla afilada cada cinco segundos cortando cabezas. Y mientras, ojalá les diera a todos un dolor que cuanto más corrieran más les doliera y cuando pararan reventaran.

¡Qué menos!

LA MUERTE OCULTADA

2 LA MUERTE OCULTADA

El Romancero del siglo XX no sólo hereda la tradición baladística que halló acogida entre los impresores de romances del siglo XVI , sino que fue despreciada entonces, pero nunca dejó de cantarse. Un buen ejemplo de las limitaciones en el gusto de los eruditos del Siglo de Oro es este romance, que sobrevive en formas muy varias y que ejemplifico con tres textos.

En la mitad sur de España (Andalucía, Murcia, Extremadura, Sur de Salamanca y de Ávila, La Mancha) se canta, en versos de 6 + 6 constituyendo pareados de asonancia cambiante, sin apenas variaciones textuales, así:

Ya viene don Pedro
de la guerra herido,
que corre, que vuela
por ver a su hijo.
-Cúreme usted, madre,
estas tres heridas,
que me voy a ver
la recién parida.
-¿Cómo estás, Teresa,
de tu feliz parto?
-Yo buena, don Pedro,
si tú vienes sano.
-Acaba, Teresa,
de dar tus razones,

que me está esperando
el rey en la Corte.-
Al salir del cuarto,
don Pedro expiró,
se quedó la madre
con mucho dolor.
Campanas redoblan,
campanas repican
porque no se entere
la recién parida.
-Madre, la mi madre,
la mi siempre amiga,
¿qué es aquella bulla
que hay en la cocina?
-Te digo, mi nuera,
como buena amiga,
son juegos de naipes
porque estás parida.-
Ya cumple Teresa
los cuarenta días,
le dice a su suegra
como buena amiga:
-¿Qué traje me pongo
para ir a misa?
-Ponte el traje negro,
que te convenía.-
Al salir de misa,
todos le decían:
"La viudita honrada
la viuda garrida".
-Madre, la mi madre,
la mi siempre amiga,
¿qué es esas palabras
que a mí me decían?
-Que don Pedro es muerto,
tú no lo sabías.
-Si don Pedro es muerto,
no es razón yo viva.-
Se metió en su cuarto,
corrió las cortinas
y con un puñal
se quitó la vida.
Tocan las campanas
con mucha tristeza
porque ya se han muerto
don Pedro y Teresa.

El romance es un paralelo de una balada francesa de gran difusión llamada "Le roi Renaud", que en su versión más generalizada coincide con la del Sur español en comenzar la narración con el regreso de Renaud, herido y moribundo, de la guerra:

Le roi Renaud
de guerre revind

portant ses tripes
en sa main.
Sa mère était
sur le créneau
qui vit venir
son fils Renaud...

Pero esta versión "vulgata" de la España meridional, de ritmo ligero y saltarín, aunque en el pasado siglo haya cruzado el Estrecho propagándose entre las comunidades sefardíes de Marruecos, haya viajado a América, donde se han recogido versiones dominicanas, y ya empezara a hacerse ocasionalmente presente al Norte de la Cordillera Cantábrica, no es un buen representante del tema de "La muerte ocultada". Tiene el gran defecto de no explicar qué propósito tiene la ocultación temporal por la suegra de la muerte de su hijo. Y, en consecuencia, de oscurecer la intencionalidad del relato, dejando, incluso, abierto el camino a un trastrueque completo de su mensaje.

La tradición oral del tema de "La muerte ocultada" llegada al Romancero del siglo XX no se limita a este texto procedente del Sur de España. En el N.O. de la Península, aunque el tema se desarrolla con la estructura métrica más común en el Romancero, en versos de 8 + 8 de asonancia monorrima, la narración conserva varios motivos tradicionales que hacen el romance referencialmente mucho más rico y de interés más ejemplar; y el mensaje o intencionalidad de la fábula original es en él mucho más claro. Aparte de en esta área compacta, que abarca tierras de Palencia, el Norte de Salamanca, Zamora, León, Asturias, Lugo, Orense y Portugal, un texto octosilábico se canta también en Canarias y, muy minoritariamente, en Cataluña.

Un lunes por la mañana
don Bueso a caza salía.
Caminara siete leguas
sin encontrar cosa viva;
si no es un puercoespín,
que ni los perros comían.
Llovía y achaguzaba
un agua muy menudina;
los perros iban cansados,
los galgos ya no corrían.
Le vino el mal de la muerte,
a su casa se volvía.
-¡Albricias le doy, don Bueso,
que dármelas bien podía,
que doña Ana ya parió
y un mayorazgo tenía!
-Él será hijo sin padre,
sin padre él se criaría.-
-¿Qué caza nos traes, Bueso,
qué caza nos traerías?
-Caza que conmigo traigo,
la Muerte en mi compañía.
Hágame la cama, madre,
en la sala la de arriba;
hágame la cama, madre,
para la perpetua vida.
No se lo diga a doña Ana
hasta un año y un día,

no se lo diga a doña Ana,
que está tierna de parida.-
-Diga, diga, la mi suegra,
la mi madre tan querida,
¿por quién tocan las campanas,
que tocan tan doloridas?
-Es el uso de la tierra
cuando una mujer paría.-
-Diga, diga, la mi suegra,
la mi madre tan querida,
las paridas de esta tierra
¿de qué tiempo van a misa?
-Unas van a tres semanas,
otras tardan quince días;
tú, por ser de gente noble,
hasta un año y un día,
hasta que tu niño vaya
de la mano para misa.-
-Diga, diga, la mi suegra,
la mi madre tan querida,
de las ropas que yo tengo
¿cuáles llevaré a la misa?
-Las de seda por abajo,
las de negro por arriba.
-¡Tenerlas de plata y oro,
y he de ir de negro vestida!
-Doña Ana, tú eres muy blanca,
lo negro bien te estaría.
-¡Mejor me estaría, madre,
vestido de pedrería!
-Vístete de lo que quieras,
que en el arca lo tenías.-
Coge el niño de la mano,
para la iglesia camina.
En el medio del camino,
un pastorcito decía:
-¡Oh qué viuda tan hermosa,
oh qué viuda tan florida,
que tiene al marido muerto,
se viste de pedrería!
-¿Qué dice aquel pastor, madre,
el que la cuerna tañía?
-Que andemos aprisa, flor,
que perderemos la misa.-
-Diga, diga, la mi suegra,
la mi madre tan querida,
¿por quién son esos hachones,
que arden en nuestra capilla?
-Son los de mi hijo don Bueso
que en el alma lo quería.
-¡Válgame Dios, la mi suegra!,
¡qué engañada me tenía!-
Aún bien no lo había dicho,

muerta en el suelo caía.

En este texto, cada hecho concreto narrado incorpora, a la vez, a la historia, mediante sus connotaciones simbólicas, una información adicional que contribuye a dar cohesión a la fábula, a dotarla de contenido ejemplar. Don Bueso sale de poblado para proveer de caza a su mujer gestante y a su madre; pero sale un lunes, día fatídico en el Romancero, y la Naturaleza en que se interna se torna tan hostil que todo anuncia que la caza que va a conseguir llevar consigo es la Muerte, como dirá a su madre al regresar a casa. Pero este hecho, el poder ir a morir en su propia cama y no en el bosque, le permite establecer con su madre el pacto de la ocultación por un año y un día . Ese "día", en apariencia extra, aclara (como en el campo del Derecho) que se trata de un año completo. La intención del pacto es manifiesta: garantizar que la joven madre lactante críe al heredero recién nacido hasta que tenga la autonomía de poder salir al mundo andando. Sólo a partir de ese momento, en que la "madre vieja" puede substituirla como tutora del niño, debe dejarse en manos de la joven y tierna madre el derecho a seguir a su marido más allá de esta vida. El mensaje del romance, que le hizo vivir a lo largo de los siglos, es, pues, el de la precedencia del linaje, de la especie, sobre el individuo, y el corolario social, la ventaja de la existencia de la familia amplia, de tres genertaciones, sobre la familia nuclear, pese a la preferencia evangélica y de la Iglesia por este otro modelo.

El primitivo mensaje del romance de "La muerte ocultada" no sólo está claro en el texto octosilábico. En un conjunto de versiones, procedentes de varias áreas de la tradición hispánica, ha sobrevivido en el siglo XX una narración hexasilábica incluso más fiel a las formas primitivas de la fábula que el texto octosilábico monorrimo. Es este modelo del romance, el conocido desde antiguo por los judíos sefardíes expulsados de España en el siglo XV, el cual se siguió cantando ininterrumpidamente hasta el siglo XX en las comunidades de Marruecos y, de forma fragmentaria, en la de Salónica; además se mantuvo en la "alta Extremadura leonesa" (constituida por los pueblos serranos del Norte de Cáceres y del Sur de Salamanca y de Ávila, a ambos lados de la Cordillera Central), donde tuve la oportunidad de recoger una preciosa versión en el verano de 1947 de boca de una mujer de 40 años, Tomasa González, natural de Casillas), y asimismo (aunque sin el combate con la Muerte) en áreas conservadoras catalanas (incluido El Roselló):

Estaba doña Ana
  en días de parir,
y se le ha antojado
  comer jabalí.
Levantose Olalvo
  lunes de mañana,
cogiera sus armas,
  fuérase a la caza.
N’un prado de rosas
  se sentó a almorzar,
allí vido Olalvo
  su negra señal;
en el prado verde
  abrió su cestico,
vio venir al Huerco
  enturbiando el río.
Criador del cielo,
  ¡Válgame Dios del cielo,
pensamientos tengo!

-Huerco, no me empuerques
las aguas de arriba,
no quede doña Ana
vïuda y parida.-
-Así Dios te deje
con Alda vivir,
tú me has de dejar
las aguas bullir;
así Dios te deje
con Alda folgar,
tú me has de dejar
las aguas dañar.
-Así Dios me deje
con Alda vivir,
no te he de dejar
las aguas bullir.
Así Dios me deje
con Alda folgar,
no te he de dejar
el río pasar.-
Hirió Olalvo al Huerco
con su rica espada;
hirió el Huerco a Olalvo
en telas del alma.
Hirió Olalvo al Huerco
en el calcañar;
hirió el Huerco a Olalvo
en la voluntad.
Ya llevan al Huerco
carros y carretas;
ya llevan a Olalvo
damas y doncellas.
Alda no lo sepa
¡Si Alda lo sabe,
luego queda muerta!
-¿Cómo te hallas, Ana,
del parto primero?
-Yo muy bien, Olalvo,
si tú vienes bueno.
Arrímate, Olalvo,
arrímate a la cama,
verás al infante
que busca la mama.
-Espérate, Ana,
atiende a razones,
que me llama el rey
para ir a sus Cortes.
-Si te llama el rey
para ir a sus Cortes
¿qué hará una mujer
parida de anoche?
-Comer y beber,
darte buena vida;

te queda mi madre,
que te asistiría.-
-Suegra, la mi suegra,
la mi siempre amiga,
¿cuál es ese ruido
que suena allá arriba?
-Eso son los toros,
porque estás parida.-
-Suegra, la mi suegra,
la mi siempre amiga,
¿por qué doblan tanto
las campanas lindas?
-Por un caballero
que murió en las Indias.-
-Suegra, la mi suegra,
la mi siempre amiga,
¿de qué tiempo salen
las recién paridas?
-Pues unas al mes,
otras quince días;
tú saldrás al año,
que te convenía.-
-Suegra, la mi suegra,
la mi siempre amiga,
¿cuál de las mis tocas
me pongo este día?
-La negra, mi alma,
la negra, mi vida,
que como eres blanca
bien te parecía.-
-Suegra, la mi suegra,
la mi siempre amiga,
¿de qué visto al niño
para ir a misa?
-Vístele de negro,
que te convenía.-
-¡Qué viuda tan bella,
qué viuda tan linda!
-No mires atrás,
que es descortesía.-
-Suegra, la mi suegra,
la mi siempre amiga,
¿cúyo es esa laude
de oro enguarnecida?
¡Su hijo un año muerto,
nada me decía!

Hay en este texto rasgos métricos especialmente arcaicos dentro de la historia del Romancero, como es la presencia de pasajes paralelísticos en que la narración se detiene momentáneamente para insistir en percibir un hecho bajo dos formas diferentes contando casi lo mismo en asonantes distintos (pasajes sólo presentes en las versiones sefardíes); otra técnica (especialmente bien conservada en las de la "Alta Extremadura") es el "fundido" escénico que hace posible el que, sin interrumpir el

diálogo de las dos mujeres introduciendo acotaciones para señalar el paso del tiempo y los cambios de escenario, vaya transcurriendo la acción como si asistiéramos a la representación de ella en calidad de espectadores.

Más notable aún es cómo se halla concebida y descrita la "caza de la Muerte", que en el romance octosilábico sólo hallábamos insinuada.

La salida de Olalvo para la caza está ahora explícitamente condicionada por el antojo de su mujer gestante, antojo que, de no realizarse, traería consigo el malogro del parto. El "locus amoenus", el prado verde y florido a las orillas de un río, donde, en medio de la floresta, se sienta el cazador, nos invita a esperar un encuentro amoroso, la caza de una hembra deseable; pero quien se hace presente es "el Huerco" (o un "puerco" javalí, en la "Alta Extremadura"), esto es el "Orcus" de la mitología latina (la personalización del río o palude Estigia, cuyas aguas mortales separan el Averno de nuestro mundo). La escena del combate, en que Olalvo logra impedir que el ser infernal traspase o enturbie las aguas de la vida a costa de ser mortalmente herido "en telas del alma", privado de la "voluntad" de seguir siendo, y la escena siguiente de las simbólicas carretas, en que cada cual retorna a su espacio originario, nos sitúan en un plano narrativo mítico. Gracias a él,comprendemos que Olalvo ha conseguido el plazo necesario para poder regresar, realmente ya muerto, a pactar con su madre el otro plazo que va a hacer posible la continuidad de su linaje.

Este combate mítico no es una invención de ciertas versiones del romance hispánico, sino herencia de la balada precristiana de "La muerte ocultada", que la cristianización de la balada en Francia fue reduciendo o transformando para adaptar la narración a un mundo postmítico. En la tradición folklórica de Bretaña ha pervivido un gwerz de "la Muerte ocultada" muy semejante al romance hispánico en sus formas más conservadoras. En él la joven madre tiene también el antojo de comer carne de caza, y su esposo Nann se interna en la selva hasta llegar a un arroyo en persecución de un ciervo. Como en el romance hexasílabo de estructura más primitiva, la corriente de agua es el límite entre el mundo de los hombres y el otro, el de los seres sobrenaturales, y en el gwerz bretón la transgresión del cazador, el haber penetrado en ese otro mundo, no se intuye meramente, según ocurre en el romance, sino que es explícitamente denunciada por quien ha de ser su contendiente: una elfa. Ella le ofrece una disyuntiva: o se casa con ella o morirá en un plazo más o menos breve. Nann se niega a casarse, pues ya tiene mujer. Vuelto a casa, pide a su madre que le haga la cama y que oculte su muerte a su mujer recién parida. Y siguen las tradicionales preguntas y respuestas entre la nuera y la suegra hasta el descubrimiento de la tumba del marido muerto. En Suecia, Dinamarca, Noruega e Islandia la tradición baladística conserva también un relato que, en su comienzo, es similar al del gwerz bretón, salvo que la ida de caza, la transgresión de penetrar en la tierra de las elfas, la disyuntiva ofrecida por la elfa y la muerte del joven ocurren el día en que va a desposarse; no hay, por tanto, hijo, y el intento de que el linaje tenga continuidad, arreglando la boda de la novia con el hermano del difunto, no resulta factible al elegir la desposada acompañar a su prometido en la muerte. Pero la relación de esta vise escandinava con el conjunto baladístico europeo resulta reafirmado por el nombre del caballero, Olaf, que hallamos transmitido hasta el Romancero, donde, españolizado en Olalvo, lo conserva la tradición catalana de El Roselló (habiéndolo substituido en las otras áreas por el de Bueso, como en el texto octosilábico).

Es regla bien conocida la de que, en los productos y fenómenos en cuya transmisión interviene una multitud de transmisores, las áreas más alejadas del centro innovador retengan hasta más tarde las formas más antiguas de la estructura que se expande, mientras en su núcleo se sitúan las más evolucionadas y modernas. Así ocurre en la expansión de novedades artesanales, lingüísticas, religiosas, de ritos, costumbres y modas; y así se explican (y no por influjos directos puntuales) las coincidencias observadas entre las formas más conservadoras del romance y el gwerz bretón o la vise

escandinava. Por otra parte hay que considerar que las tradiciones baladísticas de pueblos con distintas lenguas forman un continuo en que la comunicación de innovaciones temáticas o formales se produce sin necesidad de traducciones totales ni de traductores propiamente dichos gracias al bilingüismo fronterizo. Al igual que en el interior de una comunidad lingüística, entre comunidades de diversa lengua, las variantes que un texto ofrece pueden ser selectivamente adoptadas e incorporadas a otro. Sólo así se explican las complejas interconexiones de las varias formas de nuestro romance con la balada europea de análogo tema y desarrollo.

ANÁLISIS DE LA TARIFA ELÉCTRICA APROBADA EL 26.06.2008: LA OPCIÓN RECOMENDADA

Según la tarifa eléctrica establecida por la Orden ITC 1857/2008, de 26 de junio,

Orden ITC 1857/2008, de 26 de junio, por la que se revisan las tarifas eléctricas a partir del 01.07.2008

BOE núm. 156 Sábado 28 junio 2008 28743

ANEXO I

Abonados domésticos: **22.925.098**

1. Relación de tarifas básicas con los precios de sus términos de potencia y energía

TARIFAS Y ESCALONES DE TENSIÓN	TÉRMINO DE POTENCIA	TÉRMINO DE ENERGÍA
	Tp: € / kW mes	Te: € / kWh
BAJA TENSIÓN		
Tarifa Social, Potencia < 3 kW (1)	0,000000	0,109612
1.0 General, Potencia ≤ 1 kW (1)	0,388713	0,087373
2.0.1 General, 1 kW < Potencia ≤ 2,5 kW (1)	1,621373	0,109612
2.0.2 General, 2,5 kW< Potencia ≤ 5 kW (1)	1,634089	0,107994
2.0.3 General, 5 kW< Potencia ≤ 10 kW (1)	1,642355	0,106888
3.0.1 General, 10 kW< Potencia ≤ 15 kW (1)	1,752513	0,107338
3.0.2 General, potencia superior a 15 kW	1,988549	0,101941
ALTA TENSIÓN		
Tarifa G.4 de grandes consumidores	13,15770	0,01507
Tarifas venta a distribuidores (D) (2):		
D.1: No superior a 36 kV	2,638657	0,066432
D.2: Mayor de 36 Kv, y no superior a 72,5 kV	2,490768	0,063374
D.3: Mayor de 72,5 kV y no superior a 145 kV	2,428498	0,061152
D.4: Mayor de 145 kV	2,350662	0,059484

(1) 1. A estas tarifas cuando no se les aplique el complemento por discriminación horaria que se regula en el punto siguiente se procederá en la facturación de la forma siguiente:

0.41 kwh/ día

– La energía correspondiente al consumo de hasta 12,5 kWh en un mes o en su caso su promedio diario equivalente quedará exenta de facturar el término básico de energía.

– Cuando la energía consumida por encima del consumo promedio diario sea superior al equivalente a 500 kWh en un mes, a la energía consumida por encima de dicha cuantía se le aplicará un recargo de 0,027403 €/kWh en exceso consumido.

Para ello, la facturación debe corresponder a lecturas reales del contador.

2. A estas tarifas cuando se aplique el complemento por discriminación horaria de dos periodos se aplicarán directamente los siguientes precios a la energía consumida en cada uno de los periodos horarios:

BAJA TENSIÓN 1.0, 2.0.X y 3.0.1 CON DISCRIMINACION HORARIA	TÉRMINO DE ENERGÍA PUNTA	TÉRMINO DE ENERGÍA VALLE
	Te: € / kWh	Te: € / kWh
2.0.1 General, Potencia ≤ 2,5 kW	0,132171	0,051890
2.0.2 General, 2,5 kW < Potencia ≤ 5 kW	0,135665	0,053261
2.0.3 General, 5 kW < Potencia ≤ 10 kW	0,138076	0,054208
3.0.1 General, 10 kW < Potencia ≤ 15 kW	0,142163	0,055812

(2) A estas tarifas D, para el cálculo del complemento por discriminación horaria, regulado en el apartado 7.1.1., del título I, del anexo I, de la Orden de 12 de enero de 1995 por la que se establecen las tarifas eléctricas, se tomará como T_{ej} el término de energía correspondiente a su propia tarifa.

El 31.12.2007, el término de energía punta era **0.099012 €/kwh** y el término de energía valles, **0.04899 €/kwh**

El 31.12.2007, la energía sin recargo era **1.100 kwh bimensuales** y el recargo, **0.013 €** por cada kwh consumido en exceso

---

que será aplicable a partir del 01.07.2008, las tarifas domésticas pasan a ser seis: las cinco existentes a 30.06.2008 (tarifas 1.0, 2.0.1, 2.0.2, 2.0.3 y 3.0.1) más una nueva, la denominada **tarifa social**, que se aplicará a aquellos suministros con una potencia inferior a 3 kw, que tengan instalado el ICP y correspondan a la vivienda habitual del titular del contrato. En referencia a la tarifa social, el ministro de Industria afirmó en una rueda de prensa que *"es nuestra obligación velar por la protección de los usuarios más desprotegidos,* ***(1)*** *por lo que hemos diseñado una tarifa social destinada a aquellos tramos de población que no pueden disfrutar de un consumo eléctrico elevado. La nueva tarifa social permitirá un ahorro del 10% para 4.5 millones de hogares a pesar del aumento de las tarifas"*.

En términos similares se expresó tres semanas después la vicepresidenta primera del Gobierno, quien destacó *"el amplio conjunto de posiblidades que ha puesto en marcha el ejecutivo para que paguen menos quienes menos consumen"*.***(2)***

Pues bien, no es cierto que la tarifa social haya sido diseñada para aquellos usuarios con menor poder adquisitivo, ni es cierto que la tarifa social permitirá un ahorro del 10% para 4.5 millones de hogares, ni es cierto que con la tarifa social pagarán menos quienes menos consumen.

La realidad, como prueban los documentos indicados en la página siguiente, es todo lo contrario.

Los seis siguientes documentos, confeccionados con los precios indicados en el Anexo I de la Orden ITC 1857/2008 demuestran que la subida real del precio del kilowatio x hora (kwh) es muy superior a la indicada por el Gobierno y prueban la falsedad de las declaraciones hechas por el ministro de Industria y la vicepresidenta primera en referencia a la tarifa social, lo cual, como expuse al final de la página 42 de este mismo apartado, no es de extrañar en un Gobierno que viene utilizando desde

el principio el Boletín Oficial del Estado para cometer una estafa que genera cada día más de 350.000 euros, afecta a 23 millones de clientes de las compañías eléctricas y lleva reportados a éstas al menos la mitad de los más de 7.500 millones de euros cobrados ilegalmente por el alquiler de los contadores de la luz:

1000	157,36	118,09	166,09	130,05	178,66	145,29

Las tres principales conclusiones que se sacan de estos seis documentos y de los indicados en el punto 4.4 del presente apartado son las siguientes:
Primera: Las subidas reales de los precios del kwh aplicables a partir del 1 de julio son muy superiores a las indicadas por el Gobierno.
Segunda: La tarifa social es no sólo antieconómica, pues da lugar a facturas superiores entre un 18 y un 20% a las que resultan con las tarifas 1.0 y 2.0.1, sino, sobre todo, antisocial, pues penaliza a los usuarios con menor poder adquisitivo,
Tercera: La tarifa con discriminación horaria es siempre más económica que la tarifa sin discriminación horaria.
Las consecuencias de estas tres conclusiones son las siguientes:

Primera: En la fijación de la tarifa eléctrica, el Gobierno es un simple lacayo de las compañías eléctricas.

Segunda: No contrate la tarifa social.

Tercera: Contrate siempre una tarifa con discriminación horaria.

Industria

Sebastián anuncia que la factura de la luz subirá entre un 5 y un 6% a partir de julio

El ministro asegura que la nueva tarifa social permitirá un ahorro del 10% para 4,5 millones de hogares a pesar del aumento

EFE - Madrid - 04/06/2008

El Gobierno sabe que la subida de la luz es una medida del todo impopular, sobre todo en la actual coyuntura dada la carestía generalizada de los carburantes y los alimentos y con una inflación en el 4,6%, y está tratando de suavizar por todos los medios su impacto parapetado en la recién creada tarifa social.

Así, tras la propuesta de la CNE de aumentar más de un 11% este servicio público y después de que Zapatero asegurase que el alza rondaría la inflación, hoy, el ministro del ramo, Miguel Sebastián, ha corroborado que la subida "en promedio estará en torno al IPC" aunque, a continuación, ha añadido que entiende que "esto será del 5 o el 6%" cuando la previsión oficiosa del Ejecutivo está en el 3,5%, según Solbes. En cualquier caso, el ministro ha añadido que este incremento variará "en función del grado de vulnerabilidad de los consumidores y su capacidad de ahorro".

Durante su primera comparecencia en la Comisión de Industria del Congreso, el titular de Industria ha añadido además que la nueva tarifa social, a la que podrán acogerse los usuarios con una potencia contratada inferior a tres kilovatios (KW) en su residencia habitual, permitirá a 4,5 millones de hogares ahorrar un 10% en su factura de la luz.

Un usuario acogido a la tarifa social que no supere el mínimo de consumo exento podría no tener que pagar

"Es nuestra obligación velar por la protección de los usuarios más desprotegidos, por lo que hemos diseñado una tarifa social destinada a aquellos tramos de población que no pueden disfrutar en un consumo de electricidad elevado", ha argumentado el ministro.

En cualquier caso, Sebastián ha destacado su apuesta por "tarifas que fomenten el ahorro, como las que tienen distintos tramos de tarificación horaria, que permitirán a los consumidores obtener reducciones de hasta el 10% en su factura eléctrica si gestionan su demanda desplazando los consumos más intensivos a las horas de menor precio".

En este sentido, el resto de tarifas a parte de la social tendrán un tramo de consumo mínimo gratuito, que se compensará con unas penalizaciones mayores a los consumos excesivos, según ha dicho Sebastián. Actualmente ya existe un mecanismo para penalizar el consumo excesivo y los planes de Industria son introducir más progresividad en él.

Posibilidad de no pagar

Además, cuando exista un consumo inferior al mínimo exento, que el Ministerio todavía no ha definido, sólo se pagará el término de potencia contratada. Esta modalidad tarifaria será compatible con la tarifa social, por lo que puede darse el caso de que haya consumidores que no paguen electricidad (un usuario acogido a tarifa social que no supere el mínimo de consumo exento).

El nuevo observatorio de precios por Internet estará en marcha antes de fin de año

El Gobierno anuncia una nueva frecuencia para la telefonía móvil

Zapatero anuncia medidas fiscales para los sectores afectados por la inflación

Sebastián: "Serán facturados únicamente por el consumo"

Sebastián anuncia una bajada del 2,4% en el precio de la bombona de butano

El Ministerio de Industria ha remitido hoy a la Comisión Nacional de la Energía (CNE) una propuesta de bajada de un 2,4% del precio de la bombona de butano a partir del 1 de julio. Así lo ha anunciado hoy el ministro Miguel Sebastián en una comparecencia ante la Comisión de Industria, Turismo y Comercio del Congreso

Sebastián anima a las familias a apuntarse a la nueva tarifa nocturna ante la subida de la luz

La modalidad prevé una rebaja de hasta el 47% en las horas valles de las 22 a las 10 horas y no necesita acumuladores. -El Plan Vive se limitará a unos 240.000 vehículos durante dos años

ELPAÍS.com - Madrid - 27/06/2008

Vota | Resultado ★★★★½ 30 votos | Comentarios - 14

El ministro de Industria, Comercio y Turismo, Miguel Sebastián, se ha defendido hoy de las críticas por aprobar una subida del precio de la luz del 5,6% de media en plena crisis animando a las familias a incorporarse a la nueva tarifa ahorro, que sustituye a la nocturna actual, ya que el consumo en las horas valle que van desde las 22 hasta las 10 horas se abaratará hasta un 47% y no precisa de acumuladores de energía.

El Ejecutivo destina 4.700 millones al fondo de las pensiones

Revisión tarifaria del Consejo de Ministros
DOCUMENTO (PDF - 135,22Kb) - 27-06-2008

En cualquier caso, tal y como ha admitido la vicepresidenta, María Teresa Fernández de la Vega, habrá familias que verán su tarifa aumentada, aunque a continuación destacó el "amplio conjunto de posibilidades" que ha puesto en marcha el Ejecutivo "para que paguen menos quienes menos consumen o quienes lo hacen de forma planificada".

La noticia en otros webs
- webs en español
- en otros idiomas

En la rueda de prensa posterior al Consejo de Ministros de hoy, que ha dado su visto bueno a la subida de tarifas para su entrada en vigor el próximo día 1 de julio, Sebastián ha asegurado en esta línea que la revisión era necesaria para reducir el déficit de tarifa, así como para "incentivar un consumo responsable" de la luz.

En este sentido, Sebastián ha calificado el déficit de "hipoteca invisible" que "incentiva el consumo en exceso, aumentando los beneficos de las eléctricas de forma artificial y aumentando las emisiones de CO_2", lo que "perjudica la balanza exterior de España".

Tras destacar que España es el país de la UE donde más ha subido el consumo de la energía en los últimos años, un 4% frente a la media europea del 1% o el avance del 0,5% de Alemania, el ministro ha asegurado que las nuevas tarifas sólo prevé subidas en el precio de la energía consumida, no así de los apartados de cuota fija o potencia contratada.

A parte de la recién creada tarifa social, que permitirá ahorrar un 16% a 4,5 millones de hogares que consuman menos de 3 Kilovatios hora, el jefe del Departamento ha explicado que todos los consumidores domésticos tendrán un mínimo gratuito en su factura eléctrica. Se trata, ha añadido, de un límite de 12,5 kilovatios por hora -un 10% del consumo medio normal- que no tendrá coste alguno.

Asimismo, con el objetivo de aumentar la competitividad de las empresas, se subirá sólo el 5% el recibo a las pymes al tiempo que ha avanzado que los grandes consumidores tendrán que acudir al mercado y firmar contratos con las eléctricas.

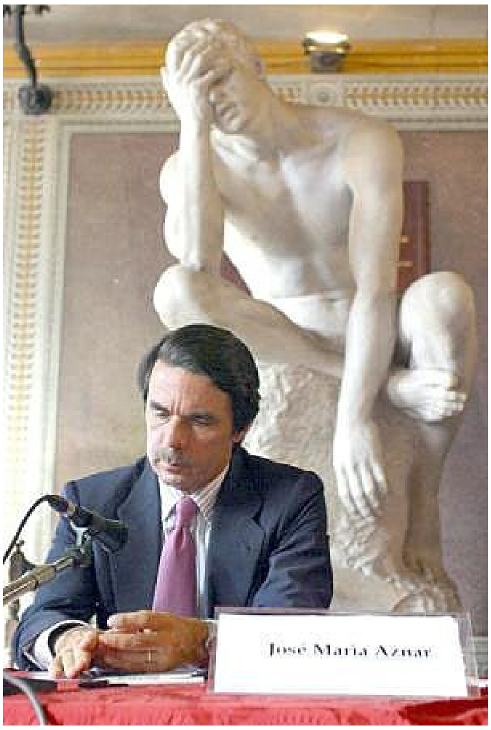
ALIMAÑA NEWS: IDENTIFICADO EL PROFESOR DE INGLÉS DE AZNAR



Exclusiva mundial de Alimaña News, redactor-jefe. Publicado el 21 julio 2006, 23:12 h.

Háganme ustedes el favor, cliquen aquí, y mientras escuchan, lean la letra en inglés, que para eso la pongo: canta el profesor de inglés de Aznar. Este redactor-jefe lo ha encontrado, fiel a su lema: "*La noticia antes de que ocurra*". Sin acosar a los protagonistas. Sin ponerles la alcachofa en la boca. Sin molestar. Con profesionalidad. Cuando Gatopardo se ponga al corriente de pago con éste que lo es, diré nombre y apellidos.

Autor: Antonio Moreno Alfaro

Muchas gracias a Gatopardo por el buen rato que me ha hecho pasar con esta noticia.
Se me han saltado las lágrimas de risa escuchando cantar al profesor y al alumno.
Ánimo y seguid dándonos de vez en cuando sesiones de terapia como ésta: la necesitamos.
Estoy seguro de que si antes de viajar a las Azores el alumno hubiera escuchado cantar al profesor, el trío de las Azores se hubiera quedado en dúo.

PIJADICAS CONTRA LA CRÍSIS

José Bono

Con lo que está cayendo en España, -la Bolsa en caída libre, pinchazo en la burbuja inmobiliaria y cientos de miles de damnificados por el sector de la construcción; burbuja alimentaria con los precios disparados hasta un 70%, inflación, aumento del paro, etc.- mi Pepe Bono, presidente del Congreso, declara la guerra al sincorbatismo en pleno verano madrileño, con cuarenta grados a la sombra.
A Bono le va el amaneramiento, el repulgo, el melindre postinero y ceremonial, la tiesura impostada , el corsé de cuerpo entero y el envaramiento entreverado con mohines de llaneza y humildad, y un interés patológico por la pijadica, la bagatela, y el como-decía-mi-padre, tan característicos de esa forma de ser y estar que consagró la Sección Femenina de las FET y de las JONS para las mujeres como Dios manda.
Y luego dirá que le pegan...

Apreciada Gata: Convendrá conmigo en que Bono acabará imponiendo el uso obligatorio de la medalla de la Virgen de Cortes cerrando los escotes de las diputadas, y la efigie del Cristo del Sahúco complementando las corbatas de los diputados (he estado a punto de decir caballeros). A chic no le gana nadie, hasta ahí podíamos llegar.

Fecha: 06/07/2008 11:57.

Autor: Victor Flyte

Querida, llevo años con una duda sobre Bono. ¿Es miembro del Opus Dei? Y, si no lo es, ¿es, cuanto menos "cooperador" de la citada institución? Según creo sus hijos han estudiado en la Universidad de Navarra que, sin ser la mejor, sí que es prestigiosa y de "tiesura impostada" y él mantiene una curiosa afición a dar charlas en los Colegios Mayores y Centros de la reiterada organización o instrumentos jurídicos colaterales (Grupo Fomento de Educación, etc)

Fecha: 13/07/2008 03:42.

Autor: A Victor Flyte: aquí enlace a Notitia...

Querido Victor:donde va el nombre te he puesto el enlace al blog "Notitia criminis" donde se cuenta la base y fines de la mística de Bono.

COLOMBIA: MÁS DE TRES MIL SECUESTRADOS NO HAN SIDO LIBERADOS

Libertad para TODOS
los secuestrados

Con motivo de la liberación de Íngrid Betancourt (ex candidata presidencial, secuestrada en febrero de 2002), junto a Thomas Howes (contratista estadounidense, secuestrado en febrero de 2003), Marc Gonçalves (contratista estadounidense, secuestrado en febrero de 2003), Keith Stansell (contratista estadounidense, secuestrado en febrero de 2003), Teniente Juan Carlos Bermeo (Ejército, secuestrado en agosto de 1998), Subteniente Raimundo Malagón Castellanos (Ejército, secuestrado en agosto de 1998), Sargento segundo José Ricardo Marulanda (Ejército, secuestrado en marzo de 1998), Cabo primero William Pérez (Ejército, secuestrado en marzo de 1998), Sargento segundo Erasmo Romero (Ejército, secuestrado en agosto de 1998), Cabo primero José Miguel Arteaga (Ejército, secuestrado en marzo de 1998), Cabo primero Armando Flórez (Ejército, secuestrado), Cabo primero Julio César Buitrago (Policía, secuestrado en agosto de 1998), Subintendente Armando Castellanos (Policía, secuestrado en noviembre de 1999), Teniente Vianey Rodríguez Porras (Policía), Cabo primero John Jairo Durán (Policía, secuestrado en agosto de 1998), no podemos olvidar que todavía faltan por liberar más de tres mil personas secuestradas por las FARC.
Creo conveniente recordar aquí lo que escribió, en marzo de 2007, Jaime Restrepo:

"Hay situaciones que son alentadoras para Colombia. Durante el año que terminó se redujo nuevamente el número de secuestros en el país: de 377 plagios registrados en 2005 se llegó a 282 en 2006, lo que representa una reducción del 25.2% en el número de secuestros durante el último año.
En este sentido también se registró una gran disminución en las pescas tenebrosas: mientras en 2005 se presentaron 15, el año que termina solo se reportaron cinco retenes ilegales, lo que representa una disminución del 66.7%.
Sin embargo las noticias son menos alentadoras **en Bogotá**, ciudad en la que se registró un incremento en el número de secuestros, pasando de 18 en 2005 a 24 en 2006.
No obstante lo más doloroso de esta tragedia nacional es que el secuestro con fines de extorsión de menores de edad registró un crecimiento del **65.1%:** en 2005 fueron secuestrados 28 niños y este año fueron reportados 43 casos, llegando a ser el sector social más vulnerable al secuestro, pues **los menores representan cerca del 18% de los colombianos secuestrados durante el 2006**... esto es una vergüenza para el país, que sigue recorriendo la misma senda de la indolencia frente a los menores de

edad.
Además esta penosa situación exige mayores esfuerzos para erradicar el secuestro de nuestra sociedad, no solo desde el Gobierno, sino también desde el núcleo esencial de cada niño: su familia, sus amigos y el círculo cercano de cada pequeño.

Ni un secuestro más

Desde hoy **Atrabilioso** inicia una campaña para exigir el regreso de **TODOS** los secuestrados.
La intención no es hacer de caja de resonancia a los que piden, de manera descarada, que sean liberados SOLO 60 secuestrados. Por el contrario: es un llamado a la nación que no se atiene a los dogmas mediáticos para no dejar a más de 3 mil colombianos secuestrados a su suerte.
Colombia necesita unirse, en una sola voz, exigiendo la **libertad INMEDIATA de TODOS** los que padecen ese flagelo salvaje del secuestro.
Según la fundación País Libre, son 3177 las personas que permanecen secuestradas en Colombia, 23 de las cuales fueron secuestradas en 2006… por ellos, por los 60 secuestrados políticos y por sus familias, la exigencia debe ser contundente: libertad para TODOS los secuestrados.
Aunque las cifras son esperanzadoras en cuanto a la reducción del secuestro, la sociedad colombiana debe ponerse en pie para erradicar este delito y no patrocinar la ocurrencia de nuevos secuestros mediante un supuesto canje humanitario que solo prolonga la angustia de 60 familias, mientras que llena de incertidumbre a miles de colombianos que cada día luchan por conseguir altas sumas de dinero que supuestamente permitirán la libertad de sus seres queridos.
Son tan graves los secuestros políticos como los cometidos para extorsionar, y TODOS los colombianos que padecen ese flagelo deben recibir la solidaridad y el compromiso de la Nación para alzar la voz y exigir su liberación inmediata y sin contraprestaciones.
Mientras UN solo colombiano esté secuestrado, TODOS los colombianos estaremos secuestrados, pues solo será cuestión de tiempo para que ese flagelo se acerque y toque las puertas de nuestros amigos, de nuestras familias o de nuestra propia casa.
El canje humanitario, si se puede llamar así, debería ser por TODOS los secuestrados y no solo por aquellos que fueron plagiados con la intención de chantajear al Estado mediante presiones políticas internas y externas, muchos de los cuales tienen familias poderosas que hacen ruido mediático para satisfacer intereses particulares (¡cómo cuestionarlo!) y de los violentos.
La libertad es un derecho que tenemos TODOS los colombianos y resulta repugnante que solo se alce la voz para reclamar el intercambio de un poco más del 2% del total de secuestrados en Colombia.

Por TODOS los secuestrados en Colombia: libertad inmediata y sin condiciones.
OTROS ARTÍCULOS SOBRE EL SECUESTRO EN COLOMBIA:

ULISES RUIZ, GOBERNADOR DE OAXACA, ACUSADO DE TENTATIVA DE HOMICIDIO, TORTURA Y ABUSO DE AUTORIDAD

La Procuraduría General de la República (PGR) recibió una denuncia en contra del gobernador de Oaxaca, Ulises Ruiz Ortiz, en la que se le acusa de ser presunto responsable de los delitos de tentativa de homicidio calificado, tortura y abuso de autoridad.
También fueron denunciados mandos policiacos de la entidad y el procurador estatal, Evencio Nicolás Martínez. La querella fue entregada por Emeterio Marino Cruz, integrante de la Asamblea Popular de los Pueblos de Oaxaca (APPO), quien en compañía de familiares y de diputados federales narró ante el Ministerio Público que el 16 de junio pasado fue detenido y sometido a actos de tortura.
Entrevistado afuera de las instalaciones de la PGR, Marino Cruz señaló que policías locales que *"buscaban reprimir a quienes formamos parte de la APPO"* lo golpearon hasta dejarlo en estado de coma.
Este caso provocó que la Comisión Nacional de los Derechos Humanos (CNDH) emitiera una recomendación al gobierno de Oaxaca a fin de que se sancione a los responsables.
Los diputados federales Aleyda Alavez y Alberto Estava acompañaron al denunciante y declararon ante los medios de comunicación que ya es tiempo de que las autoridades federales actúen *"en contra del gobierno represor de Ulises Ruiz".*
En la denuncia también se señala como presuntos responsables a Daniel Camarena Flores, director de la desaparecida policía ministerial del estado de Oaxaca, pues fue uno de los agentes que participaron en la detención de Marino Cruz.
También se acusó al ex director de la policía municipal de Oaxaca, Aristeo López Martínez, quien supuestamente dio la orden de que golpearan al miembro de la APPO.
"Me agarraron del cabello y me llevaron a golpes y patadas al interior de una caja de tráiler; después de tantos golpes que nos propinaron a mí y a las personas que también estaban detenidas, pedimos a gritos clemencia, pero los policías comenzaron a reírse, y en respuesta recibimos más golpes de tolete en la cabeza", dijo Marino Cruz.

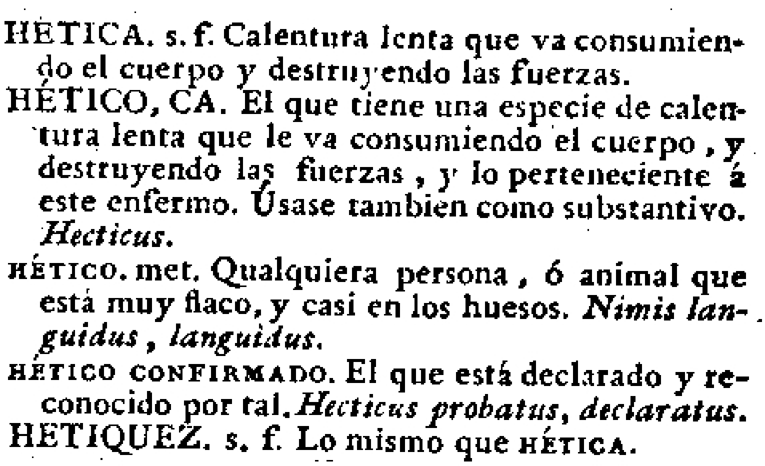
SANDIOS HONORIS CAUSA EN EL NEGOCIADO DE CULTURA (2)



HÉTICA. s. f. Calentura lenta que va consumiendo el cuerpo y destruyendo las fuerzas.
HÉTICO, CA. El que tiene una especie de calentura lenta que le va consumiendo el cuerpo, y destruyendo las fuerzas, y lo perteneciente á este enfermo. Úsase tambien como substantivo. *Hecticus.*
HÉTICO. met. Qualquiera persona, ó animal que está muy flaco, y casi en los huesos. *Nimis languidus, languidus.*
HÉTICO CONFIRMADO. El que está declarado y reconocido por tal. *Hecticus probatus, declaratus.*
HETIQUEZ. s. f. Lo mismo que HÉTICA.

Diccionario RAE, 1803

En una bitácora amiga, uno de los contertulios ha señalado como falta de ortografía la hache con la que escribí una palabra homófona. Como consultar las últimas ediciones del DRAE me provoca picazón, alipori, incontinencia risoria, espeluzno, jamacuco cerebral y hartazón máxima, acudí a la Biblioteca Virtual Cervantes para copiar y citar literalmente algunas frases que recordaba de El Buscón, donde Quevedo empleaba este vocablo. Y me encontré con esta esclarecedora Nota preliminar:

"Edición digital a partir del manuscrito de la obra depositado en el Museo Lázaro Galdiano de Madrid y cotejada con las ediciones críticas de E. Cros (Madrid, Taurus, 1988), P. Jauralde (Madrid, Castalia, 1990), C. C. García Valdés (Madrid, Bruño, 1991), I. Arellano (Madrid, Espasa Calpe, 1993) y F. Cabo Aseguinolaza (Barcelona, Crítica, 1993). Todas ellas son de imprescindible consulta para la correcta apreciación de la obra.
Sobre los distintos manuscritos de la obra, véase el artículo de Antonio Rodríguez Moñino, «Los manuscritos del *Buscón*», *Nueva Revista de Filología Hispánica*, nº 7 (1953), pp. 657-672.
Sobre los problemas de crítica textual de esta obra, al margen de las documentadas introducciones a las ediciones arriba citadas, véanse especialmente los estudios de Pablo Jauralde: «¿Redactó Quevedo dos veces el *Buscón*?», *Revista de Filología Románica*, V (1987-1988), pp. 101-111; «El texto del *Buscón* de Quevedo», *Dicenta*, nº 7 (1987-1990, pp. 83-103; «El texto perdido de *El Buscón*», en *Crítica textual y anotación filológica en obras del Siglo de Oro*, ed. de I. Arellano y J. Cañedo, Madrid, Castalia, 1991, pp. 293-

Para dar cuenta de las posibles opciones a la hora de editar la presente obra, la Biblioteca Virtual Miguel de Cervantes reproducirá digitalmente la primera edición de la misma (Zaragoza, Vergés, a costa de Roberto Duport, 1626) y está gestionando la autorización para reproducir la transcripción del manuscrito y la ejemplar edición crítica de Fernando Lázaro Carreter (Salamanca, Universidad, 1965).

Sobre los criterios de edición, en lo fundamental compartimos lo expuesto por Ignacio Arellano en sus imprescindibles artículos «Observaciones provisionales sobre la edición y anotación de textos del Siglo de Oro», en *Edición y anotación de textos del Siglo de Oro*, J. Cañedo e I. Arellano (eds.), Pamplona, EUNSA, 1987, pp. 339-555) y «Edición crítica y anotación filológica en textos del Siglo de Oro. Notas muy sueltas», en *Crítica textual y anotación filológica en obras del Siglo de Oro*, I. Arellano y J. Cañedo

(eds.), Madrid, Castalia, 1991, pp. 563-586).

No obstante, hemos optado por actualizar ortográficamente los términos cuya comprensión pudiera plantear problemas al lector no especializado."

Estos animales del Señor, para que tengamos una cabal comprensión del texto los que no somos catedráticos especialistas en el Siglo de Oro, han capado la hache cada vez que Quevedo escribió "hético" o "hética". De modo y manera que lo que Quevedo califica de desmedrado, escaso y enjuto, estos mentecatos lo transmutan en algo conforme a la moral, bueno y virtuoso.
Tienen una cultura con menos consistencia que una sopa de asilo.

Gatopardo

HÉTICA. ſ. f. Enfermedad que conſiſte en la intemperie cálida y ſeca de todo el cuerpo, con varios ſymptómas, eſpecialmente de calór externo en las partes extrémas, con acedía de eſtómago deſpues de la comida, flaqueza de cuerpo, ſudor nocturno, y otros. Proviene de la efervefcencia de la ſangre mas acre y ſalada, continuada lentamente. Es voz Griega, y aunque algunos arreglandoſe al orígen eſcriben y pronuncian Héctica, en el uſo común ſe le ha quitado la *c* por ſuavizar la pronunciacion. Otros la llaman Hetisía. Lat. *Hectica.*

Diccionario RAE, 1734

HETICO, CA. adj. El que padece la hética, ò lo que pertenece à ella: como Calentúra hética, pulso hético, &c. Lat. *Hecticus, a, um.* Lag. Diosc. lib. 2. cap. 43. Los compañónes del gallo nuevo, que aun no ha subido sobre las gallínas, son mui restaurativos de la virtud, digierense facilmente, producen gran quantidad de esperma, y convienen mucho à los *héticos*.

Hetico. Por semejanza se llama qualquier cosa que está mui flaca y desmedrada: y assi se dice, Mula hetica, talégo hético. Lat. *Nimis marcidus vel languidus.* Quev. Tacañ. cap. 2. Salí en un caballo *hético* y mústio, el qual mas de manco que de bien criado, iba haciendo reverencias.

Diccionario RAE, 1734

CAPITULO III.

De como fuy à un Pupilage por criado de Don Diego Coronel.

DEterminò, pues, Don Alonso de poner à su hijo en Pupilage. Lo uno, por apartarle de su regalo, y lo otro, por ahorrar de cuidado. Supo que havia en Segovia un Licenciado Cabra, que tenia per oficio criar hijos de Cavalleros, y embiò allà el suyo, y à mi para que le acompañasse, y sirviesse. Entramos primer Domingo despues de Quaresma en poder de la hambre viva, porque tal laceria no admite encarecimiento. El era un Clerigo cerbatana, largo solo en el talle, una cabeça pequeña, pelo vermejo; no ay mas que dezir para quien sabe el refran, que dize, ni gato, ni perro de aquella color: los ojos avezindados en el cogote, que parecia que mirava por cuebanos, tan hundidos, y obscuros, que era buen sitio el suyo para tiendas de mercaderes, la nariz entre Roma, y Francia, porque se le havia comido de unas bubas de resfriado, que aun no fueron de vicio, porque cuestan dinero; las barbas descoloridas de miedo de la boca vezina, que de pura hambre parecia que amenaçava à comerselas; los dientes le faltavan no sè quantos, y pienso, que por holgaçanes, y vagamundos se los havian desterrado: el gaznate largo como Avestruz, con una nuez tan salida, que parecia se iva à buscar de comer, forçada de la necessidad; los braços secos, las manos como un manojo de sarmientos cada una; mirado de medio abaxo, parecia tenedor, ò compàs, con dos piernas largas, y flacas; su andar muy de spacio; si se descomponia, sonavan los huessos como tablillas de San Lazaro; la habla hetica, la barba grande, que nunca se la cortava, por no gastar; y èl dezia, que era tanto el asco que le dava ver las manos del barbero por su cara, que antes se dexaria matar, que tal permitiesse: cortavale los cabellos un muchacho de los otros. Traïa un bonete los dias de Sol ratonado, con mil gateras, y guarniciones de grasa; era de cosa que fue paño, con los fondos de caspa: La sotana, segun dezian algunos, era milagrosa, porque no se sabia de que color era. Unos, viendola tan sin pelo, la tenian por de cuero de rana; otros dezian, que era ilusion; desde cerca parecia negra, y desde lexos entre azul; llevavala sin ceñidor, no traia cuello, ni puños; parecia con los cabellos largos, la sotana misera, y corta, lacayuelo de la muerte. Cada çapato podia ser tumba de un Filisteo, pues su aposento, aun arañas no havia en èl; conjurava los ratones, de miedo que no le royessen algunos mendrugos que guardava; la cama tenia en el suelo, y dormia siempre de un lado, por no gastar las sabanas; al fin era archipobre, y protomiseria. A poder, pues, deste vine, y en su poder estuve con Don Diego, y la noche que llegamos, nos señalò nuestro aposento, y nos hizo una platica corta, que por no gastar tiempo no durò mas. Dixonos lo que haviamos de hazer: estuvimos ocupados en esso hasta la hora del

Como pillen a "Platero y yo", de Juan Ramón Jiménez, donde dice "Los chiquillos se alejan, y en el misterio de las puertas sin luz, se habla de unos hombres que «sacan el unto a los niños para curar a la hija del rey, que está hética»..." o a Cervantes:
"...estaba Rocinante maravillosamente pintado,
tan largo y tendido , tan atenuado y flaco,
con tanto espinazo , tan hético confirmado que
mostraba bien al descubierto con cuanta advertencia
y propiedad se le habia puesto el nombre de Rocinante..."
Hay suficientes subvenciones para que sigan mutilando la Lengua Española que luego dicen defender firmando manifiestos. No es mal negocio.

DIEGO CATALÁN: ROMANCE DE LA BELLA EN MISA

1
LA BELLA EN MISA

El Romancero que nos legaron los impresores del siglo XVI, tanto el que ellos llamaron "viejo" como el que crearon los poetas del Siglo de Oro, ha seguido siendo apreciado literariamente por los lectores desde que los románticos ingleses y alemanes lo recuperaron como una de las creaciones literarias españolas de valor universal. Cualquiera puede hoy acceder a sus textos en buenas ediciones.

No ocurre así con el Romancero llegado, de generación en generación, al siglo XX por transmisión oral. La lenta y caótica recolección de sus múltiples versiones, a lo largo de todo ese siglo, en los más diversos lugares del mundo hispánico ha dado lugar a que sus textos hayan quedado como especímenes documentales, estrechamente vinculados a los intereses de filólogos, de etnógrafos, o de aficionados regionales. La incorporación de sus poemas a la literatura canónica española ha sido diferida para un mañana que nunca llega. Los lectores de Literatura no saben cómo acceder a ellos.

Mi interés continuado por el arte poética del romancero oral me lleva a ofrecer a un público general lo mejor de ese Romancero, emulando a los editores del siglo XVI. Mi propósito es mostrar que la labor de reelaboración y pulimiento, durante cuatro siglos y medio, realizada por los cientos (posiblemente miles) de transmisores de ese caudal poético que enlazan el Romancero del siglo XVI con el Romancero del siglo XX, ha creado un sinfín de poemas que cualitativamente no sólo compiten con el antiguo Romancero, sino que muy a menudo le añaden quilates, ya que responden a un arte poética que sorprende y deleita a los mejores paladares críticos.

Una mayoría de los romances cantados en el siglo XX versa sobre temas que tienen su paralelo en la Balada europea o, incluso, universal. Su origen hunde sus raíces en la oscuridad de los tiempos más lejanos, siendo imposible para nosotros, en ciertos casos, seguir la ruta de su expansión.

Mañanita de San Juan,
  mañanita de primor,
cuando damas y galanes
  van a oír misa y sermón,
una dama va en el medio

que de todas es la flor.
Lleva saya sobre saya,
anillos de gran valor.
A la entrada de la iglesia
su pie derecho metió;
solamente con dos dedos
agua bendita tomó
y un poquito más arriba
de rodillas se ahincó;
tres golpes se dio en el pecho,
ha dicho la confesión.
El que decía la misa
no la pudo decir, no;
el que le estaba ayudando
las vinajeras quebró;
el sacristán en el coro
el "Credo" se le olvidó;
el monacillo tocando
ha quebrado el esquilón;
las campanas repicando
solas han perdido el son.
Las damas mueren de envidia
y los galanes de amor,
sólo en ver tanta hermosura
como esta niña llevó.

Según Miguel de Unamuno, quien recogió en Almoharín (Cáceres) , a principios del s. XX, una de las versiones más similares a la presente entre las conservadas en el Archivo Menéndez Pidal / Goyri del Romancero (hoy en la "Casa Menéndez Pidal" del "Olivar de Chamartín"), allí se cantaba en la Nochebuena con un tambor destemplado; uno lo iba diciendo verso a verso y el pueblo repetía en coro lo que él iba cantando, animándole con el estribillo "Eá , tú, la Noche de Navidad".

Este romance nos es conocido en versiones de estructura muy semejante pertenecientes a las diversas lenguas hispánicas: portuguesas, andaluzas, extremeñas y castellanas, sefardíes de los Balcanes y el Oriente próximo, sefardíes del Norte de África y catalanas; también las hay muy similares francesas.

El tema se halla incorporado a una balada griega, búlgara y rumana, "La madrina que reemplaza a la novia", donde presenta características propias. Pero debió tener desde antiguo existencia autónoma. En forma muy semejante a la del extremo occidental de Europa tiene su paralelo en una balada china que figura en la novela "Chin P'ing Mei", en un episodio que narra cómo Loto de Oro, después de dormir con Hsi-mên Ch'ing en una cámara del templo budista, sin preocuparse de los servicios fúnebres en honra del señor Wu, su marido, a quien los amantes han asesinado arteramente, acude, al fin, a la ceremonia después de peinarse y vestirse para extremar su atractivo:

El chantre perdió el seso y, al leer los libros sagrados ,
no sabía si se hallaban cabeza abajo.
Los santos oficiantes se volvían locos al leer sus oraciones,
no sabiendo a ciencia cierta qué línea leían.
El acólito del incensario puso los vasos boca abajo y otro lo agarró
creyendo que era su candela.
El lector, en vez de leer "El poderoso imperio de Sung",
lo llamó en su lugar "de Tang".
El exorcista, en vez de salmodiar "Señor Wu",
exclamó : "¡Señora Wu!".
Al viejo monje le batía tan terriblemente el corazón,
que erró el bombo y dio sobre la mano del monje joven.
El joven monje tenía tan absorta su mente,
que , con el palillo del bombo, dio sobre la cabeza del viejo monje.
Largos y pacientes años de noviciado
allí se esfumaron;

y, si hubieran descendido sobre la tierra diez mil santos,
  no habría sucedido nada más aceptable.

El romance castellano se publicó ya en un pliego suelto del siglo XVI, con el final:

A la entrada de la hermita
  relumbrando como el sol.
El abad que dize la missa
  no la puede dezir, no;
monazillos que le ayudan
  no aciertan responder, non:
por dezir: "Amén, amén",
  dezían: "Amor, amor".

En esta vieja versión, la dama no sólo se viste lujosamente sino que se preocupa de realzar su belleza mediante el tocador, como en la balada china:

En la su boca muy linda
  lleva un poco de dulçor,
en la su cara muy blanca
  lleva un poco de color,
y en los sus ojuelos garços
  lleva un poco de alcohol.

Autor: carlos martinez

Hoy, no lo se, pero tradicionalmente la Misa, como el paseo de después por el pueblo, era tal cual lo canta el romancero como una pasarela de verse y dejarse ver. De rumorear, chismorrear y suspirar. Con las fiestas del pueblo era casi la única ocasión para lucir palmito.

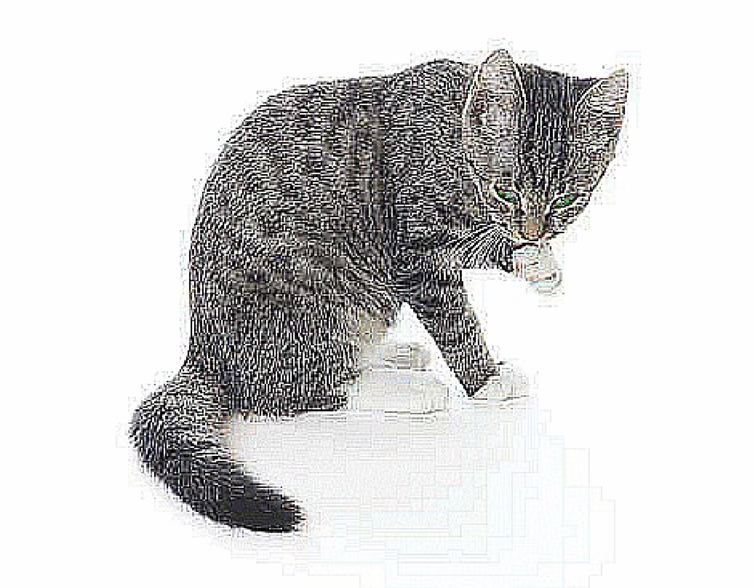
FÉLIX LOPE DE VEGA Y CARPIO: GATOMAQUIA



Soneto de doña Teresa Verecundia de Lope de Vega

Al Licenciado Tomé De Burguillos

Con dulce voz y pluma diligente,
y no vestida de confusos caos,
cantáis, Tomé, las bodas, los saraos
de Zapaquilda y Mizifuf valiente.

Si a Homero coronó la ilustre frente
cantar las armas de las griegas naos,
a vos, de los insignes marramaos
guerras de amor por súbito accidente.

Bien merecéis un gato de doblones,
aunque ni Lope celebréis, o el Taso,
Ricardos o Gofredos de Bullones.

pues que por vos, segundo Gatilaso,
quedarán para siempre de ratones
libres las bibliotecas del Parnaso.

Silva I (Gatomaquia) de Lope de Vega

A don Lope Felix del Carpio, soldado en la Armada de su Majestad

Yo, aquel que en los pasados
tiempos canté las selvas y los prados,
éstos vestidos de árboles mayores
y aquéllas de ganados y de flores,
las armas y las leyes,
que conservan los reinos y los reyes;

agora, en instrumento menos grave,
canto de amor suave
las iras y desdenes,
los males y los bienes,
no del todo olvidado
el fiero taratántara, templado
con el silbo del pífaro sonoro.
Vosotras, musas del castalio coro,
dadme favor, en tanto
que con el genio que me distes canto
la guerra, los amores y accidentes
de dos gatos valientes;
que, como otros están dados a perros,
o por ajenos o por propios yerros,
también hay hombres que se dan a gatos,
por olvidos de príncipes ingratos,
o porque los persigue la fortuna
desde el columpio de la tierna cuna

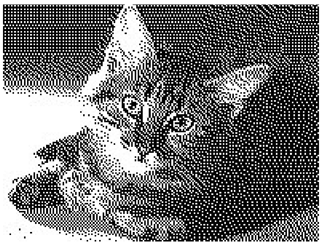
Tú, don Lope, si acaso
te deja divertir por el Parnaso
el Holandés pirata,
gato de nuestra plata,
que infesta las marinas
por donde con la armada peregrinas,
suspende un rato aquel valiente acero
con que al asalto llegas el primero,
y escucha mi famosa ''Gatomaquia''.
Así desde las Indias a Valaquia
corra tu nombre y fama,
que ya por nuestra patria se derrama,
desde que viste la morisca puerta
de Túnez y Biserta,
armado y niño, en forma de Cupido,
con el Marqués famoso
de mejor apellido,
como su padre por la mar dichoso.
No siempre has de atender a Marte airado,
desde tu tierna edad ejercitado,
vestido de diamante,
coronado de plumas, arrogante;
que alguna vez el ocio
es de las armas cordial socrocio,
y Venus en la paz, como Santelmo,

con manos de marfil le quita el yelmo.

Estaba sobre un alto caballete
de un tejado sentada
la bella Zapaquilda al fresco viento,
lamiéndose la cola y el copete,
tan fruncida y mirlada
como si fuera gata de convento.
Su mesmo pensamiento
de espejo le servía,
puesto que un rofo casco le traía
cierta urraca burlona
que no dejaba toca ni valona
que no escondía por aquel tejado,
confín del corredor de un licenciado.
Ya que lavada estuvo,
y con las manos, que lamidas tuvo,
de su ropa de martas aliñada,
cantó un soneto en voz medio formada
en la arteria bocal, con tanta gracia
como pudiera el músico de Tracia;
de suerte, que cualquiera que la oyera,
que era solfa gatuna conociera,
con algunos cromáticos disones,
que se daban al diablo los ratones.

Asomábase ya la Primavera
por un balcón de rosas y alelíes,
y Flora, con dorados borceguíes,
alegraba risueña la ribera;
tiestos de Talavera
prevenía el verano,
cuando Marramaquiz, gato romano,
aviso tuvo cierto de Maulero,
un gato de la Mancha, su escudero,
que al sol salía Zapaquilda hermosa,

cual suele amanecer purpúrea rosa
entre las hojas de la verde cama,
rubí tan vivo, que parece llama,
y que con una dulce cantilena
en el arte mayor de Juan de Mena
enamoraba el viento.
Marramaquiz, atento
a las nuevas del paje
(que la fama enamora desde lejos),
que, fuera de las naguas de pellejos
del campanudo traje,
introdución de sastres y roperos,
doctos maestros de sacar dineros,
alababa su gracia y hermosura,
con tanta melindrífera mesura,
pidió caballo, y luego fué traída
una mona vestida
al uso de su tierra,
cautiva en una guerra
que tuvieron las monas y los gatos.
Púsose borceguíes y zapatos,
de dos dediles de segar abiertos,
que con pena calzó, por estar tuertos;
una cuchara de plata por espada;
la capa, colorada,
a la francesa, de una calza vieja,
tan igual, tan lucida y tan pareja,
que no será lisonja
decir que Adonis en limpieza y gala,
aunque perdone Venus, no le iguala;
por gorra de Milán, media toronja,
con un penacho rojo, verde y bayo,
de un muerto por sus uñas papagayo,
que diciendo: «¿ Quién pasa?» cierto día,
pensó que el Rey venía,
y era Marramaquiz, que andaba a caza,
y halló para romper la jaula traza;
Por cuera, dos mitades que de un guante
le ataron por detrás y por delante,
y un puño de una niña por valona.
Era el gatazo de gentil persona
y no menos galán que enamorado,
bigote blanco y rostro despejado,
ojos alegres, niñas mesuradas
de color de esmeraldas diamantadas,
y a caballo en la mona, parecía
el paladín Orlando, que venía
a visitar a Angélica la bella.



La recatada ninfa, la doncella,
en viendo el gato, se mirló de forma,
que en una grave dama se transforma,
lamiéndose, a manera de manteca,
la superficie de los labios seca,
y con temor de alguna carambola,
tapó las indecencias con la cola,
y bajando los ojos hasta el suelo,
su mirlo propio le sirvió de velo;
que ha de ser la doncella virtuosa
más recatada mientras más hermosa.
Marramaquiz entonces, con ligeras
plantas batiendo el tetuán caballo,
que no era Piedehierro, o Piedegallo,
le dió cuatro carreras,
con otras gentilezas y escarceos,
alta demostración de sus deseos,
y la gorra en la mano,
acercóse galán y cortesano,
donde le dijo amores.
Ella, con las colores
que imprime la vergüenza,
le dió de sus guedejas una trenza;
y al tiempo que los dos marramizaban
y con tiernos singultos relamidos
alternaban sentidos,
desde unas claraboyas que adornaban
la azutea de un clérigo vecino,
un bodocazo vino,
disparado de súbita ballesta
más que la vista de los ojos presta,
que, dándole a la mona en la almohada,
por de dentro morada,
por de fuera pelosa,
dejó caer la carga, y presurosa
corrió por los tejados,
sin poder los lacayos y criados
detener el furor con que corría.
No de otra suerte que en sereno día
balas de nieve escupe y, de los senos
de las nubes, relámpagos y truenos
súbita tempestad en monte o prado,
obligando que el tímido ganado
atónito se esparza,

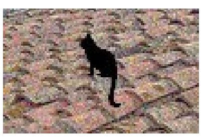
ya dejando en la zarza
de sus pungentes laberintos vana,
la blanca, o negra lana
(que alguna vez la lana ha de ser negra),
y hasta que el Sol en arco verde alegra
los campos, que reduce a sus colores,
no vuelven a los prados ni a las flores,
así los gatos iban alterados
por corredores, puertas y terrados,
con trágicos maúllos,
no dando, como tórtolas, arrullos,
y la mona, la mano en la almohada,
la parte occidental descalabrada,
y los húmidos polos circunstantes
bañados de medio ámbar, como guantes.

.

En tanto que pasaban estas cosas,
y el gato en sus amores discurría
con ansias amorosas
(porque no hay alma tan helada y fría,
que Amor no agarre, prenda y engarrafe),
Y el más alto tejado enternecía,
aunque fuesen las tejas de Getafe,
y ella, con ñifiñafe,
se defendía con semblante airado,
aquel de cielo y tierra monstro alado
que, vestido de lenguas y de ojos,
ya decrépito viejo con antojos,
ya lince penetrante,
por los tres elementos se pasea
sin que nadie le vea,
con la forma elegante
de Zapaquilda discurrió ligero
uno y otro hemisfero,
aunque con las verdades lisonjera,
y en cuanto baña en la terrestre esfera,
sin excepción de promontorio alguno,
el cerúleo Neptuno,
plasmante universal de toda fuente,
desde Bootes a la Austral Corona
y de la zona frígida a la ardiente ...

Esto dijo la Fama, que pregona
el bien y el mal; y en viendo su retrato,

se erizó todo gato
y dispuso venir, con esperanza
del galardón que un firme amor alcanza.
Los que vinieron por la tierra en postas,
trujeron, por llegar a la ligera,
sólo plumas y banda, calza y cuera;
los que habitaban de la mar las costas
(tanto pueden de amor dulces empresas)
vinieron en artesas,
mas no por eso menos
hasta la cola de riquezas llenos;
y otros, por bizarría,
para mostrar después la gallardía,
en cofres y baúles,
sulcando las azules
montañas de Anfitrite;
y alguno que a disfraces se remite,
por no ser conocido,
en una caja de orinal metido.
Con esto, en muchos siglos no fué vista
como en esta conquista
tanta de gatos multitud famosa,
por Zapaquilda hermosa:
Apenas hubo teja o chimenea
sin gato enamorado,
de bodoque tal vez precipitado,
como Calisto fué por Melibea.
ni ratón parecía,
ni el balbuciente hocico permitía
que del nido saliese,
ni queso ni papel se agujeraba,
por costumbre o por hambre que tuviese,
ni poeta por todo el universo
se lamentó que le royesen verso,
ni gorrión saltaba,
ni verde lagartija
salía de la cóncava rendija.
Por otra parte el daño compensaba
que de tanto gatazo resultaba;
pues no estaba segura
en sábado morcilla ni asadura,
ni panza, ni cuajar, ni aun en lo sumo
de la alta chimenea
la longaniza al humo,
por imposible que alcanzarla sea,
exempto a la porfía en la esperanza,
que tanto cuanto mira, tanto alcanza.



Entre esta generosa ilustre gente

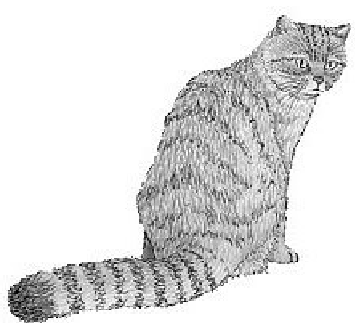
vino un gato valiente,
de hocico agudo y de narices romo,
blanco de pecho y pies, negro de lomo,
que Mizifuf tenía
por nombre, en gala, cola y gallardía
célebre en toda parte
por un Zapinarciso y Gatimarte.
Éste, luego que vió la bella gata,
más reluciente que fregada plata,
tan perdido quedó, que noche y día
paseaba el tejado en que vivía,
con pajes y lacayos de librea
(que nunca sirve mal quien bien desea);
Y sucedióle bien, pues luego quiso,
¡Oh gata ingrata!, a Mizifuf Narciso,
dando a Marramaquiz celos y enojos.
No sé por cuál razón puso los ojos
en Mizifuf, quitándole al primero,
con súbita mudanza,
el antiguo favor y la esperanza.
¡Oh, cuánto puede un gato forastero,
y más, siendo galán y bien hablado,
de pelo rizo y garbo ensortijado!
Siempre las novedades son gustosas:
no hay que fiar de gatas melindrosas.
¿Quién pensara que fuera tan mudable
Zapaquilda, cruel y inexorable,
y que al galán Marramaquiz dejara
por un gato que v1ó de buena cara,
después de haberle dado
un pie de puerco hurtado,
pedazos de tocino y de salchichas?
¡Oh, cuán poco en las dichas
está firme el amor y la fortuna!
¿En qué mujer habrá firmeza alguna?
¿Quién tendrá confianza,
si quien dijo mujer, dijo mudanza?

Marramaquiz, con ansias y desvelos,
vino a enfermar de celos,
porque ninguna cosa le alegraba.
Finalmente, Merlín, que le curaba,
gato de cuyas canas, nombre y ciencia
era notoria a todos la experiencia,
mandó que se sangrase;
y como no bastase,
vino a verle su dama,
aunque tenía en un desván la cama,

adonde la carroza no podía
subir, por alta, y por la estrecha vía;
pero, en fin, apeada,
entró, de su escudero acompañada.
Mirándose los dos severamente,
después de sosegado el accidente,
él con maúllo habló, y ella con mirlo,
(que fuera harto mejor pegarla un chirlo);
pero, por alegralle la sangría,
le trujo su criada Bufalía
una pata de ganso y dos ostiones.
Él se quejó con tímidas razones
En su lenguaje mizo,
a que ella con vergüenza satisfizo;
quejas que, traducidas dél y della,
así decían: «Zapaquilda bella,
¿por qué me dejas tan injustamente?»
¿Es Mizifuf más sabio? ¿Es más valiente?
¿Tiene más ligereza, mejor cola?
¿No sabes que te quise elegir sola
entre cuantas se precian de mirladas,
de bien vestidas y de bien tocadas?
¿Esto merece que un invierno helado,
de tejado en tejado
me hallaba el alba al madrugar el día,
con espada, broquel y bizarría,
más cubierto de escarcha
que soldado español que en Flandes marcha
con arcabuz y frascos?
Si no te he dado telas y damascos,
es porque tú no quieres vestir galas
sobre las naturales martingalas,
por no ofender, ingrata a tu belleza,
las naguas que te dió naturaleza.
Pero en lo que es regalos, ¿quién ha sido
más cuidadoso, como tú lo sabes,
en cuanto en las cocinas, atrevido,
pude garrafiñar de peces y aves?
¿Qué pastel no te truje, qué salchicha?
¡Oh terrible desdicha!
¡Pues no soy yo tan feo!
que ayer me vi, mas no como me veo,
en un caldero de agua que de un pozo
sacó para regar mi casa un mozo,
y dije: «¿Esto desprecia Zapaquilda?
¡Oh celos! ¡Oh piedad! ¡Oh amor! reñilda».
.

No suele desmayarse al Sol ardiente
la flor del mismo nombre y la arrogante
cerviz bajar humilde, que la gente,

por la loca altitud, llamó gigante,
ni queda el tierno infante
más cansado, después de haber llorado,
de su madre en el pecho regalado,
que el amante quedó sin alma. ¡Oh cielos,
qué dulce cosa amor, qué amarga celos!
Ella, como le vió que ya exhalaba
blandamente el espíritu en suspiros,
y que piramizaba
entre dulces de Amor fingidos tiros,
porque no se le rompa vena o fibra,
el mosqueador de las ausencias vibra,
pasándole dos veces por su cara.
Volvióle en sí; que aquel favor bastara
para libralle de la muerte dura,
y luego, con melífera blandura,
le dijo en lengua culta:
«Si tu amor dificulta
el que me debes, en tu agravio piensas
tan injustas ofensas;
que, aunque es verdad que Mizifuf me quiere
y dice a todos que por mí se muere,
yo te guardo la fee como tu esposa».
Cesó con esto Zapaquilda hermosa,
sellando honesta las dos rosas bellas;
que siempre hablaron poco las doncellas,
que, como las viudas y casadas,
no están en el amor ejercitadas.



Bajaba ya la noche,
y las ruedas del coche,
tachonadas de estrellas,
brilladores diamantes y centellas,
detrás de las montañas resonaban;
los pájaros callaban,
dejando el campo yermo,
cuando los pajes del galán enfermo
en el alto desván hachas metían,
que alumbrar la carroza prevenían.
Entonces los amantes
(que son los cumplimientos importantes),
ella por irse, y él quedarse a solas,
se hicieron reverencia con las colas.

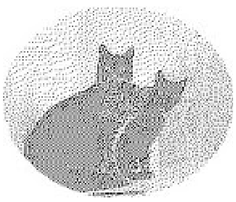
Silva II

Convaleciente ya de las heridas
de los crueles celos
de Micifuf, Marrarnaquiz valiente
(aquellos que han costado tantas vidas,
y que en los mismos cielos
a Júpiter, señor del rayo ardiente,
con disfraz indecente,
fugitivo de Juno,
su rigor importuno
tantas veces mostraron,
que en fuego, en cisne,
en buey le trasformaron
por Europa, por Leda y por Egina),
con pálida color y banda verde,
para que la sangría se le acuerde
(que amor enfermo a condolerse inclina).
paseaba el tejado y la buharda
de aquella ingrata cuanto hermosa fiera.
Quien ama fieras, ¿qué firmeza espera?
¿Qué son, qué premio aguarda?
Zapaquilda, gallarda,
estaba en su balcón, que no atendía
más de a saber si Mizifuf venía,
cuando Garraf, su paje,
si bien de su linaje,
llegó con un papel y una bandeja.
Ella la cola y el confín despeja,
y la bandeja toma,
sobre negro color labrada de oro
por el indio oriental, y con decoro
mira si hay algo que primero coma;
ofensa del cristal de la belleza,
propia naturaleza
de gatas ser golosas,
aunque al tomar se finjan melindrosas;

y antes de oír al paje,
ve las alhajas que el galán envía:
qué joya, qué invención, qué nuevo traje.
En fin, vió que traía
un pedazo de queso
de razonable peso
y un relleno de huevos y tocino
Atis, en fruta que produce el pino
entre menuda rama,
en la falda del alto Guadarrama,
por donde van al bosque de Segovia;
y luego, en fee de que ha de ser su novia,
dos cintas que le sirvan de arracadas,
gala que sólo a gatas regaladas,
cuando pequeñas, las mujeres ponen.
que de rosas de nácar las componen.
Tomó luego el papel, y con sereno
rostro apartando el queso y el relleno,
vió que el papel decía:
«Dulce señora, dulce prenda mía,
sabrosa (aunque perdone Garcilaso
si el consonante mismo sale al paso)
más que la fruta del cercado ajeno:
ese queso, mi bien, ese relleno
y esas cintas de nácar os envío,
señas de la verdad del amor mío».

Aquí llegaba Zapaquilda, cuando
Marramaquiz, celoso, que mirando
estaba desde un alto caballete
tan gran traición, colérico arremete,
y echa veloz, de ardiente furia lleno,
una mano al papel y otra al relleno.
Garraf se pasma y queda sin sentido,
como el que oyó del arcabuz el trueno
estando divertido;
a quien el ofendido
tiró una manotada con las fieras
uñas, de suerte, que, formando esferas
por la región del aire vagaroso
le arrojó tan furioso,
que en el claro cristal de sus espejos
pudo cazar vencejos,
menos apasionado y más ocioso.

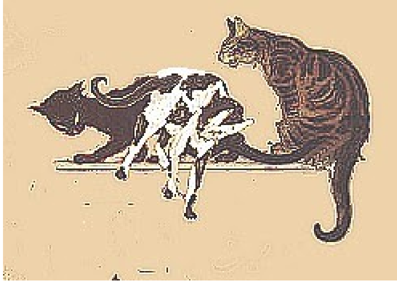
No de otra suerte el jugador ligero
le vuelve la pelota al que la saca,
herida de la pala resonante;
quéjase el aire, que del golpe fiero
tiembla, hasta tanto que el furor se aplaca,
y chaza el que interviene, el pie delante.
el gatazo arrogante,
sin soltar el relleno, despedaza
el papel, que en los dientes,
con la espuma celosa, vuelve estraza,
y a Zapaquilda atónita amenaza.
Como se suele ver en las corrientes
de los undosos ríos quien se ahoga,
que, asiéndose de rama, yerba o soga,
la tiene firme, de sentido ajeno,
así Marramaquiz tiene el relleno;
que, ahogándose en congojas y desvelos,
no soltaba la causa de los celos.
¡Oh, cuánto amor un alma desespera,
pues cuando ya se ve sin esperanza,
en un relleno tomará venganza!
Mas ¿quién imaginara que pudiera
dar celos el amor, en ocasiones,
con rellenos de huevos y piñones?
Mas ¡ay de quien le había
hecho para la cena de aquel día!



Huyóse al fin la gata, y, con el miedo,
tocó las tejas con el pie tan quedo,
que la amazona bella parecía
que por los trigos pálidos corría
sin doblar las espigas de las cañas:
que de tierras extrañas
tales gazapas las historias cuentan.
Los miedos que a la gata desalientan
la hicieron prometer, si la libraba,
al niño Amor un arco y una aljaba,
de aquel celoso Rodamonte fiero
hasta pasar las furias del enero,
el cual juró olvidarla, y en su vida,
desnuda ni vestida,
volver a verla, ni tener memoria
de la pasada historia,
y buscar algún sabio
para satisfacción de tanto agravio.
Pero fueron en vano sus desvelos;
que amor no cumple lo que juran celos,

y tanto puede una mujer que llora,
que vienen a reñirla, y enamora,
creyendo el que ama, en sus celosas iras,
por una lagrimilla mil mentiras.
y como Ovidio escribe en su Epistolio,
que no me acuerdo el folio,
estas heridas del amor protervas
no se curan con hierbas;
que no hay para olvidar amor remedio
como otro nuevo amor, o tierra en medio.

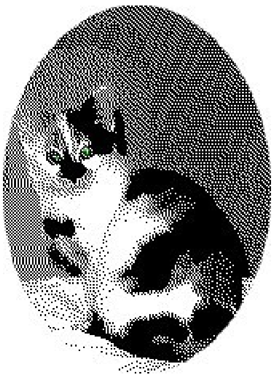
Garraf, en tanto que esto se trataba,
estropeado a Mizifuf llegaba,
mayando tristemente
en acento hipocóndrico y doliente,
como suelen andar los galloferos
para sacar dineros,
manqueando de un brazo
colgado de un retazo,
y débiles las piernas,
una cerrando de las dos linternas,
por mirar a lo bizco.
Luego en el corazón le dio un pellizco
la mala nueva, que adelanta el daño,
haciendo el aposento al desengaño,
y díjole: «¿Qué tienes,
Garraf amigo, que tan triste vienes?»
Entonces él, moviendo tremolante
blanda cola detrás, lengua delante,
le refirió el suceso,
y que Marramaquiz papel y queso.
y relleno también, le había tomado,
como celoso airado,
como agraviado necio,
con infame desprecio,
con descortés porfía,
y que, de tan estraña gatería
Zapaquilda admirada,
huyó por el desván, la saya alzada;
que lo que en las mujeres son las naguas,
de raso, tela o chamelote de aguas,
es en las gatas la flexible cola,
que ad libitum se enrosca o se enarbola.



Contóle que de aquella manotada,
con su cuerpo afligido,
de miedo helado y de licor teñido,
descalabró los aires,
y, con otros agravios y desaires,
que prometió vengarse por la espada
de haberle enamorado a Zapaquilda
y hablarla en el tejado de Casilda
(una tendera que en la esquina estaba);
y dijo que pensaba,
en desprecio y afrenta de sus dones,
hacer de los listones
cintas a sus zapatos.
¡Oh celos!, si entre gatos,
de burlas y de veras,
formáis tales quimeras,
¿qué haréis entre los hombres
de hidalgo proceder y honrados nombres?
No estuvo más airado
Agamenón en Troya
al tiempo que, metiendo la tramoya
del gran Paladión, de armas preñado,
echaron fuego a la ciudad de Eneas
de ardientes hachas y encendidas teas
(causa fatal del miserable estrago
de Dido y de Cartago,
por quien dijo Virgilio,
destituida de mortal auxilio,
que llorando decía:
"¡Ay, dulces prendas cuando Dios quería!”),
ni Barbarroja en Túnez,
ni el fuerte Pirro, ni Simón Antúnez,
éste bravo español y griego el otro,
que Mizifuf, como si fuera potro
relinchando de cólera, en oyendo
el fiero y estupendo
furor de su enemigo;
mas, prometiendo darle igual castigo,
se fué a trazar el modo
de vengarse de todo;
que a un pecho noble, a un ínclito sujeto,
mayor obligación, más celo alcanza
de poner en efeto
desempeñar su honor con la venganza.

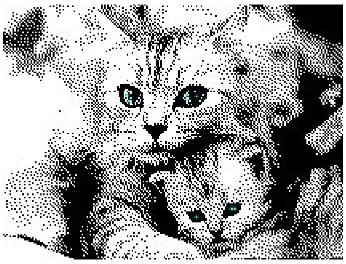
Marramaquiz, en tanto,
desesperado por las selvas iba
para buscar el sabio Garfiñanto,
al tiempo que el Aurora, fugitiva
de su cansado esposo,
arrojaba la luz a los mortales
y el Sol, infante en líquidos pañales
de celajes azules,
mandaba recoger en sus baúles,
para poder abrir los de oro y rosa,
el manto de la noche temerosa,
aunque era todo el manto de diamantes,
en el zafiro nítido brillantes
ojos del sueño, el hurto y el espanto.
Este gatazo y sabio Garfiñanto,
cano de barba y de mostachos yerto,
de un ojo remellado y de otro tuerto,
bien que de ilustre cola venerable,
y que sabía con rigor notable
natural y moral filosofía,
por los montes vivía
en una cueva oculta,
cuya entrada a las fieras dificulta,
como el de Polifemo, un alto risco.
No se le daba un prisco
de riquezas del mundo; que estimaba
sólo el Sol, que Alejandro le quitaba
a aquel que, de los hombres puesto en fuga,
metido en un tonel, era tortuga.
¡Bien haya quien desprecia
esta fábula necia
de honores, pretensiones y lugares,
por estudios o acciones militares!
Sabía Garfiñanto astrología,
mas no pronosticaba;
que decía que el cielo gobernaba
una sola virtud que le movía,
a cuya voluntad está sujeto
cuanto crió, que todo fué perfeto.
no sacaba almanaque
ni decía que en Troya y los Alfaques
verían abundancia
de pepinos y brevas,
muchas lentejas en París y en Tebas,
y que cierta cabeza de importancia,
sin decirnos adónde, faltaría;

que por mujeres Venus prometía
pendencias y disgustos,
como si por sus celos o sus gustos
fuese en el mundo nuevo.
Pero, volviendo a nuestro sabio Febo,
después de consultado,
dijo a Marramaquiz que su cuidado
en vano a Zapaquilda pretendía,
y que sólo sería
remedio que pusiese en otra parte,
vengándose con arte,
los ojos, divirtiendo el pensamiento;
que amar era cruel desabrimiento,
más que traer un áspid en las palmas,
en no reciprocándose las almas:
que Amor se corresponde con Anteros,
y más si lo negocian los dineros.



Destituido el gato
ya de mortal socorro,
se fué, calando el morro,
y dióle una salchicha,
por no mostrarse a Garfiñanto ingrato;
que no pagar la ciencia
es cargo de conciencia,
mas dicen que de sabios es desdicha.
Pensando en quién pusiese, finalmente,
de toda la gatesca bizarría,
la dulce enamorada fantasía
para verse de amor convaleciente,
se le acordó que enfrente
de su casa vivía un boticario
de cuyo cocinante vestuario
una gata salía,
que la bella Mizilda se decía,
y, sentada tal vez en su tejado,
miraba, como dama en el estrado,
los nidos de los sabios gorriones,
dejando pulular los embriones,

y, en viendo abiertos los maternos huevos,
comerse algunos de los ya mancebos.
Admitiendo este nuevo pensamiento,
más que su voluntad, su entendimiento
(que amor en las venganzas se resfría,
emprende mucho y ejecuta poco),
por entonces templó la fantasía:
que aquello es cuerdo lo que duerme un loco.



Estaba el Sol ardiente
una siesta de mayo calurosa,
aunque amorosamente
plegando el nácar de la fresca rosa
que producen los Niños abrazados,
huevos del Cisne y huevos estrellados,
pues que los hizo estrellas,
cuando Mizilda con las manos bellas
la cara se lavaba y componía,
no lejos del tejado en que vivía
Marramaquiz, que ya con más cuidado
la miraba y servía,
en fee del Garfiñanto consultado,
cuando al mismo tejado
Zapaquilda llegó por accidente.
El gato, viendo la ocasión presente
para que su deseo
la diese celos con el nuevo empleo,
llegándose más tierno y relamido
a Mizilda, que ya, de vergonzosa,
estaba más hermosa,
y, equívoco, fingiendo
falso desprecio, descuidado olvido,
en su venganza misma padeciendo
amorosos deseos
(tales son del amor los devaneos),
requebraba a Mizilda, a quien pensaba
ofrecer los despojos
de aquella guerra, paz de sus enojos,
y a Zapaquilda a lo traidor miraba
en las intercadencias de los ojos:
tan extraño sentido,
que es menos entendido
mientras que más parece que se entiende,

pues siempre con engaños se defiende;
que si las luces de los ojos miras,
basta ser niñas para ser mentiras.
Mizilda, a quien tocaba en lo más vivo
el amor primitivo,
porque, como doncella, fácilmente
a lo que entonces siente
la tierna edad, se rinden y avasallan,
hablando con los ojos cuando callan,
de buena gana dió fácil oído
a los requiebros del galán fingido,
con que ya andaban de los dos las colas
más turbulentas que del mar las olas.

Zapaquilda, sentida
de aquella libertad (que es propio efeto
de la que fué querida
sentir desprecio donde vió respeto),
murmurando entre dientes,
amenazaba casos indecentes
entre personas tales,
en calidad y en nacimiento iguales.
Como se ve gruñir perro de casa,
mirando al que se entró de fuera enfrente,
estando en medio de los dos el hueso,
que ninguno por él, de miedo, pasa,
parando finalmente
las iras del canículo suceso
en que ninguno de los dos le come,
obligando a que tome
un palo algún criado,
que los desparte airado
y deja divididos,
quedando el hueso en paz y ellos mordidos
así feroz gruñía
Zapaquilda envidiosa,
efecto de celosa,
aunque al gallardo Mizifuf quería:
que hay mujeres de modo,
que aunque no han de querer, lo quieren todo
porque otras no lo quieran,
y luego que rindieron lo que esperan,
vuelven a estar más tibias y olvidadas.
Finalmente, las gatas encontradas,

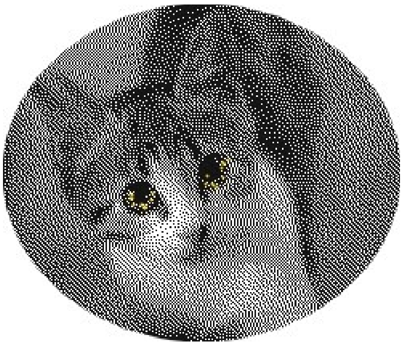
siendo Marramaquiz el hueso en medio
(tal suele ser de celos el remedio),
a pocos lances de mirarse airadas,
vinieron a las manos, dando al viento
los cabellos y faldas;
y en tanto arañamiento,
turbadas de color las esmeraldas,
maullando en tiple, y el gatazo en bajo,
cayeron juntas del tejado abajo,
con ligereza tanta
(aunque decirlo espanta,
por ser, como era, el salto
cinco suelos en alto,
hasta el alero, del tejado fines),
que no perdió ninguna los chapines;
quedando el negro amante,
después de tan estraños desconsuelos,
muerto de risa en acto semejante:
¡Tan dulce es la venganza de los celos!

Silva III

Distaba de los polos igualmente
la máscara del sol, y Cinosura,
primera cuadrilátera figura,
con la estrella luciente
que mira el navegante,
bordaba la celeste arquitetura;
velaba todo amante
por el silencio de la noche oscura,
y en el indiano clima el sol ardía,
en dos mitades dividido el día,
cuando, gallardo, Micifuf valiente
paseaba el tejado de su dama,
que sangrada en la cama
la tuvo el accidente
dos días, que faltó sol al tejado
y estuvo la cocina sin cuidado,
no por la altura de los siete suelos

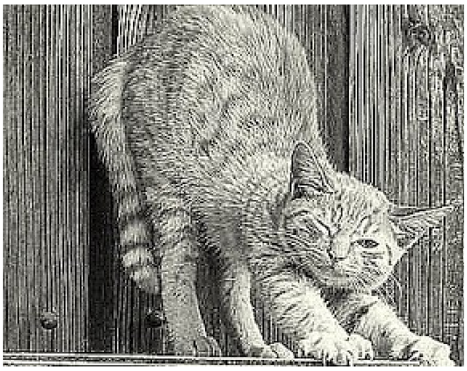
mas por el sobresalto de los celos.
Iba, galán y bravo,
un cucharón sin cabo,
destos de yerro, de sacar buñuelos,
por casco en la cabeza,
que en ella tienen la mayor flaqueza,
pues no suelen morir de siete heridas,
por quien dicen que tienen siete vidas,
y un golpe en la cabeza los atonta:
así la tienen a desmayos pronta.
Broquel de cobertera,
espada de a caballo, que antes era
cuchillo viejo de limpiar zapatos,
que él solía llamar ''timebunt gatos'';
y por las manchas de los pies y el anca,
natural media blanca,
y capa, de un bonete colorado,
abierto por un lado;
plumas, de un pardo gorrión, cogido
por ligereza, pero no por arte.
Así rondaba el nuevo Durandarte,
galán favorecido,
porque son los favores de la dama
guarnición de las galas de quien ama.
Dos músicos traían instrumentos,
a cuyo son y acentos
cantaban dulcemente;
y así, llegando del balcón enfrente
de Zapaquilda bella,
cantaron un romance que por ella
compuso Mizifuf, poeta al uso,
que él tampoco entendió lo que compuso.
Mas, puesta a la ventana
con serenero de su propia lana,
hasta que Bufalía
le trujo un rocadero,
que, por más gravedad y fantasía,
sirvió de capirote y serenero.
y en medio de lo grave
del romance suave,
les dijo con despejo,
pareciéndole versos a lo viejo,
que jácara cantasen picaresca,
y así, cantaron la más nueva y fresca;
que, para que lo heroico y grave olviden,
hasta las gatas jácaras les piden:
¡tanto el mundo decrépito delira!
Aquí se resolvió la dulce lira,
y en dos lascivos ayes,
andolas, guirigayes
y otras tales bajezas,
cantaron, pues, las bárbaras proezas
y hazañas de rufianes:

que éstos son los valientes capitanes
que celebran poetas
de aquellos que, en extremas
necesidades, viven arrojados
al vulgo, como perros a leones;
que la virtud y estudios mal premiados
mueren por hospitales y mesones:
¡Verdes laureles de Virgilios y Enios,
perecer la virtud y los ingenios!
Mas ¿quién le mete a un hombre licenciado
más que en hablar de sólo su tejado?
Que no le dio la escuela más licencia;
que es todo lo demás impertinencia.



Cuando aquesto pasaba,
Marramaquiz estaba
inquieto y acostado,
treguas pidiendo a su mortal cuidado;
pero como el amor le desvelaba,
dio, de sentido falto,
desde la cama un salto,
compuesta de pellejos,
otro tiempo conejos
que en el Pardo vivían,
y en la cola sus cédulas traían,
para seguridad de sus personas;
mas ¡ay, muerte cruel!, ¿a quién perdonas?
Saltó, en efeto, como el conde Claros;
y armándose de ofensas y reparos,
vino de ronda al puesto por la posta,
por ver si había moros en la costa;
y no siendo ilusión el pensamiento
(que del alma el primero movimiento
pocas veces engaña),
no suele débil caña
en las espadas verdes esparcidas,
del aire sacudidas,
hacer manso ruido
con más veloz sonido
como rugió los dientes;
ni entre los accidentes
del erizado frío

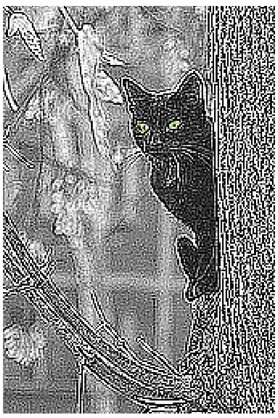
al enfermo sucede
aquel ardor contrario,
como de ver tan loco desvarío,
que apenas le concede,
entre uno y otro pensamiento vario,
respiración y aliento,
de la vida instrumento,
helado y abrasado
entre ardores y yelos;
que al frío de los celos
frígido fuego sucedió mezclado,
que, con distinto efeto
en un mismo sujeto
viven, siendo contrarios:
la causa es una, y los efectos varios.



Miraba a Zapaquilda en la ventana
hablando con su amante.
sin miedo de la luz de la mañana,
que coronaba el último diamante
del manto de la noche, que iba huyendo,
y cantando y tañendo
los músicos. con tanto desenfado
como si fuera su tejado el Prado;
que nunca los amantes,
previnieron peligros semejantes:
así los embeleca
Amor, de Ceca en Meca,
como, olvidado Antonio con Cleopatra,
la gitana de Menfis, que idolatra;
que, ciego de su gusto, no temía
el César, que siguiéndole venía.
porque si fue romano Octaviano,
también Marramaquiz era romano;
y si valiente César y prudente,
no menos fué prudente que valiente;
que, en su tanto los méritos mirados,
César pudiera ser de los tejados.
Como, detrás del árbol escondido,
mira y advierte con atento oído
el cazador de pájaros el ramo

donde tiene la liga y el reclamo,
para en viendo caer el inocente
jilguero, que los dulces silbos siente
del amigo traidor, que le convida
a dura cárcel con la voz fingida,
y apenas ve las plumas revolando
entre la liga, cuando
arremete y le quita, no piadoso,
sino fiero y cruel, así el celoso
Marramaquiz. atento
esperaba el primero movimiento
del venturoso amante, que decía
con dulce mirlamiento:
«Dulce señora mía,
¿cuándo será de nuestra boda el día?
¿Cuándo querrá mi suerte que yo pueda
llamaros dulce esposa,
que entonces para mí será dichosa?
¡Ay, tanto bien el cielo me conceda!
mas fue nuestra fortuna
que Júpiter jamás por ninfa alguna,
aunque se transformaba
en buey, que el mar pasaba,
en sátiro, y en águila, y en pato,
nunca le vieron transformarse en gato;
porque si alguna vez gatiquisiera,
de los amantes gatos se doliera».
Con voz enamorada,
doliente y desmayada,
la gata respondía:
«Mañana fuera el día
de nuestra alegre boda;
pero todo mi bien desacomoda
aquel infame gato fementido,
Marramaquiz, celoso de mi olvido,
que en llegando a saber mi casamiento,
hubiera temerario arañamiento,
y estimar vuestra vida
me tiene temerosa y encogida;
que es robusto y valiente
y, en materia de celos, impaciente.
mejor será matalle con veneno».
Aquí, de furia. lleno,
Respondió Micifuf: ¿«Por un villano
pierdo el favor de vuestra hermosa mano?
¿Él, señora, lo estorba?
¿Es por ventura más que yo valiente?
¿Tiene la uña corva
más dura que la mía,
o más agudo y penetrante el diente?
entre la mostachosa artillería,
¿Qué hueso de la pierna o espinazo
se me resiste a mí ¿Qué fuerte brazo?

¿Yo no soy Micifuf? ¿Yo no desciendo
por línea recta, que probar pretendo,
de Zapirón, el gato blanco y rubio
que después de las aguas del diluvio
fue padre universal de todo gato?
Pues ¿cómo agora, con desdén ingrato,
tenéis temor de un maullador gallina,
valiente en la cocina,
cobarde en la campaña,
y referís por invencible hazaña
dar a Garraf, un gato mi escudero,
que, fuera de ser gato forastero,
es agora tan mozo,
que apenas tiene bozo,
una guantada con las uñas cinco,
si de repente dió sobre él un brinco?
¡Qué Cipión del africano estrago!
¡Qué Anibal de Cartago!
¡Qué fuerte Pero Vázquez Escamilla,
el bravo de Sevilla!
por esos ojos que a la verde falda
de las selvas hurtaron la esmeralda,
Que si entonces me hallara en el tejado,
que no llevara, como se ha llevado,
el queso y el relleno,
¿y queréis que le mate con veneno?
Ésa es muerte de príncipes y reyes,
con quien no valen las humanas leyes;
no para un gato bárbaro, cobarde,
cuyas orejas os traeré esta tarde,
y de cuyo pellejo,
si no me huye con mejor consejo,
haré, para comer con más gobierno,
una ropa de martas este invierno».



Aquí Marramaquiz, desatinado,
cual suele arremeter el jarameño
toro feroz, de media luna armado,
al caballero, con airado ceño
(andaluz o extremeño:

que la patria jamás pregunta el toro),
y, por la franja del bordado de oro
caparazón, meterle en la barriga
dos palmos de madera de tinteros,
acudiendo al socorro caballeros,
a quien la sangre o la razón obliga,
al caballo inocente, que pensaba,
cuando le vio venir, que se burlaba,
«¡Gallina Mizifuf! (dijo furioso,
el hocico limpiándose espumoso),
blasonar en ausencia
no tiene de mujeres diferencia.
Yo soy Marramaquiz; yo, noble al doble
de todo gato de ascendiente noble:
si tú de Zapirón, yo de Malandro,
gato del macedón Magno Alejandro
desciendo, como tengo en pergamino,
pintado de colores y oro fino,
por armas un morcón y un pie de puerco,
de Zamora ganados en el cerco,
todo en campo de golas,
sangriento más que rojas amapolas,
con un cuartel de quesos asaderos,
roeles en Castilla los primeros.
No fueron en cocinas mis hazañas,
sino en galeras, naves y campañas;
no con Garraf, tu paje:
con gatos moros, las mejores lanzas;
que yo maté en Granada a Tragapanzas,
gatazo abencerraje,
y cuerpo a cuerpo en Córdoba a Murcifo,
gato que fue del regidor Rengifo,
y de dos uñaradas
deshice a Golosillo las quijadas,
por gusto de una miza, mi respeto,
y le quité una oreja a Boquifleto,
gato de un albañil de Salobreña;
la cola en Fuentidueña
quité de un estirón a Lameplatos,
mesonero de gatos,
sin otras cuchilladas que he tenido,
y la que di a Garrido,
que del Corral de los Naranjos era,
por la espada primera,
único gaticida.
Pero es hablar en cosa tan sabida
decir que el tiempo vuela y no se para,
que no hay cara más fea que la cara
de la necesidad, y la más bella,
aquella del nacer con buena estrella,
que alumbra el Sol y que la nieve enfría,
que es oscura la noche y claro el día.
Esa gata cruel que me ha dejado

por tu poco valor, verá muy presto,
siendo aqueste tejado
el teatro funesto,
cómo te doy la muerte que mereces,
porque mi vida a Zapaquilda ofreces.
llevando tu cabeza presentada
a Mizilda, que es ya mi prenda amada:
Mizilda, que es más bella
que al vespertino Sol cándida estrella
Venus, que rutilante
es de su anillo espléndido diamante.
Ésta sí que merece la fe mía,
mi constancia, mi amor, mi bizarría;
que no gatas mudables,
que si por su hermosura son amables,
son por su condición aborrecibles,
amigas de mudanzas e imposibles».

Aquí sacó la espada ruginosa
de la vaina mohosa,
y a los golpes primeros
se llamaron fulleros,
si bien no hay deshonor desenvainada,
y Zapaquilda, huyendo,
del súbito temor la sangre helada,
dejóse el serenero en el tejado.
Los músicos, en viendo
el belicoso duelo comenzado,
huyeron, como suelen:
que no hay garzas que vuelen
tan altas por los vientos;
dicen que por guardar los instrumentos,
y mil razones tienen,
pues que sólo a cantar en ellos vienen:
que mal cantara un hombre si supiera
que había luego de sacar la espada,
que tanto el pecho altera,
ni pudiera formar la voz, turbada;
que hay mucha diferencia, si se mira,
de dar en los broqueles, o en las cuerdas,
pasar la espada el pecho, o por la lira
el arco, hiriendo las pegadas cerdas.

Andaba entonces Guruguz de ronda
con una escuadra vil de sus esbirros,
cuyo abuelo, nacido en Trapisonda,
curaba hipocondríacos y cirros,
y viéndolos andar a la redonda,
como si fueran Césares o Pirros
los dos valientes gatos,
con fuerte anhelo descansando a ratos,
llegaron a ponerse de por medio,
que fué difícil, pero fué remedio.
Mas como respetar a la justicia,
de gente principal respeto sea,
y lo contrario bárbara malicia,
luego Marramaquiz rindió la espada:
¿quién habrá que lo crea?
Mas viendo Guruguz que no quería
que la amistad quedase confirmada,
sino permanecer en su porfía,
llevólos a la cárcel, enojado,
cuando Febo dorado
asomaba la frente
por las ventanas del rosado Oriente,
como si azúcar fuera, y de colores
en campo verde iluminó las flores.

Silva IV

Quien dice que el amor no puede tanto,
que nuestro entendimiento
no puede sujetarle, es imposible
que sepa qué es amor, que reina en cuanto
compone alguna parte de elemento
en el mundo visible.
¡Oh fuerza natural incomprensible,

Que en todo cuanto tiene
una de las tres almas,
a ser el alma de sus almas viene!
¿Quién no se admira de mirar las palmas
en la región del África desnuda,
cuando su fruto en oro el color muda,
con solo aquel ardor vegetativo,
amarse dulcemente?
Que en lo demás que siente,
no es mucho que de amor el fuego vivo
imprima sentimiento
y natural deseo
con lazos de pacífico himeneo.
La fiera, el ave, el pez en su elemento,
todos aman, y quieren
por la razón de bien, lo que es amable,
pues ama lo que es sólo vegetable,
Si de ningún sentido el bien infieren.
entre las cosas que por él adquieren
algún conocimiento
(perdonen cuantas aves y animales
de su distinto gozan elemento),
ningunas son iguales
en amor a los gatos,
exceptando las monas,
que hasta en esto se precian de personas,
y ya que no en esencia, en ser retratos;
porque acontece, con el hijo al pecho,
abrazalle con lazo tan estrecho,
que le hacen exhalar la sensitiva
alma vital. Así el amor las priva,
que fue en la estimativa conocido
del natural sentido;
y si por opinión crítico alguno
tiene que amor tan loco
no puede haber en animal ninguno,
váyase poco a poco
al africano Tetuán, adonde
verá cómo, a los árboles trepando
ésta del hombre semejanza propia,
de que hay allí gran copia,
ya sale con el hijo, ya se esconde,
y a los que van o vienen caminando,
con risa de monesco regocijo,
muestra el peloso hijo.
Mas fuera disparate,
si no es que en ellas trate,
ir por ver una mona
hasta el África un hombre;
que si de Tito Livio llevó el nombre
muchos hombres a Roma, fué corona
de los historiadores;
que sólo aquellas cosas superiores,

dignas por fama de admirable espanto,
es bien que cuesten tanto,
como ver a Venecia,
perche chi non la vede non la prezzia;
que al cielo desde el agua se avecina,
y en góndolas, por coches, se camina.

Los gatos, en efeto,
son del amor un índice perfeto,
que a los demás prefiere;
y quien no lo creyere,
asómese a un tejado
con frías noches de un invierno helado,
cuando miren las Hélices noturnas
las estrenadas urnas
del frígido Acüario:
verá de gatos el concurso vario,
por los melindres de la amada gata,
que sobre tejas de escarchada plata
su estrado tiene puesto,
y con mirlado gesto
responde a los maúllos amorosos
de los competidores,
no de otra suerte oyendo sus amores
que Angélica la bella
de Ferragut y Orlando,
amantes belicosos,
cuando andaban por ella
sin comer y dormir, acuchillando
franceses y españoles,
de que no se le dió dos caracoles.
¿Qué cosa puede haber con que se iguale
la paciencia de un gato enamorado,
en la canal metido de un tejado
hasta que el alba sale,
que, en vez de rayos, coronó el Oriente
de carámbanos frígidos la frente?
¿Pues sin gabán, abrigo ni sombrero,
Febo oriental le mirará primero
que él deje de obligar con tristes quejas
las de su gata rígidas orejas,
por más que el cielo llueva
mariposas de plata cuando nieva?

Mas dejando cansadas digresiones
que el retórico tiene por viciosas,
aunque en breves paréntesis gustosas,
presos los dos gatíferos campiones
por no querer hacer las amistades
y responder soberbias libertades,
dicen que Zapaquilda
y la bella Micilda,
tapadas de medio ojo
con sus mantos de humo,
que es llegar a lo sumo
de un amoroso antojo,
fueron a ver sus presos;
que en tanta autoridad tales excesos
parecen desatino.
En fin, Micilda enamorada vino,
con que a toda objeción amor responde.
así la infanta doña Sancha al conde
Garci Fernández, preso, visitaba
en la oscura prisión del Rey su padre,
dicen que con deseos de ser madre,
que había días que sin él estaba.
Cada cual de las dos imaginaba
que la otra venía
por el que ella quería,
y con este engañado pensamiento,
que nunca tienen mucho fundamento
los celos, comenzaron a mirarse,
en manifestación de sus enojos,
tirándose relámpagos los ojos.
¡Oh, quién las viera entonces levantarse
sobre los pies derechas,
a ver si eran verdades las sospechas,
y de ser descubiertas recatarse!
Condición de los celos, esconderse,
quererse declarar, y no atreverse;
que como son desprecio del paciente,
huye de que se entienda lo que siente;
que amar siempre se tuvo por nobleza,
y los celos, por acto de bajeza,
como si amor pudiese estar sin celos,
que más pueden estar sin sol los cielos:
testigo, Juno, y Pocris, a quien llora
Céfalo por los celos de la Aurora.

En fin, después de sufrimiento tanto,
quitó Micilda de la cara el manto
a la siempre celosa Zapaquilda,
y ella, echando las uñas a Micilda,
con el rebozo, el moño.
No suele por los fines del otoño

quedar la vid ñudosa en los sarmientos,
de los marchitos pámpanos robada,
sin resistencia a los primeros vientos,
que con nevado soplo y boca helada
cierzo dejó cadáver con la fiera
mano que floreció la primavera,
como las dos quedaron en la rifa;
ni Fátima y Jarifa
por el abencerraje Abindarráez,
ni por Martín Peláez,
que del Cid heredó la valentía,
doña Urraca y María de Meneses,
aquella a quien pedía
con palabras corteses
las nueces su galán si no bailaba:
así celoso amor las provocaba.
En fin, a puros tajos y reveses
de las rapantes uñas aguileñas,
desmoñadas las greñas
y el solimán raído,
quedaron desmayadas sin sentido,
haciendo cada cual la gata morta.
No fue con esto la prisión más corta,
pero salieron della finalmente;
que el tiempo, con los bienes o los males,
dejando siempre atrás todo accidente
que fue final acción de los mortales,
vuela sin detenerse,
dejándose llegar para perderse.
Así pasó la gloria de Numancia
y la brava arrogancia
de la fuerte Sagunto,
porque la tierra toda es sólo un punto
de la circunferencia de los cielos ...
Pero ¿qué desatino de las musas
me lleva a tan estrañas garatusas?

Las iras del amor y de los celos
pasaron adelante
en uno y otro amante,
Pero Marramaquiz, aconsejado
de sus amigos, remitió el cuidado
al amor de Micilda;
mas como el que tenía a Zapaquilda
era del alma verdadero efeto,
aunque disimulaba a lo discreto,
andaba triste y de congojas lleno.
¡Mísero del que vive en cuerpo ajeno,
y por un amoroso desvarío
pierde la libertad del albedrío,
que no la compra el oro,

porque es de todos el mayor tesoro!
Tenía las mandíbulas de suerte,
que era un retrato de la Muerte fiera,
aunque es yerro pintarle calavera,
porque aquélla es el muerto, y no la Muerte.
La Muerte ha de pintarse una figura
robusta, de cruel semblante airado,
los fuertes pies en una piedra dura,
si no sepulcro en pórfido labrado,
con reyes y monarcas,
hasta el que calza rústicas abarcas;
damas que sujetaron capitanes,
y en ásperas naciones,
por bárbaras regiones
de fieros mamelucos y soldanes;
y pintadas al uno y otro lado,
la Enfermedad, la Guerra y la Desgracia,
Parcas que tantas muertes han causado,
por tantos desconciertos;
que huesos, ya no es Muerte, sino muertos.

No aprovechaba la hermosura y gracia
de Micilda a quitar al pobre amante
la memoria tenaz; que Amor escribe
con la flecha cruel en el diamante
del alma donde vive,
y, compitiendo con el tiempo, quiere
que viva en ella cuando el cuerpo muere.
En estos medios, Micifuf intenta,
a su competidor viendo remoto,
por medio de Garrullo, su compadre,
que había sido gato en una venta,
pedirla por mujer a Ferramoto,
de Zapaquilda padre.
Propúsole Garrullo
con prudente maúllo
las partes de su amigo,
como dellas testigo,
sin otras consecuencias
que atajaban celosas diferencias.
Ferramoto era un gato
de buen entendimiento y de buen trato,
cano de barba y negro de pellejo;
persona que, en la verde primavera
de sus años, jamás en la ribera
de Manzanares se le fué conejo,
porque sirvió de galgo
a cierto pobre y miserable hidalgo,
que con él se alumbraba;
y de suerte de noche relumbraba,
que, pensando una moza que eran lumbre

las niñas de los ojos, que brillantes
en la ceniza estaban relumbrantes,
yendo al hogar, como era su costumbre,
sin pensar darle enojos,
le metió la pajuela por los ojos.
Nunca, sin esto, gato marquesote
oposición le hizo.
Oyó de buena gana lo propuesto,
y del novio galán se satisfizo;
aunque, llegando a concertar el dote,
de seca mimbre un cesto
dijo que le daría,
que de cama de campo le servía;
seis sábanas de lienzo de narices,
con algunos fragmentos, por tapices,
de viejos reposteros;
cuatro quesos añejos casi enteros.
y una mona cautiva que tenía,
que hablaba en lengua culta, y la entendía,
sin otras menudencias.
Con estas conveniencias
las capitulaciones se firmaron
y el día de la boda concertaron.

Marramaquiz estaba
en ocasión tan triste,
como por burla y chiste,
jugando a la pelota
con un ratón a quien pescó de paso,
que de un baúl de versos del Parnaso
a una maleta rota,
aunque llena de pleitos y escrituras,
pasaba haciendo gestos y figuras:
tal suele acontecer un triste caso
en medio de la vida;
que no hay seguridad en cosa humana.
Ya, con veloz corrida,
daba esperanza vana
al mísero animal; ya le volvía;
ya le arrojaba en alto,
mojado de temor, de aliento falto,
y en medio del camino le cogía,
como quien tira al vuelo,
diciendo: "Tente", como al agua el hielo;
ya con las manos mizas
le daba por los lados
algunos bofetones regalados,
cuando llegó Tomizas,
Tomizas, su escudero, y sin aliento
le dijo el casamiento concertado
de Micifuf y Zapaquilda ingrata;

y sintiendo perder su dulce gata,
dejó el pobre animal, que, desmayado,
apenas acertaba con la vida,
mas, puesto en fuga, la libró perdida:
que quien no ha de morir si la fortuna
revoca la sentencia,
nunca le falta diversión alguna
En aquella dichosa intercadencia.
a Tomizas, en fin, la diligencia
valió una manotada con la zurda,
que, cuando no le aturda,
no es poco para zurda manotada,
que le dejó la cara desgatada:
Esto gana traer del mal albricias.
¡Oh cuánto, Amor, de la razón desquicias
un noble caballero!
Por eso ningún paje ni escudero
se fíe en la privanza;
que es fácil en señores la mudanza,
y el Sol es gran señor, y nunca para.
en rueda más mudable, a la Fortuna
se parece la dama doña Luna,
que nunca vemos de una misma cara.

Dejando la pelota el triste amante,
de celos y de amor perdido y loco,
que la vida y la honra tiene en poco,
vino a su casa con tristeza tanta,
que se metió debajo de una manta;
y luego, provocado a mayor furia,
de una carrera se subió al tejado.
Así, desnudo Orlando, provocado
de no menor injuria,
cuando leyó los rótulos del Moro,
que decían: «Amor, que sin decoro
en la buena fortuna te gobiernas.
aquí gozó de Angélica Medoro»,
en el papel de las cortezas tiernas
de aquellos olmos de su bien testigos,
para el francés Orlando cabrahigos.
Bajó Marramaquiz desesperado,
y entrando en la cocina,
sin respeto de Paula y de Marina,
esclavas del ausente licenciado,
como laureles y álamos las mira,
donde Climene por Faetón suspira.
Los pucheros y cántaros quebraba,
vertió la olla en la sazón que hervía
y, llamando a Borbón, borbor decía;
y a tanto mal llegó su desatino,
que sacó media libra de tocino

que andaba como nave en las espumas,
y si no se le quitan, se le mama:
¡tanto pueden los celos de quien ama!
Una perdiz con plumas
quiso tragarse, y no dejaba cosa
que no la deshiciese,
por alta que estuviese:
trepaba a la lustrosa
reluciente espetera,
derribando sartenes y asadores,
y con estas demencias y furores,
en una de fregar cayó caldera
(trasposición se llama esta figura)
de agua acabada de quitar del fuego.
de que salió pelado.
Pero, viniendo luego
el señor licenciado,
dijo que era veneno que tendría
algún vecino que matar quería
ratones de su casa,
hecha de rejalgar traidora masa,
y a su servicio ingrato,
por matar los ratones, mató el gato.

Y dijo bien, según los aforismos
de Nicandro: que son los celos mismos
un veneno tan súbito, que apenas
toca la lengua, cuando ya las venas
y el corazón abrasan:
tan presto al centro de la vida pasan;
que no hay frías cicutas ni anapelos
como solo un escrúpulo de celos.
En fin, de ver el gato lastimado,
que le había criado,
envió por triaca,
que todo venenoso ardor aplaca.
de la magna que hacen en Valencia,
de que tenía una redoma sola
cierto farmacopola.
El gato, con paciencia,
respeto de su dueño,
tomó dos onzas y rindióse al sueño.

Silva V

Oh tú, don Lope, si por dicha agora
por los mares antárticos navegas,
o surto en tierra, cuando al puerto llegas,
preguntas a la Aurora
qué nuevas trae de la bella España,
donde tus prendas amorosas dejas
y por regiones bárbaras te alejas,
o miras en los golfos
de la naval campaña
por dónde vino Júpiter a Europa,
encima de la popa,
sin velas de Mauricios ni Rodolfos
más traidores que fué Bellido de Olfos,
sereno el rostro, en la dormida Tétis,
de la airada Anfitrite,
más que en Sevilla corre humilde el Betis,
cuando a la mar permite
la luna barquerola,
no por las nubes de color de Angola,
una punta a la tierra y otra al cielo,
de pocas luces salpicando el velo,
escucha, en voz más clara que confusa,
mi gatífera musa,
y no permitas, Lope, que te espante
que tal sujeto un licenciado cante
de mi opinión y nombre,
pudiendo celebrar mi lira un hombre
de los que honraron el valor hispano,
para que al resonar la trompa asombre:
''Arma virumque cano'';
que, como no se usa
el premio, se acobarda toda musa;
porque si premio hubiera,
del Tajo la ribera
la oyera en trompa bélica sonora

divinos versos, hijos del aurora.
Por esto quiero, más que ver ingratos,
cantar batallas de amorosos gatos;
fuera de que escribieron muchos sabios,
de los que dice Persio que los labios
pusieron en la fuente Cabalina,
en materias humildes grandes versos.
Mira si de Virgilio fueron tersos,
cuya princesa pluma fue divina,
cuando escribió el ''Moreto'', que en la lengua
de Castilla decimos ''almodrote'',
sin que por él le resultase mengua,
ni por pintar el picador ''mosquito''.
Y ¿quién habrá que note,
aunque fuese satírico Aristarco,
de Ulises el diálogo a Plutarco?
La calva en versos alabó Sinesio,
gran defecto tartesio:
quiere decir que hay calvos en España
en grande cantidad, que es cosa extraña,
o porque nacen de celebro ardiente;
Y también escribió del transparente
camaleón Demócrito,
y las cabañas rústicas Teócrito,
y tanta filosófica fatiga
Diocles puso en alabar el nabo,
materia apenas para un vil esclavo;
el rábano Marción, Fanias la ortiga,
y la pulga don Diego de Mendoza,
que tanta fama justamente goza.
Y si el divino Homero
cantó con plectro a nadie lisonjero
la ''Batracomiomaquia'',
¿por qué no cantaré la ''Gatomaquia''?
Fuera de que Virgilio conocía
que a cada cual su genio le movía.

Ya todo prevenido
para el tálamo estaba,
y el día estatuído
la posesión llamaba
a la esperanza de los dos amantes;
mas muchas veces con peligro toca
el vidrio lleno de licor la boca.
alegres los vecinos circunstantes,
convidados los deudos y parientes
y escrito a los ausentes:
que en tales ocasiones más atentos

están que a la verdad los cumplimientos.
Sólo Marramaquiz, gato furioso,
lamentaba celoso
sus penas y cuidados
por altos caballetes de tejados,
en que su voz resuena,
cual suele por las selvas Filomena,
que ha perdido su dulce compañía,
con triste melodía
esparcir los acentos de su pena,
trinando la dulcísima garganta,
que a un tiempo llora y canta,
o como perro braco
que ha perdido su dueño,
o flamenco o polaco,
que ni se rinde al sueño,
ni el natural sustento solicita,
aunque en cantar no imita
el ruiseñor süave;
que una cosa es el perro y otra el ave,
y a cada cual su propio oficio cuadra,
porque si canta el ave, el perro ladra.

Tenía ya Ferrato
en un zaquizamí curiosamente
la sala aderezada
de uno y otro retrato
de belicosa cuanto ilustre gente:
que las efigies son de los mayores
el más heroico ejemplo,
de la perpetuidad glorioso templo,
como se ven del Tarborlán y Eneas,
y en Calvo, el de las fuerzas giganteas,
en Juan de Espera en Dios y el Transilvano
en Pirro griego y Escévola romano.
Allí estaba Gafurio,
que ganó la batalla de las monas,
de grave gesto y de nación ligurio,
y otros gatos con cívicas coronas
navales y murales,
y al laurel de los césares iguales.
No faltaban el Túmire y el Mocho,
ni, con el descolado Hociquimocho,
que asistía en las casas del cabildo,
y el armado Mufildo,
más de valor que acero,
ni Garavillos, gato perulero.
Estaba el rico estrado
de dos pedazos de una vieja estera
hecha la barandilla,
de ricas almohadas adornado

en tarimas de corcho, y por de fuera,
el grave adorno de una y otra silla,
con tanta maravilla,
que si un culto le viera,
es cierto que dijera
por únicos retóricos pleonasmos:
«Pestañeando asombros, guiñó pasmos».

Ya las sombras, cayendo
de los mayores montes
a los humildes valles,
enlutaba los claros horizontes,
y el mecánico estruendo
en las vulgares calles
cesaba a los oficios;
tráfagos y bullicios
encerraba el silencio en mudos pasos,
y a diferentes casos
la ronda y los amantes prevenían
las armas que tenían,
cuando, a la luz huyendo la tiniebla,
de alegres deudos el salón se puebla.
Vino Calvillo, de fustán vestido,
de patas de conejos guarnecido,
griguiesco y saltambarca,
más amante de Laura que el Petrarca,
por una gata deste nombre propio,
aunque parezca en gatos nombre impropio;
pero si llaman a una perra Linda,
Diana, Rosa, Fátima y Celinda,
bien se pudo llamar Laura una gata
picebruñida como tersa plata.
Maús de bocací trujo griguiesco,
cuera de cordobán, gorrón tudesco,
y de negro, con mucha bizarría,
Zurrón, gato mirlado,
de medias y de estómago colchado;
Ranillos, que bajó de Andalucía,
de conejo en conejo,
por la Sierra Morena,
a ver del Tajo la ribera amena,
con el cano Alcubil, su padre viejo;
Gruñillos y Cacharro,
la nata y flor del escuadrón bizarro;
Marrullos y Malvillo,
uno de raso azul y otro amarillo;
Garrón, Cerote y Burro,
gatos de un zapatero...
Mas ¿para qué discurro
con verso torpe y proceder grosero,
cuando lo menos de lo más refiero,

si me aguardan las damas, que aquel día
mostraron cuidadosa bizarría?
Vino Miturria bella,
Motrilla y Palomilla,
la flor de la canela y de la villa,
y cada cual en la opinión doncella,
cosa dificultosa:
por eso es bien que la mujer hermosa,
cuando honesta se llama,
tenga por obras el perder la fama.
Y, entre todas, fué rara la hermosura
de la bella y discreta Gatifura,
y, vestida de nácar, Zarandilla,
la gata más golosa de Castilla.
Ocupadas las sillas y el estrado,
salió Trebejos, gato remendado,
y sacando a la bella Gatiparda,
comenzaron los dos una gallarda,
como en París pudiera Melisendra;
y luego, con dos cáscaras de almendra
atadas en los dedos, resonando
el eco dulce y blando,
bailaron la chacona
Trapillos y Maimona,
cogiendo el delantal con las dos manos,
si bien murmuración de gatos canos.
Mas ya, Musas, es justo
que me deis vuestro aliento y vuestro gusto,
canoro, sí, más claro,
que parezca de un nuevo Sanazaro;
denme vuestros cristales en los labios,
que de ignorantes me los vuelvan sabios;
que Zapaquilda de la mano sale
de doña Golosilla, su madrina,
saya entera de tela columbina,
de perlas arracadas
en listones de nácar enlazadas;
la cabeza, de rosas primavera,
más estrellada que se ve la esfera;
el blanco pelo, rubio a pura gualda,
y un alma en cada niña de esmeralda,
de cuyos garabatos
colgar pudieran las de muchos gatos;
chapines de tabí con sus virillas,
entre una y otra, descubriendo espacios
de la roja color de los topacios,
de nuestra edad y siglo maravillas;
que lo que ser solía
un medio celemín con ataujía,
un pirámide es hoy de tela de oro
y cuesten sus adornos un tesoro,
que ponen miedo de casarse a un hombre,
subiendo el dote a un número sin nombre,

si piensa sustentar traje tan rico.
Sentóse, al fin, mirlándose de hocico,
y prosiguió la fiesta de la danza
contra la posesión de la esperanza.
Mas ¿quién dijera que saliera incierta?
Marramaquiz, entrando por la puerta,
vencido de un frenético erotismo,
enfermedad de amor, o el amor mismo.

Suspenso y como atónito el senado
de ver de acero y de furor armado
un gato en una boda,
donde es propia la gala, y no el acero,
alborotóse todo;
y Zapaquilda, viéndole tan fiero,
humedeció el estrado, y con mesura
comunicó su miedo a Gatafura,
si bien consideraba
que entonces Micifuf ausente estaba;
Porque sólo esperaban que viniese,
y que la mano prática le diese,
de que ya la teórica sabía,
que confirmase tan alegre día.
En esta suspensión, todos turbados,
Marramaquiz abrió los encendidos
ojos, vertiendo de furor centellas;
los dejó temerosos y admirados,
Y imprimiendo esta voz en sus oídos,
al aliento feroz de sus querellas:
«Villanos descorteses,
más falsos y traidores
que moros y holandeses,
porque, siendo fautores,
no sois en las maldades inferiores;
escuadrón de gallinas,
junta de gatos viles,
que no de bien nacidos;
bajos habitadores de cocinas,
entre asadores, ollas y candiles,
donde, como a cobardes y abatidos,
la más humilde esclava os apalea,
no trocando jamás la chimenea
por la guerra marcial y sus rebatos,
lamiendo lo que sobra de los platos
y durmiendo el invierno, cuando eriza
los cabellos el hielo,
revueltos en la cálida ceniza,
hasta que ardiente el Sol corona el cielo:
Yo soy Marramaquiz; yo soy, villanos,
el asombro del orbe,
que come vidas y amenazas sorbe;

aquel de cuyos garfios inhumanos,
león en el valor, tigre en las manos,
hoy tiemblan justamente
las repúblicas todas
que desde el Norte al Sur, por varios mares,
miran de Febo la dorada frente,
y el que ha de hacer que tan infames bodas,
y con tantos azares,
sean las de Hipodamia,
está en vosotros resultando infamia»

¡Oh Musas!, este gato había leído
a Ovidio, y por ventura
de la fábula de Hércules quería
el ejemplo tomar, pues, atrevido,
Hércules se figura,
y los gatos, centauros, que aquel día
murieron a sus manos:
porque no fueron pensamientos vanos
los de sus celos locos,
pues de sus manos se escaparon pocos,
llamándolos traidores mauregatos;
que, levantando una cuchara de hierro,
a eterno condenándolos destierro,
fue Taborlán de gatos,
haciendo más estrago su arrogancia
que en Cartago y Numancia
el romano famoso:
A un gato que llamaban el Raposo,
más que por el color, por el oficio,
la cara, que no tuvo reparada,
quitó de una valiente cuchillada,
imposible quedando al beneficio;
y de un revés que sacudió a Garrullo,
dio el último maúllo;
cortó una pierna al mísero Trebejos,
gran cazador de gansos y conejos;
desbarató el estrado,
que pensaron guardar gatos bisoños
con cucharas de palo por espadas,
que de galas quedó todo sembrado,
naguas, jaulillas, guantes, ligas, moños,
rosetas, gargantillas y arracadas,
chapines, orejeras y zarcillos;
y porque defendió llegar Malvillos
a robar a la novia, dio dos cabes,
como Hércules a Licas,
y quebrando con él a dos boticas,
desde una claraboya,
cuanto componen purgas y jarabes.
Ni a vista de sus naves

fue más furioso Aquiles, cuando en Troya
le dijeron la muerte de Patroclo,
ni con mazo y escoplo
tantas astillas quita el carpintero
como vidas quitó, celoso y fiero,
ni más sangriento Nero
la mísera plebeya
gente miró quemar desde Tarpeya.
En fin, llegando donde ya tenía
Zapaquilda la vida por segura,
le dijo: «Tente, ¿dónde vas, perjura?»
Ella, temblando, respondió turbada:
«Huyendo el filo de tu injusta espada,
que se quiere vengar de mi inocencia
con tan fiera insolencia,
quitándome mi esposo;
pero yo me sabré quitar la vida,
Polifemo de gatos».
«¡Ojos hermosos siempre y siempre ingratos!
(le respondió furioso):
¿desa manera habláis en mi presencia?
¡Oh gata la más loca y atrevida!
Yo solo soy tu esposo, fementida;
Y al villano que piensa que a sacarte,
con este casamiento, será parte
destas enamoradas uñas mías,
que vencen las arpías,
verás, si no me huye
y el bien que me quitó me restituye,
cómo le mato, y, desollando el cuero,
le vendo para gato de dinero».
«Si tú (le respondió) mi dulce esposo
me matares tirano,
yo, con mi propia mano,
me quitaré la vida».
Furioso entonces, sobre estar celoso,
de donde estaba ¡ay mísera! escondida
trasladóla a sus brazos inhumano,
cual suele yedra, a los del olmo asida,
trepar lasciva a la pomposa copa,
vistiendo el tronco de su verde ropa,
de tiernos lazos y corimbos llena.
Así Paris robó la bella Helena,
las naves aguardando en la marina,
y así fiero Plutón a Proserpina.
Ella entonces llamaba
a Micifuf a voces,
que no la oía, porque ausente estaba;
Al fin, tirando coces,
se le cayó un zapato;
mas ni por eso se dolió el ingrato,
viendo correr las lágrimas por ella;
y él, corriendo con ella,

que ni deudo ni amigo la socorre,
la puso de su casa en una torre,
como tuvo Galván a Moriana.
Tal es del mundo la esperanza vana:
porque quien más en los principios fía,
no sabe dónde ha de acabar el día.

Silva VI

Cuando el soberbio bárbaro gallardo
llamado Rodamonte
porque rodó de un monte
supo que le llevaba Mandricardo
la bella Doralice,
como Ariosto dice,
a dieciséis de agosto
(que fué muy puntüal el Ariosto),
cuenta que dijo cosas tan extrañas,
que movieran de un bronce las entrañas,
prometiendo arrogante
no ver toros jamás, ni jugar cañas,
aunque se lo mandasen Agramante,
Rugero y Sacrípante,
ni comer a manteles,
ni correr sin pretal de cascabeles,
ni pagar ni escuchar a quien debiese,
porque más el enojo encareciese,
ni dar a censo, ni tomar mohatra,
ni pintar con el áspid a Cleopatra.
Y lo mismo decía cuando el rapto
de Elena fementida
el griego rey Atrida
contra el pastor, para traiciones apto,
que dió en el monte Ida
en favor de Acidalia la sentencia;
que hay muchas de la Vera de Plasencia.

que vienen más tempranas
si las hacen los ojos
de juveniles bárbaros antojos;
que aun no repara en canas
esto que todos llaman apetito,
y más donde no tienen por delito
que la santa verdad corrompa el premio.

Mas todo ese proemio
quiere decir, en suma,
aunque era campo de extender la pluma,
lo que el valiente Micifuf, oyendo
el suceso estupendo
del robo de su esposa,
Helena de las gatas,
djo con voz furiosa,
cuando, galán venía a desposarse,
tan imposible ya de remediarse.
De las tremantes ratas
fugitivo escuadrón, con pies ligeros,
temeroso ocupó los agujeros,
y arrojando la gorra,
que fué de un minestril de Calahorra,
hizo temblar la tierra,
a fuego y sangre prometiendo guerra.
Ferrato, ya perdida la esperanza,
mesándose las barbas y cabellos
blancos, que nunca blancos fueron bellos,
culpaba su tardanza,
porque las dilaciones
pierden las ocasiones;
porque en la calva tienen un copete,
que sólo se le coge el que acomete;
porque aguardar a que la espalda vuelva,
es seguir un venado por la selva;
que alcanzarle no fuera maravilla
quien le fuera siguiendo por la villa.
Micifuf la tardanza disculpaba
con que lejos vivía
el zapatero que esperando estaba
(¡oh, cuántos males causa un zapatero!),
y que, después, calzarle no podía,
aunque los dientes remitiese al cuero,
las botas justas, que, con calza larga,
era la gala entonces; que, por fresco,
dicen autores que mató el griguiesco,
por quitar la opresión de tanta carga.
¡Oh, quién, para olvidar melancolías
de las que no se acaban con los días,
un gato entonces viera
con bota y calza entera!

Pero ¿dónde me llevan niñerías,
que en Italia se llaman "bagatelas",
ingiriendo novelas
en tan funestos casos,
más dignos de Marinos y de Tasos
que de Helicona son solos y soles,
que de mis versos rudos españoles?

Lloraba Micifuf, lloraba fuego,
que fuego lloran siempre los amantes,
arrojando los guantes,
a quien los cultos llaman "chirotecas"
(¡oh, bien hayan Illescas y Vallecas!),
sin admitir un punto de sosiego,
como en París el moro, en Troya el griego.
No suele de otra suerte pasearse
quien tiene algún estraño desconcierto,
sin que pueda apartarse
del negocio que trata,
pálido el rostro, de sudor cubierto,
como ya por su honor, ya por su gata,
inquieto Micifuf se condolía
por dilatar de su venganza el día.

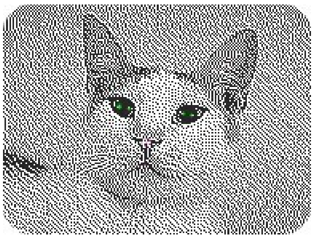
En tanto, pues, que amigos y parientes
consultaban el modo
cómo acabar del todo
agravios tan infames y insolentes,
Marramaquiz estaba
solicitando el pecho
de Zapaquilda, de diamantes hecho,
que en la dura prisión perlas lloraba,
a guisa de la Aurora,
que parece más bella cuando llora;
que la mujer hermosa,
cuando baña la rosa
de las mejillas con el tierno llanto,
aumenta la hermosura,
si no da voces y en el llanto dura.
Marramaquiz, en tanto,
produciendo concetos,

de su locura efetos,
ya en prosa, ya en poesía,
desvelado la noche y triste el día,
se alambicaba el mísero celebro;
No dejaba requiebro,
que no imitase tierno a los orates
que el mundo amantes llama,
y de la tierna dama
amores y cariños,
hasta los disparates
que les dicen las amas a los niños
cuando los dan el pecho las mañanas,
con intrínseco amor diciendo ufanas:
«Mi rey, mi amor, mi duque, mi regalo,
mi Gonzalo»...; mas esto, solamente
si se llama Gonzalo:
porque fuera requiebro impertinente
si se llamara Pedro, Juan o Hernando:
que convienen las flores con los frutos,
y a las cosas también sus atributos.
Estaba el sol apenas matizando
las plumas de las alas de los vientos,
dando a los dos primeros elementos
esmeraldas al uno, al otro plata,
cuando salía por su amada gata
al soto de Luzón el triste amante,
sin respetar el arcabuz tronante,
a buscar el gazapo entre las venas
de la tierra, que apenas
salir al campo osaba,
y de una manotada le pescaba.
No había pez ni pieza
de vaca en la cocina
que, en volviendo Marina
a buscar otra cosa la cabeza,
no caminase ya por los tejados
para el dueño cruel de sus cuidados;
tan ligero y veloz, tan atrevido,
que no paraba, sin hacer ruido,
hasta sacar la carne de la olla,
del asador la polla,
aunque sacase, por estar ardiendo,
o pelada la mano o con ampolla,
«Fufú, fufú», diciendo.
¡Oh amor! ¡Oh, cuántas veces
de la misma sartén sacó los peces,
sin cuchares de hierro ni de plata!
Y la cruel, a más amor, más gata.
«¿Es posible (decía
con lastimosas quejas),
’’¡oh más dura que mármol a mis quejas’’!
(porque el gato las églogas sabía)
y al amoroso ’’fuego que me enciende

mas helada que nieve, Gatalea'',
que de mi fuego el hielo te defiende
de ese pecho cruel, que me desea
la muerte (que antes sea
la de tu Adonis, Micifuf cobarde,
que gozarás, cruel, o nunca o tarde),
que no te duelen tantas penas mías,
ni el verte tantos días
cautiva en esta torre,
que ni te viene a ver ni te socorre,
qué para aborrecerle te bastaba?
Micilda me buscaba,
Micilda me quería;
por ti la aborrecía,
siendo gata de bien, siendo estimada
por honesta doncella, y retirada
de amigas, de papeles y paseos,
que clandestinos trazan himeneos.
¿Qué no dejé por ti, que te has casado
con un gato afrentado?, que si fuera
afrenta entre los hombres el ser gato,
que la costumbre toda ley altera,
sólo éste fuera gato, por ingrato?»
«No te canses (la gata respondía,
con ojos zurdos de Nerón romano),
Marramaquiz tirano;
que, siendo como es justa mi porfía,
ni he de temer tus daños,
ni me podrás vencer con tus engaños».
«¿Qué obstinación, qué furia
te obliga, Zapaquilda, a tanta injuria?
Mira que la nobleza
de tu celoso amante,
siendo tan arrogante,
a su misma cruel naturaleza
se rebela teniéndote respeto,
añadiendo al ser noble el ser discreto».
Este apóstrofe ha sido
justamente advertido
a la gata cruel desamorada,
por lo que a los retóricos agrada,
que adornan la oración con voces puras
y sacan un retablo de figuras;
que, cuanto a mí, jamás me atravesara
con gente de uñas y de mala cara.

Ya Mizifuf en casa de Ferrato
juntaba deudos, provocaba amigos,
de su dolor testigos,
acusando el cruel bárbaro trato
del común enemigo (que este nombre

como al Turco le daba),
y por que más de su maldad se asombre,
el robo de su esposa exageraba;
que cada cual en su dolor y pena
hasta una gata puede hacer Helena.
Estando, pues, sentados en secreto
en el zaquizamí de su posada,
dijo a la noble junta lastimada,
con triste voz, de su desdicha efeto:
«Aquel justo conceto
que de vuestro valor tengo formado
me escusa de retóricos ambages,
amigos y parientes,
si estuvistes presentes
a la dura ocasión de mi cuidado,
de que tan tarde me avisaron pajes.
que siempre llegan tarde los avisos
a los que son para su bien remisos.
¿Con qué. podré moveros?
¿Con qué podré obligaros?
O ¿qué podré deciros,
que pueda enterneceros,
que pueda provocaros,
si no son los suspiros,
medias voces del alma,
cuando con el dolor la lengua calma?
Éste que aquí no explico
está diciendo el pálido semblante
lo que con muda lengua significo,
pues cuando más la encumbre y adelante,
más corto he de quedar; que los enojos
remiten la retórica a los ojos;
que la muda tristeza muchas veces
el Demóstenes fué de la elocuencia,
y más donde son sabios los jüeces,
que excusan de captar benevolencia;
pues no pudiera en Grecia, en su Liceo,
ver más dotrina que en vosotros veo:
todos Platones sois, todos Catones;
más podrá la razón que las razones».



Yo vine, provocado de la Fama,
a ver de Zapaquilda la hermosura,
por alta mar, del hado conducido,
donde mis ojos encendió su llama,
fuego de fénix, que a los siglos dura,

opuestos a la muerte y al olvido.
Si fuí favorecido,
si agradeció mi amor y pensamiento,
bien lo dice el tratado casamiento,
pues que nos veis, con la ocasión perdida.
ella sin libertad y yo sin vida.
Cortés la quise, sin violencia alguna;
que nunca fué violenta la fortuna.
Cuando pagó mi amor, yo no sabía,
como quien era, gato forastero,
que este tirano a Zapaquilda amaba;
con esto, la primera luz del día,
y con ella su cándido lucero,
en mis ojos brillaba
primero que en las flores,
a su ventana repitiendo amores.
Allí también, en su primera estrella,
la noche me buscaba divertido,
adorando las tejas,
de sus balcones rejas
y dulce elevación de mi sentido,
hasta que hablar con ella,
envidioso, traidor y fementido,
me vio en su celosía,
donde probó mi amor su valentía.
Resultó la prisión; y es tan villano,
que ha engañado a Micilda,
y dándola su fee, palabra y mano
de que será su esposo,
siendo cumplirla el acto más honroso,
Cuando me vió casar con Zapaquilda,
en afrenta de todos sus parientes
y amigos, que presentes
estuvieron atónitos al caso,
echando los más graves por la tierra,
como estaban de boda, y no de guerra,
padeciendo mi Sol tan triste ocaso,
se la llevó con atrevido paso,
celoso el corazón, la vista airada,
hiriendo a quien delante se le, puso;
tanto, que con Garraf, de una gatada,
los botes y redomas descompuso
de un boticario que vivía enfrente;
y como de repente
en un perol cayese desde un banco,
todo le revistió de ungüente blanco,
vertió una melecina,
y paró medio muerto en la cocina.
en ocasión tan dura,
en ocasión tan triste,
que es mármol quien las lágrimas resiste.
Mas quiero epitomar mi desventura:
«¡mi esposa me han robado!

¡Sin honra estoy!». Aquí, si no fué mengua,
fue el silencio la voz, los ojos, lengua,
porque la grave pena,
cortando la razón, dejóle mudo.
Enterneciόse el ínclito senado,
haciendo propia la desdicha ajena,
luego que vió que proseguir no pudo,
y respondió Panzudo,
un gato venerable de persona,
aunque pelado de cabeza estaba,
cosa que a muchos buenos acontece
(si bien esto no fué lo que parece
cuando a un amante viene la pelona;
mas golpe que le dió cierta fregona,
que de un menudo que lavar pensaba,
cuando menos atenta te miraba,
asido del principio de una tripa
que a la vista las manos anticipa,
le fue desenvolviendo hasta el tejado,
como cordel de un cabo y otro atado,
del ovillo de sebo el laberinto,
y cada cual de todos participa
deste dolor, como si propio fuera),
dijo con el semblante mesurado,
en prudentes palabras desatado:
«Con justa causa Micifuf espera
verse favorecido,
y vengado también del atrevido
que le robó su esposa,
fatal desdicha de mujer hermosa».
Y respondió Tomillo,
propia razón de gato mozalvillo:
«Por mí ya lo estuviera;
porque con estas uñas se le diera.»
Pero Zurrón, que le miraba enfrente,
le dijo: «Con un gato el más valiente
que han visto los tejados desta villa,
mejor es, a la usanza de Castilla,
escribirle un papel de desafío.»
«No es ése el voto mío
(Garrullo replicó), ni que se intente
venganza de vitoria contingente;
que siempre ha estado en varias opiniones
si ha de haber desafío en las traiciones,
Soy de voto que tome el agraviado
un arcabuz, y aguarde
al gato más valiente, o más cobarde,
castigo de que vive descuidado,
sin miedo del que agravia,
y propio efeto de la noche escura.»
«Si se pudiera ejecutar segura,
fuera venganza sabia
(dijo Chapuz valiente,

gato de buenas partes);
mas son tantas las artes
dese Marramaquiz, gato insolente,
que no dará ocasión que se ejecute,
por mucho que la noche el rostro enlute;
y, de mi parecer, mejor sería
querellarse del robo y castigalle
por términos jurídicos, y dalle
muerte que corresponda a la osadía.»
«Dirán que es cobardía
(Trebejos replicó). Ni esa querella
está bien al honor de una doncella;
que es poner su defensa en opiniones:
que se averigua mal con las razones
aquello que la causa pone en duda;
que no hay para mujeres lengua muda;
que ha dado el mundo en bárbaras querellas,
no pudiendo escusar el nacer dellas.
Pleitos aun no son buenos para gatos,
porque es gastar la vida y la paciencia:
no hay que tratar de tratos ni contratos,
ni andar en pruebas, ni esperar sentencia.
Si aquesta injuria ha de quedar vengada,
remítase a la pólvora o la espada.»
«Bien dice (respondió Raposo, haciendo
debido acatamiento al gran senado)
Trebejos, y no es justo,
aunque se pruebe lo que estáis diciendo
y quede a vuestro gusto sentenciado,
que deis al pueblo gusto,
al teatro sacando neciamente
un gato con capuz y caperuza,
no menor locura que se intente,
no siendo Micifuf el moro Muza,
tratar de desafíos
con quien sabéis que tiene tantos bríos.
Perdóneme Zurrón, Chapuz perdone,
y, aunque la edad le abone,
me perdone Panzudo,
si de su parecer mi intento mudo;
que el mío es juntar gente
para tan grave empresa conveniente,
y, formando escuadrones
de caballos y armada infantería
de toda la parienta gatería,
hacer guerra al traidor, cercar la tierra,
y asestándole tiros y cañones,
batirle la muralla noche y día,
hasta saber qué gente le socorre;
porque si el campo Micifuf le corre,
y el sustento le quita,
y a que deje la plaza necesita,
o en forma de batalla

asalta la muralla,
él se dará a partido,
o le castigaréis siendo vencido.
Sacad banderas, pues; tóquense cajas,
haciendo las baquetas
los pergaminos rajas;
terciad las picas, disparad cometas;
que así cobró su esposa en Troya el Griego:
publicando la guerra a sangre y fuego.»
Calló Raposo, y luego del senado
el voto conferido,
en la guerra quedó determinado,
por ser de todos el mejor partido,
más justo y más honroso;
y dando Mizifuf, como era justo,
los brazos y las gracias a Raposo,
brotando humor adusto,
a hacer la leva de la gente parte.
Perdona, Amor; que aquí comienza Marte,
y sale Tesifonte
a salpicar de fuego el horizonte:
suspende entre las armas los concetos:
pues das la causa, escucha los efetos.

Silva VII

Al arma toca el campo micigriego
contra Marramaquiz, gato troyano;
violento sube, aunque oprimido en vano,
a la región elementar el fuego;
inquietan de los aires el sosiego,
con firme agarro de la uñosa mano,
banderas que, con una y otra lista,
trémulas se defienden a la vista,
no permitiendo, pues no dejan verse,
que las colores puedan conocerse;
respondiéndose a coros
las cajas y los pífaros sonoros,
y al paso que se alternan,
siguiendo el son marcial los que gobiernan,

y luego, los soldados,
de acero y de ante y de valor armados,
agujas del cabello por espadas,
y, sólo descubriendo las celadas
por delante, mostachos;
y por detrás, plumíferos penachos;
marchando con tal orden, que la planta,
donde el que va delante la levanta,
estampa el que te sigue,
sin que el bastón del capitán le obligue,
y al son de las trompetas resonantes,
las picas a los hombros los infantes,
en quien la variedad y los colores
formaban un jardín de varias flores,
a la manera que el abril le pinta
en cultivada quinta.
Las picas de los bravos marquesotes,
de varas de medir y de virotes,
y ya de los plebeyos,
baquetas de Babiecas y Apuleyos,
sin escuadras gallardas
que llevaban, en forma de alabardas,
aquellos cucharones
con que suelen sacar alcaparrones,
y con las palas, como medias lunas,
las sabrosas de Córdoba aceitunas
(Córdoba, donde nacen andaluces
Góngoras y Lucanos);
y, encendidas las cuerdas en las manos,
no de Milán dorados arcabuces
llevaba la lucida infantería,
mas de huesos de piernas de carnero,
que gatos de uno y otro pastelero
trujeron a porfía
(que no fueron de gato de ventero,
sospechosos en tales ocasiones),
y de huesos de vaca los cañones
para batir la torre.

Con esto, Mizifuf el campo corre
y pone cerco al muro,

armado de un arnés cóncavo y duro
de un galápago fuerte,
que sin salir de sí le halló la muerte;
la cabeza, adornada
de un sombrero, la falda levantada,
de un trencellín ceñido,
el pasador y hebilla guarnecido,
con pluma verde escura,
señales de esperanza con tristeza,
aunque la justa causa la asegura.
Con tanta gentileza
al caballo arrimaba
la estrella de la espuela,
y con la negra rienda le animaba
a la obediencia del dorado freno,
de espuma y sangre lleno,
que, sin tocar los céspedes, volaba.
Ni es nuevo el ver que vuela,
pues que pintan con alas al Pegaso,
volando por las cumbres del Parnaso;
que vemos en ''Orlando'' el Hipogrifo,
monstro compuesto de caballo y grifo.
Mas si dudare alguno de que hubiese
caballos tan pequeños,
pareciéndole sueños,
y a la naturaleza le quisiese
quitar de milagrosa el atributo,
aunque sea sin fruto,
la tácita objeción quedará llana
con irse de aquí a Tracia una mañana
que esté desocupado
de los negocios de mayor cuidado,
y verá los pigmeos,
que en la región de trogloditas feos
también los pone Plinio,
que hizo destos monstros escrutinio,
y en las lagunas del egipcio Nilo
otros autores por el mismo estilo,
que escriben que, trayendo de Etiopia,
donde hay bastante copia,
dos pigmeos a Roma, (gente grave),
se murieron de cólera en la nave.
Homero les da patria al Mediodía,
con su intérprete Estacio;
Mela, de Arabia en el ardiente espacio;
que el Sol, fénix, mayores monstros cría,
puesto que, aunque confiesa tales nombres
Aristóteles niega que son hombres;
Ni en su ''Ciudad de Dios'' pasó en olvido
el divino Africano los pigmeos,
y Juvenal ''umbrípedes'' los llama,
sin otros que han negado y defendido
esta opinión, que divulgó la fama.

Pero, pues pintan monstros semideos
que por los montes van de rama en rama
las poéticas trullas,
diciendo que batallan con las grullas,
no será mucho que haya semihombres.
Éstos, con cierta patria y ciertos nombres,
en la misma región caballos tienen,
de donde nuestros gatos se previenen;
que hacer de solo un codo
hombres naturaleza,
como pintor que muestra la destreza,
a un naipe todo un cuerpo reducido,
y los caballos no del propio modo,
mayor monstrosidad hubiera sido
de su instrumento ilustre y poderoso:
que mal pudiera andar hombre muñeca
en el lomo espacioso
de un gigante Babieca;
así, que la objeción es de provecho,
pues queda el argumento satisfecho.
demás de que el lector puede, si quiere,
creer lo que mejor le pareciere;
porque si se perdiese la mentira,
se hallaría en poéticos papeles,
como se ve en Homero, describiendo
a la casta Penélope, que admira,
por los amantes necios y crueles,
tejiendo y destejiendo,
sin dejarla dormir, de puro casta.
Y lo contrario para ejemplo basta:
haciendo deshonesta
Virgilio a Dido Elisa por Eneas,
como le riñe Ausonio,
aunque logró tan falso testimonio,
menos las aguas que pasó leteas,
donde escribió Merlin con cuáles iras
castigan al poeta sus mentiras.
Mas vuelve ¡oh Musa! tú, para que pueda
ayudarme el favor de tu gimnasio;
que para lo que queda,
aunque parece poco,
al señor Anastasio
Pantaleón de la Parrilla invoco,
porque de su tabaco
me dé siquiera cuanto cubra un taco.

Marramaquiz, aunque lo supo tarde,
había hecho alarde
de sus gatos amigos,
y halló que para tantos enemigos
era su gente poca:
mas como la defensa le provoca,
las armas al asalto prevenía,
supuesto que tenía
poco sustento para cerco largo;
y cuidadoso de su nuevo cargo,
más triste y desabrido
que poeta afligido
que ha parecido mal comedia suya,
o bien la de su cómico enemigo,
andaba por la torre;
y, viendo que su esposo la socorre,
Zapaquilda, más llena de aleluya,
más alegre, contenta y más quieta
que aquel mismo poeta,
si ha parecido mal, siendo él testigo,
la del mayor amigo.
Prevenido, en efeto,
de toda defensión y parapeto,
sacó sus gatos animoso al muro
por todas las almenas y troneras,
vestido de banderas,
que, en alto y de diversos tornasoles,
eran entre las nubes arreboles;
y, coronado de diversos tiros,
soldados de valor y archimargiros
opuestos a la furia del contrario.
como se mira altivo campanario
de aldea donde hay viñas,
para bajar después a las campiñas,
cubierto, por el tiempo de las uvas,
del escuadrón de tordos,
que en aquella sazón están más gordos,
cuando los labradores
limpian lagares y aperciben cubas,
así la negra cúpula tenía
de soldados, de tiros y atambores,
no menos valerosa gatería.
Quien viera el pie, que el escuadrón ceñía

de Micifuf, y el chapitel armado
de uno y otro gatífero soldado,
dijera que tal vista no fué vista
de Dario ni de Jerjes,
ni tanto perdigón haciendo asperges,
en ninguna conquista,
ni la vió Cipión, ni el rey Ordoño,
como en Cartago aquél, éste en Logroño,
y aunque entre la de Ostende,
pero sin ’’nobis Domine’’, se entiende.
Ver tanto gato, negro, blanco y pardo,
en concurso gallardo
de dos colores y de mil remiendos,
dando juntos maúllos estupendos,
¿a quién no diera gusto,
por triste que estuviera,
aunque perdido injustamente hubiera
un pleito, que es disgusto,
después de muchos pasos y dineros,
para leones fieros?

Prevenidos, en fin, para el asalto,
mueven a sobresalto
los ánimos valientes
las retumbantes cajas,
previenen uñas y acicalan dientes,
calando juntas las celadas bajas,
que en las frentes bisoñas
más eran de sartén que de Borgoñas;
pero, en silencio los clarines roncos,
que sonaban a modo de zampoñas,
puesto a la margen de unos verdes troncos,
que no importa saber de lo que fueron,
de pies en uno Micifuf bizarro,
cuando del Sol el carro,
que Etontes y Flegón amanecieron,
atrás iba dejando el mediodía,
dijo a su belicosa infantería,
que atenta le escuchaba;
que aunque era gato, Cicerón hablaba:
«Generosos amigos,
de mis afrentas y dolor testigos,
la honra, que los ánimos produce,
a tan ilustre empresa me conduce:
ésta sola me anima:

quien no sabe qué es honra, no la estima.
Miente el que dijo, y miente el que lo estampa.
que ’’un bel fuggir tutta la vita scampa’’,
pues mejor viene agora
que ’’un bel morir tutta la vita onora’’.
Es la virtud del hombre
la que le inclina a los ilustres hechos;
digna es la fama de valientes pechos:
Hoy habéis de ganar glorioso nombre;
ninguna fuerza ni amenaza asombre
el que tenéis de gatos bien nacidos;
que estos viles alardes,
porque en siendo traidores son cobardes,
ya están medio vencidos
con sólo haber llegado a sus oídos
que yo soy quien os guía.
A Anibal preguntó Cipión un día
que cuál era del mundo el más valiente,
y él respondió feroz, con torva frente:
"Alejandro, el primero;
el segundo fue Pirro, y yo el tercero":
Si entonces yo viviera,
cuarto lugar me diera.
Al arma acometed; yo voy delante,
y el no tener escalas no os espante;
que no son necesarias las escalas
si en vuestra ligereza tenéis alas».
Dijo; y vibrando un fresno en la ñudosa
mano, al muro arremete,
y con él mata siete:
Maús, Zurrón, Maufrido, Garrafosa,
Hociquimocho, Zambo y Colituerto,
gatazo que, de roja piel cubierto,
crió la mondonguífera Garrida,
aunque toda su vida
más enseñado a manos y cuajares
que a nobles ejercicios militares.
Mas son tan eficaces las razones
formadas de los ínclitos varones
como Alciato escribe, cuando asidos
llevaba de una cuerda de los labios
el anfitrioníades Alcides
cuantos hombres prestaban los oídos
a la elocuencia de los hombres sabios.

Pero ya los agravios
de Micifuf la guerra comenzaban;
ya los gatos trepaban
la torre por escalas de sus uñas,
más fuertes garabatos
que los de tundidores y garduñas;
ya por la piedra, entre la cal metidas,
sin estimar las vidas,
subían gatos y bajaban gatos,
los unos, como bueyes agarrados,
que clavan en las cuestas las pezuñas;
los otros, como bajan despeñados
fragmentos de edificio que derriban,
que de su mismo asiento se derrumba.
A cuál sirven de tumba,
después que del vital aliento privan,
las losas que le arrojan;
a cuál de vida y alma le despojan
en medio del camino.
No despide en oscuro remolino
más balas tempestad de puro hielo
que bajan plomos de la torre al suelo.
Allí murió Galván, allí Trebejos,
que le acertó la muerte desde lejos,
dándole con un cántaro en los cascos,
y otros, con ollas, búcaros y frascos.
Así suelen correr por varias partes
en casa que se quema los vecinos,
confusos, sin saber adónde acudan.
No valen los remedios ni las artes:
arden las tablas, y los fuertes pinos
de la tea interior el humor sudan;
los bienes muebles mudan
en medio de las llamas;
éstos llevan las arcas y las camas,
y aquéllos, con el agua, los encuentran;
éstos salen del fuego, aquéllos entran;
crece la confusión, y más si el viento
favorece al flamígero elemento.
Mas como el alto Júpiter mirase
desde su Olimpo y estrellado asiento
la batalla cruel, de sangre llena,
temiendo que quedase
en competencia tan feroz y airada
la máquina terrestre desgastada,
justo remedio a tanto mal ordena.
«Dioses, no es justo (dijo) que la espada
sangrienta de la guerra
se muestre aquí tan fiera y rigurosa,
aunque es la misma de la Griega hermosa,
y que, muertos los gatos, esta tierra
se coma de ratones;
porque se volverán tan arrogantes,

que, ya considerándose gigantes,
no teniendo enemigos de quien huyan
y el número infinito desminuyan,
serán nuevos Titanes,
y querrán habitar nuestros desvanes».
Con esto, luego envía
de oscuras nieblas una selva espesa,
y la batalla cesa,
revuelto en sombras de la noche el día:
y desde aquél, con inmortal porfía
los unos y los otros prosiguieron,
aquéllos en la ofensa
y éstos en la defensa;
pero, durando el cerco, no tuvieron
remedio ni sustento los cercados;
tanto, que a Zapaquilda desfigura
la hambre la hermosura:
vueltas las rosas nieve,
por onzas come, por adarmes bebe.
Marramaquiz, que ya morir la vía,
con amante osadía,
pero sin que le viesen los soldados,
salió por un resquicio, a los tejados,
de una tronera que en la torre había,
para coger algunos pajarillos.
Iba con él Malvillos,
que a éste solo fió su atrevimiento,
y por partir la caza del sustento;
y estando, ¡oh dura suerte!,
acechando a la punta de un alero
un tordo que cantaba,
la inexorable muerte,
flechando el arco fiero,
traidora le acechaba.
¿Qué prevenciones, qué armas, qué soldados
resistirán la fuerza de los hados?
Un príncipe que andaba
tirando a los vencejos
(nunca hubieran nacido,
ni el aire tales aves sustenido),
le dio un arcabuzazo desde lejos.
Cayó para las guerras y consejos;
cayó súbitamente
el gato más discreto y más valiente,
quedando aquel feroz aspecto y bulto
entre las duras tejas insepulto;
pero muerto también, como era justo,
a las manos de un César siempre augusto.

Llevó Malvillos, pálido, la nueva,
que, de su fe y amor llorando en prueba,
se mesaban las barbas a porfía,
como tudescos, muerto el que los guía;
mas deseando verse satisfechos
del sustento forzoso,
rindieron las almenas y los pechos
al héroe sin vitoria vitorioso,
y Micifuf, con todos amoroso,
porque le prometieron vasallaje,
hizo luego traer de su bagaje,
con mano liberal, peces y queso.
Alegre Zapaquilda del suceso,
mudó el pálido luto en rico traje;
diole sus brazos, y a su padre amado,
y el viejo a ella, en lágrimas bañado;
y para celebrar el casamiento,
llamaron un autor de los famosos,
que, estando todos en debido asiento,
en versos numerosos
con esta acción dispuso el argumento,
dejando alegre en el postrero acento
los ministriles, y, de cuatro en cuatro,
adornado de luces el teatro.

EL "ARTISTA": ESE SER NECESITADO DE TUTELA

Por lo menos así lo entiende el ordenamiento jurídico español, al obligar a ejercer sus derechos a los artistas de forma tutelada (a través de las suciedades de gestión colectiva), cosa que no ocurre en ningún otro caso en todos los cuerpos de legislación de nuestro país (excepto aquellas personas que no son responsables de sus actos).
Esto que hasta ahora me parecía un auténtico insulto hacia los artistas que sólo tenía sentido por el interés de dichas entidades monopolísticas, empieza a tener sentido para mí.
Tras años de estar en contacto con *"artistas"* de toda índole (en conferencias, por trabajo, por ocio, amistad, etc), ya sabía que son personas que *"quieren dedicarse a lo suyo y que no les mareen con contratos, dinero, etc"*. Por eso su histórica dependencia de las discográficas, los managers, y demás séquito parasitario (en su mayor parte). Esto es comprensible, sólo en cierta medida, por su inclinación creativa y por lo tanto supuestamente poco dada a organización y control.
Pero también hay grupos de creadores (como los artistas gráficos, diseñadores, publicistas, etc) que no *"pasan por el aro"* con tal facilidad. ¿Qué ocurre, entonces?
La respuesta nos la da un paseo por *MySpace.com*. Esa abominación de organización y diseño. Cada vez que escucho Siglo XXI en Radio 3 oigo a un grupo decir *"visita nuestra web en MySpace.com/pon-aqui-el-nombre-del-grupo-tecnoretrasado-que-quieras"*. Y me pongo del hígado. Además, lo único que hacen es espamear las cuentas y comentarios de otros usuarios de *MySpace.com*. Endogamia destructiva.
¿Por qué no se hacen con su dominio y hospedaje? Es bien sencillo, y según te lo montes puede ser hasta gratuito. Además les daría la libertad de organizar los contenidos como quieran, e incorporar cualquier tipo de solución tecnológica para gestionar lo que quieran. Incluso podrían emplear otras webs y servicios que ya he comentado aquí en otras ocasiones. Tendrían CONTROL. Pero eso es precisamente lo que no quieren, porque igual que los niños pequeños, no quieren RESPONSABILIDAD.
Se escudan en el desconocimiento. Se escudan en el *"con lo que curro para producir cancioncillas, sólo me falta tener que aprender a usar un ordenador"*. Pero eso no se lo escuchan al fontanero que se anuncia en páginas amarillas, hace buzoneo, y produce unos imanes para la nevera de las señoras. Él tampoco estudió *management* ni *marketing* en ESADE. Pero sabe que ha de buscarse los cacaos.

Los *"artistas"* son (en su mayor parte, y siempre con la cautela que hay que tener con las generalizaciones) una banda de *"yo también"*. Desde los estilos musicales, pasando por las *"influencias"*, a las modas en la ropa, o las escenificaciones, no he visto otro colectivo que se las dé de *"creadores"* y, sin embargo, estén tan homogeneizados.
Lo siento mucho (y mira que tengo amigos en ese colectivo a los que quiero de corazón), pero a los que nos dedicamos a buscar el pan cada día hasta debajo de las piedras, vuestros lloros y pataletas no nos dan ninguna pena. Habéis estado mimados (los cuatro que lo conseguían, por no hablar de los millones que se quedaban en la cuneta y nunca tuvieron una oportunidad, cosa que ahora ya no es imposible) demasiado tiempo por una maquinaria oligopólica que generaba escasez artificial a base de legislaciones y regulaciones nocivas para el consumidor. Y si seguís agarrados a ella, con ella caeréis.

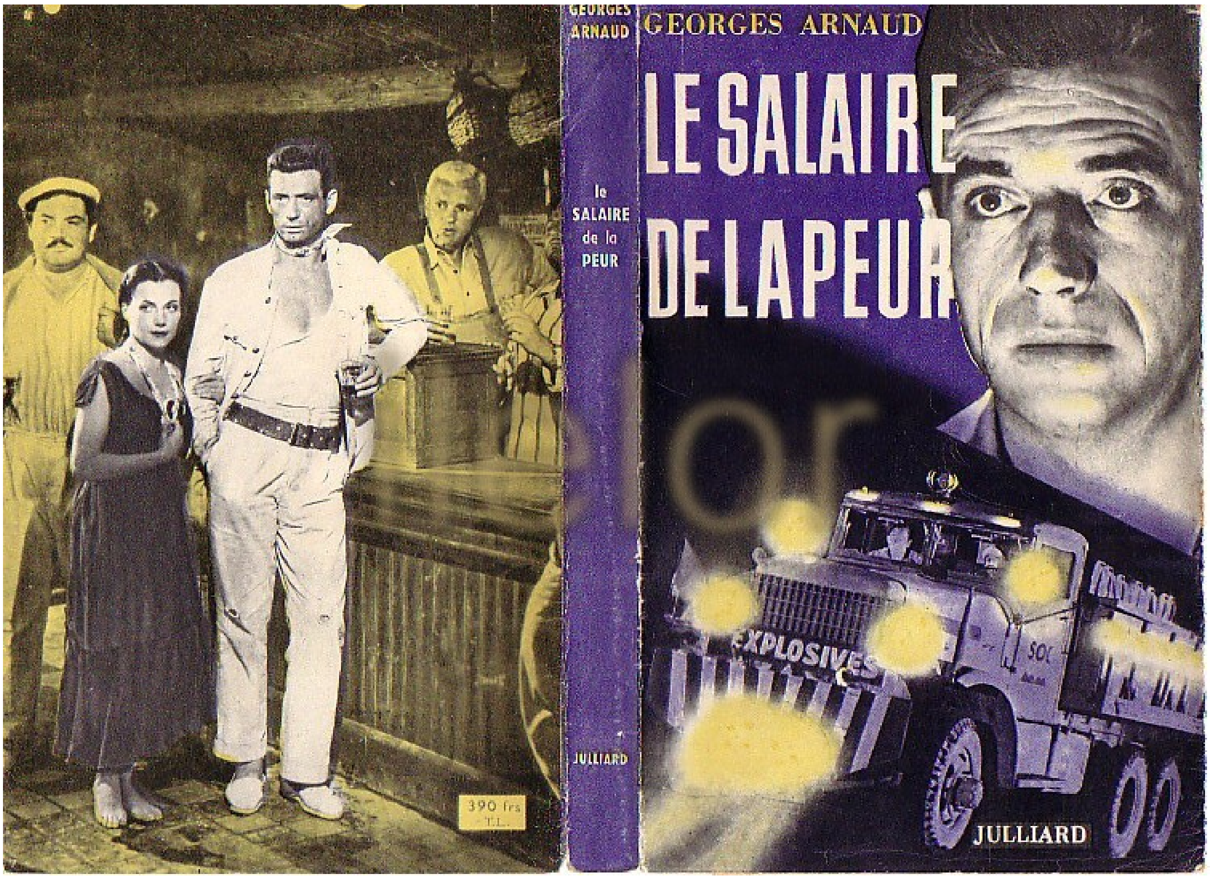
GATOPARDO SE SOLIDARIZA CON LOS TRANSPORTISTAS ESPAÑOLES EN HUELGA



PLATAFORMA LLAMA A MOVILIZACION DE TODOS LOS TRANSPORTISTAS ESPAÑOLES

Ante la falta de respuesta del Gobierno a nuestra petición y ruego de abrir una via de dialogo.
Ante la guerra mediática y policial desatada sobre los honrados y dignos trabajadores del Transporte de España.
Ante la farsa y gatuperio de la ridicula "negociación" escenificada por la prepotente Ministra y la gran patronal CETM, que no nos representa y nos explota como a esclavos.
Los Transportistas Españoles, con todas nuestras herramientas de trabajo, según los acuerdos democráticos, de las cuarenta y dos Bases Nacionales de PLATAFORMA:
INICIAMOS LA MOVILIZACION HACIA MADRID CAPITAL DE ESPAÑA.
Emplazamos de nuevo al Presidente Zapatero para que demuestre el talante del cual alardea, para que demuestre lo que significa ser Socialista. Para que abra una via de diálogo, nos llame a exponer nuestros gravisimos problemas y buscar soluciones inmediatas para los mismos.
A todos los Coordinadores de las 42 Bases de PLATAFORMA, reitero las consignas de:
1º/ Acatar y obedecer, en todo momento, las instrucciones de los agentes de la autoridad.
2º/ La nuestra es una movilización totalmente pacifica.
3º/ No se portaran símbolos ni pancartas. No se hará ostentación de siglas.
Mantenerse unidos, informados, comunicados y coordinados, ÚNICA Y EXCLUSIVAMENTE por la estructura propia de vuestra organización PLATAFORMA.

Manolo Nuñez
Presidente Nacional de PLATAFORMA

Entre 200 y 300 camiones permanecen desde anoche inmovilizados por la Guardia Civil en Benavente

El Confidencial / Agencias.- **16/06/2008 06:00h**
Actualizado: 16/06/2008 09:01h

Entre 200 y 300 camiones permanecen retenidos en las proximidades Benavente desde

la medianoche, debido a un dispositivo desplegado por la Guardia Civil para impedir la llegada a Madrid de varios cientos de camioneros, la mayor parte autónomos, en protesta ante lo que consideran la falta de respuesta del Gobierno a sus reivindicaciones.
Así lo comunicó a EFE el presidente de la Unión Independiente de Transportistas Autónomos, UITA, de Asturias, **José Fernández**, quien informó de que los transportistas viven una ***"situación de secuestro"***, ya que sus vehículos han sido inmovilizados y retirados de la autovía hacia áreas de descanso y estaciones de servicio.
El representante de la UITA refirió que los camiones que no llevan carga son los que están siendo retirados de la circulación por la Guardia Civil y añadió que no hay cortes de carreteras ni se han producido incidentes en lo que va de noche.

La Guardia Civil no ha confirmado las retenciones de los camiones

José Fernández comentó asimismo que los camioneros afectados van a denunciar esta situación ya que, explicó, *"están vulnerando el derecho a la libre circulación".*
"El Gobierno trata de dar una imagen de normalidad que es falsa" denunció Fernández, quien explicó que, aunque no tienen datos contrastados, esta situación se está produciendo en muchas carreteras españolas. "Tendremos que ir andando a Madrid", concluyó el presidente de la UITA de Asturias.
Algunos de estos transportistas ya han interpuesto denuncias en los cuartelillos de la Guardia Civil de localidades como Tordesillas o Benavente. *"No estamos retenidos, estamos secuestrados y se nos impide la libre circulación por las carreteras"*, señalaron las fuentes, que explicaron que los transportistas están retenidos en áreas de servicio, gasolineras y puntos de descanso.

Libre el acceso en la R-2
Ante las retenciones que los camioneros están provocando en las carreteras, el peaje de la R-2 y la AP-41 han quedado abiertos hoy para el libre acceso al tráfico.
Según informaron a EFE fuentes del Servicio de Información de Carreteras, desde primeras horas de la mañana existen seis kilómetros de retenciones en la carretera de Barcelona entre Azuqueca de Henares y Meco, y se deja pasar a los coches por la R-2 de forma gratuita hasta la M-50. En la carretera de Toledo también existen cinco kilómetros de retenciones en la A-42, a la altura de Illescas, por lo que se deja entrar a los vehículos por la vía de peaje AP-41 hasta Madrid. En la carretera de Extremadura, la A-5, existen 8 kilómetros de retenciones entre Valmojado y Casarrubios del Monte.
En estas carreteras, la Guardia Civil ha establecido controles y permite acceder a la región sólo a los camiones que vayan a realizar sus trabajos de carga o descarga, mientras que no permite el acceso a los camioneros que secundan la huelga del transporte con el fin de que no colapsen las entradas a la capital.

huelga, transportistas

Publicado en el Diario de Burgos Digital, 15 de junio 2008:

Huelga de transporte / La cara humana del problema
Tres vidas en la carretera
Tres generaciones de la misma familia de transportistas circulan estos días sobre una carretera sin destino ni rumbo. Su memoria es el relato de cómo se ha desintegrado el negocio al que entregaron sus vidas

Ángel Velasco Santamaría (primero a la izquierda) inició su andadura en 1960.

Sus hijos y su nieto, detrás, han seguido sus pasos.

En sus dedos no se ven anillos. Acaso porque los dedos están hinchados de muchos años de volante, carga y descarga, de secarse el sudor y de sostenerse la frente pensando en el siguiente porte. La piel curtida y un discurso asentado en medio siglo de experiencia son los avales de la familia Velasco (transportes Transhijanvel) para esquematizar en palabras el inmenso mar de asfalto sobre el que navega el sector del transporte por carretera. Y hay temporal.

Ángel Velasco Santamaría compró su primer camión en 1960, cuando el litro de combustible costaba dos pesetas y se invertían 48 horas de conducción en llegar a Sevilla. Después, a esperar para no volver de vacío. Aprendió a irse sin fecha de regreso ni rumbo determinado y a luchar con máquinas que iban directas al taller después de cada porte. *«Esto nunca fue negocio, es una forma de vida. Sabías que trabajando un poco más podías vivir un poco mejor y pagar las letras y los sueldos, y eso que un camión valía lo mismo que un piso. Ahora es mejor tener parado el camión»*, cuenta paciente.

Sus hijos también fueron embrujados por el extraño atractivo de una vida severa pegada al asfalto. Ángel, el mayor de ellos, continuó la labor de su padre y su hermano Juan Luis renunció a un empleo fijo y un salario digno en Bridgestone para entrar en la empresa familiar. El último en llegar, Javier, nieto de Ángel. Los Velasco son una familia cuyo patrimonio cimienta su empresa. Todo su patrimonio. *«Hace menos de tres años teníamos cuatro camiones y ahora tenemos once. Han sido años muy buenos de trabajo, pero el sector ahora ha caído hasta el límite de no saber si podremos seguir adelante»*, cuenta el más joven. Con ese panorama han ido a la huelga a pesar de que les va a costar miles de euros y de que, admiten, *«no podremos aguantar más de diez días sin trabajar».*

De los motivos que han puesto contra las cuerdas a miles de transportistas en toda España, el más manido es el alza exponencial del precio de los carburantes, especialmente del gasóleo, que es la sangre que hace latir el descomunal corazón de sus camiones, máquinas de 120.000 euros que en poco se parecen a las que gobernó el abuelo Ángel cuando cruzar España por carretera dejaba lo de Ulises a la altura de un fin de semana en Benidorm.

«Hace medio año cada camión se bebía 3.000 euros de gasóleo, hoy son 4.500. Aquí cargamos un depósito de 20.000 litros cada dos semanas, pero aún así no es el alza del combustible lo que más me preocupa, sino los porcentajes que se quedan las empresas que gestionan los portes», advierten.

Actualmente, los Velasco tienen su flota trabajando para Teczone, una empresa radicada en Burgos y que *«gracias a Dios pagan las tarifas estipuladas»*, y cargan una media de seis o siete camiones diarios. Tienen garantizada la ida a un precio real de mercado, pero no la vuelta. *«Para volver entran en juego las empresas que gestionan portes. Si tú vas a Sevilla y cobras por la ida 1.000 euros, el problema es que a la vuelta te tienes que volver por 300. En ese ejemplo* (1.600 kilómetros ida y vuelta), *el kilómetro te acaba saliendo a 0,81 euros, y por debajo de un euro pierdes dinero. Ellos ni siquiera tienen camiones, simplemente gestionan y se quedan porcentajes salvajes. Tú no sabes lo que paga quien carga, así que ellos entran en la oferta y la demanda: o te lo subes por 300 euros o busco a otro que lo haga»*, explican.

Los Velasco consideran que la primera medida que debería de tomar el Gobierno es la de regular esas 'gestiones': *«En la carta de porte se debería de especificar cuánto estás cobrando por el viaje. Puesto que hay unas tarifas de mercado establecidas, si la carta dice que se están cobrando 300 por algo que vale 1.000, la Guardia civil podrá identificar a la empresa que encarga el porte y sancionarla. El 90% de los transportistas trabajan con intermediarios y es necesario acabar con esos abusos».*

En ese mercado de *«bajarse los pantalones»* faltan muchos de los que estuvieron. Los cierres de empresas de transporte son un hecho y, dicen los Velasco, no pocas veces las

víctimas han sido sus propios verdugos: *«Han quebrado muchas empresas, pero antes de irse han dejado mucho daño hecho por haber aceptado trabajar por debajo del precio de mercado».*
Otra de las exigencias del sector con la que no comulgan en esta empresa familiar burgalesa es la de regular los plazos de pago dentro del sector. En Europa es una cuestión que está muy vigilada, pero en España se puede pagar la factura de un porte a tres, cuatro o seis meses. *«Así los que hacen negocio son los bancos, que son con quienes tienes que negociar la liquidez que necesitas siempre* (en su caso 60.000 euros) *para pagar combustible, nóminas, averías, mantenimiento, seguros, impuestos... Hay que exigir que los pagos se hagan efectivos en un máximo de 30 días. Y no te voy a contar lo de los impagos, que están a la orden del día»*, continúa la 'segunda generación'.
El régimen fiscal al que están sometidos en el transporte aparece y desaparece de la conversación de forma casi mecánica. Pocos dudan de que el 'arreglo' al que pueda llegar el Gobierno con la parte de la patronal que ha forzado la huelga pasará, en buena medida, por analizar el capítulo fiscal y la posibilidad de subvencionar el gasóleo. *«Estamos en lo de siempre, ¿por qué a los agricultores y a los pescadores se les subvenciona el gasóleo y a nosotros no? El 80% de cada litro de combustible se lo queda el Gobierno en impuestos y eso es mucho dinero que ingresa con nuestro sector. Nos cosen a impuestos y lo mínimo que se debe de plantear el Gobierno es seguir la tendencia europea y que nuestro régimen fiscal sea proporcional a nuestra actividad: si andas pagas y si no andas no pagas. La Ley nos obliga a tener el camión parado cuatro días a la semana (pueden funcionar 10 horas dos días a la semana y 9 horas otros tres, el resto deben estar parados); bien, pues que no nos cobren impuestos durante el tiempo que no trabajamos».*
Las tres generaciones difieren cuando llega la hora de analizar cuál es la legitimidad de los piquetes, de las ruedas pinchadas y de los atentados contra las personas, la carga y los vehículos. En el último capítulo hay acuerdo: *«No se puede hacer el terrorista y poner en peligro la vida de nadie»*. En el segundo, hay de todo. Es curiosamente el más joven, Javier, quien rechaza *«cualquier movilización que no sea la huelga pura y dura»*, mientras que su tío Ángel considera que *«la única forma de parar un camión es un pinchazo que cuesta 50 euros arreglar»*. Al final, el abuelo sentencia: *«Los esquiroles nunca fueron buenos»*. A otra cosa.
El acuerdo regresa a la conversación al relatar el coste añadido de ser transportista. *«La Guardia Civil te trata como si fueras un delincuente, en los restaurantes te tiran la comida como a los perros, llegas a descargar y te dicen que te sientes a esperar, si cometes una infracción te meten una multa salvaje... El año pasado pagué una multa de 1.501 euros. No sobrepasé el límite de conducción, pero paré a las 20,45 cuando tenía que haberlo hecho a las 20,00. Me pusieron la misma multa que si me hubieran pillado conduciendo tras haber dormido sólo tres horas. No es lógico»*, argumenta Javier.
La incertidumbre campa a sus anchas en los sueños, las casas, las letras y el futuro de los Velasco. Tres generaciones de trabajadores dan para vivir muchas huelgas, «pero ninguna como esta». Una vez echadas las cuentas de lo que pueden soportar parados, solo les queda esperar que se alcancen acuerdos que, dicen, debieron de haberse logrado tiempo atrás. *«Esto no ha venido del cielo. Llevábamos meses anunciándolo y el Gobierno miraba a la pared. Ya es hora de que den la cara, con nosotros y con todos los españoles»*. ¿Y mientras tanto? *«Sabemos que hay una crisis global y que pueden venir tiempos mejores, lo que no sabemos es si llegaremos a verlos»*. Ni ellos, ni tantos.

Veredas: han sido literalmente secuestrados y retenidos bajo amenaza por la fuerza pública, la misma que no mandan a detener a los mafiosos, narcotraficantes, traficantes de seres humanos, ni a los banqueros que blanquean el dinero procedente de actividades delictivas, que tienen España como puerto seguro y paraíso para sus negocios, según los informes de la Interpol la DEA, y la Europol.
A estos transportistas abocados a la ruina no ha habido gente de las ONGs para llevarles una botella de agua y un bocadillo a los retenes, porque están paseando el palmito por la Expo de Zaragoza y poniendo el cazo para los chanchullos de las multinacionales en el Tercer Mundo, y asi, cuando se descubre que entre sus filántropos hay pederastas violando niños desde Kosovo hasta África, pasando por Latinoamérica, siempre se podrán encontrar con la comprensión de las autoridades y el silencio de los periodistas españoles, que no valen ni para tacos de escopeta.
Supongo que usted pertenecerá a alguno de esos colectivos despreciables, como si lo viera... O simplemente, y no sé que es peor, es usted una mujer y no sabe ni de lo que habla, como viene siendo la tónica ultimamente.

Todo el mundo tiene derecho a quejarse y hacer huelga. También, "ojo", desde mi punto de vista, todo el mundo tiene sus razones.
El transporte está mal pagado debido a la crisis económica, que algunos, hasta hace cuatro días, negaban; según ellos por motivos patrióticos; según la lógica, electorales.
Los transportistas propietarios de su camión, con la subida del precio del carburante, solo pueden pagar los plazos del pago de su herramienta de trabajo, no les queda nada para ellos, de ahí que estén desesperados.
Nadie, absolutamente nadie hace huelga si no es porque la necesita. La huelga es como la guerra: el último recurso de un colectivo para sobrevivir. En las huelgas de autónomos siempre hay perdedores, y se hacen cuando ya no queda más opción.
Los transportistas autónomos padecen una doble crisis, la de la falta de negocio y la de los piratas, gente que no paga su seguro ni el del camión, que muchas veces se arriman de noche a un camión para robarle el gasóleo...
El Estado tiene la obligación de cuidar a sus ciudadanos, hacer que puedan trabajar y vivir convenientemente, ampararlos legalmente si son agredidos ilegalmente. Nuestro Estado prefiere hacer oídos sordos a los problemas de los ciudadanos escudándose en el bien común, que no deja de ser retener la inflación a costa de los beneficios de los colectivos con menos posibilidad de defensa. Es más fácil aceptar bajo mano la piratería que luchar contra ella; eso sirve, por un lado, para mantener los precios del transporte;

y por otro, para ahorrase su persecución.
En una huelga, los trabajadores intentan por todos los medios evitar el “esquiroleo”, el aprovechamiento de su lucha por segundos que intentan hacer su particular agosto. En este caso los persiguen y, de ser necesario, arruinan.
Esos días estoy harto de escuchar en mi ramo, que si el papa Estado, que si al textil, con muchos más trabajadores no se nos hizo tanto caso, que si los sindicatos pasaban de los trabajadores de nuestro ramo -cosa absolutamente cierta-. Pero nadie se acuerda del esfuerzo que representó reconvertir el textil, las ayudas para jubilaciones forzosas, para reestructurar... que tan solo era despedir a miles de trabajadores con la mínima indemnización con la ayuda del papa Estado.
Dicho esto... llevo más de seis mil € perdidos por culpa de la huelga, no soy el único, pero sí de los más afortunados. La diferencia es que no soy, como la mayoría, de los que acusan a los huelguistas. Yo acuso y hago responsable a un gobierno prepotente, pedante y mentiroso que no sabe hacer la O con un canuto y que le importa más su prestigio que el bienestar de sus gobernados.
Podría alargarme, demostrar con ejemplos lo que digo, etc. pero supongo que ya hay bastante.

MÉXICO: LA IMPUNIDAD

Desde los tiempos en que el ex-presidente Felipe González mostró su admiración por los usos mafiosos de Carlos Salinas de Gortari para mantenerse al mando incurriendo en todos los delitos tipificados en el Código Penal, cuando el PSOE en España se inspiraba en el PRI , que no dudó en eliminar adversarios durante siete décadas, hemos recalado hoy en el trato versallesco que da el Gobierno español a su gran amigo Carlos Slim, y sus intereses financieros. Que se haga extensivo al presidente de México, al que se le ha ofrecido un desayuno de trabajo con la flor y la nata de los empresarios españoles con intereses en México **1)** no es raro, y mucho menos, que estos aludieran a su valiente actuación contra el crimen y el narcotráfico, olvidando mencionar sus alianzas política interpartidarias para garantizar la impunidad del "gober precioso" del estado de Puebla, Mario Marín, protector y usuario de las redes de tráfico de niños y cómplice de los pederastas, y conspirando con ellos contra Lydia Cacho y contra las menores, víctimas de abusos y violaciones, que los denunciaron ; de Emilio González Márquez, gobernador del estado de Jalisco, protector de su secretario de Justicia, participante en orgías con menores; y del gobernador del estado de Veracruz, Fidel Herrera Beltrán, del que no es temerario sospechar que encabeza los cárteles y los sicarios que asolan Veracruz...
Todos sabemos que las grandes empresas españolas en México tienen usía y la puerta abierta para servirse a placer, mientras sus intereses coincidan con quienes se adueñan de la riqueza del país y mantienen al 90% de sus habitantes en un ignominioso estado de penuria, y a los industriales y emprendedores mexicanos y a sus familias como piezas de caza para los secuestradores, los sicarios y los narcotraficantes, amparados y auspiciados por los mismos políticos encargados de perseguirlos. Como muestra, esta carta enviada a varios medios de comunicación, escrita por Rafael Figueroa Soriano, presidente de la asociación de colonos, denunciando su secuestro por "Los Zetas", **2)**y publicada en el diario Proceso:

Señor director:
El grupo de "Los Zetas" se dedica a atemorizar, secuestrar y extorsionar a los ciudadanos de Veracruz, Minatitlán, Coatzacoalcos, Agua Dulce y otras localidades, pero el gobierno estatal se abstiene de intervenir y dar seguimiento a las denuncias, aunque tenga datos suficientes para aprehender a los autores.
En algunos medios de comunicación se informa de los secuestros sin mencionar que sus autores son "Los Zetas", o de plano no publican nada. Esto pude confirmarlo porque,

luego de haber sido secuestrado y liberado con el pago de un rescate, elaboré un comunicado de prensa que nunca se difundió.
Yo fui secuestrado por un grupo de [*"Los Zetas"*]*a plena luz del día cuando había policías a nuestro alrededor, sin que éstos hicieran nada, ni siquiera reportar el hecho para que una patrulla nos siguiera.*
Al saber del plagio, mis familiares solicitaron auxilio a diversas dependencias, pero en vez de que se movilizaran de inmediato, como lo marca la ley, llamaron a otras instituciones, como la [*AFI*]*, las cuales "recomendaron" esperar a mi rescate para "no poner en peligro mi vida".*
Se interpuso la denuncia ante la Agencia Cuarta del Ministerio Público Investigador de Coatzacoalcos, en donde se solicitó la intervención de la Coordinación de la Policía Ministerial. Los integrantes de ésta manifestaron a mis parientes que aguardaran a mi liberación porque no sabían qué organización había cometido el plagio y que ellos ganaban poco dinero como para arriesgarse.
Puesto que formo parte de la ciudadanía y pago normalmente mis impuestos, considero que las autoridades debieron cumplir con su obligación y movilizarse de inmediato en contra de [*"Los Zetas"*]*, quienes en esos precisos momentos me sometían a golpes, maltratos y todo tipo de humillaciones.*
Finalmente fui liberado por los plagiarios a cambio de un rescate de 210.000 pesos y cuatro vehículos de mi propiedad.
En seguida presenté la denuncia correspondiente en la agencia referida y, aun a riesgo de mi seguridad, proporcioné datos valiosos para que procedieran a la localización y captura de los delincuentes, con la advertencia de que se hallaban armados hasta con granadas. Empero, esto de nada sirvió porque la Policía Ministerial ni siquiera se puso a investigar.
Agrego que [*"Los Zetas"*] *conducen mis vehículos por la ciudad de Coatzacoalcos con toda impunidad. Esto lo sé porque, al ir conduciendo por mi ciudad, me percaté de que un individuo que manejaba un vehículo de mi propiedad se encontraba platicando con dos policías municipales. Al bajarme y gritarle que ese era mi vehículo, que me lo habían quitado en un secuestro, el tipo se puso nervioso y los policías, con desfachatez, le dijeron que se fuera y a mí me detuvieron.*
Cabe mencionar que, durante mi secuestro, Los Zetas manifestaban, mientras se drogaban, que no importaba que pusiera denuncia en su contra, pues estaban seguros de que nunca iba a proceder ni en el ámbito local ni en el federal porque, señalaron, "el 'Zeta" número uno era el gobernador Fidel Herrera Beltrán". **3)**
Le solicito publicar la presente para reclamar que se realicen las investigaciones del caso y se me preste el auxilio necesario para garantizar mi seguridad. Así mismo, señor director, le solicito a usted realizar un reportaje sobre la inacción de las autoridades ante estos delincuentes en Veracruz, Coatzacoalcos, Agua Dulce y aledaños. (Carta resumida.)
Atentamente
(El texto en cursiva es de **Rafael Figueroa Soriano**)

En España, cada cierto tiempo, suelen detener algún que otro servidor del orden que trabaja para los narcotraficantes; y, de vez en cuando, se traspapela en los juzgados un proceso judicial contra algún notorio mafioso, y, en las investigaciones y cateos, no es raro que se pierdan pruebas o desaparezca droga incautada, como el robo de 400 kilos de cocaina en el puesto de policía de Aduanas del puerto de Barcelona, o se llega a filtrar que, en el sumario instruido contra un narcotraficante, éste contaba con un informante cualificado, como el jefe de la Policía Judicial de la Guardia Civil de Cataluña, el coronel Miguel Gómez Alarcón, que ordenó a sus subordinados que *"avisaran a un narcotraficante de que un grupo de delincuentes pretendía robarle la droga que tenía almacenada*"...

Nuestros amigos españoles suelen pensar que exageramos cuando les decimos que las alianzas de los grandes empresarios, los bancos, y los políticos con los cárteles del tráfico de seres humanos, las redes de pederastia, el narcotráfico, y el blanqueo de dinero proveniente de las actividades delictivas que se han ensayado e institucionalizado en México, también funcionan en España.
Lo que nos hace diferentes frente a la corrupción y a la injusticia es que siempre ha habido ciudadanos que se han enfrentado y han luchado contra los poderosos, pero en México también ha habido periodistas dispuestos a jugarse la vida por respaldarlos e informar, y en España, no.

Gatopardo

1)

Entre los asistentes, una decena de representantes de constructoras españolas, como Luis del Rivero, presidente de Sacyr Vallehermoso; Rafael del Pino y Calvo-Sotelo, presidente de Ferrovial; Juan Miguel Villar Mir, de OHL, y Baldomero Falcones, vicepresidente y consejero delegado de FCC, el presidente de BBVA, Francisco González, y el director general de Santander en México, Marco Martínez Cavica; representantes de la industria textil, como el consejero del grupo Inditex, Lino del Prado y su vicepresidente, Pablo Isla Alvarez de Tejada, y de las empresas turísticas, como el presidente de Iberia, Fernando Conte; el presidente del Grupo Barceló, Simón Pedro Barceló; el presidente de Fiesta Hoteles, Abel Matutes; el presidente de Occidental Hoteles, Gregorio de Diego, y la consejera delegada de Riu Hoteles, Carmen Riu; y del sector de Gas, electricas e hidrocarburos, como el presidente de Iberdrola, Ignacio Sánchez Galán; el vicepresidente de Acciona, Juan Ignacio Entrecanales; el consejero delegado de Gas Natural, Rafael Villaseca; y el director general de producción y exploración de Repsol YPF, Nemesio Fernández Cuesta.
En la comisión mexicana, compañaron al presidente Calderón los gobernadores de Baja California, José Guadalupe Osuna Millán; Juan Sabines Guerrero, de Chiapas, y Enrique Peña Nieto, del Estado de México. respectivamente; y los ministros de Asuntos Exteriores, Patricia Espinosa, y Trabajo y Previsión Social, Javier Lozano.

2)

Los Zetas son un grupo integrado en el Cártel del Golfo, organización delictiva mexicana, cuyo principal negocio es el narcotráfico. Se formó; de un grupo de militares que desertaron del Grupo Aeromóvil de Fuerzas Especiales (GAFE) y del Grupo Anfibio de Fuerzas Especiales (GANFE) del Ejército Mexicano, fundados en 1994 con motivo del levantamiento zapatista de Chiapas y que fueron entrenados por la Agencia Central de Inteligencia ((CIA) de los Estados Unidos. Por tanto, recibieron entrenamiento de elite que incluyó manejo de armas sofisticadas y trabajo de contrainsurgencia . Su área de influencia originaria era Tamaulipas, pero más tarde extendieron su actividad a Nuevo León y Coahuila. También se han reportado movimientos en Veracruz, Michoacán, Acapulco Guerrero, Zacatecas y Guanajuato.

3)

En este video difundido a nivel nacional, en el que dos sicarios de los 'Zetas' revelan nexos del Cártel del Golfo con policías de Veracruz, y de la AFI.
Lo dicho por los presuntos sicarios, cuyos cuerpos aparecieron el martes fuera de una televisora local en la ciudad de Veracruz, destapó una serie de relaciones de protección por parte de policías de los municipios de Veracruz y Boca del Río, por lo que se hicieron cambios y se abrió una investigación a nivel estatal.
Víctor Manuel Pérez Rocha, de Ciudad Victoria, Tamaulipas, y Jesús Arano Servín, de Tuxtepec, Oaxaca, revelaron ante el grupo autodenominado "Gente Nueva" que al menos ocho jefes policiacos están involucrados con el Cartel del Golfo.
Uno de ellos era el comandante Gerardo Monraga, alias "El Tigre", quien fue ejecutado el 17 de marzo, junto con dos oficiales, en calles cercanas a la plaza comercial Las Américas, porque supuestamente incumplió la orden de liberar a los detenidos del caso Villarín, en donde hubo dos ejecutados tras una carrera de caballos clandestina, el 3 de marzo, cerca de la ciudad de Veracruz.
Otros de los mandos presuntamente implicados que fueron mencionados son Miranda, Salas, Real, "Tiburón", Xicoténcatl y Edson Estrada, quien fue sacado de su domicilio la madrugada de este jueves.
Los "Zetas" capturados por "Gente Nueva" reconocieron también haber ejecutado a 23 personas en el Estado de Veracruz, por ajuste de cuentas.
Encañonados con armas largas y custodiados por personas encapuchadas, los supuestos sicarios también dieron a conocer en el video, de una duración aproximada de 8 minutos, la existencia de 600 narcotienditas que operan en el Estado, bajo protección de autoridades.
Esta información y las recientes ejecuciones obligaron al Gobernador Fidel Herrera a convocar con carácter de urgente al gabinete de seguridad, en el que participaron comandantes de la 26 Zona militar, de la Armada de México, corporaciones federales y estatales de procuración e impartición de justicia, así como de Seguridad Pública.
Aunque la reunión se realizó a puerta cerrada, trascendió que uno de los acuerdos fue que no se consideró necesario un megaoperativo

de fuerzas federales como se ha hecho en otras entidades del País y que la Policía Federal Preventiva sólo participará en tareas de vigilancia durante este periodo de Semana Santa en las zonas eminentemente turísticas, pero no de manera permanente.
Tras la reunión emergente, el ex subprocurador de Justicia de la Zona Veracruz, Marco Antonio Aguilar, rechazó que su cambio a la ciudad de Xalapa obedezca a que haya recibido amenazas de la delincuencia organizada por su participación en las investigaciones sobre la ejecución de tres policías el 17 de marzo.

4)

Veracruz.- Un comando fuertemente armado penetró poco antes de la una de la mañana de este viernes al Centro de Readaptación Social (Cereso) "Duport Ostión" del municipio de Coatzacoalcos, y sustrajo violentamente a seis reos vinculados al brazo armado del cártel del golfo, Los Zetas.

El rescate se perpetró a pesar del *Operativo Veracruz Seguro* que realizan desde el mes de abril autoridades del Ejército Mexicano,

Policía Federal, PGR y de la Secretaría de Seguridad Pública estatal.
Los sicarios fueron detenidos el pasado 10 de marzo del 2007 en el municipio de Coatzacoalcos, cuando pretendían secuestrar a un prominente ganadero de la región. Se trata de Ramiro Pérez Moreno, Luis Antonio Azuara Rodríguez y/o Daniel Ventura Rodríguez, así como Gerardo Sánchez Trujillo, Alfredo de la Fuente Ramos, Carlos García Hernández y Alfonso Martínez.
La Policía Municipal de aquel lugar frustró el secuestro y los sicarios vinculados a Los Zetas fueron detenidos y recluidos en dicho centro penitenciario.
En aquella ocasión fueron más los detenidos, sólo que algunos fueron trasladados a la ciudad de México por parte de la SIEDO.
A poco más de un año de su captura, fueron rescatados por medio de un comando armado.
Fuentes anexas a la investigación indican que un grupo "significativo" de sicarios armados con rifles AK-47 y R-15 arribó intempestivamente al penal y tras someter a los custodios y policías, penetraron hasta su interior para liberar a cinco presuntos miembros de Los Zetas.
Ha trascendido que autoridades penitenciarias y de la procuraduría estatal han iniciado las investigaciones respectivas al interior del Cereso.

Ni autoridades de la Dirección de Prevención y Readaptación Social ni de la Secretaría de Seguridad Pública, han dado a conocer un informe "oficial" sobre estos hechos que agudizan el clima de inseguridad que se vive en la zona sur del estado.

Foto de portada: placa institucional de agradecimiento a un miembro del grupo secreto de extrema derecha "Yunque", con el símbolo de la Y dentro del círculo. No en vano algunos de los más altos mandatarios de los sucesivos gobiernos de México están asociados a "Yunque"

MIS HÉROES: ANTONIO MORENO ALFARO

En España, que ha puesto de moda y consagrado los latiguillos "te lo juro", "si quieres que te diga la verdad", "la verdad", como una epidemia idiotizante para salpimentar cualquier declaración anodina y perfectamente falaz, no hay nada que esté más devaluado que la verdad. Y, como es lógico, quienes investigan los fraudes y las estafas a los ciudadanos, para descubrirlas, contarlas y combatirlas, se ven rebozados en la más atroz indiferencia de los afectados, que ni siquiera tienen el resorte básico de supervivencia para interesarse por saber qué y quiénes los alienan, los anulan y los extorsionan.

En este país privilegiado del primer mundo, donde la quinta parte de la población está por debajo del umbral de la pobreza, y la mitad se hipoteca durante treinta años o cuarenta años para tener una casa, con tal de imaginarse que pertenecen a la clase media y que son propietarios, cuando sólo son deudores y arrendatarios de un banco; en este país que ha multiplicado los títulos universitarios entre quienes tienen a bien estudiar y aprender lo imprescindible para aprobar, mientras que se exige cada vez menos a los titulados universitarios, y la noción de cultura general se ha convertido en una lista de conocimientos de inútil aplicación, no es de extrañar que los ciudadanos padezcan una idiocía moral que los incapacitaría legalmente para ejercer sus derechos y deberes civiles, si no fuera porque a esta entelequia de democracia le conviene esta masa amorfa que ignora sus derechos, y se mueve a golpe de emociones exacerbadas contra fantasmas creados para que descarguen ahí su indignación, para compensar su falta de dignidad.

En este miasma social, los héroes no son los que luchan un día a vida o muerte, y vencen o mueren gloriosamente. Los verdaderos héroes no son impulsivos ni temerarios, no necesitan público ni aplausos, y la indiferencia no los descorazona. No son conscientes de su heroicidad cuando se enfrentan cada día a un enemigo poderoso sin arredrarse con la dificultad y los fracasos. Son Sísifos perseverantes que empujan la roca hasta la cima, y vuelven a empezar una y otra vez, cuando las represalias se les vienen encima tratando de aplastarlos. Y si están cansados, si les falla el ánimo, si les asalta la tentación de abandonar su lucha, no se permiten el lujo de cultivar sus debilidades como el resto de los mortales. Y como ellos hay uno entre un millón.

Antonio Moreno Alfaro es uno de esos héroes. En su página web, www.estafaluz.com detalla cada una de sus denuncias, señala los culpables, los

cómplices, y facilita un formulario para calcular y reclamar el dinero que, en justicia, deben devolvernos las compañías eléctricas.

Y por una mera cuestión de decencia ciudadana, no deberíamos dejarlo solo, a no ser que merezcamos que nos estafen. Porque lo único que produce ganancias millonarias es la estupidez ajena.

No creía necesario decírtelo, he puesto tu enlace y el de tu héroe en mi blog.
Te escribo para comentarte que hoy día las licenciaturas en España cuestan sudor y dinero. Sudor por el estudio y dinero por mantener un estudiante sin apenas tiempo para trabajar. Pero no es de eso de lo que quería hablarte.
Con los nuevos planes de estudios, una licenciatura se puede conseguir con menos años de estudios y, en algunos casos, menos asignaturas. El problema reside en que un

licenciado, sin una especialización o "máster" pagados de su bolsillo, no encuentra trabajo de ello. Pocos acceden a una beca y otros pocos a cursarlo, aun pagándolo en su totalidad, sin un buen historial estudiantil.
Un abrazo.

ACÉMILAS A NATIVITATE: ALIMAÑAE CONSILIA AD DON ISIDORI CIBER-TONTON MACOUTES

Insignes de la Fundación Ramón Areces:
Observamos con satisfacción que nos han hecho caso y han modificado el diseño de su web; pero han pasado ustedes del diseño espumillón y complementos de bisutería a la sección de papelería y devaneos del ambigú cultural de los almacenes de ultramarinos de su digna dirección.
Para que luego no digan que no hago crítica constructiva, aviso: la ilustración del margen superior (patilla de gafa-pasta sobre libro) hay que modificarla: Unas veces leen el libro del derecho y otras del revés.
El periódico en inglés de la "sala de prensa" sería conveniente ponerlo del derecho.
Al hirsuto talento que se le ha ocurrido ilustrar el capítulo de "Publicaciones" con unas cajas para puros de resina sintética, con adornos de pirograbado , imitando un libro, a ése, finiquito y puerta, y si se ponen farrucos los sindicatos, pónganlo en el Consejo Asesor científico, bien lejos de un ordenador.
La imagen de la investigadora mirando un microscopio no requiere al fondo el morrete carnoso y la barba de dos días de un vendedor de coloniales: arreglen eso. Y esa pluma no es *Montblanc Meisterstück,* que es *made in Taiwan*, que ya nos conocemos.

Y la memoria del 2004-2005 actualícenmela, que huele a seta: aquí, aquí y aquí y acullá hemos comentado el bonito fraude consistente en declarar subvenciones y gastos que no han hecho y no piensan pagar. Tengan compasión de la Inspección de la Agencia Tributaria, que desde que recibieron la denuncia están al borde del alipori sin atreverse a hincarles el diente: no se ensañen con ellos publicando en Internet las chorizadas que perpetran, que ellos también tienen madre.
Y, a no ser que tengan un sentido del ridículo maltrecho, quiten ese fragmento de la página 195 (*"The Lost Child"*) de *The Young Man's Offering: Comprising Prose and Poetical Writings of the Most eminents authors*, publicado en 1853, en Boston, por Phillips Sampson & Co. y el reloj de oro con segundero y la lupa que han puesto encima, que se les ve a la legua que ni lo han leído ni lo van a leer. Los malos actores siempre sobreactúan: ustedes pongan la Enciclopedia de Grado Medio de Dalmau Carles, y van que chutan.
Con los duros que se están gastando para convencernos que leen sin morderse la punta de la lengua y bizquear, es de pena.
Y, por los clavos de Cristo, en las imágenes institucionales,. ni aunque don Isidoro sea el jefe, y González Palomino su mamporrero, no los pongan ahí, que ni los de la 'Ndrangheta se gastan esas trazas, esas panzas, esos peluqueros, esos sastres... La manga jamón y la solapa tapando el bolsillo no se lleva este año en traje de caballero, por mucho que se empeñen, y, además, como ganen los míos, tendrá pena de cárcel.

Alimaña, redactor jefe de *Alimaña News: la noticia antes de que ocurra.*

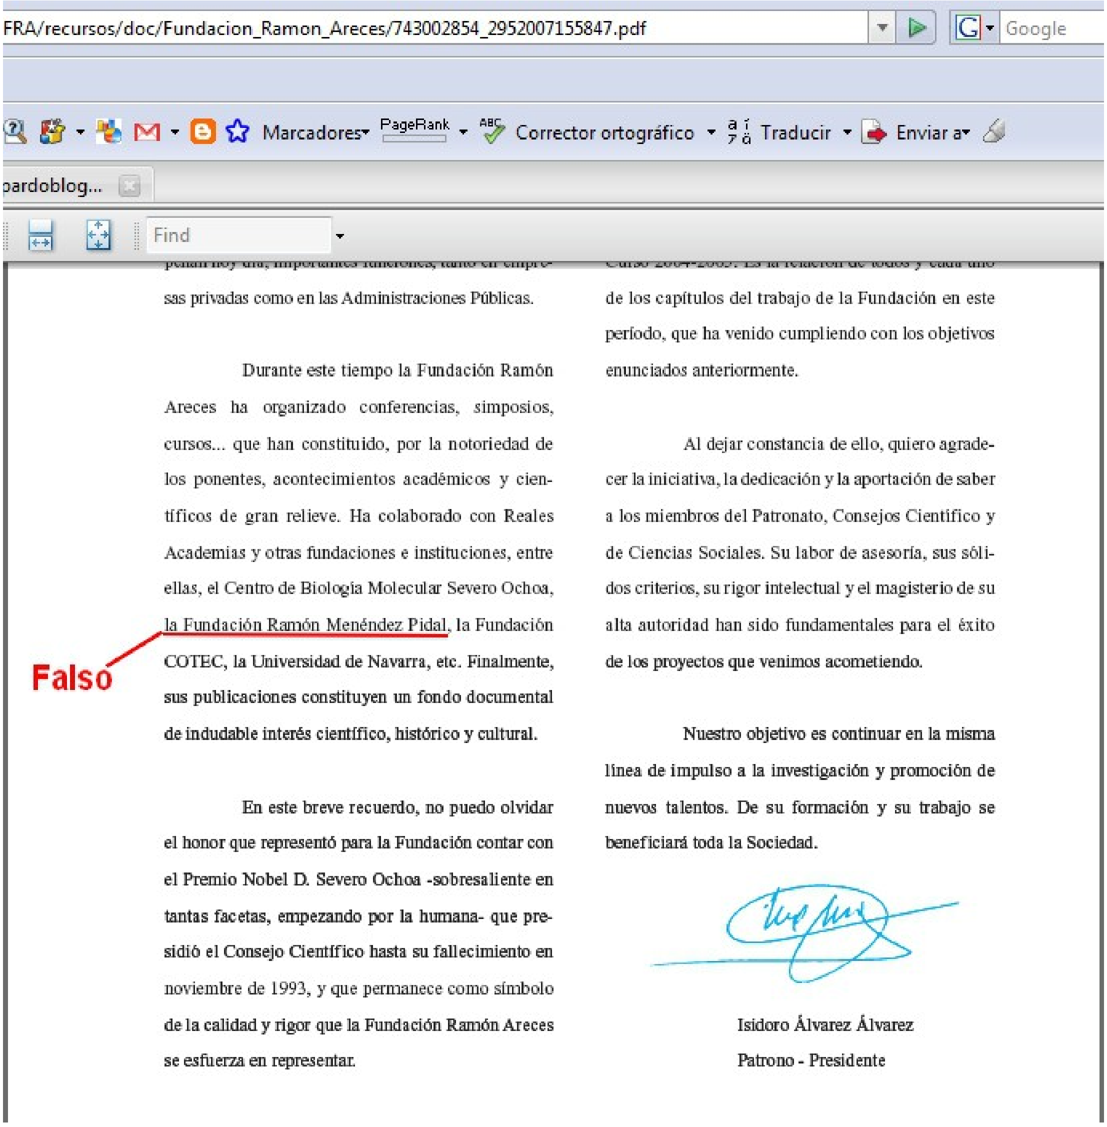
Sin quedarles otra.



sas privadas como en las Administraciones Públicas.

Durante este tiempo la Fundación Ramón Areces ha organizado conferencias, simposios, cursos... que han constituido, por la notoriedad de los ponentes, acontecimientos académicos y científicos de gran relieve. Ha colaborado con Reales Academias y otras fundaciones e instituciones, entre ellas, el Centro de Biología Molecular Severo Ochoa, la Fundación Ramón Menéndez Pidal, la Fundación COTEC, la Universidad de Navarra, etc. Finalmente, sus publicaciones constituyen un fondo documental de indudable interés científico, histórico y cultural.

En este breve recuerdo, no puedo olvidar el honor que representó para la Fundación contar con el Premio Nobel D. Severo Ochoa -sobresaliente en tantas facetas, empezando por la humana- que presidió el Consejo Científico hasta su fallecimiento en noviembre de 1993, y que permanece como símbolo de la calidad y rigor que la Fundación Ramón Areces se esfuerza en representar.

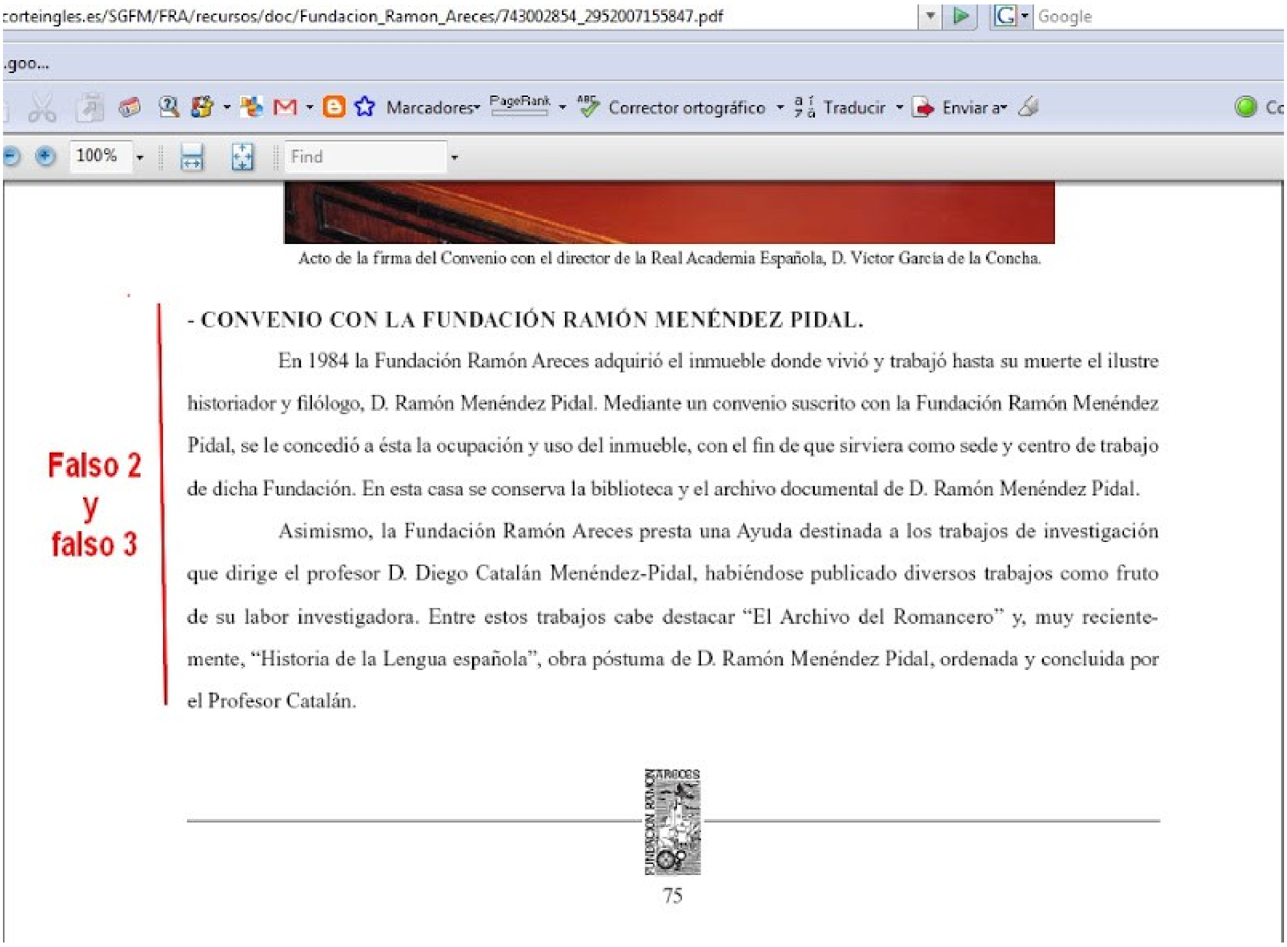
de los capítulos del trabajo de la Fundación en este período, que ha venido cumpliendo con los objetivos enunciados anteriormente.

Al dejar constancia de ello, quiero agradecer la iniciativa, la dedicación y la aportación de saber a los miembros del Patronato, Consejos Científico y de Ciencias Sociales. Su labor de asesoría, sus sólidos criterios, su rigor intelectual y el magisterio de su alta autoridad han sido fundamentales para el éxito de los proyectos que venimos acometiendo.

Nuestro objetivo es continuar en la misma línea de impulso a la investigación y promoción de nuevos talentos. De su formación y su trabajo se beneficiará toda la Sociedad.

Isidoro Álvarez Álvarez
Patrono - Presidente

Como un duro de madera



Acto de la firma del Convenio con el director de la Real Academia Española, D. Víctor García de la Concha.

- CONVENIO CON LA FUNDACIÓN RAMÓN MENÉNDEZ PIDAL.

En 1984 la Fundación Ramón Areces adquirió el inmueble donde vivió y trabajó hasta su muerte el ilustre historiador y filólogo, D. Ramón Menéndez Pidal. Mediante un convenio suscrito con la Fundación Ramón Menéndez Pidal, se le concedió a ésta la ocupación y uso del inmueble, con el fin de que sirviera como sede y centro de trabajo de dicha Fundación. En esta casa se conserva la biblioteca y el archivo documental de D. Ramón Menéndez Pidal.

Asimismo, la Fundación Ramón Areces presta una Ayuda destinada a los trabajos de investigación que dirige el profesor D. Diego Catalán Menéndez-Pidal, habiéndose publicado diversos trabajos como fruto de su labor investigadora. Entre estos trabajos cabe destacar "El Archivo del Romancero" y, muy recientemente, "Historia de la Lengua española", obra póstuma de D. Ramón Menéndez Pidal, ordenada y concluida por el Profesor Catalán.

FRANCISCO CASCALES: CONTRA LAS LETRAS Y TODO GÉNERO DE ARTES Y CIENCIAS

Epístola II. Al doctor don Diego de Rueda, arcediano de la Santa Iglesia de Cartagena
Contra las letras y todo género de artes y ciencias. Prueba de ingenio

Prometí a v. m. ir ayer, a las cuatro de la tarde, a su casa, o por mejor decir, a su museo. No cumplí mi palabra, olvidado de mí mismo; porque me sumergí tanto en la lección de algunos humanistas, que me robaron totalmente la memoria, pervertieron el juicio y casi me despojaron del sentido común. Malditas sean tan malas ocupaciones, que cuestan tan caro al cuerpo y al alma.
Parecerále a alguno que he blasfemado contra las sagradas Musas; no a v. m., que sabe y ha experimentado muchas veces esta verdad. ¡Oh letras! ¡Oh infierno! ¡Oh carnicería! ¡Oh muerte de los sentidos humanos! O seáis rojas, o seáis negras; que de esta manera sois todas. Por lo rojo sois sangrientas, sois homicidas; por lo negro sois símbolo de la tristeza, del luto, del trabajo, de la desdicha. ¿Quién me metió a mí con vosotras? Cincuenta años ha que os sigo, que os sirvo como un esclavo: ¿qué provecho tengo?, ¿qué bien espero? En la tahona de la gramática estoy dando vueltas peor que rocín cansado; en las flores de la retórica me entretenéis sin esperanza de fruto; en las fábulas y figmentos de la poesía me embelesáis, donde la modorra de esta arte me hace soñar millares de disparates y devaneas; en la enciclopedia o círculo de todas las artes y ciencias, de las religiones, de los ritos y costumbres, de las ceremonias, de los trajes, de las cosas, en fin, exquisitas, nuevas y peregrinas me angelicáis y trasportáis mis pensamientos. Y por todo este caos de vigilias y desvelos ¿qué premio me aguarda? Mas vuelvo a mi dicho: ¡Oh letras, carísimas por lo mucho que me costáis! Malditos sean vuestras inventores, bien fuesen los Egipcios, o los Pelasgos, o los Etruscos, o Cadmo, o Palamedes, o Trimigisto, o todos juntos; que muchos seríades los conjurados en mi daño.

¿Qué tienen las letras necesario o de provecho para el ingenio del hombre? La lección de las letras desvanece los espíritus, ofusca la vista de los ojos, encorva la espalda, enflaquece el estómago, compele a sufrir el frío, el calor, la sed, la hambre, cuatro crueles verdugos de la naturaleza humana; impide muchas veces los piadosos oficios de la virtud, roba y nos quita las horas de recreo; y a los estudiosos los veréis cabizcaídos, los ojos encarnizados, la frente rugosa, el cabello intonso, los carrillos chupados, las cejas encapotadas, la barba salvajina. No diréis, no, que son gente política y urbana, sino cíclopes, paniscos, sátiros, egipanes y silvanos. ¿Qué cosa más contraria a la naturaleza, la cual nos dió la lengua para el uso de hablar, y nosotros la metemos en la vaina del silencio, y damos sus oficios a las manos, al papel, a la pluma?
Piensan algunos que el mundo fuera ya acabado si no estuviera sustentado en las columnas de las letras. Como si la madre naturaleza no fuera guía, hacha espléndida y ardiente sol a todos sus hijos; y como si la verdad evangélica no se hubiera extendido y sembrado por toda la tierra, a todo género de gentes, a grandes y a chicos, a los más vecinos y a los más remotos. Antes sabemos que nuestro Señor Dios revela sus juicios, sus secretos, su espíritu, a los pequeños, a los idiotas y sin letras.

Antes de Cadmo, antes de Mercurio, antes de los inventores de las letras, infinitos vivieron vida santa, pía y ejemplar; infinitos gobernaron repúblicas y reinos con sola su buena inclinación y buenas costumbres, acompañadas del dictamen natural y discurso de la razón y con la experiencia de varios acontecimientos; y en la simplicidad de su vida fundaban el gobierno de las gentes. Decía Marco Cicerón, padre del gran orador (así lo dice Cecilio Rhodigino, libro XVIII, capítulo 34), que los Romanos de su tiempo eran semejantes a los Siros, que cuanto más bien sabían la lengua griega, tanto más malos eran. Muchos hemos conocido sin letras bonísimos hombres, y después de haberlas aprendido, degenerar de su bondad y deslizar en varios descaminos. Los Druidas, entre los antiguos franceses, fueron excelentes en sabiduría, fueron los oráculos de aquel reino, sin haber gustado las letras con los primeros labios. En los extremos márgenes de Polonia, de Suecia y de Moscovia, no sólo sin la instrucción de las artes y ciencias, pero sin saber escribir, se mantienen y han mantenido en perpetua paz y concordia.

Descubramos aquella mística fábula del Gerión tricípite de España, descifrémosla, rompámosle la nema. La verdad es que fueron tres Geriones, hermanos tan bien avenidos, tan uniformes, que siendo tres, gobernaban a España con tanta conformidad como si fueran uno solo. Y esto sin ayuda de las letras, sino con solas las centellas de la razón natural y el uso y cultura de las buenas costumbres. ¿A Dentato no le sacaron del arada a la dictadura de Roma? ¿A nuestro rey ínclito Wamba no le coronaron y juraron por tal, trayéndole de las coyundas de los bueyes al cetro real de España? Pitágoras mandó que sus preceptos no se escribiesen, porque no quería que sus oyentes entregasen al papel lo que deseaba que llevasen en las almas impreso. Platón advertía a Dionisio que decorase y no escribiese ciertos preceptos que le daba; porque la custodia de la cosa es la memoria, no la escritura; y quien escribe sus conceptos no los puede defender: quién los entiende de una manera, quién de otra; quién los corrige, o por ventura deprava; quién los condena, quién los alancea; y el pobre autor lo padece en su opinión y en su honra. Y si no hubiera escrito, tenía lugar de disputar, conceder, negar y volver por sí; y habiendo en ello error, pudiera retractarlo, pudiera recogerlo, y una vez escrito, *Nescit vox missa reverti*: «No puede volver la palabra salida una vez de la boca», como siente Horacio.

Aquel gran monje Antonio ni aprendió letras, ni admiró a los letrados; y dijo que no tenía necesidad de letras quien tenía buen alma. El profeta rey de Israel decía: *Quoniam non cognovi litteraturam, introibo in potentias Domini*: *«Porque no supe letras, me*

entraré en la omnipotencia de Dios». Diga lo que quisiere quien quisiere, que yo sello de buena gana aquella y esta sentencia de la Sagrada Escritura: *Qui adjicit scientiam, adjicit dolorem*; que harto trabajo tiene quien tiene ciencia. La ciencia levanta y ensoberbece al hombre. *Epistola* -dice Cicerón- *non erubescit*: *«La carta es libre y sin vergüenza»*. ¿Qué le costó a Urías llevar las letras a Joab? La vida. ¿Y a Belerofón? Otro tanto. Miserables letras, que dieron a sus dueños la muerte. Bien dice el Apóstol, que la letra mata.
¡Qué locura es tener las letras por cosa estimable, siendo peste de la memoria y entendimiento, estrago de la vergüenza, instrumento del engaño, ofuscación de los ojos, menoscabo del celebro, veneno de la salud, cicuta del estómago, perturbación del reposo, y para decirlo de una vez, compendio de todos los males! Dirán: -¡Pues qué! ¿Condenas todas las artes y todas las ciencias? Y cuando lo diga, ¿faltaránme votos en este parecer? Aguarden, y oigan los que tengo en mi ayuda y de mi parte.

Luciano Samosatense y Andrés Salernitano hacen grande mofa de la gramática, y San Agustín dice de ella que es una cosa más llena de enfado que de gusto ni de verdad. A la retórica los Romanos la desterraron dos veces de la ciudad, por público edicto. Alejandro Magno mandó echar en un río la historia de Aristóbulo; los Babilonios, los Lacedemonios, los Egipcios, los Romanos refutaron la medicina. Así lo dicen Estrabón, Herodoto y Marco Catón. Los Franceses antiguamente no quisieron recibir la jurisprudencia, ni los Españoles los libros de las leyes imperiales, puesta por sus reinos pena de la vida; testigos Oldrado y Juan Lupo, jurisconsultos. Filipo, rey de Macedonia, prohibió a su hijo Alejandro la música. San Jerónimo fué de parecer que no hubiera tonos teatrales en las iglesias. San Pablo testifica que la filosofía es acomodada para engañar. Atanasio la llama trabajosa y de poco provecho; Atheneo, oficina de la maledicencia; Eusebio, repugnancia de opiniones. Tácito dice que la matemática es a los poderosos infiel, y a los que esperan en ella, engañosa. Séneca dice que es superficial, y que edifica en solar ajeno. San Agustín dice de sus conjecturas, que ellas se contradicen y destruyen a sí mismas. Orígenes a la dialéctica le da las mismas cualidades que a los mosquitos, que aunque hombre no los vea volar, los siente picar. Quintiliano dijo que la poesía ni daba honra ni provecho a sus autores. La aritmética y astronomía, dice Platón que las inventó el demonio. A la cosmografía dice Stanislao que la inmensidad del mundo hace imposible su noticia. A la mágica, con su Zoroastro, Orígenes, con la universal Iglesia, la condenan. Y hablando generalmente de las artes liberales, oigamos a Séneca. *«Algunos, dice, se ponen a disputar si las artes liberales hacen al hombre bueno: ni lo prometen, ni tal cosa afectan. ¿Qué cosa buena puede haber en aquellas ciencias, cuyos maestros y doctores son, cual ves, torpísimos y viciosísimos? No nos preparan para la virtud, su interés buscan, jornaleros son, al estipendio anhelan, al palio corren; mientras la esperanza del dinero luce, nos entretienen. Y realmente no debemos ocuparnos en estos estudios sino en tanto que el ánimo emprende otra cosa mayor. Envejecernos en las letras es disparate. El gramático enseña el lenguaje, y si quiere adelantarse más, se arroja a las historias; y cuando más dilata sus términos, habla de los versos y poesía. ¿Qué cosa de éstas nos abre el camino de la virtud? Pasemos a la geometría y a la música. ¿Qué hay en ellas que nos aparte del vicio, y lleve al templo de la bondad? Pues quien esto ignora, no sabe nada.»* Hasta aquí es de Séneca.
La astrología, pues, nos encamina bravamente al cielo, del cielo trata; pero ninguna ciencia nos enajena más del cielo que ésta. ¿Qué aspectos, qué triplicidades, qué horóscopos son los vuestros, oh astrólogos, Atlantes agobiados, Prometeos maniatados, estrelleros nocturnos? ¡Cuán bien exclama contra ellos Marco Tulio!: ¡Oh necios! ¡No ven aquello que tienen entre los pies, y escudriñan las sendas y rincones del cielo! El otro geómetra considera muy de espacio los ángulos rectos y oblicuos, echa el cartabón, mide con sus parasangas la longitud y latitud de la tierra, y no mide sus apetitos ni compasa su vida, ni nos enseña a medirla ni compasarla.

Diógenes, cuando consideraba en el mundo a los astrólogos, farautes de sueños, adivinos, poetas y pintores, y otros de este género, juzgaba que no había en la tierra cosa más desdichada que el hombre. Yo no soy Diógenes, pero cuando considero los médicos, los abogados, vengo a encogerme de manera que me confundo y pierdo en mí mismo. Dime, médico: ¿Cómo conoces tú las partes interiores del cuerpo afectas? ¿Cómo te avienes en tanto número y diversidad de partículas del cuerpo humano? ¿Cómo conoces las causas secretas de naturaleza por los efectos mudos y muchas veces contrarios? ¿Cómo aplicas remedios a casas distintas, confusas y misceláneas? Atado estás; ¿qué has de hacer en tanta perplejidad? ¿Qué? Aventurar y jugar al tablero la vida del hombre. Decía Pausanias que él tenía por los mejores médicos aquellos que no dejaban a los enfermos llegar a descolorirse, sino que los enterraban luego; porque sentía que, pues al fin las habían de acabar, que mejor era ahorrar de envites. Stratónico decía lo mismo: Alabo tu experiencia, médico, que en fin no dejas a los enfermos pudrirse, sino que luego los despojas de la vida. Diciendo un médico que era grande la potestad de los médicos, replicó Nicocles: ¿Quién duda en ello, pues a tantos matan sin pena ni castigo? En fin, en no siendo la enfermedad tan fácil, que la pueda curar un pastor y un herbolario con hierbas simples, los médicos hacen experiencias en nosotros a costa de nuestra vida. Filemón dijo que solos el médico y abogado podían matar libres de pena.

¡Oh abogados; ahogados habíades de estar en el riguroso estrecho de Magallanes! ¿Qué volcanes rebosa el siciliano Etna, que tanto abrasen, como vosotros, las repúblicas?¿Qué caimanes arroja el índico Océano, que así despedacen las gentes, como vosotros? Y cuando digo abogados, no me dejo en el tintero vuestros administros los escribanos, ladrones de ejecutoria; los procuradores, zarzas arañadoras de nuestras bolsas; los solicitadores, reclamos y sirenas dulces, que nos meten incautas en los peligros de vuestras plazas: todos os confederáis y dais las manos para echaros sobre nuestras haciendas, honras y vidas. Decís, letrados, que sois administradores de la justicia; yo digo que estáis obligados a serlo, pero que no lo sois; y lo peor es, que os lo puedo probar con argumento in barbara. Para todos los pleitos hay letrados; pues todos los pleitos no son justos. Si vosotros sabéis el derecho, ¿por qué entretenéis el pleiteante de causa injusta? Enviadle a su casa, componed las partes en lo dudoso, dad a cada uno lo que es suyo, dejad las cautelas y prolongaciones; tantas sentencias interlocutorias, tantos términos, tantos compulsorios, tanto llevarnos de Herodes a Pilatos, y al fin nos sentenciáis al despojo de nuestra hacienda y acabamiento de nuestra vida. Maldito -dice Dios en el Deuteronomio- quien pervierte la justicia del extranjero, del pupilo, de la viuda; y diga todo el pueblo, *«amén»*. ¡Ay de aquellos -dice Isaías- que justificáis al malo por dineros, y quitáis la justicia a quien la tiene! No me atrevo a decir lo que os dice Casiodoro, sobre el salmo 73, en el verso "*Irritat adversarim nomen tuum"*; él lo dice, con él lo habed. *«Éstos son* (habla de los abogados) *en los convites, chocarreros; en las ejecuciones, arpías; en las conversaciones, bestias; en los argumentos, estatuas; para entender, piedras; para juzgar, leños; para perdonar, de bronce; para las amistades, leopardos; para donaires, osos; para engañar, zorras; en la soberbia, toros; en el estragar y consumir, minotauros.»*

De los teólogos no digo nada, porque no es justo tocarles a la fimbria de su ropa, cuanto más a su vida y costumbres. Sólo digo que estos oradores divinos, en los púlpitos no debieran (que algunos hay que lo hacen) pasarse a las letras humanas tan apegadamente, que parece que no profesan las divinas; y entiéndase que yo no condeno a los que traen humanidad para interpretación de la Escritura Sagrada, que esto es muy útil y muy estimable; y los escolásticos a veces se quieren explayar, de manera que pierden los estribos de la fe, y dan en artículos contrarios a nuestra católica y ortodoxa religión. Mal haya el diablo, porque tenemos tanta multitud de ejemplos que

confirman esto y nos avergüenzan. Aunque esta nave de la santa madre Iglesia, si correr tormentas, si navegar proejando, si ser azotada, ya de vientos, ya de olas, a lo menos no puede dar al través; al puerto ha de llegar de salvamento.
¿Queréis ver cuán aprisa tropiezan y caen los doctores, los sabios de este siglo? ¿Quién ignora las alabanzas, las aclamaciones con que el mundo ha celebrado a Sócrates, Platón y Aristóteles, soles de la filosofía? Pues oíd lo que se dice de ellos; que a mí me tiemblan las carnes de pensarlo.
Sócrates, dice Apuleyo, el andrajoso y remendado, cuyo familiar era el demonio, hizo burla de sus dioses y no conoció al verdadero Dios; dice muchas cosas, no sólo indignas de alabanza, pero dignas de reprehensión, como fué aquello: *«Lo que está sobre nosotros no nos toca a nosotros»*; y aquello del juramento por el perro y por el ganso, y aquel voto de sacrificar a Esculapio el gallo. Y Zenán Epicúreo le llama truhán, necio, hombre perdido y rematado. Y nuestro Lactancio le llama loco, así a él como a todos los que piensan que fué sabio.

Platón, dice el mismo Lactancio, soñó a Dios, no le conoció; fingió haber hallado la virtud, y la destruyó; instituyó en su República que todas las cosas fuesen comunes, hasta las mujeres casadas. Con esta su doctrina quitó la frugalidad, que no la puede haber donde no hay cosa propria; quitó la abstinencia, no habiendo cosa de que abstenerse; quitó la castidad, la vergüenza, la modestia, con la licencia de las cosas comunes. En fin, queriendo dar a todos virtud, se la quitó a todos. Y Crisóstomo ¿qué dice de él? Oídle: *«Platón fué celosísimo contra todos; no consentía que ni por otros ni por él hubiese cosa de provecho: él hurtó la opinión de la transmigración de las almas; él inventó una república, en que estableció leyes llenas de mucha torpeza: las mujeres casadas sean comunes; las doncellas retocen ante sus amantes desnudas; los padres con sus hijas puedan tener cópula. ¿Qué locura ha habido en el mundo, tan insigne, que estas leyes no las sobrepujan? ¿Cuándo inventaron los poetas cosa tan prodigiosa? Éste dijo también que los hombres no se diferenciaban de los perros; que el alma del filósofo era mosca; al cuervo y a la corneja hizo profetas. ¡Oh filósofo abominable! ¡Oh perturbador de la naturaleza!»*

Ya habéis oído a Crisóstomo; oíd agora a Stanislao Rescio acerca de Aristóteles: *«Muchas cosas dijo Aristóteles contrarias, y muchas repugnantes, que no pueden concordarse, y que ningún hombre docto las dijera; como fué lo que dijo de la omnipotencia de Dios, de la substancia tríplice, de la idea del bien, de la Providencia, del primero principio, de la infinita acción del cuerpo finito, de la definición del tiempo, de la generación de la lumbre y del calor, del movimiento, de las propriedades de la mente y del ánima, de las esferas, de los astros y de las cosas animadas.»* Seiscientos son los errores de este gran filósofo; pero pásolos en silencio: lea el que quisiere a Francisco Patricio en sus doctísimas *Panaughia, Panarchia, Pandosia y Pancosmia*, y verá cómo prueba haber sido Aristóteles padre de infinitos errores en la filosofía, y verá cómo ruega a Gregorio y a todos los romanos pontífices que destierren de todas las escuelas generales y particulares de Italia, España, Francia y Alemania la impía aristotélica filosofía que quita a Dios, la providencia y omnipotencia.

No quisiera, señor Arcediano, haberme encarnizado tanto, ni tomado tan de veras la razón de mi discurso, que parece podía persuadir a alguno, y apartarle del gusto sabrosísimo de las letras. Sólo ha sido probar el ingenio, cosa tan acostumbrada de los hombres curiosos en horas ociosas. Y pues yo gozo ahora de las vacaciones concedidas a mis discípulos, para no dejar pasar el tiempo tan en vano, y porque mi ocio fuese honesto, quise imitar a otros, que relajaron sus ánimos en materias más menudas; como lo hizo Homero en las *Ranas*, Aristófanes en las *Aves*, Ovidio en la *Nuez*, Virgilio en el *Mosquito*, Catulo en el *Gorrión*, Platón en la *Locura*, Demócrito en el *Camaleón*,

Favosnio en la *Cuartana*, Guarino en el *Perro*, Apuleyo en el *Asno*, Sinesio en la *Calva*, Plutarco en el *Grillo,* Pitágoras en el *Anís*, Estacio en el *Papagallo*, Catón en el *Repollo*, Estella en la *Paloma*, y otros en otras varias cosas, o más humildes, o tanto.
Basta; que el calor es mucho, y habré cansado a v. m., creyendo darle gusto. Si no hubiese conseguido mi intento, recogeré las velas para muchos días; porque si v. m. no es a quien deseo dar sumo contento, hablando por boca de Catulo:

Solus in Lybia Indiaque tosta
Caesio veniam, obvius leoni.

Nuestro Señor guarde a v. m. muchos años. De casa, y julio 15.

Descaminos, triscípite, nema, de espacio, farautes, estrelleros, descolorirse, fimbria, proejando, Gracioso, voy a componer un crucigrama con todas estas voces, una vez aprenda lo que puedan significar. Lo de Pausanias y Stratónico parece referirse a la eutanasia.

Fecha: 03/06/2008 15:53.

Autor: Gatopardo

Querido mío: ésto es lo que va de la riqueza conceptual y de vocabulario del pasado a la depauperación actual.Y si lo encuentras "gracioso" es porque no todo se puede achacar a la ESO. ¿Verdad?

Querida Gatoparda
Qué grato encontrar por tu intermedio el texto completo de Don Francisco (alguna vez me topé con un fragmento apenas). Cotejando fechas veo que fue contemporáneo de Quevedo y sospecho que debieron darse unas de lengua como para alquilar balcón. Magnífico blog, pero qué susto eso del periodismo de investigación!

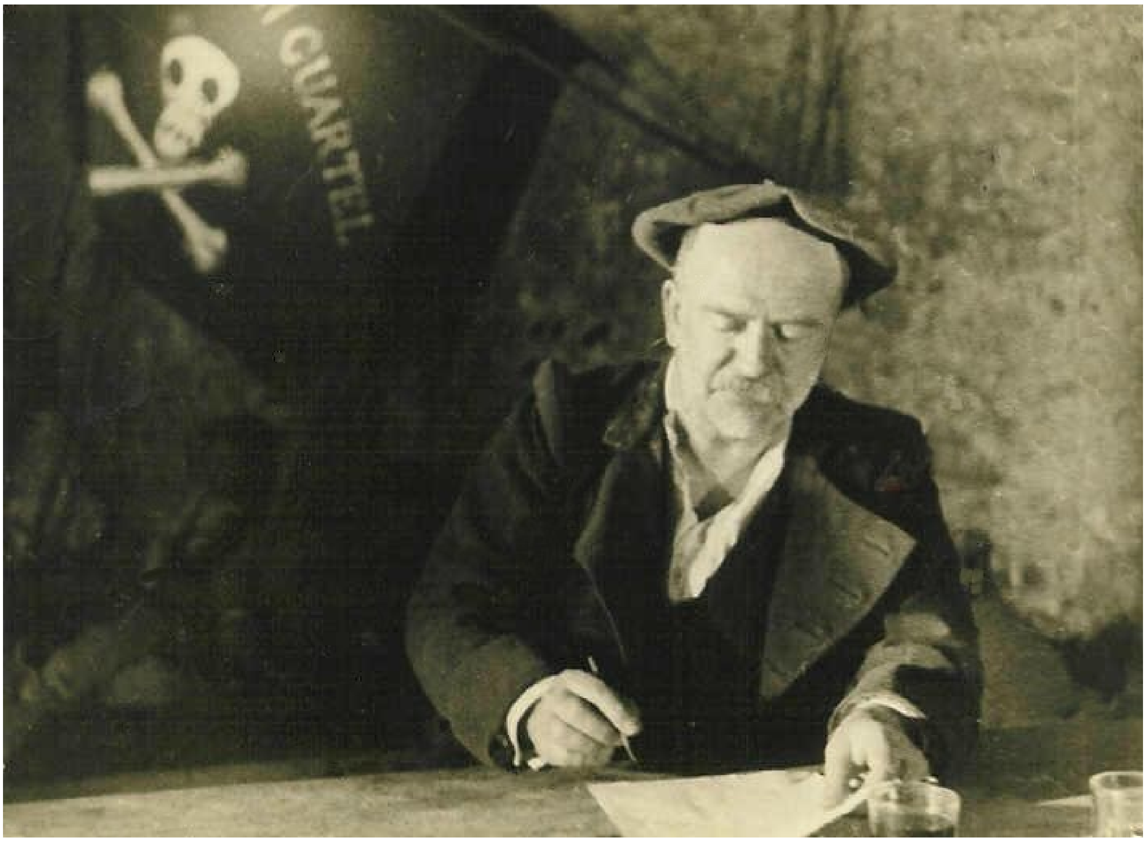
HACIENDO AMIGOS (2)



Quizás por una descabalgada confluencia de hormonas, constitución somática y devociones, entre mis más profundas nostalgias está la de la critica a la vieja usanza,

con retos, alusiones personales y bastonazos, si viene al caso, porque me parece de mal nacidos arrugar subrepticiamente la nariz cuanto se están leyendo melonadas, por mucho que el éxito de ventas acompañe y los herederos del ortodoxo Menéndez no protesten, ni reclame derechos de autor el esquilmado Cioran.

En literatura hay dos opciones posibles, a saber:

a) el individuo de la especie humana es único, irrepetible e indivisible y sus vivencias son intransferibles, y no se puede generalizar sobre ellas, por lo que explicar exhaustivamente la propia perpecia es interesantísimo, un documento digno de legar a la posteridad.

Esta primera opción es la madre de esas sentidas parrafadas autodefinitorias, que me tienen hasta más allá del colodrillo, con extensos delirios amatorios, grandes dosis de victimismo, propio y ajeno, y las aportaciones de una vida interior de rumiante que regurgita lo que será su próximo menú, con mucha ilustración de penurias, señoras lánguidas en cueros y adonis marcando bíceps. En cuestiones de estética es el equivalente de las mechas rubias, la ropa ceñida, el *wonderbra* y el escote vertiginoso dejando ver el canalillo, las chanclas con pedrería, que dejan traslucir la devastación de la lucidez y la mala iluminación del vestidor.

b) Pensar que, desde que nacemos, se inaugura y se renueva lo más ancestral de nuestro repertorio, todos somos imitaciones, cuanto no plagios, del hombre de Neandertal y cualquier experiencia es intercambiable y generalizable, por lo que lo autobiográfico, amén de ser una operación de cirugía estética a la realidad, es perfectamente prescindible.

Optar por la segunda premisa, permite sugerir, descolocar, zaherir y desenmascarar esa insidiosa lógica mostrenca que produce mediocridad, vulgaridad y adocenamiento, que son miasmas que horadan como vitriolo. Y aunque no es seguro que la literatura sea el antídoto adecuado, es la única opción razonable si una se deja llevar más por el ritmo de las frases, la sonoridad de los vocablos y la paradoja que por la exacta y cabal descripción del *weltanschauung* del autor -que no creo que merezca muchas contemplaciones-, y cuando hay que escoger entre una verdad de dudosa demostración, pero brillante y sugerente, y otra roma y evidente, se puede despreciar la verdad de Perogrullo, que la mayoría de nuestros coetáneos defienden con total entusiasmo.

Cada cual es muy libre de escoger, aunque tan arbitrario será optar por la primera como por la segunda premisa, porque todo lo que sea definición de lo humano requiere misticismo y mixtificación a partes iguales.

Todo esto pudieran ser veleidades estrafalarias, siendo yo mujer, y tal vez debería exponer modestamente mis opiniones, una vez desprovistas de efectos vesicantes, utilizando el plural de cortesía y con un tono entre pacato y quejumbroso, en vez de montar bronca con opiniones personales perfectamente gratuitas, por las que sería capaz de morir y matar antes que creérmelas, porque las creencias son parásitos que carcomen la inteligencia. Y porque, como dijo mi amado Pío Baroja:

"Con escasos medios, sin protección y sin reconocimiento de personas influyentes, he llegado a la vejez, y a la vejez de artrítico. Creo que todos los hombres de más de veinte años están ya comenzando a pudrirse. Un artrítico está más podrido aún.

Exigir a un hombre como yo que tenga una amplia benevolencia para el medio ambiente, es pedir gollerías."

Pues eso.

He dicho.

Autor: Tautina

Vaya, yo en esto de la literatura me decanto más por una tercera premisa que toma parte de las dos anteriores, es decir, yo soy única, irrepetible e indivisible (y por ende mis personajes) y el resto del mundo son reflejos poco nítidos del hombre de Neandental, más aún si este resto es masculino.
Me has abierto los ojos, mi querida gata, al fin entiendo por que no publico ni a la de tres, por pedorra y desubicada.
Un saludo cariñoso.

Viva Pío Baroja!!

Y yo, que comulgo con el espíritu de lo que escribes, te digo que no hay dos opciones, sino ciento. Y que siendo la primera de las que citas, sumamente irritante, nueve de cada diez veces, tal vez noventa y nueve de cada cien, también a veces la reflexión sobre la vivencia personal, es madre de la obra maestra.
A mí, las opiniones del personal me importan un pimiento, y sus razones, menos todavía. Me gusta ver las dudas de los inteligentes y las certezas de los que no llegan a creérselo, como a veces te pasa a ti, viejales, pero otras veces... Siendo francos, nos gusta la franqueza cuando pensamos que el que la expresa nos iguala o supera en ingenio, recursos intelectuales o culturilla en general, pero si no reconocemos esa admiración previa, es difícil concederle siquiera el beneficio de la duda.
También es admirable (o al menos yo admiro que me cause ese efecto) cuando una primera lectura te hace pensar que el escribidor es sesudo; una segunda te revela al supuesto sesudo como un hábil manipulador del lenguaje. Y una tercera te hace exclamar: "será hijoputa...". Porque te sorprende que con tanto aplomo y seguridad, sea capaz de escribir una tontería de semejantes proporciones sin que nadie le quite la careta de un tortazo literario. Claro que para propinarlo, además de un talento que no atesoro, haría falta un valiente.
Y yo soy un cobardón, así que, te diré lo que estás, seguramente, acostumbrada a (y hastiada de) leer:
Me ha gustado mucho. Estoy de acuerdo en todo lo que dices, pero creo que todos tenemos nuestra opinión y tenemos que respetarnos, porque tu libertad empieza donde termina la mía, y en este medio tan frío que es internet hay muchísimas vidas por descubrir.

Viva Jesús Vázquez.

"Opinionated ", palabra bien expresiva, dicen los ingleses sobre alguien que airea lo que piensa sobre esto y aquello. Las dos opciones que nos presentas se conjugan en primera de singular. Olvidas la comunión, la épica del "nosotros", esa que toda gran literatura evoca, aunque el envite sea tan solitario como el de un torero a las cinco de la tarde.

¿Y qué queda?
Nada, ni la posibilidad de discutir o criticar.
Mejor seguir cada uno su camino por muy ridículo que este parezca, su Weltanschauung como dices, o manera de ver su mundo.

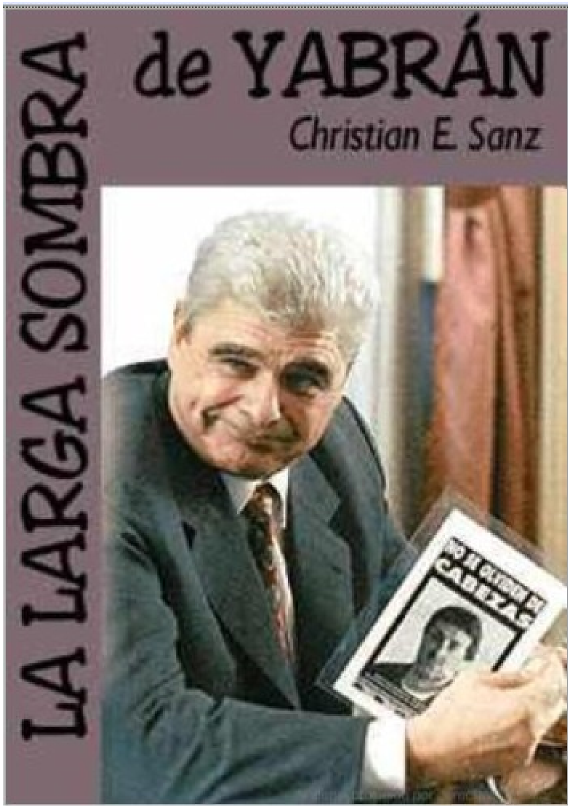
CHRISTIAN SANZ: LA LARGA SOMBRA DE YABRÁN.



LA MADRE PATRIA: CONEXIÓN EN ESPAÑA. HERBERTO GUT BELTRAMO Y PROSEGUR S.A.

Yabrán, junto a otros socios, parece haber logrado el control de **Transportes Juncadella** en 1982.

Hace ahora dos años que Juncadella está asociada con **Prosegur Internacional**, grupo cuya cabeza es la española **Prosegur S A**, constituída en abril de 1976, pero en su origen **Prosegur** fue una creación de **Juncadella**.
Desde un principio, el presidente de **Prosegur** fue un antiguo compañero suyo de trabajo en **Juncadella**, tres años menor que él: **Herberto Juan Gut Beltramo**. Juntos comenzaron a hacer fortuna con el gobierno de **Isabel Perón** y **López Rega**. La diferencia es que mientras **Yabrán** se quedó en **Argentina** (hay versiones de que ese mismo año había debido salir apurado de **Italia**, bajo una intensa presión de la **DEA**), **Gut** se marchó a España.

Herberto Gut había llegado a **Juncadella** después de haber sido empleado de **Ciba-Geigy** y de trabajar luego tres años en **Pittsburgh & Cardiff Coal**, una proveedora de armamentos de la Armada y el Ejército en la que también se desempeñaba el ingeniero **Mauricio Schoklender**.

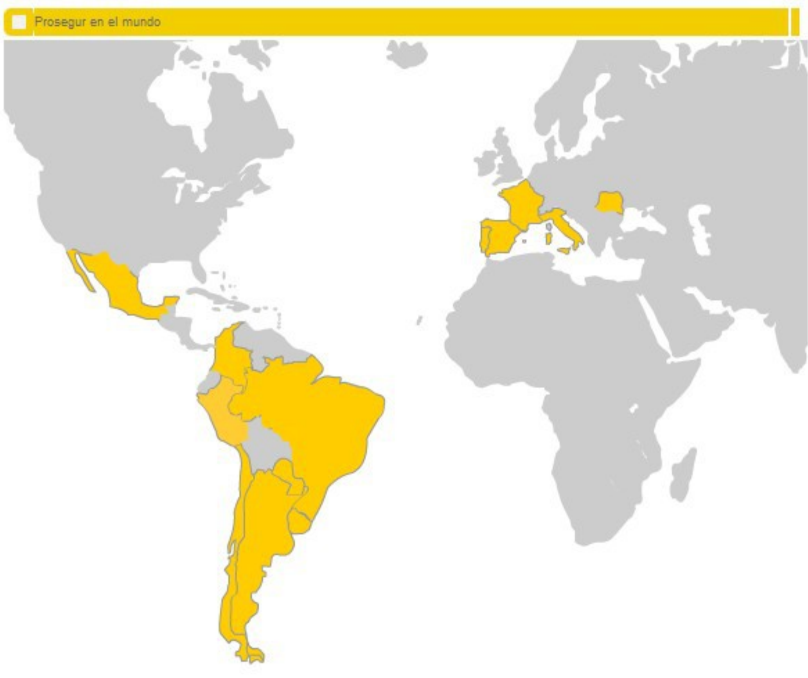
A mediados de 1975, **Gut** le propuso a **Amadeo Juncadella** abrir una sucursal de la empresa en **España**. No había en ese país ni por asomo una empresa que se dedicara al transporte de caudales, ni a dar seguridad a las instituciones, bienes y personas o al transporte de caudales.

Y así fue como **Gut** aterrizó en **Barcelona** en noviembre de 1975, cuando tenía 28 años. Su patrón, **Amadeo Juncadella**, le había dado algunos contactos, sobre todo con su primo catalán, el poderoso industrial **José María Juncadella Salisachs**. Y también con **Juan Abelló**, titular del floreciente laboratorio **Antibióticos**, quien a su vez le presentó a **Mario Conde**, el presidente del poderoso **Banesto**.
*"**Gut** siempre contó que había llegado a España enviado por **Amadeo Juncadella**, un industrial rioplatense muy bien relacionado con la familia catalana del mismo apellido"*,

recuerdan en su libro *"Los cómplices de Mario Conde"* los periodistas españoles **Encarnación Pérez García** y **Miguel Angel Nieto Solís** (Temas de hoy, Madrid, 1993). **Amadeo Juncadella** le habría encargado *"a su joven ejecutivo que creara una filial española de la empresa"*, agregaron.
Pocos días antes, y como consecuencia de la protesta obrera que obligó a renunciar al ministro de Economía del gobierno de **Isabel Perón**, su protegido **Celestino Rodrigo**, el ex ministro de Bienestar Social **José López Rega**, había aterrizado en Barajas, convertido en embajador itinerante sin destino y rodeado de un tumultuoso séquito de miembros de la **Triple A**.
Gut trabajó con eficacia, y así, el 14 de mayo de 1976, tres semanas después del golpe militar encabezado por el entónces general **Jorge Rafael Videla**, nació **Prosegur**. La sociedad fue bautizada por **Rogelio Minobis**, vicepresidente del **Banco del Progreso**, perteneciente al **Grupo March**, que también participó de la fundación. El presidente era el propio **Gut**, e integraban el directorio conspicuos representantes del franquismo y la banca como **Rogelio Guillaumez** (testaferro de la **Banca March**) y **Leopoldo Rodes Castañes** (en representación de la agencia de publicidad norteamericana **BBDO**). En cuanto a las acciones, estaban repartidas entre la **sociedad Gutbel** (en obvia referencia a **Gut Beltramo**), **José María Juncadella Salisach**, la **Banca March**, el **Banco de Madrid** y el mismo **Gut**, que se había reservado el 16 por ciento.

Casi al mismo tiempo, en Madrid, **López Rega** y el ex ministro del franquismo, **José María López de Letona**, fundaban una agencia de seguridad y vigilancia llamada **Sass**, donde encontró trabajo la crema y nata de la **Triple A** argentina, entre ella, el subcomisario **Eduardo Almirón**, quien más tarde (luego de hacer sus pinitos en la organización terrorista anti-ETA **"Batallón Vasco-español"**) conseguiría ser contratado como jefe de la custodia de **Manuel Fraga Iribarne** entónces líder de la **Alianza Popular** (antecesora del hoy **Partido Popular**) y presidente de la comunidad autónoma de **Galicia**.

Prosegur se convirtió en tiempo récord en la principal transportadora de caudales y servicios de seguridad de España. Su primer contrato importante en la Madre Patria fue para custodiar la quinta *"Puerta de Hierro"* en Madrid, donde había vivido sus años más felices el ex presidente **Juan Domingo Perón**. La histórica casa, hoy demolida, había sido heredada por **Isabel Perón**, que había sido detenida por los militares y pasaba sus días en una jaula de oro, recibiendo espaciadas visitas del **almirante Massera.**



La filial barcelonesa de **Juncadella** pasó a ser también madrileña. Había sido

elegida para ese honor por el juez federal **Rafael Sarmiento**, el mismo que tenía a su cargo la causa abierta contra **Isabel Martínez,** y el mismo que interrogó a los ejecutivos de las **Industrias Grassi** y del **Banco de Hurlingham** secuestrados en la guarnición de **Campo de Mayo**, mientras **Raúl Guglialminetti**, **Sánchez Reisse** y compañía los torturaban.
Por si aun cupiera alguna duda sobre los vínculos existentes entre **Juncadella-Prosegur** y los servicios de inteligencia de la dictadura militar, baste recordar que la seguridad del **Mundial de Fútbol de 1978** corrió a cargo del **Batallón 601 de Inteligencia** de esa fuerza y que la copa del mundo conquistada por el representativo local ante el holandés fue guardada, no en las bóvedas del **Banco Central**, sino en el bunker de **Juncadella.**

La Copa del Mundo permaneció allí hasta 1982, cuando volvió a ponerse en juego en España, donde los servicios de seguridad del mundial, ante las protestas de los desairados empresarios locales, fueron confiados a... **Prosegur**, esta vez, se dijo, gracias a las recomendaciones de la embajada argentina.

Curiosamente, durante la realización de los más importantes partidos del mundial ibérico, una experta banda de delincuentes argentinos con inocultable aspecto porteño (de Barrio Norte), se dedicó a saquear las mansiones vacías de los más exclusivos barrios de Barcelona y Madrid.

Cuatro años antes, apenas terminado el mundial argentino, en España había sido conformada otra subsidiaria del **Grupo Juncadella**, la empresa **Afha**, de actividades tan vastas e imprecisas que se inscribió como *"sociedad agraria, inmobiliaria, constructora y agencia de publicidad"*. Entre los accionistas de **Afha** figuraban los hermanos **Juncadella** y el almirante **Jorge Montes**, por entónces canciller de la dictadura.

El representante de **Afha** en **España** era el capitán de fragata **Eduardo Aldao**, amigo y compañero de promoción del también capitán de fragata **Carlos Carpintero**, secretario de Prensa e Información de la junta militar.

Afha firmó contratos con la fábrica estatal de **Explosivos Río Tinto** y realizó grandes exportaciones sin que luego se pudiera precisar cual había sido su destino final. Probablemente haya canalizado exportaciones de armas españolas. Lo cierto es que, al llegar **Felipe González** al gobierno, *"afloraron las denuncias sobre blanqueo de dólares provenientes del narcotráfico y reinvertidos en España"*, según escribieron los periodistas **Ferrari** y **Ronzoni**.

Algo importante había sucedido al terminar el mundial español de 1982: **Gut** le habia birlado a sus patrones el control de **Prosegur**. Es más: había iniciado junto a su amigo **Yabrán**, la conquista de **Juncadella**.

El periodista **Juan Salinas** se refirió a este proceso en *"El otro Yo del Señor Yabrán",* publicado en *"El Nuevo Porteño"* el 2 de octubre de 1996. Advertía que los investigadores judiciales españoles investigaban la hipótesis de que **Gut** lavaba el dinero de **Monzer Al Kassar** y otros traficantes de armas.

En el mismo sentido, el periodista argentino radicado en Barcelona **Norberto Bermúdez**, agregó que en algunos de estos negocios **Gut** utilizaba un alías de raigambre masserista, ***"Comandante Negro".***

Durante los primeros años, **Gut** mantuvo en **Prosegur** su posición de accionista minoritario, en tanto que **Amadeo Juncadella**, en Buenos Aires seguía de lejos complacido la gestión de su joven ejecutivo. Pero en 1982, la satisfacción de **Juncadella** se transformó súbitamente en preocupación. **Gut** le dijo que quería comprar la parte de los **Juncadella** en **Prosegur** y hacerse con su control, pero sólo le ofrecía pagar 100 millones de pesetas, el equivalente a su facturación anual.

Los hermanos **Juncadella** desestimaron la oferta de plano. No deseaban desprenderse de la mayoría de la empresa, y menos entregársela a un joven empleado suyo. Ocurrió entónces algo insólito: de la noche a la mañana, **Gut** elevó su oferta a

400 millones pagaderos al contado, y consiguió hacerse con el 20 por ciento de las acciones en poder de **March** y el 20 por ciento del **Banco de Madrid**. Con lo que obtuvo el control absoluto de la sociedad. Nadie sabe a ciencia cierta de dónde provino el dinero, pero si se sabe que **Gut** negoció la operación en secreto con el entónces consejero del **Banco de Madrid, Enrique Moya,** quién enseguida pasó a desempeñarse en la presidencia del **Instituto Nacional de la Industria (INI).** Dos años más tarde, Moya ocupó la presidencia de **Prosegur** por deseo expreso de **Gut**.

Ya con el control absoluto de la firma, Gut firmó un contrato de seguridad con **Juan Abelló** y **Mario Conde** y su empresa pasó así a ocuparse en 1983 de la vigilancia del banquero y de todas las filiales de **Antibióticos**. Para desesperación de la familia de **Abelló, Gut** y **Conde** terminarían por quedarse con el laboratorio, el más importante de España.

Ya desde fines de 1982, **Gut** y **Conde** eran objetivo de especial vigilancia por parte del gobierno socialista de **Felipe González**, que había logrado romper con más de cuatro décadas de franquismo y postfranquismo. El gobierno había conformado para vigilarlos (no sólo a ellos, sino a todos los grandes evasores) una sociedad anónima, ***Incresa***, a modo de *"task force".*

Prosegur era sospechosa de evasiones multimillonarias de dinero en billetes, enviándolos primero a las islas Canarias y desde allí al paraíso fiscal del **Principado de Andorra**, pero con el correr de los años, las investigaciones fueron quedando en agua de borrajas.

Otra fue la suerte de **Conde**. El gobierno socialista encargó a la agencia norteamericana **Kroll Associates**, conformada por ex agentes de la **CIA**, un seguimiento de las actividades de **Conde**. El **Informe Crillón** resultante de estas investigaciones, está repleto de referencias a las vinculaciones de **Conde** con **Argentina** y particularmente a los financistas **Jorge Antonio** y **Jacques** (Jacobo) **Hachuel**, al **Banco Shaw**, al "círculo de **Carlos Menem**" y a **Monzer Al Kassar**.

Según el informe, **Conde** utilizaba estos vínculos para *"el lavado de dinero procedente de operaciones de droga y armamento".*

En diciembre de 1993 el **Banco de España** (emisor) intervino al **Banesto**, tras lo cual pudo comprobar la "evaporación" de alrededor de 5.000 millones de dólares.

Conde y **Hachuel** -un argentino nacionalizado francés, socio y amigo de **Jorge Antonio**- fueron condenados en marzo de 1996 en una causa secundaria, por apropiación indebida y falsedad de documento mercantil. Conde logró obtener la libertad provisional tras pagar una fianza de 14 millones de dólares a la espera de ser juzgado por la causa principal. Sin embargo en febrero de 1998 fue nuvamente detenido e internado por la policía en la prisión de máxima seguridad de Alcalá Mecó, tras ser condenado a cuatro años de cárcel por la apropiación de cuatro millones de dólares, en el llamado **Caso Argentina**.

El periodista argentino -radicado en Madrid- **Ernesto Ekaizer** escribió en *"El País"* (cuya jefatura de redacción integra), que *"durante sus años de Banesto, Conde vivió obsesionado con la idea de poseer la información más amplia sobre personas y hechos heterogéneos"* y que *"montó una red propia de empresas de seguridad"* cuyos puntales fueron las firmas **Protecsa** y **Prosegur.**

Conde, explica **Ekaizer**, dio satisfacción a sus obesiones asesorado *"por el financiero **Jacques Hachuel**, quien le acercó un grupo selecto de agentes del **Mossad** israelí"*.

Ekaizer reveló que **Hachuel** le hacía llegar a **Conde** todos los días un minuta con las novedades encontradas por sus servicios particulares de inteligencia. *"La habilidad de Conde fue indiscutible: en lugar de acudir a agentes locales indiscretos, que suelen vender y revender como por fotocopias una misma información a diferentes clientes, contrató un equipo israelí"*.

Por otra parte, en su libro *"Cortinas de humo"*, **Jorge Lanata** y **Joe Goldman**

relacionaron a **Conde** con **Hachuel** (a quien describieron como *"un argentino emigrado del barrio de Once"*) y a ambos con **Al Kassar** y con el sirio-argentino **Antonio**, el principal financista de **Juan Perón** durante su largo exilio madrileño. **Conde, Hachuel** y Cía. se especializaron en filtrar a la prensa informes robados al **CESID** (Centro de Estudios Superiores de Inteligencia para la Defensa, el espionaje español) por el coronel Juan Alberto Perote; alentar *"guerra sucias";* usar servicios de seguridad privados para todo tipo de tareas y desparramar coimas a troche y moche en procura de comprometer al gobierno español, e incluso al propio **Rey Juan Carlos** (cuyas conversaciones telefónicas no tuvieron empacho en interceptar y grabar) en complicidades mutuas que les garantizaran impunidad y olvido.

Pero, a pesar de todo, fueron detenidos y enjuiciados.

Es en este contexto que entre 1982 y 1983, la misma manguera que había servido para succionar dinero desde la Argentina comenzó a escupirlo, alimentando las arcas de empresas de transportes de caudales y de los correos privados, que florecían como hongos luego de la lluvia.

Ferrari y **Ronzoni** puntualizaron que *"a partir de 1983, el ciclo se invirtió y aquellos dineros que se habían multiplicado en la península ibérica comenzaron a volver a la Argentina. Gran parte de ellos ingresó a los paquetes accionarios de las transportadoras de caudales. Si hay una certeza, ésta es que hubo una inyección de capital proveniente del exterior capaz de transformar a empresitas que a veces ni siquiera podían pagar el alquiler de sus locales en firmas tan prósperas que en pocos meses adquirieron flotillas de camiones y camionetas y se trasladaron a confortables oficinas propias".*

Los mismos periodistas agregaban un dato muy sugestivo: los voceros del **Grupo Juncadella** justificaban tan fulgurante prosperidad porque, decían al unísono, habrían recibido copiosísimas *"inversiones árabes".*

¿Qué otros elementos habían pesado para que el sentido del flujo de dinero se invirtiera? También que a partir de 1982 y casi hasta comenzar 1984, en el último gobierno militar, del general **Bignone,** tenía una enorme influencia **Carlos Bulgheroni**, un empresario afín a **Yabrán**. Y, por otra parte, las relaciones entre los **Estados Unidos** y **Siria** eran pésimas, hasta el punto de que el 23 de octubre de 1983 un coche-bomba del **Hezbollah** atentó contra el cuartel general de las Marines norteamericanos en **Beirut**, con un saldo de 239 muertos, y a comienzos de diciembre aviones estadounidenses atacaron las posiciones del ejército sirio en el **Líbano** tras acusar a **Damasco** de haber patrocinado aquél ataque.

No hacía una semana que el escritor y periodista **Miguel Bonasso** se había ocupado nuevamente del misterioso **Gut** (del que en Argentina seguía sin conocerse siquiera una foto) en **Página/12** cuando, el 31 de mayo de 1997, el supuesto **"Comandante Negro"** murió en un accidente automovilístico en la carretera nacional 1 de España que une a Madrid con Burgos a la altura del Km. 70, cerca del pueblo de Loyozuela.

Para entónces, **Gut** también era el vicepresidente de la argentina **Prosegur-Protección Activa S A**, firma que, asociada a **Juncadella**, se había instalado entre 1995 y 1996 en los cuatro países asociados en el **Mercosur** y, de Yapa, obtenido un sabroso contrato para modernizar y mantener los equipos de comunicaciones de las policías federal y bonaerense. Una sigilosa privatización de hecho.

El 5 de octubre de 1996, el jefe de la **PFA**, comisario **Pelacchi** convocó a una conferencia de prensa en el microcine del Departamento de Policía para presentar sendos sistemas pagos de alarma (para comercios y hogares y para localización de vehículos) disponibles para quien pueda pagarlos a razón de 40 pesos cada uno -si se

trata de un particular- o de 80 pesos si se pretende el disfrute de tal protección para comercios, industrias o flotas de camiones.

Acompañaba a **Pelacchi** el ingeniero **Daniel Fernandez Damiani**, de la ignota firma **Localizer SA** de supuesto origen estadounidense. **Pelacchi** dijo, para justificar la asociación entre la **PFA** y la empresa, que *"una institución estatal no puede ni debe invertir sus escasos recursos en desarrollos tecnológicos que pueden ser costeados con inversión de riesgo a cargo de una empresa privada"*.

Esta asociación *"le permite a la PFA incorporar tecnología de punta, de manera que los vecinos que menos recursos puedan beneficiarse con el sistema",* aseguró.

Mientras el público presente se estrujaba los sesos tratando de entender de que manera podían beneficiarse los vecinos pobres de que los vecinos ricos tuvieran una manera infinitamente más rápida y eficaz de relacionarse con la policía que acudir a la comisaría, tomó la palabra **Fernández Damiani**, quien dijo que el sistema estaba conectado a *"dos constelaciones satelitales que permiten localizar vehículos en movimiento y trasmitir su posición al Comando Radioléctrico"*, sistema que ya funciona en varias ciudades de los **Estados Unidos**.

En cuanto a las alarmas domiciliarias, **Fernández Damiani** aseguró que una vez que el sistema se activa, las computadoras de la empresa automáticamente identifican el código y retrasmiten el aviso al Departamento Central, de manera que la policía pueda enviar de inmediato un patrullero al lugar.

En resumidas cuentas: lo mismo que se lograba llamando al **Comando Radioeléctrico**, pero sin tener que dar explicaciones. El policía y el ejecutivo afirmaron luego que *"en un futuro inmediato"*, quienes instalasen el sistema podrían beneficiarse con la detección de ladrones u otros intrusos que ingresen a sus viviendas o comercios cuando ellos no están.

Cuando decían *"un futuro inmediato"* no exageraban. Apenas tres días más tarde, en un suplemento de **Clarín** dedicado a conmemorar el centésimo aniversario del nacimiento de **Juan Perón**, bajo el lema *"vigilancia inteligente"*, salió un aviso de media página promocionando un sistema similar, llamado *"Protección Activa". "Antes de que el ladrón de un paso, ya estamos llamando a la policía"*, decía. *"En el mismo momento en que un extraño irrumpa en su casa, una alarma empezará a sonar dentro del domicilio y el detector enviará una señal a la computadora de la Central, donde nuestro personal actuará de inmediato comunicándose con usted, llamando a la policía y con nuestro exclusivo Sistema de Asistencia Inmediata, enviando un movil de Prosegur a su propio domicilio",* continuaba.

El aviso, firmado por **Juncadella-Prosegur Internacional**, solamente adelantaba que la dichosa central estaba atendida por "profesionales". Daba, por fin, los números de teléfono para comunicarse con un *"centro de atención al cliente"* y suscribirse al prodigio: 585-6203/9. Por curiosidad, **Juan Salinas** llamó para preguntar si el servicio que ofrecía **Juncadella-Prosegur** era el mismo que había anunciado el jefe de la **Policía Federal**. Ya era de noche, y el hombre que lo atendió, respondió *"Afirmativo, si quiere abonarse, deben llamar mañana por la mañana".*

La aparición del primer número del mensuario *"La Federal",* órgano de la **PFA** financiado por **Yabrán, Amalita Fortabat** y otros empresarios, permitió completar la información. Explicaba que el sistema promocionado fue desarrollado *"en el país por **Localizer SA** y **Sky Cop SA**"*, cuyo titular es otro **Fernández Damiani**, en este caso **Néstor**, quién dijo que **Sky Cop** es *"una empresa argentina, integrada por **Localizer SA**, quién provee toda la tecnología, y un grupo de inversores"* a los que no identificó.

En esta ocasión, y superando largamente lo afirmado por su jefe, el órgano de la **PFA** sostuvo que el sistema utiliza no dos, sino *"28 satélites que orbitan la Tierra a 18 mil kilómetros de altura, lanzados por el Departamento de Defensa de los Estados Unidos",* lo que le *"permite brindar una seguridad absoluta, no sólo a las patrullas policiales, sino a todos los vehículos abonados, sean de transporte público de pasajeros,*

de mercancías de valor, servicios de distribución, etc." y que *"el tiempo de llegada* (de la policía) *ante una emergencia es de un promedio de tres minutos". "Este emprendimiento puede considerarse único en el mundo"* se enfervorizó **Fernández Damiani II**. *"Si bien existen empresas dedicadas a la seguridad que cuentan con sistemas de alarmas, en nuestro caso, la aplicación masiva y la interacción con la Policía Federal y la bonaerense nos diferencia..."*

¿Hasta que punto llega la imbricación entre la **PFA** y estas empresas privadas? El presidente de **Sky Coop** dijo que las señales de alarma ingresan *"al Centro Digital de Localización de Señales instalado por Sky Cop en el Comando Radioeléctrico"* por lo que *"la implementación de nuestro servicio proporciona un doble servicio de prestación por parte de la Policía Federal"* al añadírsele *"la asistencia empresaria que permite conocer a nuestros abonados"*. *"Nuestra intención es la de abarcar todas las rutas del país, para lo cual ya fue instalada en el Comando Radioeléctrico una 'estación de Control Nacional'*. *En un futuro, pensamos extendernos más allá de nuestras fronteras",* adelantó **Fernández Damiani II**. Gracias a esta asociación, la **PFA** *"tiene equipos tan modernos que pueden seguir por satélite un camión hasta Brasil",* remató **Pelacchi**. Es bueno señalar la coincidencia de que **Juncadella-Prosegur** funciona en **Argentina, Uruguay** y **Chile** y acaba de establecerse en **Brasil.** (tiene 10 filiales en Brasil según **Ferrari**)

El órgano de la **PFA** invitaba a visitar en el Departamento Central la *"sala de situaciones"* de la Dirección General de Operaciones de la Superintendencia de Seguridad Metrolitana y apreciar *"su moderno sistema radial y de video, ambos enlazados por microondas y móviles"*. A partir de fines de 1994, añadía, *"esta dependencia cuenta con rastreo satelital que le permite conocer de manera inmediata la ubicación de todos los patrulleros en la Capital"* y el auxilio de una *"cámara de video con lente infrarrojo* (que puede filmar de noche) *instalada en un helicóptero que se comanda por medio de una computadora desde el interior de la aeronave".*

Contar con dicha cámara, se ufanó **Pelacchi** en un programa de televisión, así como la adquisición de una novísima central telefónica a la francesa **Secom**, fue posible gracias a sendas donaciones. También dijo que gracias a otra donación la **PFA** pudo adquirir por medio millón de dólares una computadora que hace identikits y los coteja electrónicamente, y en la contratapa del primer número de *La Federal* se informa de la reciente adquisición, también en **Francia** y por medio millón de dólares, de una supercomputadora que procesa un Sistema Automático de Identificación de Impresiones Digitales (AFIS en sus siglas inglesas). Como **Pelacchi** decía que a la **PFA** no le sobraba un peso, debía suponerse que también esa compra era posible gracias a una donación desinteresada.

Curiosamente, además de **Juncadella-Prosegur Internacional,** hay otra empresa, subsidiaria de aquella, que tampoco es reivindicada por la **PFA** aunque es obvio que trabaja en sociedad con ella. Se trata de **Protección Activa SA**, de la que su gerente general, **Gustavo Hemadi**, informó que tiene casa matriz en **Madrid** y que se instaló en **Argentina** en septiembre de 1995, es decir un mes antes de que **Pelacchi** y **Fernández Damiani I** anunciaran que quién quiera contar con seguridad para sus casas o negocios deberá oblar de aquí en más un mínimo de 400 pesos mensuales, suma que ronda los 500 si se pretende que tras sonar la alarma, acuda un vehículo de vigiladores a ver qué pasa.

Como en el caso de **Localizer, Skycop** y sus padres **Juncadella-Prosegur Internacional, Protección Activa** ofrece sistemas electrónicos de seguridad conectados a una estación central de monitoreo. Y al igual que sus progenitoras afirma contar con una flotilla de móviles prestos para partir a los domicilios o propiedades de sus clientes si los sensores infrarrojos detectan algún cambio de temperatura. Los tripulantes, aclara **Hemadi,** *"van equipados con radios para informar lo que esté pasando pero no están armados"*.

La promoción del nuevo sistema de alarmas tuvo sus costados grotescos. Para

vender alarmas, es obvio, es necesario que la intranquilidad cunda entre la población. Así, muy poco después de aquél anuncio, el Comando Radioeléctrico sostuvo que *"la Capital Federal registra un promedio de tres asaltos por hora"*, lo que de ser cierto redondearía un total anual de 27 mil casos. El problema es que casi al mismo tiempo la Dirección de Operaciones de la propia PFA ofreció una estadística según la cuál en 1994 se denunciaron exactamente 5.029 robos a domicilios particulares y comercios en la ciudad de Buenos Aires.

Cuando una periodista de **Clarín** consultó sobre esta contradicción al jefe del Comando Radioeléctrico, comisario *Julio Díaz*, éste respondió impertérrito: *"ratifico mis números"* y su superior, el comisario **Rodolfo Segovia**, jefe del Departamento de Orden Público, filosofó que *"las estadísticas son como la sensación térmica, nunca terminan de reflejar la realidad"*.

En síntesis: el Comando radioeléctrico y el DOP desautorizaron a la Dirección de Operaciones Criminales de la propia PFA, que es la encargada de confeccionar las estadísticas oficiales. Donde ésta compatibiliza un robo, aquellos cuentan 5,3.

Clarín informó que la Policía se queda con el 30 por ciento de la cuota que pagan los propietarios de los locales que se adhieren al sistema de alarmas. También consultó a un ingeniero electrónico que estimó que el sistema no era eficaz. *"Muchas veces los sensores se activan a pesar de que quien se pasea por el living no es un ladrón, sino un gato, un perro o una rata"* y los sensores suelen sonar *"ante cualquier cambio de temperatura captado en el ambiente atravesado por los rayos infrarrojos e incluso algunos se activan cuando se abre una ventana y entra una corriente de aire"*, explicó el experto.

En estas circunstancias, resultó lógico que las mentes malintencionadas dieran por supuesto que de lo que se trataba era de vender protección, sí, sólo que con comillas: esa *"protección"* que hace que, si uno deja de pagarla, es muy probable que le roben.

Tras la muerte de **Gut Beltramo**, la jefa de prensa de **Prosegur** de **España**, **Maite Alba**, vino a **Buenos Aires** a argumentar que su jefe fallecido era una excelente persona, y la empresa de primer nivel. Para entónces, **Prosegur** se había vuelto asociar a **Juncadella**, y los camiones de transporte de caudales llevan los nombres de ambas empresas, mientras que los custodios habían pasado a ser exclusivamente de **Prosegur**. Y el jefe de seguridad de **Juncadella-Prosegur** era el comisario **Oscar Rossi, alías Coco**, un viejo allegado a **Yabrán**. *"Durante todos estos años, Gut y Juncadella fueron cada uno por su lado, pero ahora que Gut murió, hemos vuelto al primer amor"*, explicó **Alba**. Y en un momento se sinceró: *"Yo fue la secretaria de Gut durante muchos años, y te aseguró que jamás me enteré que lavara dinero, pero aún si fuera así, ha pasado mucho agua debajo de los puentes y ahora somos una empresa transparente, que cotiza en bolsa y de la que viven 7.000 mil familias".*

Meses después, **Maite Alba** renunció a su trabajo.

Uno de los autores estuvo hace poco con el gerente de **Prosegur Argentina, Ramiro Vall,** quién insiste que las cuentas de la empresa están claras como el agua. Pero en este tiempo, custodios de **Prosegur** bajaron de los camiones de **Juncadella** a tiros, hirieron a un niño de un balazo en la cabeza y resultó que ni siquiera tenían permiso de de armas.

Antes, en marzo e 1997, una camioneta de **Juncadella-Prosegur** fue asaltada en **Ciudad del Este.** El robo de dinero habría ascendido a 10 millones de dólares. El periodista paraguayo **Mario Orcinoli**, que investigó el caso, asegura que la compañía no pudo demostrar el origen del dinero.

Otro periodista, **Hernán López Echagüe**, quién pasó una larga temporada en **Ciudad del Este** para documentarse y escribir su libro *La Frontera* (Planeta, 1997) se interesó en el tema y obtuvo información de primer agua.

López Echagüe se enteró de que los camiones de **Prosegur** pasaban de **Ciudad**

del Este a **Foz de Iguaçú** sin ser controlados. *"Párese en el Puente de la Amistad un rato nomás y fíjese como pasan"*, lo desafió un poblador. Así fue como el periodista pudo ver como la tripulación de uno de los camiones de **Prosegur** retiraba sacas repletas de papeles u otros objetos de negocios de poca monta y los vió cruzar el puente internacional sin ser revisados. Una y otra vez.

Llamó entónces a **Prosegur** de **Brasil.** Lo atendió una voz femenina, a la que le preguntó por el gerente comercial, "***Walter Kufter**, de parte de **Wenceslao Bunge***".

Oper.: *"-Ahh..! ¿Del señor Wen? Un minuto, por gentileza..."*

Walter Kufter: *"-Alooo ¿Wen?"*

L.E.: *"-No, soy un conocido de él. Martínez es mi apellido, señor Kufter. Lo llamo porque estoy a punto de concretar unos negocios en Ciudad del Este... Y bueno, el señor Bunge me ha dicho que ustedes son las personas indicadas para realizar una serie de traslados de papelería..."*

W.K.: *"-¿Desde Ciudad del Este hacia donde, señor?"*

L.E.: *"-Hacia el Brasil y también hacia la Argentina. Papeles, señor Kufter, muchos papeles,¿comprende?"*

W.K.: *"-Entiendo, entiendo. Mucho papel, claro, claro. ¿Va a necesitar el servicio una sola vez o serán varios traslados, señor?"*

L.E.: *"-Si todo sale bien, serán varios. Todo dependerá de los controles..."*

W.K.: *"-Usted olvídese de los controles, señor. Con Prosegur sale todo bien...Wen ya le habrá hablado de nuestra responsabilidad.(...) Le pido que nos visite aquí, en Curitiba. Hay detalles que debemos hablar personalmente."*

L.E.: *"-¡Por supuesto!"*

W.K.: *"-Mande mis saludos a Wen y para el Sr. Yabrán."*

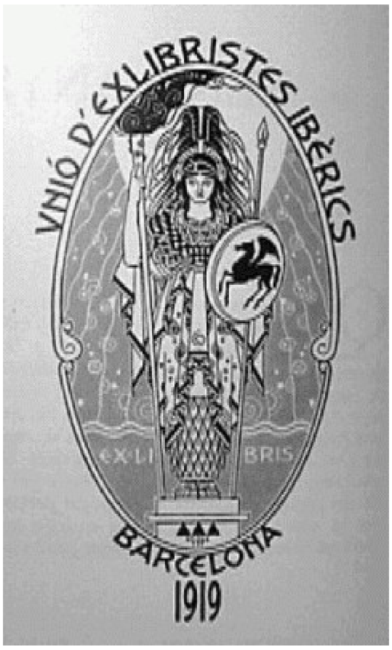
¿POR QUÉ IGNORAN LOS MANUALES DE LITERATURA A WILLIAM CHESPIER?



Siempre alerta para descubrir autores injustamente olvidados por la crítica, la historia de la literatura, y los manuales escolares, este redactor jefe ha indagado, y he encontrado a William Chespier, muy buscado, conocido, comprado, preferido y citado por los internautas, al que dedican un apasionado interés, y tan sesudas explicaciones que Google no ha tenido más remedio que consagrarle 137 artíiculos, y así nos hemos enterado que, entre sus obras, están "Romeo y Julieta", "Cirano de Bergerac", "¿Quién escondió mi queso?" . Y, como suele ocurrir, Gatopardo tuerce el morro y lo ignora; sin embargo, nos obsequia con sus particulares recomendaciones de escritores insufribles. Para explicar el interés que me han despertado por William Chespier, dejo a continuación algunos enlaces con las opiniones y explicaciones de sus lectores :

MANUEL DEL PALACIO: A UN ESPAÑOL, LIBERAL Y AGRADECIDO

Del cielo en el portón llama un cuitado
-¿Quién va?- dice San Pedro
Uno que viene
¿De dónde?
De Madrid
¿Qué oficio tiene?
Soy un cesante liberal y honrado
¿Vivió en el mundo bien?
Viví casado
¿Murió en la fé católica?
es de ene
¿Y qué pide?
Que Dios no me condene,
pues siempre fui de gratitud dechado.

Aún estaba el Señor medio dormido.
La relación oyó con disimulo
y, de Pedro acercándose al oído,
dijo:- La Ley es Ley, cúmplela chulo;
¿Español, liberal y agradecido?...
Dale, si no le han dado ya, por culo.

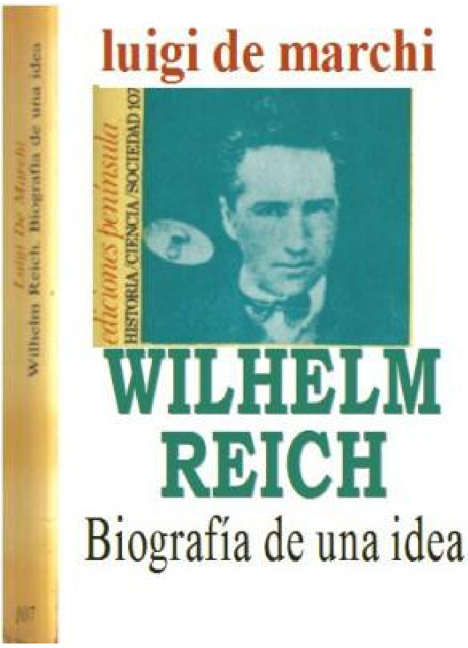
LIBROS DESCATALOGADOS: LUIGI DE MARCHI: WILHELM REICH, BIOGRAFÍA DE UNA IDEA



Encarcelamiento y muerte de Wilhelm Reich

Durante el período de los recursos, Reich volvió al trabajo de investigación en el

campo químico y meteorológico, mostrando un injustificado optimismo sobre el resultado de la batalla legal. Resurgía su necesidad de creer en algún tipo de autoridad constituida: la «justicia» americana en este caso. Y muchos seguidores hacían eco y amplificaban su euforia con un grotesco acriticismo gregario. En enero de 1957, cuando el Tribunal de Apelación había confirmado la condena del tribunal de Portland, el director del Fondo de asistencia legal, creado por los partidarios de Reich para ayudarle en la batalla judicial, envió a los suscriptores una carta que contenía estas increíbles palabras:

«La situación se está desarrollando a nuestro favor, a pesar de lo que en un primer tiempo podía parecer una derrota... La mentira, que hemos denunciado y a la que hemos obligado a abandonar sus disfraces, ha logrado tan sólo, con el paso del tiempo, mostrar su verdadera y monstruosa cara. El Demonio odia la luz. Casi vencidos, los enemigos recurren cada vez más a la calumnia: signo evidente de su desesperación.»
Y Reich mismo escribía durante aquellos días: *«La batalla no habría podido ser llevada a cabo a nuestro favor, como lo ha sido, sin la generosidad de tantas personas cercanas y lejanas.»*

Reich preparó rápidamente su petición a la Corte Suprema, utilizando más o menos el mismo material de la primera instancia. Pero esta vez la Corte ni examinó el material, puesto que pura y simplemente se negó a examinar el caso: un caso *«extraordinariamente simple»* como había dicho el «buen» juez Sweeney el año anterior. Así pues, el 11 de marzo de 1957, Reich y Silvert se presentaron a la policía y fueron llevados a la cárcel. Reich pidió que no fuera encarcelado declarando a las autoridades de la cárcel (es fácil imaginar con cuánto éxito) la pura pero no simple verdad: que su encarcelamiento «habría dado un durísimo golpe a la investigación científica» -y añadió con voz tranquila una profecía terrible, que provocó una sonrisa de compasión en los carceleros-, que su encarcelamiento habría sin duda alguna significado la muerte en prisión de un pionero de la ciencia por culpa de un grupo de psicópatas».

Precisamente por su vitalidad y creatividad, Reich sufría terriblemente en la prisión. A pesar de ello, intentó adaptarse a la vida de la cárcel, interesándose por el funcionamiento de las instituciones penales y por las reacciones biopsicológicas de los detenidos. Logró incluso escribir en la cárcel su último libro comunicando a la familia los progresos de la obra. Entre las vejaciones de las que Reich fue víctima durante los últimos meses de su vida, es preciso recordar que la FDA impedió que fuera liberado *«bajo palabra»* apenas se entrevio esta posibilidad y que el manuscrito del último libro fue hecho desaparecer de la prisión de forma que la familia no pudo nunca obtenerlo.

Por su parte Reich intentó abreviar su detención sometiéndose a la experimentación de algunas medicinas: como es sabido, éste es un sistema odioso, con el que los detenidos en las penitenciarías americanas pueden obtener «descuentos» de las penas impuestas. Y, quizás, contribuyó a su trágico fin.

Existe a este propósito un terrible documento publicado por uno de aquellos exaltados profetas de nuevas religiones que pululan en América.

Se trata del número de octubre de 1958 de una pequeña publicación titulada: *«Crusade of Divine Living»* («La Cruzada de la vida divina»), órgano de la organización del mismo nombre: *«Una organización cristiana* —declara el subtítulo de la publicación— *sin finalidades comerciales ni obediencias confesionales, dedicada a la asistencia de los enfermos y de los perseguidos.»* En él se publicó un artículo del director nacional del movimiento, Adolphus Hohensee, en el que se narra con oscuras tintas su experiencia de detenido en la penitenciaría de Lewisburg, en la que Reich murió, y en particular da una atroz descripción, y quizás una explicación, de la muerte de Reich.

Hohensee cuenta los malos tratos sufridos por obra de los carceleros de la penitenciaría, en la que había sido encerrado, según parece, por «delitos» relacionados con su actividad misionera, y continúa así:

«Cuando quedó claro que todas sus amenazas no tenían influencia sobre mí, el subdirector Cox me recordó que había sido confiado en la misma ala de la cárcel,

conocida con el nombre de "ala de la muerte", en la que Remington había muerto poco tiempo antes. En aquel ala, el profesor Reich, un médico encarcelado por desprecio a la corte, a petición de la Food and Drug Administration, murió efectivamente pocos días más tarde. Desde hacía semanas me estaba diciendo que le estaban matando con ciertas medicinas. Y el día antes de morir me dijo que se disponían a darle la dosis fatal aquella misma noche. Y así fue: a la mañana siguiente había muerto. A pesar de ello yo no me rendí y no retiré las reclamaciones que había presentado ni hice promesa alguna a propósito de mis actividades futuras referentes a programas y conferencias.»
«Pero vayamos por orden: los hechos que voy a referir en este número y en los sucesivos son tan terribles que tendréis dificultad en creerlos. Pero cuento y voy a contar sólo lo que he visto con mis propios ojos y oído con mis propias orejas, mientras estaba en la enfermería de la penitenciaría, desde el 25 de noviembre de 1957 hasta el 13 de abril de 1958. Temblaréis cuando sepáis cómo los detenidos son enloquecidos y mueren a causa de abusos, negligencias y torturas.»
He aquí en primer lugar un ejemplo de las proezas de los policías de los monopolios farmacéuticos y sanitarios. La revista "Time" del 18 de noviembre de 1957 informaba que el profesor Reich había "muerto" en la penitenciaría de Lewisburg, en Pennsylvania.
»"Ha muerto a los sesenta años —escribía la revista— Wilhelm Reich, que fue famoso psicoanalista, colaborador y discípulo de Freud, fundador de la *Wilhelm Reich Foundation*, más conocido en estos últimos tiempos por algunas teorías heterodoxas en el campo sexológico y energético. Reich ha muerto de un ataque cardíaco en la penitenciaría de Lewisburg, donde estaba purgando una pena de dos años de detención que le habían sido impuestos por el tribunal de Portland por haber distribuido una invención suya, el llamado "acumulador de energía orgónica" violando la ley para la tutela alimentaria y farmacológica...

»En realidad —continúa Hohensee— *apenas los policías de la FDA lograron encerrar a otro gran científico en aquel -foso de serpientes, en pocos meses el profesor Reich fue liquidado.*

» El profesor Reich había llegado al infierno de Lewisburg varios meses antes que mis enemigos lograran mi encarcelamiento. Muchas veces aquel gran médico se me acercó con las lágrimas en los ojos para decirme que aquellos malditos sádicos, dueños absolutos de la vida de 1200 seres humanos, le estaban haciendo enloquecer y le estaban empujando hacia el abismo de la muerte "con sus medicinas experimentales". y cuando fue trasladado al ala de la muerte (el mismo en que Remington había sido muerto pocos meses antes) Reich sintió que no iba a resistir durante mucho tiempo. *Me confió esta convicción más de una vez durante la semana del 28 de octubre, cuando los guardias me echaron a mí también a morir en el mismo ala, a pesar de que sufría atroces dolores a causa de una fractura vertebral y un aplastamiento del disco correspondiente: para no hablar de las continuas hemorragias.*

«Poco antes de morir, el Profesor Reich pasó a mi lado, por el corredor, mientras me estaba arrastrando lo mejor que podía apoyándome en la pared para llegar a mi celda del ala de la muerte... Me dijo que no podía soportar por más tiempo las medicinas con las que le estaban saturando el organismo. Y de hecho murió al cabo de un par de días. Cuando lo encontraron, no sólo estaba ya muerto sino que estaba ya frío, pero tenía una pierna encogida y contraída, como si hubiera sufrido una tremenda agonía antes que la muerte le liberara de sus sufrimientos.»

Hasta aquí la narración de Hohensee que pone bajo una luz aún más siniestra e infamante el trato que la «democracia» y la «justicia» americanas reservaron al hombre más grande de nuestro tiempo. La terrible angustia que dicha relación provocó a los familiares de Reich emerge de una carta de su hija Eva, publicada junto con la relación, en la que ruega vivamente a Hohensee que se ponga en contacto con ella y con la última compañera de Reich, Aurora Karrer, para comunicarle todas las informaciones que pudiera darle sobre las últimas semanas de vida del padre. *«En cierto modo —*

escribía Eva Reich— *casi tengo miedo de saber lo que podrá decirme... ya que la mentira triunfa y la verdad es derrotada y la muerte del doctor Reich ha sido acogida en todas partes con un gran silencio.»*
(...)

Inmediatamente después de las exequias fue leído el testamento, que contenía entre otras la disposición de dedicar todos los recursos financieros que quedaban a la creación de un Fondo Wilhelm Reich para investigaciones sobre la infancia y la de sellar durante cincuenta años su archivo y su biblioteca personal: todos estos años Reich consideraba necesarios para que los sentimientos y los resentimientos relacionados con su persona se disiparan y su obra pudiera ser valorada con objetividad y serenidad. Así se hizo: todos aquellos documentos se encuentran depositados en una cripta impermeable a la humedad y sólo serán accesibles el 3 de noviembre de 2007.

El contenido del testamento ha sido ya dado a conocer en Italia en sus partes no privadas y es inútil ahora insistir en él: querría sin embargo subrayar que incluso de aquel documento emerge el profundo amor a la humanidad que animó a Reich hasta los últimos años de su vida y la lucidez con que, como de costumbre, quiso incluso en el momento de su muerte que todos los recursos que quedaron de su trabajo y el trabajo de sus continuadores fueran dedicados a la última esperanza humana de rescate y de salvación: la defensa de la infancia.

Lamentable, en cambio, me parece la decisión de sellar su precioso archivo durante cincuenta años. En este caso, como en tantos otros (cuando escribió por ejemplo que su obra podría ser entendida sólo después de quinientos o mil años), Reich dio muestras de entender la desesperada urgencia de que su obra fuera comprendida.

Poco autoriza a creer que la humanidad vaya hacia días mejores: mucho autoriza a creer lo contrario. Fue probablemente un residuo de aquel ingenuo evolucionismo ochocentista, del que Reich no estuvo exento, lo que le sugirió esta gravísima y quizás ruinosa *«cláusula del cincuentenario»*. Pero una mirada realista a los acontecimientos humanos, y, sobre todo, a los cada vez más insolubles y crecientes conflictos políticos de masas humanas cada vez más vastas, lleva a concluir que dentro de cincuenta años el mundo no será más sino menos idóneo para comprender, y para aplicar los descubrimientos y el pensamiento de Reich. Es hoy, aquí, en cualquier parte que haya alguien que comprenda aunque parcialmente, aunque sólo torpemente, las concepciones reichianas, cuando es preciso divulgar, profundizar, verificar, desarrollar las investigaciones, las intuiciones y los descubrimientos de aquel pensador porque es hoy, aquí y en todas partes es urgentemente necesaria la aportación decisiva que puede ayudar a la salvación de la humanidad. Dentro de cincuenta años puede que no haya nadie ni en Rangeley ni en otra parte que esté interesado, o autorizado por los poderes constituidos, a reemprender un trabajo que ya hoy muy pocos demuestran apreciar.

La idea de que un mundo arruinado debe dirigirse a la obra de Reich como a una balsa de salvación es sólo un buen deseo: si la Historia enseña algo su enseñanza es que no enseña nada.

Luigi de Marchi, de su libro: *"Wilhelm Reich. Biografía de una idea"* (descatalogado)
Editorial Península, 1974. (Agotado)
***Enlace para descargar este libro en Word:**
http://www.scribd.com/doc/2208761/Luigi-de-Marchi-Wilhelm-Reich-Biografia-de-una-idea

***Bitácora de Luigi de Marchi: Il blog del Solista**

Luigi De Marchi es un investigador, psicólogo clínico y social. Sus obras principales son: *Sesso e civiltá* (1959), *Sociología del Sesso* (1963), *Repressione sessuale e oppressione sociale* (1965), y *Wilhelm Reich, biografia di una idea* (1970), *"Lo shock primario"* (1984), donde expone su teoría sobre la cultura y la angustia.
De Marchi es el secretario de la AIED (la organización italiana para el control de nacimientos) y fundador del primer Centro de consulta

anticonceptiva existente en Italia. Sus revolucionarias opiniones sobre la conducta sexual y sobre la anticoncepción le han valido denuncias e incluso condenas judiciales. Ha sido también el principal introductor del pensamiento de Reich en Italia, de quien publicó en 1960 su libro de ensayos: ***Teoría dell'orgasmo*** **(*Para leer su curriculum*)**

Esta reseña ha sido publicado en Gatopardo "bajo *licencia creative commons* con algunos derechos reservados" (lo que significa que no hay que pedir permiso para republicarlo, siempre que se cite la fuente y se ponga el enlace directo correspondiente) ha sido copiado integramente, fotos incluidas por el blog Centro de estudios Wilhelm Reich evitando cuidadosamente tener la cortesía de citar y enlazar a este artículo y este blog plagiados.

He tratado de dejarle un mensaje a su editor, don Carlos Liendro, bioterapéuta (ipobre Reich!); pero el filtro en su blog impide que se publique. Pueden intentarlo ustedes:

Es maravilloso que se pueda acceder a la bibliografia que no se encuentra en las librerias locales.
Reich sigue vivo porque hoy su teoria explica los grados de barbarie a los que se nos somete y tiene la respuesta para pulverizar la educacion del sistema capitalista y proponer una nueva, sobre todo de los niños que seran los hombres y mujeres nuevos, de la otra sociedad.
Gracias por regalarnos la posibilidad de tener a disposicion la teoria de este gran hombre.

PARA LIMPIARLE EL HONOR A UN POLÍTICO, EL JUEZ EMBARGA LA PAGA POR INVALIDEZ TOTAL DE PATXI IBARRONDO, UN PERIODISTA ESPAÑOL

Remitido por nuestros amigos de Nodo50, contrainformación en red

Patxi Ibarrondo, director del desaparecido semanario "LA REALIDAD", se encuentra en la "indigencia". La ejecución provisional de una sentencia que le condenó en 2001 por "mancillar" el honor del entonces secretario general del Partido Popular cántabro, diputado autonómico, y presidente de Caja Cantabria, Carlos Sáiz,**(1)** ha llegado hasta el embargo de la cuenta bancaria donde se le ingresa la pensión de invalidez.
Un episodio más del desequilibrio entre los derechos al honor y a la información, que amenaza a medios con pocas posibilidades de responder a multas y sanciones.
El día 14 de junio próximo tendrá lugar homenaje popular a "LA REALIDAD" y al que fuera su director: Patxi Ibarrondo, organizado por Periodico Diagonal y Nodo50.
CENA HOMENAJE 14 de junio 20:30 h.
SITIO: Solar de Lavapiés, Calle Olivar 48, Metro Lavapiés. Madrid
BONO APOYO PARA RESERVAR CUBIERTO: 20€ (10 cena + 10 apoyo) y bono de apoyo plus 25€ (10 cena + 15 de apoyo).
Para adquirir bonos en Madrid:
FreePress, calle de la Fe nº 10, Metro Lavapiés,
Ecologistas en Acción, calle Marqués de Leganés 12, metros Callao y Noviciado,
Ateneo Republicano de Vallecas, calle Arroyo del Olivar 79, metro Buenos Aires
(En breve habrá más sitios en esta lista)
Si estás interesado en asistir o participar desde fuera de Madrid escríbe a ayuda@nodo50.org

(1)Venganza de un ex dirigente del PP contra un periodista
Patxi Ibarrondo es un periodista cántabro que ha trabajado en distintos medios locales y nacionales, desde ***El Diario Montañés*** a ***El País***. Pero un buen día tuvo la malhadada suerte de ir a chocar al mismo tiempo con un preboste del PP, **Carlos Saiz**, unos jueces que no vamos a calificar y una ley, afortunadamente ya retirada, que permitía cerrar un medio de comunicación antes de ser condenado en firme. No se trataba de una ley franquista, no, sino de la etapa del Partido Popular en el Gobierno democrático de España.
Ibarrondo perdió un juicio, le arrebataron la cabecera de su periódico, ***La Realidad***, le

dejaron sin trabajo y ahora le quitan la pensión de invalidez, su único ingreso para subsistir. Un juez ha decidido embargar la pensión del periodista para resarcir al ahora empresario Saiz, antes secretario general del PP, diputado regional y presidente de Caja Cantabria. Ibarrondo, al que el estrés sufrido debido al acoso al que fue sometido le provocó que en 2004 le diagnosticaran la enfermedad de Parkinson, tiene concedida una pensión por invalidez permanente, que es con la que sobrevive. Y ahora se la quitan, Esta situación debe cesar de inmediato. La Asociación de la Prensa de Cantabria debe y puede tomar la defensa del periodista, aunque no sea asociado. Desde este confidencial toda nuestra solidaridad. Una información, por equivocada o desafortunada que sea, no puede convertirse en el instrumento para una venganza personal y política. El PP debería solicitar a su ex dirigente, aunque todavía militante, que se dirija al juez para que levante el embargo de la pensión de invalidez de Ibarrondo., Este la necesita para vivir, y ese dinero no limpia, si es que ese es el caso, el honor de Saiz ni el del PP.

***

Para completar esta la información les ofrecemos el comunicado íntegro de la Junta Ejecutiva Federal de la Federación de Sindicatos de Periodistas (FeSP) :

"La Federación de Sindicatos de Periodistas (FeSP) denuncia el asedio judicial que viene sufriendo en los últimos años el periodista cántabro Patxi Ibarrondo, ex director de la desaparecida revista "La Realidad", a instancias del ex secretario general del PP de esa comunidad y ex presidente de Caja Cantabria, Carlos Sáiz.

Ibarrondo fue condenado en su día a indemnizar con 120.000 euros al entonces máximo dirigente del PP de Cantabria, por unas informaciones publicadas en esa revista que, aunque eran ciertas, una juez consideró que atentaban contra su honor. Esa cantidad fue reducida posteriormente a 1.200 euros por la Audiencia Provincial, pero para esa fecha la revista se había visto obligada a cerrar. En aquella época la ley permitía ejecutar una sentencia aunque no fuera firme -normativa que fue anulada después-, por lo que Sáinz solicitó esa medida y llevó a la publicación al cierre.

El estrés que sufrió Patxi Ibarrondo debido al acoso al que estaba siendo sometido provocó que en 2004 le diagnosticaran la enfermedad de Parkinson. Le fue concedida una pensión por invalidez permanente, que es de la que vive.

La juez Laura Cuevas había embargado el 12% de los ingresos de Patxi Ibarrondo. Recientemente, a instancias de Carlos Sáiz, ha embargado la totalidad de la cuenta en la que el periodista recibe su pensión, lo que le deja en la indigencia.

Desde la Junta Ejecutiva Federal de la FeSP hacemos un llamamiento a toda la profesión periodística, de manera especial a la Asociación de la Prensa de Cantabria, para que muestre su solidaridad y ayuda a un periodista que atraviesa por tan grave momento sólo porque decidió ejercer su profesión con independencia y se convirtió en incómodo. Lo que le ha ocurrido a Ibarrondo es un claro ataque a la libertad de expresión y así debemos entenderlo todos los periodistas.

La FeSP se pone a disposición de Patxi Ibarrondo para cualquier iniciativa que quiera emprender en defensa de su dignidad y ha encomendado a sus servicios jurídicos que estudien las medidas a llevar a cabo para frenar este atropello".

EL GOBIERNO DE JALISCO AMPARA Y PROTEGE A VIOLADORES

El nueve de enero de 2008, el gobernador de Jalisco, Emilio González Márquez, no tuvo más remedio que reconocer que el procurador general de Justicia del estado, Tomás Coronado Olmos, estuvo en una orgía con menores de edad, y donde, según se denuncio penalmente, una de las niñas fue, presuntamente, violada por el funcionario de alumbrado público del ayuntamiento de Guadalajara, Martín Aguirre Aguirre, hoy prófugo.
Cualquier responsable político con un mínimo de hombría se sentiría horrorizado de que, presuntamente, un adulto de su confianza, en vez de gozar del sexo consentido con adultos, imponga su sexualidad a los menores, y, por supuesto, cualquier hombre de bien estaría dispuesto a facilitar la investigación, orgulloso del coraje ciudadano de la madre y la menor que denunciaron el atropello. El gobernador de Jalisco, Emilio González Marquez, tiene otras prioridades:
"Lo que hay detrás de esto es gente interesada en que el tema crezca", -se refería a las denunciantes- y puso en duda que las personas que estuvieran en la fiesta donde ocurrió la presunta violación se enteraran, y mucho menos su procurador de Justicia (¡!) y no cree que las menores que participaron en esas reuniones fueran *"ostensiblemente presentadas como menores* (…) *No sabemos si se enteró* (de la violación) *porque la respuesta que él da es que no se enteró".* Y también dijo: *"Podría ser que en este mismo espacio ahora estuviese ocurriendo algún ilícito sin que nosotros nos enteremos, y no nos hace cómplices ni responsables si en estos alrededores se comete algún ilícito por el hecho de estar aquí y no enterarnos. Esa es la pregunta: ¿participó? La respuesta de todo mundo es: no, no participó"* ***(1)***
Y no han flaqueado los cimientos de su fe en la inocencia del supuesto menorero Coronado Olmos, aunque el fiscal de la Procuraduría General de Justicia del estado (PGJE), Marco Antonio Chávez Villegas, interpusiera una queja ante la Comisión Estatal

de Derechos Humanos de Jalisco por ser golpeado y retenido por escoltas del subprocurador estatal, Jorge David Delgadillo Báez, después de admitir a trámite la denuncia de la madre de la adolescente de 16 años violada, señalando que el procurador de Justicia Coronado Olmos había acudido a esa fiesta, celebrada en una granja en las afueras de Guadalajara. Y tampoco cuando la siguiente denuncia ante la Comisión Estatal de Derechos Humanos (CEDHJ) fuese la del entonces subprocurador, Víctor Manuel Landeros Arvizu, después de haber recibido amenazas del procurador de Justicia, y, a pesar de que *"tiene un temor muy grande por su seguridad y la de su familia",* presentó la denuncia contra Coronado Olmos y confirmó que estuvo en la orgía.

En respuesta, la PGJE presentó una querella contra Landeros Arvizu, a quien acusó de falsear información y obtuvo una orden de aprehensión en su contra.
Es tanta su fe en la inocencia de los presuntos pederastas, que el Gobierno del estado de Jalisco - violando las medidas cautelares dictadas por la Comisión Interamericana de Derechos Humanos (CIDH) para la señora Arellano y sus dos hijas- , les ha pedido, incluso en televisión, que retiren la denuncia que hicieron en contra de Martín Aguirre Aguirre, prófugo de la Justicia en la actualidad, presunto organizador de fiestas sexuales con menores, presunto violador de su hija, en las que presuntamente participaba el procurador del estado Tomás Coronado Olmos.
Aunque los defensores de que haya una investigación y se depuren responsabilidades penales, hagan acusaciones por hostigamiento y amenazas contra quienes han insistido en la presencia del procurador en esa orgía, el Gobernador de Jalisco ha hecho piña con los acusados, que al fin y al cabo son sus cuates desde que era alcalde de Guadalajara, cuando Tomás Coronado Olmos fungía como secretario general del Ayuntamiento, y Martín Aguirre Aguirre, el organizador de la orgía y presunto violador era abogado de la Secretaría General. Siempre ha habido clases.
Por eso se ha estancado la investigación, como cualquiera que a lo largo de los años, en México, se haga contra las redes pederastas que surten de carne fresca a políticos, mangantes, y empresario cercanos al poder, como denuncian la organización no gubernamental Centro de Justicia para la Paz y el Desarrollo (Cepad) y la ex fiscal mexicana y asesora del Instituto Nacional de las Mujeres (Inmujeres) Alicia Elena Pérez Duarte.
Mientras, las agraviadas no han querido ponerse bajo la tutela de la procuraduría estatal, temiendo, con muy buen criterio, que los responsables pudieran poner en peligro su integridad y su vida.
Una vez más, son las mujeres las que plantan cara, exigen que se haga justicia y se enfrentan a los sicarios, a los políticos en el poder, a los eclesiásticos corruptos, y a su atroz injusticia, sin dejarse amedrentar: como Isabel Miranda Wallace, Rosario Ibarra de Piedra, Lydia Cacho, Alicia Elena Pérez Duarte, las madres de Ciudad Juárez, Sanjuana Martínez, Diana Washington Valdez y tantas otras, como si apenas hubiera varones en México o la mayoría hubiera sufrido una merma radical, y ya sólo fueran capaces de mostrar su valor para quedarse impasibles mientras los poderosos violan y martirizan mujeres y niños, y secuestran, encarcelan o asesinan a los mejores.
Da ganas de preguntar, como Rafael Alberti encarándose a los españoles: *"¿Pero dónde los hombres?"*

Gatopardo

*La Jornada de Jalisco. (19-setiembre 2007) *"Una grabación revela actos de corrupción del titular de justicia"*
*La Jornada de Jalisco (9 diciembre 2007) *Analiza la PGJE si la denuncia por violación a una menor fue alterada para implicar a Coronado*

* www.cimacnoticias.com (21 abril 2008) *Gobierno presiona a Araceli Arellano y viola medidas cautelares ordenadas por CIDH*
* El Universal 5 mayo 2008 *Protege a delincuentes. Su procurador es investigado por pedofilia*
*La Jornada (8 Mayo 2008) *El gobernador de **Jalisco** enfrentaría juicio político por peculado*

(1) **"Hay otros por quienes el gobernador aboga a ultranza, al menos en el discurso. Jorge Luis Vizcarra Mayorga, ex presidente municipal de Tonalá, es prófugo de la justicia, acusado de homicidio calificado, homicidio calificado en grado de tentativa, delincuencia organizada y abuso de autoridad.**
El mandatario conocía las acusaciones, y advertía que Vizcarra seguiría en su cargo.
El 1 de enero de 2007, Jorge Vizcarra iniciaba como alcalde de Tonalá. Burócrata, empleado de Abraham González Uyeda, subsecretario de Gobernación, y en el sexenio de Francisco Ramírez Acuña fue secretario de Administración.
Los hechos: el 8 de febrero de 2007, casi muere a golpes el síndico tonalteca Leonel Andrade Padilla. Y el 24 de abril es ejecutado afuera de su casa el director de Mejoramiento Urbano de este municipio, Carlos Romo Guízar. La Procuraduría descubre así una red de tráfico de drogas, con vehículos del ayuntamiento.
Los autores intelectuales que mandaron ejecutar a los dos funcionarios, eran: Ricardo Sigala Orozco, hasta hace cinco meses secretario general de ese municipio, detenido, y Jorge Luis Vizcarra, prófugo."

En imagen de portada: **El gobernador de Jalisco, Emilio González Márquez, reconoció que el procurador del estado, Tomás Coronado Olmos (en segundo plano), estuvo en una fiesta en la que se habrían cometido abusos sexuales contra menores de edad; pero insistió en defender a su colaborador (Fotografía: Arturo Campos Cedillo)**

Aquí estamos los hombres. Padeciendo y denunciando los abusos de poder, los excesos, el despilfarro, la imbecilidad y la infamia del gobernador de Jalisco.

Quizás nuestras voces no tienen el mismo eco que la de las mujeres que mencionas, quizás nuestras denuncias no tienen la misma oportunidad, tino o sentido de urgencia.

Pero yo estoy seguro de que no son pocos los hombres en los medios que han cubierto esa historia y que son muchos más quienes se sienten indignados y agraviados por la actuación del Sr. González Márquez.

Una vez más, las miserias del ser humano. ¿habrá que hermanar a Jalisco y a Coslada?

Fecha: 15/05/2008 11:14.

Autor: carlos martinez

Pues nada si los gobernados por esa gentuza protectora de cobardes violadores y desviados sexuales, lo ven bién será por algo. A lo mejor es que tampoco son tan

machotes como parecen.
En Coslada (Madrid) han tardado 20 años en enterarse de que quien roba, vila, y delinque no son los inmigrantes sino los policias.

Fecha: 15/05/2008 12:34.

Autor: Gatopardo

Mi querido Ramón: seguramente estaré mal informada y es el padre -y no la madre- de la niña violada la que ha plantado cara; y serán los padres de las mujeres asesinadas de Ciudad Juárez -y no las madres- quienes forman parte de las redes de búsqueda e investigación de secuestradas y desaparecidas; y serán los maridos, padres, y hermanos de las periodistas que han investigado y han sido amenazadas los que se están batiendo como jabatos.
Respecto a los hombres que informan y denuncian valientemente,llevas mucha razón, y ya sabes que leo con fruición tus valientes denuncias... contra los que no son los responsables políticos electos, ni están en el poder. El día que le descerrajes la mitad de lo que acostumbras a los que no están en la oposición,y están cometiendo fechorías y crímenes, se me caen las bragas.
Victor Flyte y Carlos Martínez: el asunto de la mafia policíal de Coslada se pone en marcha porque hay una denuncia de dos prostitutas -¡mujeres tenían que ser!- que no se dejaron intimidar como el resto de los empresarios extorsionados que ahora, cuando ya están procesados y detenidos, se han apresurado a poner sus denuncias.
¡Y luego parecerá que exagero cuando digo que tiene más derecho al respeto una puta que cien capones!

Autor: Ramón Mier

Gatopardo,

Casi todos los mexicanos tienen madre, pero son bastante menos los que tienen padre. Muchos abandonan su familia y otros muchos se separan de ellas buscando la forma de proveerles de lo que necesitan para subsistir y prosperar.

Yo no me animaría a sugerir siquiera que los padres de las víctimas (de las que los tengan) son indiferentes al sufrimiento de sus hijas, que solo sus madres sufren por el daño que han sufrido y que solo ellas lo condenan o buscan justicia.

Yo prefiero creer que no todas las familias de las víctimas tienen la capacidad económica como para dedicarse de tiempo completo a la demandante e ingrata labor de buscar justicia para sus hijas. Que en unos recae esa tarea y que en otros la de ganar el pan para la familia, labor que en México, como en muchas otras partes del mundo recae en los padres.

Quizás por eso mismo existen organizaciones como Madres de Plaza de Mayo que busca recuperar con vida a los desaparecidos de la dictadura Argentina entre los que había tanto hombres como mujeres víctimas.

Yo no me arriesgaría a ser injusto con los padres, hermanos y maridos de las víctimas de la violencia. No creo que sean pocas las mujeres que cuentan con su respaldo en la lucha que han emprendido. Tampoco me parecería extraño que ellos reciban bastante menos atención de los medios.

Pero quizás estoy mal informado y en realidad esos hombres se regocijan con la tragedia de sus hermanas, hijas, madres, o esposas y no hacen otra cosa que minar los esfuerzos de quienes han decidido dar la cara. Quizás los hombres no somos más que fábricas ambulantes de metano que contribuyen al calentamiento global.

Quizás lees "con fruición" mis "valientes denuncias... contra los que no son los responsables políticos electos, ni están en el poder." pero por alguna extraña razón pareces haber omitido leer aquellos textos donde critico a quienes están en el poder. Porque sabrás que lo he hecho varias veces y en el caso del gobernador de Jalisco por lo menos en dos ocasiones. No lo digo esto en un afán de que se te caigan las bragas, sino de dejarlo en claro a tus lectores.

Si no les dedico más tiempo y esfuerzo es porque sobra quien lo haga mucho mejor que yo. El que no les dedique mayor espacio no significa no signifique que no condene sus actos y actitudes o que esté de acuerdo con lo que digan o hagan.

Fecha: 16/05/2008 17:10.

Autor: Gatopardo a Ramón Mier

Vale, ya lo he entendido: al contrario que el resto de la humanidad, los niños mexicanos son engendrados sin concurso de varón, y por eso todos tienen madre, aunque no necesariamente padre.
Respecto a esas mujeres que se dedican a arriesgar el cuello es gracias a tener tiempo libre, al estar mantenidas por los maridos, padres, hermanos, que no participan en sus luchas porque tienen que trabajar.
Y respecto a tus críticas al gobernador de Jalisco, para "dejarlo claro a mis lectores", te he leído:
http://disiento.blog.com/2925242/
http://disiento.blog.com/1990263/
Y no se me cayeron las bragas, querido.

Fecha: 17/05/2008 05:16.

Autor: Ramón Mier

Gatopardo,

Perdona que mis expresiones desafortunadas que evidentemente causaron un mal entendido.

Lo que quise decir es que en muchas familias mexicanas el padre está ausente, ya sea porque se ha ido a buscar lejos de su hogar una forma de ganar dinero para los suyos o bien porque los ha abandonado de forma irresponsable.

Yo respeto y admiro a las mujeres y hombres que arriesgan el cuello buscando justicia. También admiro a sus famliares y amigos, hombres y mujeres que les brindan el apoyo que necesitan para llevar adelante sus luchas. Luchas que no son, ni pueden ser actividades de "tiempo libre".

Gracias por aclarar que me has leído. No se si celebrar o lamentar que no se te hayan caído las bragas.

Autor: Otra madre pide justicia en Oaxaca

Oaxaca.- Luego de conocer la decisión de la Suprema Corte de Justicia de la Nación de revisar el caso de violación a su hijo de cuatro años de edad por dos profesores de un jardín de niños, Leticia N., madre de la víctima, expresó su beneplácito por esta determinación.

La mujer informó que la solicitud fue presentada por ella y su abogado, el pasado mes de febrero de este año y hoy se conoció la aceptación de los ministros de conocer este polémico caso de pederastia ocurrido en un centro preescolar, ubicado al norte de la capital.

Valdés Martell, quien ha denunciado de manera reiterada que los agresores de su hijo reciben protección de las autoridades locales, les solicitó a la Suprema Corte atrajera el caso y espera que en este año se resuelva su demanda de justicia que reclama desde el año 2006.

La madre del menor no sólo está indignada, sino que clama justicia: "Estas personas tiene que estar en la cárcel, no pueden andar prófugos porque van a seguir haciendo daño a los niños" sentenció Leticia Valdés Martell.

"¡Qué paguen!"

"Yo tengo un compromiso con mi hijo y es que esos engendros (violadores) que salieron del infierno no hagan daño a más criaturitas. Van a pagar por lo que le hicieron a mi pequeño, así tenga que mover cielo, mar y tierra", dijo visiblemente conmovida la progenitora a Univision Online.

Valdés Martell denunció además que han sido difíciles meses de lucha para que se castigue a los culpables porque, según ella, los culpables han sido protegidos por las autoridades locales.

Las acusaciones de la madre apuntan a Adán Salvador Pérez y Hugo Gabriel Constantino García, presuntos abusadores de su hijo. Además, señala a la profesora Magdalena García de ser una de las cómplices de los violadores, y a Yolanda León Ramírez, directora y dueña del colegio, de proteger las fechorías de los profesores. Ésta es esposa de Constantino García.

La joven mujer no pudo aguantar el llanto al relatar los daños que ha sufrido su hijo, que gracias a terapias y el cariño de su familia trata de tener una vida normal.

"Para un chiquito es muy difícil superar esta situación, se necesita de terapias, de cariño, de tiempo. Mi hijo tiene ahorita 5 años, lo veo mejor gracias a Dios y porque ha recibido todo el apoyo de la familia", dijo entre sollozos Valdés Martell.

Buscan a los implicados

La procuraduría de justicia del estado giró órdenes de aprehensión contra los implicados, tras acreditarse el delito de violación en agravio al hijo de Valdés Martell. Pero hasta ahora, la única detenida es la profesora García, quien espera que se defina su situación jurídica.

García es señalada por el menor de ser la responsable de llevarlo ante sus violadores a un área del colegio para que abusaran de él.

Los daños al menor fueron cometidos en el 2006, cuando el estudiante de preescolar contaba apenas con cuatro años de edad, pero la denuncia se interpuso en mayo del

2007, cuando la madre se dio cuenta del abuso que había sufrido el pequeño.

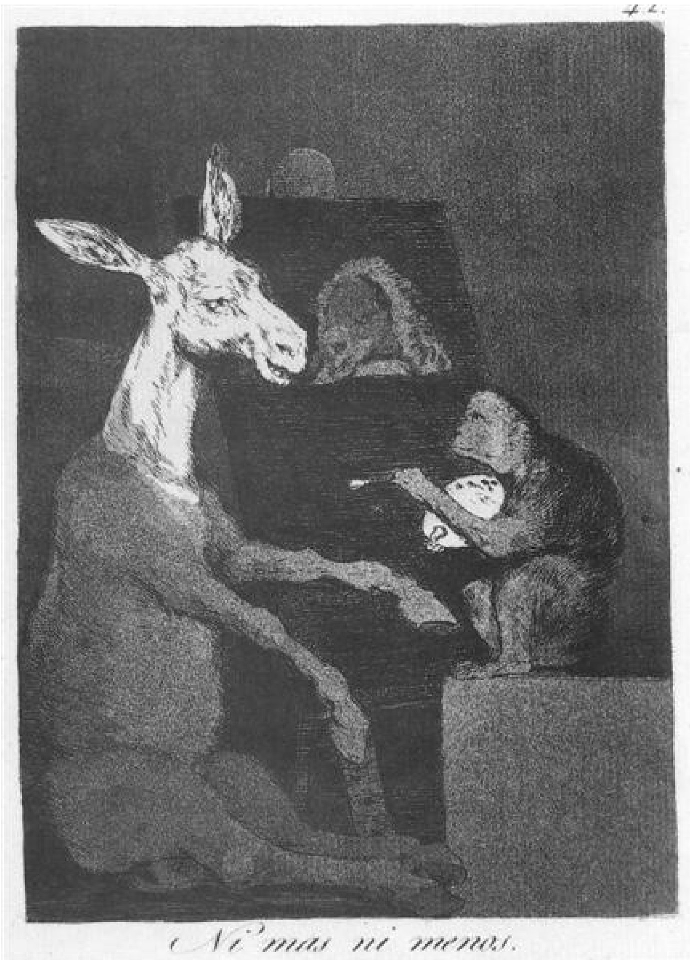
SILENCIO VITANDO DE PETIMETRES, CHUPALEVITAS, JONJABEROS, CANDONGOS, QUITAMOTAS, ALZAFUELLES, PASTELEROS, PAJILES, LACAYUNOS, ALQUILONES, SACRISTANES DE AMÉN, Y PANIAGUADOS



El equipo de Gatopardo secundamos la moción de nuestros cuates:

"A los Amigos del Olivar de Chamartín no nos ha extrañado que la mayoría de los miembros de la Fundación Ramón Menéndez Pidal no hayan querido disimular su alivio por la muerte de Diego Catalán y de Henrike Knörr, ni que hayan decidido cortar por lo sano con cualquiera que, como nosotros, haya apoyado su lucha para preservar el Olivar de Chamartín y la Casa Menéndez Pidal como lugar de trabajo abierto a los estudiosos.
A las pocas horas de su muerte, lo primero que hicieron el secretario y sus cómplices, actuando diligentemente por primera vez en su cometido, e ignorando palmariamente el contenido del testamento de quien era el propietario de los Archivos que allí se custodian, fue cambiar las cerraduras, y ponerse a la disposición de la Fundación Ramón Areces, para lo que quisiera mandar, templando gaitas por no haber podido evitar que prosperase nuestra petición para proteger como bien de interés cultural la casa Menéndez Pidal, y el Jardín del Olivar, que el Ayuntamiento de Madrid acababa de ratificar. Si no nos equivocamos, es cuestión de tiempo que retiren las denuncias contra la Fundación Ramón Areces, que se interpusieron ante la Agencia Tributaria y ante el Protectorado de Fundaciones por fraude y asalto, no vaya a ser que les quiten la tarjeta de El Corte Inglés.

Quienes han redactado su obituario no han podido escamotear su obra; pero se han cuidado bien de señalar su extraña insociabilidad. Y decimos extraña porque sus interminables jornadas de trabajo, -el único contenido productivo del que puede vanagloriarse la FRMP-, no fueron excusa para dejar de contestar ninguna carta, e.mail o llamada telefónica de cualquier estudioso que le consultara, por muy ignoto que fuera, y por muy peregrina que fuera su petición.
Pero lo cierto es que se refieren a la falta de talento social en relación con algunas ilustres nulidades del mundo académico, que le llamaban "maestro", le pedían prólogo o reseña laudatoria para sus obras, y recibieron un aluvión de correcciones, objeciones documentadas, y recomendaciones bibliográficas que Diego Catalán salpicaba, desde la primera a la última página del mostrenco, creyendo así ayudar a quien carecía de conocimientos y de pudor, aunque le sobrase capacidad para conseguir subvenciones y créditos.
Ninguno de esos le perdonó su manía de leer, señalar los errores y argumentar en vez de recomendar y prologar los bodrios de quienes sólo tienen capacidad para hacer la puñeta y la usan con largueza.
Tampoco fue un dechado de sociabilidad con aquellos eruditos que pedían su presencia y su nombre para respaldar fastos millonarios del Ministerio de Cultura, como aquellos en los que la ruta del Cid se vería con mapas interactivos a base de lucecitas y pijadas apaisadas, o sería una serie televisiva adobada con recomendaciones gastronómicas y turísticas, o como aquellas iniciativas del Centenario, cuando Don Quijote fue versionado en rap... Y qué decir de su negativa a participar en las cuchipandas de académicos y eruditos con la flor y la nata del famoseo para secundar dudosas iniciativas culturales, o su costumbre de no cobrar por sus artículos y conferencias, por considerar poco ético conducirse como un paniaguado con cargo al erario público.
Esos petimetres, chupalevitas, jonjaberos, candongos, quitamotas, alzafuelles, pasteleros, pajiles, lacayunos, alquilones, sacristanes de amén, y paniaguados del mundo académico sabrán perdonarnos el golpe por el coscorrón, que nosotros no nos arrugamos. Y somos correosos en nuestras lealtades."

DENUNCIAS ESTAFA DE LA LUZ: BREVE RESUMEN DE LA INSTRUCCIÓN

BREVE RESUMEN DE LA INSTRUCCIÓN (Diligencias Previas 280/2000 del Juzgado Central de Instrucción nº 4/ Audiencia Nacional)
Reproduzco literalmente a continuación la primera parte del punto 3 del apartado primero de los HECHOS expuestos en la demanda de amparo, inadmitida a trámite por la Sección 1ª de la Sala 1ª del Tribunal Constitucional con el argumento de que *"el material reunido durante la instrucción permite al Juez afirmar que los hechos no revisten carácter de infracción penal"* :
3.- ADMISIÓN DE LA QUERELLA Y PRÁCTICA DE DILIGENCIAS DE PRUEBA.
Por imperativo de la resolución de 25.05.01 de la Sección 4ª de la Sala de lo Penal de la Audiencia Nacional el Juzgado Central de Instrucción nº 4 se vio obligado a dictar Auto

de admisión de la querella, pero en los 18.6 meses transcurridos entre la orden de incoación del procedimiento penal (25.05.01) y el primer auto de archivo (13.12.02) se limitó exclusivamente a practicar las siguientes diligencias:
a) Toma de declaración a los querellados.
En las declaraciones de los querellados existen numerosas e importantes contradicciones e imprecisiones, detalladas en su mayoría en el escrito de 17.07.02 de la representación procesal del Sr. Moreno Alfaro al Juzgado. Entre dichas contradicciones destaca la cometida por el querellado D. Félix Rivas Perales, presidente del Grupo de fabricantes de contadores de energía eléctrica, que a la vez que declaró *"desconocer en qué factores concretos se basa el Ministerio para determinar el precio medio de mercado de los contadores"* entregó al juez instructor tres documentos (los escritos de 13.01.84, 1.10.84 y 23.12.86 de Landis & Gyr Española a la DG de la Energía) de los que, incurriendo en un delito de alteración tipificado en el artículo 393 del C.P., había sido borrado que quien remitía al Ministerio los factores concretos en los cuales se basaba éste para calcular los precios medios de mercado de los contadores era el propio D. Félix Rivas Perales, que previamente falseaba dichos factores, como reconoce la representación procesal del querellado D. Pedro Rivero Torre, vicepresidente de UNESA (patronal de las compañías eléctricas), en su escrito de 28.11.02 al Juzgado.
La petición hecha el 17.07.02 al Juzgado para que *"considerara la pertinencia de que los imputados declaren nuevamente en relación a los documentos que se aportan [*con nuestro escrito de 17.07.02] *y a las contradicciones en que han incurrido"* fue desestimada sin que el Juzgado notificara en ningún momento los motivos de la desestimación.
b) Requerimiento a la Comisión Nacional de Energía (en adelante, CNE) para que aportara su informe de 20.09.01 y los 25 anexos que lo acompañan. Siete de los anexos remitidos por la CNE (anexos XVIII a XXI y XXIII a XXV), precisamente los que contienen la información facilitada a dicha Comisión por los fabricantes de contadores de energía eléctrica y las compañías eléctricas, tienen un sello negro con la palabra CONFIDENCIAL, el cual, por su tamaño y grosor, impide leer numerosos datos de vital importancia para determinar los precios medios de mercado de los distintos contadores, por lo que dicha determinación, que era el objeto exclusivo por el que se hizo el requerimiento, ha resultado imposible.
La práctica de las diligencias solicitadas el 14.10.02 con la finalidad de obtener los datos que resultaban ilegibles como consecuencia del sello de CONFIDENCIAL fue desestimada tácitamente por el Juzgado mediante el auto de archivo de 13.12.02, por lo que esta parte ignora los motivos de dicha desestimación.
c) Requerimiento a la Dirección General de Política Energética y Minas para que aportara copia íntegra de todo cuanto se contuviera en el expediente o expedientes abiertos por el Ministerio correspondiente para definir los precios máximos de alquiler publicados en el BOE desde el 29.12.84 (OM de 20.12.84) al 28.12.01 (RD 1483/2001), que son los aplicables durante el año 2002.
La Dirección General de Política Energética y Minas sólo ha aportado un documento en el que constan los cálculos efectuados por el Ministerio para definir los precios máximos de alquiler. Dicho documento (el *"Informe sobre propuesta de Orden Ministerial por la que se revisan los alquileres de los equipos de medida de energía eléctrica"*, folios 1645 a 1648), que basta por sí solo para demostrar los delitos de estafa y falsedad documental denunciados en la querella es el relativo a los precios de alquiler establecidos por Orden de 20.12.84 del Ministerio de Industria y Energía, publicada en el BOE de 29.12.84.
Respecto a los cálculos correspondientes a los precios de alquiler publicados en el BOE los diecisiete años restantes (1985 a 2001), la citada Dirección General no ha aportado ningún documento justificativo, por lo que ha resultado imposible determinar cuál ha sido el criterio seguido por el Ministerio para determinar dichos precios, que era el objeto exclusivo por el que se hizo el requerimiento.

La práctica de las diligencias solicitadas el 14.10.02 con la finalidad de obtener dichos documentos justificativos fue desestimada tácitamente por el Juzgado mediante el auto de archivo de 13.12.02, por lo que esta parte ignora los motivos de dicha desestimación.
Por otro lado, a pesar de que la representación procesal del Sr. Moreno Alfaro solicitó en repetidas ocasiones que a éste se le tomara declaración, el Juzgado desestimó siempre tácitamente dicha solicitud, por lo que el Sr. Moreno Alfaro no ha podido aportar a las actuaciones la información y los conocimientos acumulados durante las más de 20.000 horas de trabajo que lleva dedicadas al tema desde el 7.11.94, fecha de su despido de Landis & Gyr Española mediante una denuncia falsa del querellado D. Félix Rivas Perales en represalia por haberse negado a participar en asuntos relacionados con el grupo clandestino Contact, primer eslabón de la cadena que hace posible la estafa.
Ello acredita que la única diligencia practicada por el Juzgado ha sido la toma de declaración a los querellados, ya que, como ha quedado expuesto, las otras dos diligencias (requerimiento de documentación a la Comisión Nacional de Energía y a la Dirección General de Política Energética y Minas) no fueron cumplimentadas correctamente.
El archivo de las diligencias previas 280/2000 se produjo el 13.12.02, cuatro días después de que, basado en el informe 14/2001 de la Comisión Nacional de Energía, incluido entre los documentos aportados al Juzgado por la DG de Política Energética y Minas, Interviú publicara un reportaje (www.estafaluz.com/Interviu_091202.pdf) en el que quedaba patente la implicación de D. Rodrigo Rato Figaredo (entonces, ministro de Economía; después, director gerente del FMI, y ahora, consejero del Banco de Santander y director general senior del Banco Lazard) en dos gravísimas irregularidades que beneficiaban (y benefician) en cientos de millones de euros anuales a las compañías eléctricas.

IN MEMORIAM HENRIKE KNÖRR BORRÀS

El equipo de Gatopardo suscribimos:

El pasado 30 de abril murió Henrike Knörr Borràs, filólogo eminente, autoridad incontestable en etnografía y lingüística, riguroso investigador, e intelectual de cultura universal.
Catedrático de Filología Vasca (UPV-EHU), académico de número y director de Investigación de Euskaltzaindia, miembro de la plataforma cívica Elkarri, de la Fundación Fernando Buesa; pero, sobre todo, ciudadano ejemplar, vasco universal, y hombre íntegro, de los que tanta falta hacen, de los insustituibles: de los que dejan un hueco en el alma, y en el mundo; de los que jamás callaron cuando los cobardes guardaban silencio; al que nada humano le fue ajeno, y no usó coartadas ni atajos a la hora de defender sus creencias y sus convicciones, para hacer un mundo más vivible para todos.
Que la tierra te sea leve, amigo inigualable. Y que tu obra y tu recuerdo nos sirvan de

guía, y sepamos merecerlos.
Lagun maitea: gero arte.

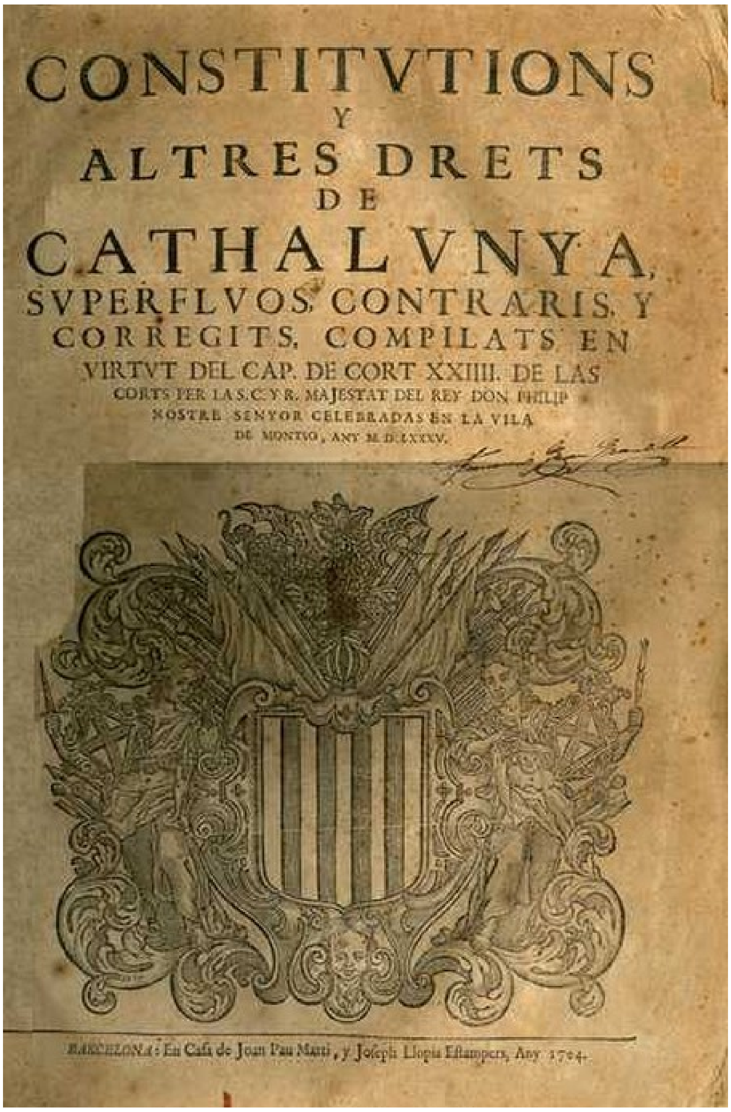
CATALUÑA SUPRIMIRÁ EL BACHILLERATO NOCTURNO



Sin previo aviso y cuando está a punto de acabar el curso 2007-2008, el Departament d'Educació del Sr. Ernest Maragall i Mira (PSC) ha decidido suprimir los estudios de Bachillerato Nocturno argumentando básicamente que las nuevas tecnologías los han dejado obsoletos. Por la misma razón habría que cerrar todos los centros de bachillerato, públicos y concertados. Pero las vías de información a distancia, cuya utilidad nadie cuestiona, no han venido a abolir el bachillerato presencial, sino a complementarlo. Tras esta medida de la Generalitat catalana se advierte un recorte presupuestario sin precio político, esto es, a costa de un sector minoritario al que se juzga indefenso. Forman el alumnado de nocturno estudiantes que compaginan el estudio y el trabajo o que presentan necesidades educativas especiales. Nada justifica que la conselleria del Sr. Maragall los deje abandonados a su suerte, con la improbable alternativa de unos estudios a distancia para los que no han estado formados, pues no se trata de estudiantes universitarios.
Reclamamos, pues, al Departament d'Educació de la Generalitat que retire la medida y que abra un periodo de reflexión que nos permita reformar y potenciar en Cataluña la opción de Bachillerato Nocturno, racionalizando mejor los recursos económicos de que disponga.

Nota remitida por Salvador Rebés

Enviad (preferentemente antes del miércoles) un e-mail con el asunto "BATXILLERAT NOCTURN, SÍ" a la siguiente dirección: conseller.educacio@gencat.net
Y, por favor, comunicadlo a quien os parezca oportuno.
Gracias.

En el caso de que la Generalitat no sepa de donde sacar los recursos económicos necesarios para educación, pueden leer atentamente los informes de la Sindicatura de Comptes de Catalunya, como, por ejemplo, los alegres dispendios del Instituto Catalán de las Industrias culturales (pdf), y la Televisió de Catalunya, SA (TVC), (pdf)

Agüela, gracias por difundir esta noticia. No sabía y malo sería que otras Comunidades empiecen a tomar nota. La cuestión es que las nuevas tecnologías no pueden suplantar la labor del maestro (sí del profesor, pero no del maestro). Y, el maestro, sólo puede existir presencialmente.
Hace unos meses, me planteé matricularme en la UOC pues me parecía interesante estudiar desde casa vía on-line. Afortunadamente lo pensé un poco más y me di cuenta de que faltaría algo esencial: la comunicación directa maestro-alumno y la relación alumnos-alumnos, y no sólo para hablar de la materia.
Finalmente me olvidé del tema y me matriculé en una pequeña escuela de teatro donde recibo justo lo contrario: actividad en grupo y enseñanzas de un maestro.
Un abrazo!

Bueno, creo que finalmente la versión sobre la supresión del bachillerato es otra, no?

No acabo de entender qué relación tienen las Constitucions i altres drets con la educación reglada y el bachillerato. ¿Me lo explicas?

Fecha: 07/05/2008 14:57.

Autor: nur

Víctor Flyte: he estudiado en una universidad presencial y también en la UOC. Puedo asegurarte sin riesgo a equivocarme que el contacto (aunque fuera mayoritariamente virtual) con los profesores era mucho más frecuente que en la universidad presencial, donde los profesores tienen unos horarios de visitas restringidos que no necesariamente coincidan con los tuyos. Un mail, sin embargo, se puede responder a cualquier hora.

Pero, efectivamente, no todos los estudios se pueden realizar on line ni es la panacea.

Fecha: 07/05/2008 15:00.

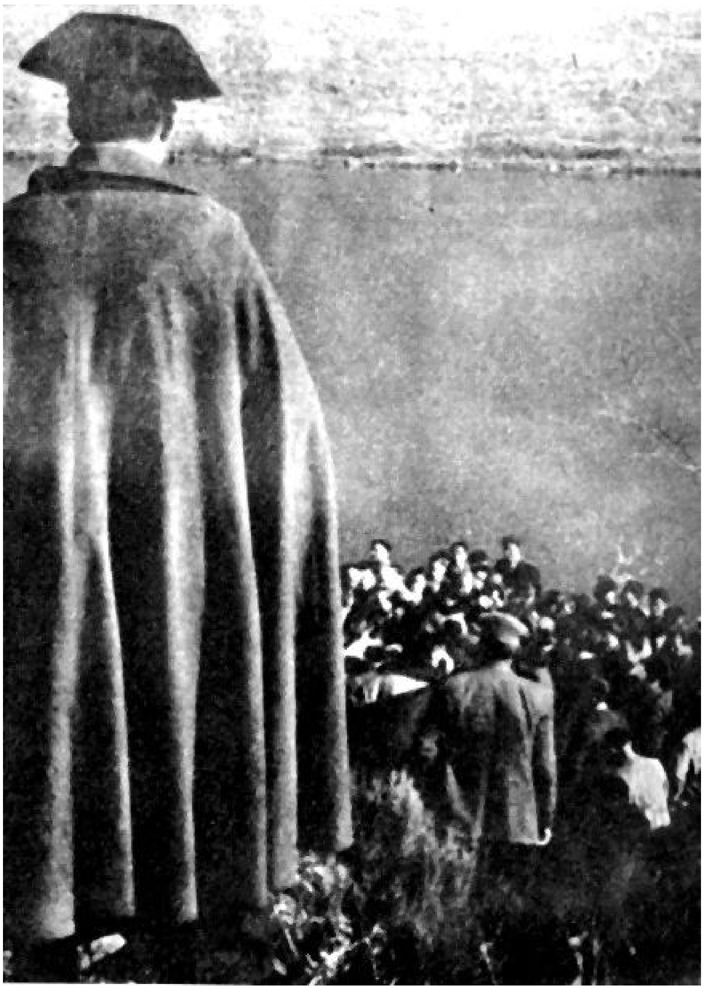
SEGÚN LOS DESEOS DE DIEGO CATALÁN



Según la disposición testamentaria de Diego Catalán: *"dono a mi mujer Cruz Montero Garrido mi obra y papeles científicos y le encargo del cuidado y edición de la obra inconclusa"*, anuncio que toda la obra publicada de Diego Catalán, así como el inédito ***"La enigmática carta del Embajador del 28 de mayo/6 de junio de 1562"*** y los demás estudios científicos, se publicarán próximamente en Internet, siguiendo sus deseos de que la cultura sea de acceso *"universal, libre y gratuito"*.

Diego Catalán siempre despreció al intelectual mediocre, oportunista y gandul, que se ampara en la obra ajena para trapichear prebendas con fines crematísticos y de autobombo. Yo también. Por tanto, cualquier discípulo bastardo o exégeta espurio que pretenda editar y glosar y rentabilizar la obra de Catalán queda moralmente desautorizado. Y ruego tengan el decoro de privarme de noticias sobre sus andanzas y las rutas que consagran.

Firmado: Cruz Montero Garrido.

TOMÁS DE IRIARTE: LOS DOS LOROS Y LA COTORRA

De Santo Domingo trajo
dos loros una señora:
la isla es mitad francesa,
y otra mitad española.
Así cada animalito
hablaba distinto idioma.
Pusiéronlos al balcón,
y aquello era Babilonia;
de francés y castellano

hicieron tal pepitoria,
que al cabo ya no sabían
hablar ni una lengua ni otra.
El francés del español
tomó voces, aunque pocas,
el español al francés
casi se las tomó todas.
Manda el ama separarlos,
y el francés luego reforma
las palabras que aprendió
de lengua que no es de moda
el español, al contrario,
no olvida la jerigonza,
y aun discurre que con ella
ilustra su lengua propia.
Llegó a pedir en francés
los garbanzos de la olla,
y desde el balcón de enfrente
una erudita cotorra
la carcajada soltó,
haciendo del loro mofa.
Él respondió solamente,
como por tacha afrentosa:
Vos que sois una purista;
y ella dijo: A mucha honra.
¡Vaya, que los loros son
lo mismo que las personas!

Los que corrompen su idioma no tienen otro desquite que llamar puristas a los que le hablan con propiedad, como si el serlo fuera tacha.

Los fondos de reptiles suelen financiarse mediante sociedades estatales que duplican las tareas y los gastos. En vez de discutir de política desde un punto de vista ideológico, y escribir editoriales y columnas de opinión, más nos valiera examinar los informes del Tribunal de Cuentas y los Presupuestos Generales del Estado para contar como, por donde y con qué se soborna, se corrompe y se subvierte la democracia.

Se pueden encontrar estrambóticas sorpresas societarias y contables con cargo al erario público, y equipos de ignotas eminencias (**1**) en lo suyo, como en SEACEX, S.A, que ya estarían en el paro o procesados si gestionaran así una empresa privada.

El control del gasto público, en SEACEX s.A. y otras empresas estatales está más liado que la pata de un romano y, sin embargo, el embrollo es de una pristina transparencia. Ese desparpajo e inepcia en la trapisonda contable sólo se concibe si se cuenta con la impunidad que ofrece una ciudadanía que cultiva la ignorancia sobre lo que le afecta, propiciada, en los sucesivos gobiernos, por todos los partidos políticos, los poderes legislativo, ejecutivo y judicial, y por los medios de comunicación.

Gatopardo

Copio a continuación extractos del Informe realizado por el Tribunal de Cuentas (2)

Antecedentes, naturaleza y actividad de la Sociedad Estatal para la Acción Cultural Exterior, S.A. (en adelante SEACEX):

(...)se constituyó inicialmente en el año 1954 con la denominación de "Infante, S.A.". Desde esa fecha ha modificado varias veces su denominación (en 1996, "Sociedad Estatal Goya 96, S.A." y en 1997, "Sociedad Estatal para la Conmemoración de los Centenarios de Felipe II y Carlos V, S.A".) y su objeto social.Por acuerdo de la Junta General Extraordinaria y Universal de 28 de febrero de 2001 se cambiaron sus estatutos y denominación social, pasando a tener su

actual nombre, en cumplimiento del acuerdo del Consejo de Ministros de fecha 15 de diciembre de 2000.

Su accionista único es el Estado español, correspondiendo su control a la Dirección General del Patrimonio del Estado que tiene la representación de los derechos del Estado en la Sociedad.

El objeto social de SEACEX es "la preparación, organización, administración y celebración de determinadas exposiciones internacionales y actividades conexas a las mismas, que contribuyan a la proyección cultural de España en el exterior, bajo la coordinación de los Ministerios de Asuntos Exteriores y de Educación, Cultura y Deportes, en el marco de los criterios emanados del Consejo de Política Exterior y de la Comisión del Gobierno para Asuntos Culturales.

A 31 de diciembre de 2002 el activo total de SEACEX ascendía a 8.375.280 euros y los fondos propios a 5.815.096 euros. Ambos conceptos presentaban una importante disminución respecto a sus valores a 31 de diciembre de 2001 (17.863.461 y 16.872.825 euros, respectivamente) debido a las pérdidas registradas por SEACEX en el ejercicio 2002 que fueron de 11.057.729 euros. La Junta General de Accionistas celebrada el 2 de abril de 2003 acordó realizar una ampliación de capital de 15 millones de euros, fijando el capital de la Sociedad en 33.893.316 euros.

Objetivo y alcance de la fiscalización:

La fiscalización ha tenido como objeto el análisis de la actuación de SEACEX en el ejercicio 2002, realizando una auditoria financiera de las cuentas anuales y verificando de modo particular los ingresos y gastos de la Sociedad y las causas que dieron lugar a que a 31 de diciembre de 2002 sus fondos propios fuesen inferiores a la mitad de su capital social.

Análisis de la Financiación de la Sociedad

En los años 2001 y 2002, los primeros de vida de la Sociedad con su actual denominación y con su nuevo objeto social, SEACEX ha incurrido en pérdidas de forma continuada (3.288.150 euros en 2001 y 11.057.729 euros en 2002), que se han financiado con la ampliación de capital efectuada en 2001 por importe de 16.828.339 euros.
El detalle de la evolución de la financiación de SEACEX en los ejercicios de 2001 y 2002 se muestra en el Anexo 3 que indica los orígenes de los fondos y sus aplicaciones en ambos ejercicios. En el ejercicio 2001 el total de orígenes de fondos fue de 16.828.339 euros, procedentes de una ampliación de capital efectuada en octubre de ese año y desembolsada en un 50% y las principales aplicaciones fueron los "recursos aplicados a las operaciones" por importe de 3.253.970 euros (3.288.150 euros, debidos a las pérdidas del ejercicio) y un aumento del "capital circulante" por importe de 13.276.995 euros, explicado principalmente por un aumento de los "accionistas por desembolsos exigidos" de 6.010.119 euros y un aumento de "inversiones financieras temporales" por un importe de 6.169.851 euros. En resumen, en 2001 los fondos obtenidos con la ampliación de capital se dedicaron a financiar principalmente las pérdidas del ejercicio y los excedentes, con el añadido de la financiación proporcionada por los acreedores, se invirtieron en inversiones financiera temporales.

SEACEX una sociedad puramente instrumental

En el ejercicio 2002 el total de los orígenes de fondos fue 11.145.324 €, de los que 6.010.119 € procedieron del desembolso del 50% de la ampliación de capital efectuada en 2001 y 5.135.205 euros tuvieron como origen disminuciones del capital circulante (procedentes principalmente de reducciones en inversiones financieras temporales y aumentos en la financiación de los acreedores).

En este año las aplicaciones tuvieron como objeto, casi en su totalidad, la financiación de las pérdidas del ejercicio. En el ejercicio 2001 los ingresos de explotación fueron de 576.549 euros,

lo que representó el 14,1% de los gastos de explotación.
En el ejercicio 2002, los ingresos de explotación ascendieron a 1.405.619 euros, lo que supuso únicamente el 11% de los gastos de explotación de ese ejercicio que fueron de 12.796.208 euros. En el ejercicio 2002 aumentó significativamente la actividad expositora de la Sociedad, lo que se tradujo en que sus gastos de explotación se triplicaron respecto a los de 2001.

(...) Es, pues, SEACEX una sociedad puramente instrumental, constituida para realizar un gasto público que el Estado compensa con aportaciones de capital a la Sociedad en la medida en que no puede ser cubierto con los escasos ingresos que genera su actividad.

Patrocinios, ingresos e inversiones en fondos de deuda pública

La principal fuente de ingresos en el año 2002 fueron los patrocinios que aportaron 1.006.695 euros (suponen un 71,6% del total de los ingresos de explotación). Otras fuentes de ingresos de menor importancia fueron las ventas de catálogos y videos (16,9% del total de ingresos), la venta de entradas (4,5% de los ingresos) y otros servicios varios (7% restante). Los ingresos por la venta de entradas proceden de una única exposición (la denominada "De Limoges a Silos", celebrada en Bruselas); las restantes catorce exposiciones organizadas por SEACEX no produjeron ingreso alguno por venta de entradas por ser el acceso a ellas gratuito o porque el derecho de cobro tuvo que ser cedido a la Entidad prestadora del local de celebración de la exposición (es el caso del Museo de Arte Reina Sofía de Madrid, lugar de celebración de la exposición "Los Ismos de Ramón Gómez de la Serna").

Obviamente, favorecería la financiación privada de SEACEX el que se consiguiese aumentar el número de sus patrocinios y mejorar la cantidad de fondos aportados por ellos. En el año 2002 hubo exposiciones de gran importancia y elevado coste de producción (como la denominada "El país del Quetzal, Guatemala Maya e Hispana") que no contaron con patrocinio alguno.Otra fuente de ingresos con que ha contado SEACEX en los ejercicios 2001 y 2002, han sido los ingresos financieros que han alcanzado importes de cierta importancia relativa (210.524 y 311.446 euros en los años 2001 y 2002, respectivamente). Estos ingresos proceden en su mayor parte de las inversiones financieras temporales que ha realizado SEACEX en esos ejercicios (principalmente colocaciones de fondos en deuda pública a corto plazo) con los excedentes de tesorería de que ha dispuesto. A 31 de diciembre de 2001 y 2002, disponía de unos saldos de 10.452.752 y 5.935.785 euros, respectivamente, en ese tipo de inversiones.

El movimiento de los fondos propios de la Sociedad durante el ejercicio 2002 ha sido el siguiente: disminución de su saldo inicial de 16.872.825 euros en la cantidad de 11.057.729 euros (importe de las pérdidas del ejercicio), siendo el saldo a 31 de diciembre de 2002 de 5.815.096 euros.

Este importe de los fondos propios era inferior a la mitad del capital social. Esta situación, en virtud de lo establecido en la Ley de Sociedades Anónimas, obligaba a los Administradores a la convocatoria de la Junta general para acordar el incremento o reducción del capital social o, en otro caso, proceder a la disolución de la Sociedad. El 2 de abril de 2003 la Junta General Universal de SEACEX acordó la ampliación del capital social en la cantidad de 15 millones de euros (el 50% a desembolsar de forma inmediata y el 50% restante antes del día 31 de octubre de 2003) y la modificación del artículo 5 de los Estatutos de la Sociedad estableciendo la cifra del capital social de la Entidad en 33.893.316 euros. Con estos acuerdos se restablecía el equilibrio patrimonial de la Sociedad y se aportaban los fondos necesarios para financiar futuras actividades.

Subvención estatal o adquisición de activos financieros o inversiones o subvenciones estatales o Dios sepa qué...

(...)En todo caso y con independencia de que la contabilización de la operación se haya realizado correctamente, atendiendo a la forma en que ha sido instrumentada, no resulta coherente con la naturaleza económica de una actividad que origina todos los años unos gastos a la Sociedad no compensados con ingresos proporcionados (siendo, además, ésta una situación

prevista cuando se planifica la actividad de cada ejercicio) el modo en que el Estado financia las pérdidas de SEACEX, que deberían cubrirse con subvenciones de explotación y figurar como tales en los Presupuestos Generales del Estado. Al financiarse las pérdidas de SEACEX, que son corrientes y permanentes, con aportaciones de capital, aparecen reflejadas en los Presupuestos Generales del Estado como adquisiciones de activos financieros, es decir, como inversiones financieras del Estado pese a que en realidad no lo son (únicamente sería aceptable esta forma de financiación si las pérdidas fueran extraordinarias u ocasionales).

El control del gasto público en SEACEX S.A.

Además, esta forma de financiación plantea problemas para el control del gasto público que genera la actividad de SEACEX, tanto para el que corresponde a las Cortes en el momento de la aprobación de los Presupuestos Generales del Estado como para el que han de ejercer los órganos de la Administración del Estado competentes en la materia (Ministerio de Economía y Hacienda, Dirección General de Patrimonio del Estado y, en su caso, el Ministerio de Cultura).

Por lo que se refiere al control de las Cortes Generales, al presentarse las aportaciones de capital que recibe SEACEX en los Presupuestos Generales bajo la forma de inversiones financieras, en lugar de como subvenciones a la explotación como corresponde a su naturaleza económica, se altera la información precisa para la aprobación de las diversas partidas que componen los Presupuestos Generales del Estado.

Por su parte los órganos de control de la Administración del Estado, tienen un escaso margen de actuación sobre el nivel de gasto en que pueda incurrir SEACEX en cada ejercicio, ya que éste sólo viene limitado por las disponibilidades líquidas de que dispone y por su capacidad de endeudamiento con los acreedores comerciales, siendo ambas muy holgadas (como se ha expuesto anteriormente).

Ampliaciones de capital para atender los gastos sin presupuesto previo.
Las ampliaciones de capital se llevan a cabo por el importe necesario para cubrir los déficits de explotación generados en años anteriores y proveer a la Sociedad de financiación precisa para llevar a cabo sus actividades; así ha venido ocurriendo en la realidad y ello ha dado lugar a que la Entidad en los ejercicios de 2001, 2002 y 2003 contase con importantes excedentes de tesorería que ha mantenido en forma de inversiones financieras temporales.Por el contrario, si los déficits de explotación se financiaran con cargo a subvenciones a la explotación, consignadas en los Presupuestos Generales del Estado como tales nominalmente a favor de SEACEX, los miembros de las Cortes tendrían una más adecuada información para decidir sobre su pertinencia y volumen; y, además, los órganos de la Administración del Estado podrían ejercer un control más estricto sobre el nivel de gasto y actividad de SEACEX, ya que la Entidad se vería precisada a no sobrepasar anualmente la cuantía determinada por la suma de los ingresos propios y el importe de la subvención incluida en los Presupuestos Generales del Estado. Estas limitaciones a la cuantía de los gastos de explotación en que podría incurrir anualmente SEACEX, en la medida en que las subvenciones del Estado estuviesen adecuadamente ajustadas al volumen de actividad que la Sociedad pueda realizar eficaz y eficientemente, podrían promover significativos ahorros en los gastos de explotación de SEACEX, al verse los gestores de la Sociedad condicionados por el volumen de los fondos disponibles.

Elaboración y cumplimiento de los Presupuestos de Explotación y Capital

La Ley General Presupuestaria establece que las Sociedades estatales que reciban ayudas del Estado, como es el caso de SEACEX, deben formular presupuestos anuales de explotación y capital que se incluirán en los Presupuestos Generales del Estado formando parte de ellos. En el Anexo 4 de este informe figuran los presupuestos de explotación y capital de SEACEX para el ejercicio de 2002, que se aprobaron conjuntamente con los Presupuestos Generales del Estado de ese año; figurando asimismo en él la liquidación de las principales partidas presupuestadas y las diferencias o desviaciones producidas.

En el apartado de gastos se observa que los gastos totales presupuestados (total debe de

la cuenta de explotación) fueron muy superiores a los reales, siendo la diferencia con aquéllos de 1.794.000 € (un 12,3% del importe presupuestado).

La principal partida de gastos de explotación son los aprovisionamientos que incluyen el consumo de mercaderías y los costes directos de producción de las exposiciones (transporte, montaje, seguro y viajes principalmente). La diferencia entre lo presupuestado y lo realizado es de 1.109.000 €, que suponen un 11,1% de menor gasto real sobre el presupuestado. En otros gastos de explotación el gasto real fue inferior al presupuestado en 592.000 € (un 16,8%) y en los de personal el gasto real superó al presupuestado en 153.000 € (15,2%).

ANEXO 2

PERDIDAS DEL EJERCICIO	11.057.729	3.288.150

La cuantía de estas desviaciones es indicativa del escaso rigor y autoexigencia con que se confeccionaron los presupuestos. Y a este respecto cabe observar que en una actividad no lucrativa, como es la realización de exposiciones, en la que el nivel del gasto depende más de las decisiones de la Sociedad que de factores externos, ha de ser relativamente fácil determinar el nivel de gastos en que se va a incurrir una vez establecido el volumen de actividad que se quiere y puede realizar.

Tampoco cuadra

Puesto que SEACEX en el año 2002 realizó una intensa labor expositiva y, a pesar de ello, el total de gastos en que ha incurrido ha resultado muy inferior a lo presupuestado, se ha de concluir que los presupuestos de gastos no estaban adecuadamente formulados. En el apartado de ingresos las desviaciones entre lo presupuestado y lo realizado son todavía mucho mayores. El presupuesto total de ingresos de explotación asciende a 4.507.000 € (3.507.000 € de cifra de negocios y 1.000.000 € de ingresos accesorios) habiendo sido los ingresos reales de 1.406 miles de euros, lo que supone una desviación total de 3.101 miles de euros (68,8% del total de ingresos presupuestados). La desviación registrada en la cifra de negocios que alcanza los 2.101 miles de euros se debe a la obtención de unos ingresos por patrocinios mucho menores a los previstos. En el caso de los ingresos accesorios, en que la desviación es del 100% de lo presupuestado, no existen antecedentes que permitan conocer sobre qué base se calcularon los ingresos que se preveía obtener. En todo caso, parece claro que los presupuestos de ingresos no habían sido confeccionados correctamente.

En cuanto a las pérdidas de explotación y las pérdidas del ejercicio presupuestadas, éstas

son sensiblemente inferiores a las realmente registradas en importe de 1.304.000 € y 1.102.000 €, respectivamente.

Estas desviaciones en las pérdidas obedecen a las desviaciones registradas en los gastos e ingresos de explotación presupuestados y confirman lo inadecuado del presupuesto de explotación que se había elaborado.

El presupuesto de capital parece también incorrectamente formulado, al igual que la liquidación presentada por SEACEX, ya que no concuerda con el cuadro de financiación de la Sociedad, que forma parte de sus cuentas anuales y que figura en el Anexo 3 del presente informe. Entre los errores observados cabe mencionar que las pérdidas del ejercicio presupuestadas aparecen consignadas como origen de recursos cuando, obviamente, son una aplicación de tales recursos. Además, en la liquidación del presupuesto (lo realizado) como variaciones del capital circulante figura un importe negativo de 11.145.000 € cuando debiera figurar un importe de 5.135.000 €; y en concepto de aportaciones de capital del Estado figura un importe cero cuando debía figurar la cifra de 6.010.000 € (no habiendo existido ninguna desviación).

Gastos de publicaciones y descontrol de existencias

Las comprobaciones realizadas sobre el conjunto de los gastos de SEACEX han puesto de manifiesto que la partida cuyo análisis pormenorizado ofrece mayor interés es la que, dentro de los gastos de aprovisionamiento (que alcanzan en el ejercicio de 2002 un volumen de 8.899.000 €, representando un 69,5% del total de los gastos de explotación) corresponde a las compras de mercaderías, con un importe total en el ejercicio de 1.176.000 €. En ella se engloban todos los gastos de edición de los catálogos de las exposiciones celebradas, que incluye los gastos de impresión de fotografía y de colaboraciones de los redactores de los artículos y fichas de las obras catalogadas.

(...) .Por otra parte, el registro que tiene la Sociedad de las publicaciones en existencia y de sus movimientos, no es fiable al no estar al día y faltar una gran parte de los soportes documentales de los movimientos registrados (albaranes o vales de entrada y vales de salida). A la entrega de las publicaciones por parte de las Empresas contratadas para la edición o impresión de los catálogos no se formalizan actas de recepción, en las que se exprese que las publicaciones recibidas son conformes número y calidad con lo contratado y, para la mayor parte de las ediciones fiscalizadas, no se han encontrado ni siquiera los albaranes de entrega.Todo ello obedece, al menos en parte, a que, por regla general, se ordena por la Sociedad a las Empresas contratadas para la impresión de los catálogos que la tirada total se envíe en entregas parciales a varios destinos (dependencias de SEACEX, sede de la exposición, almacén de la Empresa de distribución logística y Empresa con la que está concertada la venta) sin que exista un control por parte de SEACEX de la entrega total de la tirada de forma previa a su distribución a los distintos destinos. Además, de las entregas parciales a los distintos destinos tampoco existen documentos de entrega de la mayor parte de las ediciones comprobadas, con la única excepción de las entregas en las sedes de las exposiciones, en las que parece haber existido un mayor control.

En el Anexo 5 se detallan, para las ediciones de los catálogos particularmente analizadas, los siguientes datos: tirada total, número de unidades vendidas, número de unidades cedidas gratuitamente, número de unidades existentes en stock a 31 de diciembre de 2002, coste unitario contabilizado por SEACEX, valor del stock contabilizado, coste unitario revisado por el Tribunal y valor real del stock y diferencias entre el valor revisado por el Tribunal y el contabilizado.

Los datos analizados ponen de manifiesto que, en general, las ventas de catálogos son una fracción pequeña de la tirada total, inferior al 50% de la tirada en todos los casos salvo en el especial de los catálogos pequeños de la Exposición “De Limoges a Silos”, editada en francés y vendidos en Bruselas, y que los excedentes de las tiradas son muy elevados (son los stocks

existentes, que tienen difícil venta una vez terminadas las exposiciones y acaban siendo regalados); todo lo cual parece indicar que en la mayor parte de los casos las tiradas estaban inadecuadamente calculadas. A la vista del elevado coste unitario de cada catálogo, (entre los 30 y 40 euros para los catálogos de tamaño normal), unas tiradas más ajustadas a su demanda real y a las necesidades de cesiones gratuitas produciría significativos ahorros en los gastos de edición de los catálogos y, en consecuencia, en los gastos totales de explotación de SEACEX, además de generar otros ahorros en gastos de almacenamiento y de envío de los excedentes (SEACEX ha adoptado la costumbre de remitir estos excedentes de forma gratuita y a su cargo a los diferentes museos existentes en el territorio nacional).

Error en las valoraciones de costes, y en el control de existencias

Por otra parte, se han observado errores en la valoración del coste de las diversas ediciones analizadas que, en conjunto, dan lugar a que el valor de las existencias antes de provisiones a 31 de diciembre de 2002 esté infravalorado en un importe de 2.301,46 euros. Aunque la cuantía de estos errores es poco significativa y no tienen apenas efecto en la cuenta de pérdidas y ganancias ya que la Sociedad provisiona la totalidad del saldo de existencias de publicaciones al considerar que los catálogos tienen escasas posibilidades de venta una vez terminadas las exposiciones (en todo caso, un mayor valor de las existencias habría dado lugar a una mayor dotación a las provisiones compensado por una menor variación en las existencias), estos errores también ponen de manifiesto el escaso control de las existencias que realiza SEACEX.

El efecto sobre la cuenta de pérdidas y ganancias de la gestión de las publicaciones inventariables ha sido el siguiente:

En el ejercicio 2002 se cancelaron provisiones por depreciación de las existencias dotadas en el ejercicio de 2001 por importe de 613.000 € y se dotaron nuevas provisiones por depreciación de las existencias por un importe de 349.000 €, produciéndose una variación neta negativa de las provisiones por depreciación de las existencias de 264.000 €.

(...)Del resto de los gastos de aprovisionamiento, los denominados trabajos realizados por otras empresas, registraron un importe de 7.471.000 €, y la partida denominada otros gastos de explotación tuvo un importe de 2.928.000 € en el ejercicio 2002.

Análisis de la actividad contractual

En el Anexo 6 se recoge una muestra representativa de las principales contrataciones efectuadas por la Sociedad en el ejercicio 2002 relacionadas con la organización y celebración de las exposiciones “De Limoges a Silos”, “Guatemala”, “Los Ismos de Ramón Gómez de la Serna”, “Chirino” y “Arte en España”, además de otras contrataciones. En algunos casos se han incluido procesos de contratación iniciados y/o realizados en el ejercicio 2001, en los que al menos parte de la ejecución se ha completado en el ejercicio 2002 (son, en concreto, contratos relacionados con la organización de la exposición “De Limoges a Silos”, que fue objeto de una primera exhibición en Madrid a finales del año 2001).

SEACEX en el ejercicio 2002 no contaba con una normativa ni con unos procedimientos de contratación formalmente aprobados por sus órganos de dirección y formulados por escrito. Por otra parte, al ser una Sociedad mercantil no estaba sometida a la Ley de Contratos de las Administraciones Públicas vigente en ese periodo; únicamente le era aplicable lo dispuesto en la Disposición Adicional Sexta de esa Ley que establecía que “las Sociedades Mercantiles en cuyo capital sea mayoritaria la participación directa o indirecta de las Administraciones Públicas o de sus Organismos Autónomos, o Entidades de derecho público, se ajustarán a los principios de concurrencia y publicidad, salvo que la actividad a realizar sea incompatible con esos principios”.

(Esta disposición adicional ha sido derogada a partir de 2004).

Por Acuerdo del Consejo de Administración de 19 de diciembre de 2001, se apoderó al Presidente de la Sociedad atribuyéndole todas las facultades delegables que corresponden al Consejo de Administración para su ejercicio solidario en aquellas actuaciones de cuantía inferior a 10 millones de pesetas (60.101,21 €). El ejercicio de facultades por cuantía superior a 60.101,21 euros se acordó que lo realizaría mancomunadamente con la Secretaría General de la Sociedad; y los contratos de cualquier tipo por un importe superior a 601.012,10 euros habrían de suscribirse mancomunadamente por el Presidente y la Secretaría General con la previa aprobación del Consejo de Administración. Los acuerdos y apoderamientos del Consejo de Administración se elevaron a escritura pública en 21 de enero de 2002 y se inscribieron en el Registro Mercantil con fecha 20 de mayo de 2002.

Se incumplen las condiciones de contratación y la responsabilidad legal de firmar y contratar de los representantes

Ello, no obstante, SEACEX suscribió dos contratos de seguros, uno para la exposición de “Guatemala” por importe de 396.620 euros el 18 de junio de 2002 y otro para la exposición “Los Ismos de Ramón Gómez de la Serna” por importe de 65.576 euros el 27 de junio de 2002, en los que consta únicamente la firma del Presidente de la Sociedad pese a que debieron ser suscritos también por la Secretaría General.Por otra parte, la Sociedad ha realizado diversas contrataciones sin formalizar mediante contrato, utilizando el procedimiento de aceptar por escrito los presupuestos hechos por las Empresas prestadoras de los servicios. Los importes de estas contrataciones mediante la aceptación de presupuestos han sido generalmente inferiores a 60.121,21 euros, aunque en dos casos superaron ampliamente ese importe (la contratación del transporte de la exposición “Arte en España” por importe de 103.281 euros y el montaje de la misma exposición por importe de 73.714 euros). En estas operaciones la aceptación de los presupuestos no ha sido firmada por el Presidente, única persona de la Sociedad que tiene facultades para contratar, solidaria o mancomunadamente; apareciendo las comunicaciones hechas para la aceptación de presupuestos firmadas por diversos directivos de SEACEX de diferentes niveles de la estructura. No obstante, las aceptaciones de presupuestos en muchos casos, aunque no en todos, contaban con una autorización del Presidente emitida a través de un documento interno. Esta práctica de la aceptación de presupuestos por personal de la estructura de SEACEX distinta al Presidente ha sido también profusamente utilizada para realizar modificaciones en los contratos, que han supuesto sustanciales aumentos en sus importes iniciales.Se han examinado los principales procesos de contratación celebrados en el año 2002, así como algunos en los que, aunque la contratación se inició en el año 2001, su ejecución se

completó en el ejercicio 2002. Atendiendo a su cuantía y forma de adjudicación, definiéndolos como de concurso o de procedimiento negociado (o adjudicación directa) cuando por sus características podían asimilarse a estas definiciones de la Ley de Contratos de las Administraciones Públicas, y teniendo en cuenta la existencia o no de publicidad en el proceso de adjudicación, los contratos examinados pueden clasificarse en el modo siguiente:

Ha habido escasa publicidad de los procesos de adjudicación (sólo la tuvieron 2 de los 4 mayores contratos y 6 de los 16 que superaron el importe de los 60.101 euros); y, respecto a las formas de adjudicación, como indicador del nivel de concurrencia existente en las contrataciones, se observa que solo 8 de los 16 contratos mayores se adjudicaron mediante concurso, siendo las restantes adjudicaciones directas, a través de procedimientos negociados (en el Anexo 6 se contiene información detallada de estos contratos y del número de ofertantes o licitadores que concurrieron a cada proceso de adjudicación).

Contratos a dedo, sin concurso, sin condiciones ni control

La práctica seguida por SEACEX en las contrataciones que hemos calificado como concursos ha consistido en la petición de ofertas a varias empresas (en la mayor parte de los casos sin publicidad general), indicándose las condiciones del suministro o servicio mediante un Pliego de Condiciones Particulares para cada contratación y adjudicándose la contratación con la intervención de una denominada Mesa de Contratación. Los Pliegos de Condiciones Particulares, en todos los casos examinados, no estaban firmados ni sellados por la Sociedad, y no existe constancia de que fuesen aprobados por los órganos de contratación de SEACEX. Por otro lado, en algunos casos presentaban notables deficiencias, observándose que los términos y condiciones establecidas en los contratos finales celebrados diferían en aspectos sustanciales de lo establecido en los Pliegos que sirvieron para las licitaciones.Los casos en que se han observado discrepancias más significativas entre los pliegos de condiciones utilizados en la petición de ofertas y las adjudicaciones han sido los contratos de edición de los catálogos de las exposiciones “El País de Quetzal, Guatemala, Maya e Hispana” y “Los Ismos de Don Ramón Gómez de la Serna”. En el primer caso se pidieron ofertas para la edición de 3.000 ejemplares

impresos a 6 colores y se adjudicó la impresión de 4.000 ejemplares a 4 colores. En el segundo caso, en el pliego de condiciones se solicitaban ofertas para la coedición del catálogo (edición a compartir con el adjudicatario), otorgándose la adjudicación de la impresión de 4.000 ejemplares a una empresa, asumiendo SEACEX todos los costes y el total de los ejemplares (sin coedición). En ambos casos, no existe constancia en los expedientes de contratación de que los cambios de criterio habidos respecto a las condiciones establecidas en los pliegos de condiciones iniciales fueran comunicados a los restantes licitadores. Al parecer, según manifestaciones de los responsables de SEACEX, se hizo la selección del adjudicatario en base a las ofertas recibidas respecto a las condiciones iniciales establecidas en el pliego facilitado a los licitantes y, posteriormente, se negoció el cambio de condiciones con el adjudicatario seleccionado.

La Mesa de Contratación que ha intervenido en las contrataciones caracterizadas como concursos ha estado generalmente compuesta por el Director General de SEACEX, la Secretaría General, el Comisario de la Exposición y/o coordinador técnico de ella, el Director Financiero (con voz pero sin voto) y un director del área funcional afectada según la materia a contratar. En algunas actas examinadas de la Mesa de Contratación (es el caso de la adjudicación del contrato de impresión del catálogo de la exposición "Guatemala"), ésta se atribuye la capacidad de adjudicar el contrato a una determinada Empresa, pese a que su función es únicamente la de propuesta ante los órganos de contratación de la Sociedad.

NOTAS

(a) A finales del 2001 se imprimieron 2.000 ejemplares. En 2002 se reimprimieron 350 ejemplares adicionales. Las cifras de ventas y cesiones gratuitas incluyen las realizadas en 2001 con motivo de la exposición inicial celebrada en Madrid.

Si bien en algunas de las adjudicaciones bajo la forma de concurso se han utilizado baremos para valorar los diferentes méritos y cualidades de las ofertas presentadas, estos baremos no se hicieron explícitos en los pliegos de condiciones y, en dos casos (contrato de transporte y montaje de la exposición "Los Ismos de don Ramón Gómez de la Serna"), la adjudicación no recayó en las Empresas que alcanzaron la mayor puntuación (y que además ofrecían mejor precio) sino en la segunda en puntuación total según los cuadros de valoración que constan en los expedientes de esas contrataciones.

Modificaciones producidas en los contratos que no constan firmadas por el Presidente de la Sociedad, se han observado en los siguientes casos:

- Contrato de transporte de la exposición "De Limoges a Silos", incremento del gasto en 33.924 euros.

- Contrato de montaje de la exposición "De Limoges a Silos", incremento del gasto de 36.948

euros.

- Contrato de transporte de la exposición “El país de Quetzal, Guatemala Maya e Hispana”, reducciones de 156.541 euros en las operaciones contratadas y aumentos de 267.209 euros, con un incremento neto total de 110.668 euros sobre el importe inicial contratado.

- Contrato de transporte de la exposición “Los Ismos de Ramón Gómez de la Serna”, incremento adicional de 17.005 euros.

Además, se ha observado que los plazos de presentación de proposiciones en las contrataciones con publicidad son relativamente cortos si se comparan con los 52 días exigidos como mínimo para los contratos de suministro en la Ley de Contratos de las Administraciones Públicas (véanse a este respecto los plazos que figuran en el Anexo 6, que en ningún caso superan los 31 días). Ello parece haberse debido a una cierta falta de planificación que ha dado lugar a que los gestores se viesen obligados a acortar los plazos por estar determinadas las fechas de las exposiciones y no contar con el necesario margen de tiempo. A esta circunstancia parece haberse debido también la profusa utilización del procedimiento negociado y de la adjudicación directa de los contratos.

En algunos casos se ha observado una inadecuada previsión del contenido de la contratación. En la contratación de los catálogos de la Exposición “De Limoges a Silos”, inicialmente se adjudicó la impresión de 2.000 ejemplares del catálogo normal en español por un importe total de 78.794 euros. Posteriormente, se contrató la reimpresión de 350 ejemplares adicionales de ese catálogo (en un contrato de coedición en la misma Empresa adjudicataria del anterior contrato que supuso la reimpresión de 1.000 ejemplares adicionales de los que 650 se los quedó esa Empresa para su venta). Además, se contrató con la misma Empresa la impresión de 2.000 catálogos abreviados en francés y de otros 2.000 ejemplares en español, todo ello en contratos separados. En conjunto la impresión de todos estos catálogos supuso un coste de 115.729 euros (sin IVA). De haberse licitado de forma conjunta y de una sola vez la impresión de todos los catálogos de esa exposición es probable que se hubieran obtenido significativos ahorros en los costes; aparte de que posiblemente fuera innecesaria la contratación de todos los ejemplares adicionales, a la vista de los excedentes existentes a 31 de diciembre de 2002.

Almacenaje, distribución, transporte, imprentas y seguros

Otra actuación que parece poner de manifiesto una inadecuada previsión es la de la contratación de la prestación de un servicio de almacenaje y distribución logística de las publicaciones de SEACEX, realizada en octubre de 2001 y que estaba vigente en el ejercicio 2002, en el que supuso un gasto para la Sociedad de 70.287 euros. La contratación se realizó mediante la petición de presupuestos a cuatro Empresas, aceptándose el presupuesto de la adjudicataria por la Secretaría General sin que exista un contrato formal firmado por el Presidente. La selección de la empresa se hizo en base a los precios de manipulación, de almacenaje y de transporte y distribución en el territorio nacional (en la península); y, sin embargo, en el ejercicio de 2002, en torno a la mitad de los gastos del servicio se originaron por la distribución y transporte de publicaciones en el extranjero para los que en la licitación no se pidieron ofertas ni existe presupuesto de la Empresa adjudicataria, pese a que los precios facturados por el servicio de distribución de publicaciones en el extranjero son sensiblemente elevados (los envíos de un solo ejemplar de catálogo, peso de 3 Kg., a Guatemala o México han sido facturados a 103,51 euros); apareciendo otras actuaciones que también parecen poner de manifiesto defectos de planificación (por ejemplo, se producen varios envíos parciales al mismo destinatario en fechas próximas). También parece obedecer a una incorrecta previsión o ineficiente gestión el que se encomendase el envío a Moscú de 350 ejemplares del catálogo de la exposición “Arte en España” a la empresa adjudicataria de la impresión del catálogo, facturando esta empresa 3.204,72 euros (sin IVA) por el envío.

Gastos de Personal

Los gastos de personal registrados en el ejercicio 2002 han sido de 1.158.000 euros,

representando un 9% del total de gastos de explotación. La plantilla de la Sociedad a 31 de diciembre de 2002 era de 28 trabajadores habiendo tenido un aumento neto de 11 personas respecto a la existente al inicio del ejercicio que era de 17, resultando una plantilla media durante el año 2002 de 22 trabajadores.

Una parte importante del personal procede de la anterior Sociedad Estatal para la Conmemoración de los Centenarios de Felipe II y Carlos V, S.A., cuyos contratos de carácter temporal se transformaron, en el año 2001 con motivo del cambio de la denominación social a SEACEX, en contratos de duración indefinida. La transformación fue autorizada por la Dirección General de Patrimonio del Estado, órgano que tiene la representación del Estado como accionista único en la Sociedad a quien compete, según los estatutos sociales, aprobar el sistema retributivo que propongan los órganos directivos de la Sociedad.

En el ejercicio de 2001 se estableció por la Sociedad el cuadro de retribuciones vigente en 2002 para todos los cargos y puestos existentes de SEACEX y que figuran en los contratos suscritos con cada uno de los componentes de la plantilla.

Las retribuciones fueron fijadas con carácter individual para cada puesto, sin que estén sometidas a ningún convenio colectivo. No existe constancia de que el cuadro de retribuciones vigente en SEACEX haya sido aprobado por la Dirección General de Patrimonio del Estado, aunque en los archivos de la Sociedad existe un escrito del Subsecretario del Ministerio de Hacienda en el que se aceptaba la propuesta de retribuciones formulada por SEACEX.

Consejo de Administración y Comité Técnico Asesor notablemente desproporcionado para la actividad que realizan.

La Sociedad, por acuerdo de la Junta General de 18 de diciembre de 2002, modificó el artículo 16 de los Estatutos Sociales fijando el número de miembros de su Consejo de Administración en un mínimo de 5 consejeros y un máximo de 19. A lo largo del ejercicio 2002 el número de consejeros existentes había sido de 18 y coincidiendo con el acuerdo se elevó a 19. No parece acorde con el volumen de la actividad de SEACEX que haya un número tan elevado de Consejeros, sobre todo teniendo en cuenta que en los Estatutos está prevista la existencia de un Comité Técnico Asesor y que, además, SEACEX está sometida a las directrices del Consejo de Política Exterior y de la Comisión del Gobierno para Asuntos Culturales.

CONCLUSIONES

1.- Las pérdidas de SEACEX son de carácter permanente ya que su actividad apenas produce ingresos y está dirigida a satisfacer fines de interés general que originan un gasto muy superior al volumen de los rendimientos obtenidos. Por ello, la financiación de las actividades de la Sociedad, en la parte no cubierta por sus ingresos propios, debe ser atendida por el Estado, que lo ha venido haciendo mediante sucesivas ampliaciones del capital de SEACEX en lugar de con subvenciones corrientes consignadas en los Presupuestos Generales.

2.- Si la financiación pública que necesariamente ha de recibir SEACEX en tanto mantenga su actividad actual se produjese a través de subvenciones corrientes con cargo a los Presupuestos Generales del Estado, mejoraría el control de la Entidad tanto por las Cortes como por la Administración y se produciría una más correcta adecuación de las actuaciones de SEACEX a sus posibilidades financieras.

3.- Las desviaciones producidas entre los datos reales de ejecución y los contenidos en los presupuestos de explotación y capital de la Sociedad del ejercicio 2002 ponen de manifiesto que tales presupuestos no fueron adecuadamente formulados. La desviación fue especialmente significativa en los ingresos presupuestados, que fueron muy superiores a los obtenidos.

4.- Las incidencias observadas ponen de manifiesto la existencia de un insuficiente grado de control de los inventarios de publicaciones y catálogos de las exposiciones que realiza SEACEX.

5.- La contratación de la Sociedad ha presentado diversas deficiencias de carácter formal, que se detallan en el texto, y un bajo nivel de publicidad y de concurrencia en los procesos de adjudicación de los contratos.

6.- Con las salvedades mencionadas en el epígrafe II.3, referidas al control y valoración de las existencias, las cuentas anuales del ejercicio 2002 expresan en todos los aspectos significativos la imagen fiel del patrimonio y de la situación financiera de SEACEX a 31 de diciembre de 2002 y de los resultados de sus operaciones durante el ejercicio anual terminado en dicha fecha.

RECOMENDACIONES

Primera.- La financiación que recibe SEACEX de su accionista único, el Estado, para la cobertura de sus gastos ordinarios debería instrumentarse como subvenciones de explotación nominativas a favor de la Sociedad Estatal con cargo a los Presupuestos Generales del Estado.

Segunda.- Los presupuestos de explotación de capital de SEACEX deberían elaborarse a partir de un análisis adecuado de las previsiones para evitar que se produzcan desviaciones respecto a las cifras reales de ejecución tan importantes como las existentes en el periodo analizado.

Tercera.- Sería conveniente que SEACEX mejorase la gestión y el control de sus inventarios de publicaciones.

Cuarta.- Sería conveniente que SEACEX mejorase el nivel de publicidad y concurrencia de las contrataciones que realiza.

JUAN PEDRO QUIÑONERO: SOBRE JOSEP PLA

Suelo huir de las conferencias, los ciclos laudatorios y los actos culturales; pero Juan Pedro Quiñonero, uno de los pocos escritores que jamás defrauda, daba una conferencia sobre Josep Pla, otro de mis grandes amores literarios, y, afortunadamente, no pude resistirme a la tentación...
Hoy, J.P. Quiñonero publica el texto de su conferencia en "Una temporada en el infierno": Josep Pla, la redención de la tierra y la construcción de un hogar.
Insuperable.
De nada. Ya saben que me gusta se útil

LO QUE OPINA LA CARCUNDIA EN ESPAÑA SOBRE LAS MUJERES, AUNQUE NO SEAN MINISTRAS

Hay quien no se esperaba la reacción irritada y despectiva que ha habido contra el nombramiento de mujeres en el Gobierno de Rodríguez Zapatero, pero eso no nos ha extrañado a los que leemos a los máximos ideólogos e intelectuales de la carcundia, que se autodenominan "liberales", en España. Tienen este nivelazo:

"Hace unos días, comiendo con un amigo profesor de Sociología en la Complutense, hablamos como sigue (en resumen, claro, pues la cosa fue más divagatoria).

— No te haces una idea del espíritu pragmático y trepa que predomina entre los alumnos. Como te dé por plantearles cuestiones o explicarles las cosas en plan especulativo, pueden reaccionar hasta con hostilidad. Lo que quieren son conocimientos seguros que les valgan luego para conseguir un empleo. A eso lo enfocan todo. Lo demás les trae al fresco.

— Siempre ha sido así, ¿no?

— Yo creo que en nuestros tiempos había un poco más de generosidad, ¿no? De idealismo.

— Bueno, la mitad de aquellos idealistas pensaban en cómo colocarse en algún partido y hacer carrera explotando lo del antifranquismo.

— A lo mejor nos engaña la memoria… Otra cosa: las chicas, enormemente mejores que los tíos. Si encuentras un ejercicio con mala letra y expresión torpe, ya puedes estar seguro de entrada es que es de un tío. La mayoría son unos mantas.

— Sí, parece que las chicas tienen menos cerebro, pero mejor estructurado.

— Debe de ser eso… Además, ¿cómo va a concentrarse un tío rodeado de tías, la mitad de ellas vestidas como putas?

— Hombre, una expresión casi igual se la oí a Delgado de Codes… Era un buen amigo mío, allá por los años setenta, en el Peceerre…bueno, ya sabes, lo mató la policía hace años, en Lavapiés… Decía: "¿Te fijas en las chicas jóvenes? Visten como putas, y aun más en los barrios obreros. La burguesía les mete eso en la cabeza". Hoy quizá le hubiera contestado: "Visten como quieren, y quieren ir vestidas así. Quizás no puedan remediarlo, o tal vez la publicidad tenga ese efecto". Lo más seguro es que ¿quién sabe?

— Pero, vamos, sin coñas, yo creo que esa diferencia entre chicos y chicas viene de la coeducación. La codeseducación, más bien.

— Sí, yo también lo creo. La enseñanza mixta hace a las chicas algo machunas, sólo tienes que oírlas hablar. Hablan como antes decían que hablaban los camioneros.

— La coeducación es una estupidez desde el momento en que los ritmos de desarrollo mental y emocional de los chicos y las chicas son muy diferentes. Las chicas maduran antes, y los chicos salen especialmente perjudicados, porque además, como no existe una orientación moral, pues terminan medio tarados.

— Sí, los efectos ya los vemos. Es la generación Rocko Alicates, los del botellón y todo eso. Escribí un artículo sobre eso. Los sociatas impusieron esa codeseducación incluso en los colegios religiosos, amenazándoles con que, si no lo hacían, les retiraban las subvenciones. Esta gente siempre ha considerado el dinero público como algo suyo particular, para quedárselo o para chantajear a los demás e imponerles sus recetas.

— Yo creo que habría que promover la enseñanza separada, porque chicos y chicas se diferencian en muchas cosas. No imponerla, pero que cada centro la plantease como prefiriese, sin presiones ni chantajes con el dinero público. La experiencia diría qué es lo que da mejores resultados.

— La derecha, en estas cosas, se ha pasado con armas y bagajes a las chorradas de la izquierda. Habría que vencer muchas resistencias.

— Pues habría que vencerlas.

Miré en torno, en el comedor de profesores. ¿Cuántos, aun estando de acuerdo con nosotros, se atreverían a defenderlo? Cuando tenía veinte años, era muy partidario de la coeducación, como de tantas cosas que ahora me parecen sandeces, e hice una encuesta entre profesores y directores de varios centros, con intención de publicarla en el Faro de Vigo. Entonces la cosa era al revés que ahora: la mayoría de los centros daba enseñanza separada, y pocos mixta. Renuncié a escribir sobre el asunto, porque la gran mayoría estaba en contra de la mixta, o, si estaba a favor, no se atrevía a decirlo, por espíritu gregario. Más o menos como ahora."

El problema no es el autor de la conversación sino la idea que se trasluce de ella.
El autor no merece ser tenido en cuenta y la idea tampoco, esa es la verdad.
Después de todo, el que habla con esta alimaña debe ser de su misma idea. Todo hombre que se precia debe sentir lo mismo que yo solo de pensar que puede mantener una conversación con ella: repulsión.
En estas cosas creo que deberíamos radicalizarnos, insultar y reírnos del machista, burlarnos y negarle la palabra. Yo, por lo menos, en mi entorno lo hago. A nadie se le ocurre decir delante mío una frase que insinúe machismo: Se arriesga que lo mire con burla, agite la mano con desprecio y le niegue cualquier conversación a partir de aquel momento.
Te aseguro que funciona.

Un abrazo.

POR ESTÉTICA

Todos optamos por defender la parcela de nuestra identidad que nos toca en suerte,

comprando aceptación de los demás o prescindiendo de ella para desarrollar nuestras características.
Para no desentonar, no hay nada como exhibir el muestrario de nuestras limitaciones, y aderezar la conversación con una generosa ración de dramas mezquinos, alifafes, quejas, sentimentalismo estandar, y la sabiduría fatalista del refranero, con la textura, el interés, y la temperatura del vómito vital.
Decía Camús que "Siempre existe una filosofía para la falta de valor." El problema es que también existe su correspondiente mística para magnificar la tontería, en nombre de un humanismo que apesta.
Y esa mugre moral ha consagrado la ignorancia frente al aprendizaje; la impostura frente a la autenticidad; la mezquindad vital frende a la rebeldía; la crueldad frente a la fortaleza; y la inanidad frente la integridad. Y los supremos destinatarios de los libros de auto-ayuda arguyen, aferrados a su fealdad, que "hay que respetar a todo el mundo": es el nuevo imperativo categórico del pensamiento hético.
...Mais la beauté, Seigneur, toujours je l'ai servie...
Por estética, ojalá nunca transija con una relación convencional, desprovista de esa autenticidad vesicante que nos modifica. Ojalá nunca transija con el conocimiento que signifique pactar con lo sabido. Ojalá nunca prefiera lo cómodo a lo verdadero, lo suave a lo fuerte, y lo bonito a lo bello...
Y ojalá reviente antes que soportarlo.

DIOS ES BUENO CUANDO ESTAMOS VIVOS...

La maleta nuclear robada es segura si no se manipula.

La única forma de acceder a la cápsula y de que se produzca la irradiación externa sería romper a golpes la caja de metal que la contiene
La empresa dueña de la maleta con material radiactivo robada el martes ha descartado que suponga un riesgo importante para la población. *"Si su manipulación es correcta, no tiene ningún riesgo. Otra cosa es que se le dé un mal uso"*, explicó ayer Víctor Manuel García, gerente de la compañía Instituto de Control, Asistencia, Ensayos y Sondeos S.A. (ICAES), propietaria del material.
"La única forma de acceder a la cápsula y de que se produzca la irradiación externa sería romper a golpes la caja de metal que la contiene. Pero no creo que a nadie se le ocurra hacer algo así", añadió José Manuel Turón, director del laboratorio de ICAES.
Baja radioactividad
El Consejo de Seguridad Nuclear (CSN) explicó que el equipo que contiene en su interior sirve para realizar mediciones de densidad y humedad del terreno, y contiene dos fuentes radiactivas de baja actividad (una de cesio-137 y otra de americio-241/berilio).
Aunque evitan generar una alarma social, las fuentes del CSN insisten en advertir a la persona que localice la maleta o que la tenga en su poder que no la abra ni la manipule, y que avise *"inmediatamente"* al propio Consejo, las autoridades, la Policía o el servicio telefónico de atención de emergencias (112).
Revender el material
García explicó que los materiales de este tipo no tienen ninguna salida en el mercado para su venta porque "dispone de un número de serie perfectamente marcado, controlado por el Consejo de Seguridad Nuclear". Además, explicó que en España existen varios equipos de este tipo y no tienen una utilidad distinta que para la que han sido fabricados, según la agencia Efe.
La sustracción se produjo el martes a mediodía del interior de un vehículo estacionado en el Polígono Industrial Las Nieves, en la localidad madrileña de Móstoles, mientras su conductor comía en un bar cercano. Tras la desaparición, el hombre aseguró que la furgoneta "estaba absolutamente cerrada" y que contaba con los elementos de señalización de productos radiactivos reglamentarios.

Autor: Ayllón -Publicado en Público

Juramos por nuestra conciencia y honor que esta noticia se ha producido en España, y la ha redactado un honesto periodista, recogiendo la deposiciones de los máximas autoridades del Consejo de Seguridad Nuclear, y la ha publicado un periódico nacional.
Y eso después de haber ocultado la fuga radiactiva de la Central Nuclear de Ascó, y haber dejado que varios grupos escolares la visitasen sin esperar a descontaminar el perímetro.
Dios es bueno cuando estamos vivos...

Autor: Pau

¿Qué necesidad hay de tanto material radiactivo?
Mi compañera acaba de recibir tratamiento, ha perdido cabello y sentidos, todo porque no sale a cuenta investigar métodos alternativos. Es más lucrativo el negocio de la radiación, mueve muchos millones. Mientras vamos envenenando el planeta de manera irremediable.
La codicia humana.

Autor: Hannah

Dentro de 10, 15 ó 20 años habrá un incremento de cánceres en esas zonas -o en otras-, que el viento sopla donde quiere, pero nadie se acordará ya ni de la maleta ni de la fuga, y menos aún lo pondrán en relación; seguirán echándole la culpa al tabaco y a Dios sabe qué, y sí, Dios seguirá siendo bueno cuando estamos y estemos vivos.
Un abrazo.
Hannah.

LOS INFORMES DEL TRIBUNAL DE CUENTAS Y EL MINISTERIO DE CULTURA

Cuando éramos pequeños y llovía, nos teníamos que quedar en casa, y llegado ese punto en que nuestra capacidad de idear maldades y tontunas se había descontrolado, y no nos podía mandar a jugar en la calle, mi madre nos ordenaba leer algo.

Cuando los gobiernos se encuentran con un ejemplar de político que estorba e importuna más que una cómoda en un pasillo, al que no pueden poner al raso por algún oscuro motivo, le dan algún cargo en el Ministerio de Cultura. No falla.

El Tribunal de Cuentas emite informes con caracter retroactivo; pero tan retroactivo que permite que los responsables acaben tranquilamente la legislatura haciendo desmanes, y como los tribunales de Justicia actuan con cierta parsimonia, para cuando un juez quiere instruir el sumario, pedir responsabilidades, y todo el rigodón jurídico, nos damos de boca con una sentencia que considera que el delito, si lo hubiere, ha prescrito.

Si es que alguna vez se ha procesado a un responsable del Ministerio de Cultura, diganmelo, por favor, que con esta cabeza mía no logro recordarlo...Por ejemplo, no sé si ya hay alguien en la carcel por el Informe del Tribunal Superior de Cuentas sobre la Biblioteca Nacional del año 2000, —dirigida por Jon Juaristi— que descubrió importantes retrasos en la catalogación de bienes y la "inoperancia" en los controles sobre el material inmovilizado: sólo se encontraban registrados los fondos bibliográficos comprados a partir de 1991, dejando en una nebulosa ignota los anteriores a esa fecha y las donaciones; estando sin catalogación incluso los libros que ingresaban anualmente en la Biblioteca. En algunos casos, desde el momento en que un ejemplar había llegado a los almacenes del centro, y se elaboraba su correspondiente ficha, transcurrieron cuatro años. En total, los bienes sin catalogar se cifraron en torno a los 2,000.000. (dos millones) de ejemplares.

Acaban de hacer público en abril de 2008 el informe del Tribunal de Cuentas referente al año 2004 (con Carmen Calvo como Ministra de Cultura) donde se denuncia,

por ejemplo, la compra de varias piezas falsas [1], por no hablar de la falta de documentación y seguimiento de determinadas subvenciones, como con la Fundación Thyssen-Bornemisza —de cuya colección me consta que son auténticos los marcos con purpurina; pero me gustaría saber si también lo son las firmas de los cuadros o los hizo el mismo que pintó los Juan Gris que Lalo Azcona entregó a la Agencia Tributaria para desgravar. Ya se sabe que existe y ha existido una tolerancia reverencial con las cuentas y los cuentos de ciertas fundaciones de relumbrón, como la Ramón Areces, la SGAE, la Fundación Carolina, etc. cuyo estricta supervisión, teóricamente, es responsabilidad del Patronato de Fundaciones del Ministerio de Cultura.

También se han detectado contrataciones e inversiones fuera de presupuesto, compras sin documentar, y del resultado del inventario parcial de la Biblioteca Nacional que debería haberse hecho público en marzo pasado, seguimos sin ser informados para que la realidad no interfiera con las elecciones.

Total, no pasa nada. Salvo que nos acercamos cada vez más a Zambia.

[1)] ***Compras falsas***

El capítulo más jugoso es el dedicado a las adquisiciones de bienes de interés cultural, que en 2004 ascendieron a 11.067.018,22 euros. Entre las compras, el informe destaca la adquisición de varias piezas falsas adquiridas en una subasta en París en diciembre de 2004. Se trata de un conjunto mobiliario compuesto por una consola, un espejo y dos sillones de madera chapada en plata, adquiridos por un precio total de 49.568 euros, piezas por las que la Junta de Calificación, Valoración y Exportación de Bienes del Patrimonio Histórico Español (JPHE) estaba dispuesta a pagar hasta 180.000 euros. La «ganga» fue enviada, sin previo aviso, al Museo de América, que desconocía la intención de semejante compra, para la que no había sido consultado —algo que se suele hacer cuando se va a realizar una adquisición—. Sin embargo, lo que parecía un regalo se convirtió en una pesadilla pues los expertos del museo cuestionaron inmediatamente las piezas -si hubieran sido auténticas el valor hubiera ascendido a 600.000 euros- y pidieron a Cultura un informe que confirmara su autenticidad.

En lugar de facilitárselo, les exigió por contra que demostraran que eran falsas. Algo que se apresuraron a realizar con un informe remitido a la Dirección General de Bellas Artes y Bienes Culturales (DGBAyBC) el 13 de abril. En el documento los expertos coincidieron en afirmar que las obras eran «sumamente dudosas e indignas de figurar en la colección del Museo de América». La JPHE decide entonces devolver las piezas a la casa de subastas, a la que todavía no había abonado importe alguno. Sin embargo, la DGBAyBC sí tuvo que desembolsar 9.158,92 euros en concepto de transporte (París-Madrid-Amsterdam. La compra arbitraria de piezas sin contar con el apoyo de los expertos no es al parecer aislada, y se da con relativa frecuencia.

Intereses y comisiones

El informe del Tribunal de Cuentas también hace hincapié en los cuantiosos intereses de demora que fueron abonados durante el ejercicio 2004 por el retraso en los pagos a las casas de subastas, como fue el caso de la compra de un díptico consular de marfil para el Museo de Arte Romano a la sala Sotheby´s de Londres. Los intereses de demora ascendieron a 73.427,31 euros.

Otros casos ilustrativos de la falta de rigor se refieren a la compra de dos obras de Braque, en cuyo expediente no hay ningún informe de valoración de los bienes. «Únicamente en la propuesta de adquisición de la JPHE se indica que el precio ofertado «se considera justo»», señala el Tribunal de Cuentas. Las dos obras se adquirieron por 3.500.000 de euros. También es confusa la información sobre 20 cartas autógrafas de Goya, compradas por el Museo del Prado, y unos trajes de Chanel, Givenchy y McDonald, adquiridos por Cultura para el Museo del Traje por venta directa -tras quedar desierta la subasta-, pero cuya factura «incluye una comisión de la casa de subastas».

IN MEMORIAM DIEGO CATALÁN MENÉNDEZ-PIDAL (1928-2008)

Diego Catalán nunca dejaba adivinar que, desde hacía muchos años, padecía una grave afección cardiaca. Su incansable actividad incluía esta lucha constante contra la estulticia, el miserabilismo, la dejadez y los atropellos que amenazan el archivo del Romancero -que hemos contado en esta bitácora ,- y también su labor como investigador en correspondencia con sus colegas y amigos de todo el mundo, de todas las edades; sus excursiones diarias a pie, de ocho o diez kilómetros, monte a través, como amante de la naturaleza, y también su trabajo como estudioso y autor -acababa de corregir las galeradas de su última obra *"La enigmática carta del Embajador, 28 de mayo / 6 de junio de 1562".* En los últimos tiempos, había descubierto las posibilidades

de internet , y trabajaba en el proyecto de digitalización de sus fondos documentales, y escribía para su bitácora: "Romancero de la Cuesta del Zarzal".
Para colmo, atendía a las sucesivas recuas de burócratas y políticos que lo convocaban, y le pedían proyectos e informes -que no serán capaces de leer- para ponderar por qué diablos hay tanta gente en medio mundo empeñada con él en salvar el Archivo del Romancero -del que era propietario-, depositado en la sede de la Fundación Ramón Menéndez Pidal, y por qué pretendía legarlo como Patrimonio de la Humanidad, cuando sería un negocio multimillonario venderlo a los coleccionistas, a los anticuarios, a las casas de subastas internacionales...
El día 9 de abril de 2008, murió Diego Catalán: sin pedir piedad ni tregua, como los insurrectos épicos que tan bien llegó a conocer.
Sus huestes, los que compartimos con él sus algaradas, sus ideales, su curiosidad intelectual y su endiablado sentido del humor, repartidos en varios países, tenemos el capricho de continuar con la batalla.
Seguiremos en defensa del Olivar de Chamartín y de su legado, contra los tenderos, los paniaguados, los peseteros, los pobres de espíritu, los tontiastutos, los corruptos, los amigos del escalafón y del sillón, contra la especulación y los especuladores, los sicarios, los recaderos infatuados, los siervos de la mafia cultural, política y económica, y contra los que se aferran a su miedo, a su ego, y a sus insidias, incapaces de vivir y razonar como hombres dignos.
Diego: va por ti, amigo.

Amigos del Olivar de Chamartín: publicado en su bitácora "En defensa del Olivar de Chamartín"

Autor: Antonio

Definitivamente no entiendo la postura del ínclito Jon Juaristi en su panegírico y su dardo a Diego Catalán en su firma de ABC. Bajo el título, pretenciosamente equívoco, de 'Catalán', comenta: 'No sé cómo contarían hoy su experiencia mis compañeros de aquel grupo de estudiantes y jóvenes profesores que Diego convocó durante los primeros ochenta a una tarea que parecía piadosa aunque absurda, a una arqueología de las mentalidades". El comentario no tiene desperdicio en su valoración, como el poder 'demiúrgico' que atribuye a Diego en el sentido de que él conocía las claves de no se

sabe qué: "Y, con todo, Diego conseguía arrastrarnos, lejos de las ciudades, hacia los estratos arcaicos de una literatura oral que ya resultaba incomprensible a sus propios transmisores, pero de la que él poseía las claves".
En lo que sí acierta es en en señalar el profundo desprecio de Diego a las estrategias de poder, estrategias que tan bien ha sabido 'aprovechar' el pensador vasco.

Autor: Gatopardo a Antonio

No le extrañe a usted, Antonio, que a Jon Juaristi le pareciera tan incomprensible la ciencia filológica como la honradez de Diego Catalán, vista la trayectoria intelectual, profesional, política y religiosa de don Jon saltando en pos del euro cual cabra de zíngaro. Y trepando, trepando, el profundo pensador del bucle melancólico hasta se recortó la bocamanga del pito* para convertirse al sionismo, en un alarde de fino conocimiento de la estrategia del poder.

CASA CON DOS PUERTAS MALA ES DE GUARDAR: ÚLTIMAS NOTICIAS

"La falsificación no dice nada de la época de la que simula proceder, pero puede enseñar mucho del momento en que fue ideada." **Mercedes García-Arenal**

La Fundación Olivar de Castillejo ha presentado alegaciones al Ayuntamiento de Madrid oponiéndose a la declaración del Olivar de Chamartín como enclave histórico y conjunto cultural merecedor de máxima protección.
Estas alegaciones, que podrían resumirse en "*no nos fastidien el negocio*", tienen unas razones económicas de peso:
La Fundación Olivar de Castillejo ha estado y está alquilando su sede a entidades, sociedades y negocios de diverso pelaje y condición. El beneficio económico de tales negocios está aún por demostrar que se haya empleado en las actividades que debería desarrollar la fundación. Ni el Patronato de Fundaciones, ni el Ministerio de Hacienda han ejercido hasta ahora ningún control sobre sobre estos alquileres, como poco, *"irregulares".* Veamos tres casos:
1. Arena Producciones, SL : Distribuidora y productora cinematográfica (en el BORME consta como "*otro comercio al por mayor no especificado en grupos 612 al 618*"), que anuncia su domicilio y sede de ventas en **C/ Menéndez Pidal 3bis.** Teléfono 91 3597161, que es uno de los que la Fundación Olivar de Castillejo tiene a su nombre, (como cualquiera puede comprobar consultando las Páginas Blancas de Telefónica), pero situado en **c/Menéndez Pidal 3** (Retengan la diferencia)
2. Sociedad Artística Daniel, SL, organizadores y representantes de eventos musicales, que también anuncian la sede de su negocio en **c/ Menéndez Pidal 3bis**
3. Editorial Siglo XXI, que ha anunciado a bombo y platillo el traslado de su sede comercial a la c/ Menéndez Pidal 3bis . **En este enlace** verán que las nuevas oficinas de esta empresa están en la sede de la Fundación Olivar de Castillejo.
Las irregularidades financieras y operativas de esta Fundación "*sin ánimo de lucro*" son de calibre grueso:
- Están alquilando la sede de la fundación (que es también parte del patrimonio de la misma) a empresas comerciales que sí reportan lucro.
- El uso que la Fundación Olivar de Castillejo ha declarado en el Catastro para esta sede es el de "*residencial*". Es decir que están transgrediendo flagrantemente toda la legislación relativa al uso y fin de bienes inmuebles de la Comunidad de Madrid.
- El dinero que reciben de estos alquileres no se invierte ni en la mejora del jardín, ni en actividades de investigación, ni en publicaciones, ni en becas, ni en nada de lo que sería legítimo según sus estatutos. El listado de sus logros y realizaciones culturales en los últimos años no justifica las cuentas ni ante el inspector de Hacienda más tonto.
- En el caso de las dos primeras empresas (Arena Producciones y Sociedad Artística Daniel) el domicilio no está registrado en ningún organismo legal competente. El que la Fundación Castillejo ofrezca su teléfono para que Arena Producciones haga sus negocios es de difícil explicación cultural, por no decir fiscal.

- Hay un capítulo más grave y es el trampantojo legal que esta Fundación está haciendo con el número 3 (el único legal) y el 3bis (de cosecha propia). Ya advertí **en otro artículo** que el número 3bis, que no consta en el catastro, es la puerta de entrada a una calle privada entre la finca particular de la familia Castillejo y la finca de la

Fundación Areces, sede de la Fundación Ramón Menéndez Pidal. A este número es a donde se remite todo negocio que cae fuera de los límites legales de la actividad de la Fundación Olivar de Castillejo. Por ejemplo, la famosa juerga de la *"gran espicha con sidra agaya y huevos duros"*, para la que se alquilaron los jardines del olivar , las fiestas que allí organizaron BMW y Yahoo han sido convocadas y han tenido entrada por Menendez Pidal 3bis. En cambio, siempre que la Fundación Olivar de Castillejo tiene que firmar algún documento legal u oficial, lo hace poniendo el número 3 como el de su sede social.
La familia Castillejo Claremont, que ha insistido en mostrar su anglofilia y su ascendencia británica, efectivamente, tiene individuos tan inútiles e incompetentes como los zánganos de Wodehouse, pero sin gracia. Sin embargo, esta afición a la triquiñuela, al engaño con dolo y a correr mojones y lindes, se incardina más en la rancia tradición de la tontiastucia manchega que también corre por su sangre.
A la Junta de Distrito de Chamartín llegó una petición de la Fundación Ramón Menéndez Pidal para que esa calle privada recibiera el solemne nombre de "*Junta para Ampliación de Estudios*", en homenaje a los hombres que protagonizaron uno de los proyectos de política cultural más ambiciosos y válidos de nuestra historia. No creo que sean conscientes del avispero que han levantado.
Al haberse parado el aberrante proyecto del chiringuito Thai Gardens, la Fundación Olivar de Castillejo ha estado moviéndose en círculos liberales y del PSOE para impedir cualquier protección al olivar y para buscar una solución que facilite la venta de estos terrenos. Sabemos que los buenos oficios de La Residencia de Estudiantes, institución que es el Monte de Piedad de los liberales arruinados, han logrado que la Editorial Siglo XXI haya alquilado la casa de la fundación Castillejo. Esta editorial tiene como accionista mayoritario a la familia Garcia-Arenal, otro caso "*tristísimo*" de liberales represaliados por el franquismo, que se tuvieron que resignar a hacerse una gran fortuna construyendo obras publicas durante la dictadura. Observaremos con interés cómo y con quién han pactado los García-Arenal para apoderarse de esta finca.
La oposición de la Fundación Olivar de Castillejo a ´que se proteja como bien cultural e histórico el Olivar de Chamartin es la firma que rubrica el retrato de una fundación fraudulenta que nació para eludir pagos fiscales. Los herederos de José Castillejo bien pueden llevar en su blasón aquella frase de un personaje de Ivy Compton Burnett: *"Es una suerte que no tenga que ganarme el pan para vivir, ya que soy el ser más inútil que se pueda imaginar para este cometido"* (Una herencia y su historia)
Sin embargo, no se nos ocurre que frase literaria aplicar a las instituciones que deberían supervisar las cuentas y los cuentos que se solapan al amparo de la Ley de Fundaciones, y que dejan a otros la labor de descubrirlas sin que se molesten en tomar nota.

El espía que surgió del frío, publicado en Gatopardo (14, 06-2006)

Antecedentes de la extraña Fundación Olivar de Castillejo:
Las amistades peligrosas I
Las amistades peligrosas II: una extraña fundación

Últimas noticias: Pleno Ordinario del Ayuntamiento de Madrid del 31 de marzo de 2008.
Aprobada la modificación puntual del Plan General de Ordenación Urbana de Madrid relativo a la catalogación de los edificios situados en la finca "Olivar de Chamartín" calle Menéndez Pidal números 3B, 3C y 5, (*sic*) como equipamientos privados culturales –salvo la residencia de la familia Castillejo-Claremont–, dotándose con protección integral a la sede de la Fundación Ramón Menéndez Pidal, y al jardín, como Bienes de interés cultural, con estimación de las alegaciones presentadas en el trámite de información pública. Sometida a votación la precedente propuesta, queda aprobada por 49 votos a

favor de los Concejales de los Grupos Municipales del Partido Popular (34) y Socialista (15) y 5 votos en contra de los Concejales del Grupo Municipal de Izquierda Unida. *(¡!)*

DON CARLOS FERRÁNDIZ ARAUJO: VOCABULARIO MÉDICO POPULAR

Una madre angustiada acude al pediatra porque su hijo *"tiene un granuferio por tó el cuerpo".* Afortunadamente, una simple inspección ocular desvela el significado de la expresión: el crío tiene una erupción cutánea. Pero a veces no es tan fácil. El traumatólogo Carlos Ferrándiz está a punto de reeditar una recopilación de términos médicos usados por la gente sencilla y recogidos, sobre todo, en el campo de Cartagena. Si un paciente confiesa, cuando el doctor le pregunta si ha sufrido alguna intervención quirúrgica, que *"le han recortao la bocamanga del pito",* no habrá más remedio que sospechar que le han operado de fimosis.
- *"Doctor, me duele mucho la molondra. Estoy abambao y estragao. Tengo los gonces enrobinaos y el obedao rojo como un tomate. No me entra ni un caldito, me voy de hilo y he descomido tres veces".*
A los médicos, que suelen blindar sus diagnósticos con una jerga impenetrable, les llega a veces un enfermo que los descoloca con un lenguaje peculiar y tan hermético como el clínico, el que usan las gentes del campo, las personas sin demasiados estudios y los ancianos, un vocabulario que no suele penetras los muros de las universidades. Entenderse es cuestión de no parapetarse detrás del fonendoscopio y acercarse al paciente, sobre todo porque, en una emergencia, se suele echar mano de las palabras con las que uno se siente seguro para describir los síntomas. Palabras aprendidas en la infancia, oídas en la calle. También con frecuencia, sobre todo cuando hay tiempo para pensar y temor, por tanto, a hacer el ridículo, se cae en la pedantería de imitar los giros médicos, las acepciones técnicas. Es el camino más rápido para adentrarse en el territorio del disparate.
Con este espíritu didáctico escribió el traumatólogo Carlos Ferrándiz Araújo su libro *Medicina popular en Cartagena*, agotado hace años, que está a punto de ser reeditado por la editorial Athenas y que recoge el vocabulario ingenuo, colorido y pleno de imaginación de mucha gente corriente y moliente.
Con el diccionario de Ferrándiz, cualquier doctor puede identificar la dolencia del paciente anterior, preocupado por su dolor de *molondra* (cabeza). La desgana (*abambarse*) y fatiga (*estragos*), la diarrea (*irse de hilo*), las articulaciones agarrotadas (*gonces enrobinaos*), el *obedao rojo* (garganta irritada) y los vómitos (*descomer*) le pondrán en la pista de la enfermedad.
- *"No se preocupe, es gripe".*
Los ejemplos son variadísimos. Un primer indicio de infarto puede ser tener el *pecho acorao* (oprimido). Y en plena taquicardia los *batíos andan desbocaos*. Los diabéticos tienen azúcar porque no les funciona la *asaúra* (páncreas). Además, se deben resignar a pincharse diariamente una o varias *indisiones de ursulina*.
La consulta del especialista en venéreas es una mina. Un marido impotente relataba, ahogado por la vergüenza, que se bajaba la *portichuela* del pantalón (bragueta) y, como no armaba, no podía *clujirle* a la parienta.
Referirse abiertamente a los genitales no suele ser sencillo. La *picasera en el empeine* no debe confundir al especialista, ya que tiene más probabilidades de estar relacionada con un prurito en el nacimiento del vello pubiano que con un adormecimiento del pie.
A los testículos se les trata a veces con una camaradería rayana en el sindicalismo – *los compañeros* – y el cáncer de *próstola* suele hacer estragos a partir de cierta edad.
Uno de los padecimientos más dolorosos es el de la *asiática* (ciática). Aunque un *recalcón en los quijales* (dolor de muelas) o una *culebrilla* en el gemelo (calambre) también se las traen.
Otro de los pozos sin fondo es el aparato digestivo. Después de *guascar*, normalmente *se obra*, aunque no sea uno albañil. Preferiblemente en el inodoro.
Y cuando se sospecha que se tiene fiebre, lo mejor es ponerse el *kilómetro* y salir de dudas.
El cáncer es una palabra tabú, que cuesta pronunciar, incluso a los médicos. No es extraño que la gente del campo le llama *el mal del vivo* y que el tumor, si es maligno,

reverdezca (se reproduzca). Son términos que subliminalmente eluden a la muerte.
Un *gañazo con mala encarnadura* es una herida que no cicatriza bien. En estos casos, no basta con poner un *chapado* (esparadrapo) y sí es conveniente, por precaución, administrar la *indisión del tuétano* que, por cierto, no es *intravenenosa.*
La pediatría también aporta un caudal léxico inagotable. Los recién nacidos se llaman *criaturos*. Cuando se enganchan a la teta da gloria verlos, pero a veces *desahinan* (maman en exceso) y luego se les nota *fascosos y abotijaos*. Otras veces el problema es al revés, están *lambrijos* y las madres le piden al pediatra que les manden vitaminas para que les entre *jalusa* (hambre).
Los ancianos, por su parte, suelen padecer de las *coyunturas*, tanto económicas, cuando les recortan las pensiones, como físicas, cuando les duelen las articulaciones. Los *costalazos* (caídas) son muy peligrosos. Y si el *cascalletazo* es en la *curcusilla* (coxis), ¡ay!, para qué seguir contando…

Curar santiguando, rezando salmos o con escupitajos
Uno de los aspectos más entrañables del libro de Carlos Ferrándiz es el recorrido que hace por la medicina popular, supersticiosa y mágica de los pueblos de la comarca de Cartagena. Ferrándiz cuenta que las abuelas todavía preparan infusiones de granado macho para curar las lombrices de sus nietos. O que las hojas de álamo se utilizaban discretamente como abortivo en épocas más intransigentes que la actual con esta práctica.
En un remedo algo asilvestrado de la medicina homeopática, a los niños enfermos de ictericia o hepatitis todavía se les atiborra de hígado y a los deficientes psíquicos se les dan sesos de cordero.
Para ahuyentar el mal de ojo, las mamás cuelgan del cuello de sus hijos unas bolsitas que contienen, entre otros amuletos que recuerdan a los de los indios, quijadas de lagartija.
Cuando había una epidemia de tifus, al enfermo se le aplicaba un curioso emplasto: un pichón abierto en canal sobre el vientre, bien apretado con una faja a la que se le daban varias vueltas. A medida que el ave se enfriaba, el mal, se suponía, pasaba de la persona al pichón.
Las madres también evitaban que la luz de la luna les diese a sus hijos por temor a que quedasen *alunaos*, es decir, atontados.
Aún se ven *ensalmadores* – rezan salmos -, *santiguadores* y *saludadores* – que escupen saliva sobre el enfermo, que eso significa *saludar* en este contexto. Y como traumatólogo, Ferrándiz se encuentra de tarde en tarde en la consulta a pacientes que vienen del *componedor* de huesos, normalmente un pastor. *"No suelen ser peligrosos, porque se limitan a tratar pequeñas dislocaciones o luxaciones y si ven una fractura no se meten en camisa de once varas"*, asegura Ferrándiz.
Cuando todos los remedios fracasan, el velatorio tradicional sirve a la gente sencilla para afrontar la pérdida – aguardiente, algo de picar y caldo de gallina – en una reminiscencia de los banquetes funerarios romanos.

Vocabulario médico popular

A
Acedera: Hiperacidez gástrica.
Acorar: Oprimir.
Alear: Aumentar de peso los niños.
Aliacán: Ictericia.
Alunao: Meningítico o encefalítico.
Anca: Cadera.
Anzuelo: Orzuelo.

Alferecía: Epilepsia.
Armar: Ereccionar.
Artículos: Testículos.
Asaúra: Páncreas.
Asiática: Ciática.

B

Babi: Bata de médico.
Batíos: Pulsaciones.
Bocera: Llaga, afta.
Bollo: Chichón.
Boria: Cataratas.
Bramido de tripas: Retortijón.
Bola del jamón: Cabeza del fémur.
Bufeta: Ampolla.

C

Calóricas: Carótidas.
Canillas: Tendón de Aquiles.
Caña: Pierna.
Carámbano: Piojo grande.
Carriles: Glúteos.
Cascalletazo: Golpe.
Cerilla: Cerumen.
Cólico apático: Cólico hepático.
Compañeros: Testículos.
Criaturo: Recién nacido.
Cuajarón: Coágulo de sangre.
Culebrillas: Calambres.
Curcusilla: Coxis.

CH

Chiflar: Inhalar.

D

Descomer: Vomitar.

E

Empeine: Arranque del vello púbico.
Enrobinao: Artrítico.
Esfarate: Aborto.
Esfurriao: Diarreico.
Exceso: Absceso.

F

Faratute: Trastorno.
Fascoso: Dispéptico.

G

Gajo: Absceso.
Galillo: Faringe.
Gañazo: Arañazo.
Girobao: Escoliótico.
Gonce: Articulación.
Granuferia: Erupción.
Guajerro: Esófago.
Guascar: Ventosear.

H

Hernia de Viriato: Hernia de hiato.

I

Intravenenosa: Vía intravenosa.

J

Jalusa: Apetito.
Jelusa: Bazo.

K

Kilómetro: Termómetro.

L

Lambrijo: Canijo.
Lobedao: Laringe.

M

Mal de pezuña: Glosopedia.
Malengue: Achaque.
Melva: Vulva.
Michirones: Dedos de los pies.
Mogollón: Bulto.

N

CARTA A UN JUEZ REBASADO POR EL TRABAJO Y LA FALTA DE RECURSOS EN LOS JUZGADOS

Señoría:
Tenga la decencia de no ser cómplice del poder ejecutivo y legislativo que promulga las leyes sin unos presupuestos y unos medios que puedan garantizar su desarrollo y su ejecución. No siga aceptando unos procedimientos burocráticos que suponen miles de folios redactados sin rigor ni control que no podrá leer, con plazos estrictos que sólo han de cumplir los abogados y los reos, y no la Administración de Justicia, que resuelve al cabo de años; con investigaciones previas que llevan a cabo policías que añoran los viejos métodos coercitivos para obtener confesiones, que no saben o no se molestan en buscar pruebas, y que acaban saboteando la democracia**.
Niéguese a silenciar la impostura de esas oposiciones que le exigen memorizar y ser capaz de repetir como un loro cualquiera de los 360 temas que entran en el examen, mientras se ignora si los opositores tienen la capacidad de interrelacionar los datos, los conocimientos y los hechos, si su inteligencia va más allá de una memoria hipertrófica y especializada, sin que se exija un dictamen sobre su salud e idoneidad psíquica y caracterial para el cargo que ha de desempeñar.
Reconozca que se ha tenido que resignar a dictar y redactar sentencias tomando en

cuenta una ínfima parte del sumario, y de sus rápidos apuntes, fruto de sus embotadas apreciaciones durante los juicios, por lo que sus dictámenes están argumentados con un puñado de ocurrencias subjetivas adobadas con jurisprudencia que ha leído por encima. Y que, gracias a eso, hay tantas posibilidades de que los inocentes sean condenados como que los culpables estén sueltos.
Dimita, Señoría. Búsquese un trabajo honrado. Y, si no es capaz, curse una baja, y que le den una incapacidad laborar transitoria por depresión, ansiedad, etc., hasta que le den la jubilación anticipada, que nuestro sistema de salud es clasista y no le va a buscar a su señoría las vueltas como si fuera un ciudadano del común. Y si no, después no se queje cuando sea demasiado clamorosa su ineficiencia y su ineptitud, y no pretenda que lo absolvamos.

**** Las garantías constitucionales que impidieron en su día que la policía y la Guardia Civil actuaran en los interrogatorios mediante torturas, sin límite de tiempo, privando al detenido de los más elementales derechos humanos, no obtuvo una buena acogida entre los funcionarios, acostumbrados a extraer las confesiones a golpes. Exigirles un trabajo de investigación que les permita obtener pruebas que no sean meramente circunstanciales, pudiendo obtener una confesión a guantazos, les pareció una ofensa y una arbitrariedad. Y decidieron sabotear la democracia.
Hemos tenido ocasión de observar la irreprimible alegría con la que notifican a los propietarios de inmuebles y comercios robados, a los ciudadanos víctimas de agresiones, que no vale la pena poner denuncia, porque ellos pueden detener a los sospechosos identificados por las víctimas, pero en el Juzgado los dejarán libres inmediatamente y tomarán represalias contra quien los denunció: lo cierto es que las huellas dactilares, sembradas en el marco por donde han accedido los ladrones, la sangre que salpicó el cristal roto, los números de serie que identifican los electrodomésticos y el material informático robado no serán objeto de atención, análisis y estudio por parte de los investigadores, salvo en las películas, porque de lo que se trata es de crear la sensación de que estamos indefensos, de que la Ley ofrece más garantías y derechos a los delincuentes que a las víctimas, y al cabo de los años tenemos una ciudadanía que cree que este sistema de garantías procesales deja campar libremente a los criminales por culpa de unos jueces absolutamente venales, en una democracia que no vela por nuestra seguridad.
El siguiente paso lógico de los ciudadanos bien pensantes es reivindicar los derechos ilimitados para los policías y no para los detenidos.**

PUEBLA : PRESENTACIÓN DEL LIBRO DE LYDIA CACHO

Cientos de poblanos acudieron al zócalo de la ciudad para presenciar la presentación del libro *Memorias de una infamia*, de la escritora Lydia Cacho Ribeiro,

"Una de las diferencias entre Mario Marín, sus cómplices; y quienes estamos aquí y en todo el país rebelándonos contra la violencia y la corrupción, está en que ellos defienden su pequeño y pasajero poder y nosotros defendemos la libertad de un país en el que nuestros hijos puedan crecer felices", inició su discurso la periodista Lydia Cacho Ribeiro, durante la presentación en Puebla del libro *"Memorias de una infamia"*, editado por la casa Grijalvo.
Resguardada por al menos 30 mujeres que portaban playeras negras con la leyenda: *"No más pederastas, no mas corrupción, no más impunidad"*, la periodista que en el 2005 pasó a la historia por las violaciones a sus derechos que presuntamente ejercieron en comparsa el gobernador de Puebla, el empresario Kamel Nacif y otros funcionarios públicos; se dirigió a las cientos de personas que acudieron al zócalo poblano para presenciar la presentación de este nuevo libro, con una actitud diferente, según lo explicó ella misma.
"Hoy regreso a Puebla y por primera vez lo hago sin miedo, sin escoltas y sin autos blindados (…) porque aunque el gobernador [Mario Marín] *retire nuestros carteles y espectaculares, no puede retirar nuestra voz"*, comentó entre las porras y gritos de apoyo de los asistentes.
En su mensaje expresó a los poblanos que el asunto no hubiera trascendido si se tratara solamente de la violación a los derechos de una periodista; pero debido a que implica un fenómeno que va más allá, ha hecho tanta mella en la ciudadanía, originando el despertar de mucha gente.
"Los que estamos aquí y seguramente muchos de ustedes soñamos con un país en el que 16 mil niñas al año no sean compradas y vendidas por los tratantes de personas, donde las y los periodistas no tengan que jugarse la vida y el sustento por hacer un trabajo digno", indicó.
Señaló que cuando se revelaron las grabaciones, en febrero de 2006, entre el llamado *"Gober Precioso"* y Kamel Nacif, entendió que la batalla no sería contra *"un pequeño tirano poblano"*, sino contra todo un sistema político y judicial corrompido.
Recordó que cuando Mario Marín tomó protesta como gobernador, en su discurso advirtió a los periodistas y reporteros que no podrían hacer lo que *"les diera la gana"*, por ello dijo que ésta también es una batalla para defender la libertad de expresión, agradeciendo al mismo tiempo, el apoyo de los pocos periodistas que no aceptaron las migajas del poder, ejerciendo la prensa libre.
"Dicen por ahí que hoy venimos a conspirar y efectivamente a eso vinimos. Porque conspirar significa respirar el mismo aliento, todas y todos unidos (…) de igual forma les digo a los que hoy tienen un pequeño y momentáneo poder, la conspiración por la paz y justicia apenas comienza".
Durante el acto, estuvieron presentes también Carmen Aristegui, Sanjuana Martínez, María Eugenia Sánchez Díaz de Rivera, Lorenzo Córdova y Julio Glockner.
En su intervención María Eugenia Sánchez Díaz de Rivera manifestó que a pesar de la exoneración del gobernador Mario Marín Torres, el pueblo de México no debe ni puede olvidar este atropello porque *"un pueblo que olvida sus crímenes, está condenado a repetirlos".*
Por su parte, Sanjuana Martínez opinó que los habitantes de Puebla no merecen un gobernador como Mario Marín Torres, pues dijo que la tortura hacia Lydia Cacho no es más que el refrendo del poder de Kamel Nacif, quien supo manejar a un gobernador y a decenas de funcionarios para su beneficio.
Julio Glockner, antropólogo e investigador de la BUAP, propuso durante el acto la concentración de firmas por parte de alumnos y maestros de la máxima casa de estudios poblana, para entregarle a Lydia Cacho el *"doctorado honoris causa"*, por ser un luchadora constante en la defensa de los derechos humanos, esto al tiempo de comparar a la periodista con Virgilio y otros personajes de la literatura mundial.

Lorenzo Córdova por el contrario se centró en los aspectos legales que originaron la absolución de Mario Marín Torres por la Suprema Corte de Justicia de la Nación, señalando que un punto clave fue cuando se decidió eliminar del caso, el tema de las redes de pederastia y pornografía infantil, originando con ello que algunos ministros que votarían en contra de Marín Torres, lo hicieran a su favor.
Por último, Carmen Aristegui quien fue la más aclamada de la tarde habló del prólogo que escribió para este libro, señalando que se trata de un relato de la tortura psicológica y física que la periodista sufrió desde su traslado de Cancún a Puebla y durante su estancia en el Cereso de San Miguel.
De igual forma, denunció que México se está convirtiendo en una nueva Tailandia, donde la compra-venta y exportación de menores a otros países sucede con una frecuencia horrorizante.
Indicó que las conversaciones difundidas por varios medios de comunicación, entre ellos La Jornada y el Universal, fueron una carta de autenticidad de lo que Lydia estaba relatando en su libro *"Los demonios del Edén".*

Soledad Mejía Peniche

"MEMORIAS DE UNA INFAMIA", en El Siglo de Durango

PUEBLA.- Veintiocho meses tuvieron que pasar para que la periodista Lydia Cacho Rivero regresará a esta capital, donde fue detenida en diciembre de 2005 por "denunciar" una red de pederastas internacional en México que involucra a empresarios y prominentes políticos.
[Puebla con Lydia Cacho y contra la infamia]
Son más de 840 días en los que la escritora vivió entre el miedo por las amenazas de muerte que pesan sobre su persona; dos intentos de asesinato y de sostener una batalla legal contra el poder político que la llevó hasta la Suprema Corte de Justicia de la Nación (SCJN), donde desecharon su caso.
DIFERENTE
Este sábado fue diferente de aquel triste día, dijo Cacho Ribeiro, al presentar su libro *"Memorias de una Infamia"*, en el zócalo de esta capital.-*"Ahora vengo sin miedo, sin escolta, ni camionetas blindadas"*, sentenció al comenzar la presentación, mientras porras y aplausos se dejaban escuchar en favor de la también defensora de derechos humanos.
-*"Dicen por ahí que venimos a conspirar y sí efectivamente conspirar significa respirar el mismo aire… La conspiración por la paz y la justicia apenas comienza. Que lo sepa* (Mario) Marín *y la Suprema Corte de Justicia de la Nación ¡No nos vamos a detener!"*,

lanzó emocionada ante miles de poblanos que se reunieron en la plaza pública pese al intento del gobierno estatal para boicotear la presentación.
APOYO
"¡No estas sola! ¡No estas sola!", corearon cientos de mujeres, adolescentes, niños, ancianos y hombres a una sola voz que retumbaba hasta los muros del Palacio de Gobierno.
Con serenidad, pero con una mirada que contenía lágrimas, su voz se entrecortaba al relatar su historia que calificó de impunidad; llena góbers preciosos, de *"Manlio Fabio Beltrones",* de *"Kamels"*; por la que le dieron su *"coscorrón"* y por la que pensó que perdería la vida.
De manera súbita, Lydia Cacho se levantó del estrado y alzó su voz para retar los judiciales poblanos que la amenazaron. *"Les van a hacer faltan balas"*, pues con ella estaban decenas de "damas de negro" que hicieron una valla humana para protegerla.
PRESENTACIÓN
Junto a ella estuvieron las periodistas Carmen Aristegui y Sanjuana Martínez, que desde sus trincheras compartieron su misma batalla, así como el politólogo y investigador de la UNAM, Lorenzo Córdova, entre otras personas.
La ex conductora de radio no pudo ocultar su emoción y en varias ocasiones se sonrojó ante las porras y ¡vivas! para su persona.
Aristegui acusó que desde el poder se protege a quienes han vulnerado los derechos de Cacho, así como las víctimas de pederastia y cuestionó "¿Quién protege a los pederastas y quien protege a sus protectores?"
Recordó que durante su campaña presidencial, Felipe Calderón prometió un juicio político para Marín y *"hoy hasta hace fotografía con él"* como si un halo de impunidad lo protegiera.

EL OCCIDENTAL. Comunidad y cultura
Periodista mexicana presenta libro en la ciudad donde estuvo detenida
Organización Editorial Mexicana, 6 de abril de 2008. EFE
Puebla,
La periodista Lydia Cacho presentó hoy su libro *"Memorias de una infamia"* ante unas mil personas en el estado mexicano de Puebla, a cuyas autoridades acusó de haber urdido un plan para encarcelarla y vejarla.
Cacho regresó hoy por primera vez en 28 meses a la ciudad de Puebla, capital del estado del mismo nombre, a donde fue llevada en a finales de 2005 ilegalmente por policías para que enfrentara un juicio de difamación por una demanda presentada por el empresario Kamel Nacif, amigo del gobernador poblano, Mario Marín.
En su primer libro *"Los demonios del Edén"*, la periodista reveló una red de pederastas en el Caribe mexicano comandada por el empresario Jean Succar Kuri, actualmente preso en una cárcel del centro turístico de Cancún, y amigo de Nacif.
La periodista acudió hoy a la presentación del libro *"Memorias de una infamia"* acompañada por un grupo de ciudadanos que la protegió debido a que, dijo, siguen latentes las amenazas de los policías que la detuvieron en Cancún y la llevaron a Puebla, en un trayecto de 1.800 kilómetros.
Pero dijo que no tuvo miedo de regresar a Puebla y que lo hizo para que el gobernador de ese estado, Mario Marín, se dé cuenta de que su caso no está cerrado, pues lo analizan instancias internacionales.
En un controvertido fallo en diciembre pasado, la Suprema Corte de Justicia determinó que no se violaron los derechos humanos de Lydia Cacho durante su detención, pese a que expusieron varias pruebas, entre ellas llamadas telefónicas entre Marín y Nacif donde se escucha a ambos personajes ponerse de acuerdo para encarcelar y vejar a la periodista.
Lydia Cacho afirmó que visitaba Puebla acompañada de amigos que la apoyaron en los

momentos difíciles y agradeció a los periodistas que han tratado su caso, algunos de ellos, dijo, han perdido su trabajo por abordar el tema.
Días antes de la presentación del libro en Puebla las autoridades retiraron del techo de un edificio una valla publicitaria en la que se anunciaba el evento.
También, según Cacho, las autoridades de Puebla presionaron a los medios y amenazaron a empleados públicos para que no asistieran este sábado a la presentación de su libro.
"Es difícil entender como Lydia mantiene en todo momento la serenidad, de alguna manera recoge los pedazos y los coloca siempre en su lugar, mantiene el temple, la armonía y hasta la sonrisa, es una mujer extraordinaria", finalizó Carmen Aristegui entre gritos y aplausos.

Me congratulo por la exitosa presentación de libro, que fue mucho más que eso. Fue una muesta contundente de desprecio contra una de las expresiones criminaes más condenables, contra da impunidad y en favor de la libertad de expresión.

Solo hizo falta que se hiciera justicia en este caso para que esa presentación hubiera podido ser lo que muchísimos hubieramos querido, una celebración.

Autor: Reaparece el "Góber precioso"

Plaza Pública

Miguel Ángel Granados Chapa
Mañana sábado 5 de abril al mediodía será presentado en el Zócalo de la ciudad de Puebla el libro de Lydia Cacho "Memorias de una infamia".

Participarán además de la autora, la prologuista de la obra Carmen Aristegui, el jurista Lorenzo Córdova y los investigadores locales María Eugenia Sánchez Díaz de Rivera y Julio Glockner.

Es seguro que el amplio espacio de esa plaza sea ocupado por una multitud, a pesar de los esfuerzos del gobierno local por que el hecho pase inadvertido. Como se sabe, la infamia a que se refiere el título de ese libro es la urdida por Kamel Nacif y Mario Marín para silenciar a la periodista que ha narrado su hazaña y que vuelve a Puebla en condiciones por entero distintas de las que contra su voluntad la condujeron allá el 16 de diciembre de 2005.

Por considerarlo un desafío inadmisible a su autoridad, el personal del “góber precioso” se ha esforzado por impedir la difusión del acto. Se ha conocido que una carta a los directores de medios les sugiere evitar que la presentación sea atendida y publicada la información que resulte, haciéndoles ver que “es un caso superado y que están haciéndole daño al gobierno y a la sociedad al darme espacio”, dijo la propia Lydia Cacho, a quien privadamente se comunicó esta maniobra.

También se le informó que la Secretaría de Gobernación local amedrenta al personal público para que desista de acudir a la reunión sabatina con la amenaza de que la multitud será filmada “y si se encuentra que algún empleado asistió, perderá su trabajo”, añadió la autora. De modo más directo ella se ha enterado del resultado de las presiones gubernamentales en su contra, pues fueron canceladas entrevistas convenidas con varios medios de comunicación, que como ocurre en general con la prensa de las entidades son especialmente sensibles a los pedidos oficiales, por el peso que la publicidad gubernamental tiene en sus finanzas.

De modo más abierto aún, la empresa local que había recibido de “Random House Mondadori” (la editorial que lanza al mercado la obra en su sello Grijalbo) el encargo de anunciar el acto de mañana mediante un espectacular en la calle Once sur, lo quitó mucho antes de que feneciera el plazo contratado. Se utilizó para justificar la acción un argumento especioso: que la autoridad municipal había demandado el retiro del anuncio porque su estructura ponía en riesgo a los transeúntes. Pero ya está en el lugar del aviso desplazado otro espectacular con iguales características.

Le viene muy mal al “góber precioso” la presentación del libro que narra su infamia, la que le valió el agradecimiento de Nacif, y la consagración ante la historia del mote paradójico que le endilgó en su melosa adulación. Es que resiente, por más que haya tratado de eludir sus efectos, la detención de Rubén Gil, alcalde de Izúcar de Matamoros por decisión de Marín, que ayer fue llevado ante un juez federal de Nueva York, acusado de conspiración para distribuir drogas.

Gil, nacido en Chiautla hace cerca de medio siglo, emigró siendo muchacho a los Estados Unidos y pasó de Nueva York, su destino original, a Los Ángeles, donde construyó un importante núcleo de negocios, centrados en una empresa de mudanzas, “Gil Moving & Storage”, en sociedad con su hermano Eduardo, y que ahora figura en el expediente ministerial como el instrumento para “el tráfico y entrega de cocaína durante el curso de varios años”, de que se le acusa. Ya en 2004 agentes de la DEA descubrieron un cargamento de 150 kilogramos de aquel alcaloide en un camión de la empresa, que sustituyó a “Mercury Moves”, la primera operación de mudanzas del ahora alcalde en apuros.

Además de ganar mucho dinero en sus negocios, Rubén Gil descubrió que le convenía hacer vida comunitaria, de la que a su vez derivaban nexos políticos susceptibles de incrementar sus ganancias. Llegó a presidir la Asociación binacional Juárez-Lincoln y favoreció con aportaciones a políticos republicanos.

Cuando planeaba su retorno a México en 2004, por medio de Carlos Olamendi (que hoy es funcionario de Marín con el suntuoso título de Alto comisionado para el migrante poblano) entró en contacto con el candidato del PRI a la gubernatura y financió la campaña que Marín hizo en las comunidades poblanas de los Estados Unidos. Muy pronto el “góber precioso” estuvo en situación de devolver el favor. A pesar de que era un recién llegado a Izúcar de Matamoros, contendió por la candidatura priista a la

alcaldía.

Aspiraba a lo mismo un médico radicado en ese municipio desde hace 26 años, Carlos Gordillo, que figuró en el primer lugar en las encuestas. Pero le faltó el voto de Marín, que hizo presidente municipal a su amigo, cargo del que tomó posesión apenas al comenzar este año. Ya había mostrado de otros modos su influencia en la política. Aunque se halla todavía en construcción, en un edificio de su propiedad se encuentran una agencia del Ministerio Público Federal y la oficina de gestión del diputado Jorge Estefan Chidiac.

El 23 de marzo Gil fue detenido en Los Ángeles. Su familia y el gobierno negaron que hubiera sido capturado, y fingieron que se había recluido en un hospital para atender su quebrantada salud. Oficialmente, como si fuera asunto propio, la Secretaría local de Gobernación formuló esa explicación, que pronto reveló su falsedad, Llevado ante la justicia en Nueva York, podría ser enjuiciado si los cargos están fundados. Si lo están, se explicará la desmesura de su fortuna, que corresponde a un hombre de éxito, pero va más allá.— México, D.F.

IMPOSTURAS

A casi nadie parece extrañarle que Cristina Kirchner , presidenta de Argentina, diga que es licenciada en Derecho y abogada sin haber terminado la carrera ; que Juan Carlos Blumberg, ex candidato a gobernador de la Provincia de Buenos Aires afirmara haber obtenido el título de ingeniero en la inexistente Universidad de Röttingen de Alemania; que Rachida Dati , ministra de Justicia francesa, haya aportado un diploma falso de doctorado (MBA) para entrar en la Escuela Nacional de la Magistratura; que el

Dr. Enrique Rojas Montes, el famoso psiquiatra y catedrático de la Universidad Complutense de Madrid, no sólo no tenga ni haya obtenido jamás esa cátedra, es que ni siquiera es psiquiatra; que Jorge Semprún fuera *Kamerad Polizei*, "Kapo" en Buchenwald, y que por lo tanto toda su autobiografía como víctima sea la de los hombres que ayudó a aniquilar como auxiliar de las SS, porque tras el pacto Ribbentrop-Mólotov en agosto de 1939, los militantes comunistas se convirtieron en aliados diligentes del regimen nazi; que el fallecido Presidente Mitterrand no fuera miembro de la Resistencia francesa, como consta en su biografía oficial, sino Secretario de Estado encargado de los prisioneros de guerra en el Gobierno de Vichy del Mariscal Petain, y condecorado por sus eficiencia y lealtad con la máxima distinción del régimen aliado de los nazis, la "*Ordre de la Francisque*"*****; que Bernat Soria, ministro español de sanidad, haya inflado su curriculum con condecoraciones, experiencia laboral y títulos falsos; que José Joaquín Brunner , ex Ministro Secretario General de Gobierno con Eduardo Frei, no tenga ningún título universitario ni el doctorado que se adjudica en su curriculum; que Luis Roldán, ex director general de la Guardia Civil no tuviera ni licenciatura en Empresariales, ni el máster en Economía; que el ex alcalde de Villajoyosa, José Miguel Llorca , haya ejercido como médico sin tener la titulación; que Cesar Vidal tenga el doctorado en Teología y en Filosofía en una institución religiosa que no los expende , que sea autor del libro *"Checas de Madrid. Las cárceles republicanas al descubierto"* calcado de una novela del periodista de ABC Tomás Borrás, que ni siquiera aparece aludida en la bibliografía , que escriba un libro sobre *"La revisión del holocausto"* , que haya merecido un libro de réplica devastadora, y sea autor de una *"Enciclopedia del Quijote"* que pudiera ser el mejor compendio de citas cogidas por el rabo de un profano; o que sean absolutamente falsos el pasado como represaliado por el régimen franquista de Miguel Gila —que nunca fue voluntario en la guerra, no fue fusilado ni se salvó haciéndose el muerto, ni pasó por la cárcel, ni se exilió por razones políticas, sino por una esposa oficial algo tarasca que no aceptaba el adulterio—, y tampoco el de Tierno Galván —que se fabricó también una biografía de luchador y represaliado.

No importa que mientan y falsifiquen, porque quien los descubre y lo cuenta recibe la infamante sospecha de responder a un resentimiento inconfesable. La verdad es una medicina amarga que no suele gustar, porque somos esclavos de nuestro deseo de creer que el triunfo social, económico y político requiere dotes y condiciones excepcionales, porque nos gustan los triunfadores. Y si alguna vez fracasan los atacaremos despiadadamente sin concederles ni el beneficio de la duda.

Los seres humanos somos así.

Gatopardo

*** Una lista de 2.626 condecorados fue reconstruida por la Haute Cour en 1945 (ya que los archivos del Conseil de la francisque habían sido destruidos). La Haute Cour fue creada para juzgar las acusaciones de alta traición de los représentants del Estado (Presidente de la República, ministros, altos cargos, comisarios generales, representantes oficiales y gobernadores oficiales de Francia en las colonias, gobernadores generales, altos funcionarios, etc).**

Una parte de esa recopilación con los nombres de los condecorados fue publicada por el archivista Jérôme (seudonimo de Henry Coston), *L'ordre de la Francisque* (Paris, Publications H.C, 1995, 64 páginas), y ahí da alrededor de dos mil nombres, entre los que está François Mitterrand.

Fecha: 02/04/2008 18:24.

Autor: Pau

Hoy, pensando en este tema, he recordado que de Semprún me habían hablado; ocurre que había olvidado el asunto.
De Miterrand, algunos franceses creen que su historia fue falseada para desprestigiarle.

Recuerda sus célebres nacionalizaciones industriales y bancarias que ocasionaron incertidumbre al gran empresario, y desasosiego al mundo financiero.
La derecha nos vendió dichas nacionalizaciones como un desastre económico, pero lo cierto es que aún hoy muchas grandes empresas francesas se mantienen en manos del Estado y son beneficiosas para el desarrollo tecnológico.

Fecha: 03/04/2008 17:48.

Autor: Gatopardo

Pau: Para tu información, pongo al final del artículo un apéndice sobre la Ordre de la Francisque, traducido del francés, para que veas que no hay misteriosas falsificaciones de gentes ignotas y perversas para perjudicar a Miterrand. Y respecto a su trayectoria, si te interesa mira en la Wikipedia francesa, que cita cientos de fuentes, bibliografía, etc.

y verás que no esto no proviene de sus enemigos, sino de su biografía real.
Y recuerdo que fue el mismo motivo que Kurt Walheim, (ex-Secretario General de la ONU, y presidente de Austria en ese momento) dio para descalificar la información de Handke que lo acusó de haber sido un miembro de las SS, nazi, y criminal de Guerra (en Kosovo, precisamente).
Si puedes, ve el documental, sobre la Francia de Petain y la ocupación alemana, "Le chagrin et la pitié" (te lo puedes descargar del e.mule)
Ramón: También es verdad que muchas veces la verdad sabe disfrazarse con tal arte que no la reconocemos ni teniéndola a un palmo de la nariz, sobre todo si interfieren nuestras emociones y nuestra ideología.

Fecha: 04/04/2008 08:50.

Autor: Gatopardo a Pau

Eso de sus "célebres nacionalizaciones industriales y bancarias" en su gobierno con el PCF en 1972, no fueron menos célebres que sus reprivatizaciones cuando volvió al gobierno a partir de 1988.
Dile a tu amigo francés que se informe bien.

No es un amigo, son varios, uno de ellos es de total confianza, tanta como la que tengo contigo.
Debo decirte que antes de publicar mi segundo comentario consulté con Wikipedia, la española primero y luego la francesa, no fuera caso...
Las reprivatizaciones, que no llegaron al 100% de las acciones de todas las empresas, fueron hechas en 1986 por Chirac en el gobierno de cohabitación. En Francia, la responsabilidad de la política económica recae en el gobierno, no en el presidente.
¿No consiguió, Mitterrand, la evasión de multitud de refugiados y prisioneros en tiempos de Vichí gracias a ser quien era?

También debo decirte que Mitterrand nunca fue de mi agrado. Era un hombre que me caía profundamente antipático, petulante y prepotente; algo que no soporto y que, desde mi punto de vista, demuestra falta de civismo y humanidad.
Ahora bien... ¿No fue el impulsor de los más importantes logros sociales y, paradójicamente para mí, cívicos franceses?

Un abrazo.

Fecha: 04/04/2008 11:26.

Autor: Gatopardo

La "total " confianza que nos tenemos es una percepción subjetiva tuya. No nos conocemos, salvo por lo que escribimos. No es una base sólida para juzgar que somos de fíar. Yo, al menos, necesito el tiempo de comerme un kilo de sal con una persona antes de darle el visto bueno.
Respecto a lo que opinan tus amigos y wikipedia, ya lo he entendido: resulta que antes las nacionalizaciones eran "célebres" logros del Presidente, y cuando se tuvo que reprivatizar fue por culpa del gobierno que presidía.
A mí me da igual que fuera prepotente o antipático. Nunca lo tuve entre mis amistades.
1ª pregunta: No
2ª pregunta: No

Fecha: 04/04/2008 12:11.

Autor: Pau

La confianza tiene muchas variables. Tengo total confianza en mi amigo en lo que respecta a su conocimiento de la antigua izquierda francesa. La que te tengo a ti es la que puedo tener a una persona que sé que nunca traicionará lo que hablemos privadamente, como tampoco publicará mis sentimientos, los que conoce sin necesidad de haberlos participado conmigo; también la de una persona que antes de hablar se asegura hasta tal punto que es prácticamente imposible el error.
Hay otras confianzas que se obtienen, no ya con un kilo de sal sino con muchos otros kilos de sinsabores. Con las risas se obtienen compañeros de diversiones, de charlas amenas. Con los lloros se obtienen los amigos.

Tus dos respuestas son tan precisas como secas.
No y no.
Supongo que tendrás una explicación. No la pido. He ahí mi confianza.
Antes de preguntarte leí en la wikipedia española las leyes que se aprobaron en su primer mandato.
La pregunta está mal planteada, supongo que por el exceso de años de gaullismo.
Igualmente tienes razón, los logros sociales tampoco fueron tan significativos, y lo de la derogación de la pena de muerte lo hubiera hecho cualquiera en los años que corrían.
La cohabitación conlleva muchos sinsabores. Para Mitterrand, el poder era tan atractivo que esos no eran lo suficiente desagradables para despreciarlo.
El presidente debe firmar los decretos de su gobierno.
¿Qué hubiésemos hecho nosotros?
Yo dimitir; el no.

Un abrazo.

EL POEMA QUE EMOCIONÓ A MARIO CONDE

Carlota Martín Conrado publica en Torrevieja Digital quien es el autor del poema que emocionó a Mario Conde , y que recitó en *La Noria* como homenaje a su mujer, Lourdes Arroyo, recientemente fallecida:

Ninguna

Esta puerta se abrió para tu paso.
Este piano tembló con tu canción.
Esta mesa, este espejo y estos cuadros
guardan ecos del eco de tu voz.
Es tan triste vivir entre recuerdos...
Cansa tanto escuchar ese rumor
de la lluvia sutil que llora el tiempo
sobre aquello que quiso el corazón.

No habrá ninguna igual, no habrá ninguna,
ninguna con tu piel ni con tu voz.
Tu piel, magnolia que mojó la luna.
Tu voz, murmullo que entibió el amor.
No habrá ninguna igual, todas murieron
en el momento que dijiste adiós.

Cuando quiero alejarme del pasado,

es inútil... me dice el corazón.
Ese piano, esa mesa y esos cuadros
guardan ecos del eco de tu voz.
En un álbum azul están los versos
que tu ausencia cubrió de soledad.
Es la triste ceniza del recuerdo
nada más que ceniza, nada más...

Homero Manzi

Para escucharlo interpretado por Ángel D'Agostino y Ángel Vargas (audio wax) con música de Raúl Fernández Siro

Otros tangos de Homero Manzi:
Malena

Malena canta el tango como ninguna
y en cada verso pone su corazón.
A yuyo del suburbio su voz perfuma,
Malena tiene pena de bandoneón.
Tal vez allá en la infancia su voz de alondra
tomó ese tono oscuro de callejón,
o acaso aquel romance que sólo nombra
cuando se pone triste con el alcohol.
Malena canta el tango con voz de sombra,
Malena tiene pena de bandoneón.

Tu canción
tiene el frío del último encuentro.
Tu canción
se hace amarga en la sal del recuerdo.
Yo no sé
si tu voz es la flor de una pena,
só1o sé que al rumor de tus tangos, Malena,
te siento más buena,
más buena que yo.

Tus ojos son oscuros como el olvido,
tus labios apretados como el rencor,
tus manos dos palomas que sienten frío,
tus venas tienen sangre de bandoneón.
Tus tangos son criaturas abandonadas
que cruzan sobre el barro del callejón,
cuando todas las puertas están cerradas
y ladran los fantasmas de la canción.
Malena canta el tango con voz quebrada,
Malena tiene pena de bandoneón.

Para escuchar "Malena" cantado por Silvana Gregori (wax)

Música: Lucio Demare
Letra: Homero Manzi
Trio Pascual Mamone

Esperaba que comentaras algo de la entrevista -para mí decepcionante- a Conde. Uno que estuvo en tres cárceles distintas del "sistema" penitenciario español siente que Mario fue un privilegiado, un enchufado y que, al estar aún sometido a vigilancia, no puede -ni sabe, porque no la vivió- hablar de la realidad de las cárceles. Que el entrevistador haya dicho que "maneja con soltura" el lenguaje carcelario por saber decir "pelas, talego y tíos" evidencia la ignorancia y el ocultamiento de todos los medios tradicionales sobre las penitenciarías de este país.
Tanto a mi mujer como a mí nos dio la impresión de que a Conde la cárcel le ha vencido y que se le ha ido la cabeza por tantas experiencias traumáticas en los últimos años.

Fecha: 30/03/2008 03:36.

Autor: juan

Yo también esperaba más de la entrevista. Hasta he visto un poco el síndrome de estocolmo cuando la foto de Felipe González no le sugirió nada malo, y no lo digo con connotación política, lo digo porque hace 20 hubiera saltado en cólera al verlo. Y efectivamente noté una obsesión por el "nada me afectó". Realmente sí lo vi muy afectado, hasta avergonzado por momentos, menos sagaz... algo ido, sin duda...

Fecha: 30/03/2008 04:57.

Autor: Gatopardo

He observado que los que viven experiencias al límite, ya sea un terremoto, un accidente, la prisión, la muerte de un ser querido,etc. suelen ser incapaces de referir sus sentimientos y su experiencia de manera original, y recurren a las frases hechas y entrecortadas del acervo común, y nada como un tango para reflejarlo. En ese sentido Mario Conde es un paradigma.
Respecto a dar una última entrevista a Jordi González en "La Noria"-nada menos-y hacer ese tipo de declaraciones sobre los personajes que propiciaron su caída me pareció muy sagaz, y de sentido común. Decir lo que cree y sabe realmente para divertir al respetable y gastar la pólvora en salvas hubiera sido idiota, teniendo en cuenta que "el que sabe no habla, y el que habla, no sabe" Y la prueba es lo poco que ha escrito don Pablo -por poner un ejemplo- sobre la realidad de los presos FIES y el absoluto

sindiós que es la investigación policial y la administración de justicia en España
El aspecto ido, sus balbuceos inconexos, y su petrificación gestual lo achaco a los antidepresivos, camisa de fuerza química con la que los médicos se empeñan en impedirle a la gente el duelo.

Fecha: 30/03/2008 07:02.

Autor: Rafa

No solo no me decpcionó, sino que me entusiasmó la entrevista. Mucha enjundia, inteligencia y contradicciones en Conde. Humano y buscador. Con sentido común, inquietudes y penas. Su cerebro, físico, dinero etc. han prococado siempre muche envidia en este país nuestro, en el que más te vale ser feo, tonto, bajito o pobre. O muerto, mejor.

Fecha: 31/03/2008 06:52.

Autor: LUISA

Creo que de esa entrevista brotó sincerida y tristeza. Resignación y melancolía.
Creo que conocimos un gran ser humano, en consonacia con una de las mejores mentes que han habido en España.
Creo que es una lástima que una inteligencia privilegiada no se aproveche con la situación económica que vive el país en estos momentos.
Creo que me gustaría conocerle y decirle que la lucha no ha terminado y que la vida y los momentos que toda persona espera vivir, vendrán, que será muy feliz, y que la vida le sonreirá. Ya no será un gran banquero, ya no será el nombre más envidiado, pero le aseguro que será el HOMBRE MÁS FELIZ. Porque creo MARIO CONDE que has descubierto el secreto de la vida y por tanto el de la felicidad. No es el dinero ni las falsas risas, es el amor, el amor de los que de verdad te quieren, el amor a uno mismo, y el valorar el día a día, en su sencillez.
Cada mañana cuando mires el Sol, saluda a Dios, porque estoy segura que te está mirando.
Me encantaría conocerte, pero será imposible, pero si lees estas líneas, tienes que saber que ya no vas a sufrir más, ahora poco a poco iras caminando, hasta conseguir tu felicidad, la que estas buscando.
Recibe toda mi admiración.

LA CORRUPCIÓN INSTITUCIONALIZADA Y LOS RESIDUOS TÓXICOS

La exquisita amalgama de políticos corruptos, funcionarios mal pagados y sobornables, organismos estatales y gubernamentales colapsados por leyes estrambóticas y una burocracia churrigueresca, Juzgados sumergidos bajo toneladas de papel, que sólo conocen el editor de textos de los pocos ordenadores que les han sido asignados, unos ciudadanos que aguantan heroicamente su cobardía, Ayuntamientos formados por ediles displicentes con la Ley de Administración Local, el Derecho Administrativo y desconocedores de la Contabilidad Pública, de costos, Fiscal, Administrativa, por actividades, de flujo, fiduciaria, e incluso de la contabilidad general de empresa, porque lo que los aupó al cargo fue el dominio de la zancadilla, la zorrería, el espíritu de secta, la falta de sentido del ridículo y el desprecio al bien común y no sus dotes como gestores, han contribuido a crear una democracia al servicio de los intereses mafiosos, en la que la principal riqueza no proviene de la industria sino de la especulación, que no está basada en las leyes de mercado, en el precio real de la mercancía, sino en su encarecimiento artificial, que permite repartir dividendos entre los corruptos que han contribuido a despojar los bienes y necesidades de su dimensión real.

Un ejemplo: España produce más de treinta millones de toneladas anuales de residuos tóxicos y peligrosos, lo que implica unos 350 kilos al año por habitante, y mueve más de dos mil millones de euros al año.

En Italia, dice Francesca Colombo , *el tráfico de residuos tóxicos, peligroso para la salud de los habitantes y del medio ambiente de este país, -entre basura urbana y desechos peligrosos-, (...) está en Italia en en manos de organizaciones criminales, como la "cosa nostra" de Sicilia, "La ’ndreghetta reggina" de Calabria, la "sacra corona" de Puglia o la "camorra" napolitana, encargadas de la recogida, el almacenamiento y el reciclaje.*

En España, la mafia tiene un su paraiso de blanqueo de dinero procedente del crimen organizado, gracias a las deficiencias de los organismos de control. Su dinero sucio se lava en el sistema financiero, en el sector inmobiliario, en el comercio, en el sector terciario y la industria, y, desde hace un tiempo, también en las empresas de basuras y de tratamiento de residuos peligrosos, que trabajan bajo contratas y mediante concurso público, con las consabidas comisiones a los políticos y sus partidos.

Las empresas que no participan en estos enjuagues suelen quedar, antes o después, marginadas.

La eliminación de basura tóxica es un negocio en auge, y las empresas encargadas pueden utilizar diversos procedimientos para deshacerse de residuos tóxico o peligrosos, como los de la industria metalúrgica, la escoria procedente de los filtros, consistente en metales pesados, los transformadores con refrigerantes peligrosos como el PBC, los vertidos de curtición, los productos químicos y farmacéuticos, las pilas, el aceite industrial, etc. El método más usual es falsificar los certificados y convertirlos en residuos domiciliarios, y alterar los permisos de transporte para trasladarlos de una región a otra y descargarlos en canteras de construcción, parques naturales protegidos, ríos, grutas, excavaciones en montañas, terrenos agrícolas abandonados. Aquí como en Italia, hacen un agujero, los depositan, y los cubren con tierra. Y se inicia el proceso irreversible que acaba, por filtración, en las aguas subterráneas. [1] El ciclo letal termina cuando usamos esa agua contaminada para beber o regar los campos de cultivo, y se disparan los casos inexplicables de cáncer y enfermedades de etiología desconocida.

Nuestros ríos contienen cantidades alarmantes de ibuprofeno , uno de los analgésicos estrella, y de estrógenos , provenientes de la orina de los millones de mujeres en edad fértil que toman anticonceptivos, pesticidas y herbicidas agrícolas, tan fuera de control como si nunca hubiéramos oído hablar de sus efectos nocivos, y todo eso desemboca al mar, degradando al extraordinario mosaico que guarda los secretos de la vida en nuestro planeta, aún por desentrañar, como el efecto anticanceroso del tunicado marino *Ecteinascidia turbinata*, que la empresa farmacéutica Zeltia, con la marca Yondelis tiene en fase avanzada de investigación para el tratamiento del cáncer.

Actualmente, a las playas y las costas españolas llegan numerosos cadáveres de especies marinas, y en nuestros campos también han aumentado significativamente los cadáveres de aves, y de mamiferos, que son augurios de lo que se está desencadenando en nuestro medio. No parece una casualidad que en una de las playas más degradadas de la costa mediterránea, y una de las ciudades víctima de la especulación urbanística, Torrevieja , se den casos cada vez mayores de afecciones víricas y dermatológicas, con un aumento significativo de cáncer, y que, a pocos kilómetros, en Orihuela, se hayan detectado más de treinta vertederos incontrolados en una inspección realizada por los alumnos de un Instituto de Enseñanza Media , mientras que los responsables de Sanidad y Medio Ambiente los ignoran.

Quizás porque si se investigara tendrían que controlar a las empresas que reciclan y eliminan los residuos tóxicos y peligrosos, en aplicación de la batería de leyes que no se cumplen, y tendrían que responder ante los tribunales los que se enriquecen con su tolerancia en el ámbito político, los empresarios mafiosos que se benefician, y los ciudadanos que se toman a chufla a los ecologistas, y cobran para que puedan enterrar en sus barbechos los residuos tóxicos y peligrosos. Y porque los mismos políticos que legislan y aprueban las leyes son los que impiden que funcionen los organismos de control, se lucran con las empresas que reparten sobornos y abaratan costos incumpliendo las normas.

El ciclo de la corrupción abarca suficientes aspectos de la realidad como para que ya sea indiscriminadamente letal. [2]

Gatopardo

(1) Una investigación de la Universitat Autònoma de Barcelona y el Consejo Superior de

Investigaciones Científicas (CSIC) ha revelado que hay entre 200.000 y 360.000 toneladas de residuos tóxicos en el cauce y en la orilla del río Ebro entre Riba-roja y Flix. El estudio incluye tres posibles medidas para paliar esta situación: construir un muro de contención para trasladar los residuos, desviar el río o construir un sarcófago para sellar los residuos. El problema que se plantea es que todas las propuestas son muy caras, unos 90 millones de euros, por lo que podría financiarse con fondos europeos. Por otro lado, el informe revela que el agua aún no está contaminada, pero que los restos son visibles en la superficie.
Por ello los autores del informe estiman que el material radioactivo no presenta, por el momento, peligro inmediato, pero sí lo tendría en caso de tormentas importantes o algún incidente o escape en el pantano de Flix. Los residuos se reparten de la siguiente manera: hay de 90 a 180 toneladas de metales pesados, como el mercurio, y unas diez de organocloratos como el DDT, así como miles de toneladas de materiales radioactivos como la fosforita, utilizada en la fabricación de piensos animales.

(2) En el Río Tinto, en Huelva, debido a las toneladas de vertidos altamente contaminados de las empresas químicas, se acumulan más de 120 millones de toneladas de residuos tóxicos y radiactivos, que hacen que Huelva sea la zona de España con mayor tasa de morbilidad por cáncer. A la par se sitúa la cuenca del Ebro, con las 300.000 toneladas de residuos peligrosos de Ercros depositadas dentro del cauce del río, del que se abastece una población cercana al medio millón de personas.

Autor: Ramón Mier

Sin el menor afán de generar polémica me voy a permitir decir que en buena medida son los grupos ambientalistas quienes han creado este desastre.

Al promover políticas y regulaciones excesivamente restrictivas, onerosas, o simplemente imposibles de cumplir se generan oportunidades para realizar negocios ilegales.

Toda proporción guardada, el caso es similar al de la prostitución o las drogas. ¿Porqué está invulucrado en esas actividades el crimen oranizado? ¡Porque son ilegales!

Fecha: 29/03/2008 19:03.

Autor: Gatopardo a Ramón

Punto 1:
El día que no generes polémicas te borro del libro de familia.
Punto 2:
Absolutamente de acuerdo. Verás que es una regla de tres: a mayor cantidad de leyes con trabas bien enredosas, mayor es la mordida que pueden cobrar por dejar que las incumplan.

JOSÉ MARÍA GABRIEL Y GALÁN: EL EMBARGO

EL EMBARGO

Señol jues, pasi usté más alanti
y que entrin tos esos,

no le dé a usté ansia
no le dé a usté mieo...

Si venís antiayel a afligila
sos tumbo a la puerta.
¡Pero ya s'ha muerto!

¡Embargal, embargal los avíos,
que aquí no hay dinero:
lo he gastao en comías pa ella
y en boticas que no le sirvieron;
y eso que me quea,
porque no me dio tiempo a vendello,
ya me está sobrando,
ya me está gediendo!

Embargal esi sacho de pico,
y esas jocis clavás en el techo,
y esa segureja
y ese cacho e liendro...

¡Jerramientas, que no quedi una!
¿Ya pa qué las quiero?
Si tuviá que ganalo pa ella,
¡cualisquiá me quitaba a mí eso!
Pero ya no quio vel esi sacho,
ni esas jocis clavás en el techo,
ni esa segureja
ni ese cacho e liendro...

¡Pero a vel, señol jues: cuidaíto
si alguno de ésos
es osao de tocali a esa cama
ondi ella s'ha muerto:
la camita ondi yo la he querío
cuando dambos estábamos güenos;
la camita ondi yo la he cuidiau,
la camita ondi estuvo su cuerpo
cuatro mesis vivo
y una nochi muerto!

¡Señol jues: que nenguno sea osao
de tocali a esa cama ni un pelo,
porque aquí lo jinco
delanti usté mesmo!
Lleváisoslo todu,
todu, menus eso,
que esas mantas tienin
suol de su cuerpo...
¡y me güelin, me güelin a ella
ca ves que las güelo!...

DON JOSÉ LARRALDE: COSAS QUE PASAN...

Cosas que pasan...

Nadie salió a despedirme cuando me fui de la estancia,
solamente el Ovejero, un perro, cosas que pasan.
El asunto, una zoncera, un simple cambio de palabras,
y el olvido de un mocoso, del que puedo ser su tata.
Y yo que no aguanto pulgas, a pesar de mi ignorancia,
ya no más pedí las cuentas, sin importarme de nada.
No hubiera pasado esto, si el padre no se marchara,
pero los patrones mueren, y después los hijos mandan.
Y hasta parece mentira, pero es cosa señalada,
que de una sangre pareja, salga la cría cambiada.
Los treinta años al servicio, pal mozo no fueron nada,
se olvidó mil cosas buenas, por una que salió mala.
Yo me había aquerenciao, nunca conocí otra casa,
que apegao a las costumbres, me hallaba en aquella estancia.
Si hasta parece mentira, mocoso sin sombra de barba,
que de guricito andaba, prendido de mis bombachas.
Por él le quité a unos teros, dos pichoncitos.
¡Malhaya!, y otra vez, nunca había bajao un nido,
y por él gatié las ramas.

Cuando ya se hizo muchacho, yo le amansé el Malacara,
y se lo entregué de riendas, pa que él sólo lo enfrenara.

Tenía un lazo trenzao, que gané en una domada,
pal santo se lo obsequié, ya que siempre lo admiraba.
Y la única vez que el patrón me pegó una levantada,
fue por cargarme las culpas, que a él le hubieran sido caras.
Zonceras, cosas del campo, la tranquera mal cerrada,
y el terneraje plantel, que se sale de las casas,
y esto, pal finao patrón, era cosa delicada.
Y bueno, pa que acordarme de una época pasada,
me dije pa mis adentros, todo eso no vale nada.
Sin mirarnos, arreglamos, metí en el cinto la plata,
le estiré pa despedirme mi mano, pa que apretara,
y me la dejó tendida, cosa que yo no esperaba.
Porque ese mozo no sabe, si un día he de hacerle falta...
Tranqueando me fui haste el catre, alcé un atao que dejara,
y rumbié para el palenque, echándome atrás el ala,
ensillé, gané el camino, pegué la última mirada
al monte, al galpón, los bretes, el molino, las aguadas.
De arriba abrí la tranquera, eché el pañuelo a la espalda,
por costumbre, prendí un negro, taloníé mi moro Pampa,
y ya me largué al galope, chiflando como si nada.
Nadie salió a despedirme cuando me fui de la estancia,
solamente el Ovejero, un perro, cosas que pasan...

LOS ABUSOS SEXUALES Y EL VATICANO:CRIMEN SOLLICITATIONIS

Crimen Sollicitationis

En los años sesenta, Joseph Ratzinger elabora un documento que es remitido a todos los

obispos, donde explica el procedimiento para actuar en los casos de abusos sexuales del personal eclesiástico (incluyendo la pederastia). En él se establece que quien ha sufrido el abuso no puede hablar del caso, al estar bajo secreto de confesión.
En 2001, Ratzinger reformula el documento ; pero la única variación es que ahora es el Vaticano quien debe conocer y decidir sobre el caso. En esa época se habían denunciado numerosos de casos de pederastia en EEUU e Irlanda. Se confirmó que los obispos habían protegido a pederastas, y que los casos eran generales. El procedimiento era enviar al sacerdote pederasta a otro lugar, y obligar al silencio al abusado con la excusa del secreto de confesión, y, en último caso, presionar y perseguir a quienes intentaran denunciarlo. Si se les pillaba, los obispos decían que el cura fue trasladado porque pensaban que ya estaba curado. El resultado es la perpetuación de los casos con curas que abusaron de más de cien niños distintos
En EEUU se creó una comisión interna para enfrentarse a los casos. El responsable fue obligado a dimitir al año, después de declarar en los *Angeles Times* que la iglesia se había comportado como la mafia, por proteger a los suyos y silenciar los crímenes con amenazas y presiones sobre sus víctimas y denunciantes.
Un fiscal narra como la iglesia le puso trabas continuas durante la investigación. Explica que el procedimiento habitual de los obispos es remitir todas las pruebas condenatorias al nuncio del país (embajador del Vaticano, con inmunidad diplomática y no investigable), y de esta forma hacen desaparecer los datos importantes.
Este fiscal consiguió pruebas que condenaron a ocho sacerdotes y logró una declaración por escrito de un obispo, que confirmaba que tenían ordenes de proteger a la Iglesia y esconder las pruebas, lo cual significó que los pederastas siguieron abusando de niños.
Hoy en día se ha perdido la pista a algunos sacerdotes que huyeron al Vaticano para no ser juzgados en América, y fueron acogidos hasta que era inevitable la extradición.
Las diócesis condenadas han debido pagar sumas enormes de dinero en compensación, lo que ha hecho bajar las donaciones a la Iglesia Católica en América.
Las donaciones a la Iglesia, sirven para sufragar, aparte de viajes en primera clase y los fastos de la jerarquía católica, también para pagar las costas de los juicios contra los sacerdotes acusados por pederastia, los de los curas violadores de monjas , los de los curas genocidas, y para mantener misiones asistenciales en África, Asia, Latinoamerica, donde se predica que no hay que usar el condón, que hay que tener todos los hijos que Dios quiera enviar, y la sumisión y el silencio ante los abusos, bajo amenaza de excomunión.

Gatopardo

¿Qué palabra es más adecuada para describir la actuación de del Vaticano y la jerarquía católica ante esta problemática, CRIMINAL o MONSTRUOSA?

Alguna vez escribí un post et torno al tema:

http://disiento.blog.com/1934040/

y en respuesta a un comentario en defensa de la Iglesia Católica dije lo siguiente:

"..los pagos realizados no repararán nunca los daños. Pero como una persona cercana a una víctima de este tipo de abusos no puedo dejar de alegrarme porque se le haya impuesto una "castigo" así a la Iglesia Católica Apostólica y Romana.

Me alegra porque sé que dos mil millones de dólares después se tomarán medidas para evitar que tales abusos se vuelvan a cometer..."

Ya sabes que no soy muy amiga de redundar en los calificativos; pero en este caso creo que no hay que ser ávaros: la actuación de la Iglesia es criminal y monstruosa.
La Iglesia, como cualquier grupo delictivo arropado en sus privilegios y su respetabilidad, lo que más teme es que se airee su suciedad, y que tengan que responder de sus crímenes, de sus abusos, y que sus víctimas se conviertan en acusadores. El silencio informativo que ha habido -y que existe todavía - los había acostumbrado a la impunidad.
Añado enlazado tu post:"Quien paga por pecar" a los artículos recomendados.

Mafiosos, sin paliativos.
No tengo tan claro que un castigo económico, por cuantioso que resulte, sirva para que se tomen medidas. Si verdaderamente la Iglesia tuviera "dolor de corazón y propósito de la enmienda", habría pedido perdón y protegido a las víctimas en vez de acoger a los criminales. Me parece nauseabundo que ante semejantes casos de pederastia, se traslade al culpable a comunidades más pobres,lo que sitúa a las víctimas en una mayor indefensión. No creo que pueda haber una actuación más abyecta.

En junio tendré que ir a México a hablar de esto mismo, aunque sin centrarme en los curas. En ese país vivió y murió Maciel, el de los Legionarios de Cristo, en total impunidad. Algo que sigue y seguirá mientras iglesia católica y poderes políticos y económicos estén tan ligados. ¿La llave? La de la educación. Ellos tienen aún esa llave en sus manos en muchos países del mundo.

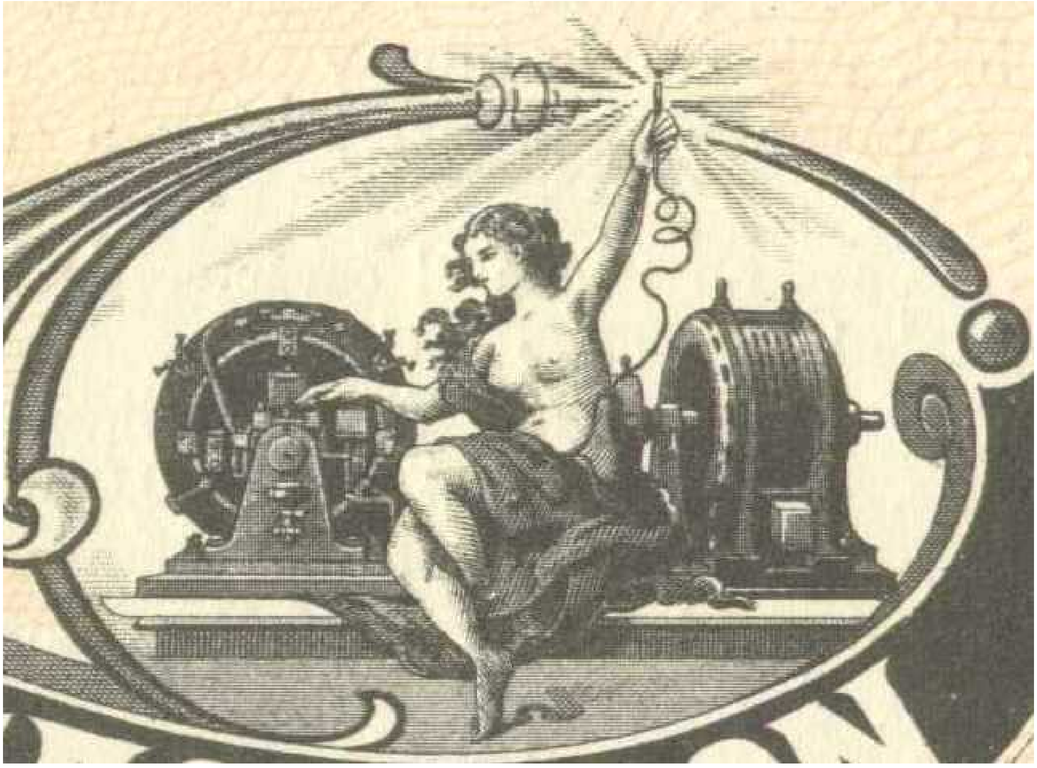
EL GOBIERNO RECONOCE POR ESCRITO EL FRAUDE EN LOS CONTADORES DE LA LUZ



Documentos del Congreso:
1. Escrito de 16.02.07 de la diputada Dña. Isaura Navarro Casillas.
En el escrito se solicita que el Ministerio de Administraciones Públicas aporte los veintidós expedientes que contienen la documentación relativa a la determinación de los precios de alquiler (*) publicados en el BOE desde el 29.12.84 al 30.12.06.
(*) La condición 16 de la póliza de abono aprobada por el Real Decreto 1725/1984, que es la norma oficial relativa al cálculo de los precios de alquiler de los contadores de energía eléctrica, establece que *"el Ministerio de Industria fijará las cantidades concretas máximas que las compañías eléctricas pueden aplicar por el alquiler de sus equipos de medida no especiales, en base al 1.25% mensual del precio medio de mercado del aparato".*
2. Respuesta de 9.03.07 del Gobierno al escrito de 16.02.07 de la diputada Dña. Isaura Navarro Casillas.
Contiene la respuesta del Gobierno al escrito de 16.02.07 de la diputada Dña. Isaura Navarro. El texto comprendido entre las marcas M1 y M2 no tiene absolutamente nada que ver con lo solicitado en el escrito de 16.02.07.
En la respuesta hay recuadrados tres párrafos. En el primero, el Gobierno reconoce que *"en la tarifa de 2002 se aprobó una reducción del 10% en todos los precios de alquiler. El motivo de aprobación de la bajada para ese año surge como consecuencia de la queja formulada en 2000 por D. Antonio Moreno Alfaro ante el entonces Ministerio de Industria y Energía"*. Dado que los ingresos por alquiler de contadores rondan los 180 millones de euros anuales, una reducción del 10% supone un ahorro de 18 millones de euros anuales para los consumidores. Y puesto que la reducción se ha mantenido (los precios de alquiler están congelados desde el 1.01.02), el ahorro a 31.12.07 ascenderá

a 108 millones de euros (18.000 millones de pesetas).
En el segundo párrafo recuadrado, el Gobierno reconoce que el motivo por el cual remite al Congreso uno sólo de los veintidós expedientes solicitados por Isaura Navarro es que *"en los años 1984 a 2001, los precios de alquiler de los contadores se revisan en la misma cuantía que la tarifa eléctrica, y a partir de 2002 no se modifican"*.
En el tercer párrafo recuadrado, el Gobierno especifica cuál es el único expediente que remite al Congreso: el expediente correspondiente a la Orden de 20.12.84 del Ministerio de Industria (BOE de 29.12.84). Según los documentos incluidos en dicho expediente, los precios de alquiler indicados en el Anexo de la Orden de 20.12.84 fueron calculados por el Ministerio en función de los precios de venta al público facilitados por los fabricantes y del descuento que éstos dicen aplicar a los mayoristas. Los precios coinciden en todos los fabricantes y los descuentos oscilan entre el 16.50% y el 20%. Los dos únicos documentos sobre los cuales el Ministerio comprobó la veracidad de los datos facilitados por los fabricantes fueron dos facturas de uno de los fabricantes a Estabanell y Pahisa, una pequeña compañía eléctrica local de Cataluña que en 1984 tendría unos 12.000 abonados. Una de las facturas corresponde al suministro de 15 contadores, y la otra, al suministro de 25 contadores.
El descuento realmente aplicado por los fabricantes a las compañías eléctricas es muy superior al indicado por los fabricantes al Ministerio, pues numerosas facturas facilitadas por la CNE a la Audiencia Nacional prueban que el descuento real varía entre el 59.41% y el 64.21%, lo que supone un descuento medio superior al 60%.
Si el Ministerio hubiera aplicado a los precios de venta al público facilitados en 1984 por los fabricantes el descuento del 60% en lugar del 20%, los precios de alquiler publicados en la Orden de 20.12.84 habrían sido la mitad (la cantidad resultante de aplicar a un precio el 60% de descuento es la mitad de la cantidad que resulta si se aplica un descuento del 20%). Dado que, como reconoce el Gobierno en su respuesta de 9.03.07 a la diputada Dña. Isaura Navarro Casillas, todos los precios de alquiler publicados posteriormente en el BOE fueron obtenidos aplicando a los precios de 1984, los sucesivos coeficientes de actualización de la tarifa eléctrica (los cuales, salvo contadísimas excepciones, han sido siempre iguales o superiores a 1), ello implica que todos los precios de alquiler publicados desde 1984 en el BOE son, como mínimo, dobles de los que habrían resultado si el Ministerio hubiera calculado dichos precios según lo establecido en la condición general 16 de la póliza de abono, aprobada por el Real Decreto 1725/1984.
3. Primera página de la Orden de 12.10.95 del Ministerio de Industria y Energía.
En el párrafo recuadrado, el Gobierno afirma que en *"la presente Orden se fijan las cantidades concretas máximas aplicables por alquiler de equipos de medida, de acuerdo con la Condición 16 de la vigente Póliza de Abono, aprobada por el Real Decreto 1725/1984, de 18 de julio"*, lo cual, evidentemente, es falso, pues, como reconoce el Gobierno en su respuesta de 9.03.07 a la diputada Dña. Isaura Navarro Casillas, *"de 1984 a 2001, los precios de alquiler se revisan en la misma cuantía que la tarifa eléctrica"*.
4. Escrito de 24.05.07 de la diputada Dña. Isaura Navarro Casillas al Gobierno.
El escrito, que no ha recibido respuesta, incluye cinco preguntas sobre el precio de alquiler de los contadores, la última de las cuales es la siguiente: *"¿Qué medidas tiene pensado adoptar el Gobierno para que los clientes de las compañías eléctricas recuperen los más de 3.000 millones de euros (+IVA) pagados en exceso a dichas compañías como consecuencia de haber revisado el Gobierno los precios de alquiler de los contadores en la misma cuantía que la tarifa eléctrica en lugar de, como era su obligación, haber calculado dichos precios según lo establecido en la condición 16ª de la vigente póliza de abono?".*

RESPUESTA DEL GOBIERNO

(186)SOLICITUD DE INFORME A LA ADMINISTRACION DEL ESTADO CONGRESO

186/001958/0000 16/02/07 0175047

AUTOR/A: NAVARRO CASILLAS, Isaura (GIU-ICV)

M1

RESPUESTA : La regulación sobre alquiler de contadores de energía eléctrica desde el año 1984 se encontraba:

1) En el Real Decreto 1725/1984, de 18 de julio, en su Anexo II, donde se estableció el Modelo Oficial de Póliza de Abono y se fijaba, en la condición 16 de dicha póliza, lo siguiente:

"Los abonados tienen derecho a facilitar los contadores y otros aparatos de su propiedad, o alquilárselos a las empresas suministradoras de energía eléctrica, o a otras entidades legalmente establecidas, extrañas a ellas, siempre que los aparatos de medida pertenezcan a un sistema y tipo homologados, y estén verificados oficialmente con resultado favorable. El tipo de alquiler aplicable por las empresas suministradoras de energía eléctrica no será superior al 1,25 por 100 mensual del precio del aparato.

Las empresas eléctricas estarán obligadas en todo caso a suministrar en alquiler aparatos contadores no especiales, monofásicos o trifásicos de capacidad normalizada, de hasta 63 amperios por hilo, e interruptores de control de potencia (ICP), para la misma tensión nominal, así como los de doble tarifa, relojes y demás aparatos necesarios para la aplicación de la tarifa nocturna con el mismo límite de intensidad. Para estos aparatos el Ministerio de Industria y Energía fijará las cantidades concretas máximas que se pueden aplicar por su alquiler, en base al mismo 1,25 por 100 mensual, del precio medio del mercado del aparato".

2) Posteriormente, la Orden de 20 de diciembre de 1984, actualizó los alquileres de los equipos de medida de energía eléctrica, que las empresas eléctricas estaban obligadas en todo caso a suministrar.

En esa Orden se fijaron los nuevos precios, en base a los datos de precios de mercado facilitados por los fabricantes, aplicando el 1,25% tal como estableció el Modelo Oficial de Póliza de Abono. Se fijaba un régimen transitorio, hasta el 1 de julio de 1986, en que los precios eran de plena aplicación, tanto a los aparatos en alquiler con anterioridad a la entrada en vigor de la Orden como a los alquilados con posterioridad.

Además de establecer los nuevos precios, la Orden, en su apartado tercero, disponía la metodología de revisión de los mismos, de la forma siguiente:

"La revisión de los precios máximos de alquiler se realizará conjuntamente con la de las tarifas eléctricas, considerando la evolución de los precios del mercado y del índice de precios industriales publicado por el Instituto Nacional de Estadística".

En virtud de lo anterior, se señala lo siguiente:

a) El entonces Ministerio de Industria y Energía fijó, en 1984, los precios iniciales de estos equipos aplicando estrictamente lo dispuesto en la normativa, en el 1,25 por 100 mensual del precio medio de mercado del aparato. Evidentemente este precio de mercado es al que lo compra el abonado, y ello porque es éste y no la empresa eléctrica quien tiene la potestad de elegir si lo compra o lo alquila, es decir, el precio hay que fijarlo en base al coste de oportunidad del cliente.

b) La evolución de precios de alquiler de estos equipos se ha revisado con la tarifa de cada año, siempre por debajo del IPC, y hasta 1996, siguiendo prácticamente la evolución de la tarifa eléctrica y la media entre el IPRI y el IPC. A partir de ese año, su evolución cambia de signo, como ocurre con la tarifa eléctrica, y por tanto evoluciona, experimentando una bajada, para situarse en 1999 y 2001 muy por debajo tanto del IPC, del IPRI y, por tanto, de la media de estos índices.

Esto ocurre en todos los precios de alquileres de equipo que fija el Ministerio de Economía.

En la tarifa 2002 se aprobó una reducción en todos los precios del 10%.

* El motivo de aprobación de la bajada para ese año surge como consecuencia de la queja formulada en 2000 por D. Antonio Moreno Alfaro ante el entonces Ministerio de Industria y Energía. A la vista de la misma se solicitó informe el 28 de marzo de 2000 a la Comisión Nacional de Energía, además de a las asociaciones interesadas (UNESA y Asociación de Bienes de Equipo).

Con fecha 20 de septiembre de 2001, la Comisión Nacional de Energía emitió su informe, indicando en su consideración quinta.

"Como se ha visto anteriormente, el incremento medio anual de los Precios de Consumo entre los años 1975 y 1984, fue del 16,2 %. Por tanto, la tasa de retribución a los capitales invertidos por las empresas arrendadoras de los equipos de medida y control, durante esa década de 1975 a 1984, debió situarse, para no incurrir en pérdidas simplemente por el efecto inflacionista, en al menos en ese valor del 16,2%. Con ello, el periodo de recuperación de la inversión de los capitales invertidos por las empresas alquiladoras de los equipos de medida y control, con una inflación en el entorno del 16%, se amplía de manera automática y de forma considerable respecto a los 6 años y 8 meses calculados anteriormente, yéndose incluso por encima de los 30 años.

En cuanto a la vida útil prevista para los equipos de medida y control no existe, en la actualidad, regulación alguna al respecto. Así, la Ley 3/1985, de 18 de marzo, de Metrología, no especifica, en ningún momento, que sea necesario proceder a establecer una vida útil para los aparatos de medida, sino que parece decantarse porque éstos sean válidos, con independencia de su antigüedad, en tanto realicen la medición con las suficientes garantías de exactitud. Ningún desarrollo posterior de dicha Ley 3/1985 ha venido a establecer una vida útil para los equipos de medida y control, al menos para los equipos objeto del presente informe.

De forma genérica, y en algunas regulaciones de otros países así se recoge, se acepta que la vida útil de los equipos de medida y control no debe superar los 30 años. A esta vida útil de 30 años para los equipos de medida y control se hace alusión en varios de los documentos aportados por el denunciante D. Antonio Moreno, e incluso así se recogía en antiguos proyectos de normativa para este tipo de aparatos, aunque dicha normativa, finalmente, no llegó a aprobarse.

Con todo lo anterior, vida útil de 30 años e inflación en el entorno del 16% puede comprobarse, mediante sencillas fórmulas matemático-financieras, que no resulta excesivo fijar el precio máximo de alquiler mensual de los equipos de medida y control en un 1,25% del precio medio del aparato. Concretamente, considerando una vida útil de 30 años y una anualidad en

concepto de alquiler del 15% del precio medio del equipo (12 meses al 1,25% mensual), se obtiene una tasa de interés del 14,75%, valor incluso inferior a la inflación observada en aquellos años.

Sin embargo, la favorable evolución de los Precios de Consumo desde el año 1984, conlleva, de forma automática, a que en la actualidad sí pueda resultar excesivo fijar el precio máximo de alquiler mensual de los equipos de medida y control en el 1,25% del precio medio del aparato. Así, considerando una vida útil de 30 años y una tasa de retribución del 7%, valor éste más acorde con la realidad actual, la anualidad a recuperar en concepto de alquiler debería situarse en el entorno del 8% del precio medio del aparato, o lo que es igual, en el 0,67% mensual del precio medio del aparato, valor sensiblemente menor al 1,25% fijado en el Real Decreto 1725/1984.

En definitiva, la fijación del precio máximo de alquiler mensual de los equipos de medida y control en el 1,25% del precio medio del aparato pudo resultar adecuado para el año 1984, pero el hecho de que dicho porcentaje no se haya ido adaptando a la realidad económica de cada momento, ha supuesto que no se haya producido la necesaria transferencia al consumidor de los ahorros de costes obtenidos por las empresas distribuidoras, al no haberse ido adaptando a la realidad económica de cada momento la tasa de retribución considerada inicialmente."

A la vista del mismo, el Ministerio de Economía, en la propuesta de revisión de tarifas para 2002, decidió aplicar este criterio para todos los precios de alquiler de contadores, proponiendo una bajada de 100-0,67/1,25 = 46,4%.

Sin embargo, al informar la propuesta de Real Decreto de tarifas, la Comisión Nacional de Energía se pronunciaba en su informe sobre estos precios de la forma siguiente:

M2 "4.3.4 Comentarios al Anexo II de la propuesta de Real Decreto (Alquileres)

* En consecuencia, las únicas referencias específicas a los precios de alquiler de los contadores a partir de la Orden de 20 de diciembre de 1984, en los expedientes de las Ordenes y Reales Decretos, es la que se hace en 2002, (en los años de 1984 a 2001, se revisan los precios en la misma cuantía que la tarifa, y a partir de 2002 no se modifican).

Por ello se remite como **anexo** la siguiente documentación:

* • **Anexo I** – Expediente Orden de 20 de diciembre de 1984.

• **Anexo II** – Informe de fecha 20 de septiembre de 2001 de la Comisión Nacional de Energía sobre contadores.

• **Anexo III** – Informe 14/2001 aprobado por el Consejo de Administración de la Comisión Nacional de Energía el 26 de diciembre de 2001 sobre la propuesta de Real Decreto por el que se establece la tarifa eléctrica para 2002.

Madrid, 9 de marzo de 2007

MINISTERIO DE LA PRESIDENCIA

Disposición adicional cuarta. *Abono de cantidad compensatoria.*

De acuerdo con lo previsto en la disposición adicional decimoctava de la Ley de Presupuestos Generales del Estado para 1995, los pensionistas de clases pasivas que hubieran percibido durante 1994 pensiones objeto de revalorización, así como aquellos que hubieran percibido la cuantía correspondiente a las pensiones mínimas o al límite máximo de percepción de las pensiones públicas, o sus herederos, recibirán durante 1995, y en un único pago, una cantidad equivalente a la que resulte de aplicar a la pensión percibida durante 1994 el coeficiente 0,0086957.

Lo dispuesto en el párrafo anterior será, asimismo, de aplicación a las pensiones de clases pasivas con fecha inicial de abono durante 1994 para cuya determinación se hubieran tenido en cuenta haberes reguladores susceptibles de actualización en el mencionado ejercicio.

Disposición derogatoria única. *Derogación de disposiciones anteriores.*

Queda derogado el artículo 1 del Real Decreto 306/1985, de 20 de febrero, así como los preceptos contenidos en las disposiciones de igual o inferior rango en lo que se opongan a lo dispuesto en el capítulo III de este Real Decreto.

Disposición final primera. *Habilitación para disposiciones de desarrollo.*

Se autoriza al Ministro de Economía y Hacienda para que dicte las disposiciones de carácter general que resulten necesarias para la aplicación de este Real Decreto.

Disposición final segunda. *Entrada en vigor y efectos económicos.*

El presente Real Decreto entrará en vigor el día siguiente al de su publicación en el «Boletín Oficial del Estado», sin perjuicio de que los efectos económicos, respecto de las materias reguladas en los capítulos I y II, se retrotraigan, cuando así proceda, al 1 de enero de 1995. Por lo que se refiere al capítulo III, sus efectos económicos serán los que en cada caso procedan, según la normativa general aplicable a las materias contenidas en el mismo.

Dado en Madrid a 13 de enero de 1995.

JUAN CARLOS R.

El Ministro de Economía y Hacienda,
PEDRO SOLBES MIRA

MINISTERIO DE INDUSTRIA Y ENERGIA

1048 *ORDEN de 12 de enero de 1995 por la que se establecen las tarifas eléctricas.*

El artículo 6 del Real Decreto 2550/1994, de 29 de diciembre, establece que el Ministerio de Industria y Energía realizará la distribución del aumento promedio global tarifario para 1995 entre las distintas tarifas para la venta de energía eléctrica que aplican las empresas acogidas al SIFE y asimismo le faculta para dictar nuevas formas de aplicación de los complementos tarifarios, la realización de las modificaciones oportunas que permitan una aplicación más flexible y precisa de la normativa existente y para desarrollar el sistema de tarifas establecido con carácter experimental de tarifa horaria de potencia, que podrá ampliarse a nuevos consumidores. Este sistema seguirá teniendo carácter experimental y coexistiendo con el general, y será optativo para el consumidor.

Asimismo, el párrafo segundo del artículo 3 del citado Real Decreto, faculta al Ministerio de Industria y Energía, a la inspección de las condiciones de la facturación a aquellos suministros a los que se apliquen complementos tarifarios establecidos en la normativa vigente, directamente o a través de la Oficina de Compensaciones de la Energía Eléctrica (OFICO) o del Organismo que el Ministerio designe para ello.

Por otra parte, el artículo 14 del Real Decreto 2366/1994, de 9 de diciembre, sobre producción de energía eléctrica por instalaciones hidráulicas, de cogeneración y otras abastecidas por recursos o fuentes de energía renovables, por el que se fijan los precios de la energía entregada a la Red de Servicio Público por estos productores, términos de potencia y energía, dispone que estos precios se actualizarán por el Ministerio de Industria y Energía con la variación media de las tarifas eléctricas.

A los expresados efectos, la presente Orden desarrolla las previsiones de los citados Reales Decretos y también se fijan las cantidades concretas máximas aplicables por alquiler de equipos de medida, de acuerdo con la Condición 16 de la vigente Póliza de Abono, aprobada por el Real Decreto 1725/1984, de 18 de julio, se actualizan las cantidades a satisfacer por los derechos de las acometidas eléctricas, a tenor del artículo 24 del Real Decreto 2949/1982, de 15 de octubre, y se fija el porcentaje de la venta de energía como contraprestación de los servicios prestados por «Red Eléctrica de España, Sociedad Anónima», conforme lo dispuesto en la disposición transitoria del Real Decreto 91/1985, de 23 de enero.

En su virtud, este Ministerio ha dispuesto:

Primero.—Las tarifas eléctricas para 1995, el desarrollo de la tarifa horaria de potencia, los precios de la energía entregada a la red por la producción en régimen especial, los suministros a quienes el Ministerio de Industria y Energía inspeccione las condiciones de la facturación y los fondos destinados a compensaciones son los que se definen en el anexo I de la presente Orden y se aplicarán de acuerdo con lo dispuesto en el mismo.

Segundo.—Las tarifas básicas a aplicar, con los precios de sus términos de potencia y energía, son las que se relacionan en el anexo II de la presente Orden.

Tercero.—El precio de los alquileres de los equipos de medida es el que se detalla en el anexo III de la presente Orden.

Cuarto.—Las cantidades a satisfacer por derechos de acometida, enganche y verificación, definidos en el Real Decreto 2949/1982, de 15 de octubre, para nuevas instalaciones, quedan fijados en las cuantías que figuran en el anexo IV de la presente Orden.

Quinto.—«Red Eléctrica de España, Sociedad Anónima» percibirá, como el componente diferenciado de las tarifas que constituye la contrapartida provisional a la prestación de sus servicios, el 2,484 por 100 de la facturación por venta de energía suministrada a los abonados finales de la Península.

La Dirección General de la Energía establecerá el procedimiento de aplicación y la base de recaudación de este porcentaje.

A LA MESA DEL CONGRESO DE LOS DIPUTADOS

Al amparo de lo establecido en el artículo 185 y siguientes del Reglamento del Congreso de los Diputados, la Diputada que suscribe formula la siguiente PREGUNTA dirigida al Gobierno para la que se solicita respuesta por escrito.

Con fecha 16 de febrero de 2007, solicitamos al Gobierno que facilitara *"todos los documentos que obren en cada uno de los expedientes abiertos por el Ministerio de Industria y Energía, el Ministerio de Economía y el Ministerio de Industria, Turismo y Comercio para definir los precios máximos de alquiler de los contadores de energía eléctrica, incluyendo, muy especialmente, los documentos aportados por los fabricantes de contadores y los documentos que contengan los cálculos efectuados por los citados Ministerios para obtener el precio medio de mercado de cada tipo de contador o cualquiera de los precios máximos de alquiler publicados en los siguientes BOEs:* (a continuación se detallaban veintidós BOE, el primero de los cuales era el BOE de 29 de diciembre de 1984, que contiene la Orden ministerial de 20 de diciembre de 1984, y el último, el BOE de 30 de diciembre de 2006, que contiene el Real Decreto 1634/2006)".

En respuesta a la mencionada solicitud de 16 de febrero de 2007, el Gobierno remitió el 9 de marzo de 2007 un escrito al que iban adjuntos tres documentos: el expediente de la Orden de 20 de diciembre de 1984 y los informes de 20 de septiembre de 2001 y 14/2001 de la Comisión Nacional de Energía. Así pues, en la documentación remitida faltan veintiuno de los veintidós expedientes solicitados el 16 de febrero de 2007.

Según reconoce el propio Gobierno al final de su escrito de 9 de marzo de 2007, la falta de dichos veintiún expedientes se debe a que *"de 1984 a 2001, los precios de alquiler se revisan en la misma cuantía que la tarifa eléctrica, y a partir de 2002, no se modifican"*.

Entre los documentos incluidos en el expediente de la Orden de 20 de diciembre de 1984 está el Informe de 18 de diciembre de 1984 de la Dirección General de Energía *"sobre propuesta de Orden ministerial por la que se revisan los alquileres de los equipos de medida de energía eléctrica"*, cuyo primer párrafo dice literalmente lo siguiente: *"Según lo dispuesto en la condición 16ª de la vigente póliza de abono , aprobada por el Real Decreto 1725/1984 de 18 de julio, las empresas eléctricas están obligadas a suministrar en alquiler ciertos equipos de medida al abonado que lo solicite. Para estos aparatos, el Ministerio de Industria y Energía fijará las cantidades concretas máximas que se pueden aplicar por su alquiler, en base al 1,25 por 100 mensual del precio medio de mercado del aparato"*.

Así pues, al afirmar que *"de 1984 a 2001, los precios de alquiler se revisan en la misma cuantía que la tarifa eléctrica, y a partir de 2002, no se modifican"*, el Gobierno está reconociendo de forma explícita que ni uno sólo de los precios de alquiler publicados en el

Fax: 91 3906769
91 3906722

BOE después de la Orden de 20 de diciembre de 1984 ha sido calculado *"en base al 1,25 por 100 mensual del precio medio de mercado del aparato"*, que es lo dispuesto en la condición 16ª de la póliza de abono aprobada por el Real Decreto 1725/1984, de 18 de julio.

Como consecuencia de no haber seguido el Gobierno el criterio establecido en la citada condición general 16 y haber revisado los precios de alquiler en la misma cuantía que la tarifa eléctrica, la cantidad cobrada en exceso desde 1984 por las compañías eléctricas por el alquiler de sus contadores supera los 3.000 millones de euros, excluido el IVA.

Si la condición 16 de la póliza de abono aprobada por el Real Decreto 1725/1984, que continúa vigente, especifica que "*el Ministerio de Industria y Energía fijará las cantidades concretas máximas que se pueden aplicar por el alquiler de los contadores, en base al 1,25 por 100 mensual del precio medio de mercado del aparato*", ¿cuáles son las razones por las que "*de 1984 a 2001, los precios de alquiler se revisan en la misma cuantía que la tarifa eléctrica, y a partir de 2002, no se modifican*"?

Si "*de 1984 a 2001 los precios de alquiler se revisan en la misma cuantía que la tarifa eléctrica*", ¿por qué con posterioridad a 1984 el Gobierno ha afirmado reiteradamente en el BOE (por ejemplo, en la Orden de 12 de enero de 1995/ BOE de 14 de enero) que "*las cantidades concretas máximas aplicables por alquiler de equipos de medida se fijan de acuerdo con la condición 16 de la vigente póliza de abono, aprobada por el Real Decreto 1725/1984, de 18 de julio*"?

Si la condición 16 de la póliza de abono aprobada por el Real Decreto 1725/1984, que continúa vigente, especifica que "*el Ministerio de Industria y Energía fijará las cantidades concretas máximas que se pueden aplicar por el alquiler de los contadores, en base al 1,25 por 100 mensual del precio medio de mercado del aparato*" y, como reconoce el Gobierno en su mencionado escrito de respuesta de 19 de marzo de 2007, "*de 1984 a 2001, los precios de alquiler se revisan en la misma cuantía que la tarifa eléctrica, y a partir de 2002, no se modifican*", ¿por qué en su respuesta de 17 de enero de 2007 a un escrito de 1 de agosto de 2006 de la diputada Dña. Isaura Navarro Casillas el Gobierno afirma que "*en las revisiones y precios máximos de alquiler que ha ido aprobando el entonces Ministerio de Industria y Energía todos los años y el Ministerio de Economía, y, en la actualidad, el Ministerio de Industria, Turismo y Comercio, ha cumplido ampliamente la normativa vigente*" ?

Si la condición 16 de la póliza de abono aprobada por el Real Decreto 1725/1984, que continúa vigente, especifica que "*el Ministerio de Industria y Energía fijará las cantidades concretas máximas que se pueden aplicar por el alquiler de los contadores, en base al 1,25 por 100 mensual del precio medio de mercado del aparato*" y, como reconoce el Gobierno en su mencionado escrito de respuesta de

91 3906722

19 de marzo de 2007, "*de 1984 a 2001, los precios de alquiler se revisan en la misma cuantía que la tarifa eléctrica, y a partir de 2002, no se modifican*", ¿por qué en su respuesta de 20 de septiembre de 2006 a tres escritos de 16 de junio de 2006 de la diputada Dña. Isaura Navarro Casillas el Gobierno afirma que "*sigue expresando fielmente su compromiso de seguir respetando el principio de legalidad, tal como ha venido haciendo hasta ahora, y valorando como oportunas todas aquellas actuaciones futuras que redunden en beneficio de los ciudadanos*" ?

¿Qué medidas tiene pensado adoptar el Gobierno para que los clientes de las compañías eléctricas recuperen los más de 3.000 millones de euros (más IVA) pagados en exceso a dichas compañías como consecuencia de haber revisado el Gobierno los precios de alquiler de los contadores en la misma cuantía que la tarifa eléctrica en lugar de, como era su obligación, haber calculado dichos precios según lo establecido en la condición 16ª de la vigente póliza de abono?

A LAS AFUERAS

El equipo de Gatopardo en pleno secundamos con entusiasmo esta moción:

"Un año más los ciudadanos de este país nos vemos obligados a soportar a los de los pitos y los tambores que, disfrazados como miembros del KKK y con sus estatuas de cadáveres sobre ruedas, inundan, paralizan y llenan las calles de ruido, cáscaras de pipas y envolturas de caramelo. Me parece perfecto que haya quien crea conveniente celebrar semejante bacanal de muerte y violencia, pero ¿por qué tenemos que soportar eso todos los demás? ¿Por qué no puedo yo pasear tranquilamente, disfrutar del silencio de mi ciudad, aparcar el coche y hacer uso normal de las calles? Me parece un exceso, francamente, y no comprendo cómo es posible que estas personas piensen que tienen derecho a todo, sólo porque profesan una religión. Dar por sentado que ese estruendo de mala "música" militarista es del agrado de todos, es engañarse. Y si fuera un ratito, bueno, haces de tripas corazón y te lo callas, pero una semana entera en estas condiciones me parece, aparte de bastante aburrido, muy molesto.

Bien es cierto que no es la única fiesta ruidosa, pero claro, la Feria está bien localizada en una zona de la ciudad, y si quieres ir, vas, y si no quieres, no vas. La cabalgata de carnavales dura dos horas y pasa por el centro, y si quiero voy, y si no quiero, no voy. Pero los católicos me pasan el cadáver sangrante por la puerta de mi casa, por si acaso no he querido ir a ninguna de sus cabalgatas, y vivas donde vivas, quieras o no, te tocará cadáver sangrante, y "música celestial" te pongas como te pongas. Qué respetuoso, sí señor. Mañana voy a salir yo a la calle con una túnica y un pito y un tambor, a meter ruido, a ver cuánto tardan en venir los guardias municipales.
Aparte, claro, que no veo la ventaja educativa de enseñarle a un niño cómo un señor azota a otro, cómo una mujer llora con un muerto entre los brazos, cómo le meten clavos en las manos y en los pies a un hombre... En fin, luego protestan que la televisión es muy violenta para nuestros hijos.
Yo propongo a los Excelentísimos Ayuntamientos que habiliten en las afueras de la ciudad un lugar donde esta gente pueda sacar sus estatuas a tomar el aire y elevar a sus dioses tan desagradables sonidos, sin molestar a los que no tenemos culpa de que sus creencias requieran de tanta demostración gratuita y tanto teatro. Una especie de Circuito de Semana Santa, o algo por el estilo, a treinta o cuarenta kilómetros de la ciudad, bien delimitado con muros altos, o bien utilizar el Circuito de Velocidad, que ya está construido, para estos fines. También propongo que se cobre entrada a la puerta del recinto, y que la recaudación vaya a parar a las arcas de la Iglesia Católica, para que de ese modo los españoles de este "país no confesional" podamos dejar de financiar una empresa privada con nuestros impuestos, que tan necesarios son para asuntos de interés general.
Y paradojas de la vida, pero estoy convencida de que la mayoría de los denunciantes del "botellón" (esa práctica juvenil ruidosa y que llena de suciedad la calle) estarán entre los participantes y espectadores de esta ruidosa y sucia fiesta."

قصائد تتوسل السلام في لجة الحرب

مدريد الزمان

ولدت الشاعرة الإسبانية آنا خوليا غونثاليث في إقليم دي لامانتشا سنة 1975 في (الباثيته Albacete) وهي مدينة تأسست في عصر الموحدين وأصل اسمها العربي هو (البسيط) لكونها تقع في سهل منبسط. تضيف الشاعرة دائماً إلى اسمها الأصلي كلمة أو تسمية (أسود) حتى صارت تُعرف به، وتقول أنها قد اتخذت هذا الاسم وباللفظ العربي كنوع من اعترافها واعتزازها بأصلها وبجذورها الثقافية العربية. بدأت نشر قصائدها مبكراً في الصحف والمجلات وحازت على بعض الجوائز الأدبية المحلية. من أعمالها: (كلمات بلا آفاق) 1991، (كوكب القمر) 1994، (حدائق الزمن) 1996، (خمسة أفواه) 1998 وغيرها، إضافة إلى اشتراكها في أكثر من أنطولوجيا، ثم أصدرت ديوانها (الجمهور الجميل) سنة 2002 والذي قامت بتقديمه قراءة أو بعروض مسرحة في أغلب أنحاء إسبانيا وحظي باستقبال نقدي جيد. وبعده في سنة 2003 كتبت ديوانها القصير والخاص هذا (صلاح نيازي وأغاني للشعوب التي بلا حمام). تكتب آنا خوليا أيضاً في النقد الأدبي ولها نشاطات مسرحية إضافة إلى مساهماتها المتواصلة في الإذاعة والصحافة وهي تكتب الآن سيناريوهات للتلفزيون وتهيئ لإصدار كتابها الجديد عن المسرح الموسيقي في القرن العشرين.

يضم هذا الديوان تسع قصائد لها تقنيتها الخاصة ومناخها الواحد، وهو ديوان يتحدث عن السلام ويدين الحرب. كتبته عندما اجتاحت القوات الأجنبية العراق في بداية عام 2003، وهي كما تصفه من خلال الحديث معها عنه أنها قد أرادت من خلاله أن تضم صرختها إلى صيحات المحتجين على الحرب وأن تساهم بشكل ما، في المزيد من إيصال أصوات الشعراء العراقيين إلى ما وراء الحدود والتي كانت، لحظتها، محجوبة بفعل صخب الإعلام والقنابل وضجيج الحرب. وهكذا فقد اتخذت من الشاعر صلاح نيازي نموذجاً وممثلاً عنهم وفي الوقت نفسه كنوع من التكريم له والاحتفاء به كونها من المعجبين بشعره. جعلت منه الشخصية الرئيسية للنصوص وعنونت الديوان باسمه إضافة إلى تبنيها لعبارة "عندما تبدأ الحرب فإن أول من يهجر المدينة هو الحمام" التي كانت قد سمعتها في مكان ما. ولهذا فإننا نجد في الديوان أن الشاعر يتأمل شعبه الذي أصبح بلا حمام فيتحسر. ولكن في القصيدة الأخيرة ثمة باب مفتوح على الأمل بأن الشعب ومهما تأخر الوقت فإنه، ذات يوم، سوف ينال السلام والعيش الكريم الذي يستحقه.

وتقول الشاعرة آنا خوليا أسود عن ديوانها هذا: "إن الشعر مُلزم بأن ينظر إلى الألم والمعاناة وجهاً لوجه، أن يصرخ باسم ضحايا الوحشية، أن يأخذ بأيدي الذين يعانون ويمنحهم الصوت الذي يحاول الآخرون منعه عنهم وأن يثور ضد الجلاد بلا هوادة. إن الشعر مُلزم بأن يتكلم ويرفع الصوت أعلى من أي صخب آخر. وأن يواسي ويهدئ أيضاً، داعياً للسلام مطالباً به دائماً، لا يهجر إصراره هذا على المطالبة بالسلام ولا يدير ظهره للناس أبداً، لأن الشعر عائد للناس، ينتمي لهم، وهو من حقهم، تماماً كحقهم بالحياة وبالحرية".

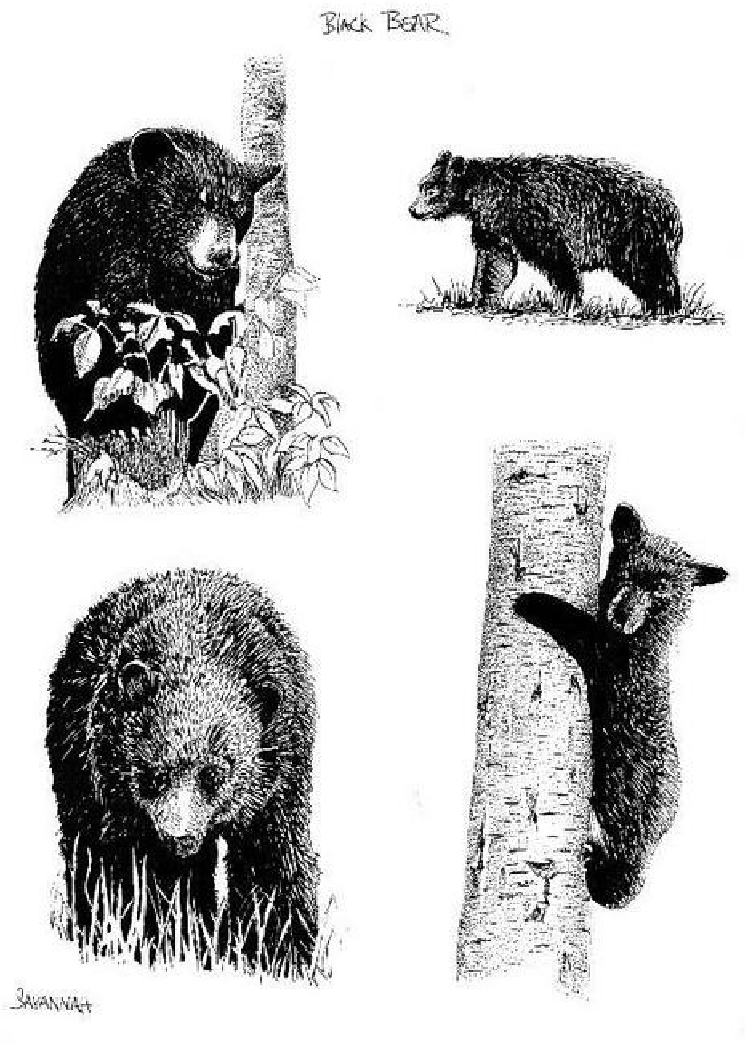
LA CANCIÓN DE LOS OSOS, DE RUBÉN DARÍO



Osos,
osos misteriosos,
yo os diré la canción
de vuestra misteriosa evocación.

Osos negros y velludos del riñón de las montañas,
Silenciosos viejos monjes de una iglesia inmemorial,
Vuestros ritos solitarios, vuestras prácticas extrañas.
Las humanas alimañas
Neronizan y ensangrientan la selvosa catedral.

Osos tristes y danzantes que los zíngaros de cobre
Martirizan, oso esclavo, oso fúnebre, oso pobre,
Arrancado a las entrañas de los montes del Tirol;
Sé leer en vuestros ojos y podemos hablar sobre
Atta Trolí.

Osos blancos de los polos, bellos osos diamantinos,
Nadie sabe que venís

Sobre el hielo, de un imperio de hombres blancos y divinos
Que coronan con castillos argentinos
Su país

Osos,
osos misteriosos,
yo os diré la canción
de vuestra misteriosa evocación.

¡Arcas! ¡Víctima sangrienta! Plantas, flores, ecos, líras;
-Malhadado y cruento crimen del infausto Lycaón;
En Arcadía los amores y los cánticos que inspiras,
Y en el cielo, con Calixto, la inmortal constelación.-
Los dos osos son asombro para el Toro y el León.

¡Va Criniso! Muchas ansias lleva el mozo y vida mucha;
Si cual toro lucha fiero, como oso mejor lucha
Quien de Egesta será esposo;
Cruje el monstruo entre sus brazos en la lucha que se escucha:
¡Lucha oso! ¡Lucha oso! ¡Lucha oso! ¡Lucha oso!

Bellos osos de oro rojo que ya estáis en el regazo
Del azul donde zodiaco sublimiza su visión;
De la lira hacedme oír el son;
Dad saludos a la Virgen en mi nombre, y un zarpazo,
Si podéis, al Escorpión.

Osos,
Osos misteriosos,
Yo os diré la canción
De vuestra misteriosa evocación.

Danzad suave y cuerdamente;
Que la peluda alpargata
Cubra la prudente pata
Cuyo paso no se siente.
Y bajo la huyente frente
Mirad con ojo mañero
Al gitano,
Que canta con voz de Oriente
Un raro canto lejano
Y hace sonar el pandero
Con la mano
Con que remienda el caldero.
A los sueldos de los pobres
Encomienda alrededor vuestra persona,
Y en el parche del pandero caen los cobres
Por los osos, por el perro y por la mona.

Osos,
Osos misteriosos,
Yo os diré la canción
De vuestra misteriosa evocación.

A vuestro lado va la gitanilla.
Brilla
Su mirada de negros diamantes,
Y su boca roja es fresca;
Gitanilla pintoresca,
Gitanilla de Cervantes,
O Esmeralda huguesca.

Ya vosotros bien sabéis de quién os hablo,
Pues cien veces junto a ella contemplasteis cola y cuernos
Del señor don Diablo.
Protector de las lujurias en la tierra y los infiernos.

Osos,
Osos misteriosos,
Yo os diré la canción
De vuestra misteriosa evocación.

Danzad, osos, oh cofrades, oh poetas;
Id, chafad en las campiñas los tomillos y violetas,
Y tornad entre las flores del sendero,
Y danzad en el suburbio para el niño y el obrero,
Para el hosco vagabundo de las escabrosas rutas,
Para el pálido bandido que regó sangre y espanto,
Y para las prostitutas
Que mastican pan de crimen y llanto

Para vuestra filosofía
No señala diferencia ni de halago ni reproche
A la Mística azucena que adornó el pecho del día,
O a la lúgubre mandrágora de la entraña de la noche.

Osos,
Osos misteriosos,
Yo os diré la canción
De vuestra misteriosa evocación.

Osos ermitaños
Que ponéis pavores
En pastores
y rebaños;
El agudo cazador advierte
Que os ponéis en cruz ante la muerte,
O para dar el formidable abrazo
Que ha de exprimir la vida
Contra vuestro regazo;
Vais en dos patas como el adanida,
Es así que he admirado
Vuestro andar de canónigo, o bien de magistrado.
Con la argolla al hocico sacudís vuestra panza.
¡Osos sabios, osos fuertes y cautivos, a la danza!

Osos,

Osos misteriosos,
Yo os diré la canción
De vuestra misteriosa evocación.

Y al pasar un entierro
Os he visto en la senda con la mona y el perro,
Entre el círculo formado por hombres zarrapastrosos.
Grotescos enterradores
Iban conduciendo el carro de podredumbre y de flores;
Como signo de respeto
Descubríanse un mendigo y un soldado.

El gitano se acordó de su amuleto.
Y tú, oso danzarín domesticado,
Se diría que reías como estando en el secreto
Del Finado
De la losa, de la cruz y el esqueleto

Osos,
Osos misteriosos,
Yo os diré la canción
De vuestra misteriosa evocación.

Mas no el réquiem, ni el oremus, ni el responso del gangoso
Chantre llegue a vuestro oído,
Sabio y suave oso;
Mas el canto de las zíngaras, o la música del nido,
O la estrofa del poeta,
O el ruido de los besos, o el ruido
Del amor errante ardiente en la carreta.

Bien sabéis: la vida es corta,
Y teniendo en vuestras fauces una torta,
O un panal,
Profesáis vuestros principios más allá del Bien y el Mal.

Osos,
Osos misteriosos,
Yo os diré la canción
De vuestra misteriosa evocación.

Rubén Darío

Ni los más transgresores poetas modernos se atreven con esta absoluta libertad métrica: hay versos de dieciséis sílabas con hemistiquios octosílabos, dodecasílabos, endecasílabos y decasílabos, que alternan con los octosílabos y tetrasílabos. En el estribillo hay un bisílabo, un hexasílabo, un heptasílabo y un endecasílabo.

ESTAFA EN LOS CONTADORES DE LA LUZ CON AYUDA DEL PSOE Y DEL PP

Al margen de la legalidad, en España, existen núcleos de impunidad donde medran y se enriquecen empresas, empresarios, intermediarios, poderosos, y sanguijuelas de las altas finanzas, gracias a la complicidad de los sucesivos gobiernos del PSOE y del PP, que sólo difieren en sus recursos retóricos; pero coinciden a la hora de velar exclusivamente por sus propios intereses. Mientras que la mayoría de los analistas políticos se despepitan por no rozar ni de lejos estos pufos económicos que debilitan el Estado de Derecho, algunos ciudadanos, siguen su particular periplo contra la prevaricación, el cohecho, el caciquismo, la delincuencia organizada, y, también, contra la indiferencia y la ignorancia de los damnificados, como por ejemplo Antonio Moreno Alfaro, que lleva años denunciando la estafa de los contadores de la luz:

"Su compañía eléctrica le lleva cobrado indebidamente 350 euros de media por el alquiler del contador que tiene usted instalado en su vivienda.
Las direcciones especificadas más adelante corresponden a documentos relacionados con el fraude en los precios de alquiler de los contadores de la luz, que genera 600.000 euros diarios (incluido el IVA), afecta a 23 millones de clientes de las compañías eléctricas y lleva reportados a éstas más de 7.500 millones de euros (incluido el IVA), de los cuales la mitad como mínimo han sido estafados a través del BOE.
La estafa, planificada en 1984 por el PSOE y perfeccionada en 2001 por el PP, se cometió desde el 26.09.1984 hasta el 31.12.1995 a través de Órdenes del Ministerio de Industria y desde el 01.01.1996 hasta el 31.12.2007, a través de Reales Decretos, lo que implica la utilización delictiva de la firma del rey. Desde el 01.01.2008, la estafa se comete nuevamente a través de Órdenes del Ministerio de Industria.
La estafa, que es tan burda que ha sido detectada en 45 minutos por alumnos de 1º de Bachillerato de un Instituto de Sevilla con sólo dos de los cientos de documentos obrantes en la Audiencia Nacional, es posible gracias a la tupida red de corrupción tejida por el PSOE y el PP en la Administración del Estado, muy especialmente en la Administración de abortan fraudulentamente cualquier investigación relacionada con la estafa y escarmientan
**** Breve resumen de la instrucción del procedimiento penal 280/2000** , incoado por la Audiencia Nacional para investigar la estafa y los delitos conexos a ella. La única diligencia practicada por el Juzgado en 18.6 meses fue la toma de declaración a los imputados.*
**** Denuncia de 16.07.2007 ante el fiscal general del Estado por cobro de servicio no prestado** . La denuncia fue archivada con el argumento de que los hechos expuestos en ella ya habían sido investigados en el procedimiento penal 280/2000, lo cual, como sabe el fiscal general del Estado, es falso.*
**** Denuncia de 25.07.2007 ante el fiscal general del Estado por delito contra la corona** . Esta denuncia no ha recibido respuesta.*

EX FISCAL ALICIA ELENA PÉREZ DUARTE HABLA DE LAS REDES DE PROSTITUCIÓN Y TRÁFICO DE MENORES EN MÉXICO

Al menos un millón de niños de América Latina están atrapados en redes de prostitución y pornografía y son ofrecidos a empresarios y políticos, dijo la ex fiscal mexicana y asesora del Instituto Nacional de las Mujeres (Inmujeres) Alicia Elena Pérez Duarte.
En México, unos 30 millones de mujeres han sido víctimas de la violencia.
-10 millones de mujeres han padecido abusos sexuales: un 70 por ciento en su entorno familiar.
-Apenas se denuncian el 5 por ciento de estos delitos.
-45.000 niños son robados o desaparecidos al año en México , y la mayoría de ellos tienen como destino la prostitución, la explotación laboral, el tráfico de órganos o son vendidos en *'adopción'* en el extranjero.
-Según el Fondo de Naciones Unidas para la Infancia (Unicef) y del Centro de Búsquedas de Niños Desaparecidos, en México hay entre 100.000 y 130.000 menores de los que sus familias desconocen su paradero.
-Según la ex-fiscal Pérez Duarte afirmó de que la mayoría de estos menores son

víctimas de redes nacionales e internacionales que los prostituyen o usan para la pornografía.
La ex fiscal explicó que en México existen dos grandes servicios de prostitución infantil: uno, el que se ofrece a empresarios y altos funcionarios en hoteles como 'servicios ejecutivos', y otro destinado a las fiestas de políticos, legisladores, funcionarios y hasta jueces locales, donde los proveedores llevan niñas para que los hombres 'relajen sus tensiones'. Puso como ejemplo el caso de una fiesta donde participó el procurador del estado de Jalisco, Tomás Coronado, en enero pasado, en donde hubo prácticas sexuales con menores de edad.
Aseguró que las redes de prostitución infantil son internacionales:
- *"Si un cliente en Tailandia quiere una niña de Chiapas, desde aquí se la envían"*.
Agregó que hay catálogos con fotografías de estas menores que son utilizados por las redes de traficantes, y que un caso notorio fue el de un alto funcionario de la Procuraduría en Ciudad Juárez en el gobierno anterior, a quien le descubrieron en su escritorio un álbum de estos:
-*No es que fuera parte de una investigación, ni tampoco que fuera un cliente de las mafias, sino que era un proveedor de menores'*, explicó la ex fiscal mexicana.
Pérez Duarte dijo que en muchos casos de violencia y prostitución de mujeres y menores están involucrados agentes policiales y capos del narcotráfico, en complicidad con altos funcionarios.
Explicó que en los 22 meses que estuvo al frente de la Fiscalía especializada en delitos de violencia contra mujeres **(1)** se recibieron 96 denuncias de menores desaparecidas, y que de éstas lograron localizar a 36, de las cuales 28 habían sido víctimas de las redes de pederastas.

1)La ex fiscal Alicia Elena Pérez Duarte para delitos contra mujeres renunció a su cargo en diciembre pasado, *"para no ser cómplice de un Estado protector de mafias que fomentan la prostitución y pornografía infantiles"*, después de que la Suprema Corte considerase como *'no graves'* las violaciones de los derechos humanos en el caso de la periodista Lydia Cacho, quien fue detenida y amenazada de muerte por policías del estado de Puebla como represalia por denunciar una red de pederastas en su libro *'Los demonios del Edén'.* En ese libro, Cacho desenmascaró al empresario Jean Succar Kuri, que era protegido por el empresario Kamel Nacif , y su red de protección incluía también políticos en el estado de Puebla.

¿Quien lleva la cuenta? ¿Quien hace las estimaciones? ¿Cuán fiables son?

En México existe la prostitución infantil, la violencia hacia las mujeres (y los hombres), la pederastia, la explotación sexual, el robo de menores... todos ellos delitos que deberían de evitarse y que en caso de perpetrarse deberían de ser perseguidos con firmeza, inteligencia y seriedad.

No hace falta que sean millones, aunque fuera un solo caso no debería de existir

impunidad.

Lo digo, porque temo que las dudas que puedan generarse en torno a las cifras, también podrían, erróneamente extenderse a la existencia de los delitos.

Fecha: 11/03/2008 18:10.

Autor: Gatopardo a Ramón Mier

Te respondo: lo dicen los informes y estudios realizados por:
-Fiscalía Especial para la Atención de Delitos de Tráfico de Menores
-Policía Cibernética
-Instituto de Investigaciones Jurídicas
-Fundación Nacional de Investigación de Niños Robados y Desaparecidos
-Orientación a la Juventud de México
-Informes de la Unicef
-Centro de Búsquedas de Niños Desaparecidos
-Maria Elena Morera de Galindo, presidenta de México Unido contra la Delincuencia
-Israel Betanzos, presidente de la Asociación Pro Recuperación de Niños Extraviados y Orientación a la Juventud de México
-Julián Pérez, de la Asociación Buscando a Nuestros Hijos
-Erik Gómez Tagle, investigador del Instituto Nacional de Ciencias Penales, (INACIPE)
-Alicia Elena Pérez Duarte, ex fiscal para delitos contra las mujeres
-las cientos de personas que arriesgan su vida y la de sus familias por investigar y denunciar, como Lydia Cacho
-En el informa del Instituto de Investigaciones Jurídicas de la UNAM, donde además se dice que "la estrategia para ayudar en la búsqueda de personas desaparecidas por parte de los cuerpos policíacos e instituciones oficiales es insuficiente, toda vez que no se cuentan con los recursos materiales y humanos que permitan atacar eficazmente el problema" (...)"uno de los principales problemas para la localización de los infantes -que no están previstos en la legislación- es que las bandas de traficantes han creado redes por todo el país, lo cual les permite actuar al margen de la ley."(...) los principales escollos para actuar con "la legislación penal federal son las limitaciones de actuación que da a las autoridades, ya que únicamente podrán conocer del tráfico de menores cuando los delincuentes trasladen o entreguen al infante fuera de territorio nacional, pero no pueden actuar cuando los menores son trasladados dentro del país." A eso hay que añadir que no se admite una denuncia por desaparición hasta que han transcurrido 48 horas, que son cruciales para la impunidad de la que gozan los secuestradores.
Y respecto a quienes arguyen que hay exageración al hablar de la pederastia y la prostitución de menores en México, sólo hay que ver la impudidad y comprensión hacia quienes regalan y degustan "botellas de coñac de doce años", como el Gobernador Mario Marín y Kamel Nacif (niñas menores de doce años en clave usada internacionalmente por los pederastas), que México y Thailandia sean los mayores destinos turísticos para los pederastas, que sea la tercera fuente de dinero negro en México y cuarto en la mafia internacional.
Y que conste que los familiares, investigadores,periodistas y defensores de los derechos humanos que buscan saber lo que ha ocurrido con esos 45.000 niños, y miles de mujeres desaparecidas (de quienes no aparecen sus cadáveres) suelen recibir amenazas y atentados contra su integridad y su seguridad de los delincuentes y de los mismos policías que deberían investigan los secuestros.
Las dudas que se han generado con base y motivo es sobre la complicidad de los

políticos y los próceres con las redes de prostitución de menores, la tortura, violación y el asesinato ritual de jóvenes, (que ya no se circunscribe a Ciudad Juárez) y con el crimen organizado.
Saludos cordiales

Autor: Ramón Mier

Reitero mi condena a los delitos que se mencionan y a la impunidad con que se cometen.

Tu respuesta me abruma, pero no me resulta convincente. Concentrémonos en el primer dato: 30,000,000 de mujeres víctimas de la violencia.

¿Quien ofrece ese dato? ¿Para que periodo? ¿Cómo se consiguió ese dato? ¿A quiénes se considera "víctima de la violencia"?

Fecha: 14/03/2008 09:40.

Autor: Gatopardo a Ramón Mier

No intento abrumar citando parte de las fuentes que utilizo para obtener las cifras escuetas que he puesto en este artículo.
Respecto a la definición de "víctima de la violencia" me temo que es la misma para mujeres, hombres, niños,militares sin graduación y aspirantes a la alcaldía: víctima de la violencia es cualquiera que sea objeto de una agresión o maltrato cuya finalidad sea ajena al bien físico y moral de quien lo sufre. Respecto al porcentaje entre las agresiones y las denuncias son casi exactas a las estadísticas que existen para robos, extorsión, lesiones, corrupción, mordidas, etc en México, según los informes de los observadores internacionales de Derechos Humanos, como el de "Transparencia Internacional", "Amnistía Internacional", etc.
Si te parece una cifra exagerada es porque, efectivamente, cuesta trabajo creerlo; pero en México, en todas las clases sociales, se considera que golpear a las mujeres de la familia y a los animales domésticos es un asunto venial.E incluso refuerza la sensación de hombría de los maltratadores, que por otra parte pueden ser civilizadísimos, muy cultos, y encantadores.
Y la prueba es que frente a los cientos de mujeres secuestradas, violadas, torturadas, mutiladas y asesinadas y desaparecidas en Chihuahua, Ciudad Juárez,etc no ha habido cojones para que los hombres se arriesguen a hacer patrullas ciudadanas para impedir que actúen los secuestradores y defender la integridad y la vida de sus conciudadanas.
Y me da tanta vergüenza como a ti que en las patrullas que se organizan para investigar los asesinatos y las desapariciones, en las búsquedas de pruebas, en las iniciativas para reclamar justicia apenas haya hombres, padres, maridos, hermanos, hijos de las asesinadas y de las desaparecidas.
Así es que,al cabo de mis años, como comprenderás, estoy un poco saturada de que los interlocutores varones os planteéis de entrada cuestiones para reforzar vuestra pasividad y vuestra incredulidad.

Fecha: 14/03/2008 10:38.

Autor: Ramón Mier

Conforme a tu definición de violencia, el 100% de los seres humanos podemos ser considerados víctimas de violencia.

Para resolver cualquier problema hace falta contar con información. En la medida en que esta sea exacta, confiable y oportuna aumentarán las probabilidades de que este pueda resolverse.

El dar a conocer el número de homicidios cometidos en Ciudad Juárez en en los últimos 10 años va muy bien para crear indignación y preocupación, para llamar la atención y para hacer política, pero si lo que se quiere es combatir el problema, ese dato no sirve para nada.

Si cuestiono esas cifras no es para reforzar la pasividad y la incredulidad. Lo hago porque estoy convencido que el sensacionalismo no favorece la solución de los problemas.

Creo que a Stalin se le atribuye la frase "una única muerte es una tragedia, un millón de muertes es una estadística".

Pues bien, por lo que he podido ver hasta ahora esas treinta millones de víctimas no son ni siquiera una estadística, si acaso un recurso discursivo de una funcionaria a la que quizás se le pague demasiado.

ARGENTINA: INFORME DE LA COMISIÓN NACIONAL SOBRE LA DESAPARICIÓN DE PERSONAS

"*Primero mataremos a todos los subversivos, luego a sus colaboradores, después a los simpatizantes, luego a los indiferentes; y por último a los tímidos"* **General Ibérico Saint Jean, Gobernador de la Provincia de Buenos Aires. 1977**

INFORME DE LA COMISIÓN NACIONAL SOBRE LA DESAPARICIÓN DE PERSONAS

PRÓLOGO

Durante la década del 70 la Argentina fue convulsionada por un terror que provenía tanto desde la extrema derecha como de la extrema izquierda, fenómeno que ha ocurrido en muchos otros países. Así aconteció en Italia, que durante largos años debió sufrir la despiadada acción de las formaciones fascistas, de las Brigadas Rojas y de grupos similares. Pero esa nación no abandonó en ningún momento los principios del derecho para combatirlo, y lo hizo con absoluta eficacia, mediante los tribunales ordinarios, ofreciendo a los acusados todas las garantías de la defensa en juicio; y en ocasión del secuestro de Aldo Moro, cuando un miembro de los servicios de seguridad le propuso al General Della Chiesa torturar a un detenido que parecía saber mucho, le respondió con palabras memorables: *«Italia puede permitirse perder a Aldo Moro. No, en cambio, implantar la tortura »* .

No fue de esta manera en nuestro país: a los delitos de los terroristas, las Fuerzas Armadas respondieron con un terrorismo infinitamente peor que el combatido, porque desde el 24 de marzo de 1976 contaron con el poderío y la impunidad del Estado absoluto, secuestrando, torturando y asesinando a miles de seres humanos.

Nuestra Comisión no fue instituída para juzgar, pues para eso estan los jueces constitucionales, sino para indagar la suerte de los desaparecidos en el curso de estos años aciagos de la vida nacional. Pero, después de haber recibido varios miles de declaraciones y testimonios, de haber verificado o determinado la existencia de cientos de lugares clandestinos de detención y de acumular más de cincuenta mil páginas

documentales, tenemos la certidumbre de que la dictadura militar produjo la más grande tragedia de nuestra historia, y la más salvaje. Y, si bien debemos esperar de la justicia la palabra definitiva, no podemos callar ante lo que hemos oído, leído y registrado; todo lo cual va mucho más allá de lo que pueda considerarse como delictivo para alcanzar la tenebrosa categoría de los crímenes de lesa humanidad. Con la técnica de la desaparición y sus consecuencias, todos los principios éticos que las grandes religiones y las más elevadas filosofías erigieron a lo largo de milenios de sufrimientos y calamidades fueron pisoteados y bárbaramente desconocidos.

Son muchísimos los pronunciamientos sobre los sagrados derechos de la persona a través de la historia y, en nuestro tiempo, desde los que consagró la Revolución Francesa hasta los estipulados en las Cartas Universales de Derechos Humanos y en las grandes encíclicas de este siglo. Todas las naciones civilizadas, incluyendo la nuestra propia, estatuyeron en sus constituciones garantías que jamás pueden suspenderse, ni aun en los más catastróficos estados de emergencia: el derecho a la vida, el derecho a la integridad personal, el derecho a proceso; el derecho a no sufrir condiciones inhumanas de detención, negación de la justicia o ejecución sumaria.

De la enorme documentación recogida por nosotros se infiere que los derechos humanos fueron violados en forma orgánica y estatal por la represión de las Fuerzas Armadas. Y no violados de manera esporádica sino sistemática, de manera siempre la misma, con similares secuestros e idénticos tormentos en toda la extensión del territorio. ¿Cómo no atribuirlo a una metodología del terror planificada por los altos mandos? ¿Cómo podrían haber sido cometidos por perversos que actuaban por su sola cuenta bajo un régimen rigurosamente militar, con todos los poderes y medios de información que esto supone? ¿Cómo puede hablarse de *«excesos individuales»*? De nuestra información surge que esta tecnología del infierno fue llevada a cabo por sádicos pero regimentados ejecutores. Si nuestras inferencias no bastaran, ahí están las palabras de despedida pronunciadas en la Junta Interamericana de Defensa por el jefe de la delegación argentina, General Santiago Omar Riveros, el 24 de enero de 1980: *«Hicimos la guerra con la doctrina en la mano, con las órdenes escritas de los Comandos Superiores»* . Así, cuando ante el clamor universal por los horrores perpetrados, miembros de la Junta Militar deploraban los *«excesos de la represión, inevitables en una guerra sucia»* , revelaban una hipócrita tentativa de descargar sobre subalternos independientes los espantos planificados.

Los operativos de secuestro manifestaban la precisa organización, a veces en los lugares de trabajo de los señalados, otras en plena calle y a la luz del día, mediante procedimientos ostensibles de las fuerzas de seguridad que ordenaban *«zona libre»* a las comisarías correspondientes. Cuando la víctima era buscada de noche en su propia casa, comandos armados rodeaban la manzanas y entraban por la fuerza, aterrorizaban a padres y niños, a menudo amordazándolos y obligándolos a presenciar los hechos, se apoderaban de la persona buscada, la golpeaban brutalmente, la encapuchaban y finalmente la arrastraban a los autos o camiones, mientras el resto de comando casi siempre destruía o robaba lo que era transportable. De ahí se partía hacia el antro en cuya puerta podía haber inscriptas las mismas palabras que Dante leyó en los portales del infierno: *«Abandonad toda esperanza, los que entrais»* .

De este modo, en nombre de la seguridad nacional, miles y miles de seres humanos, generalmente jóvenes y hasta adolescentes, pasaron a integrar una categoría tétrica y fantasmal: la de los *Desaparecidos*. Palabra - ¡triste privilegio argentino! - que hoy se escribe en castellano en toda la prensa del mundo.

Arrebatados por la fuerza, dejaron de tener presencia civil. ¿Quiénes exactamente los habían secuestrado? ¿Por qué? ¿Dónde estaban? No se tenía respuesta precisa a estos interrogantes: las autoridades no habían oído hablar de ellos, las cárceles no los tenían en sus listas, la justicia los desconocía y los *habeas corpus* sólo tenían por contestación el silencio. En torno de ellos crecía un ominoso silencio. Nunca un secuestrador arrestado, jamás un lugar de detención clandestino individualizado, nunca la noticia de una sanción a los culpables de los delitos. Así transcurrían días, semanas, meses, años de incertidumbres y dolor de padres, madres e hijos, todos pendientes de rumores, debatiéndose entre desesperadas expectativas, de gestiones innumerables e inutiles, de ruegos a influyentes, a oficiales de alguna fuerza armada que alguien les recomendaba, a obispos y capellanes, a comisarios. La respuesta era siempre negativa.

En cuanto a la sociedad, iba arraigándose la idea de la desprotección, el oscuro temor de que cualquiera, por inocente que fuese, pudiese caer en aquella infinita caza de brujas, apoderándose de unos el miedo sobrecogedor y de otros una tendencia consciente o inconsciente a justificar el horror: *«Por algo será»* , se murmuraba en voz baja, como queriendo así propiciar a los terribles e inescrutables dioses, mirando como apestados a los hijos o padres del desaparecido. Sentimientos sin embargo vacilantes, porque se sabía de tantos que habían sido tragados por aquel abismo sin fondo sin ser culpable de nada; porque la lucha contra los «subversivos» , con la tendencia que tiene toda caza de brujas o de endemoniados, se había convertido en una represión demencialmente generalizada, porque el epiteto de subversivo tenía un alcance tan vasto como imprevisible. En el delirio semántico, encabezado por calificaciones como *«marxismo-leninismo»* , *«apátridas»* , *«materialistas y ateos»* , *«enemigos de los valores occidentales y cristianos»* , todo era posible: desde gente que propiciaba una revolución social hasta adolescentes sensibles que iban a villas-miseria para ayudar a sus moradores. Todos caían en la redada: dirigentes sindicales que luchaban por una simple mejora de salarios, muchachos que habían sido miembros de un centro estudiantil, periodistas que no eran adictos a la dictadura, psicólogos y sociólogos por pertenecer a profesiones sospechosas, jóvenes pacifistas, monjas y sacerdotes que habían llevado las enseñanzas de Cristo a barriadas miserables. Y amigos de cualquiera de ellos, y amigos de esosamigos, gente que había sido denunciada por venganza personal y por secuestrados bajo tortura. Todos, en su mayoría inocentes de terrorismo o siquiera de pertenecer a los cuadros combatientes de la guerrilla, porque éstos presentaban batalla y morían en el enfrentamiento o se suicidaban antes de entregarse, y pocos llegaban vivos a manos de los represores.

Desde el momento del secuestro, la víctima perdía todos los derechos; privada de toda comunicación con el mundo exterior, confinada en lugares desconocidos, sometida a suplicios infernales, ignorante de su destino mediato o inmediato, susceptible de ser arrojada al río o al mar, con bloques de cemento en sus pies, o reducida a cenizas; seres que sin embargo no eran cosas, sino que conservaban atributos de la criatura humana: la sensibilidad para el tormento, la memoria de su madre o de su hijo o de su mujer, la infinita verguenza por la violación en público; seres no sólo poseídos por esa infinita angustia y ese supremo pavor, sino, y quizás por eso mismo, guardando en algún rincón de su alma alguna descabellada esperanza.

De estos desamparados, muchos de ellos apenas adolescentes, de estos abandonados por el mundo hemos podido constatar cerca de nueve mil. Pero tenemos todas las razones para suponer una cifra más alta, porque muchas familias vacilaron en denunciar los secuestros por temor a represalias. Y aun vacilan, por temor a un resurgimiento de estas fuerzas del mal.

Con tristeza, con dolor hemos cumplido la misión que nos encomendó en su momento el Presidente Constitucional de la República. Esa labor fue muy ardua, porque debimos recomponer un tenebrosos rompecabezas, después de muchos años de producidos los hechos, cuando se han borrado liberadamente todos los rastros, se ha quemado toda documentación y hasta se han demolido edificios. Hemos tenido que basarnos, pues, en las denuncias de los familiares, en las declaraciones de aquellos que pudieron salir del infierno y aun en los testimonios de represores que por oscuras motivaciones se acercaron a nosotros para decir lo que sabían.

En el curso de nuestras indagaciones fuimos insultados y amenazados por los que cometieron los crímenes, quienes lejos de arrepentirse, vuelven a repetir las consabidas razones de *«la guerra sucia»* , de la salvación de la patria y de sus valores occidentales y cristianos, valores que precisamente fueron arrastrados por ellos entre los muros sangrientos de los antros de represión. Y nos acusan de no propiciar la reconciliación nacional, de activar los odios y resentimientos, de impedir el olvido. Pero no es así: no estamos movidos por el resentimiento ni por el espíritu de venganza; sólo pedimos la verdad y la justicia, tal como por otra parte las han pedido las iglesias de distintas confesiones, entendiendo que no podrá haber reconciliación sino después del arrepentimiento de los culpables y de una justicia que se fundamente en la verdad. Porque, si no, debería echarse por tierra la trascendente misión que el poder judicial tiene en toda comunidad civilizada. Verdad y justicia, por otra parte, que permitirán vivir con honor a los hombres de las fuerzas armadas que son inocentes y que, de no procederse así, correrían el riesgo de ser ensuciados por una incriminación global e injusta. Verdad y justicia que permitirán a esas fuerzas considerarse como auténticas herederas de aquellos ejércitos que, con tanta heroicidad como pobreza, llevaron la libertad a medio continente.

Se nos ha acusado, en fin, de denunciar sólo una parte de los hechos sangrientos que sufrió nuestra nación en los últimos tiempos, silenciando los que cometió el terrorismo que precedió a marzo de 1976, y hasta, de alguna manera, hacer de ellos una tortuosa exaltación. Por el contrario, nuestra Comisión ha repudiado siempre aquel terror, y lo repetimos una vez más en estas mismas páginas. Nuestra misión no era la de investigar sus crimenes sino estrictamente la suerte corrida por los desaparecidos, cualesquiera que fueran, proviniesen de uno o de otro lado de la violencia. Los familiares de las víctimas del terrorismo anterior no lo hicieron, seguramente, porque ese terror produjo muertes, no desaparecidos. Por lo demás el pueblo argentino ha podido escuchar y ver cantidad de programas televisivos, y leer infinidad de artículos en diarios y revistas, además de un libro entero publicado por el gobierno militar, que enumeraron, describieron y condenaron minuciosamente los hechos de aquel terrorismo.

Las grandes calamidades son siempre aleccionadoras, y sin duda el más terrible drama que en toda su historia sufrió la Nación durante el periodo que duró la dictadura militar iniciada en marzo de 1976 servirá para hacernos comprender que únicamente la democracia es capaz de preservar a un pueblo de semejante horror, que sólo ella puede mantener y salvar los sagrados y esenciales derechos de la criatura humana. Unicamente así podremos estar seguros de que NUNCA MÁS en nuestra patria se repetirán hechos que nos han hecho trágicamente famosos en el mundo civilizado.

JOSÉ DE VARGAS PONCE

...tampoco sabihonda, ¡Dios me guarde!
Asco da la mujer sobre un in-folio.
La que a Plauto comenta y hace alarde
de ilustrar a Terencio en un escolio;
la que cita a Nasón mañana y tarde,
apostillando a Grevio y a Nizolio,
vaya, si gusta, con Ovidio al Ponto
y busque entre los getas algún tonto.
¿Dómine por mujer?¿Purista?¡Cuerno!
¿Qué tilde escapa de sus uñas horro?
¡Armar un zipizape sempiterno
porque en lugar de gorra dije gorro!
¡O bien porque escribí sin h ivierno
verme tratar de bárbaro y de porro,
y dar la casa y la quietud al diablo!
¿Por qué?¡Crimen atroz!¡Por un vocablo!

LA COSTUMBRE DE ACUDIR EN AYUDA DEL VENCEDOR

Soy de esa gente rara a la que le parece perfectamente deseable una oposición dura y decidida contra el Gobierno, sea el que sea, para que no se degrade la democracia, mientras que en la mayoría , entre los que incluyo a los intelectuales, hay una tradición consistente en acudir en ayuda del vencedor, con el carnet de comisario político "in pectore", para fustigar al disidente, sea el que sea.
Cuando De Gaulle entró en Paris, encontró en los archivos de la Gestapo, en el 48 de la Avenue Foch, tal cantidad de denuncias firmadas por ciudadanos franceses para identificar subversivos, que tuvo que tomar la decisión de ocultarlas para no tener que fusilar a una gran parte de la población. Durante la guerra civil española y en la posguerra ese espíritu revanchista guió con sus denuncias a los verdugos. Los investigadores de nuestra historia reciente, que han analizado los documentos originales de sumarios judiciales e informes policiales del franquismo, saben que lo más repugnante para un estómago delicado es la prosa de los millares de denuncias de quienes acudieron en defensa de los vencedores para indicarles las piezas a abatir.
La única cruzada que considero lícita es la que impida alinearse con los que mandan, y ensañarse contra quien no esté en el poder ni lo ostente, y no secundar la caza al adversario de los McCarthy, Beria, Heydrich, y Mocenigo de cada época. Apelar al bien general, a la defensa de unos principios superiores, o al voto útil para atizar el odio contra nuestros adversarios, sean talibanes de sacristía o nacionalistas representantes del 0,5% de la población, me parece una obscenidad.

Y tiene bemoles que a estas alturas sea sospechoso decir que soy apátrida, de izquierdas, republicana y atea, y que considero imprescindible que haya libertad de expresión y manifestación para todos, incluidos mis adversarios, entre los que están los únicos enemigos dignos de respeto que tengo, y algunos de mis mejores amigos.

Gatopardo

Disculpa el escrúpulo. Esta foto la recuerdo desde que tenía 12 años, y como todas las de Cartier, que me enseñó una prima fotógrafa de la que estaba enamorado, me inpresionó, como diría un notario, vivamente. Pero siempre la asocié a las purgas que se llevaron a cabo después de la liberación, no durante. No que yo esté contra las purgas por principio y por sistema, pero recuerdo que mi viejo siempre me hablaba de la furia que se desató en ese período de la historia francesa, pintándolo como algo lamentable, se entiende, sobre todo teniendo en cuenta el pobre papel que hicieron la mayor pare de las fuerzas vivas francesas durante todo el tiempo del "apaciguamiento", luego en la "dròle de guerre", y finalmente durante la ocupación. parece que la resistencia tampoco fue tanta, ¿no? En fin, Cartier, qué fenómeno.

Gracias por avisarme. Quizás lleves razón, y el retrato sea el de la caza de los colaboracionistas; pero el entorno humano y las vestimentas me ha parecido siempre el de uno de los campos de trabajo nazi.
Maravilloso Cartier Bresson, sí. Sea como sea y cual sea el contexto histórico ha logrado captar la bajeza y la miseria humana de la delación y el ensañamiento contra el vencido.

FRASES ANTOLÓGICAS DEL EX-ALCALDE DE MADRID, DON JOSÉ MARÍA ÁLVAREZ DEL MANZANO

"Conociendo a este alcalde, y contra lo que digan los traductores de la Biblia, es seguro que Dios, que es omnisciente, como árbol de la sabiduría del Edén no puso un manzano"

Don José María Álvarez del Manzano y López del Hierro , Presidente de IFEMA , durante los doce años que fue alcalde de Madrid se caracterizó por convocar a los periodistas varias veces al día para pontificar sobre los asuntos mas variopintos. Y aquí van algunas de sus frases:

Una explosión de gas había provocado heridas a siete inmigrantes que vivían en aquella zona. José María Álvarez del Manzano informa del suceso:
-*"Es que hay 100.000 personas que vienen a Madrid y se ponen a vivir. ¿Por qué no se quedan en sus países o en sus pueblos? ¡La cantidad de gente que viene a Madrid sin que les llamemos…!*
En el Día de la bicicleta, organizado por el Ayuntamiento de Madrid, dirigiéndose a más de 400.000 personas en bicicleta:
-*"Madrid no sirve para la bicicleta."*
Comentando la noticia publicada de que había aparcado mal su coche para ir al teatro:
-*"Eso es una broma. Cuando un coche estaciona con un conductor dentro* (su chofer, que esperó a que acabara la obra) *se puede retirar, no esta mal aparcado."*
Al enterarse de que la *Agencia de Protección de Datos* investigaba a una empresa contratada por el Ayuntamiento:
-*"¿La Agencia de proteccion de datos? ¿Eso que es? Es como tantas cosas particulares que se quieren hacer famosas, como una agencia de viajes...*
Tras conocer un informe del Consejo de Europa que consideraba "inaceptables" las condiciones de vida de los chabolistas de la Cañada Real:
-*"Cañada Real no es una carcel, que se vaya el que quiera."*
Ante la noticia de que Rusia tenía apuntados sus misiles hacia paises de la OTAN:
-*"Nos preocupa mas el 5-1 al Real Madrid que un ataque de Yeltsin. Pero si pasara algo, estamos preparados.En caso extremo, tenemos hasta depósitos de cadáveres."*
Al enterarse de que un grupo de inmigrantes rumanos se había ido a la costa a vender su revista, comento:

-*"Se han ido de vacaciones, es tremendo."*
En diciembre de 1999 nadie sabía aún donde ni cuando iba a celebrarse la fiesta de bienvenida del nuevo milenio. Se le preguntó si no temía que la gente no acudiera ante la falta de información:
-*"No siempre hace falta gente para celebrar una fiesta."*
En una entrevista, explica su labor:
-*"No hay nada mejor que ser alcalde"*
Sobre la inmigración:
-*"La etnia magrebí viene a trabajar, la rumana, a instalarse en la marginalidad."*
Al comentar el asesinato a hachazos de una mujer a manos de su compañero sentimental:
-*"Las uniones de hecho producen mas deterioro y mas violencia que las uniones matrimoniales."*
Desmintiendo los problemas de atascos circulatorios:
-*"En Madrid, no hay atascos, hay tráfico más o menos fluido"*
En el Hipódromo, una periodista le pregunta si es aficionado a la hípica:
-*Pues la verdad es que sí. No olviden ustedes que yo tengo un tío que fue recordmen mundial de salto de longitud"*

Esta labia, este verbo inspirado, esta soltura conceptual le valió el ***Premio Cabestro 2000** y permanecer en la memoria de los madrileños, que son tela de guasones, y les va la marcha masoca.

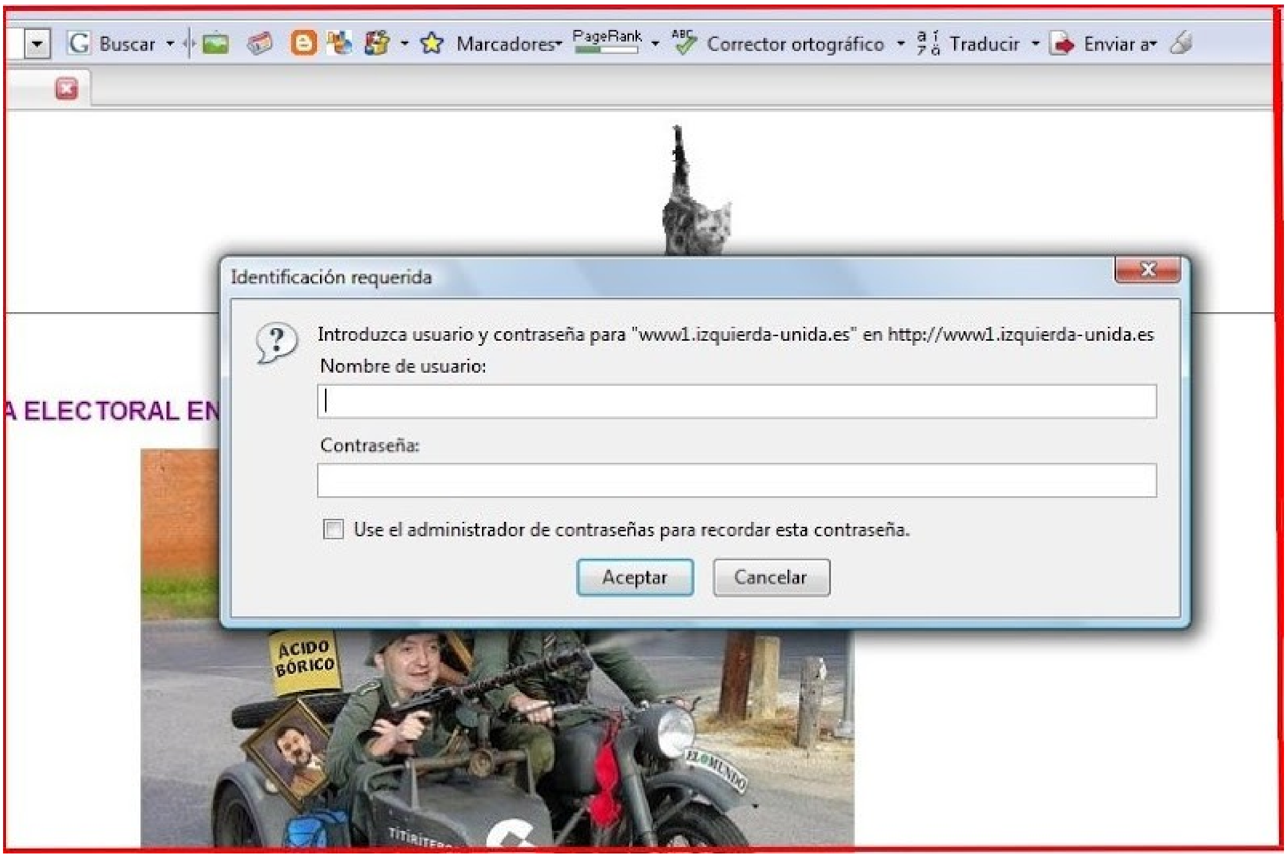
CAMPAÑA ELECTORAL EN ESPAÑA: SABOTAJE A IZQUIERDA UNIDA



Quienes hemos asistido en las últimas legislaturas a la oposición paniaguada de Izquierda Unida, votando en el Congreso por el Canon Digital, y otras lindezas, no acabamos de entender que haya quien los considere otra cosa que una asociación de bienhechores dirigida por una casta de funcionarios de bajo perfil intelectual, profesional y moral, que no molestan ni aportan nada. No obstante, la web de Izquierda Unida ha sido saboteada por los energúmenos de la casta más cerril, los hijos y nietos de los franquistas que jamás se han enfrentado al Tribunal Internacional de Crímenes contra la Humanidad, mientras nuestros jueces estrella se hacen un curriculum democrático persiguiendo a los genocidas de otros países. Y, de rebote, todos los que teníamos entre nuestros enlaces la web de Izquierda Unida (http://www1.izquierda-unida.es) e, incluso, quienes la hemos enlazado en alguno de nuestros artículos, nos hemos encontrado con un formulario emergente que nos pedía identificación y contraseña.
La única solución es eliminar el enlace que contiene el código malicioso que han puesto los que han saboteado la web de Izquierda Unida.
Y la solución definitiva es desclasificar todos los documentos oficiales del franquismo, y que los criminales y los cómplices de los crímenes de lesa humanidad en el franquismo, sean identificados, procesados, y juzgados en el Tribunal de La Haya, puesto que nuestros jueces no son imparciales, por consanguinidad, amistad e intereses. Porque, está visto que esa impunidad para los criminales ha dado fuerza a sus retoños, que siguen persiguiendo a "los rojos", aunque estos hayan virado al rosa desvaído, como los de Izquierda Unida. Imagínense en qué ha quedado ese bonito cuento del consenso democrático de la transición española , donde se pactó la desmemoria por decreto: para no "crispar", y como ya no quedan trotskistas, Izquierda Unida ha tenido el detalle de culpar a los anarquistas del sabotaje.
En cualquier otro país europeo si se vandalizara en plena campaña electoral la web del tercer partido político, se habría tirado la ciudadanía a la calle, el Ministerio del Interior

habría puesto a trabajar a la Brigada de Delitos Informáticos, y, sin embargo, en el país europeo donde existe el mayor consumo y tráfico de estupefacientes, donde se blanquea más dinero procedente de la esclavitud sexual, la pederastia, las drogas, el tráfico de seres humanos y las actividades delictivas, donde los millonarios defraudan a Hacienda sin pudor, y la economía sumergida está enquistada en el tejido productivo, donde el salario mínimo interprofesional -pactado por los sindicatos, la patronal y el gobierno- ha hecho que un 20% de la población esté por debajo del umbral de la pobreza, aquí no pasa nada.

"...nuestros jueces no son imparciales, por consanguinidad, amistad e intereses." Así se hizo la transición. La amnistía fue sobre todo para ellos. Para eso ganaron la guerra, aunque no sé si perdieron la paz, como dijo alguno.

Fecha: 03/03/2008 15:14.

Autor: Gatopardo

El franquismo y los franquistas han tenido bula y venia, y siguen teniéndola bajo este régimen, heredero y continuador , maquillado de demócratas.
Al fin y al cabo, el Partido Comunista y el PSOE ofrecieron desmantelar los movimientos ciudadanos y vecinales a cambio de compartir la tarta.
Y los Cándido y los Morala que no se plegaron están procesados con pruebas falsas o en la cárcel. Con el beneplácito de IU y del PSOE.

INFORMACIÓN SIN CRISPACIÓN. ¡VOTO A BRÍOS!

A quienes se preguntan y nos preguntan cómo conseguimos esa ponderación y ecuanimidad a la hora de limpiarnos el culo con los propósitos de los presentes y futuros *capos* de la mafia literaria, económica y política, y qué fumamos, qué marca de garrafón nos inspira, respondemos: hemos tenido una excelente escuela y buenos maestros, y a ellos os encomendamos para instruiros, desasnaros, triunfar en la vida, hacerla más amena, y dejar esa grisalla en la que se rebozan los insatisfechos y los resentidos.

Y no os hará falta *botox*, ni regímenes de adelgazamiento, ni antidepresivos, ni rayitas de coca, ni un coche carísimo, ni pasar por el quirófano para poneros lo que no tenéis y eliminar lo que es vuestro y no del banco, ni necesitaréis ir a Universidades privadas para que os regalen un título por unos milloncejos.

Leed La Kodorniz, *humor extremo para personas moderadas*, y dejaos de crispaciones y monsergas, que ya lo dijo el profeta: "*Tomarse en serio es de mala educación.*"

De nada, ya sabéis que me gusta ser útil.

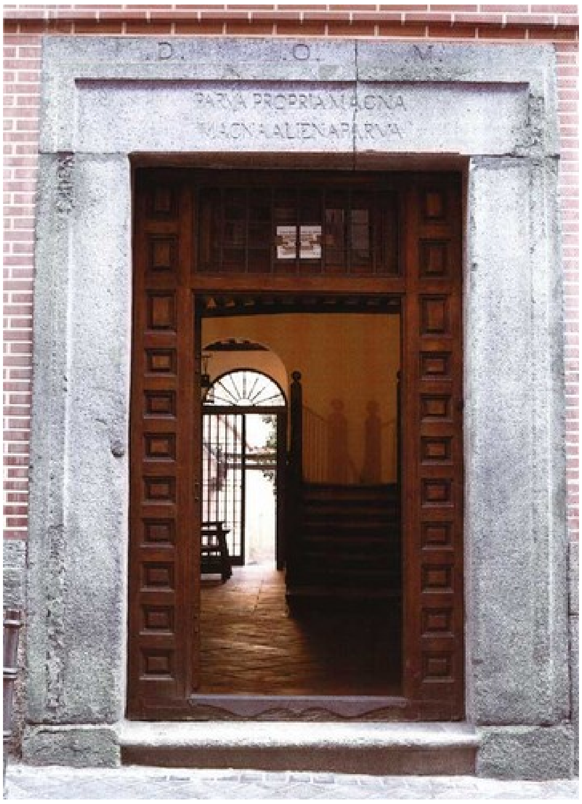
LOPE DE VEGA: QUIEN TE ME ENOJÓ, ISABEL



Quien te me enojó, Isabel,
que con lágrimas lo pene;
hágote voto solene
que pueden doblar por él.
Vuelve, Isabel, esos ojos;
que no soy yo por lo menos
quien a tus ojos serenos
quitó luz y puso enojos.
¿Quién tan bárbaro y crüel,
a tu hermosura atrevido,
causa de tu enojo ha sido?
¿Quién te me enojó, Isabel?
No es posible que tuviese
noticia de mi rigor,
sin que luego de temor
súbitamente muriese.
Quien te enojó, ¿vida tiene?
¿Que donde estoy vivo esté?
Dime quién es; que yo haré
que con lágrimas lo pene.
Dime cómo y de qué suerte
que le mate se te antoja,
porque en sacando la hoja
soy guadaña de la muerte.
Si el Cid a su lado viene,
gigote de hombres haré,
y de que lo cumpliré
hágote voto solene.

Si yo me enojo en Madrid
con quien a ti te ha enojado,
haz cuenta que se ha tocado
la tumba en Valladolid.
Porque en diciendo, Isabel,
que he de matalle, está muerto.
No hay que esperar, porque es cierto
que pueden doblar por él.

COMPARSA DE CÁDIZ: 1800 LOS INMORTALES: POPURRI

Popurri de 1800 Los inmortales.

El que sale del alma es el único fuego que no me quema,
La que sale de Cádiz es la única claridad que me resucita,
Y la del Nazareno es la única cruz que no me envenena,
Y la única plata que llevo conmigo es porque es la plata de la Tacita.
Y el fuego para los demonios, la claridad para el que mande,
Las cruces para San Antonio y la plata para quien te quiera.
Y a ti chupa la sangre.

La sangre que aquí me han dado, ha sido sangre del pueblo,
Única sangre que bebo, por eso he resucitado.
Y como inmortalizado, hago inmortal a mi pueblo.
Y mientras que las derrame, no querré más sobras de vino.
Y beberé del prohibido, aunque me muera de hambre,
Por eso bebo tu sangre y me emborracho contigo.

No quiero ver a mi pueblo desangrado,
Por los colmillos de los envenenados.
Porque mi pueblo no tiene sangre azul,
Que es de sangre roja de vida y juventud.
Y como no quiero verlo desangrado
Por eso tiro en el cuello los bocados.
Y lo que hagan conmigo me da igual,
Porque la sangre del pueblo es inmortal.

Resistiré las tentaciones delante de los fanfarrones,
Porque a mi no me da la gana que nos gobiernen por cañones.
Que los tirabuzones son de las gaditanas.

Resistiré constituciones que esconden crímenes de Estado,
Y amparan líderes ladrones, en los sillones del Senado.
Que es donde están sentados los nuevos fanfarrones.
Por eso puesto a resistir, resistiré que en sus palabras,
Me entre por los dos oídos y por ninguno me salga,
Por eso puesto a recibir, resistiré que en sus palabras.
Me entre por los dos oídos y por ninguno me salga.
Resistiré las tentaciones.

Recuerdo que no quedaba dos lunas para primavera,
Cuando la vi que bajaba con su morada bandera,
Y que se oía su padre cantando desde la torre:
“No se te olvide una calle en la que pongas tu nombre”.

Recuerdo que le decía con su morada bandera:
“Si yo tuviera una reina sería Lolita la Piconera”.
Y si Lolita no fuera, que fuera reina su hermana,
Que es la más republicana por eso le llama Pepa.
Que con Lolita y la Pepa, que con la Pepa y la Lolita,
No harían falta las puertas de tierra en la Tacita.

Para ser inmortal no hace falta ser un hombre histórico,
Que llevar una vida adelante oficio de héroe,
Más allá que siempre la ética bajo su músculo,
Me permita dormir cada noche escuchando su música.
Aun sabiendo que antes del día le espera la fábrica,
Y que nunca será bautizado como Jesucristo,
Que tendrá una única sabana y cien mil carnavales distintos,
Aún sabiendo que antes del sábado ni los periódicos,
Venderán una foto de archivo con su pie de página,
Otra vez han quemado los puentes, otra vez han quemado al obrero,
Pero no han apagado a la gente, la más valiente la de astilleros,
Mi palabra de carnavalero mi comparsa no te olvida
Y cuando llegue febrero tirará por la bahía.
Otra vez han quemado los puentes, otra vez han quemado al obrero,
Pero no han apagado a la gente, la más valiente la de astilleros,
Mi palabra de carnavalero mi comparsa no te olvida,
Aún sabiendo que antes del día le espera la fábrica.

Ya te dije que la claridad, la única que no me quema,
Es la del mar, la libertad, la gaditana.
Ni mata si es de plata la Tacita,
La que me crucifica en tu ventana,
La que por más galana, más bonita.
La del mar, la claridad, la que me grita,
La vida que resucita junto a ti cada mañana.
Te dije que la plata en tu ventana,
La del mar, la claridad de la Tacita,
Es la que resucita mi bonita gaditana.
Y si del alma tuya sale el fuego,
Recordarás que a mi el fuego,
el único que no me quema,
De tu alma que locura la candela,

Aunque me crucifique de veneno,
Como es de tu ventana por lo menos,
Y aunque al mar le falte el agua no me quema
Igual que no me envenena la cruz del Nazareno.
Igual que no me envenena la cruz de carnavales.
Desenterrando los puñales de las arenas salías
Y con su sangre escribía:
"Los inmortales, los inmortales, los inmortales"

Letra y música: **Juan Carlos Aragón Becerra.**
Director: **Francisco Javier Bohorquez Gutierrez**

Si al escucharlo se te pone un nudo en la garganta es que aún no tienes el gusto estragado ni el cerebro en compota: necesitas una lobotomía para no desentonar con los consumidores de los cantantes y músicos más vendidos.

UN BOSQUE PARA JUAN ANTONIO CEBRIÁN EN RIBA DE SAELICES (GUADALAJARA)

Artículo precedente en Gatopardo: Ha muerto Juan Antonio Cebrián

Nos hacemos eco y secundamos este llamamiento para todos los rosaventeros: De la página oficial de Juan Antonio Cebrián:

"El próximo 1 de marzo todos los rosaventeros o antiguos murciélagos de buena voluntad, gran corazón, con fortaleza y ánimo de equipo para plantar gran cantidad de árboles, tienen una cita en el pueblo Riba de Saelices (Guadalajara) dentro del parque natural del Alto Tajo. Los que estén dispuestos a ir deberán traer calzado y ropa cómoda susceptible de mancharse. Bocadillos o comida para pasar el día, ya que no hay sitios próximos donde comprar y sobre todo, ganas de trabajar y disfrutar.
El Proyecto bosque Cebrián nace de la necesidad que tenía un grupo de oyentes por devolver a Juan Antonio Cebrián - maestro de periodistas y fundador de *La Rosa de los Vientos* - cada noche de ensueño que les brindó a través de las ondas. Después de muchas ideas y propuestas, tomaron la decisión más apropiada: apadrinar árboles. Pensaron que un gran homenaje sería crear vida reforestando nuestros bosques como gesto de amor, cariño y admiración al "Cebri", para que se sintiera orgulloso por haber sabido transmitir a sus loados oyentes el respeto que él sentía por "Gaia" y así, tanto su esposa Silvia como su querido hijo Alejandro, poder compartir un rinconcito donde pasear, que además fuera un vivo reflejo de los hondos sentimientos de los rosaventeros hacia su locutor favorito. No obstante, se barajaron diferentes ubicaciones optando por un bosque que estuviera cuidado y protegido. Con dicha misión Charo, más conocida como Gwendal en www.rosavientos.es contactó con Miguel Ángel Valladares director de comunicación de WWF.Adena , gran amigo del programa y antiguo colaborador de La Rosa de los Vientos. Adena tenía en marcha varios proyectos en Guadalajara y el 5 de Febrero confirmaron el lugar exacto de la ubicación *"Del Bosque de Cebrián"*, el sitio elegido era Riba de Saelices, donde había tenido lugar el terrible incendio de julio de 2005 , una zona muy necesitada de repoblación forestal y relacionada con Cebrián –manchego de pro- por formar parte de su querida comunidad Castilla-La Mancha.
Para todos aquellos osados que quieran participar de ésta maravillosa empresa detallamos recorrido y horarios a seguir:

Riba de Saelices se encuentra accesible desde la autovía de Madrid - Guadalajara - (A2), por la salida 132 hasta Alcolea del Pinar. Una vez allí tomar la carretera CM-2113 (24 KM), seguidamente la carretera GU-951 que da acceso a Riba de Saelices y buscar el Frontón de la entrada.
9:00-10:00….El punto de reunión será el frontón, a la entrada del pueblo…..allí la gente tomará contacto. Todos los que dentro de la logística de ADENA puedan subir a plantar, lo harán…..mientras el resto espera su turno.
10:00 a 10.15……subida al merendero donde un responsable de ADENA comentará los pormenores de la actividad y dará un folleto informativo comentando el proyecto y cómo realizar la repoblación…..
14:30 - 15:00: Una vez terminado el trabajo tiempo libre para retomar fuerzas comiendo y disfrutando del paisaje , la conversación y la compañía que los que allí nos reunamos: oyentes, colaboradores, familiares...todos con la satisfacción y la complicidad de compartir junto a Cebrián su bosque.
No te lo pierdas, puede ser una oportunidad única. Te esperamos."

Del blog "Un bosque llamado Cebrián", continuamente actualizado para organizar el viaje:

"Con el propósito de que todos podamos estar el 1 de Marzo colaborando en este proyecto,y que nadie se quede en tierra por falta de transporte,voy a intentar interrelacionar el blog Un bosque llamado Cebrián con el foro Foro Rosavientos.es.
Iré actualizando el listado de las personas que ofrecen plazas vacantes en sus coches , desde donde salen y donde os podeis dirigir para poneros en contacto con ellas,a su vez iré borrando las personas que me comuniquen que ya están completos(me refiero a los coches ehhhh!!!),espero que os sirva de ayuda…

Listado de coches disponibles

*1-**Emrys**…..sale desde **Palencia**,pasando por Burgos,Burgo de Osma y Medinaceli…*
Quedan 2 plazas asi que vamos que se acaban!!!!!!! Foro Rosavientos.es
*2-**al197**…..sale desde **Vigo** Foro Rosavientos.es*
*3-**Isis1978**….sale desde **Valencia** Foro Rosavientos.es*
*4-**LMC**……sale desde **Madrid** Foro Rosavientos.es*
*5- **Dark**no podía faltar…..y pone coche desde **Madrid** Foro Rosavientos.es*
*6-**Arrikitown**… sale desde **Madrid** Foro Rosavientos.es*
*7-**JUCARO**…. voy "pallá", salgo desde **Madrid** y seguramente iré sólo con lo cual dispongo de 4 plazas libres (apretaditos,jejeje…)Foro Rosavientos.es*
*8-**Eduardo**…. vivo en **Palencia**e iré en coche pasando por Madrid Un bosque llamado Cebrián*
*9-**maribel**…. si alguno vais desde **Guadalajara capital** y no tenéis medio de transporte poneros en contacto conmigo. Un bosque llamado Cebrián*
*10-**Quiquerin**….. si alguien se anima desde **Córdoba** se puede poner en contacto conmigo Un bosque llamado Cebrián*
*11-**totyvalle**…..El día uno saldré desde **Madrid** en coche en torno a las siete de la mañana. Si alguien se quiere venir, tengo dos plazas libres. Un bosque llamado Cebrián*
*12-**Beatricem…..**Salimos de **Madrid** (sobre las 7:00) desde Getafe exactamente, pero podemos pasar por algún sitio que pille de camino a recoger a alguien si hace falta. Nos volvemos el mismo sábado por la tarde. Mi mail marhoyorivas@yahoo.es*
*13-**Megick**…..iremos el sábado y planeamos volver el mismo sábado por la tarde. Salimos de **Zaragoza** y tenemos un par de plazas si nos apretamos todos un poquito Foro Rosavientos.es*
*14-**Threpwood**…… yo iré el sabado por la mañana desde **Madrid**. 4 plazas libres Foro*

Rosavientos.es
*15-**Santi**…..Estoy intentando con todas mis fuerzas poder ir. Saldría de **Barcelona** la madrugada del sábado. Tendría 4 plazas libres Un bosque llamado Cebrián*
*16-**Roger**…..Sale desde **Granada** Un bosque llamado Cebrián*
*17-**panpeter** …..Dispongo de vehículo, salgo de **Errenteria** en **Guipuzcoa** el viernes a la tarde para pasar noche por las cercanías y si alguien de la zona se apunta, me lo haga saber. panpeter @ozu.es Un bosque llamado Cebrián "*

PEPE CERDÁ: DE LA ORGANIZACIÓN GREMIAL Y DEL IMPULSO CREATIVO

Los autores que me gustan no son los que adoctrinan con sus creencias, sus ideas, sus filias y sus fobias con el tono bajo de una tuba, y la riqueza armónica de la flauta de Bartolo. Los autores que admiro cuentan lo que ven, lo que creen y lo que opinan sin demasiado énfasis, dosificando su sorna, su sabiduría, su piedad, y su idiosincrasia como si estuvieran hablando repantigados en el sofá de su casa, sin gastar maneras, que es la forma más difícil de escribir. Como, por ejemplo, mi admirado Pepe Cerdá, autor de *"Pintor, pinta y calla"* , que es un Josep Pla aragonés, lo que significa que como no es catalán ni francés, hasta que no se muera no va a ser reconocido y valorado por sus coetáneos.

De la organización gremial y del impulso creativo

"Hay gremios y profesiones en los que los ingresos están regulados explícitamente por los Colegios. Los notarios y los registradores de la propiedad podrían ser ejemplo de lo claro y organizado que tienen la cuestión del estipendio. Por eso hay mucha gente que quiere serlo y por eso se ha de aprobar unas durísimas oposiciones para conseguirlo. Claro está que lo que hacen es importantísimo, aunque podría ser más barato. Lo que hacen es velar para que la ley se cumpla a rajatabla

en las innumerables transacciones de todo tipo que sustentan nuestra economía capitalista.
De otro modo, también están organizados los fontaneros a los que las piezas que utilizan y las que te muestran la factura, cuando te cobran, raramente les cuestan el cuarenta por ciento de lo que pone en el papel, además de las horas, claro está. Da igual que uno quiera adquirir los tubos por su cuenta, si no te puedes identificar como miembro del gremio "a ponerlas" *como está mandao*. No obstante, el funcionamiento de la red de agua y vertido es vital para nuestra civilización y se lo debemos a estos apóstoles de la llave grifa."

(...)Para leer el resto del artículo: **De la organización gremial y del impulso creativo** id al blog de **Pepe Cerdá,** que recomiendo a todo aquel que quiera huir de las frases hechas, de lo previsible, de lo trillado y mascado, de la tontería infatuada, y de las melonadas pomposas y porculizantes.

De nada. Ya sabéis que me gusta ser útil.

Querido Corredor Cansado: efectivamente, la censura es tan cruel que a mí me han impedido cantar el "Aserejé" en el Teatro Real con Montserrat Caballé;tampoco me dejan exponer mis primorosos dibujos en el Museo del Prado. Y para colmo, El País, Clarín, El Universal, El Mundo, y todos los demás, se han aliado no publicar mis amenas reflexiones en la página tercera.
No me extrañaría que con su selvática propensión a puntuar como le sale de los dídimos, poner mayúsculas al buen tuntún, e hilvanar frases grandilocuentes y desprovistas de fuste haya conseguido que tiemblen los enemigos de la Libertad de Expresión y anden apuntándose en masa a la "Asociación del rifle".
Pero no tema, yo no soy así, y sólo lo correría a boinazos y a pedrás.

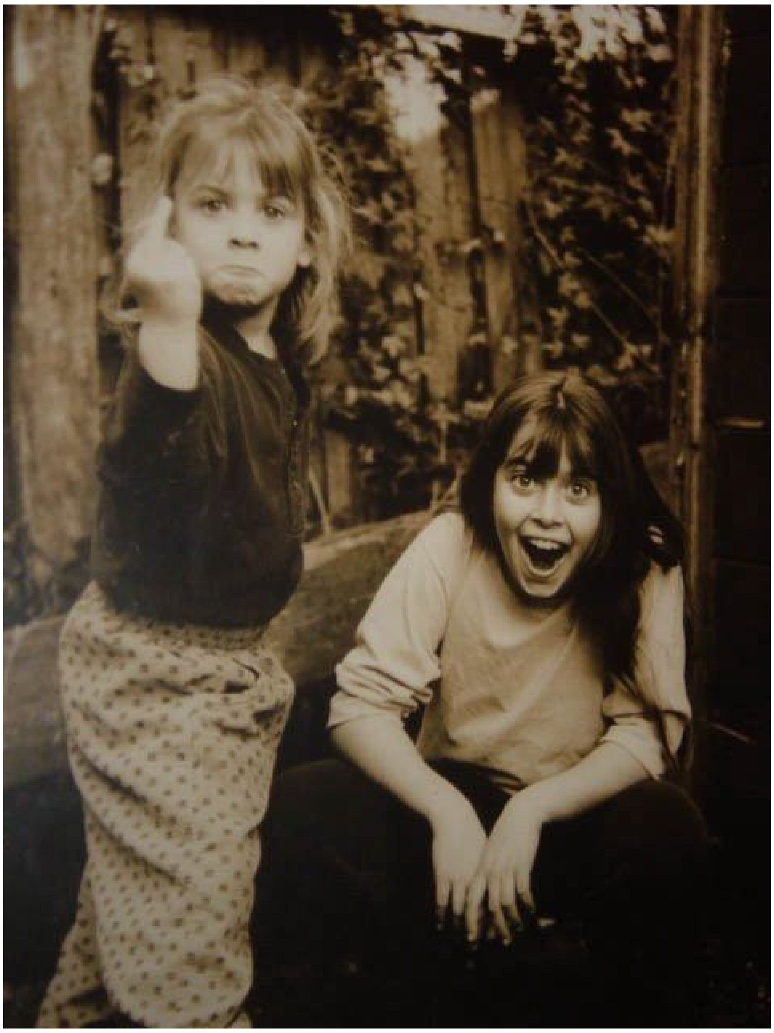
AVISO A LOS LECTORES SOBRE LA ABDUCCIÓN SUFRIDA POR ESTA BITÁCORA



Las bitácoras Gatopardo , Romancero de la Cuesta del Zarzal y Atenco somos todos (que sepamos) han sufrido una misteriosa abducción, mientras que nuestros vecinos de alojamiento parecen funcionar bien . A través de "Temas" aún se pueden leer algunos artículos.
Cuando podamos, si podemos, lo arreglaremos.

PD 14,45 23 de febrero 2008
Aquí, por ahora, con la inestimable ayuda de nuestro webmaster de blogia.com , casi arreglado.
A quien le haya pasado lo mismo: entre en la zona de administración, y republicar blog (todo el weblog)
De nada. Ya saben que me gusta ser útil.

Para vuestro cponsuelo, os diré que anteayer y ayer también me pasó a mí. Cada vez que pretendía entrar y aparecía la pantallita de "no hay artículos" entraba en administrar -que se podía- republicaba el Blog y reaparecía la bitácora perfecta... No sé porque estraña razón, a tu bitácora y a la mía le suelen pasar las mismas cosas...
Un abrazo
Hannah

LA PENÚLTIMA DEL MINISTRO DE CULTURA, CESAR ANTONIO MOLINA, Y DE ROGELIO BLANCO, DIRECTOR GENERAL DEL LIBRO, ARCHIVOS Y BIBLIOTECAS...

Antecedentes: *Sin noticias del inventario de la Biblioteca Nacional

El ministerio de Cultura presenta un inédito de Lorca que le ha durado dos horas

En la caja 5.780 del Archivo General de la Administración, en Alcalá de Henares, habitaba *«La dama boba»* que Federico García Lorca adaptó en 1934. Una dama altamente «frecuentada y cortejada» por investigadores, aunque el Ministerio de Cultura la quiso presentar ayer, a primera hora de la tarde, como hallazgo inédito: *«Identificado el libreto original de «La dama boba», de García Lorca»*, anunciaba una nota. Pero la primicia se tornó duelo y quebranto cuando a las siete y media la Universidad de La Rioja rectificaba al Departamento de César Antonio Molina, que para más inri ayer estaba en tierra riojana.
Al entrar en internet, y leer la noticia del «redescubrimiento» ministerial, los profesores Juan Aguilera e Isabel Lizárraga apenas salen de su asombro: a todas luces, el «hallazgo» no es tal porque ellos habían descubierto el documento en 1992. Junto a un estudio lo pusieron en conocimiento de la Fundación García Lorca, en cuyo boletín lo reseñó en 1993 Andrew Anderson, una de las mayores autoridades en García Lorca.

«Lo vuelvo a presentar»
Minutos más tarde, la Universidad de La Rioja (UR) certificaba que publicó en 2001 la adaptación teatral de Lorca de *«La dama boba»*, original de Lope de Vega, en un volumen de 233 páginas, del que se editaron trescientos ejemplares, bajo el título de *«Federico García Lorca y el teatro clásico español»*. Escrito por Aguilera y Lizárraga se presentó en Logroño el 27 de noviembre de 2001, apadrinado por el sobrino del poeta, Manuel Fernández Montesinos», quien, consultado por ABC, se felicitó de que vuelva a aparecer el original *«porque así lo podré volver a presentar en La Rioja, que recuerdo que comimos muy bien aquel día».*
La solapa de la obra es meridianamente reveladora: «Isabel Lizárraga y Juan Aguilera firman un estudio crítico que ahonda en la relación singular de Lorca con el teatro clásico español, sus concepciones teóricas, adaptaciones y versiones escénicas. Y presentan el texto íntegro de la adaptación lorquiana señalando todas las variantes introducidas respecto al texto original». El presunto inédito de Cultura habla de un *«reportaje fotográfico de la representación de «La dama boba» en el Retiro»* que ve la luz por primera vez. El gozo en un pozo: la obra de 2001 incluía 12 fotografías rescatadas de montajes de la obra en Buenos Aires y Madrid, la reproducción de la primera hoja del manuscrito -firmada por Lorca- y la primera plana de *«El liberal»*, periódico que patrocinó el estreno de la obra en España el 27 de agosto de 1935, fecha del tricentenario de la muerte de Lope.

Hace once años, en ABC
En 1997, ABC daba cuenta, a través de un artículo de Gonzalo Santonja, director del *Instituto Castellano y Leonés de la Lengua*, de la tesis doctoral de un joven investigador, Manuel Jiménez, quien *«se ha tropezado* -escribía Santonja- *con los hidalgos melindres sobreaguados de «La dama boba» en la descarriada versión afortunadísima de García Lorca. No queda ningún resquicio para la duda: Manuel Jiménez ha dado con un ejemplar, algo incompleto, autentificado por la firma del autor y policialmente certificado»*. Santonja se pregunta si el Ministerio *«también presentará como* «inéditos» *«La llave»*, de Sénder, *«Al amanecer»*, de Dieste, y *«Los salvadores de España»*, de Rafael Alberti». Y el «inédito» del Ministerio de Cultura había durado dos horas.

RIPIOS AL MINISTRO MORATINOS

Príncipe de los continos,
terror de la diplomacia,
el ministro Moratinos
es tonto con contumacia.

Aunque tardo de reflejo
y con poca inteligencia,
deja al más listo perplejo
por su artera incompetencia.

Convencido de que España
es poderosa nación,
con inigualable maña,
arma por doquier follón.

"No me callo" es su lema
y, como al hablar, yerra,
nos buscamos un problema:
do era la paz hay guerra.

Desde los Tercios de Flandes,
desde Felipe Segundo,
desde Noruega a los Andes,
no hubo memo más facundo.

Israel no le aprecia,
Arafat lo detestaba;
tampoco lo quiere Grecia,
ni Turquia lo aguantaba.

De católico crisol,
reverente del dinero,
es de Endesa y Repsol.
en Marruecos, mamporrero.

Si tengo que elegir
entre éste o Molina
para armar la tremolina,
no me puedo decidir.

Uno, soberbio y necio,
otro necio y soberbio;
los dos, ignaros sin precio,
merecen castigo serbio.

DATOS SOBRE EL FRAUDE FISCAL EN ESPAÑA

Según los cálculos del sindicato de Técnicos del Ministerio de Economía (GESTHA), cruzando los datos de los tramos de la base imponible del Impuesto de Patrimonio con los datos de la banca privada:
-alrededor del 86% de los que tienen fortunas con más de diez millones de euros evaden sus obligaciones fiscales.
-el 18% de los que tienen entre medio millón y un millón de euros defrauda actualmente a la Hacienda Pública.
-el 45 % de los que tienen entre uno y diez millones de euros elude el fisco.
-las mayores bolsas de evasión fiscal es en capital mobiliario e inmuebles, que vienen a representar actualmente el 93% de todos los bienes y derechos declarados.
- sólo 132 contribuyentes declaran un patrimonio superior a los 30 millones de euros,
- 2.525 declaran un patrimonio total entre 6 y 30 millones de euros.
-según la banca privada, existen en España unos 400.000 ciudadanos con más de 300.000 euros invertidos en activos financieros
-La economía sumergida representa el 23% del PIB (en Alemania, la economía sumergida representa el 6% del PIB)

-En España está la cuarta parte de los billetes de 500 euros de la zona euro.
Gestha afirma que en España se podría recaudar unos 21.000 millones de euros anuales, si se autorizase a los 8.000 técnicos del Ministerio de Hacienda el control e inspección de las declaraciones de la renta de estas grandes fortunas.

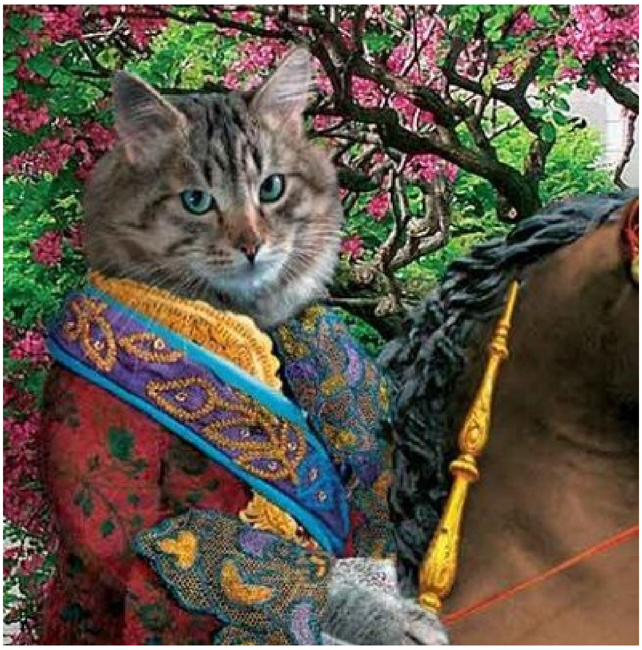
AL GATOTAURO DEL MILENIO



Con tus voces despiertas al durmiente,
y a aquellos que se esconden tras un muro
obligas a salir al aire puro
y a sentirse unos más entre la gente

Con tu ojo avizor, en el presente
escrutas donde hallas algo oscuro;
buscas la claridad para el futuro
y entre mundos distantes eres puente

Los lacayos del Orden y el Dinero
revisan sin cesar tu laberinto,
creyendo que han de hallarte agazapado

De noche, gatos pardos en febrero
cantando hallarán ciento en el tejado:
Nadie pondrá su voz bajo precinto.

SIN NOTICIAS SOBRE EL INVENTARIO -PARCIAL- DE LA BIBLIOTECA NACIONAL

Presuponiendo en sus administrandos amnesia o despiste, doña Milagros del Corral, directora de la Biblioteca Nacional, bajo el lema *"Custodiamos todos los libros"*, y nuestro sagaz Ministro de Cultura silencian los sorprendentes resultados parciales de aquel "inventario de la Biblioteca Nacional" -que El confidencial calificó de paripé- y nos lanzan noticias sobre sus cuchipandas y negociejos con escaparate publicitario, como el PARES, Portal de Archivos Españoles y la Biblioteca Digital Hispánica , que andan como un dinosaurio reumático, y tienen menos chicha que un colorín.

En lo que titulan "obras maestras" se puede ver que tienen 13 obras de Filología; y como no podía ser de otra forma, vamos a ver la obra de Antonio de Nebrija, y nos encontramos con esta maravilla del arte de amagar y no dar:

Imagen 2

O esto:

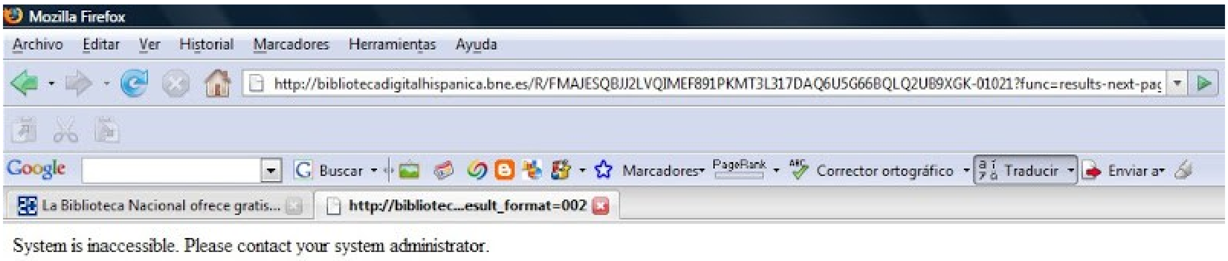

Imagen 3

Y como ésta, docenas...

Y llegados a este punto, el lector tiene que decidir si le da más grima el desparpajo de los responsables de Cultura o las empresas informáticas que subvenciona.

Antecedentes:

El espía que surgió del frío: "*Sandios honoris causa en el negociado de Cultura*" (17 setiembre 2007)

Más información:

Pablo Jauralde: *Libros que vuelan, documentos que desaparecen* (20

setiembre 2007)

En varios periódicos nacionales, los periodistas listos han escrito, después, teniendo buen cuidado de silenciar sus fuentes, y han "intertextualizado" con tan poco tino que ha sido un alivio que no nos citen.

MANUEL MACHADO: CASTILLA

El ciego sol se estrella
en las duras aristas de las armas,
llaga de luz los petos y espaldares
y flamea en las puntas de las lanzas.
El ciego sol, la sed y la fatiga
Por la terrible estepa castellana,
al destierro, con doce de los suyos
-polvo, sudor y hierro- el Cid cabalga.
Cerrado está el mesón a piedra y lodo.
Nadie responde... Al pomo de la espada
y al cuento de las picas el postigo
va a ceder ¡Quema el sol, el aire abrasa!
A los terribles golpes
de eco ronco, una voz pura, de plata

y de cristal, responde... Hay una niña
muy débil y muy blanca
en el umbral. Es toda
ojos azules, y en los ojos. lágrimas.
Oro pálido nimba
su carita curiosa y asustada.
"Buen Cid, pasad. El rey nos dará muerte,
arruinará la casa
y sembrará de sal el pobre campo
que mi padre trabaja...
Idos. El cielo os colme de venturas...
¡En nuestro mal, oh Cid, no ganáis nada!"
Calla la niña y llora sin gemido...
Un sollozo infantil cruza la escuadra
de feroces guerreros,
y una voz inflexible grita: "¡En marcha!"
El ciego sol, la sed y la fatiga...
Por la terrible estepa castellana,
al destierro, con doce de los suyos
-polvo, sudor y hierro- el Cid cabalga.

Manuel Machado (1874-1947)

Autor: Ella

Conocí este poema en el instituto, en clase de literatura, y me dejó tan impresionada que mi siguiente libro fue una colección de poemas de Manuel Machado. Y eso que entonces aún creía que la voz de la niña "buen Cid, pasad" era una aceptación resignada a que el Cid y la desgracia que arrastraba entrasen en su casa... En fin, por qué te hablaré yo a ti de mi incultura adolescente?
Aún me emociono, buena elección.

Autor: Diego J.

Un gran poema, digno de un gran poeta indignamente olvidado.

Fecha: 18/02/2008 19:57.

Autor: Gatopardo

Sagaz Ella: seguramente el poeta contó con el significado polisémico del verbo "pasar" como invitación a entrar en la casa y como invitación a seguir camino, y no creo que el hecho de optar por tu primera opción reste tensión dramática al poema, que, como dice Diego J. es uno de los más bellos y hondos de la literatura española, y Manuel Machado, uno de nuestros grandes poetas. Pero como la estupidez no tiene límites y el miserabilismo tampoco, se le escatima el mérito por no haber sido de izquierdas.

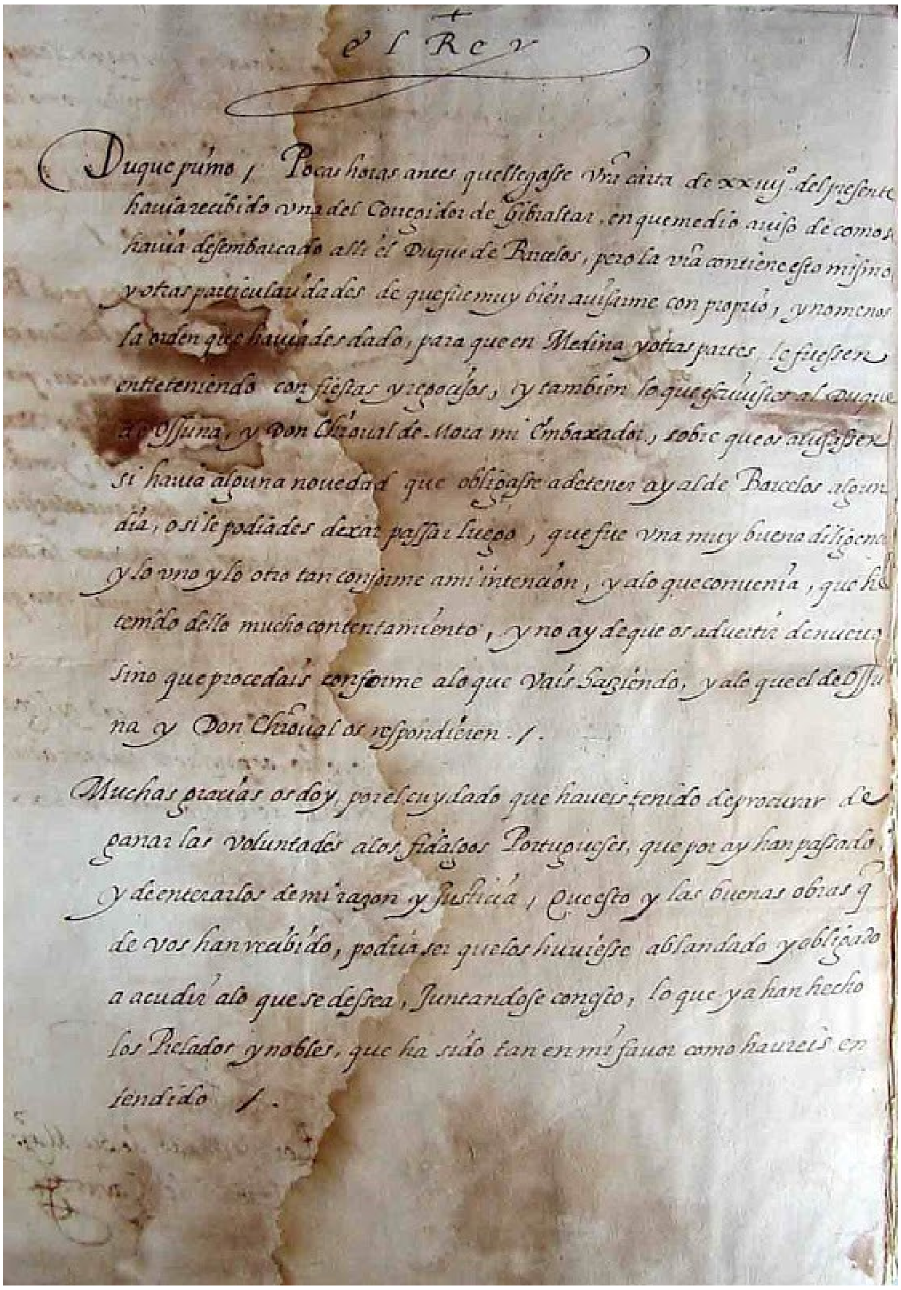
PRÓLOGO AL CANCIONERO EN CIFRA DE PERRENOT



El Rey

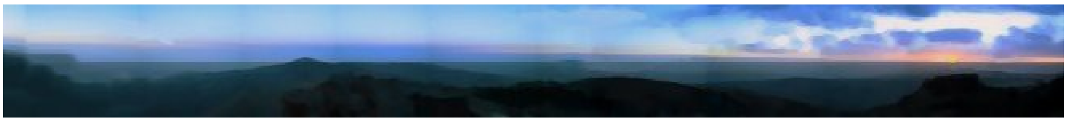
Duque primo; Pocas horas antes que llegasse vra carta de xxiiij del presente
hauia recebido vna del Corregidor de Gibraltar, en que me dio auiso de como
hauia desembarcado alli el Duque de Barcelos, pero la vra contiene esto mismo
y otras particularidades de que he sido muy bien auisado con proprio, y no menos
la orden que haueys dado, para que en Medina y otras partes le fuessen
entreteniendo con fiestas y regozijos, y tambien lo que escriuistes al Duque
de Ossuna, y Don Christoual de Mora mi Embaxador, sobre que os auisassen
si hauia alguna nouedad que obligasse a detener ay al de Barcelos algun
dia, o si le podiades dexar passar luego, que fue vna muy buena diligencia
y lo vno y lo otro tan conforme a mi intencion, y a lo que conuenia, que he
tenido dello mucho contentamiento, y no ay de que os aduertir de nueuo
sino que procedais conforme a lo que vais haziendo, y a lo que el de Ossu
na y Don Christoual os respondieren. /.

Muchas gracias os doy, por el cuydado que haueis tenido de procurar de
ganar las voluntades a los fidalgos Portugueses, que por ay han passado
y de enterarlos de mi razon y justicia, que esto y las buenas obras q
de vos han recebido, podria ser que los huuiesse ablandado y obligado
a acudir a lo que se dessea, juntandose con esto, lo que ya han hecho
los Prelados y nobles, que ha sido tan en mi fauor como haureis en
tendido /.

Prólogo del libro: "*"La enigmática carta del Embajador del 28 de mayo/6 de junio de 1562"*

ABREBOCA

Se despierta el AUTOR. Está aún enredado en la maraña de un sueño que estaba viviendo. Como duerme siempre con la ventana abierta y ha cambiado súbitamente la estación, no ha logrado, con su cuerpo viejo, calentar bien las sábanas. Abre un ojo. La amplia ventana no es ya pura negrura. A lo lejos, la silueta de un monte empieza a dibujarse. No es el Día que llega, es la Aurora. Ventajas de haber huido de la ciudad a la Serranía: ha recuperado la noción poética de esta distinción. Más vale, piensa, dejar de un salto la semitemplada cama que intentar recobrar la condición de dormido. El acto de enfrentarse desnudo al frío matutino, con que la noche se despide del suelo terrestre, da energía para entrar en la coetaneidad de un día más de vida.
Pero el mundo soñado, esa otra vida de la mente, está ahí aún. Sugestiva, preocupante. El AUTOR sueña siempre vida íntimamente conectada con la cotidiana; pero en que los tiempos se cruzan, se entrelazan y lo aparentemente absurdo cobra un sentido profundo, premonitorio.
No hay modo de recordar en concreto la historia soñada, vivida, porque no ha constituido propiamente una historia, con secuencias sucesivas. Los sueños no son lineales, como la escritura. Son paradigmáticos. Por ello enseñan. Dan pautas para la estúpida lidia con la cotidianeidad. Pero son inenarrables, irreproducibles por la propia memoria que los creó en fantástica libertad, una libertad imposible en la vida despierto.
El AUTOR trata de aprovechar la lección del sueño, que le ha llevado a hacerse una pregunta esencial: ¿Qué es el libro que , después de años de trabajo, tiene, más o menos terminado de escribir, "sobre la mesa" (entendida esta expresión metafóricamente, pues anda perdido en la "mente" de su ordenador). Y, clásico él, puesto que no hay modo de referir el sueño, monta un "Diálogo".



DIÁLOGO INCONCLUSIVO SOBRE ¿QUÉ CONCLUYE ESTE LIBRO?

Personajes, en orden de aparición: *"El Impresor", "El Autor", "El Bibliotecario", "El Filologuillo", "El Crítico literario", "El Folclorista", "El Medievalista" "El Viejo progre de la movida", "El Sociohistoriador", "El Historiador", "El lector de novelas policíacas", "El Pelota".*

EL IMPRESOR: El libro está compuesto. Pero le faltan los primeros pliegos: el título, la Introducción, o como se llame eso que vas a escribir, esa especie de Conclusiones previas, que me dijiste.
EL AUTOR: Bueno, eso siempre pasa. Los prólogos, los propósitos de un libro y el título son lo último. Salen de lo escrito. Requieren volver a definir, a la luz de lo hecho, lo que se pretendió hacer.
EL IMPRESOR: Si; pero me urge tenerlo ya. Llevas muchos meses paralizando la impresión.
EL AUTOR: Es que este libro no es como otros. Me ha salido muy raro. Es monográfico en extremo; pero caótico. Mejor dicho, agenérico... Por eso lo he retitulado a última hora, llamándolo *"La enigmática carta del Embajador del 28 de mayo/6 de junio de 1562. (De poesía oral, guerra de religiones, secretarios y cifradores)"*.
EL BIBLIOTECARIO: ¿Usted es el autor de ese libro largo tiempo esperado? Me dirá usted a qué campo pertenece el tal libro, pues no pretenderá que yo, con ese título, lo decida... ¿Es una novela policíaca?, ¿ ...de misterio?
EL AUTOR: Me deja cortado... Creí que en él no me salía de mi profesionalidad. Me considero un Filólogo... con inclinación a la Historia. Pero reconozco que todo el libro es una pesquisa para desvelar un extraño "caso", para descubrir al verdadero autor de una

carta. Y qué es lo que pretende con ella, qué hay detrás de ella; explicar su aberrante contenido. Sigo las más variadas pistas y, cuando llego al final de cada una de ellas, lo averiguado suscita nuevas incógnitas, abre nuevas preguntas, y se aleja el personaje que trato de apresar... y, sobre todo, la comprensión de sus propósitos.
EL BIBLIOTECARIO. Entonces lo meteré entre los libros de ficción, con las novelas.
EL AUTOR. No, no. Yo no soy un Escritor. No aparece en el libro ningún Padre Brown, ni tampoco me permito caer en la tentación de cultivar el género de la "novela histórica". Bien quisiera en algún momento haber tenido libertad para asignar la misteriosa carta a un personaje seductor, como, por ejemplo, el Secretario Francisco de Figueroa, "el Divino" y, asimismo, para dotar a éste gran poeta de figura visible, identificándole con el jovencito del retrato de Rafael, con que alguna vez se ilustró su biografía en Internet, pero que sabemos era del banquero Bindo Altoviti La intriga del libro me la impone la documentación histórica, no es de mi invención.
EL BIBLIOTECARIO. El sitio de su anunciada obra es, pues, la Historia de los años en torno a 1562.
EL AUTOR. Sólo hasta cierto punto. Es verdad que, al ir examinando minuciosamente la correspondencia diplomática que, día a día, durante los prolegómenos de la Primera Guerra de Religión en Francia, se despacha en la Embajada de España en la Corte de Catalina de Medici con destino a Madrid, creo haber ahondado en la comprensión de cómo Felipe II va siendo inducido por su embajador a abandonar el papel de defensor de la Paz entre los Príncipes cristianos, ventajosamente lograda en Cateau-Cambresis, y a ser actor principal en el estallido de las nuevas guerras de religión europeas.
EL BIBLIOTECARIO: A la historia de Felipe II, pues. ¿O a la de la Contrarreforma, en general?, ¿...o a la de la Diplomacia española?
EL AUTOR: No sé. Tenga en cuenta que, al desmenuzar cómo evolucionaron los acontecimientos en Francia entre agosto de 1559 y junio de 1562, , mes tras mes o semana tras semana, yo sólo pretendo hacerlo desde el particular punto de vista del embajador Perrenot, o, mejor dicho, desde el punto de vista con que Perrenot presenta a su rey los "hechos" que le comunica. No soy un "Historiador", ni intento serlo, porque (y hablo ahora en términos generales) no creo en la existencia de realidades "objetivas", reconstruibles a partir de lo documentado. Lo que "fue" no está constituido por "hechos" que sean, de por sí, significativos. El "significado" se lo dan los relatos en que los detalles documentados vienen a ser integrados.Y es preciso tener bien presente que todo relato es una narración, una ordenación creada por alguien y para algo. El caos de los hechos que se dieron en un determinado espacio temporal requiere la criba y la articulación de una mente interpretativa y expositiva para que cobre sentido.
Además, en este caso particular, mi exposición o glosa de la historia que el embajador Thomas Perrenot de Granvelle, Señor de Chantonnay, va combinando con el fin de inducir a Felipe II a intervenir militarmente en Francia, por más que ilumine (según creo) el proceso de cómo el "Rey Prudente" dejó de serlo, está en mi libro tan sólo al servicio de mi inquisición policíaca sobre qué diablos dice la anómala carta cifrada del 28 de mayo con postdata de 6 de junio de 1562 firmada por el Embajador.
EL FILOLOGUILLO. Entiendo, por lo que nos declara, que en su libro se combinan el análisis textual y de las mentalidades, tanto del emisor del discurso como del receptor privilegiado del mismo, con una reconstrucción sui generis del tiempo histórico, realizados sobre el conjunto de los despachos del Embajador. Todo ello para comentar una sola de sus cartas, que considera aberrante. Pero, ¿vale la pena escribir todo un libro sobre el texto de una carta? ¿No es ello una exhibición de erudición descompensada?
EL AUTOR. El dedicar un libro a esa carta del 28 de mayo / 6 de junio de 1562 no tiene que ver con la reconstrucción de la mentalidad del embajador Chantonnay y con su opinión de que dos religiones que pretenden poseer la verdad no pueden coexistir, toda vez que, necesariamente, una ha de imponerse mediante el exterminio de los creyentes

de la otra. Se debe a que, una vez puesto "en claro" lo que en esa carta va íntegramente cifrado (con la cifra secreta utilizada para comunicarse entre sí el Embajador y el Rey), la mayor parte de las líneas de la carta firmada por Perrenot resultan ser versos: un centón de versos. Mi primera intención fue estudiar exhaustivamente los temas del que llamé *"Cancionero en cifra de Perrenot".*
EL CRÍTICO LITERARIO. ¿De modo que el anómalo despacho diplomático es un "Cancionero"?, ¿Inédito?
EL AUTOR: Inédito, desde luego, aunque vengo anticipando, desde hace tiempo, noticia de algunos de sus textos. Pero el llamarlo "Cancionero" es invención mía, una apelación un tanto forzada. El Cancionero, propiamente, lo compongo yo en mi libro.
EL CRÍTICO LITERARIO. No comprendo.
EL AUTOR: Es que la mayor parte de las "citas" de textos poéticos que incluye la carta no proporcionan una copia completa del poema en cuestión. Se limitan a sugerir al receptor de la carta el texto mediante la inclusión de más o menos versos. Soy yo el que, sobre cada uno de los poemas, aporto cuanto se sabe de cada uno de ellos, incluidas las diversas versiones conocidas, así como sus músicas.
EL CRÍTICO LITERARIO. Entonces el interés literario de la carta es muy limitado.
EL AUTOR. Todo lo contrario. Por lo pronto, las citas muestran que el que escribió la carta en 1526 no recurrió a ninguna de las versiones llegadas a nosotros por uno u otro camino, ya que lo citado difiere de ellas en forma tal que denota la intervención de la memoria en la trasmisión de los poemas. Además, en múltiples casos, el testimonio de la carta poética antedata a la restante documentación conocida del tema. Hay, entre los textos citados varios romances y canciones que sólo nos eran antes conocidos gracias a la tradición oral de los siglos XIX y XX.
EL CRÍTICO LITERARIO. ¿A qué tipología corresponden los textos citados?
EL AUTOR. Muy variada. Ante todo hay que separar unos pocos poemas en metros italianos. Dos de ellos de autor famoso: la dedicatoria o envío de la *Égloga IIIª* de Garcilaso a doña María Osorio de Pimentel y el soneto de Boscán. Quien dice que la ausencia causa olvido. La dedicatoria garcilasiana se incluye en la carta del Embajador malamente arreglada, para dirigirla a una dama anónima. Hay además unas octavas reales (Acepto, mi señora, yo te sea) cuyo autor, identificándose como un español, ofrece su servicio amoroso a una dama francesa (*"aunque soy de nación y lengua estraña... de tu patria no hay quién más dessee servirte como yo, que soy de España"*). Quizá al mismo autor haya que atribuir un poema cancioneril: Mete las armas, traidora. En cambio, es reproducción de un poema conocido el romance trovadoresco *Descúbrase el pensamiento*. Estos poemas amorosos se cifran completos, en contraste con la mayoría de las composiciones poéticas que van formando la carta y que son mucho más curiosas.
EL CRÍTICO LITERARIO: Si he comprendido bien sus varias respuestas, son, pues, esas otras poesías que se citan incompletas las que han atraído su interés y su labor de comentarista o antologista.
EL AUTOR: Correcto. Los romances y canciones de trasmisión oral son los que tienen más interés para la historia literaria.
EL FOLCLORISTA COMPARATISTA: No me sorprende. La tradición oral nos pone en contacto con los valores más universales del patrimonio cultural de los diversos pueblos que componen la Humanidad. Al fin y al cabo, la escritura aisla más que la diversidad de las lenguas habladas.
AUTOR: En el caso presente, lo transmitido por tradición oral pertenece a un acervo literario de lo más vario. Los dos textos más sorprendentes, en que las citas de la carta antedatan en siglos a la documentación que de unos determinados poemas poseíamos, son los romances que identifico como El infante parricida y Urgel y Roldán. Uno y otro sólo nos eran conocidos, hasta su hallazgo en la carta de Perrenot, gracias a la tradición oral de los siglos XIX-XX. Y no pueden ser literariamente más diversos.

EL MEDIEVALISTA: Explíquese.
EL AUTOR: El romance de El infante parricida, hasta la cita de nuestra carta poética sólo conocido en la tradición de los judíos sefardíes de Marruecos, responde a una concepción mítica de la relación entre el poder humano y el inmisericorde orden divino que gobierna la Naturaleza. En cambio, el romance de Urgel y Roldán (en que el héroe es Ogier), sólo documentado, hasta la carta de 1562, en la tradición oral de los gitanos de la Baja Andalucía y de los judíos sefardíes de Sarajevo y de Salónica, es heredero de la desmesura épica característica de la epopeya carolingia e ilustra el trasvase de un episodio narrativo particular desde la literatura francesa a la española mediante reelaboraciones varias, escritas y orales, en los géneros interconexionados de la épica y del romancero
EL CRÍTICO LITERARIO: La tipología de los textos tradicionales es, según veo, muy variada. ¿No?
EL AUTOR: Si, hay once romances: unos, de tema clásico; otros, sobre héroes de la épica nacional o sobre héroes carolingios (el de Ogier); los hay noticieros, de los de tiempo de los Reyes Católicos, bien acerca de la Guerra de Granada, bien sobre la "frontera" franco-española (A las armas, moriscote), y hasta uno de tema mítico, como ya he dicho. Cuatro textos "canallescos". Siete cancioncillas de muy distinto carácter; más una canción-juego. Esta variedad no es algo extraordinario en los Cancioneros; pero lo sorprendente es cómo figuran en la carta.
EL CRÍTICO LITERARIO: ¿Sorprendente?
EL AUTOR: Ciertamente. Es el hecho base de todos los misterios de la carta poética. Los múltiples versos que ocupan la mayor parte de ella no forman una antología de romances y cantares para que los lea y disfrute con ellos el destinatario, pues no se cifran completos ni en fragmentos que tengan autonomía literaria, sino que se hace referencia a los texto poéticos presuponiendo que el lector los conoce de antemano.
EL FILOLOGUILLO: Entiendo. Eso es lo que justifica su tratamiento desde una perspectiva filológica: la labor de reconstrucción textual de los poemas que usted realiza.
EL AUTOR: No, no, no. No considero que la Filología pueda identificarse con la "técnica" a la que alude el Diccionario académico como segunda acepción del vocablo. La Filología no debe restringirse a la "reconstrucción" de los textos, a la restauración de los arquetipos de las obras corrompidas en su transmisión. Ése es sólo un oficio entre otros muchos que ha de usar la "ciencia" que el Diccionario define, de forma aproximada, en la primera acepción del vocablo. Un filólogo debe acercarse a los textos desde todas las perspectivas necesarias o convenientes para su plena comprensión. Por eso hablaba, en un principio, de la variedad de caminos inquisitoriales que las distintas Partes de este libro siguen...
EL CRÍTICO LITERARIO: Me quedé con la curiosidad de saber a qué se refiere al hablar de textos literarios "canallescos"; no he oído ese término.
EL AUTOR: En la carta hay alusiones a varios temas o canciones que reflejan el bajo mundo rufianesco y su jerga o germanía: *Niguere de la niguere, Nacido nos ha un bailico*, *¿Quién te me enojó, Ysabel?, ¿Habrá mangas para todas tres?; dejando aparte el picañesco "Ponme la mano aquí...que no perderás nada?*
EL VIEJO PROGRE DE LA MOVIDA: Pero ¿cómo?, tío, ¡si eso es de la Chavela Vargas!.
EL AUTOR: Pues ya ves, hombre, también lo es de la Embajada de Felipe II en Francia.
EL FOLCLORISTA: Es que es una creación folclórica. Me consta que la canción ha sido recogida en Extremadura. La tengo inventariada en mi fichero temático.
EL AUTOR: Como nos explicó, hace algunos años, la propia Chavela, a mí y a mi hija Débora, lo que ella puso de suyo en la letra fue únicamente el nombre de Ma Corina, recordando a un personaje real de Cuba. En la carta del Embajador era una castiza Juana, más ajustada a la rima asonante.
EL CRÍTICO LITERARIO: Dice usted que la carta es de 1562 y cita *Nacido nos ha un*

bailico...;pero ese tema ¿no lo tomó Quevedo de los *Romances de germanía* de Juan Hidalgo publicados con el famoso vocabulario de la jerga en 1604? Creo recordar que Hidalgo considera al *romance de Perotudo*, que es el del bailico o bailón toledano que usted nombraba, como el primero que se compuso en esa lengua de germanía, y que hacía referencia a un personaje de ese tiempo: *"al ladrón que ahorcaron ahora"*.
EL AUTOR: Puede ser que el Perotudo fuera la primera exhibición del conocimiento del vocabulario germenesco por un "erudito" universitario; pero, desde luego, no es la fuente del romance-canción, pues ella está documentada mucho antes, con su famoso estribillo *"La-rón".* Es esa canción antigua la que, por vía oral, llegó a la Embajada filipina en Francia y a Quevedo...,y también a los judíos sefardíes de Marruecos, que aún la cantaban en el siglo XX. Ustedes, los historiadores de la Literatura letrada, no entienden la acronía de la literatura oral, que vive en la memoria de generaciones y generaciones, siempre actual.
EL SOCIOHISTORIADOR: No obstante, habrá que fechar en algún tiempo el origen de la lengua y literatura germanesca. ¿Acaso no responde a situaciones sociales datables en el tránsito del siglo XVI al XVII?
EL AUTOR: Cada tiempo introduce "variantes" en un fenómeno sociológico, sin duda. Pero, a menudo, y ése es aquí el caso, lo que parece propio de un tiempo viene de atrás, y ello se nos evidencia al aparecer, de pronto, un dato nuevo. El romance que comienza *"En la ciudad de Toledo, / donde flor de bayles son",* con su estribillo *"De la ron, de la ron, ron ,ron"*, se nos documenta ininterrumpidamente desde el primer cuarto del siglo XVI. Ya entonces era parte de la poesía oral, tradicionalizada.
EL CRÍTICO LITERARIO: Yo creía que sólo el espíritu del barroco...
EL AUTOR: No hay que olvidar que, como ocurre en la carta poética del Embajador, Garcilaso y Boscán convivieron mucho tiempo con los gustos cancioneriles, sobrevivientes desde el siglo XV al XVII. Y no ya lo picaresco, sino lo procaz, lo guarro, lo canallesco siguió en ese largo tiempo ejerciendo atractivo. En esta particular esfera pueden surgir, ocasionalmente (como en otra cualquiera), obras "ejemplares". La pornográfica canción de las *"mangas"* y el *"baldrés"*, que pretenden usar las tres mozas (*"a falta de cuerpo de hombre"*, como nos aclaran las *Coplas del Provincial*) se recoge ya en el *Cancionero musical* de los Reyes Católicos. No pretendo que consideren esa canción una obra "maestra" en el ámbito de la literatura pornográfica como pueda ser *La Lozana andaluza*, pero es, sí, un ejemplo muy notable de lo que podemos considerar en el siglo XV producto canallesco de difusión cortesana.
EL FOLCLORISTA COMPARATISTA: Estás en lo cierto. La poesía oral, popular, no tiene tiempo..., ni espacio. Es universal , global. Responde a la esencial unidad de la Humanidad... Remonta, como si dijéramos, a los genes de Adán y Eva.
EL AUTOR: No es así como yo lo veo. En la expansión de productos sociales, no hay que confundir la falta de fronteras absolutas (de carácter temporal, geográfico, cultural o lingüístico) con la no existencia para cada uno de ellos de una historia concreta, particular. No, no es una cuestión de universales. No basta confrontar especímenes más o menos semejantes. Cada tema, cada texto, cada variante de un motivo tiene su historia, su particular trasmisión y expansión, aunque, de ordinario, sólo podamos reconstruirla parcialmente, y, en consecuencia, provisionalmente.
EL HISTORIADOR: Hablando de reconstrucciones históricas. Me interesa mucho esa supuesta reluctancia, que usted observa, de Felipe II a intervenir militarmente en favor de los católicos de París cuando el Príncipe de Condé y el Almirante Coligny dirigían desde Orleans la rebelión calvinista, y el papel de inductor de la Guerra de Religión que asigna al Embajador hijo del Canciller Granvela. ¿Es posible que el Rey de España, en la cumbre de su poder, no sepa bien cuál debe ser su política en tan crucial ocasión?
EL AUTOR. De la lectura de las cartas del embajador Chantonnay he sacado la impresión de que varios factores hacen a todo un Felipe II parcialmente incapaz de ser quien diseñe la estrategia en aquella coyuntura. Ante todo, el ritmo acelerado de los

acontecimientos en el reino que regenta su suegra, que evoluciona día a día, en contraste con la tardanza de los correos, cuyo ir y venir lleva semanas, y de la maquinaria política de la administración filipina, que impide la consideración inmediata por el Rey de la información recibida y rertarda toda toma de decisiones.
EL HISTORIADOR: Tiene usted razón. Sabemos bien cómo funcionaba el correo oficial de la Casa de Austria entre Bruselas y Madrid y el recurso supletorio a los criados de mercaderes itinerantes, así como la función de la Secretaría de Gonzalo Pérez en Madrid y de los varios Consejos reales. Pero, ¿pudo la lentitud administrativa del Rey Prudente dejar en manos del Embajador la estrategia política?, y ¿no será anacrónico pensar que la situación política variaba de día en día en tiempos de la Contrarreforma?
EL AUTOR: Al menos, así lo sentía el Embajador, que, ante los prolongados silencios de su rey, duplicaba, triplicaba y aún cuadruplicaba una misma carta, pensando que no llegaban a su destino, interceptadas por los hugonotes que "habían hecho barra" a lo largo del Loire, y trataba de obtener la aquiescencia del Duque de Alba a su política. Porque, ante la pasividad de Felipe II, se arriesgó a preparar, en el telar político de Europa, la urdimbre de lo que había de ser una guerra civil con intervención militar extranjera.
EL HISTORIADOR: Me cuesta aceptar su afirmación de que un Felipe II vaya a remolque de uno de sus embajadores, por muy Granvela que fuera.
EL AUTOR: Es que el Rey, con su paradigmática prudencia, temía, con razón, romper el ventajoso *statu quo* de la paz de Cateau-Cambresis. No veía fácil tener que presentar, simultáneamente, ante la opinión universal, la guerra civil en Francia de dos formas incompatibles: De un lado, como una guerra de religión en que se jugaba el destino de la Iglesia Católica; de otro, como una insurrección de ambiciosos súbditos, que debieran someterse a la autoridad de su príncipe y señor natural, guerra en que los motivos religiosos invocados serían sólo una hipócrita cobertura. Para el consumo francés, la guerra antiherética constituye la razón indispensable para no provocar una reacción nacionalista ante la intervención de una potencia tradicionalmente enemiga como era España. En cambio, para evitar la intervención en paralelo, a favor de los "rebeldes", de la Reina de Inglaterra, de los Príncipes alemanes y de los Cantones suizos protestantes, era preciso hacerles ver el común interés de todos en que no se cuestionase el que cada Príncipe pudiese imponer su voluntad, incluso en materia de fe, a todos sus sujetos. Y lo más delicado para Felipe II era encontrarse en la tesitura de tener que combinar las dos políticas (la del contrarreformismo y la de la razón de Estado) cara a sus súbditos flamencos, a quienes, por entonces, carecía del poder necesario para hacer cumplir sus órdenes, como bien sabía Perrenot a través de su hermano el Cardenal Granvela. Para colmo, Felipe II tenía, ya entonces, a sus espaldas el problema de la salud física y mental de su heredero, el Príncipe Carlos, del cual se sabía mortalmente odiado.
EL HISTORIADOR: Pero, ¿cree usted que un Embajador tenía suficiente autoridad para ir por delante de su rey en trazar la urdimbre de la política en Francia, e indirectamente en la Europa cristiana?
EL AUTOR. Autoridad no, ciertamente. Al principio de la estancia de Perrenot en Francia, Felipe II, directamente, con muy pulidas formas, y más claramente a través de un mensaje amigo de Gonzalo Pérez, le llamó la atención respecto a su blandura al juzgar la política de tolerancia de la Corte francesa respecto a la práctica privada de la nueva religión y, muy especialmente, acerca de la poca simpatía que despertaban en el Embajador los Guisa. Y Perrenot se esforzó, de inmediato, en transmitir a la Reina madre las exigencias de su yerno en materia religiosa y en ponerse a bien con el Cardenal y el Duque de Guisa.
EL HISTORIADOR: ¿Entonces?
EL AUTOR: Sin embargo, más adelante, fue él quien llegó antes a la conclusión de que había que acabar de inmediato con el Calvinismo en Francia o, si no, el Catolicismo romano era, en Europa, causa perdida. Y, por ello, convertido al fundamentalismo

religioso, fue atrayendo, capciosa y sutilmente, al Rey al convencimiento de que los medianeros (los *"moyonneurs"*), los tolerantes, como eran Catalina de Medici, la propia madre de la reina de España, y el Canciller de l'Hôpital, que buscaban la paz del reino mediante un acuerdo con los Príncipes de sangre real hugonotes, constituían los principales enemigos. Lo más interesante de las plúmbeas cartas de Perrenot son, precisamente, no los "hechos" de que"informa", sino su dialéctica, que es una muestra ejemplar de pensamiento "ortodoxo", esto es, del que, en cualquier tiempo histórico, tiene todo comulgante en una creencia "verdadera".
EL CRÍTICO LITERARIO: ¿Y qué importa todo eso para comentar unos textos poéticos como los que antes citaba? Pienso que se deja usted llevar por la curiosidad de forma inconsecuente. Una obra crítica tiene que responder a un diseño preconcebido. Tiene que tener unidad genérica, como las propias obras de creación. No vale hablar "De esto y aquello", como pretendió Unamuno, y fracasó en todos los campos en que metió cuchara, no siendo ni un Filósofo, ni un Historiador, ni un Poeta, ni un Novelista, ni un Dramaturgo, ni un Ensayista, ni *"Nada menos que todo un Hombre"*. Es curioso observar que los críticos o historiadores de cada una de estas áreas, no le toman en serio en ellas y pretenden respetar su excelencia en otra cualquiera.
EL AUTOR: Le confieso que, para mí, lo mejor de Unamuno son esos escritos sin un claro propósito, aquellos en que va hilando un discurso que se gobierna aparentemente por sí mismo. Pero dejemos a "don Miguel", pues me acusará usted de lo que ahora acaba usted de hacer: salirse por peteneras...
EL CRÍTICO LITERARIO: Merezco el sermón. Pero no retiro mi pregunta crítica respecto a la estructura de su libro.
EL AUTOR: No me voy a defender entrando al trapo de su crítica a Unamuno, ni tampoco con la muleta de que soy medievalista y sigo modelos medievales de libro, en que la unidad que usted reclama brilla por su ausencia. La pertinencia, para entender la "carta poética", del estudio conjunto de la correspondencia diplomática del Embajador con su rey estriba en que la "carta poética", en sí misma, no se explica, y en que, formalmente, es idéntica a las demás cartas cifradas del Embajador.
EL SOCIOHISTORIADOR: Por mi parte, acepto que el estudio del discurso de Perrenot en sus despachos políticos y el de los textos poéticos de la carta de 28 de mayo y 6 de junio de 1562 constituye un tema coherente, pese a la diversidad genérica de los textos. No obstante, las observaciones que usted nos va transmitiendo acerca de unos y otros no veo que perfilen un tratamiento conjunto de la mentalidad que hay tras ambos.
EL AUTOR: Es que en la propia carta cifrada plagada de versos se advierte, de entrada, su singularidad, diciendo que es *"cifra perdida"*, que *"no vale nada",* dirigiéndose a los que, habiendo interceptado en el camino el despacho, tratan de romper la cifra: *"No se rompan la cabeza"*, les aconseja. ¿Le creemos? Es preciso leer cuidadosamente cada línea de la carta a la luz de la circunstancia en que se escribe, tal como la vivía el Embajador, para decantarse en la contestación. Además, no todo son versos en la "carta poética". Hay, empanados entre ellos, trechos en prosa. Unos parecen insulsos comentarios de los versos; otros están escritos en una extraña jerga que suena, a veces, como francés macarrónico. ¿Encierran los propios versos o, al menos, esos pasajes información diplomática? Antes de teorizar, hay que hacerse preguntas.
EL SOCIOHISTORIADOR: ¿Y cómo las contesta?
EL AUTOR: Lo malo es que, si no se me escandalizan ustedes, les diré que las contesto mediante la apertura de otros interrogantes.
EL HISTORIADOR: Me temo que es usted una especie de sofista...
EL AUTOR: No. Me impone el hacerlo la más estricta aplicación de la Ciencia filológica, que cultivo lo más racionalmente que puedo. Soy, intrínsecamente, un positivista..., aunque confieso que me divierten las limitaciones del saber.
EL SOCIOHISTORIADOR: Explíquese. ¿Por qué para contestar una pregunta se hace otra pregunta?

EL AUTOR: Le pongo un ejemplo: El contenido de la carta en *"cifra perdida"* firmada por el Embajador ¿lo escribió el Embajador antes de ser cifrado? Imagínese que contesto: No. Todas las cuestiones que previamente venía intentando contestar quedan tocadas por la respuesta a esta nueva. ¡Chúpese esta mandarina!
EL FILOLOGUILLO: ¿En qué se basa para decir "No"?
EL AUTOR: Lee el libro, amigo. Que no te lo voy a servir aquí digerido. En este país, a los universitarios, desde que os habéis pegado a la pantalla de Internet, os cuesta leer. Por eso no sabéis escribir sino con pedantes muletillas y exhibiendo un vocabulario técnico malaprendido de vuestros profesores, a quienes tampoco les va eso de leer, que es cosa de "casposos".
Básteme aquí con observar que Thomás Perrenot, Señor de Chantonnay, cuando no tenía a su lado a los servidores que le solían escribir sus despachos en español, se disculpaba ante Felipe II por tener que hacerlo en francés. ¿Cabe atribuirle el recuerdo memorizado de los múltiples romances y canciones que se citan parcialmente en la carta del 28 de mayo / 6 de junio de 1562?
EL LECTOR DE NOVELAS POLICÍACAS: Entonces, la firma de Perrenot en la extraña carta ¿es una falsificación?
EL AUTOR: En modo alguno. La despedida y la firma son ológrafas, con toda seguridad. Aunque el texto precedente no sea de su mano, ello es lo normal en las cartas del Embajador escritas a su rey.
EL LECTOR DE NOVELAS POLICÍACAS: ¿Inclusive en las escritas en cifra secreta?
EL AUTOR: Da lo mismo que estén totalmente en claro, en claro con trechos en cifra, o sólo en cifra (salvo el enderezo inicial y la despedida, al final).
EL LECTOR DE NOVELAS POLICÍACAS: Yo creía que la clave de la cifra sólo sería conocida del Embajador y del Rey...¿No era un peligro que la manejaran otros?
EL AUTOR: Quizá en Madrid, aparte del Secretario de Estado Gonzalo Pérez, encargado del trámite de las relaciones con Francia, no hubiera muchos que la dominaran (el propio Felipe II necesitaba que Gonzalo Pérez le pusiera en claro lo cifrado); pero, en la Embajada, sabemos que Perrenot contaba con varios escribientes que conocían la cifra. En la correspondencia se percibe una pluralidad de "manos" cifradoras.
EL LECTOR DE NOVELAS POLICÍACAS: ¿Y no sería más lógico pensar que los individuos de cuya mano son los cifrados fueran copistas que pasaban a limpio, sin comprenderlo, lo escrito en cifra por el Embajador?
EL AUTOR: No. Cada escribiente en cifra cifra con peculiaridades propias. Es él, con toda seguridad, el encargado de cifrar el texto del despacho, previamente redactado en español, que está escribiendo. Por lo común, cuando el Embajador tiene a su servicio un Secretario de cartas españolas procedente de España, las cartas las escribe y cifra ese Secretario, cuyo nombre conocemos; sólo en periodos en que está vacante ese cargo echa mano de un interino anónimo, que, aunque escribe y cifra en español, denota su origen francés. Pero, en ocasiones, el Secretario de cartas españolas cuenta con otra "mano" auxiliar española.
EL LECTOR DE NOVELAS POLICÍACAS: Y, ¿ha podido identificar al escribiente cifrador de la carta poética?
EL AUTOR: Sí. No es ninguno de los dos Secretarios de cartas españolas cuyos nombres conocemos., Ni Francisco de Figueroa, el gran poeta, que fue el primer Secretario (desde el 17 de enero de 1560 hasta el 26 de junio de 1561), ni Miguel Bellido, en cuyo tiempo (entre el 12 de octubre de 1561 y el 24 de febrero de 1564) se escribió la carta. Tampoco es el Secretario francés interino. Es un "auxiliar" español de Bellido, del que conozco todas sus ocasionales intervenciones en la correspondencia de Perrenot.
EL HISTORIADOR: ¿No hay duda en la atribución de la carta a ese personaje anónimo?
EL AUTOR: Las peculiaridades de su pronunciación y ortografía del español, sus hábitos de cifrado y ciertos rasgos gráficos, tanto en lo escrito en claro como en lo escrito en cifra, son concluyentes. El estudio de todas las "manos", escribientes y cifradoras, de

que se valió el Señor de Chantonnay, constituye la 3ª Parte de mi libro.
EL CRÍTICO LITERARIO: De modo que ¿ése es el anónimo "autor" o compilador del centón de textos poéticos que usted denomina *"Cancionero de Perrenot"*?, ¿Es ése, pues, el español que corteja a una dama francesa con los versos de Garcilaso y con los que comienzan "Acepto yo, señora, de ti sea..."?
EL AUTOR: La cosa no es tan simple, pues es norma de las cartas de Perrenot el que los escribientes cifradores cifren un texto en claro, redactado ya en español, que el Embajador les proporciona. Y, si no sabemos cómo y por quién fue redactado ese original en el caso de las cartas normales, menos podemos intuirlo en esta carta en "cifra perdida".
Como pueden ver, las muy diversas partes del libro, por muy heterogéneas que resulten, responden a las exigencias de una "Ciencia" filológica sin amputaciones. El caos y el orden se abrazan hermanados.
EL PELOTA: Es que usted, maestro, es la Filología en persona.
EL AUTOR (alisándose las plumas): Ya hubiera querido serlo. En tal caso la *"quête"* filológica no habría quedado inconclusa. Habría sacado a la luz al culpable de la maldita carta y descubierto sus designios. Ante mi fracaso, serán otros los que, algún día, den final a la "verdadera historia", de la cual ahora ofrezco yo sólo una "Primera parte". Anímense, que yo no soy ningún Cervantes de Saavedra, y no les ocurrirá conmigo como al pobre Avellaneda al intentar continuar el Quijote.
EL PELOTA: Maestro, no pretenda que compartamos su labor. Cuando usted escribe como filólogo, es mucho más que un investigador, es la misma "Casa Menéndez Pidal" en persona viva y, como dicen las Partidas, *"ni admite compañero ni lo ha menester"*. .. Sé que no caerá usted en la rusticidad de pensar que le estoy haciendo la pelota...
EL AUTOR (en un aparte): ¿Qué pretende éste majadero?
EL PELOTA: Perdone, no le he oído bien. Digo que, en la vida, hay que saber estar. Cosa difícil. Pero la cual es preciso intentar, al menos. Y, por lo que a mí toca, pienso que los carismas no se comparten y que sería una insolencia por parte de cualquiera de nosotros, sus discípulos, intentar equipararnos a usted. Quiero creer que usted ve en mi un colaborador leal y, algún día que otro, no demasiado tonto...
EL AUTOR: No, amigo mío, yo no soy "maestro" de nadie. No reconozco a nadie como discípulo mío. Me repugna el proselitismo. No soy un cristiano de la Ciencia filológica... Como los beduinos, siembro de paso y levanto mi tienda...

Diego Catalán.

DENISE DRESSER EN "DISIENTO, LUEGO EXISTO", DE RAMÓN MIER

Por favor, pasen por el blog de Ramón Mier: "Disiento, luego existo..."(**1**) Hoy comentamos allí un vídeo que nos ha interesado especialmente, en el que Denise Dresser diagnostica la enfermedad que lastra la vida política de México.

He escuchado su conferencia dos veces y, seguramente, la volveré a escuchar: su análisis, profundo, a ras de tierra, y sin concesiones, lo mismo sirve para México que para España, y para cualquier comunidad humana, sea grande o pequeña.

Transcripción del discurso de Denisse Dresser en el Foro "México ante la Crisis", frente a diputados, senadores, empresarios y funcionarios:

"México es un país privilegiado. Tiene una ubicación geográfica extraordinaria y cuenta con grandes riquezas naturales. Está poblado por millones de personas talentosas y trabajadoras. Pero a pesar de ello, la pregunta perenne sigue siendo: ¿por qué no crece a la velocidad que podría y debería? ¿Por qué seguimos discutiendo este tema año tras año, foro tras foro? Aventuro algunas respuestas, y les pediría que me acompañaran en un ejercicio intelectual, recordando aquel famoso libro de Madame Calderón de la Barca llamado "*La vida en México"*, escrito en el siglo XVII, en el cual intenta describir las principales características del país. Si Madame Calderón de la Barca escribiera su famoso libro hoy, tendría que cambiarle el título a "Oligopolilandia". Porque desde el primer momento en el que pisara el país, se enfrentaría a los síntomas de una economía política dusfuncional, con problemas que la crisis tan solo agrava. Aterrizaría en uno de los aeropuertos más caros del mundo; se vería asediada por maleteros que controlan el servicio; tomaría un taxi de una compañía que se ha autodecretado un aumento de 30 por ciento en las tarifas, y si tuviera que cargar gasolina, lo haría sólo en Pemex. En el hotel habría 75 por ciento de probabilidades de que consumiera una tortilla vendida por un solo distribuidor, y si se enfermara del estómago y necesitara ir a una farmacia, descubriría que las medicinas allí cuestan más que en otros lugares que ha visitado.

Si le hablara de larga distancia a su esposo para quejarse de esta situación, pagaría una de las tarifas más elevadas de la OCDE. Y si prendiera la televisión para distraerse ante el mal rato, descubriría que sólo existen dos cadenas. Para entender la situación en la que se encuentra, tendría que recordar lo que dijo Guillermo Ortiz hace unos días: no hemos creado las condiciones para que los recursos se usen de manera eficiente; o tendría que leer el libro "*Good Capitalism/Bad Capitalism"*, que explica por qué algunos países prosperan y otros se estancan; por qué algunos países promueven la equidad y otros no logran asegurarla. La respuesta se encuentra en la mezcla correcta de Estado y mercado, de regulación e innovación. La clave del éxito —o el fracaso— se halla en el modelo económico: en la decisión de promover el capitalismo de Estado o el capitalismo oligárquico o el capitalismo de las grandes empresas o el capitalismo democrático.

Hoy México es un ejemplo clásico de lo que el Nobel de Economía Joseph Stiglitz denomina crony capitalism: el capitalismo de cuates, el capitalismo de cómplices, el capitalismo que no se basa en la competencia sino en su obstaculización. Ese andamiaje de privilegios y "posiciones dominantes" y nudos sindicales en sectores cruciales —telecomunicaciones, servicios financieros, transporte, energía— que aprisiona a la economía y la vuelve ineficiente. Una mezcla de capitalismo de Estado y capitalismo oligárquico. Hoy, México —inmerso en la crisis— está aún lejos de acceder al capitalismo dinámico donde el Estado no protege privilegios, defiende cotos, elige ganadores y permite la perpetuación de un pequeño grupo de oligarcas con el poder para vetar

reformas que los perjudican. Al capitalismo en el cual las autoridades crean condiciones para los mercados abiertos, competitivos, innovadores, que proveen mejores productos a precios más baratos para los consumidores. Para los ciudadanos. Hoy, México carga con los resultados de esfuerzos fallidos por modernizar su economía durante los últimos 20 años. Las reformas de los 80 y 90 entrañaron la privatización, la liberalización comercial. Pero esas reformas no produjeron una economía de mercado dinámica debido a la ausencia de una regulación gubernamental eficaz, capaz de crear mercados funcionales, competitivos. En vez de transparencia y reglas claras, prevaleción la discrecionalidad entre los empresarios que se beneficiaron de las privatizaciones y los funcionarios del gobierno encargados de regularlos.

Las declaraciones de Agustín Carstens el martes pasado, en torno a la necesidad de combatir los monopolios en telefonía, son bienvenidas. Lamentablemente, se dan 18 años tarde. Y allí están los resultados de reformas quizás bien intencionadas, pero mal instrumentadas: una economía que no crece lo suficiente, una élite empresarial que no compite lo suficiente, un modelo económico que concentra la riqueza y distribuye mal la que hay. Hoy, México está atrapado por una red intrincada de privilegios y vetos empresariales y posiciones dominantes en el mercado que inhiben un terreno nivelado de juego. Una red descrita en el famoso artículo de la economista Anne Kruege: "*The Political Economy of the Rent-Seeking Society*" ("La Economía Política de la Sociedad Rentista"). Una red que opera a base de favores, concesiones y protección regulatoria que el gobierno ofrece y miembros de la cúpula empresarial exigen como condición para invertir. ¿Quién? Alguien como el dueño de una distribuidora de maíz o el concesionario de una carrera privada o el comprador de un banco rescatado con el Fobaproa o el principal accionista de Telmex o el operador de una Afore. Estos actores capturan rentas a través de la explotación o manipulación del entorno económico en lugar de generar ganancias legítimas a través de la innovación o la creación de riqueza. Y los consumidores de México contribuyen a la fortuna de los rentistas cada vez que pagan la cuenta telefónica. La conexión a Internet. La cuota en la carretera. La tortilla con un precio fijo. La comisión de las Afores. La comisión por la tarjeta de crétido. Ejemplo tras ejemplo de rentas extraídas através de la manipulación de mercado. Y el rentismo acentúa la desigualdad, produce costos sociales, dilata el desarrollo, disminuye la productividad, aumenta los costos de transacción en una economía que —ante el imperativo de la competitividad— necesita disminuirlos. Para extraer rentas, los "jugadores dominantes" han erigido altas barreras de entrada a nuevos jugadores, creando así cuellos de botella que inhiben la innovación y, por ende, el aumento de la productividad. Estos cuellos de boetella inhiben el crecimiento de México en un mundo cada vez más globalizado y competitivo, y son una razón clave detrás de la persistente desigualdad social, como lo sugiere el reporte del Banco Mundial sobre México titulado: "Más allá de la polarización social y la captura del Estado".

La concentración de la riqueza y del poder económico entre esos "jugadores dominantes" con frecuencia se traduce en ventajas injustas, captura regulatoria y políticas públicas que favorecen intereses particulares. Peor aún, convierte a representantes del interés público —muchos de los diputados y senadores sentados aquí— en empleados de los intereses atrincherados. Convierte al gobierno en empleado de las personas más poderosas del país. Y lleva a las siguientes preguntas: ¿Quién gobierna en México? ¿El Senado o Ricardo Salinas Pliego cuando logra controlar los vericuetos del proceso legislativo? ¿La Secretaría de Comunicaciones y Transportes o Unefon? ¿La Comisión Nacional Bancaria o los bancos que se rehúsan a cumplir con las obligaciones de transparencia que la ley les exige? ¿ La Secretaría de Eduación Pública o Elba Esther Gordillo? ¿La Comisión Federal de Competencia o Carlos Slim? ¿Pemex o Carlos Romero Deschamps? ¿Ustedes o una serie de intereses que no logran

contener? Porque ante los vacíos de autoridad, la captura regulatoria y las decisiones de política pública que favorecen a una minoría, la respuesta parece obvia. México hoy padece lo que algunos llaman "Estados dentro del Estado", o lo que otros denominan "una economía sin un gobierno capaz de regularla de manera eficaz". Eso —y no la caída de la producción petrolera— es lo que condena a México al subdesempeño crónico.

Una y otra vez, el debate sobre cómo promover el crecimiento, cómo fomentar la inversión y cómo generar el empleo se encuentra fuera de foco. El gobierno cree que para lograr estos objetivos, basta con tenderle la mano al sector privado para que invierta bajo cualquier condición. Y el sector privado, por su parte, piensa que la panacea es que se le permita participar en el sector petrolero, por dar un ejemplo. Pero ésa es sólo una solución parcial a un problema más profundo. El meollo detrás de la mediocridad de México se encuentra en su estructura económica y en las reglas del juego que la apuntalan. Una estructura demasiado top heavy o pesada en la punta de la pirámide; una estructura oligopolizada donde unos cuantos se dedican a la extracción de rentas; una estructura de complicidades y colusiones que el gobierno permite y de la cual también se beneficia. Claro, muchos de los miembros del gobierno de Felipe Calderón, y muchos de los presentes en este foro, hablarán de crecimiento como una prioridad central. Pero más bien lo perciben como una variable residual. Más bien parecería que buscan —y duele como ciudadana reconocerlo— asegurar un grado mínimo de avance para mantener la paz social, pero sin alterar la correlación de fuerzas existente. Sin cambiarl la estructura económica de una manera fundamental. Y el problema surge cuando ese modelo comienza a generar monstruos; cuando ese apoyo gubernamental a ciertas produce monopolios, duopolios y oligopolios que ya no pueden ser controlados; cuando las "criaturas del Estado" —como las llamal Moisés Naim— amenazan con devorarlo. Sólo así se entiende la devolución gubernamental de 550 millones de dólares a Ricardo Salinas Pliego, por interses supuestamente mal cobrados, un día antes del fin del sexenio de Vicente Fox. Sólo así se entiende el comunicado lamentable de la Secretaría de Comunicaciones y Transportes hace un año celebrando la alianza entre Telemundo y Televisa, cuando en realidad revela una claudicación gubernamental ante la posibilidad de una tercera cadena. Sólo así se comprende que nadie levante und edo para sancionar a TV Azteca cuando viola la ley al rehusarse a transmitir los spots del IFE o se apropia del Cerro dle Chiquihuite. Sólo así se entiende la aprobación de la llamada "Ley Televisa" por la Cámara de Diputados y la de Senadores en 2006. Sólo así se entiende la posposición ad infinitum en el Senado de una nueva ley de medios para promover la competencia en el sector. Sólo así se comprende que la reforma de Pemex deje sin tocar el asunto del sindicato. Sólo así se entiende la posibilidad de dar entrada a Carlos Slim a la televisión sin obligarlo a cumplir con las condiciones de su concesión original. Síntomas de un gobierno ineficaz. Señales de un gobierno doblegado. Muestras de un gobierno coludido. Con efectos cada vez más onerosos y cada vez más obvios que la crisis pone en evidencia, porque no logramos reformarnos a tiempo. Mucha riqueza, pocos beneficiarios. Crecimiento estancado, país aletargado. Intereses atrincherados, reformas diluidas. Poca competencia, baja competitividad. Poder concentrado, democracia puesta en jaque. Un gobierno que en lugar de domesticar a las critaturas que ha concebido, ahora vive aterrorizado por ellas.

¿Cuáles son las consecuencias del mal capitalismo mexicano? Donde las élites tradicionales son fuertes, la gobernabilidad democrática es poco eficaz, los partidos políticos tienden a ser minimalistas. En México, el incrementalismo de la política pública puede ser atribuido a élites tradicionales que usan su poder para bloquear reformas que afectan sus intereses, o asegurar iniciativas que protejan su situación privilegiada. Si ustedes verdaderamente quieren que México crezca, tendrán que crear la capacidad de regular y reformar en nombre del interés público. Tendrán que mandar señales

inequívocas de cómo van a desactivar esos "centros de veto" que están bloqueando el crecimiento económico y la consolidación democrática: Los monopolistas abusivos, los sindicatos rapaces, las televisoras chantajistas, los empresarios privilegiados y sus aliados en el gobierno. Si ustedes verdaderamente quieren que México prospere, tendrán que tomar decisiones que desaten el dinamismo económico, que fortalezcan la capacidad regulatoria del Estado y contribuyan a construir mercados, que promuevan la competencia y, gracias a ello, aumenten la competitividad. En pocas palabras, usar la capacidad del Estado para contener a aquellos con más poder en el gobierno, con más peso que el electorado, con más intereses que el interés público. ¿Qué hacer? Los conmino a leer textos tan influyentes como "The Growth Report" y "The Power of Productivity". A estar conscientes de lo que todo país interesado en crecer y competir debe hacer para lograrlo. A saber que ello requiere una economía capaz de producir bienes y servicio de tal manera que los trabajaodres puedan ganar más y más. A entender que ello se basa en la expansión ráida del conocimiento y la innovación; en nuevas formas de hacer las cosas y mejorarlas; en técnicas que aumentan la productividad de manera constante. A reconocer que las economías dinámicas suelen ser aquellas capaces de promover la competencia y reducir las barreras de entrada a nuevos jugadores en el mercado. A entender que esa tarea del gobierno —a través de la regulación adecuada— crear un entorno en el cual las empresas se vean presionadas por sus competidores para innovar y reducir precios, y pasar esos beneficios a los consumidores.

A comprender que si eso no ocurre, nadie tiene incentivos para innovar. En lugar de ser motores de crecimiento, las empresas protegidas y/o monopólicas terminan estrangulándolo. En pocas palabras, la competitividad —factor indispensable para atraer la inversión y con ella remontar la crisis, como sugería Sanguinetti— está vinculada a la competencia. El crecimiento económico está ligado a la competencia. La innovación y, por ende, el dinamismo y la creacion de empleos se desperenden de la competencia. La inversión que se canaliza hacia nuevos mercados y nuevas oportunidades es producto de la cometencia. No es una condición suficiente pero sí es una condición necesaria. No bastará por sí misma para desatar el crecimiento, pero sin ella jamás ocurrirá, por más dinero público que se inyecte a la economía mediante políticas contracíclicas. Y, ¿cómo empezar a empujar eso? Con una tercera cadena de televisión; con el fomento de la competencia en banda ancha a través de la red de la Comisión Federal de Electricidad; con el fortalecimiento de los órganos regulatorios, con la sanción a quienes violen los términos de su concesión; con la reación de mercados funcionales, como ya se logró con las aerolíneas de bajo costo; con medidas que se empiecen a desmantelar cuellos de botella y a domesticar a esas "criaturas del Estado". Tiene que ver con la inauguración de un nuevo tipo de relación entre el Estado, el mercado y la sociedad. Porque si la clase política de este país no logra construir los cimientos del capitalismo democrático, condenará a México al subdesempeño crónico. Lo condenará a seguir siendo un terreno fértil para los movimientos populares contra las instituciones; un país que cojea permanentemente debido a las instituciones políticas que no logra remodelar; los monopolios públicos y privados que no logra desmantelar; las estructuras corporativas que no logra democratizar. Será lo que Felipe Calderón llama "un país de ganadores" donde siempre ganan los mismos. Un lugar donde muchas de las grandes fortunas empresariales se construyen a partir de la protección política, y no de la innovación empresarial. Un lugar donde el crecimiento de los últimso años ha sido menor que en el resto de América Latina debido a los cuellos de botella que los oligopolios han diseñado, y que sus amigos en el gobierno les ayudan a defender. Un lugar donde las penurias que Madame Calderón de la Barca enfrentó con los aeropuertos, los maleteros, los taxis, las gasolineras, la telefonía y la televisión son las mismas que padecen millones de mexicanos más. Ese consumidor sin voz, sin alternativa, sin protección. Ese hombre

invisible. Esa mujer sin rostro. Esa persona que paga —mes tras mes— tarifas telefónicas más altas que en casi cualquier parte del mundo. Esa compañía que paga — mes con mes— servicios de telecomunicaciones que elevan sus gastos de operación y reducen sus ganancias. Miles de personas con comisiones por servicios financieros que no logran entender, con cobros inusitados que nadie puede explicar, parados en la cola de los bancos. Allí varados. Allí desprotegidos. Allí sin opciones. Allí afuera. Víctimas de un sistema económico disfuncional, institucuionalizado por una clase política que aplaude la aprobación de reformas que no atacan el corazón del problema. Presidentes, secretarios de Estado, diputados, senadores y empresarios que celebran el consenso para no cambiar. Aunque se agradece que este foro finalmente acepte la magnitud de la crisis, si de aquí no surgen medidas concretas para mirar más allá de la coyuntura, revelará nuevamente nuestra incapacidad para encarar honestamente los problemas que México viene arrastrando desde hace décadas. Revelará la propensión de los sentados aquí a proponer reformas aisladas, a anunciar medidas cortoplacistas, a eludir las distorsiones del sistema económico, a instrumentar políticas públicas a pedacitos, para llegar a acuerdos que sólo perpetúan el *statu quo*.

Mientras tanto, la realidad acecha a golpes de 327 mil despedidos, crecimiento negativo, el lugar 60 de 134 en el Índice Global de Competitivdad y una nación que dice reformarse mientras evita hacerlo. México no crece por la forma en la cual se usa y se ejerce y se comparte el poder. Ni más ni menos. Por las reglas discrecionales y politizadas que rigen a la república mafiosa, a la economía "de cuates". Por la supervivencia de las estructuras corporativas que el gobierno creó y sigue financiando. Por un modelo económico que canaliza las rentas del petróleo a demasiadas clientelas. Por un sistema político que funciona muy bien para sus partidos pero muy mal para sus ciudadanos. Un sistema de W "extracción sin representación". Creando así un país poblado por personas obligadas a diluir la esperanza; a encoger las expectativas; a cruzar la frontera al paso de 400 mil personas al año en busca de la movilidad social que no encuentran aquí; a vivir con la palma extendida esperando la próxima dádiva del próximo político; a marchar en las calles porque piensan que nadie en el gobierno los escucha; a desconfiar de las instituciones; a presenciar la muerte común de los sueños porque México no avanza a la velocidad que podría y debería."

Denise Dresser
De nada, ya saben que me gusta ser útil.

Gatopardo

1) Nota 16 de mayo 2013: El blog de Ramón Mier http://disiento.blog.com no está ya operativo. Como tantos otros que aportaban inteligencia y honradez a un debate necesario en México, silenciados por las buenas o por las malas.

Dices a menudo que te gusta ser útil, pues has de saber que pocas veces lo has sido tanto como hoy.

Te aplaudo por recomendar este vídeo. Denise Dresser es un magnífico ejemplo de "puño de hierro con guante de seda". Esa es una gran mujer.
Gracias.

A mí también me gustaría poseer el texto.
De poder -se necesita contraseña para comentar en su blog- le diría al amigo Ramón, que los mexicanos son muy dados a la lisonja educada y bella. Es cierto, Denisse es encantadora, de conocerla me enamoraría locamente de ella; pero no debemos caer en este tipo de piropos ya que pueden desvirtuar un mensaje, el suyo, tan terrible como global.
Un mensaje, una llamada urgente, un grito que exige la supremacía de: "el optimismo de la voluntad frente el pesimismo de la inteligencia."
Es admirable que una persona tan inteligente ponga el loco y poco sensato optimismo sobre el lógico e inteligente pesimismo. Eso da fuerza de espíritu, ganas de pelear por unas convicciones a punto de ser abandonadas.
Un abrazo.

AVISOS

Señores del Tribunal de Cuentas, Agencia Tributaria, analistas, y periodistas extranjeros (abstenerse españoles que trabajan para los periódicos más vendidos):
Miren debajo de las alfombras en:
-Ministerio de Cultura : facturaciones, concesiones, contrataciones y sociedades que colaboran, y, muy especialmente, el Protectorado de Fundaciones, Bibliotecas, Museos, etc. y su red de apoyo mutuo.
-Instituto de Crédito Oficial (ICO): beneficiarios del sector de la construcción y extrañas empresas de accionariado volátil y polifacético...
-SGAE y sociedades afines.
El tenderete montado tiene tanta solidez y futuro como las construcciones de Santiago Calatrava .

De nada. Ya saben que me gusta ser útil.

TERCER ANIVERSARIO: ACTA FUNDACIONAL DE GATOPARDO

El grupo fundacional fotografiado por l'agüela

Acta de constitución de Gatopardo, redactada y firmada el 1 de febrero de 2005

Presentes Alimaña (redactor-jefe), El Pendón Volteriano, El Espía que surgió del Frío, l'agüela Gatopardo, y Gerald Widemann, apátridas, decidimos crear una bitácora a la que llamaremos Gatopardo (en honor al tiburón de esta especie), en la que, por todos los medios pacíficos y violentos, incluidas las patadas en los morros, nos obligamos, bajo sanción para que:

— no tengan cancha los lectores del Comando Sacarina que suelen rebozarte la sección de comentarios en demostraciones de cariño, onomatopeyas, emoticones y memeces

— no se dé carrete al Club Amén, secta destructiva del más elemental sentido del ridículo y del pudor, que engorrina la sección de comentarios con adhesiones inquebrantables que podrían ser escritas por el autor.

— no se deje que campe por sus respetos el Klub de la K y del Lenguaje SMS, ni los semianalfabetos, enemigos de la ortografía y de la sintaxis, que convierten la sección de comentarios en la puerta de un retrete

— no se ofrezca refugio a los que tienen hambre y sed de autobiografiarse por lo extenso

—no se dé asilo a los que tienen el superego amiantado y el ego de cristal de Bohemia, y busquen abuela y aprobación, bajo amenaza de hacerse del club de nuestros damnificados

—no se tolere el género charlatán de Hyde Park con vocación frustrada de tertuliano radiofónico, que todo lo adoba con su indignación

—no se dé asilo y cobijo a los tontarras del género New Age y Psico-Aspartame que pringan todo con buenos sentimientos, pacifismo, fraternidad, igualitarismo y humanitarias consideraciones para ser felices

Y con respecto a los colaboradores y al contenido de la bitácora:

— guerra a las tres oes en nuestros artículos (originalidades, ocurrencias y ordinarieces), y a las tres erres en nuestros argumentos: (repetitivos, rumiantes y redundantes) y a las tres pes (perifrasis, pedagogía y pedantería), propias de filologuillos y gente de pluma.

— apadrinaremos (no como una ong, sino en su acepción mafiosa) todas las causas que no tengan cabida en los medios de comunicación, sean de izquierdas o de derechas, y a todos los autores que nos gusten, siempre y cuando no sean los que compran masivamente los lectores, promocionan los editores, citan los críticos de moda y recogen los manuales de texto.

Y bajo el *motto*: *"Ni se te ocurra decir que sí "*, firmamos este pacto:

Alimaña **(redactor-jefe) de** ***Alimaña News, la noticia antes de que ocurra***
El espía que surgió del frío
El Pendón volteriano (también conocido como Eliah Meyer)
L'agüela Gatopardo
Gerald Widemann

Más información: Ripios al segundo aniversario de Gatopardo

Nuestros proscritos del Club Amén, y del Comando Sacarina

Vuestros principios de Acta de constitución de "Gatopardo", propios de filosofía barata -protesto y no me enfado, aunque si pudiérais sería: manipulo y extorsiono-, no hacen honor a vuestro nombre. Si Guareschi levantara cabeza... ...qué lástima le daríais.

Fecha: 07/02/2008 08:40.

Autor: El Pendón Volteriano a Nica

Distinguida oposición: Podemos prescindir de su respeto, pero la sintaxis y la lógica discursiva son damas frágiles, que han quedado maltrechas tras su brioso discurso. Ruego un poco de mesura con el anacoluto. El señor Guareschi, por problemas de hidrocefalia, ya en vida, tuvo problemas para llevar la cabeza erecta. Pero, como buen católico, vistió su tara con hábito de humildad. Descanse en paz.
PS: Entre usted y yo ¿Qué pinta este señor aquí?

Fecha: 07/02/2008 15:26.

Hola,

Les escribo desde Zaragoza, España. Hay un foro en internet sobre Caspe, www.caspolinos.net donde inaguramos ayer una seccion, "Diccionario Local", para que los usuarios aporportaran las palabras propias del pueblo que conocian y su definición. En la primera respuesta a este hilo, una usuaria puso un enlace a su recopilacion "ASÍ SE HABLA EN CASPE (A-D)" y me gustaría saber si me dejan copiar y pegar todas las palabras para ponerlas en ese foro, siempre citando la fuente.

Gracias, un saludo.

Fecha: 26/02/2008 02:55.

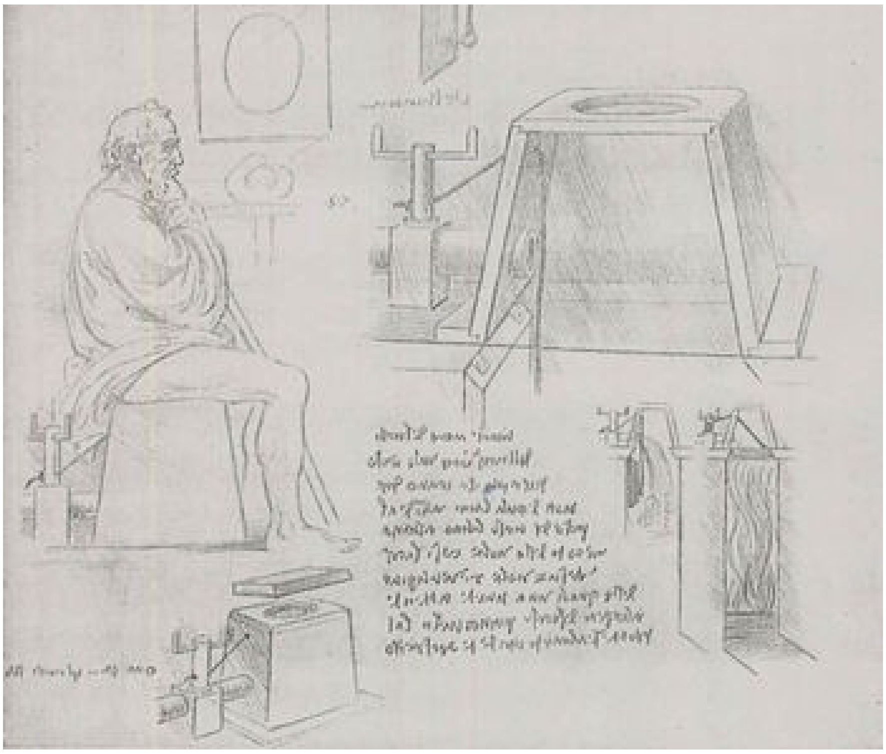
PROFESOR RAÚL PRIETO, NIKITO NIPONGO: AUTOPSIA A DOÑA REAL ACADEMIA



En junio de 1713 llega al mundo la Real Academia Española. *"El principal fin que tuvo la Real Academia Española para su formación"*, dice el prólogo de su primer diccionario (el cual empieza a imprimirse en Madrid en 1726), *"fue hacer un diccionario copioso y exacto''*. Pero 266 años después, al surgir la edición 21 de su magna obra, en junio de 1992, ese diccionario copioso y exacto sigue siendo una ilusión. Estamos, más bien, no ante un diccionario, pues se trata de un mamotreto manco y rengo muy ajeno a las modernas técnicas lexicográficas, que ni remotamente tiene traza de copioso ni menos aún de exacto.
Sin embargo, como ocurre siempre, ahora los propagandistas de la Real Academia Española manejan sus hilos podridos y la hacen menearse, como si estuviera viva. Por conducto de la agencia noticiosa española EFE (F de Franco), se propaga este rumor: *"El Banco de Datos del Español, un ambicioso proyecto de la Real Academia Española dentro de un plan destinado a potenciar esta institución, contará con 150 millones de registros a finales del año 1997.''* Pueden ser 300 billones, ¿y qué?; ¿acaso por arte de

magia brotará de esa marabunta informativa un lexicón admirable?
Don J. Jaime Hernández, corresponsal de *Excélsior* en Madrid, por su manera de comportarse cuando el pasado 13 de marzo se coló en el edificio de la Real Academia Española, en la calle de Felipe IV, revela el ánimo que alienta a sus admiradores: llega a la presencia del director de la academia, Fernando Lázaro Carreter (a quien Hernández llama presidente), como si cegado por la emoción entrara de rodillas al sanctasanctórum de una divinidad. Acompáñenme las lectoras y los lectores a escuchar al extasiado don J. Jaime:
Don Fernando Lázaro Carreter me recibe en su despacho. Un bedel de avanzada edad me ha servido de guía entre las columnas que preside, con ese aire de gloriosa autosuficiencia, Miguel de Cervantes Saavedra, el "Manco de Lepanto''. Bajo su pétrea mirada llego al fin hasta esa habitación de aire espartano que Lázaro Carreter ha ocupado en los últimos cinco años.
Nada tiene qué hacer don Miguel de Cervantes en la Real Academia Española. Murió 97 años antes de que a ésta la fundara Felipe V, rey de España importado de Francia (porque el retrasado mental Carlos II, monarca anterior, murió agusanado sin dejar descendencia). Además, la Real Academia Española hubiera rechazado a Cervantes, por iconoclasta, de haber sido su contemporáneo. No hay que olvidar que la misma institución se negó a admitir en su seno tenebroso a la lexicógrafa María Moliner, poniendo de pretexto sus antecedentes antifranquistas, y recibiendo en cambio a la tonta e inservible Carmen Conde. Pero sigo con J. Jaime Hernández:
Sentado ahí (Fernando Lázaro Carreter), *emboscado en un mar de papeles que tapizan su escritorio, el presidente de la Real Academia parece, o quizá simula, estar muy concentrado en la lectura de algo que, aparentemente, le resulta impostergable. Su insigne figura, recortada por un haz de luz que desciende de un ventanal lateral, parece resguardada por los retratos de cámara que penden de las cuatro paredes color granate.*
¡Qué dirá de la tal insigne figura el filólogo Manuel Alvar! Fue director de la Real Academia Española (1988-91) y, por haber tratado de modernizarla, cayó tras de meterle zancadilla Carreter, su sucesor, distinguido por su calidad de grillo pomposo.
Largo es el palique en el cual se enredan Carreter y su entrevistador. Me limito a dar cuenta del anuncio que hace, casi al final del cotorreo, don Fernando Lázaro Carreter:
Espero que con la ayuda de las academias (de América) podremos completar nuestra labor de registro para poder lanzar en el año 2000 el que será el gran diccionario de la Real Academia Española, con un acervo mucho más completo del español que se habla hoy en América y en España.
¿Podrá ocurrir milagro tan fabuloso, y con la ayuda de los cenáculos de inutilazos que son las mencionadas academias del nuevo mundo? Para que ese gran diccionario finisecular resultara la maravilla largamente esperada, se requeriría dinamitar a la Real Academia Española, acabando con los académicos españoles: con su prepotencia hueca, su abulia, su negligencia, su pésima forma de expresarse, sus usos caducos, su conservadurismo esterilizante... El gran diccionario prometido tendría que ser radicalmente distinto al lexicón acostumbrado, y no otra obra de momias torpes, sino de lingüistas y lexicógrafos capaces y trabajadores, ajenos a la Academia Real.
Debo recordar que cuando se ha hablado sobre la inminente salida de cada una de las sucesivas ediciones del *Diccionario de la Lengua Española,* los panegiristas de la Real Academia Española baten palmas gozosos. Pero su entusiasmo se enfría cuando la realidad demuestra que, por enésima vez, el nuevo diccionario académico es un desastre lexicográfico más. Aquel alborozo quedó reflejado en el preámbulo de su edición última, la de 1992:
La Real Academia Española ha querido contribuir a la celebración del V Centenario del descubrimiento de América publicando una nueva edición, la vigésimo primera, de su diccionario usual. Lo hace para cooperar al mantenimiento de la unidad lingüística de los

más de trescientos millones de seres humanos que, a un lado y otro del Atlántico, hablan hoy el idioma nacido hace más de mil años en el solar castellano y se valen de él como instrumento expresivo y conformador de una misma visión del mundo y de la vida.
Lenguaje amerengado y tramposo, influido por una concepción imperialista que, aunque anacrónica, respalda las labores de la Real Academia Española. Por lo mismo lanza ella la citada edición, no por cooperar al mantenimiento de la tal unidad lingüística que, claro, sólo la concibe aquella institución con el cordón umbilical amarrado a Madrid, la antigua metrópoli del imperio. Sí, el idioma que hablamos nació como dialecto del latín en Castilla la Vieja. Vuelto comunicador oficial de España, por imposición de los feroces Reyes Católicos, alcanzó la calidad de lengua española -discriminando al catalán, al valenciano, al bable, al gallego y, con mayor rencor, al vasco-. Pero expandido a América tal idioma desde hace medio milenio, hoy, en rigor, no es castellano ni español, sino hispanoamericano: ente que de ningún modo aprueba la cerrada Real Academia Española, según lo demuestra con su diccionario que es, en verdad, un diccionario madrileño. Para la vieja, sólo el habla de Madrid vale; fuera de Madrid, todo es Carabanchel.
En el mismo preámbulo se desparraman lisonjas dedicadas a esa edición 21 del Diccionario de la Lengua Española, esperando que el consultante las trague sin regüeldos disidentes, absteniéndose de estudiar a fondo el resto de la obra. De lo contrario, si le da por leer el diccionario y reflexionar sobre lo leído, concluirá que dichos elogios son groseramente falsos.
Mas a lo mejor la edición 22 del Diccionario de la Lengua Española, la de 2000, será auténtico prodigio. Ya veremos. Mientras tanto, hay que atenerse a lo que ha sido y es la Real Academia Española y sus academias subordinadas y cómplices, según la referida edición de 1992. En ella estriban los siguientes apartados.

Pedantería

Incluso vocabularios escolares de otros idiomas dedican una de sus páginas a la reproducción de determinados alfabetos; por ejemplo, el estupendo *Merriam Webster's Collegiate Dictionary* (1993) trae una tabla de alfabetos: hebreo, arábico, griego, ruso y sánscrito (de signos primorosos). El Diccionario de la Lengua Española no ofrece nada parecido. Informa:
alfabeto. *abecedario.*
abecedario. *Serie de las letras de un idioma, según el orden en que cada uno de ellos las considera colocadas*.
Eso es todo. Nada acerca del alfabeto griego, por ejemplo. Alguien preguntará: "¿Por qué tendría que hacerlo?'' Pues por la sencilla razón de que en muchos de los paréntesis de su diccionario, en que van informes etimológicos, la Real Academia Española sigue dando la lata al transcribir palabras griegas no mediante nuestra escritura, sino con caracteres griegos, que para la mayoría de sus consultantes resultan chinos.

Centralismo

En el Diccionario de la Lengua Española se indica que es propiedad de la Real Academia Española, y de nadie más. Por otra parte, insisto: se trata de un léxico del español hablado en Madrid (buena parte, anticuado). Si en esa capital son medianamente conocidas, se agregan al diccionario académico voces de provincias españolas o de países americanos y de Filipinas (muchos de ellos tienen el carácter de vulgarismos desusados, a los que se pegan definiciones hechas en Madrid). El español de México, de Cuba, de Colombia, de Argentina... no tienen vela en el entierro de la Real Academia Española. Hay Academia Ecuatoriana, Salvadoreña, Venezolana, Chilena... pero como si

no existieran. Y si la Real Academia Española llega a hacer algo, las demás academias de la lengua no hacen absolutamente nada. (La nacida sin vida en México, la Academia Mexicana, se hace aparecer como autora del Diccionario geográfico universal, editado en abril del presente año por el Fondo de Cultura Económica. Sería su primer trabajo serio en 122 años de existencia. Pero lo cierto es que el único autor de guía tan útil es mi buen amigo, el sabio lexicógrafo don Guido Gómez de Silva.)
A propósito de académicos norte, centro y suramericanos (prefiero esta forma, usada por el subcomandante Marcos, y no sudamericanos), debo señalar que la Real Academia Española repite su necia majadería de suponerlos, con los filipinos, de inferior categoría a los madrileños. Otro dirá: "Y ¿a qué posible sitio elevado podría aspirar la sagrada carroña de Andrés Henestrosa, entre otros farsantes?'' Pues a ninguno, pero el caso es que los miembros de número de la Real Academia Española sigue siendo cada uno, en el diccionario, Excelentísimo Señor Don (lo que me lleva al informe de Pancho Liguori: *"El excelentísimo condón es el con que tiene el don''*). Hasta cada académico fallecido "después de publicada la edición vigésima del diccionario'', si fue español, se exhibe como Excelentísimo Señor Don Muerto de Tal. En cambio, cada académico de fuera de Madrid (excepto los "señores académicos de honor'') tiene que conformarse con el tratamiento de Sr. D. ¡y se acabó!
Toda la información que nutre las columnas del *Diccionario de la Lengua Española* fue armada en Madrid y se publica para Madrid. Aun los mexicanismos y demás términos foráneos; ejemplo: *"**nopalito**. Méj. hoja tierna de tuna que suele comerse guisada''*. ¿Por qué tuna? Porque así -o higuera de tuna- se llama en Madrid al nopal. ¿Han protestado los académicos mexicanos al leer esa definición? Nunca (y lo más probable es que ni la hayan leído).

Vejeces

La pereza hincada hasta la médula de sus huesos obliga a la Real Academia Española a mantener en su librote antiguallas (que un buen criterio recomendaría desechar). El primer diccionario académico, el llamado de Autoridades, de principios del siglo XVIII, se ocupa de un pasatiempo, ya conocido tiempo antes, y lo describe tartajeando:
mundinovi o mundinuevo. *Cierta arca en forma de escaparate, que traen a cuestas los saboyardos, la cual se abre en tres partes, y dentro se ven varias figurillas de madera movibles, y metiendo por detrás una llave en un agujero, prende en un hierro, que dándole vueltas con ella, hace que las figurillas anden alrededor, mientras él canta una cancioncilla.*
La edición 21 del Diccionario de la Lengua Española (1992) declara:
mundonuevo. *Cajón que contenía un cosmorama portátil o una colección de figuras de movimiento, y se llevaba por las calles para diversión de la gente.*
El tal mundonuevo está bien para un diccionario histórico de memeces. Es inadmisible en un lexicón actual y más si el mismo, como el de la Real Academia Española, sufre de una catastrófica escasez de vocablos modernos. Por lo demás, reconozco que el mundonuevo no se antoja muy anticuado en ese diccionario, tomando en consideración que asimismo lo repletan términos del medievo o más viejos, hace muchísimo completamente en desuso. De paso vuelvo a indicar que casi el total de voces de marina explicadas en el Diccionario de la Lengua Española pertenecen al léxico de los barcos de vela.

Payasadas

Buenos son los académicos de la lengua, "a un lado y otro del Atlántico'', para farolear en sus declaraciones o en sus actos protocolarios. Son globeros que incursionan felices en el terreno fangoso del ridículo. O untuosos engañabobos, como el susodicho

Fernando Lázaro Carreter al perorar:
Considero que el no reconocer la labor que está haciendo hoy la Academia [española] *es vivir de espaldas a la realidad. En este último sentido, la acusación es absolutamente injusta. Y lo es por desconocimiento. Porque quienquiera podrá acudir a esta institución y observar la atención que le dedicamos al español que se habla no sólo en España, sino al español que hoy se escucha en todos los países de Hispanoamérica.*
Muchas gracias, señor Carreter, pero precisamente la última edición del diccionario académico lo desmiente. *"Yo quisiera que la gente viera el trabajo de nuestros 80 filólogos'',* insiste el director de la Real Academia Española. Lo malo es que, hasta ahora, no es visible. ¿Qué pensar, tratándose del mentado diccionario o de la gramática que, dicen, prepara esa institución? Después de su edición de 1931, sólo hay el Esbozo de una nueva gramática de la lengua española (1973), *"mero anticipo provisional de lo que será la nueva edición de la Gramática de la Lengua Española''*... que la gente sigue sin poder ver. Las que sí ve son las pompas fúnebres a que son tan aficionados los académicos (y que al no ser invitado a ellas, pues todavía no lo eligen académico, fuerza a Francisco Umbral a ir a mearse periódicamente en los muros de la casa de la Real Academia).
Al recibir a un nuevo miembro de la Real Academia Española, por ejemplo: el español Mario Vargas Llosa, reconciliado con Fujimori tras de la matanza de guerrilleros en la embajada nipona en Lima, un buen número de rucos se visten de etiqueta, colgándose un collar con el escudo de su sociedad. A la ceremonia se ve obligado a asistir el rey de España, quien hace heroicos esfuerzos para no adormecerse mientras el recipiendario babea un discurso inane. Los fotógrafos de diarios y revistas y los camarógrafos de televisión se encargan de tomar las vistas que habrá de ver la gente. Algo es algo.
A los académicos madrileños no se les invitó a soltar rollos de vacuidades en el *Congreso Internacional de la Lengua Española*, pachanga celebrada en Zacatecas y presidida por el citado rey de España y el de México, cual si fueran autoridades en la materia. El desaire les ardió a los dichosos señorones, moviéndolos a vaciar su resentimiento calificando, junto con otros chupapitos, de disparate a la única propuesta respetable de esa reunión: la de reformas a la ortografía, que bosquejó Gabriel García Márquez con tino.
No está por demás observar, a propósito, que si políticamente nos independizamos de España hace 176 años, lingüísticamente -y de modo especial en lo que corresponde a la ortografía- continuamos sujetos al arbitrio de la Real Academia Española (que no acepta aquello de que el español ya no es lengua del imperio). Y de veras repugna saber que hay entidades nuestras muy dóciles al dictado imperial. Así, la Academia Mexicana, institución de una república, llega al extremo de adoptar como su escudo el mismo de la Real Academia Española; se puede ver en la fachada del draculesco caserón de la calle de Donceles donde aquella malinche se apolilla: en torno al afamado crisol de alquimistas aparece la leyenda, también célebre -por idiota-, limpia, fija y da esplendor.
Si la Real Academia Española pone en su diccionario: *"**tamal**. Amer. Especie de empanada''* ("***empanada***. *Masa de pan*"), sin merecer reparos de la Mexicana, tranquilamente suelta, igualmente ahí, esto:
tepezcuinte*. (Del mejicano tepetl, monte e itzcuintli, perro.) Costa Rica, Guatemala y Méjico, paca, animal.*
Nadie de la Academia Mexicana, ni siquiera los que en ella se las dan de nahuatlatos, le ha hecho ver a la Real Madre que su tepezcuinte fue el tepescuincle o tepescuintle, uno de los muchos animalitos de México ya extinguidos, y que es una reverenda cabronada imponerle a ese perro de monte, mamífero carnívoro de México y de América Central, la definición correspondiente a la paca (voz de origen guaraní), mamífero roedor que, como se lee en el mismo disparatario, *"es propio de América de Sur''.*
Y bien, con las zonas del cadáver de la Real Academia Española que antes he revisado me basta, aunque para seguir la disección hay más: Realeza, Clericalismo, Pendejez...

Este último tema se distingue por ancho y jugoso, lo que es de esperar, tratándose del Diccionario de la Lengua Española en Salmuera.

Raúl Prieto Riodelaloza*, alias Nikito Nipongo* (1918-2003)

Raúl Prieto, con su seudónimo "Nikito Nipongo" escribía la cincuentenaria columna satírica *"Perlas Japonesas"*; firmó también como "Nik Nip", "Gonzalo Sánchez González", "Darío Leozal", "Arturo Lepi", "El abogado Patalarga", "Don Hechounperro" y "El doctor Keniké". y fue una figura destacada y controvertida de las letras mexicanas. Hijo del gran matemático Sotero Prieto, heredó de él un espíritu analítico, caústico y mordaz, que vertió en miles de artículos, cuentos, caricaturas y novelas.
Amigo de la controversia, y sobrado de conocimientos, fue un intelectual independiente que se mofó de la ampulosidad, la pedantería de los políticos, -a quienes criticaba sus abusos-, de la Real *Academia Española de la Lengua*, de la *Academia Mexicana de la Lengua* y del *Diccionario de la Lengua Española*.
Escribió más de 15 libros sobre temas diversos, incluidos novelas y cuentos de los cuales destacan *"Hueso y carne"* (1956), *"El diccionario"* (1959), *"La lotería"* (1960), *"Madre academia"* (1977), *"Pemex muere"* (1981) y "*Nuevas y viejas perlas japonesas"* (1985), *"Vuelve la real madre academia"* (1986), *"Museo nacional de horrores"* (1986), *"La virgen murió en Chichicateopan"* (1988), *"Desenróllame tu rollo"* (1998) y la edición de autor *"Si ya estás muerto, qué te importa"* (2003).
Colaboró con *Prensa Latina, Tiempo, La Prensa, Novedades, Siempre, Ja-Ja, Ultimas Noticias, La Palabra y el Hombre, Revista de Revistas* y *Excélsior.* Fue cofundador de la revista *Proceso* (1976) y del diario *Unomásuno* (1977), y fue subdirector de *El Fígaro* de 1980 a 1981.

La RAE es un instrumento clasista que mira al pasado, teme el futuro y reniega del presente. No reconoce ni respeta la propia naturaleza viva y diversa del lenguaje y, por lo tanto, es INSERVIBLE como instrumento de consulta, también en España. Afortunadamente, no creo que cumpla ninguna otra función ni tan si quiera en Madrid.

Si bien es cierto que no se puede tomar la RAE en sentido absoluto, no veo cuál es la alternativa. Es más, sus opiniones apuntan más a su operatividad que a institución misma. Ahora bien, noto cierto dejo de superioridad en su discurso, el cual además de estar llenos de adjetivos gratuitos no aporta mayor alternativa. Incluso, vale decir, que de no ser por los errores y excesos de la RAE, no tendría sentido escribir sobre ella. Además, noto que toma el mundo al revés, como si la Academia dictara normas desde el Olimpo, cuando lo que hace es, según mi humilde parecer, recoger los uso en busca de normatizar la Lengua. Claro, yo no pretendo tener tanto saber. Seguramente para usted seré un ignorante, pero en fin...

Autor: emilio

"Haz lo que yo digo y no lo que yo hago", se dice por ahí, no sé si por boca de la sabiduría popular o porque viene en alguna parte de la Biblia. Lo que importa es la enseñanaza en sí misma: como principio general, se debe valorar la calidad, la verdad y la corrección del mensaje, y no la personalidad del mensajero. De otra forma, terminaremos pidiendo la dimisión de los ministros por adúlteros, o por haber fumado porros, o por haberle pegado a un compañero en la universidad, o por maltratar a la mujer. Sé que es una diana fácil denunciar escándalos sexuales y otros trapos más sucios como la extorsión, el asesinato o la tortura, pero insisto, no se debe juzgar la validez de la teoría de la gravitación universal por el hecho de que su formulador fuese un depresivo bipolar que asesinó a decenas de personas en duelo y que abusó de otras tantas desde su posición de poder omnímodo. Su obra, sean cuales sean sus detestables vicios personales, es magnificente. La hipocresía, tipificada como vicio, como el peor de los pecados, es una astuta trampa que nos tiende el cristianismo para oscurecer nuestra percepción de la realidad material del mundo. He dicho, y me quedo más ancho que un tren visto de lado.

Estoy totalmente de acuerdo con el comentario de Hannah.
Te felicito y agradezco tu trabajo.

Fecha: 01/02/2008 20:04.

Autor: Gatopardo

Hannah y Moisés: la Iglesia Católica ha cerrado en falso demasiadas veces las denuncias al no querer llevar a término las investigaciones; pero la Justicia de varios paises -entre otros, España- ha secundado el desprecio a las víctimas.
Emilio: nada que objetar si así lo piensas. Espero que si alguna vez un cura abusa sexualmente de tus hijos tengas en cuenta esto que dices, y sepas dar carpetazo al asunto y no tomes como diana fácil la denuncia del violador, para que no te encuentres del lado equivocado por no ponderar que sus enseñanzas son irreprochables, y andar hurgando en sus fallos "humanos". Es lo que hace la mayoría de los padres y tutores y jerarquía católica respecto a los abusos sexuales: callan y no denuncian por consideración al abusador y no a la víctima.
Y se quedan más anchos que largos.
Yo reconozco que estoy con los que denunciaron y exigieron justicia.

Fecha: 02/02/2008 08:39.

Autor: emilio

Claro que no se trata de dar carpetazo, y desde luego se deben denunciar y castigar ejemplarmente las violaciones, pero no debemos debemos perder de vista el fondo de la cuestión. Y el fondo es fundamentalmente político: la iglesia es una institución básicamente opresora, su complicidad con los poderes establecidos tiene una milenaria historia que llega hasta el concordato con Hitler; Mussolini y Franco, el apoyo a Videla etc. Lo que quiero decir es que los casos particulares, como éste, no deben en ningún caso ocultarnos la naturaleza opresiva del fenómeno religioso, independientemente del carácter moral de sus proponentes, y su función principal en el mantenimiento de un mundo y una sociedad escindida en clases.

ALIMAÑA NEWS A FAVOR DE LOS ACTOS DE FERVOR DEL NACIONAL-CATOLICISMO

La oveja bala, la rana croa, el pájaro pía, el toro brama, el elefante barrita, y la iglesia opina

Frente a quienes se mosquean con los católicos integristas españoles que, sea verano o invierno, con cuarenta grados a la sombra o con cierzo, aprovechan el fin de semana para irse a cientos de kilómetros, y juntarse todos en Madrid para manifestarse a favor de la familia y la unidad de la patria, este redactor jefe no cabe en si de gozo.
Es más, creo que los obispos deberían dejarse de tonterías y dar instrucciones claras a los curas de las parroquias para que apliquen con rigor la doctrina de la Iglesia Católica, y para que se dejen de templar gaitas en plan modernete, y que de una vez todos impongan las obligaciones litúrgicas y doctrinales a su grey, incluida la obligación de no juntarse con quien no sea fiel a sus preceptos, bajo pena de excomunión y escarnio

público.
Y para facilitarles la tarea, ahí van mis sugerencias:
-Que exijan certificados de virginidad firmados por un médico forense de la curia para casarse por la Iglesia Católica.
-Que a todos los católicos se les haga un tatuaje con tinta indeleble en la frente, con un texto claro, conciso y preciso, jurando renuncian a tener relaciones sexuales fuera del matrimonio, roces lascivos, besos pecaminosos, y a usar píldoras anticonceptivas o condones. Y asimismo, un tatuaje indeleble en salva sea la parte en el que diga: *"Yo,* (nombre y apellidos) *renuncio a Satanás, a sus pompas y a sus obras, y me consagro a Jesucristo por siempre jamás. Amén"*. Y que tenga pena de cárcel quien les ayude a saltarse esas prohibiciones.
-Que sea obligatorio para todos los católicos, y se pase lista para comprobar quien falta :
-el rezo diario del rosario de la aurora mientras se recorre las calles del pueblo, rezando los misterios dolorosos a la puerta de la casa de los ediles
-la adoración nocturna del Santísimo todos los viernes, desde el anochecer hasta el amanecer
-confesión y dirección espiritual, y penitencia con arrepentimiento, dolor de corazón y propósito de enmienda, los sábados.
-la misa de doce todos los domingos y fiestas de guardar, con participación en la liturgia y la eucaristía, siendo obligatorio asistir en ayunas.
-el cilicio y la disciplina de latigazos desde la edad de padrear hasta que sólo les sirva para mear.
-ayuno y penitencia en cuaresma, de miércoles de ceniza a domingo de ramos, con una sola colación al día consistente en agua de cocer nabos en la noche.
-la manifestación en Madrid con banderas preconstituicionales todos los meses, encabezadas por los curas y obispos de las parroquias, coreando eslóganes rimados defendiendo la unidad de España, la familia hombre+mujer, y al hombre, hombre y a la mujer, mujer.
-con motivo de las fiestas patronales, los católicos no participaran en el jolgorio y la cuchipanda paganas, sino que irán en procesión religiosa, y acudirán a la ermita del santo en peregrinación, descalzos, con cadenas, hábitos de penitentes y, con actitud devota, ofrecerán frutos y óbolos al santo.
-no leer otra página web que no sea trinitarios.net ni escuchar otra radio que no sea la COPE -o la SER como penitencia-, y apagarán la televisión cuando no haya programas religiosos.
Y para que sirva de ejemplo, y escarmiento, firmo y fecho aquí esta petición ciudadana que quedará abierta hasta alcanzar cinco millones de firmas para enviar al congreso, y que se legisle como norma de obligado cumplimiento.

Cuánta razón, qué visión preclara la de este hijo de nuestro Señor. Por supuesto firmo y corroboro y aplaudo ensimismada su propuesta, en particular, la de la disciplina a látigo.

Fecha: 31/01/2008 01:49.

Autor: Tautina

Mi querido redactor jefe Alimaña. Proclama usted todas estas disciplinas católicas despojándolas de cualquier ápice de expansión y divertimento, con muy poco espíritu publicista, como si ser un buen Católico practicante no casase con disfrutar.
Y si ciertamente, casar, casa poco porque sólo es de recibo el matrimonio entre hombre y mujer (o de la mujer consigo misma si atendemos a la raíz latina de la palabra) la verdad es que esta religión permite a sus fieles actos tan entretenidos como despotricar y exaltarse hasta la lapidación, flagelación o cremación vandálica del indigno, según los bien entendidos valores de la contrición y el puritanismo.
Puede una permitirse, por ejemplo, la total intransigencia hacia el pecador, y hasta es lícito señalarlo y hablar por lo bajini de él, por aquello de ponerlo en evidencia y que desista de su actitud. O sentirse una mujer de verdad cuando dejan a tu cargo la limpieza del templo, o ese coser la ropa y lavar los juguetes que se repartirán en navidad a los menos favorecidos.
¿Y el leve morbillo de saberse en pecado cuando el marido te pone mirando pa'Cuenca a horas poco castas? O ese vestirse de punta en blanco los domingos y lucir palmito ante las vecinas menos pudientes. Y no olvidemos las convivencias religiosas, o los viajes para ir a ver al Papa, o las cenas de fin de cuaresma, donde el vino de nuestro señor remoja los gaznates y el ánimo.
Así pues, yo firmo y reafirmo lo que haga falta, aunque siendo como soy tan pecadora como la María de Magdala, y siendo usted como es, tan sarcástico como el mismo Dios, flaco favor le hacemos ambos a esta entretenida comunidad católica proclamándonos en sus filas.
Y no le digo ya nada de todos estos que me preceden en la firma, tan socarrones, tan

burlones ellos... qué pandilla de herejes.
¡El señor os castigará a todos!

Autor: Wolffo

Hay un club de amigos del mus en mi pueblo y para ser socio, los muy cabrones, te piden que te guste el mus.
Curiosamente, y para escándalo de los demócratas, nadie protesta. Los hijos de puta de los amigos del mus deberían tolerar a los que, como yo, nos gusta jugar a siete y media o al continental que se juega, ¡herejía, herejía...! con dos barajas ¡francesas!, nada menos.
Venga, ahora una de los chicos de la Cope y otra de... yo qué sé, de las del cambio climático, que nos estamos cargando el planeta.
Alimaña, hijo, ya estás tardando.
Vamos, hombre, seguro que con tu verbo afilado, pertinaz y previsible, vuelves a cumplir, decepcionando una vez más a todo el que busque una idea que parezca eso, no ya una idea original, sino simplemente, una idea. Un fruto del pensamiento, y no otro insufrible lugar común.

Fecha: 01/02/2008 01:34.

Autor: Gatopardo

Wolffo: aplícate el cuento cuando escribas en tu boboblog para adolescentes tardíos con el oído estragado, y, entonces, tendrás autoridad moral para pedir a Alimaña que tenga ideas originales.

Gata, bonita.
Si la cosa es reírnos todos de los mismos chistes, me lo dices y ya está. No vengo, para no fastidiaros el party progre y santas pascuas. Pero si me avisas, y me conoces, te jodes con lo que escriba.
Si las gracietas infantiloides de Alimaña son graciosas, perdona, que no me he dado cuenta, del mismo modo que no me doy cuenta de cuándo estás delirando o de cuándo intentas (a veces lo intentas, ¿eh?) ser graciosa.
Me parece que el post en cuestión es una serie de lugares comunes encadenados con bastante poca gracia y así lo digo. No creo que para darse cuenta de eso sea necesaria, como dices tan pomposamente, "autoridad moral". Solo hace falta leer.
Por cierto, los certificados de autoridad moral, ¿los expendes tú o se pueden comprar en los estancos?
Y el de blog para adultos me interesaría también conseguirlo. Si me ayudas a encontrarlo yo te enchufo para que te saquen a ti de la categoría de blogs paranoicos y pelmazos y consigas, de vez en cuando, un artículo que merezca la pena ser leído.
Como ha sucedido cuando, menos de lo que deberías, has invitado a escribir aquí al autor de mi boboblog.

Por cierto, el oído que no funciona, viejales, es el tuyo. Envidia cochina es lo que me tienes.

MAGDA SALARICH ES MÁS LISTA QUE LAS PERSONAS

A los tres meses —tres— de recalar en la Fundación Ramón Areces, mi Magda

Salarich ha salido por patas. No ha podido soportar el crujir de dientes postizos, la roña moral, el hedor a clase media y Tervilor, y el cenizo que se cierne en forma de quiebra del estaribel, y ha salido de las cloacas de Isidoro Álvarez para meterse en los albañales de Botín.

En su lugar, yo que ella, antes de aceptar, me habría estudiado la osada política de créditos que ha llevado el Santander.

El espía que surgió del frío

...y desde que cambiaron la belleza de ser únicos por la fealdad homologada made in ECI con tal de no desentonar.

Fecha: 29/01/2008 12:53.

Autor: Wolffo

Hombre, la clase media no huele mal. Huele a clase media. Yo creo que la cosa es más tirando a pequeño burguesa o no... democristiana, ¿no? Eso sí que...

En fin. Yo conocí a Magda Salarich. Estaba en el cuadro de directivos medios de Citröen, en Marketing, en aquel entonces. Era, creo, Jefa de Publicidad. Y no me pareció especialmente brillante ni nada de eso. Como muchos directivos que he conocido, tenía una habilidad grimosa para cargarle el mochuelo a los demás y apuntarse tantos ajenos, pero nada más. Trabajando como proveedor externo de Citröen viví su ascensión y no me extrañó demasiado: gente vulgar en puestos muy por encima de su valía. Eso es el pan nuestro de cada día.
Mira, por ilustrar la cosa, al inquilino de la Moncloa.
Bien, lo que quiero decir es que si MS es más lista que Isi, entonces es que Isi está, como poco, rozando la idiocia. Me da igual, en serio, pero, ¡joder qué tropa...!

Fecha: 30/01/2008 01:55.

Autor: Ramón Mier

Conozco a muchas personas a los que se les podría calificar, por más de una cosa, como "clasemedieros". Ninguna de ellas apesta y ninguna es igual a la otra.

Decir lo contrario equivale a afirmar que "todos los orientales son iguales", "todos los musulmanes son iguales", "todas las mujeres son iguales"....

Los seres humanos solo somos iguales en una cosa: en que somos únicos.

En la "clase media" hay de todo, gordos, bajitos, altos y flaquitos. Lo mismo encuentras a una persona generosa y amable que a un soberano hijo de la chingada, así como a decenas de miles que acusan a otros de ser lo que ellos son: "clase media".

Fecha: 30/01/2008 09:04.

Autor: Gatopardo

Wolffo: has definido muy bien la quintaesencia del ejecutivo trepa.

Mi admirado Ramón Mier: los grandes almacenes como El Corte Inglés están pensados para la clase media homologada y homologlable, no para los individuos, no para los seres únicos, aunque pertenezcan a la clase media.
No creo que se pueda "acusar" a alguien de ser clase media o clase baja o clase alta por el hecho de serlo, sino por el hecho de renunciar a sus características individuales para no salirse de su rebaño, y para pensar como todo el mundo. Porque no disentir, no atreverse a ser diferente pudre el alma. Y la putrefacción apesta.
Y puedes discutírmelo todo lo que quieras siempre y cuando sigas teniendo un blog que se llame "Disiento...", porque eso significa que no formarás parte del rebaño.

Fecha: 31/01/2008 11:53.

Autor: Ramón Mier

Gatopardo,

Si el corte inglés está pensado para la clase media "homologada y homologable" la clase media es bastante más compleja de lo que podría pensarse.

¿A caso no has visto la tremenda variedad de cosas que venden en esas tiendas?

Es precisamente en la clase media donde prospera la diversidad cultural y material.

Donde NO EXISTE la clase media es donde encontrarás homogeneidad. La pobreza, la represión, el totalitarismo, y el militarismo genera homogeneidad. Es tipo de homogeneidad si que apesta.

Fecha: 01/02/2008 10:03.

Autor: Gatopardo

Ramón, creo que te repites y redundas, creyendo que si dices varias veces lo mismo caeré en la cuenta que ir a unos grandes almacenes y que pagar más caro, observar la aglomeración de mercancías en un espacio especialmente inhóspito y antiestético, y eternizarme haciendo cola, me hará confraternizar con los clasemedieros y que me va a fascinar contribuir a que estos siluros de los tenderos tengan usía para explotar y abusar de sus empleados, a sus proveedores y a sus clientes.
No es mi mi opción por mucho que me lo repitas..

Fecha: 01/02/2008 16:27.

DE ITALIA SE SABE, Y DE ESPAÑA SE IGNORA...

El ayuntamiento de Palermo tiene en nómina cincuenta empleados para contar las tapas de las alcantarillas de la ciudad- que los ladrones venden a 30 euros cada una- y veinte más para supervisar el trabajo de los que cuentan las alcantarillas. Además, hay cuatrocientos empleados en empresas municipales, contratados de forma indefinida, sin pasar concurso público, y los malintencionados creen que el hecho de que todos sean parientes de algún político no es una casualidad. El gobierno regional de Sicilia es la mayor empresa de la isla, tiene en nómina 100.000 asalariados con cargo a las arcas públicas, como, por ejemplo, Felice Crosta, director de la Agencia del Agua, que cobra 1.500 € diarios, más de 500.000 € al año.
En Taranto, Puglia, había cincuenta y siete empleados para limpiar cuatro baños públicos.
Silvio Berlusconi, *'il Cavaliere'*, firmó el decreto, después de perder las elecciones, en el que reconocía a los ex-primer ministros (o sea, a si mismo) el derecho a guardar en propiedad la escolta y la flota de coches oficiales que usara: treinta y un guardaespaldas y dieciséis automóviles de lujo de los ciento quince coches oficiales que tiene el palacio de la presidencia italiana.
En los tribunales de Nápoles, treinta y nueve de los sesenta y nueve funcionarios cuyo trabajo consiste en transportar las actas de los procesos de un despacho a otro, han obtenido certificados de invalidez que les reconoce el derecho a no cargar ni transportar papeles. En el pueblo de Arzano, cerca de Nápoles, veinte miembros de una familia obtuvieron certificados de invalidez total, mediante la falsificación de los documentos médicos pertinentes, que les reconocían el derecho a cobrar los subsidios máximos, con la complicidad de los funcionarios sobornados que hacían la vista gorda. En un pueblo de Siracusa, la escuela privada concertada *'Montessori'* habían falsificado todo, desde los alumnos y sus profesores hasta las notas, y estuvieron cobrando subvenciones oficiales durante años.
Hay robos de cables de cobre en los ferrocarriles, en el metro y hasta los de alta tensión, bobinas en obras y piezas en las tumbas de los cementerios, debido al espectacular aumento del precio de este metal (triplicado en tres años) por el *'boom'* económico de China e India. Sólo en la red ferroviaria este año han desaparecido 600 toneladas de cobre. En una línea del metro de Milán se circula a ojo porque los robos han hecho saltar el control automático del tráfico. En el aeropuerto de Fiumicino, en Roma, se fue la luz en parte de la terminal a causa de uno de estos robos.

Hace unos días, el presidente de la región Siciliana, ha sido condenado a cinco años de prisión por favorecer a la Cosa Nostra, y por revelación de secreto, al prevenir a los mafiosos sobre las investigaciones de la policía antimafia en curso. Y las actividades mafiosas, incluyen ciento seis personas asesinadas en Sicilia, de las cuales, ochenta y seis fueron víctimas de la *camorra*; y más de ciento cincuenta personas mediante lo que se llama "la lupara bianca", en la que hasta los cadáveres desaparecen, bien en ácido o en los cimientos de las miles de obras que la mafia financia.
Un equipo de televisión abordó a los diputados a la puerta del Parlamento, donde se legislan las leyes contra la mafia, el tráfico de drogas y la corrupción, para una supuesta encuesta sobre los presupuestos. En un cierto momento una maquilladora enjugaba el sudor en la frente y se lo retiraba con un *drug wipe*, un tampón que retiene muestras orgánicas del consumo de estupefacientes en las 36 horas anteriores. Resultado: el 32% de los diputados dio positivo en cannabis y cocaína.
De Italia se sabe porque existen unos ciudadanos, unos periodistas y algunos medios capaces de jugarse su vida contra el monopolio Berlusconi, la *maffia*, la *camorra*, la *Ndràngheta...*
De la corrupción en España se publica en la prensa cuando, al cabo de años de denuncias y ser del dominio público, algún juez olvida archivar en la papelera las denuncias, e instruye un sumario con gran ruido mediático y poca base jurídica, de modo que al cabo del tiempo, llegado el juicio, el Tribunal puede observar cariacontecido que los fallos de la Instrucción no permite condenar a casi nadie.
Sin embargo, todos sabemos que en nuestros Ayuntamientos, hay una misteriosa proliferación de empleados contratados que no tienen trabajo que desempeñar; ediles que decuplican sus propiedades y sus ingresos y llevan un tren de vida poco acorde con el sueldo; bufetes, gestorías y fundaciones impunes ante la agencia tributaria y el Código Penal.
No, nada se sabe de lo que ocurre en España, salvo las machaconas diatribas de los neurasténicos especialistas en indignarse, inspirados en los charlatanes de Hyde Park, que nos valupean en los bares, en los artículos de opinión, y en los blogs, sin ofrecer jamás sus propios datos, exactos, concretos, comprobados y comprobables, que no investigan ni conocen su realidad inmediata, porque los españoles llevamos siglos especializándonos en no significarnos, no comprometernos, no arriesgarnos con nuestro entorno social y en nuestro pueblo, porque escarmentamos en cabeza ajena: los pocos que han tenido el coraje de investigar, conocer y comprometerse con su realidad social, provocan el rencor de sus paisanos, un espeso manto de desconfianza, o un despectivo desinterés, porque, al fin y al cabo, son cuatro gatos.
Por eso, amo y admiro esa Italia convulsa y terrible, a pesar de toda su corrupción, sus crímenes y su miseria, porque aún tiene ciudadanos dignos, capaces de merecer ese hermoso apelativo.

Y después esos mismos ciudadanos, u otros, que viene a ser lo mismo, los siguen votando.
¿Vale la pena seguir jugándose la vida por ellos?
Pienso que no.
¿Es que crees que nadie sabe lo que ocurre, que hace falta publicarlo y probarlo?
La sociedad es tranquila y cobarde, que no ciega. Tiene bastante con lo puesto, prefiere no pensar y ceder, venderse por un plato de lentejas antes que pelear.

¿No has escuchado nunca?
-Yo no te pedí que me salvaras-

Y hablas de pruebas, de los blogs...
¿Qué propones a cambio?
¿Que todos investiguemos, demostremos con pruebas nuestras acusaciones, dejemos de trabajar y comer para conseguirlo?
¿Necesita el ciudadano medio, el que escribe a ratos sin apenas tiempo para leer, que siente rabia y necesita sacarla aunque sea escribiendo, aun más que su certidumbre para denunciar?

Te aseguro que por razones por mi desconocidas, la corrupción en Italia es gigantesca, mucho mayor que la nuestra. No lo digo yo sino las comisiones de Bruselas encargadas de ello. Supongo que un antropólogo versado en historia podría dar una explicación a ello.
CREO que la corrupción y la mafia se desarrollaron después del descalabro sufrido por el antiguo reino de Nápoles, cuando fue anexionado para Italia a sangre y fuego por los piamonteses de
Garibaldi. No hay cifras seguras, pero se cree que un tercio de su población desapareció o emigró a la Argentina y Uruguay. La región más rica y próspera de Italia se despobló y empobreció en pocos años.
¿Has estado en Italia?
Las pocas veces que hago negocios con ellos, y en caso de contrato, utilizo a un abogado aunque solo sea para comprar unas piezas de tela; y pago después de haberlas repasado y medido, todo lo contrario que en Francia, Alemania o... España la gran corrupta.
Y es que la gente, el talante del ciudadano son lo que vale, lo que nos hace ser más o menos corruptos, desear o no lo que posee el prójimo sin pegar golpe.
Pienso que todo empieza por uno mismo y con el ejemplo.

Un abrazo.

Autor: Rafael del Barco Carreras

LA TAPADERA... BUFETE PIQUÉ VIDAL

Rafael del Barco Carreras

Me repito. El tema es infinito. Leí la famosa novela sobre un Bufete de aspecto “legal” pero de y para la Mafia, precisamente en La Modelo. Quien me la regalaba sabía el porqué y cómo de mis desgracias. Pero ni a mis íntimos ni a los periodistas que compararon el Bufete Piqué Vidal con “LA TAPADERA” no les argumenté entonces que “no era aquello”. El Bufete no defendía ni blanqueaba para mafiosos, era en si mismo LA MAFIA, tal como surge del SISTEMA ESPAÑOL. Nuestra Tapadera y decenas de Tapaderas no trabajan para mafiosos, son los mafiosos. Ellos y SUS jueces, secretarios, inspectores de Hacienda, de Trabajo, policías, fiscales, y políticos.

Y en nuestras Tapaderas nunca surge un Tom Cruise. Es imposible, los del primer escalón no se enteran de nada, llenan papeles, becarios o recién licenciados, casi gratis, y gastando suela por los pasillos de los Palacios de Justicia, y los que “ascienden” son hijos, sobrinos, y hasta pillados y condenados que el Bufete contratará una vez descubiertos, o limpios jubilados, aunque “toda Barcelona” sepa de su perversión. Pero que duda cabe que de los hasta CIEN PROFESIONALES, y 35 bufetes asociados en IBERFORO, los hubo no solo sabedores (“Lo sabía toda Barcelona”), sino partícipes, incluso aportando sus “amistades” y su sabiduría. Y si el secretario, Antoni Piñol, por su libro “La toga manchada de Piqué Vidal”, nos demuestra que la mano derecha del jefe no sabía lo que hacía su izquierda, tuvo varias “manos derechas” participando de un proceso delictivo aunque solo fuera por “explotar” a su amistades oficiales. Ante el clamor y denuncias muchos profesionales se despidieron, alguno clamando por su honorabilidad, pero nadie de su entorno denunciaría, absolutamente nadie. Y al secretario "no profesional" que se le ocurrió denunciar en Fiscalía salió denunciado por "chantaje" y condenado a un año y medio.

Seguro que el joven abogado Javier Selva Prieto, del Bufete, que me acompañara y

“asesorara” en mi primera cita con el policía Justo Aguilera (ver www.lagrancorrupcion.com), actuaba de buena fe, pero también seguro que su padre el magistrado Julio Selva Ramos sabía de la especial filosofía del Bufete, con intensos rumores por el Palacio de Justicia sobre “maletines”.

Y el propio Piqué Vidal cayó porque el amoral por antonomasia, los hay otros, Pascual Estevill, debió soñar que parapetándose tras él se salvaría. Y a considerar lo de la Audiencia Nacional, la DEA Americana insistiendo, por el blanqueo de 2.000 kg. de cocaína. Nadie de Barcelona le señala, nadie se atreve. Sus archivos abarcan la flor y nata de la Ciudad, y aun con órdenes de Madrid solo se le detendrá unas horas.

Cuando leí que el Consulado Chino le nombraba su bufete de referencia dudé entre temer por los chinos o por el Bufete, en teoría y dado el oscurantismo de la comunidad china elegían un buen enderezador de ilegalidades, pero le aconsejaría a Piqué Vidal que se olvidara de su habitual y frailuno doble y triple juego. Los que conocí en prisión tenían menos paciencia que los mafiosos italianos o sudamericanos, a los que no les valían tonterías, si habían pagado un montón de millones en negro para librarse hasta de muertos, la libertad era obligada.

La Tapadera desaparece como Bufete, aquí no solo sigue vivo sino se anuncia, y el capo sale de prisión y se incorpora. Nadie como él. Es irrepetible dirá la Vanguardia cuando le detienen unas horas en el 2006.

[!publi_entrearticulos]

DIARIOS: ANDRÉ GIDE

"Los sentimientos auténticos son extremadamente raros, y la mayoría de los seres humanos se contentan con sentimientos convencionales, que se imaginan experimentar realmente, pero que adoptan sin pensar ni un instante en poner en tela de juicio su autenticidad. Creen experimentar el amor, el deseo, la repugnancia o los celos, y viven de acuerdo con el modelo estándar de humanidad que se nos ha presentado desde la infancia. Sensaciones e ideas forman paquetitos de asociaciones más o menos arbitrarias, a las que los nombres que les damos terminan por prestarles una apariencia de realidad. La admirable máxima de La Rochefoucauld: *"Hay personas que jamás se habrían enamorado si no hubieran oído nunca hablar de amor"*, es aplicable a muchos otros sentimientos; quizás a todos. Hace falta una mente extraordinariamente perspicaz para advertirlo. Y sería un profundo error creer que los seres menos cultos son los más espontáneos y sinceros. Lo normal, por el contrario, es que sean los menos capaces de crítica, lo que más a la merced están del modelo, los más dispuestos, por debilidad o por pereza, a adoptar sentimientos por convención, y a expresarlos con frases hechas, que les ahorran el esfuerzo de buscar otras mas precisas, para deslizarse en ellos adoptando la forma de este caparazón de alquiler."

***

"Los buenos sentimientos son las tres cuartas partes de las veces, sentimientos de confección. El verdadero artista, conscientemente, sólo viste a la medida."

***

"Hay una sinceridad profunda, mucho más difícil de obtener de si mismo y mucho más rara que la simple verdad. Algunos seres pasan por la vida sin experimentar jamás un sentimiento verdaderamente auténtico; ni saben lo que es una cosa así. Se imaginan

amar, odiar, padecer, y hasta su propia muerte es un plagio."

***

"Extraño artículo de Barrès en *"Les nouvelles Litteraires": "Saludo a los jóvenes escritores"* -dice-*"Amad el oro, el azur, y la llama"*.
Me horroriza esta manera de escribir, esta manera de pensar. Indignaría a la vez a Stendhal y a Flaubert. Apesta a tenor y a odalisca. No hay ahí nervio ni músculo; es algo flotante, vago e hinchado de viento como una bandera."

***

"Es con los buenos sentimientos con los que se hace mala literatura"

***

"Sólo me agrada el arte que, surgido de la inquietud, tiende a la serenidad"

***

"El amor por la verdad no es la necesidad de certezas, y es muy imprudente confundir una cosa con otra.
Se ama más la verdad cuanto más se crea en la imposibilidad de alcanzar el absoluto hacia el que, no obstante , esta verdad fragmentaria nos encamina"

***

"X habla de si mismo con mucha modestia, pero sin parar."

10 de Mayo de 1933, queman 20.000 libros en Opernplatz, cerca del Berlin Opera House.

Queman, entre otros. los libros de autores como Thomas Mann, Stefan Zweig, Erich Maria Remarque, Heinrich Mann, Albert Einstein, H.G. Wells, Jack London, Upton Sinclair, Helen Keller, Marcel Proust, Émile Zola, Sigmund Freud, y André Gide. Actualmente la mafia de los editores y los críticos vendidos, y los lectores alienados, no necesitan quemar a los autores como ellos: los silencian, los descatalogan, y los ignoran.

***"Where they have burned books, they will end in burning human beings"* - Heinrich Heine**

LA DISPUTA POR LA HEGEMONÍA CULTURAL IBEROAMERICANA

Un pequeño escándalo estalló durante 2003 en el mundo cultural mexicano. La casi desconocida pintora Mónica Roibal ganó un concurso de la Secretaría de Educación Pública (SEP) con una imagen de Emiliano Zapata, en la que el caudillo sureño era representado más como señorito andaluz que como el dirigente de una revolución agraria. La artista resultó ser esposa de Antonio Navalón, representante del poderoso grupo Prisa en México.
Al poco tiempo la comunidad artística se encontró con un nuevo motivo de indignación. Sin ninguna consideración sobre la calidad de su obra, el museo de San Ildefonso expuso generosamente la muestra *El corazón sobre el asfalto*, de la misma artista.
Intermediario comercial ligado a los más sonados escándalos de corrupción política y financiera en España, periodista, amigo e intermediario del juez Baltasar Garzón, cabildero, personaje de la política y las finanzas, Antonio Navalón fue conocido en España con el apodo de *El Conseguidor.*
La historia no es solamente un ejemplo más de cómo los poderosos consorcios mediáticos influyen en el mundo cultural, definiendo su agenda y promocionando intelectuales y artistas, sino, también, de una tendencia general en las relaciones entre esas empresas y la política, de la que la salida de Carmen Aristegui de W Radio es apenas el último incidente.
Durante la presidencia de Belisario Bentancourt en Colombia, el grupo Prisa contrató al hijo del mandatario de la misma manera en la que ahora empleó al cuñado de Felipe Calderón. El reclutamiento de altos cargos del gobierno español por parte del grupo empresarial está documentado en el libro de Ramón Tijeras *Lobbies: cómo funcionan los grupos de presión españoles.* (2)
Viajes, becas, premios artísticos o literarios, conferencias y publicaciones se han convertido en formidable instrumento de persuasión hacia las elites intelectuales latinoamericanas. A pesar de que varios países del área tienen poderosas industrias culturales y de entretenimiento (México, Brasil y Venezuela), la aspiración de ser un autor conocido en el conjunto del mundo hispanohablante depende, en mucho, de las redes editoriales, universidades y prensa españolas.
Papel clave en este proyecto de hegemonía cultural es el que desempeña el grupo Prisa, editor de El País. Periódicos, libros, revistas, música, canales de radio y televisión son terreno firme de esta empresa de comunicación. El consorcio posee más de 400

emisoras de radio en España. Tiene derechos o participaciones en seis editoras de libros, entre ellas la poderosa Santillana. Fuera de España es propietaria de diarios, estaciones de radio y revistas en Bolivia. Maneja 87 por ciento de Grupo Latino de Radio, que controla 300 emisoras radiales en Panamá, Chile, Colombia y Costa Rica. Posee, además, 50 por ciento del grupo Radiópolis en México. En América Latina cuenta con jugosos contratos de distribución de libros y todo tipo de material escolar a cargo del erario de varios estados iberoamericanos. Ha disfrutado de numerosos créditos blandos y ganado licitaciones de la partida de Ayuda al Desarrollo del Ministerio de Economía y de la Agencia Española de Desarrollo.

El universo del libro en español está compuesto por tres polos de producción de dimensiones diferentes, América Latina es uno. Ese universo lo constituyen más de 416 millones de seres humanos que consumen textos en esa lengua, localizados en España (41 millones 100 mil habitantes), en los 18 países hispanohablantes de América Latina (344 millones 532 mil personas) y en Estados Unidos (31 millones de hispanohablantes). Un estudio realizado entre 2002 y 2003 en los países del área lingüística (España y Latinoamérica) arroja un total de 107 mil 777 títulos editados en lengua española, de los cuales 59 mil 685 fueron publicados en la península ibérica y 48 mil 092 en los países latinoamericanos, preponderantemente en Argentina (27 por ciento) México (23 por ciento) y Colombia (18 por ciento). España ostenta fuerte actividad exportadora hacia América Latina, tanto por exportación del libro impreso como por la implantación de filiales de editoras españolas en las naciones latinoamericanas (602 millones de euros en 2001). En sentido inverso la exportación es muy débil (6.8 millones de dólares en 2003). Una relación de casi 100 a uno.
Columna vertebral de esta hegemonía semántica fue el recientemente fallecido Jesús Polanco, forjador del grupo Prisa. Parte de su imperio mediático fue construida en América Latina. Durante años fue el principal editor de prensa en lengua española y el único que actuó, simultáneamente, en los mercados de la información general, deportiva y económica. En España dominó hasta tal punto la radio privada, que en varias demarcaciones tenía más emisoras que todos sus competidores juntos.
Logró en tiempos del PSOE el monopolio de facto de la televisión de paga. Fue uno de los principales productores de cine y amo del próspero negocio de libros de texto tanto en España como en América Latina. Hizo los libros de historia para Augusto Pinochet. Sus editoriales de creación abarcan todos los segmentos de la actividad literaria y el pensamiento. Directa o indirectamente controló la actividad discográfica. Fue dueño de cadenas de libros, agencias de publicidad, hoteles, empresas de exportación.
Polanco fue un poder fáctico. Su poliédrica hegemonía sobre las industrias culturales le proporcionó formidable influencia. Fue la versión más cercana al ciudadano Kane que ha tenido el mundo español (Véase: Manuel García Viñó: El País: la cultura como negocio). Una de las claves de su éxito fue que, a pesar de provenir del entorno del franquismo, se quedó con la patente del progresismo. Junto a Felipe González caminó de la mano en el mundo de la política, los negocios y la cultura. Polanco –dice Pedro J. Ramírez, director de El Mundo– no tiene bancos, pero sí tiene banqueros. Sus relaciones con la oligarquía financiera fueron estrechas.
Sus mejores negocios en Latinoamérica fueron hechos con países regidos por dictaduras militares. Instalado en la cumbre del poder mediático, se convirtió en uno de los más grandes mediadores entre el mundo cultural latinoamericano y el español.
Como muestra la no renovación del contrato de Carmen Aristegui en W Radio , a la hora de definir prioridades informativas, para el consorcio empresarial cuestiones como la audiencia tienen una importancia secundaria. Después de todo, sus grandes negocios están en otra parte.

Luis Hernández Navarro.

Más información:

Polanco (PRISA) y Carlos Slim (TELMEX)
Es sabido que la multinacional PRISA de Jesús de Polanco esta llevando a cabo una política de fuerte implantación política-mediática-empresarial-cultural en Iberoamérica. Llamó mucho la atención que Fox, el presidente de México, estuviese presente en la firma de un acuerdo comercial-mediático entre el hombre más rico de Iberoamérica, el mejicano Carlos Slim y propietario del complejo multimediático (Televisa, etc.) y telefónico Telmex (con el que se hizo gracias a la privatización llevaba a cabo por el ex presidente Salinas de Gortari, investigado por muy graves casos de corrupción) y Polanco propietario de PRISA.
Felipe González, ex presidente de España, acude regularmente a México, invitado por Slim en alguna de sus grandes posesiones y es el gran embajador de los negocios de Jesús de Polanco Slim también ha hecho negocios en Chile presentado por el socio de González, por Fernando Flores, ex ministro con Allende y que se ha convertido desde Estados Unidos, donde ha venido residiendo, en un gurú del management político-mediático-empresarial-filosófico.
El Grupo Prisa participa además con un 24,3% en Iberbanda, un operador de servicios globales de comunicación en banda ancha, en el que también están presentes Informática El Corte Inglés, Omega Capital, CajaDuero, Ibercaja, Caja San Fernando, Caja de Ahorros El Monte y Diario de Burgos. Iberbanda proporciona nuevas formas de acceso a Internet, transmisión de datos, telefonía y servicios de valor añadido en red, a través de radioenlaces y redes de fibra óptica. Y en esta empresa también participa el multimillonario mexicano Carlos Slim, asesorado habitualmente por Felipe González, que aparece a través de la empresa Sercotel, integrada en el Grupo Telmex (Teléfonos de México) que dirige Slim.
Aquí no conviene olvidar el siguiente maridaje o grupo de presión: Carlos Salinas de Gortari-Carlos Slim-Felipe González-Jesús Polanco-Emilio Azcáraga Jean, Antonio Navalón.
Sí, el comisionista Antonio Navalón, procesado por el caso Banesto en España como conseguidor de Mario Conde, es hoy el máximo responsable de Prisa en México. Es interesante recordar que César Alierta de la multinacional Telefónica se ha quejado muchas veces de que su principal competidor en América es Felipe González, que trabaja para Telmex.
Pues bien, Polanco, a través de González , Carlos Slim, así como Juan Azcárraga Jean, hijo del mítico Tigre Azcárraga y heredero del imperio de Televisa, el cuasi monopolio de la televisión en México forman la plataforma para entrar en Estados Unidos, concretada en un objetivo muy goloso: Univisión. Univisión es la gran cadena de televisión norteamericana (y de radio) en lengua castellana que llega a 40 millones de hispanos. Además el voto hispano es decisivo en las elecciones norteamericanas. Pues bien, Azcárraga Jean y Polanco junto a Carlos Slim, le disputan a Venevisión (grupo Cisneros) el control de Venevisión.

La distancia más corta entre dos puntos es la que va en línea recta del consejo de ministros al consejo de administración de los oligopolios. Y en esto da igual que te

incluyas en el PP que que lo hagas en el PSOE.

Fecha: [22/01/2008 17:49].

Autor: Gatopardo

Ramón: el artículo menciona de y como un síntoma el caso de Carmen Aristegui.
El tema de fondo alude al negocio de la "cultura" a manos de esta panda de estos negociantes incultos, capaces de catapultar al estrellato a medianías utilizando los medios de comunicación que dominan. No es, ni mucho menos, la capacidad negociadora de estos piratas ni nuestra suspicacia lo que está en causa, sino la prostitución sin condiciones de los profesionales que contratan.
Y ya sabes que no soy acérrima de Aristegui ni lo voy a ser, aunque siempre le agradeceré que fuera de las primeras que se atrevió a denunciar a Maciel.
Emilio: tú lo has dicho. Todos los partidos políticos, en el Parlamento o en el Pleno del Ayuntamiento secunda los intereses de los oligopolios, y prescinde de los que afectan a los ciudadanos. Por algo pastamos y pacemos en una oclocracia.
Saludos

GUSTAVO ADOLFO BÉCQUER Y VALERIANO BÉCQUER : LOS BORBONES EN PELOTA

Gustavo Adolfo Bécquer y su hermano Valeriano son los autores del libro titulado *"Los Borbones en pelota"*, escrito y dibujado en 1868-1869. Se trata de un libro de ilustraciones porno-satíricas firmado con el seudónimo "Sem", con textos de Gustavo Adolfo Bécquer y dibujos de su hermano Valeriano Bécquer sobre los últimos tiempos del reinado de Isabel II, tatarabuela del actual monarca.

Si hubiera existido entonces todos esos jueces y legisladores de ahora —que se vuelven locos por defender a la corona, mientras no corra riesgos su integridad— a los hermanos Bécquer los habrían llevado a la ruina civil y penal, y no habría quedado ni un rincón donde publicar aquello tan bonito que dice: *"Volverán las oscuras golondrinas"...*

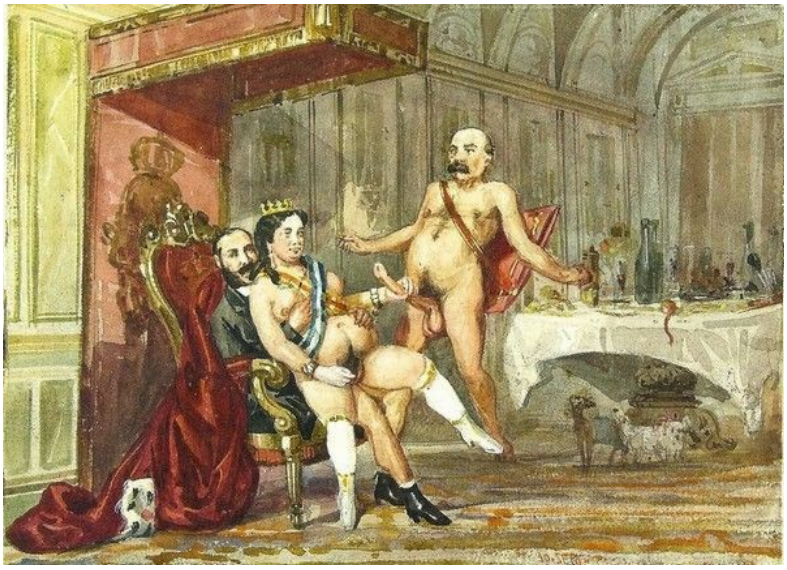
Ahora, por izar una bandera republicana (que aún es la del último gobierno legítimo de España), al tontolaba que se le ocurrió dejarse llevar por la emoción, lo detuvo la policía , y la fiscalía pide para él una condena de un año de cárcel, más el pago de una multa de 4.000 euros y la inhabilitación especial para sufragio pasivo durante un año por haber incurrido en los delitos de *«injurias a España»* (Art. 543) y *«desórdenes públicos»* (Art. 557.1, del Código Penal). Al dibujante Guillermo Torres y al guionista Manel Fontdevila de *El Jueves*, por dibujar humorísticamente a una pareja que habitualmente no hace ni puñetera gracia, los han condenado a pagar 3.000 € a cada uno como *"responsables de un delito de injurias al Príncipe"*, regulado en el artículo 491.1 del Código Penal. Y a los independentistas catalanes que quemaron en un acto simbólico la foto del rey, los han condenado a pagar a cada uno 2.700 euros como autores de un delito de injurias a la Corona.

Esta monarquía, defendida por este Código Penal y estos legisladores, no desentonará nada en el reino alauí y en el saudita; pero da la nota en cualquier país democrático.

Gatopardo

"Real taller de construcción de príncipes: se admiten operarios"

"El rey consorte, primer pajillero de la corte"
(Francisco de Asís, casado con la reina Isabel)



**"Sentada está en su poltrona
con chulo, cetro y corona."**

**"Por probar de todo
de tirarme a un pollino encontré modo"**

**"Carlos Marfori de pie atendido por Isabel II, quien a su vez recibe las gracias de su confesor.
Y sor Patrocinio que está siendo masturbada por Luis González Bravo, primer ministro".**

Es increible como todo se repite, bueno, todo menos la cordura y el ejercicio de la libertad, al parecer, más limpio, posible y real entonces que hoy con toda nuestra "manarquía parlamentaria y democrática".
No conocía esa obra que nos presentas hoy, pero tienes toda la razón, de haberse aplicado las medidas de censura y persecución que hoy -amparadas en la ley democrática- se aplican, se hubieran perdido dos genios de las letras. Y luego me llaman exagerada cuando hablo del florecimiento actual de Torquemada y sus técnicas entre nosotros...
Un abrazo entrañable.

Buenas, si se escribió y dibujó entre 1868 y 1869, ¿cuándo fue publicado? sería interesante conocer esa información que creo no aportáis, y establecer una comparación sabiendo entonces si cuando fue publicado ya estaba el Gobierno Provisional, que no olvidemos que había expulsado a los Borbones de la Monarquía. Un saludo y gracias.

Autor: Gatopardo

Este álbum formaba parte de la obra inédita que dejaron los hermanos Bécquer al morir, (Valeriano en setiembre y Gustavo Adolfo en diciembre)en 1970. Muchas de esas ilustraciones fueron numerosas veces publicadas en vida de los autores en varias revistas y panfletos republicanos y revolucionarios como "El Contemporáneo", "El Museo Universal", "El Bazar" , "Gil Blas", "La Píldora", etc. El pseudónimo SEM y otros que utilizaban de los hermanos Bécquer, los desveló la prensa de la época inmediatamente después de su muerte.
Como ya sabrá, en vida de Gustavo Adolfo Bécquer sólo publicó en revistas y periódicos, y fue después de su muerte, cuando algunos amigos hicieron de mecenas literarios y seleccionaron y editaron sus "Obras completas" (bastante incompletas) por pura caridad, y fueron los primeros sorprendidos al comprobar su éxito y tenerlas que reeditar continuamente.
Este álbum al que me refiero constaba de 131 acuarelas satíricas, de las que se han salvado sólo las 89 que se han editado en este libro, publicado en 1991, al que remito, aunque hay ediciones posteriores.
¡Salud y Acción!

Autor: Anónimo

Buenas, ante todo gracias por la extensa y suficiente información. Habiendo sido publicado en 1970, no creo que sea coherente aportar que "la libertad de expresión" durante el reinado de Isabel II fuese mayor que la actualmente establecida, ese comentario se sale totalmente de contexto histórico. Saludos.

Fecha: 20/01/2008 13:41.

Autor: Gatopardo a Anónimo

Querido mío: perdóneme si mis muchos años me hacen olvidadiza y cometo fallos, como el de datar en 1970 en vez de 1870 la muerte de los hermanos Bécquer; pero creo recordar que ya he dicho que esos y otros dibujos y artículos satíricos salieron en varias publicaciones en tiempos de doña Isabel II; y también creo recordar que haber dicho que no andaban entonces los jueces y el ministerio fiscal poniendo multas a los humoristas; pero no es eso lo peor, es que encima, no recuerdo haber hablado de mayor libertad de expresión en la época de Isabel II con respecto a la nuestra, sino que creía haber dejado claro que la monarquía borbónica, sea quien sea que ostente la corona, sea la época que sea, siempre trata de mantenerse con leyes de excepción; pero quizás nunca como ahora, sus vasallos se hayan empeñado en ofrecerles la impunidad para sus delitos y sus vicios, mientras persiguen a quienes los critican.
¿O quizás existe alguna monarquía de algún país europeo en el que al titular se le exima de cumplir la ley, como ocurre en España?
PD
Y por cierto: reitero que se publicó como libro en 1991 (no en 1970) y sueltos en varias publicaciones críticas y satíricas en vida de los hermanos Bécquer (SEM).
Saludos cordiales

Autor: Anónimo

Querida/o mío,

La represión durante el Reinado de Isabel II (especialmente entre 1863-1868) era especialmente dura, por lo que no niego que esos documentos fuesen publicados durante su reinado, lo que sí es cierto es que serían censurados y apartados de la lectura y observación de cualquiera. Aportar sibilinamente que actualmente la represión por difamar (cuando es cierto no es que se difame) contra la familia real es mayor que durante el S.XIX es absurdo, hechos históricos como el de la noche de San Daniel lo atestiguan claramente. Por sí usted olvida lo que ocurrió en la llamada Noche de San Daniel, se lo recuerdo; la querídisima Isabel II vendió el patrimonio cultural del país y se quedó con un 20% de los beneficios, alegando la mentira de que vendió sus propios bienes para reducir la inflación de la deuda económica de España, Don Emilio Castelar (catedrático y por otras cosas conocido) publicó un artículo diciendo "la verdad", y no difamando, sin embargo recibió la represión en sus narices, le fue retirada su catedra y fueron censurados dichos artículos, sus estudiantes se manifestaron (unos 1000) y la

Guardia Civil asesinó a una quincena aproximadamente y dejó heridos a unos 200. Si esto no refleja la censura y represión durante el Reinado de Isabel II por difamaciones contra ella (que de difamaciones poco tenían, igual que lo del famoso Jueves) pues válgame Dios! (aunque sea ateo). Creo que tal como enfoca usted este debate, no puede sostener demasiado bien sus argumentos, espero que se deba a simples carencias expresivas. Un cordial saludo señorita/señorito gatopardo.

Querido y tenaz anónimo: si usted se empeña en decir lo que yo no tengo noción de haber dicho ni escrito, naturalmente llevará usted razón, que para algo soy soltera y casadera, y recibí una esmerada educación para no llevar la contraria a los caballeros que me muestran su asiduo interés, y en otras labores y primores.
Y, por cierto, si he dejado dicho en este artículo que los escritos satíricos contra Isabel II formaban parte de las amenas lecturas recomendadas por Sor Patrocinio y el Padre Claret en la Corte es que me he expresado mal. Ya ve qué tonta estoy.
Suya afectísima

Fecha: 20/01/2008 16:51.

Autor: Anónimo

Bien caballero, usted tiene vocación de torero, porque torea muy bien saliéndose por la tangente y los cerros de Úbeda, o por donde sea... no por otra cosa, ¡vamos!

Hizo usted mención, apoyándose en una información histórica (por una vez al menos) a la desproporcionada censura en nuestros tiempos ante una censura del reinado de Isabel II, que según puede leerse entre lineas de su publicación, se queda en pañales.

Usted ha querido tirar la piedra y ahora que alguien rebate su comentario, esconde la mano, porque probablemente no tenga cómo sostenerlo de otra forma que no sea "saliéndose por la tangente" o "toreando".

"Si hubiera existido entonces todos esos jueces y legisladores de ahora -que se vuelven locos por defender a la corona, mientras no corra riesgos su integridad- a los hermanos Bécquer los habrían llevado a la ruina civil y penal, y no habría quedado ni un rincón donde publicar aquello tan bonito que dice: "Volverán las oscuras golondrinas"..."

Usted aporta que dicho texto fue publicado durante tiempos de reinado de Isabel II, y comenta que los legisladores de hoy buscan leyes que defiendan a sangre y fuego la Corona, y si estos textos hubieran sido publicados en estos tiempos actuales, la carrera de los Bécquer habría quedado arruinada. Desde que empezamos nuestra conversación, le llevo cuestionando cómo puede sostener usted ese comentario, lo único que hace en respuesta es salirse por la tangente, demostrando por tanto que usted es amigo de tirar la piedra y esconder la mano, como consecuencia de que no se documenta nada bien.

Un anónima admiradora suya le envía un cordial saludo.

Autor: Gatopardo a su congénere anónima

Me gustaría que escogiera un centenar de títulos entre las publicaciones críticas y satíricas republicanas, revolucionarias, carlistas, liberales, etc. del siglo XIX, en la hemeroteca de la Biblioteca Nacional. Y mire a ver si encuentra algo comparable en publicaciones actuales.
Sra. mía: los medios represivos de los que disponía Isabel II era el estacazo y tente tieso, los fusiles, mosquetones, y tercerolas de avancarga y retrocarga, de chispa y percusión, y las informaciones sobre los insurrectos y sospechosos viajaban en correos a caballo, la registraban los escribientes con pluma y manguitos...
Por eso me perdonará que me haya negado desde el principio a comparar lo que no tiene comparación, y que me haya remitido exacta y puntualmente a las leyes de excepción y todo el aparato legislativo y represivo y todos los medios de los servicios de inteligencia con los que se "protege" la monarquía borbónica. Cosa que ni hartos de vino aguantarían los suecos , los daneses, los holandeses, los ingleses, etc.
Quedo a sus pies

Nunca negué la publicación de todo tipo de documentos, pero como usted sabrá, el derecho a la libre publicación y asociación no existía, hoy sí, aunque se usen artimañas legislativas para poder acusar de injurias a la Corona a un editor de una revista humorística. Con esto quiero decir, que no podía evitarse que los documentos fueran publicados, pero estaba fuera de la legalidad la libre publicación, por lo que las consecuencias eran represión y persecución.

Saludos caballero.

BALTASAR DE ALCÁZAR: TRES COSAS

Tres cosas me tienen preso
de amores el corazón,
la bella Inés, el jamón,
y berenjenas con queso.

Esta Inés, amantes, es
quien tuvo en mí tal poder,
que me hizo aborrecer
todo lo que no era Inés.
Trájome un año sin seso,
hasta que en una ocasión
me dio a merendar jamón
y berenjenas con queso.

Fue de Inés la primer palma;
pero ya juzgarse ha mal
entre todos ellos cuál
tiene más parte en mi alma.
En gusto, medida y peso
no le hallo distinción:
ya quiero Inés, ya jamón,
ya berenjenas con queso.

Alega Inés su bondad,
el jamón que es de Aracena,
el queso y la berenjena
la española antigüidad.
Y está tan en fiel el peso
que, juzgado sin pasión,
todo es uno, Inés, jamón,
y berenjenas con queso.

A lo menos este trato
destos mis nuevos amores
hará que Inés sus favores
nos los venda más barato.
Pues tendrá por contrapeso
si no hiciere razón,
una lonja de jamón
y berenjenas con queso.

SERIE DE TELEVISIÓN DE INSPIRACIÓN BUDISTA CON UN HÉROE QUE TRATA DE VIAJAR CON EL AVE

En su afán por elevar la espiritualidad de nuestros coetáneos, el Ministerio de Fomento financiará el guión de una serie, titulada Ave Fu, que relata las aventuras de un monje budista llamado Tocayo Ande-Vas (intepretado a lo largo de la vida del protagonista por los actores Haley Joel Osment -como niño-, Carlos García -como joven-, y Alfredo Landa como anciano). Tocayo Ande-Vas trata de conseguir un billete del AVE, a través de la página web de RENFE, para lo que ha de recorrer el Noble Camino Polifacético o Noble Sendero de Ocho Facetas (*Ārya 'ṣṭāṅga mārgaḥ* en sánscrito),
Lo intenta usando como únicas armas su destreza informática, con Internet Explorer y Mozilla Firefox, la fuerza interior de su filosofía y los elementos del Noble Camino Polifacético, que se subdivide en tres categorías: Sabiduría, Conducta Ética y Meditación; para rehabilitar y desacondicionar la mente. En todos los elementos del Noble Camino, la palabra "Correcta" o "Recta" es una traducción de la palabra *"sammā"*; quesignifica "plenitud", "coherencia", "perfección" o "ideal". El Noble Camino conduce a :

1 La sabiduría (*paññā*
2 El entendimiento correcto (*paññā*)
3 El pensamiento correcto (*saṅkappa*)

- Conducta Ética *(Sīla)*

1. Hablar Correcto *(vāc · vācā)*
2. Actuar Correcto *(karmānta · kammanta)*
3. Vivir Correcto *(ājīva · ājīva)*

- Meditación *(Samādhi)*

1. Intencionalidad Correcta *(vyāyāma · vāyāma)*
2. Contemplación Correcta *(smṛti · sati)*
3. Meditación Correcta *(samādhi · samādhi)*

Su propósito es encontrar el formulario de compra, rellenarlo y comprar un billete del AVE, ida y vuelta, y, al no conseguirlo, llama en su ayuda a los miembros del Colegio Profesional de Ingenieros de Informática de Castilla y León, que se encuentrann con la imposibilidad' de sacar un billete del AVE a través de internet, después de intentarlo en más de cincuenta ocasiones con un amago de éxito; pero sólo para un trayecto de ida.
Los ingenieros de Informática de Castilla y León dan un comunicado a la prensa en solidaridad con nuestro protagonista, donde dicen:
"Este colegio profesional afirma que el Servicio de Atención al Cliente de RENFE les ha confirmado que están teniendo 'multitud de incidencias y problemas con su sistema informático de venta de billetes a través de la web'.
Por ello, llaman la atención sobre 'la continua falta de garantías para el ciudadano en la utilización de los servicios informáticos que se prestan como servicio público'.
"Una plataforma puesta a disposición de los ciudadanos y que contribuye a avanzar en la llamada Sociedad de la Información debe ofrecer garantías suficientes para que el ciudadano pueda disfrutar de la misma durante 24 horas al día, 7 días a la semana y 365 días al año, de manera continuada y no aleatoriamente", dicen los informáticos.
"Esto es aún más exigible a una empresa como Renfe que depende del Ministerio de Fomento de España, y máxime cuando el Gobierno se niega a regular la profesión de los ingenieros en informática, permitiendo y fomentando de esta manera el intrusismo profesional que sufre el sector".
Y, aunque en toda la serie Tocayo AndeVas no llega a conseguir billete a través de Internet, en su periplo conoce a mucha gente, y sus historias y peripecias dejan el mensaje a la juventud de que lo importante no es el éxito, sino la perfección interior

sublime en el camino sembrado de adversidades que causa el Ministerio de Fomento de España.
La serie AVE Fu se abre en cada capítulo con la frase inspirada en Lewis Carroll : *"Para quien no va a ningún sitio, cualquier camino es bueno"*

Exacto. No es el caso de extenderme aquí, pero que se sepa que sacar un billete en el Ave a Cordoba me costó cuatro viajes a Renfe en Atocha. Cuatro viajes. O que tiren los ordeñadores o que espabilen a los informáticos porque eso es un atraso. En diligencia ya habría llegado.

Autor: Alimaña (redactor-jefe)

Dama Hannah: cuando note que los tiempos son áridos es el momento de revisar la dieta alimenticia, y cambiarla.
Un respetuoso saludo. Quedo a sus pies. (Que mi señora es de armas tomar)

Carlos Martínez: ¿Cuatro viajes le costó? Dese con un canto en los dientes que yo, al cabo de diez días y doce viajes, al final he tenido que llevarme a la familia a Valladolid en el camión. Y como tengo la licencia de transporte porcino, me han puesto una multa por transportar viajeros sin licencia.

NO SE HA AUDITADO A LA SGAE EN LOS ÚLTIMOS DIEZ AÑOS POR UN VACÍO LEGAL

El Constitucional dijo que era competencia de las autonomías en 1997; pero la ley no se modificó. Ninguna institución pública ha supervisado en los últimos diez años los balances de la entidad
11-01-2008 - Javier Romera/Alicia Castellote - El Economista .-

La última vez que el Ministerio de Cultura auditó las cuentas de la SGAE, tal y como establece la Ley de Propiedad Intelectual, fue hace diez años, bajo el Gobierno del Partido Popular. Desde entonces, ninguna institución pública se ha encargado de supervisar si los resultados económicos que presenta la entidad que gestiona los derechos de los autores se ajustan o no a la realidad.
Pese a las reclamaciones de todo el arco parlamentario, el Gobierno se escuda en un vacío legal para mantenerse al margen y no hace nada para subsanarlo. La Ley de Propiedad Intelectual, aprobada en 1996, establecía que *"el Ministerio de Cultura podrá exigir a las entidades de gestión cualquier tipo de información, ordenar inspecciones y*

auditorías y designar un representante que asista con voz pero sin voto a sus asambleas generales, consejos de administración u órganos análogos”.
El problema surgió cuando dos autonomías -Cataluña y el País Vasco- presentaron un recurso ante el Constitucional contra dicho artículo, el 157 de la Ley, para exigir esa potestad. El Tribunal les dio la razón pero, desde entonces y pese a que la ley se ha modificado en sucesivas ocasiones, el Gobierno no ha modificado el artículo. El Ministerio de Cultura insiste en que *“es algo que ya no nos corresponde a nosotros”*, pero reconoce también que se tenía que haber modificado la norma para poder actuar. *“El Constitucional no ha cuestionado la capacidad de auditar las cuentas de la SGAE, sino tan sólo quién lo debe hacer”*, asegura una portavoz. Hasta ahora, lo único que se ha hecho es introducir una frase aclaratoria en el preámbulo de la última modificación de la Ley, realizada en julio de 2006. *“Existen aspectos propios de la realidad española que deberán ser abordados en el futuro inmediato, como la clara delimitación de las competencias entre el Estado y las Comunidades Autónomas”*, se asegura.
Y mientras tanto, la SGAE y el resto de entidades van por libre. Lo curioso es que en la votación del canon digital en las Cortes, el pasado diciembre, ningún partido vasco ni catalán reclamó las competencias. Y no sólo eso. Algunos, como CiU, exigieron incluso al Gobierno que un organismo independiente, público o privado, auditara las cuentas de la sociedad de Teddy Bautista. El PP ha ido incluso más allá y ha propuesto la creación de una Agencia Estatal de Propiedad Intelectual para controlar sus cuentas.
La SGAE se defiende y dice que sus balances financieros pasan la supervisión de firmas auditoras, pero éstas sólo analizan las cuentas y no entran en otras cuestiones como, por ejemplo, cómo se reparten los derechos entre los autores o si las cantidades que se cobran son o no abusivas. No extraña así que, tal y como ocurrió ayer, la entidad de gestión considerara “acertado” que un juez condene a una empresa de autobuses de Aragón por no pagarle un canon por la música. **(***)**
Vía: http://www.internautas.org/

*** **"La Audiencia de Zaragoza ha condenado a tres compañías de autocares -Samar, Muro y Hediaz- por disponer de reproductores de cedés y deuvedés en sus vehículos, básicamente dedicados al transporte escolar, sin haber pagado previamente las cuotas que cobra la Sociedad General de Autores (SGAE) en concepto de derechos de autor.
Las tres empresas deberán indemnizar a la SGAE con 6.429,8 euros -la cifra incluye el IVA de las cuotas que reclama la gestora de derechos-, así como a hacerse cargo de las costas judiciales de los recursos que presentaron contra sus respectivas condenas por el juzgado de lo Mercantil de Zaragoza.
Una de las compañías alegó que sus autobuses únicamente efectúan servicios de transporte escolar, trayectos que, por sus características, no exigen "la reproducción de medio alguno audiovisual". Sin embargo, la Audiencia rechaza este argumento señalando que, con independencia de que los vehículos sean habitualmente ocupados por niños, *"tal posible característica no parece descartar que no se utilicen aquellos instrumentos de reproducción musical o cinematográfica en esos viajes, o que* (los autocares) *no sean utilizados en otros recorridos diferentes que también sin duda se efectuarán, o en definitiva porque la mera existencia de los aparatos mismos obliga a presumir su utilización".*
(...) La Sociedad General de Autores de España (SGAE) dice que *"compartir un trayecto o un viaje con el talento y la inspiración de un creador, sí tiene un precio"* en alusión a los derechos de los autores a quienes la SGAE representa.
*Fuente: El Periódico de Aragón***

Imagen: ¡Que se me caiga la chorra a cachos y se la coman los mengues si les doy mi voto a los que dijeron que sí al canon digital! (No es necesario pagarle a la SGAE para reproducirla)

Lo de la SGAE es vergonzoso. En Globomedia, la del tito Emilio, sí, te obligaban a asociarte a la SGAE para trabajar para ellos.
Ahora, cada vez que me liquidan (es una forma muy gráfica de decirlo, porque su porcentaje es abusivo) me dan ganas de cometer un delito.
Todo lo que huela a SGAE me da náuseas. ¿Quiénes se han creído que son? Y, sobre todo, ¿quienes son y cuál es su verdadero poder?
¡¡Auditoría de infarto ya!!

Fecha: 15/01/2008 00:54.

Autor: Gatopardo

Queridos:cuando el profeta dijo que "la propiedad privada es un robo", no pasó nada; pero pedir que se audite y se controle a esta sociedad de gestión puede ser peligrosísimo, porque por menos del canto de un folio te ponen una denuncia y los jueces suelen defender su honor con sentencias ejemplarizantes.
Y todo, sin investigar las razonables dudas sobre la honorabilidad de sus métodos, gracias a la legislación y los votos de los llamados partidos progresistas.
Saludos

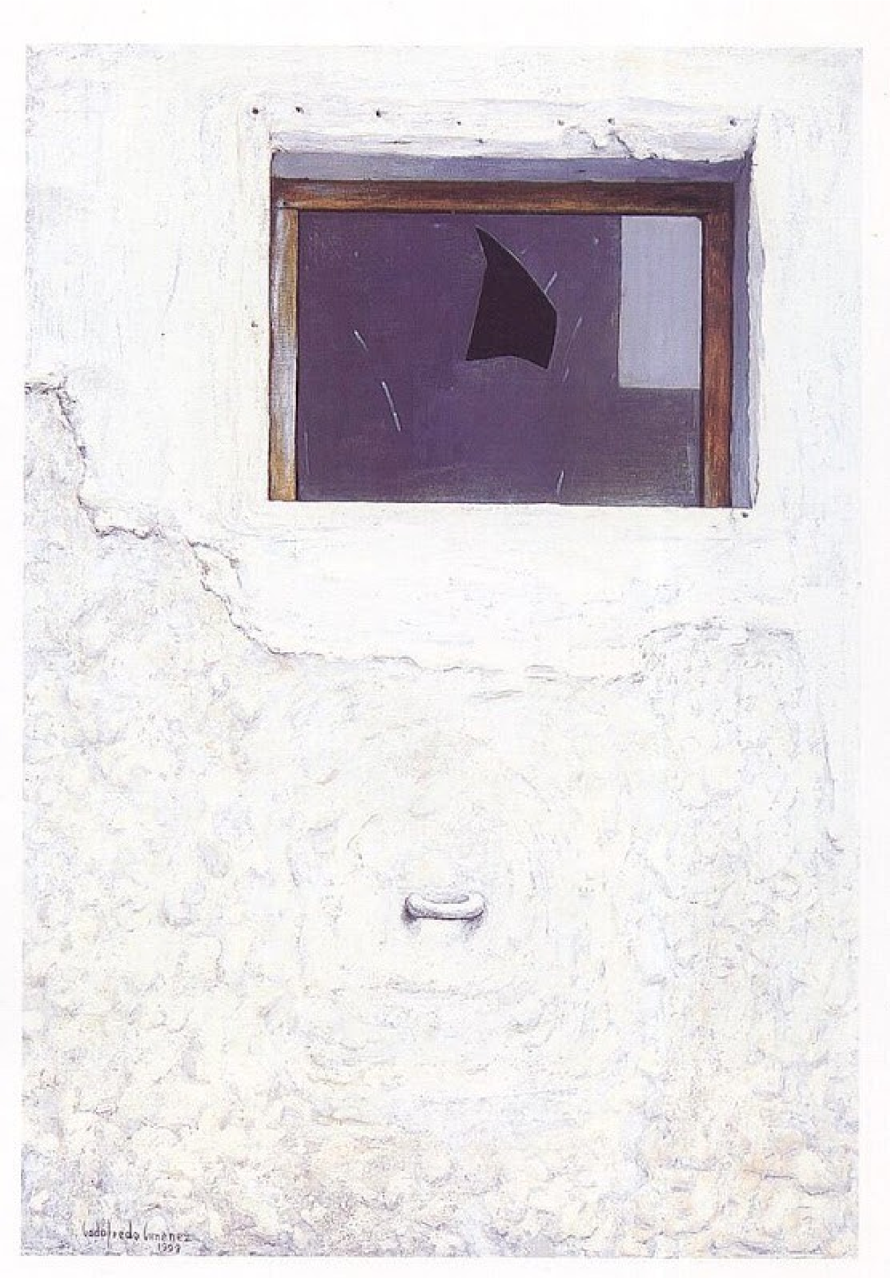
FRASES MAGISTRALES DEL PROFESORADO UNIVERSITARIO ESPAÑOL



Cuando tanto se habla de fracaso escolar, del puré de ignorancia, indiferencia y astenia mental de nuestros educandos, por no hablar de la memez casi enciclopédica de los progenitores, salvo para retener nombres y cotilleos de los famosetes, y cuya única base cultural, allá en su infancia, la extrajeron de los programas, personajes y anuncios televisivos de la más arraigada simpleza, resulta esclarecedor este compendio de frases doctas de quienes tienen el magisterio en las universidades españolas.
Cientos de alumnos han recogido a vuela pluma sus palabras, y con la urgencia y el entusiasmo para dejarlas a nuestro alcance, se olvidaron de la gramática y de la ortografía y hasta del español, por lo que me he pasado media tarde corrigiendo, y, a estas horas, aunque me pongan una pistola en el pecho, sería incapaz de discernir y detectar otro gazapo, por lo que ruego me señalen los que se me hayan colado, y sepan disculparme, teniendo en cuenta mi lastimoso estado.
Lean y disfruten quienes no fueron jamás, y rememoren quienes no han vuelto o ya olvidaron las clases en la Universidad, templo de la Sabiduría, Olimpo de la Cultura y de la Educación:

"La lengua lo recubre todo."
Dixit: D. Sáez - Centro de Estudios Superiores Felipe II, UCM

"...hoy en día, en el siglo 2006..."
Dixit: Beatriz Soto - Centro de Estudios Superiores Felipe II, UCM

Primer día de clase, explicando sus normas:
"…Y ya se que es mala hora para clase, pero creedme, llego yo aquí con más hambre que vosotros dos...y está totalmente prohibido comer en mi clase, beber agua sí, pero otra cosa no...si traéis comida os lo confiscaré y me lo comeré...menos los plátanos, no me gustan.. así que podéis traer plátanos."
Dixit: Noemi Cuervo - Centro de Estudios Superiores Felipe II, UCM

"Nacemos como bellotas, no como cerdos; luego nos convertimos en alcornoques y mas tarde a lo mejor en encinas milenarias"
Dixit:Jose Luis Gonzalez - Facultad de Ciencias de la Salud, URJC

"*Determinista: Algo que está determinado por huevos*"
Dixit:Jose Luis Gonzalez - Facultad de Ciencias de la Salud, URJC

"Queda claro que comemos carne de pollo, no de pollita"...
Dixit: Manuel Lorente - Facultad de Filosofía y Letras, UAM

"Una gilipollez bien argumentada puede ser brillante"
Dixit: Florencio Sevilla - Facultad de Filosofía y Letras, UAM

"Lo peor de ser químico es que te pasas el día rodeado de botellas; pero no puedes beber de ninguna."
Dixit: Manuel Lorente - Facultad de Filosofía y Letras, UAM

"-Usad siempre guantes. Procurad no tocar el bromuro de etidio que es cancerígeno y se intercala en el DNA [si se ilumina con ultravioleta, brilla]*. Lo único bueno es que estaréis más fardones en la disco. Visto así..."*
Dixit: Miguel Ángel Íñiguez Peña - Facultad de Ciencias, UAM

"Cuando las células no quieren a los pobres microtúbulos, éstos deben sufrir"
Dixit: Mª del Carmen Iglesias de la Cruz - Facultad de Ciencias, UAM

"Que conste que yo no soy nazi, para que no se me malinterprete lo que voy a decir: si el depredador mata a un individuo de una especie, eso es bueno para la especie porque se elimina a los individuos mas debiles..."
Dixit: Amparo Jiménez - Facultad de Farmacia, UAH

"Buclean : dícese del DNA que forma un bucle a partir de otro bucle."
Dixit: Mª del Carmen Iglesias de la Cruz - Facultad de Ciencias, UAM

"En esta vida no hay mas desgracia que ser chica y encima ser fea"
Dixit: Enrique Múgica Urquía - Facultad de Derecho, UCM

"¿Y que pasa si esta ecuación me da cero? Pues me voy y la dejo ahí."
Dixit:Francisco Conejero Meca - Facultad de Ciencias Biológicas, UCM

"El "lamelopollo" (lamelopodio) *se mueve a lo largo y a lo profundo. "*

Dixit: Mª del Carmen Iglesias de la Cruz - Facultad de Ciencias, UAM

"El movimiento de un flagelo se puede comparar con un sacacorchos de un tío que está borracho abriendo una botella"
Dixit: Mª del Carmen Iglesias de la Cruz - Facultad de Ciencias, UAM

"*Al retículo endoplasmático liso no les sienta bien las barbacoas"*
Dixit: Mª del Carmen Iglesias de la Cruz - Facultad de Ciencias, UAM

" Es que el axón puede tener metros, o muchos centímetros, e incluso milímetros"
Dixit: Mª del Carmen Iglesias de la Cruz - Facultad de Ciencias, UAM

""Las clasificaciones no existen, son sólo inventos de la mente""
Dixit: Mauricio García Mateu - Facultad de Ciencias, UAM

"Las polimerasas son las grandes divas. Ellas son las que siempre necesitan más parafernalia de todas. A veces se hacen insoportables de tan divas que son"
Dixit: Marta Izquierdo Rojo - Facultad de Ciencias, UAM

"La yema del huevo es amarilla pero porque tiene sustancias amarillas"
Dixit: Juan Salvador Jiménez - Facultad de Ciencias, UAM

"Los anticuerpos son tontos"
Dixit: Mauricio García Mateu - Facultad de Ciencias, UAM

"La sociedad de hoy en día no premia las conductas necesarias para ser un buen investigador. Eso es una lástima."
Dixit: Mauricio García Mateu - Facultad de Ciencias, UAM

Muestra un gráfico en el que la constante de equilibrio varía mucho en función de la temperatura. Muestra luego otro en el que la constante de equilibrio varía muy poco en función de la presión:
"-Veréis: Los pequeños cambios de presión que haya de un día a otro apenas afectan a nuestros experimentos en el laboratorio. De hecho, podéis bucear tranquilamente sin que se vean afectadas las constantes de equilibrio de vuestras reacciones metabólicas porque, como vemos en el gráfico, para variar un poquito de nada la constante de equilibrio, hay que aumentar tanto la presión que llegaríamos con la tiza a Tres Cantos."
Dixit: Juan Salvador Jiménez - Facultad de Ciencias, UAM

"En Química debéis tener en cuenta una cosa, si algo lo habéis entendido bien a la primera y es fácil, desconfiad, seguramente es falso."
Dixit: Juan Salvador Jiménez - Facultad de Ciencias, UAM

"...Entonces, lo bonito de la Termodinámica es... Veréis... Nada. La Termodinámica no tiene nada de bonito. Es más bien fea". (Complementos de Química -Física)
Dixit: Juan Salvador Jiménez - Facultad de Ciencias, UAM

"Un diagrama de tallos y hojas quiere decir...quiere decir eso."
Dixit: Juan Fontanillas - Facultad de Ciencias, UAM

"El número no importa, esta asignatura es de letras"
Dixit: Juan Zarco - Facultad de Ciencias Económicas y Empresariales, UAM

"Un carajal de cojones... " (Acerca de los líos que se forma la gente con las gráficas)
Dixit: Jose Manuel Rodriguez - Facultad de Ciencias Económicas y Empresariales, UAM

"Si el ajuste no es bueno, le pueden correr a gorrazos al economista de turno"
Dixit: Jose Manuel Rodriguez - Facultad de Ciencias Económicas y Empresariales, UAM

"No me hagáis que levante la voz, que luego acabo peor que Isabel Pantoja, después de un concierto"
Dixit: Almudena Marazuela - Facultad de Derecho, UAM

"¿Cuáles son las principales funciones de Derecho? La respuesta después de la publicidad
Dixit: Evaristo Prieto - Facultad de Derecho, UAM

"Asterix y Obélix eran galos"
Dixit: Almudena Marazuela Marazuela - Facultad de Derecho, UAM

"No os recomiendo que os dejéis nada en el aula entre clase y clase. A mi una vez me robaron el sillón "
Dixit: Alicia Fiestas - Facultad de Derecho, UAM

"¿Habéis visto alguna vez a un gato con problemas de alcoholismo?"
Dixit: Dr. Lázaro (HTM) - Facultad de Medicina, UAM

"Pero bueno, ése es otro tema que veremos la semana pasada."
Dixit: Dr. Lázaro (HTM) - Facultad de Medicina, UAM

"...hombre no es lo mismo tener miedo a un perrito que a un perro fiero, fiero, requetefiero" (hablando de las fobias...)
Dixit: Rocío Fernández-Ballesteros - Facultad de Psicología, UAM

"No se si os he respondido a la pregunta o he hablado de lo que me ha dado la gana, pero me he quedado a gusto"

Dixit: Jesús Maria de Miguel - Facultad de Psicología, UAM

Pregunta tipo test, en el examen de inteligencia de febrero:
*- "¿Cómo sabremos si un niño es superdotado? **a)** Porque pasa largos periodos de concentración sin moverse del sitio; **b)** Porque lleva unas gafas de pasta con cristal de culo de vaso"*
Dixit: Adarraga - Facultad de Psicología, UAM

En una excursión:- *¡Mirad (unos pájaros) van hacia el norte, para la sierra!* (En esto que los pájaros dan la vuelta) *¡Ah, pues no, no van para la sierra!* (Los pájaros se ponen a dar vueltas) *¡Aaandaaaa si se están reagrupando!* (Los pájaros siguen dando vuelta) *Claro justamente...¡es que están en una corriente de aire!*
Dixit: Gloria Luna - Formación de Profesorado y Educación, UAM

"Yo me convierto en Rotenmeyer cuando quiero, así que tú eres Adelaida"
Dixit: Gloria Luna - Formación de Profesorado y Educación, UAM

En clase de lengua de signos (eso dice ella) le preguntamos por varios signos, y pájaro, mariposa y abeja los hace igual, y ante nuestra cara de perplejidad dice:

"Mis padres son sordos y yo aprendí de pequeña: los de la confederación de sordos no tenéis ni puta idea"
Dixit: Rosalía Aranda - Formación de Profesorado y Educación, UAM

"Si mandamos a los Simpson a la luna...."
Dixit: Sofia Dominguez - Formación de Profesorado y Educación, UAM

"En esta carrera os enseñare a ser como yo"
Dixit: Maravillas - Formación de Profesorado y Educación, UAM

"El que avisa no es traidor, puede ser un cabroncete, pero no un traidor."
Dixit: Javier Valle - Formación de Profesorado y Educación, UAM

"Tranquilos que no me como a nadie... vivo."
Dixit: Javier Valle - Formación de Profesorado y Educación, UAM

"Ya que mi micro de pinganillo se halla estropeado, he pedido uno en Conserjería y me han dado este macromicrófono melódico de cantante de Operación Triunfo."
Dixit: Antonio Cidoncha - Formación de Profesorado y Educación, UAM

"Que levanten la mano los que no estén en clase, por favor..."
Dixit: Maravillas - Formación de Profesorado y Educación, UAM

"¿Me dejas tus apuntes?"
Dixit: Maravillas - Formación de Profesorado y Educación, UAM

"Las bacterias de nuestro intestino son nuestras amigas procariotas "
Dixit: Amelia Pérez - Formación de Profesorado y Educación, UAM

"Como he escribido en la pizarra..."
Dixit: Paulino García - Formación de Profesorado y Educación, UAM

"Cuando yo era pequeño, el cura nos decía que masturbarse provocaba enfermedad en los pulmones ¡Pues yo me la he meneado mas que un macaco y estoy perfecto! Y todos…Y que no os entre la risita tonta..."
Dixit: Francisco Perez Fernandez - Facultad de Ciencias Sociales y de la Educación, UCJC

"Imaginemos una vaca esferica..."
Dixit: Francisco Javier Clares Humbría - Escuela Politécnica Superior, UC3M

Primer día de clase de arquitectura de ordenadores:
"Un ingeniero es una maquina de resolver problemas. A un ingeniero le das un problema y de devuelve una solución. "
Dixit: Abelardo Pardo - Escuela Politécnica Superior, UC3M

"¿Y quienes son los consumidores? ¡Pues vosotros! Vosotros sois consumidores cuando os compráis un bollo, cuando compráis unos preservativos..."
Dixit: Concha Saavedra - Facultad de Ciencias Sociales y Jurídicas, UC3M

"Esta autopista no es super guay, es super derivable "
Dixit: Jose María Gambí Fernández - Escuela Politécnica Superior, UC3M

"Tengo y igual a f de x, ¿y qué coño hago?"
Dixit: Jose María Gambí Fernández - Escuela Politécnica Superior, UC3M

"Al grupo 2 le meto la 11, que es grande y dura."
Dixit: Luis Fernandez (el del sistema económico de la empresa) - Escuela Politécnica Superior, UC3M

"Esto es tan inapropiado como ver una peli guarra en el Vaticano."
Dixit: Germán Gutierrez Sánchez - Escuela Politécnica Superior, UC3M

"Para llevaros a la chavalita al cine, decirla que vais a enseñarla logaritmos."
Jose María Gambí Fernández - Escuela Politécnica Superior, UC3M

Pregunta una alumna sobre la clase del día siguiente:
-¿Qué vas a hacer mañana?'
-Hombre, tenía pensado ir al cine con mi mujer, pero, vamos, si te apetece, puedes venirte también"
Dixit: Pablo Ledesma - Escuela Politécnica Superior, UC3M

"O te calmas o te vas a la cafetería y te tomas un café"
Dixit: Paul, Frijolit - Escuela Politécnica Superior, UC3M

"En las máquinas de refrescos de Coca-Cola podéis elegir: Coca-Cola, Fanta, Fanta Naranja, Fanta Limón, Coca-Cola Light, Pepsi, Pepsi Light y coca..."
Dixit: Montserrat Ibáñez - Escuela Politécnica Superior, UC3M

"Copy paste, no; copy paste, malo."
Dixit: Esther Palomar - Escuela Politécnica Superior, UC3M

"Tenéis conexión sin alambres a Internet"
Dixit: Ángel Muñoz - Escuela Politécnica Superior, UC3M

Profesor: *-Bueno pues aquí os apunto la web donde ponen las diapositivas que tenía preparadas para hoy.*
Alumna: *-¡Joder, yo no tengo ordenador!*
Profesor: *-No os preocupéis, los que no tengáis ordenador en casa, me enviáis un e.mail y yo os paso los ficheros."*
Dixit: Eduardo Jesús Sánchez - Escuela Politécnica Superior, UC3M

En un problema del teorema de Taylor de dos líneas sencillísimo, de los más básicos, coge y se equivoca al hacerlo y cuando llega al final ve que no es un resultado posible y dice:
"- No, esto no puede ser."
Y lo borra y lo vuelve a hacer y se vuelve a equivocar y va y dice:
-*"Veis, lo he vuelto a hacer mal aposta. Si hubierais prestado atención me lo habríais dicho; así que acabadlo vosotros"*
Dixit: Miguel Ángel Moscoso Castro - Escuela Politécnica Superior, UC3M

Al empezar un ejercicio:
"-Esto es muy fácil..."

(Cuando ve que lo ha hecho mal):
"-Bueno, aquí me he equivocado..."
(Cuando ya se da cuenta de que no sabe por donde seguir):
-Bueno, esto es trivial, terminadlo en casa..."
Dixit: Jose María Gambí Fernández - Escuela Politécnica Superior, UC3M

"¿Cuál es el resultado de que los clérigos oficien misa en latín? ¡Que no la entendía...ni Dios! "
Dixit: Inés Fernández Ordóñez - Facultad de Filosofía y Letras, UAM

"Aunque no vengo, yo vengo, esperadme ."
Dixit: Inés Fernández Ordóñez - Facultad de Filosofía y Letras, UAM

"Eso ya lo dije el otro día…pero yo ni me multiplico, ni crezco, ni me reproduzco..."
Dixit: Mariano de la Campa - Facultad de Filosofía y Letras, UAM

En una clase de posgrado de Lengua Española, explicando los rasgos interpretables y no interpretables de las palabras:
"-Es que el menos género no es la ausencia de género. Es también género pero en negativo. Es como el Anticristo, ¿entendéis?"
Dixit: Luis Sáez del Álamo - Facultad de Filología, UCM

"Hypocrite... ¿cómo era en español...? Hicropita.... ah no...hipro... hipócrita"
Dixit: E. de Lorenzo - Centro de Estudios Superiores Felipe II, UCM

Para burlarse de lo que otros escriben, al menos debería dar ejemplo redactando correctamente. Su pretendídamente intelectual discurso está lleno de palabras y expresiones que es evidente que no entiende (como demuestra, por ejemplo, al calificar de enciclopédica a la memez), pero que resulta efectivo para impresionar a la masa analfabeta funcional que desgraciadamente tenemos como juventud.

Respecto al supusesto gazapo de la lengua de signos que se comenta arriba, es verdad que en lengua de signos para referirse a animales que pueden ser parecidos entre ellosse usan lo que se llaman clasificadores que son similares para los distintos animales,por lo que la profesora no estaba tan descaminada, y lo de que sus padres son sordos y que sabe mas que los de las confederaciones de sordos, tampoco es algo tan descabellado. Los que mas saben de lengua de signos son los propios sordos; si quieres aprender lengua de signos acude a ellos, porque te enseñaran mejor que en la mayoria de las confederaciones de sordos, ya que en muchas de estas enseñan las modalidades bimodales, en la que se adapta la lengua de signos a la lengua oral. Os sorprenderia saber el poco caso que hacen muchas veces algunas de las confederaciones a las reivindicaciones de las personas sordas

SER O NO SER

No recordamos la niñez como esa época mirífica y dichosa que los anuncios hacen creer. La adolescencia nos encontró con exceso de acné y seborrea, con un tobogán que nos hundía y levantaba las emociones hasta el vértigo . En la juventud obtuvimos indiferencia de quien nos gustaba, rechazo de quien amábamos hasta la abyección, y cuidados de quien nos tenía más que hartos.

No vimos donde estaba la gracia de ser víctimas y verdugos en una pareja que no se parecía a las que irradian dicha en las películas. Como mucho, llegamos a un armisticio salpicado de reproches, en el que los programas de televisión y las ocupaciones hicieron de “Cascos Azules”. .

Luego, poco después, antes de hacernos a la idea de que ya no somos jóvenes, nos miramos al espejo y no vemos esa piel nacarada sin celulitis ni varices ni michelines que dicen que existe, que vemos en cine y televisión. Y lo peor es que no recordamos haberla tenido alguna vez... Tampoco tuvimos esa cabellera leonada, ni los inmensos ojos verdes ni las voluptuosas curvas ni los envidiados biceps ni la simpatía por arrobas. Nunca hemos sabido qué decir hasta que ya no estaba ahí nuestro interlocutor, hemos ensayado conversaciones que no nos dejaron iniciar y hemos deseado ser seductores y sólo hemos sido grotescos.

Alguna gente hemos asumido que esa distancia sideral entre lo que deseamos y lo que obtenemos; entre lo que Hollywood muestra y lo que se nos oculta es una fuente inagotable de diversión, y hemos hecho un pacto con el hijo tonto que llevamos incorporado, mientras tratamos de no cultivar el Alzheimer ni las debilidades. Hemos aprendido a no dramatizar y a exigirnos a nosotros más que a los demás, y a no andar templando gaitas con nuestros semejantes, lo que no nos convierte en las personas más cómodas y tratables del mundo. Ni falta que hace.

Y no nos va mal.

Otros, dicidieron hace tiempo no soportarlo, y van al médico periódicamente para que les recete una dosis de tranquilizante cada vez mayor, un fármaco cada vez más fuerte, porque parece que han tragado demasiados sapos y los tienen en la boca del estómago, como un nudo de angustia que no les deja respirar. El médico les hace la receta para el Prozac, el Orfidal, el Valium o el Trankimazin, y llama al siguiente sin mirarlo a la cara.

Son tantos los que muestran los efectos secundarios de esos fármacos: el temblor de manos, los problemas de memoria inmediata, el gesto hierático, la mirada vacua, la piel sin brillo, la rigidez, la lentitud de comprensión... Y el síndrome de abstinencia es tan fuerte como el de la heroina.

"Los tranquilizantes se emplean para acomodar al sujeto en una adormilada indiferencia hacia lo interior y lo exterior."

"...capaz de extraer al usuario del ánimo afligido o nervioso sin llevarle a ninguna otra dimensión de conciencia."

"Basados a veces en reducir simplemente la cantidad de oxigeno aportada a las células cerebrales constituyen lenitivos puros, amortiguadores de la intensidad psíquica, que durante un tiempo pretenden volver el mundo uniformemente gris, aunque se vendan por su capacidad para tornarlo de color de rosa."

"Son relajantes musculares, donde en vez de producirse la analgesia emocional del opio (que fomenta un activo juego de fantasías e imaginación) se produce una analgesia de tipo intelectual, caracterizada por indiferencia estética y lógica.

"Ensayados inicialmente para la tranquilización de animales (primero ratas, luego monos y leones), el éxito de esos experimentos llevo a usarlos con seres humanos."

"Provocan aturdimiento, dificultades para coordinar el movimiento y hablar, estupor, etc.; a largo plazo lesionan la función sexual del usuario."

"El peculiar potencial de conformismo que esos fármacos encierran reside en una embriaguez básicamente pasiva."

"...disminuido en ritmo de ideación y reacción, et sujeto sencillamente no se va a preocupar demasiado por nada, siempre que tenga en sangre una concentración suficiente."

"...es un derivado del petróleo, que se sintetizo como sucedáneo del curare, para obtener relajación muscular. F. M. Berger, su descubridor, comprobó que además de inducir relajación muscular moderaba la ansiedad y la tensión. El efecto fue llamado «ataraxia o tranquilidad moral»

"Los llamados neurolépticos, etimológicamente "sujetanervios" o tranquilizantes fuertes, su sorprendente efecto es poner una invisible camisa de fuerza a quien los consume, produciendo un estado de petrificación «siderismo» emocional que H. Laborit, el primero en experimentar con ellos,

no vaciló en llamar "lobotomía química"

"Los neurolépticos presentan algunos efectos secundarios indeseables, como obstrucción hepática, destrucción de células de la sangre, alergias cutáneas, reacciones neuromusculares semejantes al parkinsonismo y una obesidad característica. También conllevan trastornos profundos y muy duraderos en la función sexual y la capacidad afectiva: el sidéreo individuo que producen se halla siempre al borde de la total frigidez, y algunos psiquiatras ven motivos para temer que la degradación del deseo erótico resulte irreversible".

"Según Szasz, en Estados Unidos mueren al año, en hospitales públicos, por fallo cardíaco o colapso respiratorio, debido a sobredosis accidental con este tipo de fármacos, más personas que por sobredosis de todas las drogas ilícitas juntas. En realidad, son drogas adictivas, que tomadas en cantidades altas durante un periodo lo bastante prolongado provocarán intensos síndromes abstinenciales."

" ...la adicción pierde relieve por la falta de euforia que caracteriza su efecto. Aunque los químicamente lobotomizados parecen flemáticos y robóticos, no les abandona un sentimiento básico de tristeza hasta cesar el tratamiento, cuando el cuerpo logra liberarse de la intoxicación."

(Citas extraídas de "*Historia de las drogas 2*": *"Tranquilizantes y ansiolíticos"* y *"Los tranquilizantes mayores"* de Antonio Escohotado.)

La gente consume estos medicamentos a cualquier edad, recomendados siempre con la coletilla de que "es muy suave", sin saber que están neutralizando la propia producción de endorfinas para una buena temporada, y que los efectos de rebote son terroríficos, porque la angustia, el caos mental, la inconsistencia emocional, el pánico y la ansiedad en el síndrome de abstinencia son mucho peores que los que motivaron el tratamiento.

La mayor parte de los fármacos tranquilizantes y ansiolíticos se prescriben tan masivamente, tan indiscriminadamente y con tal falta de rigor que están convirtiendo en enfermos crónicos drogodependientes a los que sólo son personas con insatsfacción, rebeldía o apatía con su familia y su entorno, o lo que es más grave, pacientes con un problema médico mal diagnosticado, a quien neutralizan y enmudecen con tranquilizantes.

Para el insomnio, provocado tanto por dolores orgánicos como el provocado por las costumbres sedentarias de quien se zampa 12 horas de televisión al día y no realiza ningún ejercicio, se está recetando, a troche y moche, *Orfidal, Stilnox, Trankimazin, Valium..*. Y mientras el gasto en este espectro farmacológico siga creciendo no faltarán estudios y campañas publicitarias pagadas por los laboratorios aconsejando el tratamiento con benzodizepinas para relajar a los pacientes ambulatorios en odontología, por ejemplo. No dirán nunca que no calma el dolor ni atenúa el miedo, sino que sólo sirve para hacerles olvidar que lo han sentido.

Parece comprensible que un especialista en Psiquiatría recete según su criterio; pero el *Haloperidol* (antipsicótico) y el *Stilnox* (hipnótico) se venden sin receta, y los médicos de atención primaria prescriben auténticos cócteles de tranquilizantes, hipnóticos y neurolépticos, alegremente, sin supervisión del Psiquiatra. La mayoría de las mujeres reciben ese tipo de fármacos para contrarrestar las molestias de la menopausia. No hablamos de una enfermedad mental grave, sino de "molestias","desganas", "sofocos",

"palpitaciones", "nerviosismo". Les están colocando "camisa de fuerza" y "lobotomía" químicas a niños y adolescentes irritables porque "discuten por cualquier cosa con sus hermanos", de la misma manera que se los recetan a los ancianos que consultan los achaques normales del final del ciclo vital, y con este tratamiento sólo se consigue entorpecer más sus reflejos, producirles más temblores, y crearles un estado inducido de estupor y confusión, mediante la amnesia anterógrada que provocan estos fármacos.

Hay un dato estadístico que se suele silenciar: después de la enfermedad cardiovascular y el cáncer, la tercera causa de muerte es por causas iatrogénicas: es decir, la provocada por la praxis médica y los medicamentos.

Y todo por no asumir el control de nuestra salud y de nuestra enfermedad, y delegar la responsabilidad en el médico.

PATRIOTISMO

Cristiano, s. El que cree que el Nuevo Testamento es un libro de inspiración divina que responde admirablemente a las necesidades espirituales de su vecino. El que sigue las enseñanzas de Cristo en la medida que no resulten incompatibles con una vida de pecado.
Hábitos sacerdotales, s. p. l. Traje abigarrado que usan los payasos de la Corte Celestial.
Hablar, v. i. Ser indiscreto sin ser tentado, a partir de un impulso sin propósito.
Patriota:s. Alguien al que los intereses de una parte le parecen más importantes que los del todo. Bobo que manejan los políticos e instrumento de los conquistadores.
Patriotismo: s. Basura combustible siempre a punto para que le aplique una antorcha cualquiera que abrigue la ambición de iluminar su propio nombre.
En el famoso diccionario del doctor Johnson, el patriotismo se define como el último refugio del sinvergüenza. Con el debido respeto que merece un lexicógrafo tan ilustre, aunque menor, me atrevería a afirmar que es el primero.

Demostradme vuestra perspicacia, lectores, que cultiváis peligrosamente el Alzheimer leyendo como quien engulle letras y palabras sin saborear ni preguntarse sobre los ingredientes del guiso. ¿Quién es el autor? ¿Título? ¿Siglo? ¿Biografía? ¿Más o menos dónde lo encuadráis, pequeños saltamontes? ¿Es gachupín, gringo, gabacho...?

Gatopardo

Probando a ver si funciona:
"Como soy una pequeña saltamontes muy aplicada, diré que, por seguir por la "P" también se lee en este diccionario del demonio lo siguiente:

Paraíso, s. Lugar donde los malvados cesan de perturbarnos hablando de sus asuntos

personales, y los buenos escuchan con atención mientras exponemos los nuestros.

Pasado, s. Pequeña fracción de la eternidad de la que tenemos un leve y lamentable conocimiento. Una línea móvil llamada Presente lo separa de un período imaginario llamado Futuro. Estas dos grandes porciones de la Eternidad una de las cuales borra continuamente a la otra, son eternamente distintas. Una está oscurecida por la pena y el desengaño, la otra iluminada por la prosperidad y la alegría. El Pasado es la región de los sollozos, el Futuro, el reino del canto. En uno se acurruca la memoria, vestida con un sayal, la cabeza cubierta de ceniza, musitando plegarias penitenciales; en la luz solar del otro vuela la Esperanza llamándonos a los templos del éxito y los pabellones del placer. Sin embargo, el pasado es el Futuro de ayer, el Futuro es el Pasado de mañana. Son una misma cosa: el conocimiento y el sueño.

Patriota, s. El que considera superiores los intereses de la parte a los intereses del todo. Juguete de políticos e instrumento de conquistadores.

Como dice Carlota, es gringo, y sus iniciales son A. B. -para más señas- Y dejo el tema para que otro pequeño saltamontes siga -que se lo doy casi hecho ya.

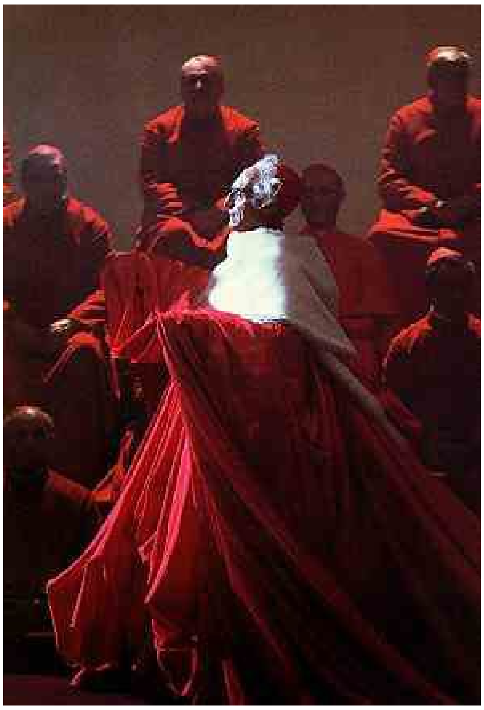
ARTHUR KOESTLER, DESCATALOGADO (II)



"Los continuos desastres de la historia humana se deben, ante todo, a esta facilidad y propensión excesivas a identificarse con una tribu, nación, iglesia o causa, y a abrazar su credo sin asomo de crítica y con entusiasmo ciego, incluso si sus artículos de fe son opuestos a la razón, van contra el propio interés o niegan las justas pretensiones de la propia conservación.
Nos vemos así empujados a la conclusión, a contrapelo de la moda actual, de que el problema de nuestra especie radica no en el exceso de agresividad, sino en una capacidad sobreabundante para la devoción fanática. Incluso un vistazo rápido a la historia nos convencerá de que los crímenes individuales cometidos por motivos egoístas representan un porcentaje insignificante en la tragedia humana, si se les compara a las muchedumbres sacrificadas en las orgías de lealtad desprendida para con la propia tribu, nación, dinastía, iglesia o ideología política; todo ello *ad maiorem gloriam dei* (...) El homicidio perpetrado por razones egoístas constituye una rareza estadística en todas las culturas, incluida la nuestra. En cambio el homicidio por razones altruistas, (patrióticas, ideológicas) con riesgo de la propia vida incluso, se destaca como fenómeno predominante."
"En primer lugar, cuando Freud proclamó *ex cathedra* que las guerras tenían su causa en los instintos agresivos reprimidos que buscaban una válvula de escape, la gente mostró inclinación a creerlo porque tal cosa les ayudaba a sentirse culpables, aunque aquél no suministraba ni un solo dato histórico o psicológico en apoyo de su afirmación: cualquiera que haya servido en las filas del ejercito puede atestiguar que los sentimientos de agresividad hacia el enemigo apenas desempeñan un papel en la aburrida rutina de hacer la guerra. Los soldados experimentan miedo, hastío, hambre sexual, nostalgia del hogar; luchan con resignación, porque no les queda más remedio, o con entusiasmo por su patria y su rey, por la verdadera religión o la causa justa, inspirados no por el odio, sino por la lealtad: la tragedia del hombre estriba no en un exceso de agresividad, sino en la sobreabundancia de devoción".

ARTHUR KOESTLER
"Jano" Editorial Debate, año 1981
(Obra no reeditada y autor misteriosamente silenciado)

Autor: Hannah

Es evidente que Koestler no posee la difusión ni el autobombo de Sartre, ni de otros escritores, y también es evidente que no saltó a la palestra de los medios al cumplirse en 2005 el centenario de su muerte (y el de su esposa, por suicidio de ambos), como es evidente también que no hay, ni hubo, ni ha habido, ni muy probablemente habrá, un despliegue masivo de sus obras por los escaparates; pero de ahí a decir que está "silenciado" hay un trecho.
Si ponemos un Google "Arthur Kostler+Biografía+Obra", sólo en español aparecen 22700 páginas –se elevan a 28.500 en la web-. Debate reeditó en Marzo del 2000 su autobiografía en dos tomos:"Flecha en el azul", tomo I y "La escritura invisible", tomo II; obra que puede encontrarse hoy en múltiples librerías y que me agradó sobremanera leer. Incluso puede encontrarse "Jano" -obra que no había leído, sí la autobiografía reseñada, "Cero e infinito" y "Testamento español"-, y que acabo de adquirir por Internet.Puede pues que esté descatalogado, pero no está agotado, cosa que sí sucede con otros, como por ejemplo Reich, y que a pesar de estar agotados, no son reeditados.

Lo que si tiene Kostler -como otros- es poca "masa lectora" que se interese por lo que decía; y es que al rebaño sumiso y fanático le interesa poco conocer lo que pueda aducir Koestler en su obra; y, menos aún, le interesa a los "Pastores" que sus rebaños lo lean, y ahí sí que veo una maliciosa e intencionada labor "silenciativa" no tanto por parte de los editores, como por parte de "rebaños y pastores rectores del poder"; los editores, al fin y al cabo se mueven por lo comercial y por las leyes de la oferta y la demanda, lo cual no excluye que en ocasiones sean complices de ese "poder"… No obstante, sus obras en Alemania, Reino Unido y en Francia, si son reeditadas; no así en España y en español, pero es algo que comparte, en nuestro país, con otros muchos, porque, lamentablemente, si en algo es experto nuestro país es en eso de "los rediles", y como muestra, léase sobre la última manifestación dominical, en Madrid, de la Sacrosantra Iglesia.
Eso sí, todos estos escritores "silenciados", tienen mucho en común: una ausencia absoluta de fanatismo y fe en las causas, una aplicación de la razón crítica, junto a una huida de caer en la creencia "rebañil", la no aceptación del dogma por el dogma, una honestidad encomiable en sus particulares búsquedas de respuestas, exentas de adoraciones, y la misma honestidad en hacernos participes de sus hallazgos, logros y decepciones, sin pelos en la pluma, y unido todo ello a una coherencia constante con lo que van integrando en sus vidas.
La lectura de Koestler, para mí fue muy valiosa, y como pueden ser halladas sus obras, sin mucha dificultad, en muchas librerías –Casa del libro, sin ir más lejos-, les animo a acercarse a ellas.
Ruego a Gatopardo que disculpe mis neologismos y mis patadas al diccionario y a la sintaxis, así como mis errores si los hubiere.
Un abrazo entrañable.
Hannah"

EN TRIBUNA DE PERIODISTAS: ALEX EL TERRIBLE, UN NARCO EN LA CORTE DEL REY HUGO

.

Por Carlos Machado.Publicado en Periodico Tribuna de Periodistas

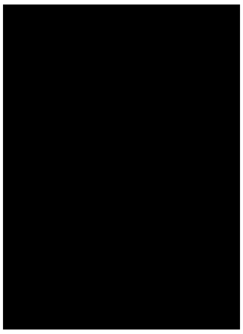
Vamos a ocuparnos exclusivamente de un singular personaje, muy vinculado con el principal entorno del gobierno de Venezuela, desde sus primeros puestos hacia abajo -si bien no tan abajo-, y que a la vez no está demasiado desligado del tema de la maleta de los 800.000 dólares que tanto desvela, en estos últimos días, a los habitantes del Palacio Miraflores y la Casa Rosada, las sedes gubernamentales venezolana y argentina. Se trata de **Marco Walter Alexander Del Nogal Márquez**, más conocido como **Alex del Nogal**, de 39 años de edad, otro joven empresario venezolano que creció e hizo crecer su fortuna al amparo de la administración de Hugo Chávez durante los últimos diez años. Sin embargo, Del Nogal tiene otra actividad paralela a la de empresario multirrubro -como sus amigos **Carlos Kaufmann** y **Franklin Durán**, hoy más trascendentes como reos de la Justicia norteamericana-, y más bien sus empresas le sirven de pantalla para esa otra actividad que obviamente no puede ser pública: **Del Nogal es narcotraficante**.
Por esa causa, en especial por tener pedidos de captura a través de Interpol y por ser requerido también por las Justicias canadiense y suiza, ya que hace algunos años escapó de este último país, donde se encontraba detenido, Del Nogal está hoy preso en una cárcel de Sicilia, por disposición de un magistrado de esta isla italiana, tras haber sido arrestado en septiembre último a su llegada al aeropuerto de Malpensa, en Milán.

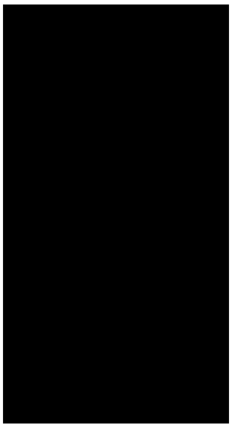
Al parecer la policía italiana había recibido el "soplo" de un antiguo cómplice de Del Nogal, miembro de una *"familia"* siciliana con la que éste hacía negocios relacionados con la droga, y que por un trato con las autoridades fue dejado en libertad luego de señalar el próximo arribo del venezolano al aeropuerto milanés.
Alex Del Nogal es quizás el principal narcotraficante que pisa hoy en día territorio venezolano, además de visitar frecuentemente otros países, aunque ahora esta última actividad la tiene restringida por su detención en Italia y, aunque estuviera libre, por el acecho de Interpol y de los tribunales de Canadá y Suiza, a lo que se ha agregado el interés de la Justicia norteamericana por llevar a Del Nogal junto a sus amigos, los empresarios **Carlos Kaufmann** y **Franklin Durán**, y hacerlo cantar junto a ellos las melodías con las que tanto se están deleitando los fiscales y el FBI.
Y a decir verdad son muchas las "canciones" que podría cantar el travieso Alex. Temas que calarían muy hondo en el ánimo -más bien en el desánimo- de **Hugo Chávez** y su pandilla, de los cuales los más apreciados por los oídos del FBI y los fiscales norteamericanos serían los relacionados con el lavado de grandes sumas de dinero provenientes del narcotráfico y la triangulación de éste, a través de Venezuela, proveniente de Colombia vía las agrupaciones terroristas **FARC** y **ELN**, con destino a Estados Unidos y Europa.
Pero el tema de las vinculaciones venezolanas con el narcotráfico lo dejaremos para otro artículo. Volvamos ahora a ocuparnos de la agitada vida de Alex del Nogal, este "niño terrible" de la boliburguesía chavista.

Pequeño gran hombre

Alex Del Nogal es de baja estatura y no muy agraciado fisonómicamente. Ello no le impide haberse acostumbrado a verse rodeado -billetera mata galán- de las más hermosas mujeres, hasta haberse casado con una hermosa rubia aunque ello no le impidió continuar siendo un conquistador de faldas. Su vida fastuosa, permitida por sus incontables ingresos provenientes de sus actividades non sanctas, además de sus vinculaciones con gente del gobierno, la banca y el petróleo -cuándo no iba a estar **PDVSA** en el medio- le permitió recorrer los más exclusivos círculos de la sociedad venezolana.
Sin embargo, la relación de Del Nogal con los "bolivarianos" y su estrecho vínculo con **Hugo Chávez** comenzó de forma bastante irregular: nada menos que siendo un presidiario que compartió la cárcel con el actual presidente de Venezuela.
Parece que la carrera delictiva de Alex comenzó desde muy joven, y "ayudado" por su propio padre. Según relata Gerardo Reyes en el diario *"El Nuevo Herald"*, de Miami, en una edición de octubre de este año, la Policía Técnica Judicial (PTJ) investigó a Alex **por robo de automóviles** llevados desde el estado norteamericano de Florida, un delito por el cual su padre, **William Del Nogal**, afronta cargos en la corte federal de Miami. William, de 60 años, había sido arrestado en noviembre de 1992 y liberado bajo fianza, pero no volvió a presentarse a las autoridades. Por ello fue acusado en otro encausamiento en el año 2001 y declarado fugitivo.
Johann Peña, ex comisario de la **DISIP** que investigó en esa época la red de contrabando de los autos robados y hoy, alejado del régimen chavista, reside en Miami, reveló que ***"padre e hijo estaban en el negocio, y yo creo que el padre jugó un papel muy importante en la carrera de delincuente de Alex".***
Considerado un joven hábil para realizar "negocios rápidos", en Miami quedaron rastros de algunas de sus múltiples incursiones en este campo. Según los registros de Florida, Del Nogal se asoció con el banquero venezolano **Juan Santaella** en la firma **Magna International**, creada en 1989 y desactivada un año después.
En la misma sociedad figura como director **Daniel Díaz Granados**, un próspero empresario y comisionista bancario cercano al gobierno de Chávez.

Díaz Granados compartió cárcel con Del Nogal cuando fue también acusado, como Alex, de crear ***"terror económico"*** con las bombas enviadas en sobres que explotaron en varios sitios de la capital en bancos y empresas financieras, **con el objeto de favorecer a otros empresarios** del sector allegados a ellos y muy especialmente **provocar una subida en el precio del dólar que les permitiera especular con el mismo en el mercado paralelo.**
Bajo el nombre de **Walter del Nogal** (el segundo nombre de Alex) se registró en 1990 la firma **Renpino Trading**, donde aparece como directora **Evenia Rengifo de Stopello**, una conocida clarividente del mundo político y militar venezolanos, también consultora de varios presidentes.
Y así llegamos al motivo por el cual Alex Del Nogal terminó en la **cárcel de Yare** y conoció allí a **Hugo Chávez**, compañía que derivó en una profunda amistad, tanta como para que al quedar libre, el presidente venezolano se acordara de su amigo, lo indultara y le otorgara amplias funciones en organismos estratégicos y financieros del Estado.
Entre los compañeros de ruta más cercanos a **Alex Del Nogal** se encontraba **Ramiro Helmeyer**, un empresario ligado al medio televisivo, casado con la actriz de telenovelas **Maricarmen Regueiro**, quien cuando estuvo trabajando un tiempo en la Argentina era visitada por Helmeyer. Este último también estuvo involucrado en los atentados con bombas a entidades financieras en lo que dio en llamarse *"terrorismo económico"*.
Hacia el año 1993, Alex Del Nogal y Ramiro Helmeyer, asociados también en cuestiones del narcotráfico -Helmeyer también es requerido por la Justicia canadiense-, tuvieron diferencias con otro socio y amigo, **Mario Patty Fajardo**, a punto tal que, al mejor estilo mafioso, decidieron sacárselo de encima y para ello hicieron explotar el automóvil en que **Patty** se desplazaba. No conformes con ello, le dispararon un tiro en la cabeza y posteriormente, con el pobre Patti ahora sí cadáver seguro, lo arrojaron al Caribe desde el avión que conducía Helmeyer, asegurando el almuerzo a los tiburones.



Alex del Nogal Ramiro Helmeyer

Dos años después, aunque no se les pudo demostrar nada sobre su participación en aquel *"terrorismo económico"* con la colocación de bombas a entidades financieras, **Alex Del Nogal** y **Ramiro Helmeyer** fueron condenados por el asesinato de **Mario Patty Fajardo**, el primero a 22 años y el segundo a 30 años de prisión. En primer lugar fueron encarcelados en el penal de El Junquito, del cual Alex entraba y salía cuando quería, yendo por lo general a parrandear a los locales nocturnos de sus hermanos Willy y Richard, también conocido como *"Bolichón"*, además de consumir buena cantidad de cocaína y compartirla con sus otros amigos presos. Hasta que en una de esas salidas nocturnas Alex se quedó dormido y no regresó al penal. Al día siguiente, mientras se conocía el escándalo, su padre acompañó a Alex de nuevo a la cárcel junto a un abogado diciendo que "él era un muchacho que como cualquier otro tenía derecho a divertirse". Poco tiempo después, Alex y Ramiro Helmeyer fueron derivados a la cárcel de **Yare**, donde por esa época se encontraba detenido un teniente coronel que había

encabezado un golpe de Estado contra el presidente Carlos Andrés Pérez, llamado **Hugo Chávez Frías**.
Poco tiempo transcurrió para que **Del Nogal** y **Helmeyer** anudaran una fuerte amistad con Chávez en las muchas horas que compartían a diario. Más adelante, Chávez salió de la cárcel y juró a sus nuevos amigos que si llegaba a ser presidente *"se acordaría de ellos"*. Cuando Chávez comenzó su campaña, Del Nogal y Helmeyer comenzaron desde Yare a manejar los aportes de fondos para aquél, con la esperanza de que el hombre llegara bien arriba y se acordara de ellos, como había prometido. Y vaya si cumplió...
El destino finalmente puso a **Chávez** en la presidencia y éste no se olvidó de sus amigos. Esperó el momento oportuno y **dio la orden de que los pusieran en libertad** mediante cualquier artilugio jurídico. El 16 y 17 de diciembre de 1999 sucedió la denominada *"Tragedia de Vargas"*, una sucesión de desastres naturales entre lluvias, aluviones e inundaciones que afectó a los **estados Vargas**, **Miranda** y **Falcón** provocando más de 10.000 muertos y decenas de miles de damnificados, con gran cantidad de infraestructura perdida entre la que se cuentan universidades, grandes hoteles, clubes e importantes comunidades. A siete días de esa tragedia, mientras toda Venezuela estaba consternada por aquel desastre, la maquinaria judicial chavista se puso en movimiento y se otorgó la medida de "pre-libertad" a Del Nogal y Helmeyer. De esa manera los *"muchachos de Yare"* estaban en libertad habiendo cumplido sólo seis años del total de sus condenas.
Alex Del Nogal y Ramiro Helmeyer fueron rápidamente a agradecerle a su "pana" Hugo Chávez los favores recibidos y rápidamente, con sus habilidades, lograron hacerse de un espacio en el entorno íntimo del presidente, quien por su parte comprendió que ambos podían serle muy útiles en puestos relacionados con la seguridad. Fue así como ambos entraron a la **DISIP**, uno de los organismos de seguridad del Estado, por la puerta grande. A medida que pasaba el tiempo obtenían más y más prebendas y cuotas de poder, manejando la inteligencia, las operaciones especiales y asesoraban y dirigían nada menos que el primer anillo de seguridad del presidente. Claro que además de hacer mucho dinero aprovechando las ventajas que les daba su poder, no descuidaban sus negocios del narcotráfico, sumamente reactivados tras su liberación. Justamente la **cadena de restaurantes-sushi y locales de diversión nocturna de los hermanos de Alex resultan una importante pantalla**, tanto para el tráfico de drogas como para el lavado de dinero proveniente del mismo.
Alex permaneció mucho tiempo en la **DISIP**, hasta que algunas diferencias de negocios con su amigo Ramiro Helmeyer, quien aún permanece en ese organismo, los hicieron separarse llegando a un acuerdo para no *"invadirse jurisdicciones"*. **Alex Del Nogal pasó a asesorar a la Dirección de Inteligencia Militar (DIM) y a convertirse en mano derecha del general Hugo Carvajal,** conocido como "el Pollo". Así, la pelea entre ambos les resultó muy beneficiosa, ya que en lugar de controlar un cuerpo de seguridad del Estado pasaron a controlar dos. Paralelamente, Helmeyer asesoraba en materia de seguridad al entonces diputado Nicolás Maduro -hoy canciller de Venezuela-, mientras Del Nogal asistía al gerente de Prevención y Control de Pérdidas de PDVSA, el teniente coronel retirado **Gustavo Pérez Issa**, en cuestiones de *"telefonía"*. Pero mientras ambos *"muchachos de Yare"* disfrutaban su rápido ascenso a las cimas del poder, no olvidaban a los policías por los cuales sufrieron la cárcel. Se conoce como **"los hermanos Guevara"**, tratándose de **Rolando, Otoniel** y **Juan Bautista Guevara**, a quienes dirigieron las investigaciones que permitieron enviar a la cárcel a **Alex Del Nogal** y **Ramiro Helmeyer** por el asesinato de **Mario Patty Fajardo.**
Lo que sigue a continuación es el relato de algunas fuentes venezolanas que aún no ha sido confirmado, pero que decidimos incluir por sus implicaciones y las posibilidades de total veracidad.
Un día suena el teléfono de Alex y era uno de sus jóvenes amigos, **Carlos Kaufmann**, quien aún no había llegado tan alto como ahora -cuando acaba de ser **detenido en**

Miami por el caso de la maleta de Antonini Wilson-, para aspirar a la amistad personal del "jefe". **Kaufmann** le pedía ayuda a **Del Nogal**. El fiscal **Danilo Anderson** lo iba a investigar por orden de Chávez, quien necesita mostrar que está *"combatiendo la corrupción"*, y aunque **Kaufmann** trató de sobornarlo no hubo caso. Cuando se trata de órdenes del "jefe" no se puede hacer nada.
Alex y Kaufmann se reúnen, y el primero tranquiliza a su amigo y le promete *"solucionar el problema"*. Del Nogal se lo comenta a Ramiro Helmeyer y le explica el "encargo". **Helmeyer, feliz por poderse vengar de aquellos hermanos Guevara que los enviaron a la cárcel, se encarga de montar toda la operación.**

TODOS CONTRA EL CANON

La hora de los políticos: ¿1.360.000 firmas o 1.360.000 votos?
Depende de tí

Estamos en un momento cercano a las elecciones y este es el momento para pedirles a los responsables de partidos políticos e instituciones que se pronuncien en relación con el canon digital. Solo necesitamos unos minutos de tu tiempo para realizar estas dos acciones:

Dejar tu mensaje en las webs de participación de los partidos y del gobierno. Para ello pulsa en cada uno de los enlaces que hay debajo y expresa en todos ellos tu opinión sobre el canón digital. Te proponemos un texto, al final de este articulo, por si quieres utilizarlo

| PP | PSOE | IU | CIU | PNV | Presidencia | Industria | Cultura|

* el PSOE.es ha eliminado su formulario de atención ciudadana, tras la puesta en marcha de nuestra campaña cambiandolo, casualmente, por el de captación de voluntarios para su campaña electoral. Mientras activan un formulario os dejamos en vuestra mano contactar al PSM para ver si lo arreglan

* ... si quieres contactar con otros Ministerios...

Pasar este mensaje a todos tus amigos y conocidos para que hagan lo propio.

Si tienes una web, activa un enlace a esta campaña, aquí tienes algunos recursos gráficos

Con esta acción podemos influir en todos ellos para que se comprometan y retiren un

canon digital que es injusto, incoherente y negativo para el desarrollo de la Sociedad de la Información.

Recogida de firmas

Entre todos debemos defender los derechos e intereses de los usuarios y los consumidores. Tu firma es un gran apoyo a esta iniciativa contra el canon digital. Cuantos más seamos más fuerza social tendremos.

Firmar

Por si acaso, yo creo que también habría que hacerse todos de esa Sociedad. Total para ser como algunos de sus autores no hacen falta alforjas.
Incluso pienso si no se les podría poner un canon a los plastas de canciones del verano y otros "éxitos" palizas.
Salud para el año nuevo.

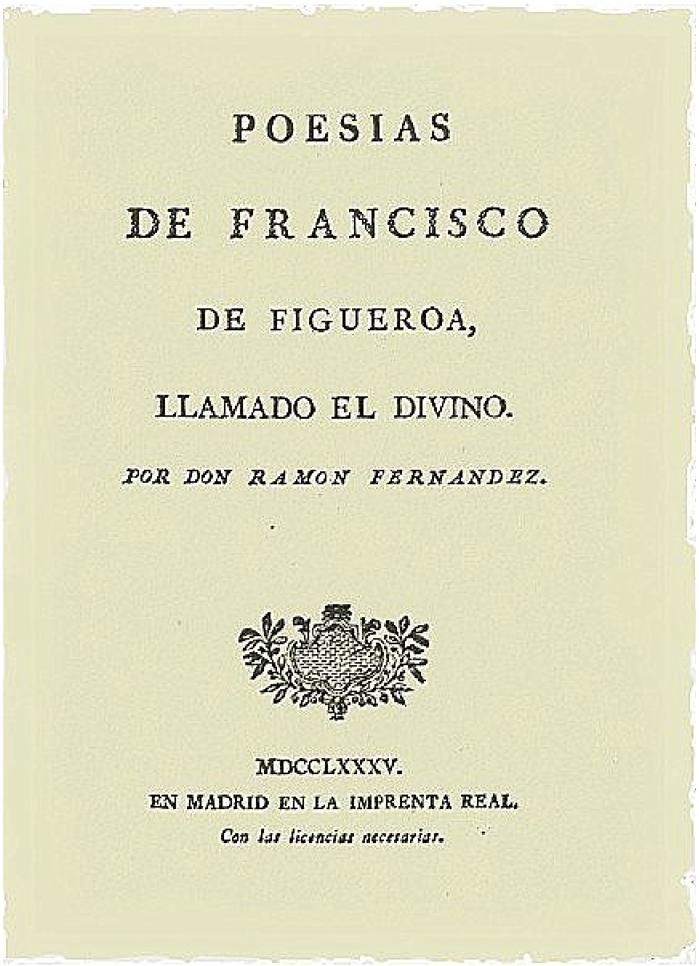
PERDIDO ANDO, SEÑORA, ENTRE LA GENTE...



POESIAS
DE FRANCISCO
DE FIGUEROA,
LLAMADO EL DIVINO.
POR DON RAMON FERNANDEZ.
MDCCLXXXV.
EN MADRID EN LA IMPRENTA REAL.
Con las licencias necesarias.

Perdido ando, señora, entre la gente,
sin vos, sin mí, sin ser, sin Dios, sin vida:
sin vos, porque no sois de mí servida;
sin mí, porque no estoy con vos presente;

sin ser, porque de vos estando ausente
no hay cosa que del ser no me despida;
sin Dios, porque mi alma a Dios olvida
por contemplar en vos continuamente;

sin vida, porque ya que haya vivido,
cien mil veces mejor morir me fuera
que no un dolor tan grave y tan extraño.

¡Que preso yo por vos, por vos herido,
y muerto yo por vos de esta manera,
estéis tan descuidada de mi daño!

ROMANCE DE LA E.S.O.

— 250 —

»Extraordinaria es la voracidad de algunos insectos: los hay que en veinticuatro horas consumen tres veces lo que pesa su cuerpo. Todos nacen de huevos, que las madres ponen donde sus hijos, al salir del cascarón, encuentren conveniente alimento.

»Los insectos que tienen alas cambian su forma varias veces antes de tomar la de sus padres. Este cambio se llama *metamorfosis* ó transformación. En la forma con que salen de los huevos se llaman *larvas* ó gusanos; y así, muchos gusanos que vemos son las crías de moscas y de otros insectos.

»Los gusanos no hacen más que comer y cambiar de piel. Cuando llegan á su madurez, se encierran en un capullo que han tejido con su propia baba, y en él viven cierto tiempo sin comer: algunos se encierran dentro de las cañitas de paja, ó entre los pliegues de las hojas, ó entre la tierra. Cuando están en este estado se llaman *crisálidas* ó *ninfas*. De las crisálidas luego salen los insectos en su forma perfecta; por ejemplo, las *mariposas*.

»Algunas de éstas tienen las alas pintadas de variados y preciosos colores, siendo en verano y en otoño el adorno de los jardines. Las mariposas viven pocos días, tan sólo el tiempo suficiente para poner sus huevos y propagar así su especie.

»Hay un insecto que proporciona inmensas utilidades al hombre, y es el *gusano de seda*, el cual en su vientre prepara un humor, y arrojándole por la boca, teje su capullo para encerrarse: dicho capullo es la seda, cuyo comercio constituye la principal riqueza de muchos países. Lo mismo debe decirse de las abejas, que producen la cera y la miel.

»También hay muchos insectos en extremo perjudiciales, como son:

»1.° La *polilla*, que roe los paños, las pieles, las semillas, el papel y la madera. Para evitar sus estragos, es bueno poner pimienta ó alcanfor entre las pieles y tejidos de lana.

»2.° Las *cucarachas* ó *correderas*, que habitan en lugares húmedos,

El gusano de seda.

La cucaracha.

Cien pies.

Filoxera y huevo tamaño natural y aumentado.

— 251 —

y se ceban en los comestibles de las despensas y cocinas. El medio para librarse de tales insectos es tener en la casa un erizo ó un pato, y, sobre todo, mucha limpieza.

»3.° La *langosta* y el *gorgojo*, que hacen grandísimos destrozos en las plantas, royendo las semillas y las raíces.

»4.° Las *chinches*, insecto de olor asqueroso. Para su destrucción es necesario introducir en los rincones donde se alberguen, una mezcla de agua, hiel de carnero y vitriolo verde.

»La frecuente limpieza de las habitaciones y de las ropas disminuye el número de las impertinentes *pulgas*. En general, quien es muy esmerado en la limpieza de su cuerpo, de las camas y de las habitaciones, evita la molestia de semejantes insectos.»

La langosta.

LAS ARAÑAS.

«Las arañas no son insectos propiamente, como algunos creen, sino una clase de animales invertebrados, de ocho ó más patas, con un cuerpo compuesto de dos partes: una que comprende la cabeza y el pecho, y la otra el vientre. Las arañas comunes que se crían en las casas, tienen ocho ojos, y un humor pegajoso que se seca en cuanto sale de su boca y recibe el aire, con el cual tejen sus redes para cazar las moscas y otros insectos que pasan junto á ellas. Las arañas no son venenosas, pero daño con su picadura.

»Los *escorpiones* pertenecen á la clase de las arañas; cuando pican con la cola, siempre armada de agudas púas, hacen heridas muy dolorosas. El escorpión de África es de gran tamaño, y su picadura es mortal.

»A la misma clase pertenecen los llamados *ciempiés*, que son unos animales peligrosos en extremo.»

La araña.

El escorpión.

Dicen que va en retroceso
la enseñanza de la [E. S. O.]
Comprobarlo un padre quiso
y asaltó, sin previo aviso,
a su hija de quince años,
que, con modales huraños,
con evidente impaciencia,
con tono de displicencia
y prostibulario atuendo,
así le fue respondiendo:
-¿Cuándo vivió Alfonso Sexto?
-No está en mi libro de texto.
-¿Y está Felipe Segundo?

-A ese siempre lo confundo.
-¿Y doña Juana la Loca?
-En este curso no toca.
-Dí algún monarca absoluto.
-No se da eso en mi instituto.
-¿Y cuándo se perdió Cuba?
-Esta... ¡tiene mala uva!
-Pues dí un pintor español.
-Eso no entra en el control.
-¿No sabes quién fue Picasso?
-No. De esas cosas, yo paso.
-¿Cuándo acabó la Edad Media?
-Pues vendrá en la Enciclopedia.
-¿Y las Navas de Tolosa?
-¡Me preguntas cada cosa...!
-¿Y qué fue la Reconquista?
-Si me dieras una pista...
-¿A qué equivalen mil gramos?
-¡Pero si eso no lo damos!
-¿Qué son los número primos?
-Eso tampoco lo dimos.
-¿La ecuación de primer grado?
-Pues tampoco la hemos dado.
-¿Y sabes mucho latín?
-¡Lo dices con retintín...!
-Y tampoco darás griego
-Se escribe raro, me niego.
-¿Quién fue Ortega y Gasset?
-Lo miraré en internet.
-¿No estudias filosofía?
-¡Para qué me serviría!
-¿Y has dado Literatura?
-No sé... No estoy muy segura.
-¿Quién compuso «La Odisea»?
-No tengo ni zorra idea.
-¿En qué obra sale Calisto?
-No, papá, eso no lo he visto.
-¿Y Gonzalo de Berceo?
-No viene en el libro, creo.
-¿Y Calderón de la Barca?
-¡Huy, papi, no me seas carca!
-¿Clarín, Baroja, Unamuno...?
-Pues no me suena ninguno.
-¿Algún autor del Barroco?
-De eso sé bastante poco.
-¿Quién fue el Manco de Lepanto?
-Papá, no preguntes tanto.
-Pero, ¿no leéis a Cervantes?
-¡A ese lo leerías antes...!
-Lo tuyo, hija, es deplorable...
-Pues he sacado notable.
-Y de ciencias, ¿sabes algo?
-Me voy, que esta noche salgo.

-Pero, entonces, tú ¿qué sabes?
-¡No me esperéis; tengo llaves!
Y el padre quedó perplejo:
al mirarse en el espejo
se notó cara de idiota.
Musitó una palabrota
y fue a meterse en la cama.
Así acaba este epigrama.

FRANÇOIS-MARIE AROUET, VOLTAIRE, A MADAME DE CHÂTELET

À Madame de Châtelet

Si vous voulez que j'aime encore,
Rendez-moi l'âge des amours ;
Au crépuscule de mes jours
Rejoignez, s'il se peut, l'aurore.

Des beaux lieux où le dieu du vin
Avec l'Amour tient son empire,
Le Temps, qui me prend par la main,
M'avertit que je me retire.

De son inflexible rigueur
Tirons au moins quelque avantage.
Qui n'a pas l'esprit de son âge,
De son âge a tout le malheur.

Laissons à la belle jeunesse
Ses folâtres emportements.
Nous ne vivons que deux moments :
Qu'il en soit un pour la sagesse.

Quoi ! pour toujours vous me fuyez,
Tendresse, illusion, folie,
Dons du ciel, qui me consoliez

Des amertumes de la vie !

On meurt deux fois, je le vois bien :
Cesser d'aimer et d'être aimable,
C'est une mort insupportable ;
Cesser de vivre, ce n'est rien. "

Ainsi je déplorais la perte
Des erreurs de mes premiers ans ;
Et mon âme, aux désirs ouverte,
Regrettait ses égarements.

Du ciel alors daignant descendre,
L'Amitié vint à mon secours ;
Elle était peut-être aussi tendre,
Mais moins vive que les Amours.

Touché de sa beauté nouvelle,
Et de sa lumière éclairé,
Je la suivis; mais je pleurai
De ne pouvoir plus suivre qu'elle.

[!publi_entrearticulos]

GABRIELLE ÉMILIE LE TONNELIER BRETEUIL, MADAME DE CHÂTELET

Mme. de Châtelet (1706-1749)

(...)"Émilie había leído, estudiado y anotado las obras de los científicos de su época. Leía en latín,inglés, francés... y pedía a su librero las novedades de Inglaterra y Holanda. El periodo entre 1737 y 1739 fue de acumulación de conocimientos. Estudió las publicaciones de los académicos para poderlas evaluar, y se dio cuenta de que estaban llenas de prejuicios.
En 1737 la *Academia de Ciencias* anunció un concurso para el mejor ensayo científico sobre la naturaleza del fuego y su propagación. Ambos, Émilie y Voltaire, comenzaron a trabajar y a hacer múltiples experimentos,ponían el hierro al rojo, lo enfriaban,medían

temperaturas y pesaban. Voltaire estaba preparando un ensayo para presentarlo al concurso. Pero a las conclusiones a las que llegaban eran diferentes, así que, un mes antes de que finalizara el plazo para el concurso Émilie decidió participar también de manera independiente, trabajando en secreto, y sin poder hacer por ello apenas experimentos. Sólo lo sabía el marqués de Châtelet. El fallo del jurado no fue para ninguno de los dos sino que ganó Leonhard Euler . Como premio de consolación consiguieron la posibilidad de publicar sus trabajos.
Esta memoria sobre el fuego (Dissertation sur la nature et propagation du feu , 1744) constaba de ciento cuarenta páginas, donde mostraba sus estudios sobre los físicos anteriores. Utilizó en ella sus conocimientos sobre Leibniz, especialmente la distinción entre fenómenos y propiedades inseparables de la sustancia. Examinó las propiedades distintivas del fuego: tender hacia lo alto, antagonismo de la pesadez, igualmente repartido por todas partes, incapaz de un reposo absoluto... decidió que era un ser especial, ni espíritu, ni materia, pero no pudo explicar el origen del fuego. En la segunda parte trató las leyes de la propagación del fuego para lo que tuvo en cuenta los principios leibnizianos de las fuerzas vivas. En esta obra había dos ideas profundas, obtenidas sólo por la reflexión, sin experimentos: tenía razón al atribuir a la luz y al calor una causa común, y que los rayos de distintos colores no proporcionan el mismo grado de calor. Fue su primera publicación, el primer paso al reconocimiento público de su valía. Se afirma que su trabajo era adelantado para su época.
Escribió *Las instituciones de la física*, obra en tres volúmenes publicada en 1740 que contiene uno de los capítulos más interesantes sobre cálculo infinitesimal, y que fue escrita para que su hijo pudiese comprender la física. No existía ningún libro en francés de física que pudiera servir para instruir a los jóvenes, y consideraba que era una disciplina indispensable para comprender el mundo. En el prólogo, dirigiéndose a su hijo, comentaba las razones que la habían llevado a escribir el libro, y donde mostraba su pasión por el conocimiento y el estudio, que intentaba transmitir a su hijo, a la vez que criticaba la ignorancia, tan común entre las gentes de rango.
En general era un libro fiel a la física newtoniana, pero la filosofía puramente científica y materialista de Newton no terminaba de convencerla y reescribió los primeros capítulos acercándose a la metafísica de Leibniz , explicándola con profundidad y claridad, ya que consideraba, con una visión impropia de su época, que ésta podía conjugarse con la física newtoniana. La marquesa de Châtelet estudió a Descartes , luego a Leibniz y por fín a Newton. Convencida de muchas de las ideas de Descartes, Leibniz y Newton escribió su libro intentando explicarlo todo mediante el razonamiento cartesiano. La idea de que la Ciencia debía basarse en la Metafísica, era de Descartes, pero Mme. de Châtelet se mostraba en contra de los remolinos y el éter de los cartesianos. Admiraba las fuerzas vivas de Leibniz, y sin embargo no comulgaba con las mónadas de las teorías de éste. Defendía la teoría de la atracción universal de Newton, y sin embargo no creía como él que Dios, como relojero, tuviera de vez en cuando que necesitar actuar en el universo, dando cuerda a los relojes. Así supo aunar en lo principal las teorías de los tres grandes sabios, y sin embargo estaba en contra de todas las corrientes, porque siempre encontraba algo en sus teorías con lo que no estaba de acuerdo.
Mientras que sus contemporáneos varones estaban cada uno a favor de sólo uno de estos sabios y en contra de los otros dos, ella fue la primera en ver lo positivo de cada uno de ellos e intentar construir una teoría unificada. Discutió, escribió, polemizó, estuvo en el ojo del huracán y, sin embargo, la Historia ha tenido tendencia a olvidar sus aportaciones.
Escribió también un interesante *Discurso sobre la felicidad* , en el que opinaba que la felicidad se conseguía con buena salud, los privilegios de riqueza y posición y también con el estudio, marcándose metas y luchando por ellas. Escribió que el amor al estudio era más necesario para la felicidad de las mujeres, ya que era una pasión que hace que la felicidad dependa únicamente de cada persona, *"¡quien dice sabio, dice feliz!"*.

Hacia 1745 comenzó a traducir los *Philosophiae Naturalis Principia Mathematica* de Newton del latín al francés, con extensos y válidos comentarios y suplementos que facilitaban mucho la comprensión. Durante 1747 estuvo corrigiendo las pruebas de la traducción, y redactando los *Comentarios*. Gracias a este trabajo se pudo leer en Francia esa obra durante dos siglos, lo que hizo avanzar la Ciencia.
Los *Principia* de Newton era una obra difícil, llena de figuras y demostraciones geométricas, por lo que, para traducirla, era preciso haber estudiado geometría. Newton enunció las famosas leyes de la gravitación universal con lo que dotó de un nuevo paradigma a la Ciencia.
Los *Principia* constan de tres libros. Están escritos en latín, quizás para que sólo estuvieran al alcance de personas con buena formación. En el libro primero se enuncian las tres leyes fundamentales de la dinámica, siguiendo a Kepler y a Galileo, y se define fuerza centrífuga y masa. El libro segundo contiene un interesante trabajo sobre cálculo diferencial y trata del movimiento de los fluidos. En el libro tercero se enuncia la ley de Gravitación Universal.
Cuando quedó embarazada, el trabajo la distraía de sus preocupaciones. Llevaba tres años traduciendo y comentando los *Principia* de Newton. Este escrito era para ella precioso y esencial. De él iba a depender su fama futura. Quería tenerlo terminado antes del parto, y quería hacerlo bien. No tenía tiempo que perder. Cuando murió en 1749 ya estaba terminado. Su traducción sobre los *Principia* de Newton se publicó finalmente en 1759, con un elogioso prefacio de Voltaire. Dicho libro ha continuado reimprimiéndose hasta la actualidad siendo la única traducción al francés de los *Principia*.
Los trabajos de Newton y Leibniz resultaron enormemente difíciles de entender para sus contemporáneos, más de uno los acusó de ser más misteriosos que esclarecedores. Por eso, es necesario resaltar la importancia de aquellas personas, que como Émilie de Breteuil, marquesa de Châtelet, se ocuparon de estudiarlos y de entenderlos, para divulgarlos entre sus coetáneos. Émilie estudió primeramente a Leibniz, tradujo después los *Principia* de Newton del latín al francés, y en sus salones los intelectuales de la época discutían sobre las obras de estos autores. Ya en su obra *Las Instituciones de la física* mostraba una voluntad de síntesis entre los trabajos de ambos autores. Tengamos en cuenta que muchas de las grandes aportaciones han sido, en ocasiones, más conocidas a través de recopilaciones y traducciones que por las obras originales de los propios autores.
Comentemos el escándalo que supuso llevar a Francia entre 1730 y 1740 las teorías de Newton por Mme. de Châtelet y sus amigos. La teoría de la gravitación se oponía a la teoría del gran sabio francés Descartes. Implicaba una visión de la naturaleza y una concepción de la ciencia radicalmente contrarias. Los cartesianos: Cassini, Mairan, Réaumur rehusaban reconocer que la Tierra era achatada por los polos a pesar de las pruebas aportadas."

Fragmento del artículo de María Molero Aparicio y Adela Salvador Alcaide, publicado en Historia de las Matemáticas : *Biografía de Madame de Châtelet*

"Algunos sabían que este apellido Breteuil era el de una dama sabia del siglo XVIII, de Gabrielle Émilie Le Tonnelier, la célebre Mme. de Châtelet, amiga de Voltaire , y para quien el poeta de *La Enriada* escribió una composición en verso titulada "El amor", admirable por muchos conceptos; pero en la casa de la tía de Hortensia no se podía hablar de esto.
Hubiera sido de lo más impertinente y desagradable mentar a aquella señora impía y libertina"

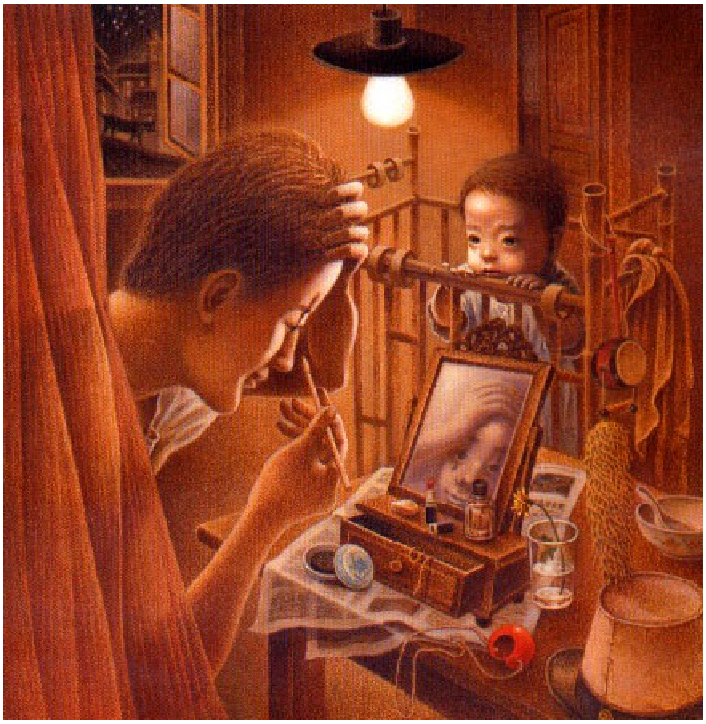
EMOTIVOS TEXTOS RECITADOS POR NIÑOS



Sé que no es el momento idóneo para desmitificar la leyenda de bondad y sinceridad que se atribuye a la niñez, y que no debiera declararme defensora a ultranza del aborto libre y gratuito hasta los dieciocho años del feto, cuando sea evidente que no ha superado ese estadio para convertirse en lo que la Conferencia Episcopal llama "personas humanas". Esta aparente redundancia, que provoca tantas sonrisicas en sus detractores, es un diamante conceptual pulido y tallado del que se infiere que no todas las personas pertenecen a la raza humana. Y menos que nadie, los niños cuando son la caricatura grotesca del adulto que los adoctrina.
Y para muestra, tres botones:
Carmencita Franco Polo a los nueve años enviando un saludo fraternal a los niños del mundo, una niña chavista de siete años reivindica la revolución bolivariana, y un niño evangelista de cinco años predica sobre la teoría de la evolución.
Los sentimientos *prêt à porter* de los que se dejan conmover por la simiesca gracia imitativa de los niños, y los jueces que no los destierran, con prohibición de acercarse a menos de un kilómetro de zona habitada y civilizada, son los responsables de que el mundo no sea un lugar acogedor y habitable para los adultos medianamente sensibles.

Comentarios:

Autor: carlos martinez

Mira que coincidencia, yo también trato en mi última entrada de algo de nenes y la madre que parió algunos. Un nene mal educado es un desastre, pero si encima está el presunto padre delante y le ríe la gracia la tragedia está asegurada. Luego a ver quien para eso.

HASTA EL COLODRILLO DE EMBLEMÁTICO, PARAFERNALIA, Y PATÉTICO

Periódicamente surgen idiotismos léxicos que se ponen de moda hurtando el verdadero significado de las palabras. No hay manera de evitar toparse con la palabra "emblemático", usada al buen tuntún, cuando sería más adecuado sustituirla por representativo, significativo, paradigmático…

Por ejemplo:

Revista Istmo:
"A partir del intento de Daysi Zamora y *La mujer en la poesía nicaragüense* se puede problematizar un poco la agenda de los textos emblemáticos, si se reconoce la necesidad de pactar su canonicidad, y sobre todo, recorrer con anteojeras más científicas el corpus de las producciones, dado el urgente reconocimiento práctico de la pluriculturalidad.

United Press International:

"Un emblemático y tristemente célebre centro de torturas en la pasada dictadura pasará a manos de la organización Madres de Plaza de Mayo."

Levante-El Mercantil Valenciano

"El Centro Superior de Investigaciones Científicas -CSIC- ha visitado seis edificios en Valencia dónde ubicar la sede oficial y emblemática de esta entidad en la ciudad."

Universidad de Chile

"Cerca de 800 alumnos de tercero y cuarto medio recorrieron con curiosidad y entusiasmo los quince stand ubicados en uno de los patios del emblemático establecimiento que desde 1929 se encuentra en calle San Diego 1547."

(…)"Bastián Mellado, encargado de los monitores de la feria explicó que se entregó muchísimo material y que existía bastante interés por parte de los alumnos de informase y conocer antecedentes de la universidad: "Lo bueno de venir a colegios emblemáticos como el Liceo Manuel Barros Borgoño es que todos conviven en un mismo universo".

PM farma

"La iniciativa ha resultado un éxito. Más de 150 edificios en todo el mundo se han sumado al 'Desafío de los Monumentos' de la Federación Internacional de Diabetes. Entre ellos, algunos tan emblemáticos como el Empire State Building, de Nueva York (EEUU), el London Eye, de Londres (Reino Unido), o la Torre de Tokio (Japón)."

> **Diccionario de autoridades, 1732**
> Emblema, S. amb. En el significado literal vale entreteximiento o enlazamiento de diferentes piedrecitas o esmaltes de varios colores, que el latino llama *opus vermiculatum*. En Castellano por emblema se entiende un cierto género de Geroglífico, symbolo o empressa, en que se representa alguna figura o cuerpo de cualquier género o especie que sea, al pie de la cual se escriben unos versos, en que se declara el concepto o intento que se encierra en ella; y casi siempre es de cosas morales y graves. Es voz griega. Lat. *emblema, -tis.*

Diccionario RAE 1803

EMBLEMA. s. m. Geroglífico, símbolo, ó empresa, en que se representa alguna figura y al pie de ella se escribe algun verso, ó lema que declara el concepto, ó moralidad que encierra. Hállase tambien usado como femenino. *Emblema.*

Dicccionario RAE, 1884

Emblema. (Del gr. ἔμϐλημα; de ἐμϐάλλω, colocar en ó sobre.) m. Jeroglífico, símbolo ó empresa en que se representa alguna figura, y al pie de ella se escribe algún verso ó lema, que declara el concepto ó moralidad que encierra. Ú. t. c. f.‖Cualquiera cosa que es figura ó representación simbólica de otra.

Emblemáticamente. adv. m. De manera emblemática; por medio de emblemas.

Emblemático, ca. adj. Perteneciente ó relativo al emblema, ó que lo incluye.

Diccionario RAE, 2006
emblema (Del lat. emblēma, y este del gr. ἔμβλημα, adorno superpuesto).
1. m. Jeroglífico, símbolo o empresa en que se representa alguna figura, al pie de la cual se escribe algún verso o lema que declara el concepto o moralidad que encierra. U. t. c. f.
2. m. Cosa que es representación simbólica de otra.
3. m. Bol. bandera (‖ tela que se emplea como enseña).
emblemático, ca.
1. adj. Perteneciente o relativo al emblema, o que lo incluye.
2. adj. Significativo, representativo. *Un edificio emblemático.*

Otra palabra utilizada a tontas y a locas es "parafernalia" y que, como explica José María Izquierdo Rojo :"(...) hace veinte o treinta años no la usaban, en el lenguaje habitual, ni los abogados, pues resultaba muy técnica y hasta un poco pedante. Etimologicamente la palabra proviene del griego, y su ascendencia parece clara, pues *"para"* en griego significa "junto a" y *"ferné"* es la dote que una mujer lleva al matrimonio; es decir que parafernalia es lo que va junto a la dote. Si Vds. buscan su significado en un diccionario antiguo podrán leer que la parafernalia era el conjunto de bienes que una mujer aportaba al matrimonio fuera de la dote (bienes parafernales).

Es decir, que la dote era lo fundamental, lo nuclear, y —además de esa dote—, la mujer podía aportar otras cosas, probablemente muchas y variadas, que en la mayoría de los casos serían de menor importancia, y que la esposa llevaba por añadidura. La palabra va tomando así un sentido de accesorio, de algo que acompaña o rodea a lo fundamental, de conjunto de muchas y variadas cosas que giran entorno de algo más importante, que es el sentido que ha ido tomando con los años, de modo que si miran el significado de la palabra en un diccionario moderno, pueden leer: *"conjunto de ritos o de cosas que rodean determinados actos o ceremonias"*, que es el sentido que se le da hoy día, especialmente cuando esos ritos o cosas son numerosos, variados y aparatosos, que es una nueva connotación que está tomando la palabreja viajera.

Quizá por ello parafernalia se usa hoy día para designar algo complicado, aparatoso, alambicado, quizá ruidoso o molesto, que acompaña a algún acto o situación determinada. Estamos bastante lejos de lo que la mujer lleva al matrimonio además de la dote."

Por ejemplo:

Cultura Canaria:

"Muchas son las asociaciones que el término "parafernalia" nos puede traer a la mente: caos, barullo, ajetreo y artificio, entre otras tantas sensaciones. Pero, si miramos bien en el fondo de dicho término, podemos encontrar que todos los esfuerzos de cualquier tipo de parafernalia van dirigidos a lograr diversión."

Departamento de Justicia de EE UU:

El término "parafernalia de drogas" se refiere a todo el equipamiento que se usa para producir, ocultar, y consumir drogas ilícitas. Incluye, sin limitarse a ellos, objetos como *bongs*, *roach clips* (pinzas para cigarrillos de marihuana), cucharillas miniaturizadas, y diversos tipos de pipas.

De conformidad con la ley federal, el término "parafernalia de drogas" significa "todo equipo, producto o material de cualquier índole principalmente destinado o reservado para ser usado en la fabricación, formulación, conversión, encubrimiento, producción, procesamiento, preparación, inyección, ingestión, inhalación, o introducción en el cuerpo humano, por cualquier otro método, de una sustancia controlada."

Diccionario RAE, 1927

PARAFERNALES. adj. pl. *For.* Dícese de los bienes que lleva la mujer al matrimonio fuera de la dote y los que adquiere durante él por título lucrativo, como herencia o donación.

Diccionario RAE, 1989

parafernales. adj. pl. *Der.* Dícese de los bienes que lleva la mujer al matrimonio fuera de la dote y los que adquiere durante él por título lucrativo, como herencia o donación.

[**parafernalia.** f. Conjunto de ritos o de instrumentos que rodean determinados actos o ceremonias.

Diccionario RAE, 2006
Bienes parafernales. (Del pl. gr. παράφερνα).
1. m. pl. Der. Los propios de la mujer en el matrimonio, por aportación o por adquisición posterior.

Parafernalia.
1. f. Conjunto de usos habituales en determinados actos o ceremonias, y de objetos que en ellos se emplean. U. m. en sent. irón.

Y qué decir del uso de "patético" para significar lo que es grotesco, penoso, lastimoso, irrisorio, despreciable...

Por ejemplo:
Radio Universidad de Chile

"Patético Joaquín Lavín, cuando acusa al Gobierno de tratar de sacar un "empate" en la utilización malsana del poder.(…) Patético este ambiente de corrupción generalizada que se intenta crear alrededor del gobierno del Presidente Ricardo Lagos. (…) Patético que el simpático y eficiente ministro Puccio se haya enredado al defender el derecho al trabajo. Y más patético aún, que se deje manosear por quienes siendo defensores ultranza de la libertad de empresa, quieran crucificarlo por tener una, Aysan, que entregaba asesoría Codelco."

La Vanguardia. Agencia EFE

"El secretario ejecutivo de Economía y Empleo del PP, Miguel Arias Cañete, calificó hoy de "patético" el Plan de Vivienda anunciado ayer por el presidente del Gobierno, José Luis Rodríguez Zapatero, por tratarse de una medida "copiada", y afirmó que la ministra de Vivienda, Carme Chacón, debería dimitir."

Hispavista Noticias

"La actriz y presentadora Eva Hache, del programa 'Noche Hache', tildó hoy de "patético" la decisión adoptada por la Academia del Cine Español de dejar fuera de la ceremonia de entrega de los Premios Goya el apartado de cortometrajes, para que no sea un acto muy pesado."

Extremadura al dia

"El presidente del Partido Popular de Extremadura, Carlos Floriano, ha calificado de "patético" a Rodríguez Ibarra después de sus últimas declaraciones públicas hacia el Partido Popular, realizadas esta mañana en el IV Foro Institucional Joven de JSE, en Mérida, en las que el "estrambote y las palabras mal sonantes han sido su única herramienta para intentar seguir haciéndose notar después de su paso a la reserva."

Blogs El Pais

"Lo patético (o más bien lo mezquino en el ser humano) en la obra de Gervais es casi el ingrediente clave, el toque maestro o la firma del autor."

Breve Diccionario Etimológico de la Lengua Castellana de Joan Corominas:
Patético: Pathetikos, de epathon ("sufrí o experimenté un sentimiento"). Epathon, tiene el mismo origen que *pati*, de donde viene la palabra padecer.

Diccionario RAE, 2006
patético, ca. (Del lat. pathetĭcus, y este del gr. παθητικός, que impresiona, sensible).1. adj. Que es capaz de mover y agitar el ánimo

infundiéndole afectos vehementes, y con particularidad dolor, tristeza o melancolía.

Mucho me temo que esos estultos que han recalado en los últimos años en la RAE han añadido o tienen previsto añadir como nuevas acepciones estos y otros idiotismos que surgen y se propagan por desconocimiento del idioma, mientras eliminan miles de palabras irremplazables que forman parte de nuestro acervo cultural, y sin las cuales será imposible comprender las obras que no sean las de los escritores más vendidos de este siglo, caracterizados por su pobreza conceptual.

POLÉMICA Y CRÍTICA

Aunque en el libro de Indalecio Liévano-Aguirre, *"Grandes conflictos de nuestra historia"*(1) se desenmascara la hipocresía de la "alta clase" social de los voceros de nuestra independencia, de un Camilo Torres y de quienes, después de su triunfo, abjuraron de los principios igualitarios que invocaron para justificar la posesión de los cargos de los españoles; y aunque en el "cuadro de costumbres" *Las tres tazas* , de José-María Vergara y Vergara, se ironizó la simulación que había acunado el "patriciado" colombiano, con su correspondiente fervor servil por los extranjeros; y aunque Jaime Jaramillo Uribe(2) recuerda, en uno de sus ensayos sobre *"Historia social de Colombia"* que el Marqués de San Jorge perdió su título -comprado, sin duda- porque no pagó los derechos correspondientes; y aunque la historia colombiana ha puesto en la picota esa "aristocracia" hasta el punto de que hoy es anacrónico ocuparse con su terca agonía: pese a eso, cuando se critica a esa clase, la réplica a la crítica es un depravado *argumentum ad hominem*: el que la hace, es un "resentido". No es nuevo el argumento. Parece provenir del reinado sociofilosófico de Germán Arciniegas, del más severo crítico de Hegel, a quien nunca leyó en su lengua madre, y de su anticomunismo gringo. Para sus epígonos, la crítica a esa clase "sin clase" está, además, imbuida de marxismo. No es improbable que los feligreses de ese reinado anacrónico ignoren el nombre de Max Weber, del fundador de la moderna sociología comprensiva que se nutrió de la lectura crítica de Marx. No sería improbable que cuando lean una de sus obras como el famoso trabajo *"La ética protestante y el espíritu del capitalismo"* y perciban su acerada crítica al capitalismo, lo declaren comunista y "resentido".

¿Qué significa esa argumentación, por así llamarla, pomposamente vacía y mendicante? ¿Defiende -o pretende defender- un estado social y político que ha llevado a Colombia al borde de su paulatina desintegración? ¿Quién lo defiende ha cerrado los ojos y los oídos para no ver y oír el largo proceso iniciado ya a comienzos del siglo XX y agudizado en 1948? ¿Y quienes esos hacen, no quieren tener en cuenta que en todo Estado y Nación hay una clase que dirige o maldirige a su sociedad? ¿Y creen, quizá, que de nuestros males es culpable la mayoría de la población, de los humillados y empobrecidos y no de la tal clase? Es indudablemente seguro que los epígonos del máximo crítico de la filosofía del idealismo alemán (su pecado mortal: haber conducido a Marx) todavía no saben que determinados conceptos cambian y que para usarlos con la necesaria precisión y honradez intelectual es indispensable conocer esos matices y usos. Una

empleada del servicio, un camarero, chofer de taxi, una ministra de educación y hasta un rimbombante diplomático pueden y, sin duda, suelen utilizar el vocablo "resentido" y "resentimiento" en su acepción vulgar. Pero un intelectual, con majestuosa formación filosófica, tiene que atenerse a la significación que tiene en la ética y en la sociología, y que después de Nietzsche y Max Scheler ocupa a esas ciencias. El filósofo Strawson, por ejemplo, encuentra que el resentimiento es una *"permanente sensación e indignación sobre una herida moral"*. Y explicita: *"Así, el resentimiento es una reacción contra la injuria y la indiferencia"*. La injuria que ha hecho por indiferencia la llamada clase alta a Colombia tiene la inevitable y justa respuesta: el "resentimiento".
En Colombia se ha extendido una actitud anticrítica, cobardemente neutral. ¿Significa esto que los crímenes con los que se castiga a los periodistas por sus informaciones y críticas y a los políticos heroicamente disconformes se han convertido en una permanente manera de sofocación, que afecta los demás ámbitos de la vida cultural? La crítica literaria ha tenido en Colombia pocas figuras destacadas. Como en casi todo el mundo hispánico, la crítica bibliográfica es, en gran parte, apología de clanes. Cuando pretende ser independiente, suele reducirse a expresar la opinión o la ocurrencia del crítico sobre conceptos e interpretaciones que no concuerdan con sus preferencias, pero sin haberlos comprendido cabalmente y sin fundamentar esas ocurrencias. Como en la vida intelectual, se recurre a corrientes y teorías -en el mejor de los casos- que no se han sometido a la crítica de la razón, que no se han asimilado. Esta recepción no es creadora sino remedo. De ese modo, no se orienta ni se discierne, sino se transmite un estilo dogmático de pensamiento. Algunas veces, el dogmatismo encubre una acumulación de aversiones personales -envidias- que se satisfacen con el efecto de lo que Ortega y Gasset -copiándolo, como siempre, de Max Scheler - llama el *"rencor"* español y Unamuno *"el mal nacional español: la envidia"*. Sobre ese mal nacional, el rencor, dice Ortega: *"El rencor es una emanación de la conciencia de inferioridad. Es la supresión imaginaria de quien no podemos con nuestras propias fuerzas suprimir. Lleva en nuestra fantasía aquel por quien sentimos rencor, el aspecto lívido de un cadáver: lo hemos matado, aniquilado con la intención. Y luego, al hallarlo en la realidad firme y tranquilo, nos parece un muerto indócil..."* Es evidente que en el ámbito de la crítica bibliográfica es preciso distinguir entre las "reseñas" y las "valoraciones" de intención crítica. En término medio, las reseñas de libros de historia por historiadores son informativas, correctivas, cuando es el caso, profesionalmente fundadas. El objeto no facilita la expresión envidiosa o la del que se esfuerza en su afán de figuración. Las reseñas con intención de valoración crítica de este tipo se caracterizan por la abundancia, objetivamente innecesaria, de referencias traídas por los pelos aumentadas con un aparato de notas a pie de página, que pretenden certificar erudición. Fomenta lo que un crítico peruano ejemplar llamó *"terrorismo bibliográfico"*, que es una manera de equilibrar aparentemente el vacío intelectual. La causa de estas inmensas lagunas se encuentra, de manera inmediata, en la maleducación universitaria. La enseñanza de la literatura en las universidades tropieza en las mejores, no en las universidades-garaje, con varios problemas: los principiantes no han sido adecuadamente formados en el bachillerato; la Universidad comienza con un *minus*; la Universidad no tiene la infraestructura como hemerotecas con revistas internacionales y de literatura comparada, bibliotecas con obras clásicas en sus lenguas de las corrientes actuales de la historia literaria. Desconocimiento ya desde el bachillerato de las lenguas europeas y, para la facultad de Filosofía, de las lenguas clásicas. Ausencia de interdisciplinariedad (con filosofía, sociología, ciencia política). El horizonte de la investigación, fundamento de la formación, queda reducido muy considerablemente. El nivel de la enseñanza es poco más alto que el del bachillerato. Sin estos presupuestos, la creación de instrumentos para interpretar fructíferamente nuestras letras, se satisface con la aceptación acrítica de las teorías de moda, casi siempre las antepenúltimas en traducciones defectuosas. El conocimiento y significación de la literatura para

comprender a los ancestros, a sus aspiraciones y saber situar el presente es un *desideratum* que, al no ser satisfecho, obstaculiza una de las misiones de la educación literaria, en particular: saber formar un juicio propio, ser individuo y por lo tanto saber ser libre.
Esta desolación influye negativamente en dos ámbitos de la ciencia y vida literarias: la polémica y la historia literaria. La polémica es, según el concepto griego del que desciende, esto es, *polemos*, guerra. Guerra literaria o intelectual que se diferencia de la guerra política, en la que se ataca la persona que representa determinados intereses, disfrazados de programa. En la polémica intelectual, ésta es homónima de la refutación. *"La verdadera refutación* -escribió Hegel en su Lógica- *debe atender y entrar en la fuerza del contrincante y situarse en el ámbito de su fortaleza. Atacarlo fuera de él y mantener razón donde él no está, no fomenta el asunto."*
En Colombia, la polémica se entiende como un ataque con las únicas reglas de la envidia. No se atiende al contrincante ni se lo sabe o quiere comprender. Es el cadáver indócil del que se cortan retazos para demostrar su incompetencia. Incapaces, por deformación escolar, de comprender contextos, su historia de la literatura se compone de ídolos intocables. Es un museo, no una voz y testimonio del pasado, que, al desmitologizarlo, nos permite descifrar los vacíos y simulaciones que se han continuado. Es comprensible que para esa concepción pétrea de la vida intelectual, la desmitologización de quienes la nutren y fomentan es una blasfemia imperdonable. Poner en tela de juicio a Estanislao Zuleta, quien pontificó sobre Nietzsche, Marx y Freud, sin saber alemán, es un acto que despierta indignación. La interpretación de la tragedia griega de Octavio Paz, mal copiada de Alfonso Reyes y de Werner Jaeger, la interpretación del romanticismo alemán, del mismo Paz, fundada en un texto francés para el estudio de bachillerato, la de *"la época de la imagen del mundo"* de Heidegger, copiada de su traducción española sin indicación del autor, por el mismo Paz; la permanente anunciación de un próximo libro definitivo sobre diversos temas que nunca apareció, la exposición de un pensamiento de Aristóteles, robada de una obra clásica sobre el Estagirita, pero desconocida en España, que Ortega cita de manera tácticamente imprecisa. Todo esto produce indignación porque por su prestigio consagran la carencia de honradez intelectual como medio de figuración, y transmiten este engaño como la norma del trabajo intelectual. A quienes se enfurecen y enfurecieron por los cuestionamientos críticos a estos ídolos, cabe preguntar ¿si obedecen a una tendencia de la política cultural y universitaria de Colombia, que consiste en mantener el *status quo* mediocre, gracias al que reinan y por tanto condenar todo lo que pueda suscitar una transformación necesaria, para dar a la juventud los medios de su progreso personal y de Colombia, es decir, de lograr que el país desarrolle todas sus inmensas riquezas humanas y se ponga en capacidad de dialogar de tú a tú con el complejo mundo contemporáneo?
Jaime Jaramillo-Uribe aseguró que la nota característica de Colombia es la *"aurea mediocritas"*. Con mayor acierto es *"mediocritas"* solamente. Eso fue, sin duda, el país gobernado por simuladores. No tiene por qué seguir siéndolo. El mundo se ha introducido en Colombia. El extranjero y sus ventajas universitarias son accesibles a estudiantes, el conocimiento de idiomas se normaliza, y es de esperar que cuando regresen a nuestro país no les cierren las puertas y los obliguen a engrosar la vergonzosa huida de cerebros que los pertinaces mantenedores del *status quo* mediocre, y ya delincuente, hacen pagar con millones de dólares (eso cuesta la huida) al sangrante país, al campamento de la cizaña, de las envidias, de la consecuente mala fe que esos mediocres guardan con fanático celo.

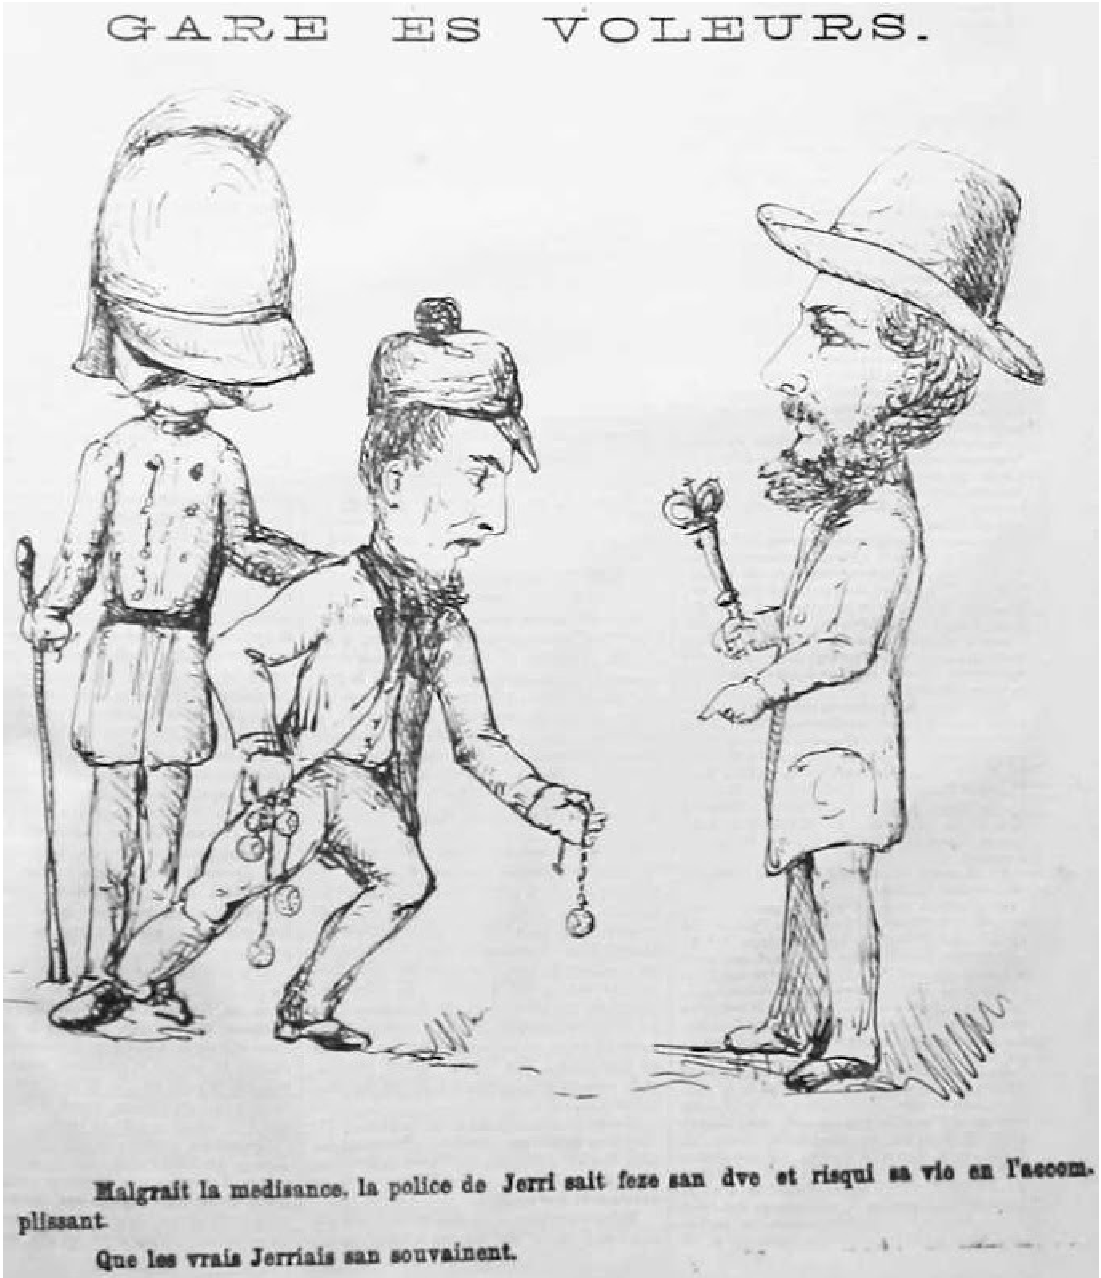
DENUNCIAN A LA SGAE ANTE LA FISCALÍA CONTRA LA CORRUPCIÓN Y LA CRIMINALIDAD ORGANIZADA



20/11/2007 . La Asociación de Usuarios de Internet (AUI), Asociación de Internautas (AI), Asociación Española de Pequeñas y Medianas Empresas de Informática y Nuevas Tecnologías (APEMIT) y, la Asociación Española de Hosteleros Víctimas del Canon (VACHE), todos ellos miembros de la plataforma todoscontraelcanon.es, obligados por la

Ley de Enjuiciamiento Criminal (art. 264), han puesto en conocimiento de la Fiscalía Anticorrupción los hechos publicados en diferentes medios de comunicación, sobre supuestas ilicitudes cometidas en la gestión económica de los recursos de la Sociedad General de Autores y Editores (SGAE).

La Ley de Enjuiciamiento Criminal exige que quien, por cualquier medio, *"tuviere conocimiento de la perpetración de algún delito de los que deben perseguirse de oficio, deberá denunciarlo al Ministerio fiscal, al Tribunal competente o al Juez de instrucción o municipal, o funcionario de policía, sin que se entienda obligado por esto a probar los hechos denunciados ni a formalizar querella".*

Texto Completo Denuncia:

A raíz de la publicación de recientes reportajes periodísticos en la prensa de tirada nacional, se ha puesto de relieve que en el seno de la Junta Directiva de la SGAE, existe una actividad económica con aparentes tintes delictivos.

La prensa viene advirtiendo desde hace días de que, supuestamente, el reparto de las múltiples y variadas clases de recaudaciones de la SGAE (incluido el canon digital), se realiza en gran medida de forma ilegal entre sus filiales, y no entre sus socios, como ordena el artículo 154 de la LPI. Los directivos de la SGE vienen participando en la creación y gestión de empresas filiales de la SGAE y, podrían estar envueltos en una trama societaria supuestamente utilizada para la gestión fraudulenta de sus fondos.

Según las noticias publicadas, las cantidades recaudadas en concepto de gestión de derechos de autor se han estado invirtiendo en actividades de lucro propio para los directivos de la SGAE, bien con su participación directa, bien con participaciones indirectas que lo favorecieron o, lo ignoraron deliberadamente.

A pesar de que la Ley dice que *"Las entidades de gestión deberán dedicar a las actividades y servicios a que se refiere el apartado anterior, por partes iguales, el porcentaje de la remuneración compensatoria prevista en el artículo 25 de esta Ley, que reglamentariamente se determine"*, del entramado societario de la SGAE parece dibujarse que estas actividades y servicios, se han estado contratando y remunerando de forma directa a sus propios directivos, a través de las empresas filiales que precisamente y al efecto, éstos han creado o dirigen.

A título de ejemplo, uno de los artículos periodísticos referidos asegura que los resultados económicos de una filial de la SGAE, Iberautor, *"debe su facturación (que ha rondado entre 2002 y 2005 los 10 millones de euros anuales) fundamentalmente a SGAE, que aportó el 93% del total en 2004 y el 84% en 2005. La factura de 2005 equivale al 3,4% de todo el dinero recaudado ese año por SGAE como derechos. No se especifican las actividades de Iberautor porque, aclaran, eso puede "provocar perjuicios" a la sociedad. En el caso de SDAE, el 99% de su facturación la obtiene de SGAE".*

De ser ciertas estas cuentas, se podría justificar que la actividad de la entidad denunciada no cumple el mandato legal que le exige que *"El reparto de los derechos recaudados se efectuará equitativamente entre los titulares de las obras o producciones utilizadas",* pues supuestamente se estaría destinando dicha recaudación a mantener empresas privadas, empresas que además lo son de sus socios y, que además envuelven un ánimo de lucro prohibido expresamente por ley. A la luz de lo difundido por la prensa, pareciera que la SGAE ha ignorado que *"el destino del patrimonio o activo neto resultante en los supuestos de liquidación de la entidad que, en ningún caso, podrá ser objeto de reparto entre los socios".*

Todo esto se presentaría aún más injusto y grave, si tenemos en cuenta que la SGAE no deja de multiplicar los beneficios obtenidos del canon digital (dinero que obtienen directamente de los consumidores de tecnología digital). En 1999 la entidad obtuvo 2,2 millones de euros con el sistema de remuneración compensatoria y, en 2005, obtuvo 23,6 millones de euros, según las últimas cifras publicadas por la propia SGAE. En el 2008, distintas fuentes han asegurado que la SGAE recaudará 100 millones de euros por

este concepto, multiplicando por 50 la recaudación obtenida en 1999. Señala también la prensa que, *"de la recaudación de SGAE no han escapado ni Inditex, ni TVE, ni las bodas, ni lo van a hacer los móviles, por citar algunos ejemplos"* y, sin embargo, parece que dichas recaudaciones se destinan a cualquier cosa menos a cumplir con su principal obligación.
Es más, podría estar sucediendo que los únicos beneficiarios de las recaudaciones, no sólo no las estuviesen recibiendo, sino que además ni siquiera tuviesen claro que: *"La gestión de los derechos será encomendada por sus titulares (autores) a la entidad mediante contrato cuya duración no podrá ser superior a cinco años, indefinidamente renovables, ni podrá imponer como obligatoria la gestión de todas las modalidades de explotación ni la de la totalidad de la obra o producción futura"* (art. 153 de la LPI). Se podría estar realizando tanto un reparto ilegal de beneficios, como una recaudación fraudulenta, extralimitada en las competencias que legalmente atribuidas, y ello *"al considerar que algunas de las obras por las que se solicita el pago de derechos no pertenecen al repertorio de esa entidad"*. Son conocidos los casos en que se ha condenado judicialmente a la SGAE por intenta cobrar más allá de lo autorizado por los autores e incluso, más allá de esos cinco años legalmente previstos (generalmente, hasta que el autor no se opone expresamente a ello).
Considerando tales cifras y hechos, una investigación ordenada y llevada a cabo por las autoridades competentes podría concluir que el actual sistema de recaudación y gestión de beneficios económicos de la SGAE, estaría permitiendo que socios y directivos pudieran obtener beneficios millonarios a costa de los privilegios legales, de recaudación y de autogestión económica, que nuestro sistema legal proporciona a la SGAE.
Cuanto ha aparecido en los medios de comunicación, se presenta como indicios probatorios más que suficientes para poder plantear una denuncia ante la Fiscalía Anticorrupción. Todas las presunciones expuestas deben ser investigadas, por si de ello se pudiera deducir la existencia de los delitos de apropiación indebida (Arts. 252 al 254 del Código Penal), de estafa (Arts. 248 a 251 del Código Penal) e incluso de fraude de subvenciones (Artículo 308 y siguientes del Código Penal) que la SGAE hubiera recibido como ayuda para desempeñar su actividad de protección de la cultura. El posible incumplimiento de determinadas obligaciones y, el aprovechamiento personal y económico de los privilegios legales vigentes en la LPI, han llevado a nuestras asociaciones a poner de manifiesto ante la Fiscalía Anticorrupción la necesidad de aclarar el entramado societario de la SGAE, de la participación sus socios y directivos en ésta, e incluso, a poner de manifiesto la subsidiaria culpa *in vigilando* del Ministerio de Cultura, por ser el principal fiscalizador de la actividad de este tipo de sociedades.

DON PEDRO SAINZ RODRÍGUEZ

"Franco quería desprenderse de Sainz Rodríguez a causa de una intervención de doña Carmen Polo. Ésta, al trasladarse un día de Burgos a Vitoria, vio aparcado el automóvil del ministro ante una casa en la carretera y le dijo a su marido que deberían ir a comer un día allí pues si iba don Pedro -que era un reconocido gourmet- señal que se comía bien. Franco quiso saber de qué restaurante se trataba y resultó que era un burdel. Aquello al parecer le costó el puesto. A Franco lo que más le irritó fue comprobar que Sainz Rodríguez utilizaba el coche de ministro para acudir allí a sus citas. *"No iba a ir andando"*, diría don Pedro cuando se enteró".

Consejos de Pedro Saínz Rodríguez a don Juan de Borbón en 1969:
"Vuestra Majestad va a dedicar los próximos años (...) a recibir individualmente a todos los dirigentes de la oposición democrática y les va a decir: "Usted es republicano y yo lo respeto. Pero convendrá conmigo en que si ustedes tratan de proclamar la República, cuando mi hijo acceda al trono, intervendrá el ejercito y tendremos una nueva dictadura. Una dictadura que durará seis, siete o diez años y que será derribada, porque los pueblos caminan siempre hacia la libertad. Pero España sufrirá con sangre y violencia... (...) Y a cada uno de los percebes que vengan a visitarlo, dedíquele Su Majestad unos elogios. Porque el elogio, Señor, incluso la persona más inteligente, aunque no se lo trague, al menos lo paladea."
Luis María Anson: *"Don Juan"* .
Plaza Janés.

"El de Valle-Inclán era un caso típico. Desde luego ha sido la primera figura literaria de su tiempo por su valor estilístico, por su personalidad, por el criterio personal con que concebía la función del escritor y, sin embargo, era el que menos se vendía. La editorial

solía asignar a todos los escritores una mensualidad, una especie de cuenta corriente. Les daba una cantidad para poder vivir y dedicarse a escribir; al acabar el año se hacían cuentas y resultaban acreedores de la editorial o deudores, y según esta realidad financiera se renovaba el contrato en unas u otras condiciones. Yo pasé muchos apuros para conseguir que Valle-Inclán tuviese un contrato digno de su calidad literaria: siempre era la CIAP acreedora de Valle-Inclán; pero no cejé en mi empeño de mantener la cifra sin alterarla, pensando que por algún medio se podría compensar este déficit. Por fin se me ocurrió que la producción de Valle, si se publicase en una edición muy popular y eligiendo de entre ella los libros más accesibles al gran público, podría lograr grandes tiradas que compensasen aquel desvío del lector de la época, basado en que el autor se había anticipado en unos años a la evolución de la sensibilidad literaria. Cuando esa evolución se consumó, Valle-Inclán obtuvo el éxito que estamos presenciando hoy de venta de sus libros y representación de su teatro. Yo he vivido la tragedia profesional de un autor que, por ser fiel a su sensibilidad, a su credo literario, a su visión del arte, no conseguía público y, no obstante, mantenía la fe en su obra, seguro de que algún día lograría el éxito literario que sólo parcialmente consiguió en vida."

Entrevista de Ángel María de Lera a Pedro Sainz Rodríguez en 1979:
“Yo me opuse en un Consejo de Ministros a que saliese una ley de persecución de la Masonería. Y lo hice por motivos políticos. Primero, porque nosotros, para que la guerra terminase pronto, o hubiese posibilidad de una paz acordada, habíamos hecho repetidas veces declaraciones de que no se perseguiría a nadie por ideas políticas, cosa que, lamentablemente, no se hizo luego, pero se repetía constantemente que sólo serían sancionados los delitos comunes: asesinatos, robos, etc., y que nada tendrían que temer aquellas personas que no tuvieran en su contra más que el haber pertenecido a tal o cual partido político. Y yo dije en el Consejo de Ministros: Si después de tales reiteradas declaraciones sacamos una ley, sin terminar aún la guerra civil, por la que se condena a la gente con carácter retroactivo incluso a la pena de muerte, ¿cómo demonios vamos a compaginar lo uno con lo otro? Y como hay muchísimos masones en el campo contrario es tanto como asegurarles que perder la guerra será perder también la vida, y, claro, se defenderán como gato panza arriba hasta el último aliento, con lo que en vez de propiciar una posible paz a corto plazo lo que conseguiremos será exacerbar la resistencia. Me parecía una enorme torpeza política. Por otra parte, como en el mundo anglosajón la Masonería goza de gran consideración social, nuestra ley de represión causaría un efecto negativo, sería un escándalo y nos pondría frente a la opinión mayoritaria de esos países. Yo, como me conocía muy bien el problema existente entre Masonería y Catolicismo, antes de formular mi oposición a esa ley, que me parecía desde luego disparatada, fui a ver al nuncio, a pedirle su opinión en estos términos: “Usted es el representante del Papa y han sido los papas quienes han promulgado las encíclicas condenatorias de la Masonería. Pues bien, yo como católico que acepta la disciplina de Roma, ¿tengo o no derecho a oponerme a esa ley de represión de la Masonería?” Y el nuncio me contestó: “No sólo tiene usted el derecho, sino que tiene usted el deber de oponerse, porque esa ley es un disparate que a la Iglesia le parece absurda”. De manera que yo fui al Consejo de Ministros con la bendición de Su Santidad”.

Pedro Sainz Rodríguez: a propósito de la derogación de las leyes que perseguían e ilegalizaban la masonería en España.

DON JOSÉ GOYA Y MUNIAIN, DIRECTOR DE LA REAL BIBLIOTECA

"El sacerdote José Goya Muniain, director de la Real Biblioteca, hizo una lujosa edición con una traducción de *"Los comentarios"* de Cayo Julio César. Su valor literario es tal que fue publicada en 1865 en Barcelona con elogioso prólogo de Milá y Fontanals y, en 1919, en la "Colección Universal" (nº 78-80). El "De bello gallico", en castellano, reprodujo aquella antigua edición de 1878, "por ser -dice el prologuista anónimo- la mejor seguramente, tanto por su fidelidad, cuanto por la elegancia de su estilo."
Pero Goya no fue el traductor: el Padre Luengo escribe en su diario:
"El Padre Joseph Petisco tradujo "Los comentarios" de Julio César , y, habiendo llegado una copia de la traducción , que inocentemente y sin prever sus resultas dejaría hacer el autor, a las manos de don José Goya y Muniaín, que le dio luz en Madrid con su nombre propio y dedicándola al rey, y consiguió una píngüe pensión. La dicha impresión se hizo sin consentimiento y aun sin noticia del verdadero traductor de la obra de César, lo que no se puede llamar villanía y latrocinio, y dudo mucho que el señor auditor haya dado buen socorro, para lograr algún alivio en sus necesidades, al buen autor de la obra... No ha parado aquí la astucia y malignidad de los que han andado en este negocio y han llegado a apoderarse con engaños y disimulos del original del autor y echarlo al fuego, para que no haya documento auténtico con el que demostrar el plagio y latrocinio del señor auditor Goya." **" (Manuel Luengo** , "Diario, año 1878", páginas 307-308; ap. **Uriarte,** III, página 310)
"Tampoco parece ser que *"El arte poética"* de Aristóteles, en castellano, (1798) sea

suya, pues dice el Padre Uriarte que en el índice manuscrito de la Biblioteca de Salamanca hay una nota que dice: *"posteriormente a la compra de este libro, regaló otro exemplar su traductor, don Pedro Luis Blanco , como aparecerá en la carta que dirige a esta universidad el que se dice traductor, contra el nombre expreso de don José Goya Muniaín, aunque se debe creer al primero."* (**Uriarte**, I, página 35).

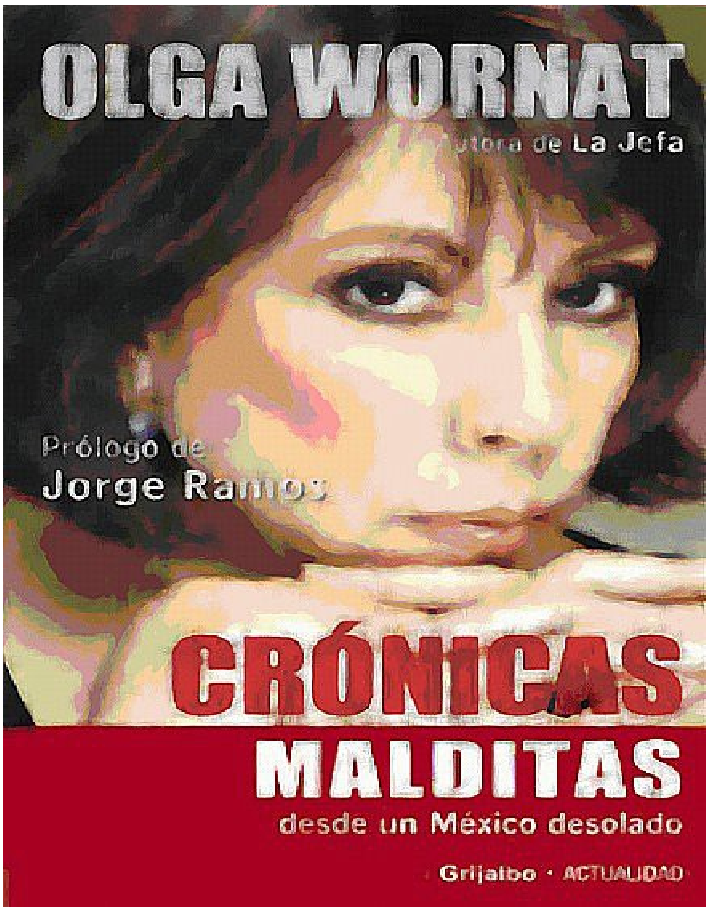
CHÁVEZ, ENTRE PERÓN Y EL CHÉ, ENTRE DIOS Y EL DIABLO



Como tenía don de mando y se daba tanta maña para atraerse la voluntad de los hombres, a cuenta de poco no había en todos los contornos más que amigos suyos, porque a los que no habían querido serlo los exterminó sin piedad, con lo que quedó la montaña en paz y sólo él dueño de ella. **Rómulo Gallegos**. *Los aventureros.*

"El fin justifica los medios" es sin duda la máxima preferida del comandante Hugo Chávez, que no le hizo asco a nada ni a nadie con tal de llegar al poder y perpetuarse en él como un monarca. Cuando lo alcanzó, además de los desposeídos de siempre, lo acompañaba una nutrida corte de militares supuestamente progresistas, un rejunte de políticos desahuciados de los partidos tradicionales, compinches y amantes, y los infaltables y numerosos parientes propios y políticos.
Sin demasiado en común entre ellos, la mayoría inicial huyó espantada y el actual cortejo del Amo de Venezuela está hermanado por el "sichavismo" a ultranza y una ansiedad por "progresar" rápidamente en el terreno económico, donde no le fue nada mal. Se trata de la rica, derrochona y ostentosa burguesía revolucionaria de la Quinta República, los nuevos VIPS que viven la algazara tropical sumergidos en los petrodólares revolucionarios y sin ningún sentimiento de culpa por los miserables que hurgan en los tachos de basura de las mugrientas calles de Caracas.
Declarado "socialista" de indefinidos postulados y afecto a las teorías conspirativas que cada tanto lo convierten en *"víctima de un atentado"*; vastago pródigo de Fidel Castro y

protector de las FARC y de cuanto guerrillero marginal pulula en la región; mercader pragmático del petróleo patrio que suministra al "enemigo" gringo, de cuyas ganancias millonarias abastece sus mundanos gastos privados y almacena carretadas de fusiles de guerra para su revolución inconclusa, Hugo Chávez camina a convertir a Venezuela en un régimen autocrático de imprevisibles consecuencias para la zona. Émulo del emir de Qatar, engendró Telesur, la *"Al Jazeera"* bolivariana, que en pocos meses transmitirá los escarceos televisivos de su tropa latinoamericana, ataviada con trajes típicos, mientras amordaza, doblega y extorsiona a periodistas, medios y opositores, con el argumento único de que *"mienten, atacan y difaman a la revolución bolivariana, porque están pagados por la CÍA".*

El comandante es un animal político y un populista extravagante y temerario.

Lo entrevisté en Caracas y en Buenos Aires, hablé con amigos, ex amigos, funcionarios, ex esposas y amantes, y guardo un extenso archivo sobre su vida política y personal. De baja estatura y aspecto de zambo, de lengua rápida e incansable, el mandatario venezolano es inteligente, seductor, astuto y con una voracidad de poder ilimitada (y preocupante). Asegura que es Bolívar y Ezequiel Mora, Juan Domingo Perón y el Che Guevara, una mezcla desopilante y de muy compleja conciliación. Quizás en lo único que Chávez se asemeja al líder de los descamisados argentinos es en la furiosa polarización social que se generó bajo su mandato, donde no hay término medio: un bando y el otro se odian con una intensidad sólo comparable a la Argentina de Perón, cuando las diferencias eran mortalmente incompatibles.

No quisiera vivir en un país gobernado por Chávez, con todo el cariño que siento por los venezolanos. Esa tierra caliente y mágica de mi adorado Cabrujas, el de aquellos estupendos culebrones de la tarde y de Rómulo Gallegos y su doña Bárbara.

Después de investigar y conocer su vida, sus abultados pecadillos públicos y privados no son perdonables (ni deben serlo por eso de que la izquierda es siempre buena y la derecha mala) nombre de cualquier resistencia antiimperialista, ni inflamado discurso patrio, ni exagerado y sospechoso amor a los pobres que, la verdad sea dicha, se asemeja a un asistencialismo muy conveniente para su eternización, con el petróleo en la mano como garrote o recompensa. Hombre seguro de él mismo y carente de complejos, representa cabalmente el latino ideario femenino que habla del macho feo y con mano dura, que cuanto más te maltrata, más te ama. De porte marcial, allí por donde pasa las mujeres de todas las edades se le abalanzan, lo abrazan y lo besan. Detallar la lista de amantes que la mitología popular le atribuye al comandante requeriría un tomo de la guía telefónica. Hombre de corazón abierto y dotes poéticas, deja una falda alborotada en cada país que visita.

Alicia Castro, la madura aeromoza argentina, diputada y dirigente del sindicato de aeronavegantes, de abultada cabellera rubia, piernas largas y labios rojo furioso, no pierde ocasión para declarar el amor incondicional, apasionado y combatiente que siente por su líder, quien cada vez que la encuentra la convierte en una reina. Sobre todo cuando se reúnen en la suite presidencial del hotel más caro de Buenos Aires o él la invita a darse una vueltita por Venezuela en el avión bolivariano estilo saudí, para "interiorizarse de la revolución y del Movimiento de la Quinta República". La sindicalista chavista de las pampas, contagiada del estilo de su jefe, parlotea sobre la relación que los une de manera enigmática: *"Mi romance es con la revolución, no debemos frivolizar esta relación de dos años que tengo con Hugo Chávez"*, mientras posa con aire sugestivo, minifalda roja y una fotografía del comandante en sus manos.

Mientras Hugo Chávez se declara socialista, expropia tierras privadas, proclama la revolución armada contra el capitalismo globalizador y sus fanáticos seguidores retozan y reviven añejas ilusiones setenteras, el hombre, su abundante y colorinche familia y una caterva extensa de amigos y lacayos viven como cesares en una tierra miserable. Frente a tantas y profundas desigualdades sociales y una casta gobernante disparatada, deshonesta y fiestera, cabe preguntarse alguna vez qué responsabilidades caben y a

quiénes.
La élite política y económica venezolana, así como gran parte de ese heterogéneo y multifacético rejunte opositor se dejaron cegar por las ambiciones personales y el resentimiento social -critican a Chávez por cosas tan superficiales como el color de su piel: dicen que es un "mono analfabeto"- y no fueron capaces de dar una solución racional a la crisis. Son los mismos que por acción u omisión arrastraron a Venezuela a la decadencia de la que emergió Hugo Chávez, los que apoyaron un golpe de Estado en 2002 y nunca se preocuparon por achicar el abismo cada vez mayor entre los ricos y los miserables, que hoy encuentran en el comandante a un padre dadivoso que escucha pero que, sobre todo, reparte. Según todos los analistas, aun los que simpatizan con el gobierno, el gasto público se triplicó en el 2004, por medio de las arcas de la estatal Petróleos de Venezuela. Entiendo bien por qué quieren a Hugo Chávez Frías más de la mitad empobrecida de Venezuela y por qué lo votaron y lo seguirán votando: el comandante es uno de ellos.
Antes de escribir esta crónica, hablé con mi amigo John Lee Anderson, quien escribió un extenso reportaje sobre Chávez en el semanario The New Yorker. Lo mismo que yo, sé que Anderson tuvo -y tiene- contradicciones con el mandamás de la revolución bolivariana. Rescato especialmente una frase de aquella conversación:
Comprendo bien por qué surgió Chávez y por qué mucha gente tiene sus esperanzas puestas en él, en que cambiará radicalmente la situación. Los políticos tradicionales son un fracaso, están atrás del escenario complotando, sus discursos son racistas, de clase, y ninguno ha hecho un esfuerzo maduro por abrir un diálogo con él. Desprecian a Chávez y sacan el dinero del país y el nivel de discusión es bajísimo. Por lo tanto, Hugo Chávez es un hombre muy solitario, aislado, se cree un micromanager y cree estar dotado de cierto espíritu mesiánico. Es un idealista, un showman. En él hay algo de Zelig, esa película de Woody Allen en la que el protagonista se vuelve gordo cuando se pone frente a un gordo y se vuelve negro cuando se pone frente a un negro. Tiene una gran necesidad de que la gente lo quiera y es muy difícil saber qué hay en el fondo. Es un hombre de muchas caras.
Los diarios venezolanos publicaron el año pasado los gastos anuales del presidente en su atuendo: 160.374 dólares, lo que es igual a pagarle un salario mínimo mensual a 620 obreros. Y los números hablan también de sus accesorios de tocador parece que el hombre no se fija en gastos a la hora de acicalarse: 22.593 dólares en cremas, rastrillos, perfumes y todo lo necesario para mantener suave y joven el cutis revolucionario.
El émulo de Bolívar aumentó sus gastos, desde el año 2000, en más de 747 por ciento. A esto se suman otros miles de dólares en vinos y en caprichos delicatessen, y todo del erario público. Como se puede apreciar, en los tiempos que corren, las revoluciones dan abundantes dividendos para los que los liderean: un caudillo polifacético emergente de una región miserable y volcánica, dueño de un discurso que penetra entre los olvidados (y siempre estafados) de la tierra.
Entrevisté a Hugo Chávez tres veces, una de ellas en Buenos Aires, antes de que ganara la elección que lo encumbró en el poder de Venezuela. Platicamos una noche, a mediados de los 90, en el hotel Panamericano de Buenos Aires. El entonces teniente coronel apareció acompañado de un par de militares *"carapintadas"* argentinos, del grupo *"Albatros"*, que habían estado presos, acusados de insurrección contra el gobierno de Raúl Alfonsín y el de Carlos Menem. Ellos eran sus contactos en Argentina y él mantenía correspondencia con ellos desde hacía tiempo. Desconfié de esos personajes y le dije algo, pero me respondió con evasivas. Había llegado a Buenos Aires invitado por el grupo de revoltosos, que le presentaron a Norberto Ceresole, un sociólogo argentino de dudosa procedencia y discurso nacionalista, asesor del coronel Mohamed Alí Seineldin y del actual legislador de la derecha peronista que reivindica la pena de muerte a los delincuentes, el militar golpista Aldo Rico. Cuando entrevisté a Seineldin en la cárcel, él

mismo me contó de su intercambio epistolar con Chávez.
Fue una larga entrevista y reconozco que el hombre tiene carisma, pero a la vez su excesiva y por momentos desopilante verborragia agobia. En la última gira que realizó a Buenos Aires, Néstor Kirchner argumentó varias excusas a la hora de quedarse a solas con el venezolano. El presidente argentino le confesó a sus hornbres que no soportaba más de 10 minutos los extensos monólogos de Chávez y, menos aún, sus desaforadas proclamas contra Estados Unidos. El venezolano puede pasarse horas mezclando frases de libros con extractos de poesías, con chistes y anécdotas de la vida cotidiana, de su propia vida y de su familia, con piropos lanzados como al azar.
Antes de terminar pidió mi agenda (un cuaderno poco cuidado, lleno de garabatos incomprensibles) y en una hoja en blanco escribió una larga dedicatoria que conservo. Habló del Che, de Bolívar y de San Martín. De Fidel Castro y de sus sueños revolucionarios, y todo el tiempo me llamó *"compañera"*. En ese entonces, parecía honesto y humilde, pero mi instinto hizo que no le creyera.
El poder es un pantano con pulpos voraces de largos tentáculos y los hombres, seres imperfectos y débiles, que se dejan abrazar. Como un Marco Polo del nuevo milenio, el robusto comandante ama los viajes alrededor del mundo: en tres años y medio de mandato permaneció en el exterior 200 días. Y para hacer más placenteros sus abultados periplos por el planeta, no encontró mejor opción que destinar de las empobrecidas arcas públicas venezolanas 65 millones de dólares para hacerse con un Airbus Jet, flamante, estilo saudí. El nuevo juguete de la "*corona revolucionaria*" es perfecto: suite presidencial tapizada en blanco y dorado, una business class adornada con una acuarela inmensa de Bolívar, una clase turista para 30 personas -el rumboso séquito que lo acompaña-, duchas y un sillón con masajeador para aliviar las tensiones en la espalda del hombre que se piensa a sí mismo como una reencarnación de Simón Bolívar.
Sus hombres cuentan que cuando el comandante recibió el avión, que suplantó al que había bautizado como *"el camastrón"*, se paseó frente a la nave disfrutándola de antemano, pero algo que vio no le gustó y pegó un grito. La bandera de Venezuela en el fuselaje no era de su agrado. Y ordenó, como un niño caprichoso, que lo repintaran e-xac-ta-men-te como él garabateaba el estandarte patrio en sus cuadernos infantiles. Modificación que se realizó por la módica suma de 500.000 dólares, que nuevamente salieron de los fondos del Estado.
Quienes lo conocen de toda la vida aseguran que el poder lo volvió loco y los que continúan a su lado, con una fidelidad tan frágil como un hilo, en voz baja, también dicen lo mismo. Que casi no duerme, que engulle compulsivamente todo lo que encuentra, que habla solo, que a veces llora y se deprime, que oculta micrófonos en los despachos del palacio Miraflores para saber qué dice su gente de él, que no tiene verdaderos afectos porque tiene terror de que lo traicionen, que gasta fortunas en ropa de marca, que colecciona relojes carísimos, que cuenta sus intimidades de manera vulgar en su programa de televisión Aló Presidente -el de mayor rating del país-, que adora las suites presidenciales de los hoteles de cinco estrellas, que compró el avión porque un jeque árabe le recriminó andar con una "basura", que tiene una amante en Ciudad Bolívar a la que visita en el mismísimo avión presidencial, que tiene amantes en varios países, que su mujer Marisabel lo abandonó porque él la maltrataba física y psicológicamente, que... y que y que...
Las historias abundan y pueden llenar las páginas de varios libros. Pero que el hombre sufrió una metamorfosis desde que llegó al poder y se volvió autoritario, ambicioso y excéntrico, es parte de la realidad cotidiana de Venezuela. Por lo menos, de una mitad del país.
-¡El comandante quiere que le traiga hallacas! -ordenó una voz marcial del otro lado del teléfono. Eran las 12 de la noche en una habitación del hotel más lujoso de Pekín. Elena, la conocida chef venezolana que lo acompañaba en la primera gira de 50 días por

los países asiáticos, saltó de la cama y corrió a preparar el envío que los custodios de Chávez pasaban a buscar por su habitación. La situación se repitió cinco veces. Al otro día, Chávez mandó llamar a Elena y le reclamó por sus hallacas: una especie de tamal, una comida típica venezolana que se sirve en épocas navideñas y es la preferida del comandante.
-Perdóneme, presidente, yo le mandé las hallacas cinco veces... ¿no las recibió?
Sorprendido, el hombre averiguó y descubrió que sus hallacas habían sido devoradas por la guardia de soldados que lo acompañaba. Enfurecido como un perro rabioso, pidió que nadie ingresara al piso que ocupaba y ordenó a gritos a sus infelices custodios dos horas de salto de rana y cuerpo a tierra, por los pasillos del hotel, como castigo. Los turistas y los empleados del lugar no daban crédito a lo que veían.
Pasaron algunos años desde la última vez que conversé con Chávez cuando me dedicó la carta que aún conservo. Sus triunfos reiterados le dieron forma a una porción del sueño dibujado en las hojas de aquella vieja agenda, hoy amarillenta: la presidencia y el poder, la Asamblea Constituyente, su amistad con Fidel, el liderazgo creciente y el fanatismo que despierta en millones. Incluso le tocó vivir en carne propia lo que alguna vez encabezó del otro lado del mostrador: un estúpido intento de golpe, que casi lo tira afuera del sillón, pero del que el hombre, como un Ave Fénix caribeño, supo resurgir.
Venezuela es hoy un territorio caótico y violento, partido en dos: una parte odia a Chávez y la otra lo venera con idéntica devoción. La situación económica no mejoró; al contrario, la pobreza aumentó a límites insostenibles.- desde que Hugo Chávez se hizo cargo del poder en 1999, la pobreza crítica aumentó en un 50 por ciento, según las encuestas. La devaluación monetaria golpeó los bolsillos de todos y alguno de sus más fieles acólitos de aquellos primeros años se esfumaron -defraudados o traicionados- o saltaron a los brazos de la oposición, que rumia sus odios días y noches, en la plaza de Altamira, y acumula más de un millón de firmas para echarlo del cargo.
Aunque la verdad es que cuando salió de la cárcel de Yare, Chávez ya estaba distanciado de sus camaradas. Por ejemplo, de Francisco Arias Cárdenas, quien luego se lanzó a disputar la presidencia con su propia fuerza política y perdió. Y dicen también que al cornpás del paladeo por el poder, ese dulce muy dulce que nadie rechaza, Hugo Chávez Frías se transformó. No solamente en la talla de la ropa o el volumen de su papada, indudablemente más abultada, sino en los gestos y su personalidad, de por sí compleja, reveló sus rasgos más oscuros y delirantes. El hombre no es aquel que conocí a mediados de los años 90 en Buenos Aires, ni el que vi en la cárcel de Yare, por lo menos en lo que hace al poder, al pantano y al pulpo. De aquel coronel austero, casi monacal, queda poco y nada.
Excéntrico, histriónico y megalómano, se mueve como el rey de un territorio pobre y alucinante como en un cuento de García Márquez. Un centauro alocado, desmesurado e insolente. Hace tiempo, el Nobel colombiano habló con el comandante en un vuelo a Caracas y terminó convencido de que había dos Chávez: uno que podía salvar a su país y el otro, un ilusionista que podía terminar convertido en un déspota más.
A la luz de la realidad venezolana, las dudas continúan -y se engrosan- y, hasta hoy, nadie pudo -ni puede- desentrañar los enigmas que esconde el bolivariano. ¿Cuál de ellos es el verdadero?, ¿cuántos personajes lleva en su interior? Ni los analistas políticos, los publicistas, los amigos, los camaradas de armas, las amantes y los psiquiatras lo saben.
Edmundo Chirinos, amigo de Chávez y psiquiatra oficial (*"consejero de Chávez en situaciones críticas"*, se define), dijo a John Lee Anderson que el comandante bolivariano tiende a ser vanidoso y *"tiene rasgos de narcisismo"*. Basado en una lista de rasgos caracteriológicos, Chirinos revela que presenta un autoritarismo incontenible que predispone a la gente en su contra, que reacciona exageradamente a las críticas, que es muy astuto y manipulador y nunca duerme más de dos o tres horas por noche. La psicóloga María Bustamante, en la revista colombiana Cambio, llegó a la conclusión de

que Chávez padece trastornos en la personalidad. Bustamante dice que tiene un sentido grandioso de la propia importancia, exageración de aciertos y talentos, preocupación con las propias fantasías de poder, demanda excesiva de admiración, sentido de ungido y benemérito, exclusión de quienes no estén de su parte, incomodidad cualido no es el centro de la atención, uso de la apariencia física para ser el primero en cualquier escenario, despliegue de movimientos cambiantes y superficiales, tendencia a sentirse herido con facilidad, despliegue de autodramatización teatral y exageración de emociones.
Argelia Melet, por su lado, no es cualquier psiquiatra: fue la mujer del ex guerrillero Douglas Bravo y miembro del Partido Comunista Venezolano. Conoció a Hugo Chávez en los años de la clandestinidad, cuando el comandante era "José Antonio". En una entrevista en el semanario La Razón dijo:
-"El problema es que dentro de la personalidad de Chávez lo que existe es alguien que no podía resistir a lo que es la seducción del poder, de la gloria, del jabolismo universal, que se presentó frente a él. Un hombre creado dentro de una estructura militar respondió como militar. No creo que Chávez valore la opinión de la gente que no dice lo que él quiere escuchar. Hay un libro de Marañón que se llama Psicopatología del poder, donde se describe el proceso de cambio de una persona que llega a una posición de poder y cambia su forma de pensar y relacionarse con los demás. Al revés de Gandhi, él se está asumiendo como la espada de Bolívar, como la diosa de la venganza."
Otros analistas descubrieron que Hugo Chávez tiene tendencia a la mitomanía. Por ejemplo, durante aquella conversación con García Márquez, le dio al colombiano una versión cambiada sobre la intentona golpista del 27 de febrero de 1989. Le dijo que camino a la universidad se había detenido en el Fuerte Tiuna y desde allí observó la movilización de las tropas que luego reprimirían la protesta callejera. Sin embargo, en el discurso que dio el 5 de agosto de 1999 en la inauguración de la Asamblea Nacional Constituyente, juró a los presentes que había visto la multitud (*"¡La vi con estos ojos!"*) desde el Palacio de Miraflores. Y para completar el cuadro del dislate, le confesó al periodista César Miguel Rondón, en su programa de radio, que en realidad no vio nada porque se encontraba en su casa en reposo por recomendación médica, debido a una gripe. Lo peor del caso es que la represión no fue el 27 sino el 28 de febrero. O sea, a esta altura, me pregunto si en lugar de dos, hay tres o cuatro Chávez y creo que ni él mismo tiene conciencia de cuántos lleva en su interior.
Su ámbito preferido y un espacio donde desarrolla a pleno sus dotes de gran showman es el programa radial y televisivo ¡Aló Presidente!, que puede ser montado en cualquier parte, en el pueblo más recóndito y miserable o incluso -como ocurrió- transmitirse desde San Petersburgo, Praga o Hong Kong, o cualquier capital del mundo donde el hombre se encuentre de gira. Durante 77 emisiones de ¡Aló Presidente!, Hugo Chávez ha logrado estar en el aire más de 230 horas.
Hace anuncios de gobierno, echa ministros, insulta a los opositores, da clases elementales de geografía con un mapa y un señalador, consejos de salud, nombra a Bolívar cada segundo, envía saludos a su amigo Fidel, canta, recita poesías y hasta declaraciones de amor a su mujer Marisabel el día de los enamorados. Eso sí, siempre con una réplica en miniatura de la nueva Constitución de Venezuela, que ondea frente a las cámaras y con la que remarca cada frase:
"Por eso nos echan tanto plomo, esa razón vale. No es por la verruga mía. Oye, yo soy feo, pero yo no creo que sea el presidente más feo. Oye, vale, ¿qué opinas tú, Marisabel? ¿Qué yo soy el más feo de todos los presidentes? ¿Verdad que no?"
"*Este micrófono habrá que apretarlo aquí un poquito a ver qué pasa. Sí, está muy pesado, como que está gordo. Hay gente que se está poniendo gorda. Lo he dicho y lo sigo diciendo. Hay una corriente de gordismo y vamos a trotar, vamos a hacer educación física y deportes, como se hace en las escuelas bolivarianas."*
"Más de una vez vi a Marisabel sacarse su teta y darle a Resines. Especialmente en ese

primer año de vida es vital que usted, amiga mía, pele su teta y le dé la teta al muchacho. Dele la teta a su muchacho. ¿Por qué se ríe tanto? Es sencillito, pele la teta y dele al muchacho y a la muchacha leche de teta."
Son algunas frases que el diario El Universal extrajo de los extensos monólogos presidenciales de la audición oficial.
Las mujeres de Hugo Chávez son todo un tema de conversación. Son lo que él llama sus *"centauras de la revolución"* y de su proyecto. El comandante seduce tanto y a tanta velocidad que en realidad se tiene la sensación de que a todas les dice lo mismo.
Hay una mujer, que lo conoce profundamente, en especial durante los tiempos del despoder y las necesidades, cuando no era nadie, sólo un puñado de sueños locos.
-Era un hombre sencillo, cálido, amoroso. Era un hombre que llegaba con chocolates, con flores, que me escribía poemas. Lo veo sentado leyendo con un maletín cargado de libros de poesías, de novelas, de ensayos. Siempre leyendo. Ese histrionismo de hoy no es producto de la casualidad, no hay que subestimarlo, está estudiado desde hace muchos años. Hugo es muy tenaz, muy perseverante, logra lo que se propone. Además, era atento y estaba siempre pendiente de mis problemas. Recuerdo que una vez me partí la frente, me hice una herida fea, y él iba a verme con regularidad, estaba sumamente preocupado por mí, y eso que en ese momento todavía no teníamos una relación afectiva... Otra vez fue un esguince, él me sobreprotegía mucho, nunca me maltrató. No recuerdo un cumpleaños en 10 años que no haya pasado conmigo.
-¿Qué significa Chávez para usted?
-Hoy, sinceramente, no me importa nada, se me terminó el amor. Yo lo dejé, aunque su madre me rogó llorando que no lo hiciera. Pero el último tiempo en la cárcel noté que le gustaba que lo halagaran, no respetaba a los demás, no escuchaba, él era el único que tenía razón. Había dejado de ser un demócrata y sus compañeros se quejaban mucho, generó divisiones y peleas. Ahí empezó a mentir, yo lo escuchaba por la radio....y dije basta... Estuvimos casi 10 años juntos. Nos amamos mucho, pero no, no es éste el hombre del que me enamoré, por el que era capaz de todo. Éste es otro Chávez, lo desconozco: está completamente loco por el poder y por él mismo. Es capaz de las peores cosas. ¡Dios mío!, aquí va a correr mucha sangre por su culpa, estoy aterrada.
Mientras habla, la mujer me observa con sus grandes ojos castaños. Es elegante, culta y se expresa con suavidad. Estamos sentadas en el bar del hotel Marriott de Caracas y hablamos tres horas.
Herma Marsksman fue amante de Hugo Chávez de 1984 a 1993. Y los que conocen bien al comandante juran que ella fue la mujer que más amó. Su compañera de los primeros años, la única que participó activamente en la revuelta militar del 4 de febrero de 1992. En ese tiempo, Chávez estaba casado con Nancy Colmenares, una novia de la adolescencia con la que tuvo tres hijos: Rosa Virginia, María y Hugo. Sin embargo, Herma pasaba casi todo el tiempo con él y, con la paciencia de un artesano, escuchó sus penas, guardó sus secretos y ayudó a construir la personalidad política inicial del futuro amo de Venezuela. *"Yo corregía sus discursos e incluso respondía las preguntas que le mandaban los periodistas, cuando estaba preso."* En su casa, Herma conserva cartas, poemas, las primeras charreteras, un mechón de cabello que la abuela le cortó cuando era un niño, documentos políticos del grupo y hasta los diarios privados. Me cuenta que se conocieron en la casa de su hermana -ya muerta-, una adivina que leía las cartas, a tal extremo que la mujer vio su propia muerte, según recuerda Herma con perturbación. Y Hugo Chávez, que cree en los brujos y en los santeros y en todo lo que tenga que ver con lo sobrenatural, se enamoró de Herma entre predicciones, fetiches y oráculos.
Mientras la escuchaba me pasó algo extraño. Por un segundo sentí que estaba hablando con Ana María Lujan, la primera novia de Carlos Menem. ¡Qué raro y qué loco!, el tiempo parecía girar hacia atrás como una máquina. Otra historia, otros amores y el mismo maldito y glorioso poder.
-Desde que lo conocí, supe que Hugo iba a llegar lejos. En 1974, él ya decía que iba a

ser presidente. Lo ayudé, lo acompañé en todo y le puse el hombro para que llorara sus penas, muchas noches... Pobre, tuvo una infancia traumática, se llevaba muy mal con la madre y ella era durísima con él. Lo crió su abuela Rosinés, a la que adoraba, pero eran muy pobres. Pasaban muchas necesidades. Cuando iba al colegio, en los recreos, Hugo vendía los dulces que su abuela preparaba. Yo guardo unas cartas que, ya grande, le escribió a su madre y que nunca se animó a entregarle. Mucho tiempo anduvo con ellas en el bolsillo. Siempre tuvieron una relación tormentosa que lo marcó.

Cuando Hugo Rafael Chávez Frías era un niño, se escapaba de los explosivos enojos de su madre Elena -hoy primera dama del estado de Barinas, donde su padre Hugo es el gobernador- *y corría a esconderse en el escaparate de la casa de su abuela. Y ahí se quedaba, acurrucado, muerto de miedo, esperando que la mujer se cansara de gritar y se fuera. El trauma le duró tantos años, a tal punto que algunos atribuyen sus cíclicas depresiones de hoy a aquellas palizas que su madre le propinaba y lo paralizaban de pánico.*

El analista político Alberto Garrido es quizá la persona que más conoce de Chávez. Él fue quien denominó a esta reacción madre-hijo presidente *"el síndrome del escaparate"*. Cuando el comandante se enfrenta con un momento de tensión o de dificultad, desaparece de todas partes, sin que ninguno de sus asesores o familiares sepa dónde anda escondido. Y pareciera que esto ocurre más a menudo de lo que la gente imagina. Sus antiguos compañeros de conspiración aseguran que, siendo paracaidista, a Hugo Chávez tenían que darle un empujón en la puerta del avión porque se aterrorizaba frente al vacío.

-*¿Chávez es depresivo?* -pregunté a Herma esa tarde.

-*Sí, tiene periodos de depresión, llora cuando está frente a una situación que lo angustia. Siempre fue así y creo que en esto tiene mucha culpa la madre. Fue demasiado cruel con él. Me dijeron los amigos que está tomando muchos antidepresivos, porque tiene continuos saltos de estado de ánimo. Pasa de la euforia a la depresión de manera alarmante. Algunas veces creo que Hugo busca con todo este desastre una salida épica, que de repente lo maten, para sobrevivir como un mártir. Tanto habla de la muerte, tanto cree que lo van a matar, que seguramente lo está buscando.*

En 1998, antes de asumir el poder, Chávez conoció a una blonda y curvilínea locutora de Barquisimeto con la que, luego de unos meses de noviazgo, se casó. Ella confesaría después en una revista que la noche de la primera cita hicieron el amor locamente en la cabina de un auto. Con Marisabel Rodríguez vivió una historia tumultuosa hasta hace poco tiempo, cuando la mujer se alejó del hogar en medio de rumores de maltratos morales y físicos. Sin embargo, mientras fungió como primera dama de la revolución bolivariana, Marisabel -que con Chávez tuvo una niña a la que bautizaron Rosinés- aprovechó al máximo los beneficios del cargo de su marido. Casi inmediatamente después de instalarse en La Casona (la dacha caribeña), se le vio con costosos trajes de seda de Escada, carteras Vuitton y relojes Cartier. Imbuida del espíritu libertario y dadivoso de su marido, utilizó uno de los aviones de la flota oficial para pasar sus vacaciones en Orlando y la nave tuvo que regresar a buscar el biberón de la niña, que habían olvidado. Sin embargo, la inestabilidad emocional de la mujer -según todos los consultados- llevó al fracaso al matrimonio. Marisabel dice que los celos por las escapadas y desapariciones abruptas de su marido, durante varios días, y el odio del entorno fueron los causantes del final. El fuerte temperamento de la mujer chocaba con la personalidad de Chávez y en las cada vez más frecuentes peleas, muchos escucharon que volaban platos y jarrones. Edmundo Chirinos, quien la atendía, asegura que la primera dama tuvo varios intentos de suicidio porque el fanático entorno chavista conspiraba día y noche para sacarla del medio. Desde José Vicente Rangel, el mediocre y obsecuente ex periodista devenido vicepresidente y fanático de las cirugías estéticas (su rostro puede dar fe), al igual que los custodios presidenciales y los miembros de la

Inteligencia, odiaban a Marisabel día y noche. Atormentada por las conspiraciones, casi paranoica, y muerta de miedo, la solitaria primera dama chavista grababa informaciones confidenciales, anécdotas privadas y asuntos de Estado que enviaba a resguardo a una oficina de Estados Unidos. Lo curioso es que en Barquisimeto, donde vive recluida desde que se fue de la residencia revolucionaria, el odio dio paso al amor y desde allí se comunicó con la CNN para salvar a su comandante preso de los golpistas.
Más allá de los complicados enredos sentimentales y familiares, Hugo Chávez sigue su vida como si nada. El centauro mayor de Sabaneta, eternizado en el poder, confía en su buena fortuna y en los sortilegios de los brujos. Tan jocoso y transgresor, que cuando visitó al emperador de Japón, Hirohito, a quien se sabe que no se puede tocar ni mirar a los ojos y a pesar de las recomendaciones del personal de protocolo, apenas lo vio y saltó sobre el aristócrata, a quien abrazó y palmeó la espalda ante el estupor de los acompañantes. Lo mismo sucedió con la reina de Inglaterra, que agarró de un brazo y se la llevó a caminar. A la reina Sofía de España trató de besarla y, cuando visitó Rusia, hizo al presidente Putin una demostración de un salto de karate. Tutea a cualquiera, no importa quién está enfrente, y al mismo papa le colocó la mano en el hornbro como si fuera su viejo compinche.
El aspecto físico y las innovaciones en la vestimenta de Chávez llaman la atención de los columnistas de sociales de los diarios nacionales. Roland Carreño, el periodista estrella de la sección de eventos del diario El Nacional, de Caracas, afirma:
En lo que hace al vestuario, el comandante mantiene, como en todo, un doble discurso. Cuando visita las barriadas populares viste ropa deportiva, que más lo hace parecer un entrenador cubano de boxeo que un jefe de Estado. Pero cuando está lejos de la plebe, se convierte en un hombre de ternos de gabardina de 1000 dólares, camisas de algodón italiano o piqué con monograma bordado en los puños o en uno de los laterales, yuntas de plata, bolígrafos Mont Blanc, relojes Cartier, sus preferidos, o Bulgari, que son adquiridos en Francia o en las joyerías Gerais o Daoro, las más caras de Caracas.
Hugo Chávez Frías compra sus trajes de 800 dólares a Clement, una de las sastrerías más prestigiosas de Venezuela, donde se visten los empresarios más ricos, y para disimular los rumores sobre sus adquisiciones, en uno de sus programas de televisión confesó con todo desparpajo y cara de enojado que había entrado a su clóset y descubrió... ¡¡100 trajes!! *"¡¡¿Quién necesita 100 trajes aquí?!! Inmediatamente mandé botarlos..."*, exclamó frente a las cámaras, haciendo alardes de humildad y recordando sus años de pobreza, allá en Barinas, con su abuela Rosa Inés.
Sin embargo, el último viaje del comandante de la revolución bolivariana a Europa, que duró cinco días, a mediados de octubre, le costó al Estado venezolano un millón de dólares. Hugo Chávez se alojó en el hotel Bristol en una suite de 5.000 dólares la noche y viajó con un séquito de 35 personas y junto a su hija mayor Rosa Virginia, una especie de Zulemita Menem o Keiko Fujimori a la venezolana. La numerosa familia presidencial tampoco la pasa mal. Por lo menos, tienen su futuro, y el de sus descendientes, bien asegurado, que no es poca cosa en la empobrecida tierra caribeña. El Estado de Barinas les pertenece por completo, el mismo llano donde el comandante correteaba descalzo con los dulces que hacía la abuela Rosines para cubrir las necesidades. Y la malvada mamá Elena, la que lo encerraba en el aparador cuando el niño Hugo se portaba mal, hoy es una matrona vestida con trajes de marca visible y enjoyada, que conduce junto a su marido y sus hijos los destinos del lugar con mano dura y porte de reina madre.
Sin dudas, todo lo que oí y vi se parecía bastante a una travesía que ya había recorrido. ¿Qué destino le espera al hombre que se atrevió a juntar a Perón con el Che y a caminar entre Dios y el diablo? La respuesta es una incógnita. De cualquier manera, Hugo Chávez Frías ya tiene su lugar en la historia. El tiempo se encargará de escribir su epitafio.

Autor: Dialo

Hace poco me enteré que el susodicho estaba intentando adquirir una pequeña pero bien comunicada refinería en el África subsahariana, y una cadena de gasolineras. Lo hacía a su nombre, no a nombre de PDVSA -parece que intenta asegurarse un cómodo retiro en caso de sufrir un golpe militar o una debacle electoral- que también hace negocios adquiriendo distribuidoras y refinerías en el extranjero para diversificar el negocio.
El artículo que publicas parece de periodismo rosa. No profundiza en la problemática y desarrollo comercial venezolano, ni en los distintos caracteres económicos y humanos de los diferentes Estados que componen su federación.
Los mandatarios iberoamericanos son muy dados a la parafernalia, a lo extremo y desaforado como su sociedad acomodada, que parece tener el síntoma de la falta de aristocracia, excepto algún caso aislado, claro. Carlos Andrés Pérez, amigo de Felipe y corrupto entre los corruptos, también fue un caso típico.
Es evidente que América latina aun debe aprender mucho en ese sentido.
Los presidentes de Estado europeos, cuando viajan también lo hacen gastando mucho, con bastante séquito y en los hoteles más caros. Felipe se llevó a China una muchedumbre, y Pujol, al Japón, más de cien industriales catalanes con sus mujeres y con todos los gastos pagados, y sé seguro que ni media docena iban por negocios.
Un abrazo.
